University Information

General Information - West Virginia University

West Virginia University (WVU) was founded in 1867 as a result of the 1862 Land-Grant Act, otherwise known as the Morrill Act. As the state’s flagship, land-grant university, WVU’s mission reflects its dedication to serving the state and citizens of West Virginia through access to higher education, research and scholarship, and comprehensive health sciences. WVU and its divisional campuses enroll approximately 32,000 students, who represent all 55 counties of West Virginia, 50 states and the District of Columbia, and nearly 100 other countries. West Virginia University is accredited by the Higher Learning Commission (https://www.hlcommission.org). Many West Virginia University programs hold specialized accreditation.

WVU’s main campus in Morgantown, WV, provides high-quality programs of instruction through 14 colleges and schools and offers over 190 degree programs at the baccalaureate, master’s, doctoral, and professional levels, as well as numerous certificate programs. WVU’s Morgantown facilities are built on more than 1,000 acres and include several buildings on the National Register of Historic Places.

The West Virginia University Robert C. Byrd Health Sciences Center (http://home.hsc.wvu.edu) has five schools - Dentistry, Medicine, Nursing, Pharmacy, and Public Health. Undergraduate, graduate, and professional students learn on three campuses in Morgantown, Charleston, and Martinsburg.

WVU also has two divisional campuses. Potomac State College of West Virginia University, situated in West Virginia’s Eastern Panhandle in Keyser, offers associate and baccalaureate degree programs and serves both residential and commuting students. The West Virginia University Institute of Technology is located in Beckley, and serves the region and the state by offering baccalaureate degree programs.

The WVU Extension Service has an office with a faculty presence in all of West Virginia’s 55 counties. WVU operates experimental farms and forests throughout the state, as well as WVU Jackson's Mill, near Weston, WV, home of West Virginia 4-H camping and the West Virginia Fire Academy.

Visit About WVU (http://about.wvu.edu) for updated WVU facts and achievements.

In this section:

• Mission of West Virginia University (p. 7)
• Commitment to Diversity, Equity, and Inclusion (p. 8)
• West Virginia University Center for Excellence in Disabilities (p. 8)
• Office of Accessibility Services (p. 8)

The Mission of West Virginia University

As a land-grant institution, the faculty, staff and students at West Virginia University commit to creating a diverse and inclusive culture that advances education, healthcare and prosperity for all by providing access and opportunity; by advancing high-impact research; and by leading transformation in West Virginia and the world through local, state and global engagement.

RESEARCH AND SCHOLARSHIP

As West Virginia’s flagship research institution, WVU undertakes scholarly activity that addresses the challenges most critical to today's world and the practice of multidisciplinary research. WVU is classified as a Doctoral University—Highest Research Activity (R1) in the Carnegie Classification of Institutions of Higher Education.

SERVICE

West Virginia University’s land-grant mission underscores its obligation to serve the public and the state of West Virginia by promoting economic development, enhancing the well-being and the quality of life of the people of West Virginia, and increasing opportunities for the citizens of the state through workforce education, lifelong learning, and outreach to every county.

West Virginia University is the only institution in West Virginia – and one of only 6% of institutions nationwide – to earn the Carnegie Foundation for the Advancement of Teaching “Community Engagement Classification.”

WVU’s dedication to its service mission is manifested through its instructional programs, educational outreach, initiatives and centers, and through four structures that engage external constituencies and support public service.

Economic Development

The Office of Research and Economic Development (http://research.wvu.edu) assists WVU researchers in advancing their results and putting that knowledge to work improving lives. The research enterprise of West Virginia University is diverse, richly talented, progressive, and focused on the goal of making people's lives better in the highest tradition of an American land-grant institution of higher education.
Well-Being and Quality of Life

The Robert C. Byrd Health Sciences Center advances the health of West Virginia’s residents and addresses health challenges that face the state and the nation.

Outreach

The Smith-Lever Act of 1914 created a Cooperative Extension Service for each land-grant institution. The purpose of the Extension Service was to disseminate the findings of the universities’ agricultural stations and provide training and programs on home economics and other practical subjects. WVU has sustained its commitment to the state by supporting an Extension Service office with a faculty presence in all of West Virginia’s 55 counties, staffed by faculty county agents.

The educational programs and initiatives of the WVU Extension Service focus on service to the state and exemplify West Virginia University’s commitment to the public good by connecting the knowledge and research of WVU with citizen and community needs. The Extension Service’s programs are driven by four major initiatives: (1) 4-H youth development; (2) family and health; (3) agriculture and natural resources; and (4) community, workforce, and economic development.

Commitment to Diversity, Equity, and Inclusion

West Virginia University is committed to ensuring that all persons, including women, people of color, persons with disabilities, veterans, and persons of different religions, sexual orientations, ages, and international, ethnic, and economic backgrounds have the opportunity to benefit from the programs and services the University offers. The University helps students, faculty, and staff study and work in a climate of academic freedom and social responsibility, and develop the skills, knowledge, and self-esteem necessary to contribute positively as world citizens.

In keeping with this commitment, members of the academic community are expected to demonstrate civility and mutual respect for all persons as well as understanding and appreciation for all persons, to express that perspective in every dimension of the institution’s life and mission, and to work cooperatively, representing not only the interests of their own groups but also those of the wider community.

Individuals believing they may have been illegally discriminated against by West Virginia University may file a complaint with the Division of Diversity, Equity, and Inclusion (http://diversity.wvu.edu).

Center for Excellence in Disabilities

The West Virginia University Center for Excellence in Disabilities (WVU CED) works closely with the WVU Division of Diversity, Equity, and Inclusion to connect WVU students, staff, and faculty members with disabilities to services they need throughout the WVU communities and state.

The mission of the WVU CED is to improve the lives of West Virginians with disabilities by building more diverse, inclusive communities. WVU CED is recognized, and trusted, as a leader and innovative agent in a statewide network of individual and community supports that promote respect, inclusiveness, interdependence, and access for everyone.

The WVU CED is a federally-funded center that provides:

- Direct clinical and community disability services;
- Training opportunities;
- A variety of information on best practices, services throughout the state, and policy; and
- Innovative research

WVU CED priority areas include, but are not limited to: access to quality health care services and training, employment, health and wellness, and transitions experienced throughout the lifespan.

For more information about the WVU CED and center services, go to: http://www.cedwvu.org or call 304-293-4692 (Morgantown), 304-720-3200 (Charleston), or 800-518-1448.

Office of Accessibility Services

The Office of Accessibility Services (http://accessibilityservices.wvu.edu) is dedicated to helping students achieve their academic goals regardless of any physical, learning, psychological, sensory, or other documented disability. West Virginia University’s process for providing disability-related accommodations follows guidelines of the Americans with Disabilities Act, Section 504 of the Rehabilitation Act of 1973, and current case law.

