Public Administration, M.P.A.

Degree Offered

• Master of Public Administration

Nature of the Program

The mission of the West Virginia University Master of Public Administration (MPA) program is to prepare recent college graduates and new professionals to make a difference through careers in public service in a wide array of settings. WVU's Department of Public Administration offers the only internationally accredited MPA program in West Virginia. The MPA degree prepares individuals to work in government and nonprofit agencies to develop and implement public policies and programs. The MPA program offers flexible class times, full and part-time enrollment, small class settings, and opportunities to work directly with community and government organizations through team-based class projects, the internship experience, professional development activities and community service.

Dual Degrees

The department has established dual degree programs with a number of other graduate programs. A dual JD/MPA degree program established with the College of Law provides preparation in both law and public administration. A dual MSW/MPA degree in cooperation with the School of Social Work provides preparation for administrators in the social services. Dual degree programs may also be arranged with other academic programs and professional schools. Graduate studies regulations permit limited credit hours from one graduate degree to be applied to a second degree. Students may pursue two degrees and use approved coursework for both degrees.

Graduate Certificates Offered

The department offers graduate certificate programs in Community Development Policy & Practice and Healthcare Administration.

Local Governance and Community Development Area of Emphasis

Counties and municipalities are the levels of government most directly involved in community and economic development. Localities are where we live, learn, work, and recreate. These and other local governments, like school districts and public utilities, comprise the largest sector of public employment in the United States. In fact, employment in local government has even been growing while it declines at other levels of government. Adding to this sub-sector the many nonprofit organizations that engage in community and economic development, the opportunities for employment in this field of public service abound.
