Physics

Degrees Offered

• Master of Science
• Doctor of Philosophy

Nature of the Program

The graduate program is designed to provide a solid background in classical and modern physics, a broad understanding of major research fields, and concentrated research experience in one area. Applicants normally enter with a bachelor of science degree in physics. A student whose background is weak in a particular area is encouraged to register for the appropriate undergraduate course. The normal first-year courses include PHYS 611, PHYS 651, PHYS 631, and PHYS 633 plus possible electives. In the courses, no distinction is made between those students who intend a terminal M.S. degree and those who intend a Ph.D. degree. The minimum grade for credit in graduate courses is C, and a grade point average of 2.75 must be maintained. A GPA of 3.0 is required for graduation with either a M.S. or Ph.D. degree. Progress of all graduate students is reviewed annually by the graduate advisor or their Ph.D. committee.

Financial Aid

With rare exceptions, all students who are admitted receive financial support. Beginning students usually receive teaching assistantships; more advanced students receive research assistantships. Several fellowships are available for outstanding students, allowing full-time concentration on coursework and research and a more rapid progress toward the degree.

FACULTY

CHAIR

• Earl Scime - Ph.D. (University of Wisconsin-Madison)
  Oleg D. Jefimenko Professor, Plasma Physics

PROFESSORS

• Wathiq Abdul-Razzaq - Ph.D. (University of Illinois - Chicago)
  Physics Education
• Paul Cassak - Ph.D. (University of Maryland)
  Plasma Physics
• Leonardo Golubovic - Ph.D. (University of Belgrade)
  Condensed Matter Physics and Statistical Physics
• Matthew B. Johnson - Ph.D. (California Institute of Technology)
  Condensed Matter Physics
• Mark E. Koepe - Ph.D. (University of Maryland)
  Plasma Physics
• James P. Lewis - Ph.D. (Arizona State University)
  Condensed Matter Physics
• Lian Li - PhD (University of Arizona)
  Carroll Professor, Condensed Matter Physics
• Duncan Lorimer - Ph.D. (University of Manchester)
  Astrophysics/Astronomy
• Maura McLaughlin - Ph.D. (Cornell University)
  Eberly Family Professor, Astrophysics/Astronomy
• Earl E. Scime - Ph.D. (University of Wisconsin - Madison)
  Oleg D. Jefimenko Professor, Plasma Physics
• Gay Stewart - Ph.D. (University of Illinois-Urbana Champaign)
  Eberly Professor of STEM Education

ASSOCIATE PROFESSORS

• Loren Anderson - Ph.D. (Boston University)
  Astrophysics/Astronomy
• Alan Bristow - Ph.D. (University of Sheffield)
  Condensed Matter Physics
• Cheng Cen - Ph.D. (University of Pittsburgh)
  Condensed Matter Physics
• Edward Flagg - Ph.D. (University of Texas - Austin)
  Condensed Matter Physics
• Mikel Holcomb - Ph.D. (University of California - Berkeley)
  Condensed Matter Physics
• Paul Miller - Ph.D. (West Virginia University)
  Physics Education Research
• D.J. Pisano - Ph.D. (University of Wisconsin - Madison)
  Astrophysics/Astronomy
• Tudor Stanescu - Ph.D. (University of Illinois)
  Theoretical Condensed
• John Stewart - Ph.D. (University of Illinois-Urbana Champaign)
  Physics Education Research

ASSISTANT PROFESSORS
• Adam Kobelski - Ph.D. (University of Montana)
  Solar Physics, Physics Education Research
• Joonhee Lee - Ph.D. (Seoul National University)
  Biophysics
• Sarah Burke Spolaor - Ph.D. (Swinburne Institute of Technology)
  Astrophysics/Astronomy
• Sean McWilliams - Ph.D. (University of Maryland)
  Astrophysics/Astronomy
• Weichao Tu - Ph.D. (University of Colorado-Boulder)
  Space Plasma Physics
• Kathryn Williamson - Ph.D. (Montana State University)
  Astronomy Education Research

RESEARCH PROFESSORS
• Vladimir Demidov - Ph.D. (St. Petersburg University)
  Plasma Physics and Plasma Chemistry

ADJUNCT ASSOCIATE PROFESSORS
• Amy Keesee - Ph.D. (West Virginia University)
  Experimental Plasma Physics
• Julian Schulze - Ph.D. (Ruhr University - Bochum)
  Plasma Physics

RESEARCH ASSISTANT PROFESSOR
• Yanjun Ma - Ph.D. (University of Pittsburgh)
  Condensed Matter Physics
• Qiang Wang - Ph.D. (University of Colorado - Boulder)
  Condensed Matter Physics

PROFESSORS EMERITI
• Larry Halliburton - Ph.D. (University of Missouri - Columbia)
  Condensed Matter Physics
• Arthur S. Pavlovic - Ph.D. (Columbia University)
  Condensed Matter Physics
• Mohindar S. Seehra - Ph.D. (University of Rochester)
  Condensed Matter Physics
• Richard Treat - Ph.D. (University of California - Riverside)
  General Relativity
• H. Arthur Weldon - Ph.D. (Massachusetts Institute of Technology)
  Particle Physics
Admissions

Applicants are expected to have a bachelor’s degree in physics with upper-division courses in electricity and magnetism, mechanics, quantum mechanics, thermodynamics, and mathematical methods with a GPA of at least 3.0. Students lacking some of these courses may be admitted provisionally and will be allowed to remedy the deficiencies by taking the appropriate undergraduate courses. The GRE General Test is required. The GRE Physics Subject Test is strongly recommended, particularly for students from non-US institutions. If English is not the student’s native language, TOEFL or IELTS scores are also required. The application deadline is January 15. There is no distinction made between admission to the Ph.D. and M.S. programs. Contact the department for additional information.