Commitment to Assessment

West Virginia University conducts comprehensive and systematic assessment of student learning across all locations and delivery methods. Continuous improvement of student learning is faculty-driven, conducted at the course, program, and institutional levels, and grounded in the work of the Undergraduate Council, the Graduate Council, and the University Assessment Council (UAC). UAC members from the WVU Morgantown Campus, the West Virginia University Institute of Technology, and Potomac State College of WVU align assessment with the WVU mission and strategic plan and
collaborate with the Faculty Senate General Education Foundations (GEF) committee to conduct assessment of the GEF program. The Council works to strengthen the effectiveness of assessment across all programs by:

- Facilitating faculty professional development in assessment.
- Providing consulting to departments to enhance their assessment planning and reporting.
- Compiling supporting documentation and evidence of the assessment work at WVU.
- Serving as an institutional-level clearinghouse for assessment best practices.
- Providing sustained attention on centralized, consistent, and systematic processes and policies across the University to reduce variability in assessment quality and engagement.
- Overseeing, reviewing, and commenting upon program review policies, processes, and reports.

The West Virginia University Board of Governors (the “Board”) was created by the West Virginia Legislature as the governing body of the West Virginia University system, including West Virginia University, West Virginia University Potomac State College, and West Virginia University Institute of Technology (collectively the “University”). The Board has the mission of general supervision and control over the academic and business affairs of the University.

West Virginia University is an Equal Opportunity/Affirmative Action Institution. The University does not discriminate on the basis of race, sex, age, disability, protected veteran status, religion, sexual orientation, color, national origin, or other class protected by the University's non-discrimination policy (BOG Policy 44 (http://catalog.wvu.edu/graduate/Policy_44__December_18_2015_Amendment.pdf)) in the administration of any of its educational programs or activities or with respect to admission or employment. Further, faculty, staff, students, and applicants are protected from retaliation for filing complaints or assisting in an investigation under the University's Equal Opportunity/Affirmative Action Plan. Inquiries regarding the University’s non-discrimination policy may be sent to the Office of Diversity, Equity, and Inclusion.

West Virginia University Administration

- E. Gordon Gee, President
- Joyce McConnell, Provost and Vice President for Academic Affairs

Deans

- Benjamin M. Statler College of Engineering and Mineral Resources, Eugene V. Cilento

• James Brown, K-Mart Corporation Chair of Marketing
• William I. Brustein, Eberly Family Distinguished Professor of History
• Vincent P. Cardi, Bowles, Rice, McDavid, Graff and Love Professor of Law
• Tim Carr, Marshall S. Miller Energy Professor of Geology
• Linda M. Carson, Ware Distinguished Professor, Emerita
• William H. Carter, Warren Point Chair of Internal Medicine
• Judie F. Charlton, Judie F. Charlton Chair for Glaucoma Outreach
• Shawn Chillag, Patricia T. Ayash Distinguished Professorship/Internal Medicine Charleston Division
• Nigel N. Clark, George B. Berry Chair of Engineering
• Franklin D. Cleckley, Arthur B. Hodges Professor of Law, Emeritus
• Roger Congleton, BB&T Chair of Economics
• Patrick W. Conner, Eberly Centennial Professor in English, Emeritus
• Robert Dailey, Davis Michael Professor of Animal and Nutritional Sciences
• Walter Dekeseredy, Anne Deane Carlson Endowed Chair of Social Sciences
• Lisa DiBartolomeo, Armand E. and Mary W. Singer Professor in the Humanities
• Robert DiClerico, Eberly Family Professor Outstanding Teaching, Emeritus
• Charles R. DiSalvo, Woodrow A. Potesta Professor of Law
• Gregory Dudley, Eberly Family Distinguished Professor of Chemistry
• Richard Dull, GoMart Professor in Accounting Information Systems
• Barry A. Edelstein, Eberly Family Professor of Psychology
• James Elkins, Arthur S. Dayton Professor Law
• Eloise Elliott, The Ware Family Distinguished Professorship
• Ali Feliachi, Electric Power Systems Chair
• John W. Fisher, II, William J. Maier Jr. Dean Emeritus and Robert M. Steptoe and James D. Steptoe Professor of Property Law, Emeritus
• Paula F. Fitzgerald, Nathan Haddad Professor of Business Administration
• Kenneth Fones-Wolf, The Stuart and Joyce Robbins Chair in History
• Stephanie Foote, Jackson & Nichols Chair of English
• Mathis P. Frick, O. F. Gabriele Chair of Radiology
• James J. Friedberg, Hale J. and Roscoe P. Posten Professor of Law
• Hota Gangarao, Wadsworth Professorship
• Laura Gibson, Alexander B. Osborn Distinguished Professor in Hematological Malignancies Research
• Ronald L. Gross, Jane McDermott Shott Chair of Ophthalmology
• Rakesh K. Gupta, Berry Chair of Chemical Engineering
• Michael Gutensohn, Ray Marsh and Arthur Pingree Dye Professor
• Ludwig Gutmann, Hazel Ruby McQuain Chair of Neurological Research
• Joseph Hagan, Barnette Professor of Political Science
• Trevor M. Harris, Eberly Family Professor of Geography
• Keith Heasley, Charles T. Holland Professor of Mining Engineering
• John Herbst, Murray Department Chair of Mining Engineering
• Erik Herron, Eberly Family Professor of Political Science
• JoAnn Hornsby, Interim Hazel Ruby McQuain Arthritis/Rheumatic Disease Chair
• Tara Hulsey, E. Jane Martin Professor of Nursing
• Glen P. Jackson, Ming Hsieh Teaching Professor of Forensic and Investigative Science
• Abnash Jain, Abnash C. Jain Distinguished Professorship in Cardiology
• Thomas Kammer, Eberly College Centennial Professor, Emeritus
• Vlad Kecojevic, Massey Foundation Professor of Mining Engineering
• Alexander Kurov, Fred T. Tattersall Chair in Finance
• Kennon A. Lattal, Eberly College Centennial Professor of Psychology
• Lian Li, Robert L. Carroll Chair of Physics
• Huey Hannah Lin, J. Vance and Florence Highland Johnson Teaching Professor of Chinese Studies
• Paul Lockman, Douglas D. Glover Endowed Chair of the Department of Basic Pharmaceutical Sciences
• Anne Marie Lofaso, Arthur B. Hodges Professor of Law
• Barbara Ludlow, Chester E. and Helen B. Derrick Teacher Education Endowed Professor, Special Education
• Diana Martinelli, Widmeyer Professorship in Public Relations
• Michael Mays, Eberly Distinguished Professor of Outstanding Teaching, Emeritus
• Mary McClung, Mabel DeVries Tanner Endowed Professor of Theatre
• Joyce E. McConnell, Thomas R. Goodwin Professor of Law
• Marjorie A. McDiarmid, Steptoe and Johnson Professor of Law and Technology
• Patrick C. McGinley, Charles H. Haden, Jr. Professor of Law
• James McGraw, Eberly Family Professor of Biology
• Daniel McNeil, Eberly Family Professor of Outstanding Teaching
• Scott Myers, Peggy Rardin McConnell Chair of Communication Studies
• R. Osvaldo Navia, Grace Kinney Mead Chair of Geriatrics
• William Neal, James H. Walker Chair of Pediatric Cardiology
• Peter Ngan, Branson-Maddrell Endowed Professorship in Orthodontics
• Daniel Panaccione, Davis Michael Professor of Plant and Soil Sciences
University Information

