

Dentistry, D.D.S.

Degree Offered

- Doctor of Dental Surgery

Nature of the Program

The WVU School of Dentistry prepares students to provide high-quality, comprehensive oral health care. Students train using state-of-the-art technology which includes, but is not limited to, electronic health record, digital radiography, CAD/CAM and lasers. The school offers enriching interprofessional learning opportunities with the other Health Sciences Center health professions programs to promote their value as essential members of the health care team. Community service is also integral to our mission. Students participate in a plethora of local, state and global community outreach programs. Prior to graduation, students experience a community-based clinical rotation in rural West Virginia for at least six weeks.

A dental degree offers a variety of career options including private practice, teaching, research, and public health dentistry. In addition, after earning the Doctor of Dental Surgery (DDS) degree, specialty practice areas may be pursued by advanced training.

Due to a large number of applications and limited class size, qualified West Virginia residents receive priority consideration, and outstanding nonresident applicants are also considered. Residency status is determined by the WVU Office of Admission in accordance with the Higher Education Policy Commission Rules and Policies, Series 25. The dental admissions committee utilizes a holistic selection process that takes into account cognitive and non-cognitive attributes in accordance with defined admission criteria. Competition for admission has elevated the academic profile of admitted candidates to a rather high plateau. Nonresident applicants generally have earned a GPA of ≥ 3.75 and DAT scores of 19 or above. The School of Dentistry recognizes the importance of diversity in fulfilling its mission and encourages individuals from diverse backgrounds to apply.

Admissions for 2026-2027

Admission to the Doctor of Dental Surgery (D.D.S.) program is contingent upon satisfactory completion of all admission requirements, appropriate completion of all application instructions, submission of all transcripts from each college attended, submission of Dental Admission Test (DAT) scores, a personal interview, satisfactory completion of all courses taken before registration in dental school (includes courses taken during the summer session immediately preceding initial enrollment), and all other requirements as set forth by the dental school admissions committee.

The WVU School of Dentistry has minimal technical standards for the assessment of all students admitted to the D.D.S. program. Enrollees must have abilities and skills in the following areas: observation; communication; motor; intellectual, conceptual, integrative, quantitative; behavioral, and social. Technological compensation can be made in certain situations, but candidates should be able to perform in a reasonably independent manner. (Refer to the School of Dentistry website for details about Technical Standards (<https://dentistry.hsc.wvu.edu/students/dds-student-resources/policies-and-standards/>)).

COURSE REQUIREMENTS:

A minimum of three years of college coursework completed at U.S. or Canadian colleges or universities is required. Applicants must have earned at least 90 semester credit hours at the time of application. Up to 64 semester credit hours completed at community colleges are accepted toward the minimum course hour requirement.

Online courses are accepted toward the prerequisite courses. A letter grade must be documented for all required courses completed through in-person, online or hybrid learning platforms. Science courses with grades of Pass/Fail or Satisfactory will not be accepted. Non-science prerequisite courses impacted by Pass/Fail grading system will not be evaluated negatively.

The prerequisites for admission include:

English composition and rhetoric, or equivalent	6
Biology or Zoology (with laboratory)	8
General/Inorganic Chemistry (with laboratory)	8
Organic Chemistry (with laboratory)	8
Physics (with laboratory)	8
Biochemistry	3
Anatomy (Comparative or Human)	3
Total Hours	44

Completion of courses in microbiology, embryology/developmental biology, physiology, cellular and molecular biology, genetics, and psychology are strongly recommended. In addition, courses in the humanities and the social sciences are suggested to acquire a well-rounded intellectual background for the study and practice of dentistry. AP credit will be accepted for the English course requirement. All science prerequisites must have a letter grade. Admitted students must complete all required courses by June 1st prior to matriculation.

