Psychology

Degrees Offered

- Master of Science
- Doctor of Philosophy

Doctoral Program Majors

The doctoral degree major areas of study in Behavior Analysis, Behavioral Neuroscience, Clinical & Clinical Child Psychology, and Life-Span Developmental Psychology prepare students for careers in research, teaching, and/or practice.

Program Accreditation

The Clinical Program at West Virginia University is comprised of two major areas of study: Clinical Psychology and Clinical Child Psychology. The Program has been accredited continuously by the American Psychological Association since 1966. In 2012, the Program was re-accredited for a full 7 years, with the next site visit scheduled to occur in 2019. For any questions regarding accreditation of this or any other program, contact the Office of Program Consultation and Accreditation of the American Psychological Association, 750 First Street, NE, Washington, DC 20002. Phone number: (202) 336-5979. Website: http://www.apa.org/ed/accreditation.

The Behavior Analysis Program at West Virginia University is accredited by the Association for Behavior Analysis International. In 2014, the Program was re-accredited from 2014-2019.

Admission

Students are admitted only at the beginning of the fall semester. Applications must be completed by the preceding December 1.

Acceptance is based on the following:

- Adequate academic aptitude at the graduate level as measured by the Graduate Record Examination
- Achievement in undergraduate coursework with a minimum grade point average of 3.0
- Personal qualities that predict success in graduate study and as a professional after graduation
- Adequate preparation in psychology and related fields
- Fit between the applicant's interests and the offerings of a department graduate program major area of study

Non-Degree Students

Graduate courses in psychology are designed for regularly admitted degree-seeking psychology students as part of an extensive program of preparing those students for professional careers. Thus, students not admitted into one of the psychology graduate program areas are discouraged from taking graduate courses in psychology. Non-psychology graduate students must obtain the instructor’s permission to enroll in any psychology graduate course.

** Students are expected to be involved in research throughout their graduate career, and their enrollment in PSYC 795 (Independent Study) should reflect this activity.
Usually, electives include at least three credit hours of PSYC 745 (Seminar in Life-Span Development). PSYC 745 may be repeated for credit when topics differ.

**Major Learning Goals**

**PSYCHOLOGY**

Students graduating with a doctorate in psychology will acquire the following research and communication skills:

- Students will design and execute empirical research to investigate psychological topics.
- Students will conduct and interpret statistical analyses.
- Students will clearly communicate results of empirical research, both orally and in writing.
- Students will create and deliver professional oral presentations.
- Students will demonstrate expert knowledge of their area of emphasis.
- Students will be conversant with historical, philosophical, and theoretical issues in psychology.
- Students will abide by the ethical principles of the discipline of psychology.