• John Parker, N. Leroy Lapp Professorship of Pulmonary and Critical Care Medicine
• Syd S. Peng, Charles E. Lawall Chair in Mining Engineering, Emeritus
• William P. Petros, Gates Wigner Endowed Deanship and Mylan Chair of Pharmacology
• Jason Phillips, Eberly Family Professor of Civil War Studies
• Ubolrat Piamjariyakul, WVUH Evidence Based Research Endowed Professorship
• Christopher Plein, Eberly Family Professor for Outstanding Public Service
• Joseph Prudomme, Christopher Cline Chair in Orthopedic Surgery
• Lois Raimondo, Shott Chair of Journalism
• Hayne W. Reese, Centennial Professor of Psychology, Emeritus
• Patricia Rice, Eberly Family Professor for Outstanding Teaching, Emerita
• Bryan Richmond, William J. Maier, Jr. Chair of Research
• Richard A. Riley, Louis F. Tanner Distinguished Professor of Public Accounting
• Terry L. Rose, Ernest L. Hogan Chair of Life Insurance
• J. Michael Ruppert, Joan and Ben Statler Eminent Scholar and Chair, Breast Cancer Research Clinical Pharmacy, Emeritus
• Kathleen “Katy” O’Hearn Ryan, Eberly Family Professorship for Outstanding Teaching
• Ludwig Christian Schaupp, David W. and Nancy F. Hamstead Professor of Accounting
• Terry Schwinghammer, Arthur I. Jacknowitz Chair for Clinical Pharmacy
• Earl Scime, Oleg D. Jefimenko Professor of Physics
• Vicki Sealey, Russell & Ruth Bolton Eberly College Professorship
• Mohindar Seehra, Eberly Professor in Physics, Emeritus
• Kenneth Showalter, C. Eugene Bennett Distinguished Chair in Chemistry
• David Siderovski, E. J. Van Liere Medicine Professorship
• James Simpkins, Barbara B. Highland Chair in Stroke
• Gordon Smith, Stuart and Joyce Robbins Distinguished Professor in Epidemiology
• Janet Snyder, J. Bernard Schultz Endowed Professor of Art
• George W. Spiroiu, John W. and Jeanette S. Straton Research Chair in Neuroscience
• Gay Stewart, Eberly Professor of STEM Education
• Donley Studlar, Eberly Family Professor of Political Science, Emeritus

• John Taylor, Jackson Kelly Professor of Law
• Richard Turton, Russell and Ruth Bolton WVU Professorship for Outstanding Teaching
• Michael Vernon, Sanger Chair of Family Planning and Reproductive Physiology
• Kung Wang, Eberly Family Professorship of Chemistry
• Barbara Warash, Endowed Director, WVU Child Development and Nursery School
• Bryan Weaver, Dr. Edward C. Armbrecht Oral and Maxillofacial Surgery Professorship
• Stephen Wetmore, Romeo Lim and Maria Lim Chair of Otolaryngology
• Joshua Blackmer Williamson, Mabel DeVries Tanner Endowed Professor of Theatre
• Alison Wilson, Skewes Family Chair for Trauma
• Brian D. Woerner, Endowed Lane Department Chair Professorship
• John Zaniewski, Asphalt Technology Professorship
• C. Q. Zhang, Eberly Family Professorship of Mathematics
• Sam Zizzi, Dr. Pat Fehl Endowed Professor

Academic and Professional Standards

Academic Rights, Penalties, and Appeals

The policies described in this section are based on the West Virginia University (WVU) Board of Governors Policy 15, Student Academic Rights. This section expands the general policy to include procedures for undergraduate, graduate, and professional students at WVU (including the Potomac State and WVU Tech campuses).

A student, by voluntarily accepting admission to West Virginia University (WVU) or enrolling in a class or course of study offered by WVU, accepts the academic requirements and criteria of the institution. Normally students may finish a program of study according to the requirements under which they were admitted to the program. However, requirements are subject to change at any time with reasonable notice provided to students. It is the student’s responsibility to fulfill coursework and degree or certificate requirements and to know and meet criteria for satisfactory academic progress and
completion of the program. Students are expected to adhere to academic requirements and standards in all academic settings, such as classrooms, laboratories, and clinics, and during any activities that are part of academic requirements. Further, WVU students are citizens of a broader academic community. As such, the University expects that every member of its academic community share its historic and traditional commitment to honesty, integrity, and the search for truth. To meet these standards, academic dishonesty is prohibited and is subject to academic penalties. Students who fail to meet academic requirements or standards, or who engage in academic dishonesty, may be subject to one or more of the academic penalties described in the Academic Penalties (http://catalog.wvu.edu/graduate/enrollmentandregistration/#definitionsandtypesofacademicpenaltiestext) section.

Any question of interpretation regarding student rights and responsibilities, academic penalties, or appeal processes for final grades, charges of academic dishonesty, or academic penalties shall be referred to the Provost and Vice President of Academic Affairs, the Vice President for Health Sciences, or the divisional campus President, as appropriate, for final determination.

Any behaviors not academic in nature but related to student conduct should be referred to the Campus Student Code (see here (https://studentconduct.wvu.edu)) as stipulated in Board of Governors Policy 31 (http://bog.wvu.edu/files/d/4c27ce4e-93b5-451b-a557-c9d8ab25a773/policy-31-dec-18-2015-amendment.pdf). Although academic penalties are imposed on students who engage in academic dishonesty according to procedures described below, findings of academic dishonesty may also be taken into consideration with respect to disciplinary penalties and procedures described in the Campus Student Code.

Academic Rights

Each student at West Virginia University has the following academic rights (as well as others; see BOG Policy 15 (http://bog.wvu.edu/policies)):

1. Right to have their performance evaluated solely upon performance as measured against academic standards. The student shall not be evaluated prejudicially, capriciously, or arbitrarily. The student shall not be graded, nor shall their performance be evaluated on the basis of race, color, national origin, ancestry, age, physical or mental disability, marital or family status, pregnancy, veteran status, service in the uniformed services (as defined in state and federal law), religion, creed, sex, sexual orientation, genetic information, gender identity, or gender expression (see BOG Policy 44 (http://bog.wvu.edu/files/d/0d9c7853-4569-4895-b2bc-6bd7f00a3eaf/policy-44-december-18-2015-amendment.pdf)), or other protected status.
2. Right to appeal any final grade, charge of academic dishonesty, or academic penalty.
3. Right to access a copy of the University catalog and program documents in which all current program requirements and standards are described (e.g., required courses, total credit requirements, time in residence requirements, special program requirements, minimum grade point average, probation standards, professional standards, etc.).
4. Right to receive course syllabi with descriptions of content and requirements for any course in which they are enrolled (e.g., attendance expectations, special requirements, laboratory requirements including time, field trips and costs, grading standards and procedures, professional standards, etc.).
5. Right to assigned grades issued from the instructor of each course to students enrolled in the course consistent with the academic rights set out in the preceding sections.

