Mechanical Engineering, M.S.M.E.

Curriculum in Master of Science in Mechanical Engineering

A candidate for the M.S. degree in mechanical engineering must comply with the rules and regulations as outlined in the WVU Graduate Catalog and the specific requirements of the Statler College and the Mechanical and Aerospace Engineering Department.

Program Requirements

All M.S. degree candidates are required to perform research (except those pursuing the coursework-only degree option) and follow a planned program of study. The student’s research advisor, in conjunction with the student’s Advising and Examining Committee (AEC) will be responsible for determining the plan of study appropriate to the student’s needs. The underlying principle of the planned program is to provide the students with the necessary support to complete their degree and prepare them for their career.

Curriculum Requirements

A minimum cumulative GPA of 3.0 is required in all courses.

Course Requirements *

A minimum of 60% of courses must be from 500 level or above.

Thesis Option (30 credit hours)

- Technical Electives (6 credit hours)
- Mathematics Requirements (6 credit hours)
- Additional Courses (12 credit hours) - Any BIOM, CE, CHEM, CPE, CS, EE, IENG, MAE, MATH, MINE, PNGE, PHYS, SENG, or STAT courses 400-799, as approved by the student’s AEC

MAE 697 Research (6 credit hours)

Thesis

Final Oral or Written Examination

Problem Report Option (33 credit hours)

- Technical Electives (6 credit hours)
- Mathematics Requirements (6 credit hours)
- Additional Courses (18 credit hours) - Any BIOM, CE, CHEM, CPE, CS, EE, IENG, MAE, MATH, MINE, PNGE, PHYS, SENG, or STAT courses 400-799, as approved by the student’s AEC

MAE 697 Research (3 credit hours)

Formal Written Report or Professional Report/Paper

Final Oral or Written Examination

Coursework Option (33 credit hours)

- Technical Electives (18 credit hours)
- Mathematics Requirements (6 credit hours)
- Additional Courses (9 credit hours) - Any BIOM, CE, CHEM, CPE, CS, EE, IENG, MAE, MATH, MINE, PNGE, PHYS, SENG, or STAT courses 400-799, as approved by the student’s AEC

Comprehensive Exam (Written or Oral)

Total Hours 30-33

MATHEMATICS REQUIREMENTS FOR ALL OPTIONS (6 CREDIT HOURS)

Select two of the following (at least one course with MATH prefix):

- MATH 420 Numerical Analysis 1
- MATH 441 Applied Linear Algebra
- MATH 456 Complex Variables
- MATH 521 Numerical Analysis
- MATH 522 Numerical Solution of PDE
- MATH 541 Modern Algebra
- MATH 543 Linear Algebra
- MATH 545 Number Theory 1
- MATH 551 Real Variables 1
- MATH 555 Complex Variables 1
MATH 560  Introduction to Dynamical Systems and Applications
MATH 563  Mathematics Modeling
MATH 564  Intermediate Differential Equations
MATH 567  Advanced Calculus
MATH 568  Advanced Calculus
MATH 573  Graph Theory
STAT 513  Design of Experiments
STAT 545  Applied Regression Analysis
STAT 561  Theory of Statistics 1
STAT 562  Theory of Statistics 2
MAE 515  Analytical Methods in Engineering
MAE 623  Conduction Heat Transfer
MAE 633  Computational Fluid Dynamics
MAE 640  Continuum Mechanics
MAE 645  Energy Methods in Applied Mechanics
CHE 531  Mathematical Methods in Chemical Engineering
EE 463  Digital Signal Processing Fundamentals
EE 465  Introduction to Digital Image Processing
EE 515  Linear Control Systems
EE 517  Optimal Control
IENG 518  Technology Forecasting
IENG 553  Applied Linear Programming
PHYS 461  Thermodynamics and Statistical Mechanics
PHYS 611  Introduction to Mathematical Physics

TECHNICAL AREA COURSES FOR THESIS OR PROBLEM REPORT OPTIONS (6 CREDIT HOURS)

Select two courses in a single core technical area from the following:

Area A: Fluid Mechanics and Aerodynamics (FMA)
- MAE 532  Dynamics of Viscous Fluids
- MAE 624  Convection Heat Transfer
  or MAE 636  Fundamentals of Turbulent Flow

Area B: Thermal Sciences and Systems (TSS)
- MAE 521  Advanced Thermodynamics 1
- MAE 532  Dynamics of Viscous Fluids
- MAE 624  Convection Heat Transfer

Area C: Dynamics and Controls (D&C)
- MAE 642  Intermediate Dynamics
  or MAE 653  Advanced Vibrations
- MAE 660  Feedback Control in Mechanical Engineering

Area D: Solid Mechanics and Design (SMD)
- MAE 543  Advanced Mechanics of Materials
  or MAE 642  Intermediate Dynamics
- MAE 640  Continuum Mechanics
  or MAE 653  Advanced Vibrations

Area E: Materials Science (MS)
- MAE 580  Crystallography and Crystals
- MAE 583  Thermodynamics and Kinetics of Materials
- MAE 649  Microscopy of Materials
TECHNICAL AREA COURSES FOR COURSEWORK OPTION (18 CREDIT HOURS)

Required Courses

* Students who do not hold a baccalaureate degree in mechanical engineering will be required to take a set of undergraduate mechanical engineering courses above and beyond the minimum coursework requirements in order to overcome deficiencies in the mechanical engineering area.

Final Examination

M.S. students following the thesis or problem report option must prepare a written research proposal. The proposal must be approved by the student's AEC at least one semester prior to the final oral examination.

All students, regardless of option, are required to pass a final oral or written examination, administered by their AEC, covering the thesis or problem report and/or related course material.

The students request for the comprehensive exam for students in the Coursework Only degree option must be filed at least four weeks in advance of the desired date of the exam. The comprehensive exam for students in the Coursework Only degree option must be passed at least 3 weeks before graduation.

Suggested Plan of Study

The plan below illustrates the Thesis Option. It is important for students to take courses in the order specified as much as possible; all prerequisites and concurrent requirements must be observed. A typical M.S.M.E degree program that completes degree requirements in two years is as follows.

First Year

<table>
<thead>
<tr>
<th>Fall</th>

Major Learning Outcomes

MECHANICAL ENGINEERING

The MAE Department is committed to deliver high quality education and research experience to all graduate students in order to enable them to achieve success in their careers, though the following Learning Goals:

- Expertise, depth and breadth in a chosen field of mechanical engineering.
- Capacity to engage in original research, advanced technological discovery and innovation in order to advance the frontiers of knowledge in the science of the mechanical engineering discipline.
- Capacity of effective high level communication in order to document, disseminate and transfer knowledge of the science of the mechanical engineering discipline in educational, research or applied workplace settings.
- Appreciation and understanding of the role of the science of mechanical engineering discipline in a global and societal context.