Considerations:

- Grade Point Average (GPA)
- Science Grade Point Average (SGPA)
- Performance in required courses
- Performance in upper-division science courses
- Performance improvement/consistency
- Course load

APPLICATION INFORMATION:

1. The School of Dentistry participates in the Associated American Dental Schools Application Service (AADSAS). All applications must be submitted online via AADSAS (<http://www.aadea.org>). The application deadline is November 1st of the year immediately prior to the applicant's anticipated enrollment. Each year the AADSAS application becomes available in mid-May. The school uses a rolling admission process and begins admitting highly qualified individuals on mid-December.
2. Applicants are required to have specific letters of recommendation submitted to AADSAS. Information regarding recommendations is available on the School of Dentistry (<https://dentistry.hsc.wvu.edu/apply-now/doctor-of-dental-surgery/>) website.
3. Satisfactory completion of the Dental Admission Test (DAT) is required. The test is given at testing centers throughout the U.S. and in Canada. DAT registration is available on the American Dental Association (ADA) (<https://www.ada.org/education/testing/exams/dental-admission-test-dat/apply-for-the-dental-admission-test-dat/>) website. DAT scores must be submitted by November 1st of the year preceding the date of matriculation. Scores are valid up to three years after the test date.
4. Applicants must complete shadowing experiences in clinical dental settings, including private offices, community health clinics, and service missions. While there is no specific minimum shadowing hour requirement, successful candidates usually observe at least 100 hours in various dental environments.
5. The Dental Admission Committee evaluates all AADSAS applications and invites selected applicants to submit a secondary (WVU Graduate) application. West Virginia resident applicants are usually offered an interview, although the admissions committee may elect not to interview unrealistic applicants. Selected non-resident applicants are invited to interview depending on their qualifications.
6. Individuals who receive provisional acceptance must obtain a criminal background clearance, provide documentation of the specified immunizations, and meet all other requirements as listed in the provisional acceptance offer prior to matriculation and the date specified.

Detailed information is available on the Doctor of Dental Surgery (<https://dentistry.hsc.wvu.edu/apply-now/doctor-of-dental-surgery/>) admissions webpage.

If you have specific questions regarding the West Virginia University School of Dentistry's application procedures and requirements, please email the Office of Dental Admissions (dentaladmit@hsc.wvu.edu) or call 304-293-6646.

INTERNATIONAL DENTAL GRADUATE GUIDELINES

International dental graduates who wish to apply to the WVU School of Dentistry Doctor of Dental Surgery (D.D.S.) program as a student in the first-year class should contact the School of Dentistry Office of Dental Admissions for additional information regarding specific guidelines and requirements.

Major Code: 8007

Promotion

At the end of each grading period (i.e., each academic semester or summer session), all students will have their individual progress reviewed by the Academic and Professional Standards Committee. The progress of each student in the curriculum is governed by minimum acceptable performance standards upon which the committee bases its decisions.

The standards consist of three categories: scholastic performance, clinic performance and utilization, and professional development. Scholastic performance requires that each student must earn a specified grade point average to be promoted to the succeeding year. Clinic performance and utilization requires that each student must utilize a specified percentage of available clinic time to demonstrate steady progress toward attainment of clinical competency in all disciplines. Professional development is an important component of the study of dentistry. The criteria for determining this development are based on the student's personal behavior and patient management skills.

These performance standards are explained in detail in the document entitled WVU School of Dentistry Academic and Professional Standards. All first-year students are presented this document upon entering school and are required to acknowledge, by their signature, that they have read and accept the conditions set by the material contained therein. At the completion of each academic term, following the meeting of the Committee on Academic and Professional Standards, the status of each student is reported to the dean. The committee may decide that a student be promoted unconditionally, be promoted on probation, be allowed to make up deficiencies, be given the opportunity to repeat the year, or be suspended or dismissed from further studies in the School of Dentistry. Final disposition in each case is the prerogative of the Dean of the School of Dentistry.

Degree Requirements

Candidates for graduation are recommended by the faculty of the School of Dentistry to the Board of Governors for approval and for the conferring of the degree of Doctor of Dental Surgery (D.D.S.), provided they fully meet the following conditions:

- Shall have been a full-time student in regular attendance in the School of Dentistry for the academic period prescribed for each student.
- Shall have completed the prescribed curriculum for each of the academic sessions.
- Shall have shown good moral character and shall have demonstrated a sense of professional responsibility in the performance of all assignments as a student.
- Shall have met in full all financial obligations to the University.

In view of public and professional responsibilities, the faculty of each of the professional schools of WVU has the authority to recommend to the president of the University the removal of any student from its roles whenever, by formal decision reduced to writing, the faculty finds that the student is unfit to meet the qualifications and responsibilities of the profession.