Definitions and Types of Academic Penalties

Penalties for Failure to Meet Academic Requirements or Standards

A student at West Virginia University who fails to meet academic requirements or standards will be subject to one or more of the following academic penalties:

1. A lower final grade, including failure of a course. A lower grade or failure of the course can be imposed by the course instructor/coordinator. If a student appeals a final grade, the grade shall remain in effect until the appeal is completed.
2. Exclusion of a student from further participation in class prior to any appeal proceedings requires that the course instructor/coordinator obtain approval of the dean of the college or school offering the course.
3. Required repetition or revision of a program requirement, or termination of the student's participation in specific program-related activities.
4. Failure of a program requirement or failure to meet academic standards. Program requirements and standards must be described in the catalog or other program documents provided or available to students. Program requirements may include such items as passing a qualifying exam, maintaining progress on research, developing required technical skills, or meeting professional standards of conduct (including the avoidance of academic dishonesty).
5. Academic probation or suspension at the program, college, or school level for failure to meet program requirements and academic standards, or at the university level for failure to meet grade point average standards. More information concerning probation and suspension of undergraduate students at the university level (http://catalog.wvu.edu/undergraduate/coursecredittermsclassification/#probationsuspensintext) is available in the Academic Standards section of undergraduate catalog. More information about probation and suspension of graduate or professional students at the program, college, or school level (http://catalog.wvu.edu/graduate/enrollmentandregistration/#probationsuspensintext) is in the Academic Standards section of the graduate catalog as well as in program documents. If a graduate or professional student appeals a penalty of program suspension, the dean of the college or school offering the student's program will determine if the student shall be allowed to continue in the program until the case is determined.
6. Dismissal from a program, college, school or the university. Dismissal is defined as termination of student status, including any right or privilege to receive some benefit or recognition or certification. A student may be academically dismissed from any program and remain eligible to enroll...
in courses in other programs at the institution, or a student may be academically dismissed from the institution and not remain eligible to enroll in 
other courses or programs at the institution, including other divisional campuses (BOG Policy 15 (http://bog.wvu.edu/files/d/e7102743-6a83-4822-
b4a3-a050e5e0711f/policy15-amended-student-academic-rights-amended-april-12-2013.pdf)). If a student appeals a penalty of program dismissal, 
the dean of the college or school offering the student’s program will determine if the student shall be allowed to continue in the program until the 
case is determined. Dismissal from a program, college, or school must be communicated to the Associate Provost for Undergraduate or Graduate 
Academic Affairs, the Health Sciences Associate Vice President for Academic Affairs, or the divisional campus President once the time limit for 
a student appeal has expired or the appeal process has been completed. The Associate Provost, Associate Vice President, or divisional campus 
President submits a request to the appropriate office to change the student’s status to non-degree. Academic dismissal from the university requires 
consultation and approval from the student’s dean, the Associate Vice President for Academic Affairs (Health Sciences students only), and the 
Provost’s or divisional campus President’s Office.

**PENALTIES FOR ACADEMIC DISHONESTY**

The term “academic dishonesty” means plagiarism; cheating and dishonest practices in connection with examinations, papers, and/or projects; and 
forgery, misrepresentation, or fraud as it relates to academic or educational matters. In addition to the definitions and examples provided below, 
supplementary information about types and examples of academic dishonesty is available (http://provost.wvu.edu/governance/academic-standards-
resources).

1. “Plagiarism” means the use, by paraphrase or direct quotation, of the published or unpublished work of another person without full and clear 
acknowledgment, including, but not limited to, the unacknowledged use of materials prepared by another individual.

2. “Cheating and dishonest practices in connection with examinations, papers, and/or projects” include, but are not limited to, (i) giving or 
receiving of any unauthorized assistance in taking quizzes, tests, examinations, or any other assignment for a grade; (ii) depending upon the aid of 
sources beyond those authorized by the instructor or supervisor in quizzes, tests, examinations, writing papers, preparing reports, solving problems, 
or carrying out other assignments; (iii) the acquisition or use, without permission, of tests or other academic material belonging to a member of the 
University faculty or staff; and (iv) engaging in any behavior specifically prohibited by a faculty member in the course syllabus or class discussion.

3. “Forgery, misrepresentation, or fraud as it relates to academic or educational matters” includes, but is not limited to, (i) wrongdoing, 
or causing to be altered, any records; (ii) use of University documents or instruments of identification with the intent to defraud; (iii) presenting 
false data or information or intentionally misrepresenting records; (iv) furnishing the results of research projects or experiments for the inclusion in 
another’s work without proper citation; or (v) furnishing false statements in any University academic proceeding; and (vi) providing false or misleading 
information to gain an academic advantage.

A student at West Virginia University who engages in academic dishonesty will be subject to one or more of the following academic penalties (see the 
previous section for full descriptions of those penalties that can also be imposed for failure to meet academic requirements or standards):

1. Course-level academic penalties. When academic dishonesty occurs within the context of a course (including individually supervised courses), the 
course instructor/coordinator has the option of imposing the following academic penalties, including but not limited to:
   a. Change in assignment or test grade.
   b. A lower final grade, including failure of a course.
   c. A final grade of unforgivable failure (UF). The UF penalty can be recommended by the course instructor/coordinator but must be reported to 
the appropriate office by the dean of the college or school offering the course after the time limit for a student appeal has expired or the appeal 
process has been completed, upholding the UF penalty. The student may repeat the course, but the undergraduate D/F repeat process will not 
be applied to the UF.
   d. Required repetition or revision of the assignment or test.
   e. Exclusion from further participation in class, including laboratories or clinical experiences.
   f. Other course resolutions within the discretion of the course instructor/coordinator.

2. Other academic penalties. If academic dishonesty occurs either in a course or within the context of program requirements, the academic penalties 
below may be imposed.
   a. Required repetition or revision of a program requirement, or termination of the student’s participation in specific program-related activities. When 
academic dishonesty occurs within the context of program requirements and expectations not associated with a specific course (including, 
but not limited to, completing qualifying exams, conducting research, performing duties associated with a graduate assistantship, performing 
required service or professional activities, etc.), the student’s program director, supervisor, or chair of an appropriate committee may impose 
these or similar academic penalties.
   b. Failure of a program requirement or to meet academic standards.
   c. Academic probation or suspension at the program, college, or school level for failure to meet program requirements and academic standards.
   d. Dismissal from a program, college, school, or the university.

**Appeals**

**In this section:**

- General Information about Appeals (p. 15)
• The Appeal Process (p. 15)

GENERAL INFORMATION ABOUT APPEALS

Students may appeal any final grade, charge of academic dishonesty, or academic penalty described above and imposed by a course instructor/coordinator, the institution, or its constituent academic units through the procedures described in this section of the catalog with the following exceptions:

• Grades for individual course assignments cannot be appealed except in the context of a final grade appeal or a charge of academic dishonesty.
• University, college/school, or program probation based on failure to meet minimum GPA standards may not be appealed. University suspension of undergraduate students based on GPA may be appealed as described in the Academic Standards section of the undergraduate catalog (http://catalog.wvu.edu/undergraduate/coursecreditstermsclassification/#probationsuspensiontext).
• Disciplinary penalties imposed by the Office of Student Conduct, including but not limited to probation, suspension, or expulsion from the university, may not be appealed through this process. Refer to the Campus Student Code for procedures to appeal disciplinary penalties, including those for academic dishonesty.