Master of Science

- **Credit Hours:** Students are required to complete a minimum number of 31 graduate-level credit hours in Physics or Astronomy.
- **Grade Point Average:** Students must earn a minimum cumulative and major GPA of 2.75, and a minimum grade of C- in all classes applied to the degree.

**MAJOR REQUIREMENTS**

**CORE COURSES**

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>PHYS 611</td>
<td>Introduction to Mathematical Physics</td>
</tr>
<tr>
<td>PHYS 631</td>
<td>Advanced Classical Mechanics 1</td>
</tr>
<tr>
<td>PHYS 633</td>
<td>Electromagnetism 1</td>
</tr>
<tr>
<td>PHYS 651</td>
<td>Quantum Mechanics 1</td>
</tr>
<tr>
<td>PHYS 761</td>
<td>Statistical Mechanics</td>
</tr>
<tr>
<td>PHYS 799</td>
<td>Graduate Colloquium</td>
</tr>
</tbody>
</table>

**COMPLETION OPTION:**

Select one completion option

- **Non-Thesis Option:** 5 courses in PHYS or ASTR at the 600 or 700 level
- **Thesis Option:** 1 course in PHYS or ASTR at the 600 or 700 level

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>

<tbody>
<tr>
<td>PHYS 697</td>
<td>Research</td>
</tr>
</tbody>
</table>

Total Hours 31

* Except ASTR 697, ASTR 797, PHYS 697, PHYS 797, or PHYS 799.

**Degree Requirements**

- **Course Requirements:** Students must complete a minimum of 46 credit hours in physics or astronomy at the 600 or 700 level.
- **Calculation of the GPA:** Students must maintain a minimum overall GPA of 2.75, and 3.0 or better in graduate physics or astronomy courses taken at WVU.
- **Research Requirement:** Research is the central focus of the degree and is directed by a faculty adviser over a period of several years. When the research is completed, the student must write a dissertation and defend it before the doctoral committee of four faculty. The average completion time for the Ph.D. is five years beyond the B.S. Research specialties within the department include astrophysics/astronomy, biophysics, condensed matter physics, physics education research, and plasma physics.
- **Candidacy Examinations:** To be admitted to candidacy for the Ph.D., a student must pass both a written and an oral candidacy examination. The written examination consists of three parts: quantum mechanics, electromagnetism, and classical mechanics.
- **Progress Toward Completion:** Students must maintain a GPA of 3.0 or better in graduate physics and astronomy courses taken at WVU. Students must pass all three graduate qualifying exams by the end of their fourth semester. All students are evaluated annually before the end of September by their Ph.D. committee.

ELECTIVES:

Select three ASTR or PHYS courses at the 600 or 700 level.

* Except ASTR 797 and PHYS 797

Degree Progress

Typical plans of study for M.S. and Ph.D. students are available in the Graduate Student Handbook. Students are evaluated each year by either the Graduate Advisor or their Ph.D. committee.

To remain in good standing in the program, each student must maintain a 3.0 GPA or better. Upon completion of their third written qualification exam, Ph.D. students have up to 2 years to pass the oral qualification exam. The committee that gives the oral exam must consist of at least four members, with one of these members being external to the department. This committee also forms the Ph.D. advisory committee and the defense exam committee, with the chair of this committee being the student's research advisor.

After the oral exam, Ph.D. students have 5 years to defend their Ph.D. dissertation. Each year, Ph.D. students must give a presentation and submit a report to the Ph.D. advisory committee for the evaluation of progress towards completion of the Ph.D. degree is reviewed and discussed. The report has to be signed by all members of the committee, along with any comments and recommendations, before being submitted to the Departmental graduate advisor. More information is available in the Physics and Astronomy Graduate Student Handbook.

Major Learning Outcomes

PHYSICS AND ASTRONOMY

The central missions of the Graduate Program in Physics are to train the next generation of Physicists and Astronomers for productive careers in the global economy and to expand the scientific boundaries of physics and astronomy.

Students earning a M.S. or Ph.D. in Physics will be able to:

- Explain physics and astronomy principles as they pertain to their specific field of research.
- Demonstrate the ability to understand and critically evaluate the existing literature published within their field.
- Independently design and execute new experimental, theoretical, or computational studies that can address important scientific questions in physics and astronomy.
- Effectively communicate their research in oral and written formats, including the ability to author manuscripts suitable for publication in peer reviewed scientific journals.
- Understand the ethical impact of personal and professional behavior.

Academic Standards

To be a graduate student in good standing requires the following:

- Maintain a GPA of 2.75 or better in graduate physics courses taken at WVU, excluding PHYS 797.
- A GPA of 3.0 or better is required for graduation.
- All entering Ph.D. students are required to take all three written graduate exams at the beginning of, or immediately prior to, their first semester.
• Following the initial exam, as needed, Ph.D. students can retake exams up to three times, but no later than the beginning of their fourth semester of graduate studies.
• Ph.D. students must select a Ph.D. committee of four faculty after passing the written exams.
• Ph.D. students must complete the oral candidacy examination within three semesters (after completing the third section of the written candidacy examination).
• Students admitted as M.S. degree candidates are not expected to take the graduate qualifying exams but must maintain at GPA of 2.75 and complete their M.S. degree within three years.