CURRICULUM REQUIREMENTS

Code	Title	Hours
Oral Health Sciences Courses		
DENT 700	Anesthesiology	1
DENT 701	Arts & Sciences of Preventive Dentistry	2
DENT 703	Introduction to Patient Care	3
DENT 704	Operative Dentistry	4

Major Learning Outcomes

DOCTOR OF DENTAL SURGERY

West Virginia University School of Dentistry's competencies encompass the knowledge, skills, behaviors, and values that are required for independent, unsupervised practice to provide comprehensive care for patients in all staged of life lived experiences. The Twenty-four competencies are divided into five categories: Scientific and Critical Thinking (SCT), Assessment, Diagnosis, and Treatment Planning (ADTP), Health Promotion and Case Management (HPCM), Community Health (CH), and Ethics and Professional Practice (EPP) which further delineate the scope of practice for an

entry level dentist. Competency attainment through formative, summative, performance assessments, and experiences throughout the curriculum is described in detail in the Competency Document. Prior to graduation, the WVU School of Dentistry student must have demonstrated competency necessary to:

I. Scientific and Critical Thinking (SCT)

- 1a. Scientific Inquiry: Utilize scientific inquiry and current research as the basis for comprehensive care of patients.
- 1b. Critical Thinking: Employ critical thinking skills to evaluate professional literature to ensure evidence-based patient care.

II. Assessment Diagnosis, and Treatment Planning (ADTP)

- 2. Examination of the Patient: Perform an examination that collects the necessary information to assess and evaluate the patient's systemic and oral condition(s).
- 3. Diagnosis: Determine a differential, provisional, or definitive diagnosis for patients by interpreting and correlating findings.
- 4. Treatment Planning: Develop, present, and discuss individual treatment plans and obtain informed consent consistent with the patient's condition, interest, goals, and capabilities.

III. Health Promotion and Case Management (HPCM)

- 5. Disease Prevention: Provide evidence-based interprofessional care for patients that emphasizes prevention of oral diseases and supports overall systemic health.
- 6. Tobacco Cessation: Provide evidence-based tobacco cessation strategies.
- 7. Diversity Awareness: Recognize varied life experiences that impact interpersonal communications, conduct, and patient care.
- 8. Management of Pain and Anxiety: Employ techniques to manage orofacial pain and anxiety with consideration of the impact of prescribing practices and substance use disorders.
- 9. Caries Management: Assess and manage a patient's caries risk through interventions and behavior management.
- 10. Endodontic Therapy: Assess, treat, and/or refer diseases of pulpal and periradicular origin.
- 11. Periodontal Therapy: Assess, treat, and/or refer periodontal disease utilizing a non-surgical approach.
- 12. Surgical Therapy: Assess, treat, and/or refer conditions requiring surgical procedures on the hard and soft tissues.
- 13. Emergency situations: Prevent, recognize, and manage dental and common medical emergencies that occur in the dental practice.
- 14. Occlusal/TMJ Disorders: Assess the temporomandibular joint, muscles of mastication, and occlusal interferences/dysfunction; treat or refer functional disorders of occlusal or non-occlusal origins.
- 15. Orthodontic Therapy: Assess, treat, or refer developmental or acquired abnormalities in esthetics or occlusion.
- 16. Oral Mucosal Conditions: Assess, treat, or refer oral mucosal diseases or disorders.
- 17. Restorative/Prosthodontic Therapy:
 - a. Restore missing or defective tooth structure to proper form, function, and esthetics, and promote soft and hard tissue health. This includes properly conveying laboratory instructions when necessary.
 - b. Replace missing teeth and surrounding oral tissues to proper form, function, and esthetics, and promote soft and hard tissue health. This includes properly conveying laboratory instructions when necessary.
- 18. Implant Therapy: Assess, treat or refer patients who would benefit from dental implant prosthodontic therapy.
- 19. Assessment of Patient Treatment: Evaluate treatment outcomes and determine the prognosis and recall strategies.

IV. Community Health (CH)

- 20. Community Engagement: Plan, implement, and evaluate evidence-based dental educational programs that address the needs of the community.

V. Ethics and Professional Practice (EPP)

- 21. Ethics:0

21. Ethics: Discern and manage the ethico-legal issues of dental practice.
22. Professionalism: Demonstrate professional values and behaviors in all aspects of patient care, community engagement, and personal conduct.
23. Professional Practice: Possess the skills transition from dental school to professional practice.
24. Scope of Practice: Recognize the complexity of patient treatment and identify when referral is indicated.