The primary purpose of the appeal procedure is to allow review of a final grade, charge of academic dishonesty, or academic penalty in cases where a student believes that due process was not followed or that the grade, charge, or penalty was imposed unfairly or inconsistently with course, program, and university standards and regulations. Students have the right to appeal a final grade, charge of academic dishonesty, or academic penalty that they believe reflects a capricious, arbitrary, or prejudiced academic evaluation, or reflects discrimination based on criteria listed in BOG Policy 44 (http://bog.wvu.edu/files/d/0d9c7853-4569-4895-b2bc-6bd7f00a3eaf/policy-44-december-18-2015-amendment.pdf). Additional grounds for appeal may include: unreasonable severity of the penalty; demonstrable prejudice in the decision-making process; a belief that the evidence does not support the finding of responsibility (in the case of academic dishonesty) or the choice of penalty; or additional evidence or new information that was not considered in determining the penalty. Further guidance for students on preparing an appeal (http://provost.wvu.edu/governance/academic-standards-resources) is available.

If a student does not appeal a final grade, charge of academic dishonesty, or academic penalty, fails to follow the appeal procedures described below, or does not attend a scheduled meeting regarding the appeal, the final grade, charge of academic dishonesty, or academic penalty will be upheld, regardless of whether or not the student is still enrolled in the course or program.

THE APPEAL PROCESS

Steps in the Appeal Process:

The following is a summary of the steps in the appeal process. In addition, a detailed list of the steps involved in each type of appeal (https://provost.wvu.edu/governance/academic-standards-resources/detailed-appeal-procedures) is available to assist students, instructors, and administrators in managing the appeal process.

• Students are notified of final grades, charges of academic dishonesty, and other academic penalties.
  • Students are informed of final grades for courses at the end of each academic term through the WVU Portal (https://portal.wvu.edu).
  • The person making a charge of academic dishonesty must notify the student in writing via WVU e-mail of the charge and penalty within 10 class days* of discovering the infraction. This person must complete the Academic Dishonesty Form (http://provost.wvu.edu/governance/academic-standards-resources) when an academic penalty for academic dishonesty is imposed, regardless of whether or not the student plans to appeal the charge or penalty.
  • The individual or chair of the committee who imposed an academic penalty must notify the student in writing via WVU e-mail of the academic penalty.
  • Prior to filing an appeal, students are strongly encouraged (but not required) to contact the individual or chair of the relevant committee who reported a final grade, made a charge of academic dishonesty, or imposed an academic penalty to express their concerns and attempt to resolve the issue. The individual or committee chair, or another informed individual, must meet with the student (p. 17) to provide information and evidence forming the basis for the grade, charge, or penalty.

• Level 1 appeal (for final grades, charges of academic dishonesty, and academic penalties):
  • The student may begin an appeal by submitting a written appeal via WVU e-mail to the Level 1 appeal reviewer named here (https://provost.wvu.edu/governance/academic-standards-resources) within the time limit provided here (p. 17). The student's appeal must include the documentation and evidence forming the basis of their appeal. In the case of a charge and/or penalty for academic dishonesty, the student may appeal the charge, the penalty, or both.
  • The individual or committee that gave the grade, made the charge, or imposed the penalty must provide all relevant documentation (including the criteria for determining the student's final grade in the case of a final grade appeal) to the Level 1 appeal reviewer upon their request.
  • The Level 1 appeal reviewer assesses the available evidence and makes a decision about the appeal based on that evidence. The reviewer communicates the decision in writing via WVU e-mail to the student and other individuals or committees that have been involved in the grade, charge, penalty, or appeal to that point. If the appeal involves academic dishonesty, the reviewer completes the Academic Dishonesty Form (http://provost.wvu.edu/governance/academic-standards-resources). The reviewer retains all documentation related to
the appeal for 5 years. In the case of a final grade appeal, the Level 1 appeal reviewer ensures that a grade modification is submitted if necessary.

• If the student accepts the Level 1 appeal decision, the appeal is concluded.

• Level 2 appeal (for final grades, charges of academic dishonesty, and academic penalties):

  • If the student does not accept the Level 1 appeal decision, the student may continue their appeal by submitting a written appeal via WVU e-mail to the Level 2 appeal reviewer named here (https://provost.wvu.edu/governance/academic-standards-resources) within the time limit provided here (p. 17).
  
  • The Level 1 appeal reviewer forwards all materials included in the appeal to the Level 2 reviewer. Both the student and other individuals or committees may provide additional information if they wish.
  
  • The Level 2 appeal reviewer assesses the available evidence and makes a decision about the appeal based on that evidence. The reviewer communicates the decision in writing via WVU e-mail to the student and other individuals or committees that have been involved in the grade, charge, penalty, or appeal to that point, including the Level 1 appeal reviewer. If the appeal involves academic dishonesty, the reviewer completes the Academic Dishonesty Form (http://provost.wvu.edu/governance/academic-standards-resources). The reviewer retains all documentation related to the appeal for 5 years. In the case of a final grade appeal, the Level 2 appeal reviewer ensures that a grade modification is submitted if necessary.
  
  • If the student accepts the Level 2 appeal decision, the appeal is concluded. If the appeal concerned a final grade, a charge of academic dishonesty without a penalty of program suspension or dismissal, or an academic penalty other than program dismissal, the appeal is concluded.

• Level 3 appeal (for suspension from a program for academic dishonesty or dismissal from a program):

  • If the penalty is suspension from a program for academic dishonesty or dismissal from a program, the student may continue their appeal by submitting a written appeal via WVU e-mail to the Level 3 appeal reviewer named here (https://provost.wvu.edu/governance/academic-standards-resources) within the time limit provided here (p. 17).
  
  • The Level 3 appeal reviewer may appoint and convene a Student Academic Hearing Committee (SAHC) to hear the case and review the appeal. In the case of an academic penalty of program suspension or dismissal based on academic dishonesty, a hearing is required. SAHC procedures follow:
  
  • Members are appointed to the SAHC at the discretion of the Level 3 appeal reviewer and shall comprise at least three faculty members. At least one SAHC member should be from the program offering the course or the student’s program; at least one should be from outside the program offering the course or the student’s program.
  
  • The SAHC holds a joint hearing with the student and any individuals involved in making the academic dishonesty charge or imposing the academic penalty and may also convene additional individual meetings or request additional materials to collect further evidence. The hearing is set outside of the student’s scheduled classes; should the student choose not to appear, the meeting will proceed as scheduled.
  
  • The student may be accompanied to the hearing or meetings or be advised by a person of his or her choice from the institution. Likewise, the faculty member, academic officer, or committee recommending academic suspension (for academic dishonesty) or dismissal may have an advisor from the institution. Such advisors may consult with but may not speak on behalf of their advisees or otherwise participate directly in the proceedings, unless they are given specific permission to do so by the individual or committee conducting the appeal.
  
  • In addition, for cases involving program suspension or dismissal based on academic dishonesty, the student may be accompanied to the hearing or meetings by an attorney, who may question witnesses and make arguments on behalf of the student.
  
  • Witnesses may be called by any of the parties involved.
  
  • A record of the SAHC hearing shall be prepared in the form of summary minutes and relevant attachments and will be provided to the student upon request.
  
  • The Level 3 appeal reviewer assesses the available evidence, including the recommendation of the Student Academic Hearing Committee, when available, and makes a decision about the appeal based on the evidence and recommendation. The reviewer communicates the decision in writing via WVU e-mail to the student, and other individuals or committees that have been involved in the charge, penalty, or appeal to that point, including the Levels 1 and 2 appeal reviewers. If the appeal involves academic dishonesty, the reviewer completes the Academic Dishonesty Form (http://provost.wvu.edu/governance/academic-standards-resources). The reviewer retains all documentation related to the appeal for 5 years.
  
  • The appeal is concluded.

• Disciplinary penalties for academic dishonesty: The individual or committee that charged the student with academic dishonesty, or the Level 1, 2, or 3 appeal reviewers may determine, in their judgment, that in addition to the academic penalty already assigned, the academic dishonesty rises to a level of significance warranting a potential disciplinary penalty of University probation, suspension, or expulsion. Examples of such cases and guidance in making this decision is available (http://provost.wvu.edu/governance/academic-standards-resources). In this case, they may refer the matter to the Office of Student Conduct. The Office of Student Conduct may also choose to pursue disciplinary penalties based on evidence of repeated instances of academic dishonesty by a student submitted via Academic Dishonesty Forms (http://provost.wvu.edu/governance/academic-standards-resources). The Office of Student Conduct shall then undertake student disciplinary proceedings consistent with WVU BOG Policy 31 (http://bog.wvu.edu/files/d/4c27ce4e-93b5-451b-a557-c9d8ab25a773/policy-31-dec-18-2015-amendment.pdf) and the Campus Student Code
These proceedings do not affect the academic penalty. If the disciplinary proceedings under the Campus Student Code result in a finding that the academic offense does not warrant additional disciplinary penalty, the case is closed and only any academic penalty imposed and upheld through the academic appeal process will apply.

Time Limits for Steps in the Appeal Process:

- **Level 1:**
  - Final Grade Appeal
    - Student files initial or continuation of appeal 10 class days after grade is posted
    - Decision about appeal communicated to student 10 class days after student submits appeal
  - Academic Dishonesty Charge
    - Student files initial or continuation of appeal 10 class days after charge is sent to student
    - Decision about appeal communicated to student 10 class days after student submits appeal
  - Academic Penalty
    - Student files initial or continuation of appeal 10 class days after penalty is sent to student
    - Decision about appeal communicated to student 10 class days after student submits appeal

- **Level 2 (all types of appeals)**
  - Student files initial or continuation of appeal 10 class days after decision at Level 1 is sent
  - Decision about appeal communicated to student 10 class days after student submits Level 2 appeal

- **Level 3 (appeals of suspension/dismissal only)**
  - Student files initial or continuation of appeal 10 class days after decision at Level 2 is sent
  - Decision about appeal communicated to student at discretion of the Provost's office

*Class days are defined as days during which the University is open and classes are officially in session. If classes are canceled for the University as a whole for part or most of a day, the day will not be deemed a class day.

Communication about Appeals:

All communication with a student concerning an appeal must come directly from, or be directed to, the student. Although students and others involved in the appeal process may consult with third parties, appeals and communication about appeals should be conducted between the student and individuals or committees charged with reviewing the appeal. Communication may take place through written documents, e-mail (using official University e-mail accounts wherever possible), and direct contact (telephone, face-to-face meetings, etc.). Decisions at each level of appeal must be communicated to the student and other individuals involved with the appeal at prior levels in writing transmitted via WVU e-mail. In addition, all penalties for academic dishonesty and the outcomes of all appeals involving academic dishonesty must be reported via the Academic Dishonesty Form (http://provost.wvu.edu/governance/academic-standards-resources).

Responsibility for Appeal Decisions:

Detailed information about which individuals or committees are responsible for handling different types and levels of appeals (https://provost.wvu.edu/governance/academic-standards-resources) is available. These individuals may refer this responsibility to a designee or to a standing or ad-hoc committee. In some cases, program, college, or school documents may provide additional guidance on who is charged with reviewing specific types of appeals. Any disagreements about who is responsible for appeal decisions will be resolved by the Associate Vice President for Academic Affairs in Health Sciences, the Associate Provost for Undergraduate or Graduate Academic Affairs, or the divisional campus President.

Evidence and Meetings Concerning Appeals:

Individuals and committees reviewing appeals may convene individual or joint meetings or request additional materials to collect further evidence. The student may be accompanied to meetings concerning the grade, charge, penalty, or appeal by a person of his or her choice from the institution. Such advisors may consult with but may not speak on behalf of their advisees or otherwise participate directly in the proceedings, unless they are given specific permission to do so by the individual or committee conducting the appeal. Note that some Level 3 Student Academic Hearing Committee meetings may allow the presence and participation of an attorney.

In this section:

- Probation (p. 17)
- Suspension and Dismissal

Probation

Graduate students may be placed on probation by the director of their program or by the dean of their college or school by failing to maintain acceptable grades in their courses or in their performance in other areas such as research progress or professional behavior. Graduate students with a cumulative
grade point average (GPA) below 2.75 may be subject to probation by the dean of their college or school. Individual academic units may designate a higher GPA or other academic standards required for students to remain in good standing.

Probation, which is not recorded on a student’s permanent record, constitutes a warning to the student that standards are not being met. A letter of probation delivered by the graduate program to the student must outline the reason for the sanction as well as delineate academic or other benchmarks for the student to attain in order to have the probation sanction removed. Students may request review of the sanction of probation by the academic official who imposed it at any point in a semester. At the conclusion of the semester in which a student was placed on probation, the academic program shall review the academic record and performance of the student. If the stipulations set forth in the letter of probation have been met, the student is removed from probation. If the stipulations have not been met, student standing is reassessed by the program and the student may continue on probation or be suspended or dismissed by the academic unit.

**Suspension and Dismissal**

Students failing to maintain satisfactory academic standing, progress toward their degree, or professional behavior as delineated by the letter of probation may be suspended or dismissed from their degree program. Suspension or dismissal from a program normally follows a sanction of probation in cases where students have been counseled regarding academic stipulations and fail to attain those stipulations. Typically, students are suspended or dismissed from a program at the end of an academic term and are notified formally by the department and/or the dean of the college/school of suspension or dismissal from their program. However, students can be suspended or dismissed from their program without a prior probation period and at other than the end of a term in the case of serious violations of academic or professional standards, with approval of the school or college dean and the Associate Provost for Graduate Academic Affairs or Associate Vice President of Academic Affairs (Health Sciences). If the program recommends dismissal from the University, which is only an option in the case of conduct violations, the case is referred to the Office of Student Conduct and Student Conduct processes apply.

Suspension from a program means that a student will not be permitted to register for classes offered by the program or participate in other program activities until the student has been notified that he or she is no Longer suspended. The normal period of suspension is a minimum of one academic semester but will not exceed one calendar year. Suspended students may petition in writing for reinstatement at any time. The college or school petitioned shall establish the terms of reinstatement for successful student petitions. At the end of one calendar year of suspension, the student must be reinstated to or dismissed from the program. If appropriate, the student may be reinstated and placed on probation.

Dismissal from a program can result from repeated failure to make academic progress, failure to meet probationary terms set forth in writing by the student’s program, violations of written standards provided by the student’s program, or serious violations of professional standards. A student who is dismissed from a program will not be permitted to register for classes offered by the program or participate in other program activities. A student who is dismissed from a program will be reclassified as a non-degree student unless they are admitted into a different degree program.

A student who is dismissed from the University by the Office of Student Conduct will not be permitted to register for any classes offered by the University for academic credit. After five calendar years from the effective date of dismissal from the University, a dismissed student may request reinstatement to the University with the terms of reinstatement to be established by the college or school willing to admit the student to a degree program. Failure to meet these terms will result in permanent dismissal.

**Research Integrity**

Integrity in research and scholarship is an obligation of all who engage in the acquisition, application, and dissemination of knowledge. Research and scholarly work by West Virginia University faculty, staff, and students is governed by a number of federal, state, and institutional policies. Information on policies and procedures, guidelines, educational programs, and monitoring and accountability in these areas is provided at oric.research.wvu.edu.

Any graduate student who conducts research using animals must have a protocol approved by the Animal Care and Use Committee before starting the research. Information and procedures are available at oric.research.wvu.edu/services/lacuc.

Any graduate student who conducts research involving human subjects must have the approval of the Institutional Review Board for the Protection of Human Subjects before starting the research. Information and procedures are available at oric.research.wvu.edu/services/human-subjects.

All members of the University community are obligated to report observed, suspected, or apparent misconduct in research. Reports should be made to the University’s research integrity officer through the link to Online Research Problem Reporting at oric.research.wvu.edu.

**Intellectual Property**

The Office of Technology Transfer is responsible for the protection and commercialization of intellectual property for all WVU organizations. Faculty members and other researchers, including graduate students, are the primary source of intellectual property, either through the invention of new products or processes, or through know-how and expertise in certain fields. Intellectual property can be protected through patents, copyrights, trademarks, and trade secrets. Commercialization occurs primarily through licenses of patents and/or know-how to existing companies, and, in some cases, through the creation of a joint venture or even a start-up company. Policies, forms, and other useful information about intellectual property and technology transfer activities at WVU is available at techtransfer.research.wvu.edu.

Graduate students with other concerns about intellectual property, such as research data ownership and retention, authorship considerations when presenting or publishing, and use of course materials, should discuss these concerns with faculty members and administrators in their discipline as well
as with their collaborators in any research activities. Additional information is available from the Office of Research Integrity and Compliance (http://oric.research.wvu.edu/services/responsible-conduct).

Admissions

In this section:

• Applicants for Degree and Certificate Programs (p. 19)
• Non-Degree Applicants (p. 19)
• Adding or Changing Programs (p. 19)
• Minimum Admission Standards (p. 19)
• Standardized Tests (p. 20)
• Admission Denial (p. 20)

Applicants for Degree and Certificate Programs

Prospective graduate students (including transfers) are encouraged to complete an inquiry form (for on-campus programs (https://wvugrad.askadmissions.net/emtinterestpage.aspx?ip=grad) or online programs (https://wvugrad.askadmissions.net/emtinterestpage.aspx?ip=extendedlearning)) and are urged to contact the relevant academic department regarding specific admissions requirements and opportunities for pursuing graduate study. For a list of available degree and certificate programs, websites, and contacts, see this list of degree programs. (http://majors.wvu.edu) The Office of Graduate Admissions and Recruitment (https://graduateadmissions.wvu.edu) provides information and links relevant to the application process with additional information regarding programs of interest to be found on individual programs’ websites.

To be considered for admission to a WVU graduate program, prospective students must complete the WVU graduate admissions application (https://app.applyyourself.com/AY ApplicantLogin/fl_ApplicantConnectLogin.asp?id=wvugrad). Some professional programs may also require application through another central service.

Each degree or certificate program has specific admission requirements that should be carefully reviewed prior to submitting an application. While applicants may meet the minimum University requirements, admission to WVU is determined by academic programs. Final admission cannot be granted until all final transcripts have been received and successful completion of the student’s bachelor’s degree (or master’s degree, if required) has been determined by the Office of Graduate Admissions and Recruitment. (https://graduateadmissions.wvu.edu)

Applicants who fail to enroll within a year after acceptance must reapply. Students admitted to and enrolled in a degree program who have not been enrolled for two or more years also must reapply for admission. Students classified as non-degree graduate students must apply for admission if they wish to pursue a degree or certificate program. Applicants who wish to pursue more than one degree must apply separately to each degree program. Some programs may not allow simultaneous enrollment in another program; applicants must obtain permission from both programs to simultaneously enroll in two programs.

Non-Degree Applicants

Students not wishing to pursue an advanced degree may apply for admission as a non-degree graduate student. A student who wishes to take courses as a non-degree graduate student after completing a degree at WVU must submit a new application and pay the nonrefundable application fee.

Admission as a non-degree student does not guarantee admission to any course or program. Some programs may allow non-degree students to enroll in its courses. The section on Degree Program Credit Limitations (http://catalog.wvu.edu/graduate/advisingcoursedegrees/#creditlimitstext) describes limits on the application of credits earned as a non-degree student to degree or certificate programs.

Currently Enrolled Students: Adding or Changing Programs

A current WVU graduate student who wishes to pursue a different or additional graduate degree or to pursue a certificate must first contact the program to determine the admissions process and procedures. In most cases, the student must formally apply to the other program by completing the WVU graduate admissions application (https://app.applyyourself.com/AY ApplicantLogin/fl_ApplicantConnectLogin.asp?id=wvugrad).

When a student changes from one program to another within the University, the faculty of the new program determines if any credit (up to 12 credits) earned while enrolled in the prior program may be applied to the new program. Some programs may not allow simultaneous enrollment in another program; applicants must obtain permission from both programs to simultaneously enroll in two programs.

Minimum Admission Standards

The WVU Graduate Council establishes the minimum standards for admission to graduate study detailed in the Classifications (http://catalog.wvu.edu/graduate/graduateeducationatwestvirginiauniversity/#classificationstext) section. Beyond this point, however, faculty members in a given graduate program control who is to be admitted to graduate study under their supervision. While a student may be admitted to the University to enroll in advanced coursework as a non-degree graduate student, only program faculty may grant permission for the pursuit of a graduate degree.
Standardized Tests

Many programs at WVU require specific graduate admission standardized test scores from all applicants. These admission requirements are found in the admissions section of each program description within the Graduate Catalog (http://catalog.wvu.edu/graduate) and at majors.wvu.edu. If standardized test scores are required, the applicant should request the testing agency to send the scores to WVU. In addition, applicants are encouraged to upload a copy of their test scores, if available, as part of their online application in order to facilitate the WVU evaluation process.

Admission Denial

If an application for admission into a graduate program is denied, the applicant may request the reasons for refusal of admission by writing to the graduate program coordinator (see majors.wvu.edu). Note that meeting the minimum requirements for admission into a graduate program does not ensure admission. Many programs restrict the number of admissions by selecting among the qualified applicants. An applicant may appeal to the graduate program coordinator for reconsideration if he or she can document factual errors in processing the application or if the decision was deemed arbitrary, capricious, or discriminatory in nature.

If the matter is not resolved satisfactorily within thirty calendar days of the receipt of the appeal by the graduate program coordinator, the applicant may appeal to the dean of the college or school. The decision of the dean, as the provost’s designee, shall be rendered within twenty calendar days of the receipt of the appeal and is final.

In this section:

- Regular Graduate Students (p. 20)
- Provisional Graduate Students (p. 20)
- Non-Degree Graduate Students (p. 20)
- Reclassification of Graduate Students (p. 20)

Regular Graduate Students

Regular graduate students are degree- or certificate-seeking students who meet all the criteria for regular admission to a program of their choice. The student must have earned a baccalaureate degree from a regionally accredited college or university, must have had an undergraduate or graduate grade point average of 2.75 or higher on a 4.0 scale, must have met all the criteria established by the degree or certificate program, and must be under no requirements to make up deficiencies.

Provisional Graduate Students

Provisional graduate admission may be offered to a student when the student has earned a baccalaureate degree from a regionally accredited college or university, but does not meet the criteria for regular admission. The student may have incomplete credentials, deficiencies to make up, or an undergraduate or graduate scholastic record that shows promise but is below the 2.75 grade point average required for regular admission. The offer of admission from the graduate program must specify the requirements that must be met for the graduate student to be re-classified as a regular graduate student.

Non-Degree Graduate Students

To be admitted as a non-degree student, a student must present evidence of a baccalaureate degree from a regionally accredited college or university and an undergraduate or graduate 2.5 grade point average. The student must also earn a 2.5 grade point average on the first twelve credit hours of coursework taken at WVU and then maintain this average as long as he or she is enrolled as a non-degree student.

Reclassification of Graduate Students

A provisional graduate student may be reclassified as a regular graduate student when the student meets the program requirements specified in the offer of admission from the student’s program and the WVU minimum grade point average of 2.75 in all coursework taken while a provisional graduate student. A unit must review the student’s record and notify the student and the Office of Graduate Admissions and Recruitment of its decision to admit or not admit the student no later than the end of the term in which the student completes 18 credit hours. A provisional graduate student who fails to meet the provisions of admission or who fails to achieve the required grade point average will not be admitted, but may reapply for admission to another program or as a non-degree student. Further registration by a provisional graduate student who has completed 18 or more credit hours will only be permitted when the student is reclassified as a regular graduate student, a provisional graduate student in a different program, or a non-degree graduate student. An exception may be granted by an academic dean.

To be eligible to enter a degree program as a regular graduate student, a non-degree graduate student must have earned a 2.75 or higher grade point average in all coursework taken since admission as a non-degree graduate student.

Regular and provisional students may become non-degree graduate students by choice. A regular graduate student who is dismissed from a program for academic or other reasons will be reclassified as a non-degree graduate student.
International Student Admission

WVU is authorized under federal law to enroll non-immigrant foreign nationals as students. International students wishing to enroll for graduate work at WVU must comply with the academic requirements for admission (http://catalog.wvu.edu/graduate/graduateeducationatwestvirginiauniversity/#classificationtext) and with certain additional academic and nonacademic requirements (http://graduateadmissions.wvu.edu/information-for/international-students).

Details regarding application requirements for international graduate students can be found at http://graduateadmissions.wvu.edu/information-for/international-students. Applicants are encouraged to contact the academic program of interest for program-specific information about requirements other than the general admissions criteria listed above, and to begin the process of applying for admission well in advance of the desired admission date.

International students seeking or offered financial support as graduate teaching assistants (GTAs) and whose native language is not English are required to pass the WVU SPEAK test (http://iep.wvu.edu/testing_resources/speak) prior to engaging in any classroom instruction.

Advising, Enrollment & Evaluation

In this section:

- Advisors (p. 21)
- Plan of Study (p. 21)
- Advising of Non-Degree Students (p. 21)
- Yearly Evaluation (p. 21)

Advisors

Academic and scholarly advising varies by graduate program across the University. Each graduate academic unit has one or more graduate advisors, and every graduate student must be assigned an advisor throughout their graduate training. This advisor may also be the student’s thesis or dissertation advisor. The advisor and student typically meet soon after the student’s admission to the program to develop a plan of study and on a regular basis thereafter to monitor and review progress.

Plan of Study

All graduate students must have a plan of study, which is a formal agreement between the student and their program or committee regarding the conditions the student must meet to earn the desired degree. The plan of study usually lists required courses and activities and describes the timeline for these requirements. The plan may also include suggested or optional courses and activities. Each college or school determines the mechanisms for establishing, changing, and monitoring students' progress on plans of study. The plan of study should be in place no later than the end of the student’s first semester.

Advising of Non-Degree Students

Each dean establishes a mechanism to advise non-degree graduate students who intend to take the majority of their coursework in the dean’s college or school. Non-degree students with an interest in programs in two colleges or schools may be assigned to either by the Office of Admissions. It is expected that the student will take responsibility for understanding the policies of each unit and facilitate any needed communication between advisors.

Yearly Evaluation

All graduate students who enrolled in at least one credit during the academic year are provided with a written evaluation from their program following the end of each spring term. This requirement may be waived for students in good standing who are expected to graduate in spring or summer.

In this section:

- Credit Loads and Limits (p. 22)
- Minimum Enrollment (p. 22)
- Leaves of Absence (p. 22)
- Non-Degree Students (p. 22)
- Auditors (p. 22)
- Attendance Policy (p. 22)
- Withdrawal Policy (p. 23)
- Preferred Name Policy (p. 23)
Credit Loads and Limits

Nine credit hours in a fall or spring term and six credit hours in the summer term is the minimum load to be considered a full-time graduate student. Courses taken under the audit option are counted toward attaining full-time enrollment status. Graduate students are not permitted to take more than 17 hours in a term without approval by their college or school and by the Office of Graduate Education and Life. No overload requests will be considered for the summer term. Requests for more than 18 hours in a fall or spring term, or from students with a grade point average below 3.25, will not normally be approved. Although students may enroll for up to 17 hours in the summer term, they are strongly discouraged from enrolling in more than 12 hours.

Minimum Enrollment

In any term during which a graduate student is using University research facilities, consulting with graduate committee members, or completing a thesis or dissertation (including the thesis or dissertation defense and submission of the Electronic Thesis and Dissertation, or ETD), the student must enroll for at least one hour of graduate credit. These students are assumed to be utilizing University services, facilities, and other resources, including faculty expertise, even if they are not enrolled in formal coursework.

In addition, students formally admitted to candidacy for graduate degrees are required to register for at least one credit hour each fall and spring term as a condition of their continued candidacy. Individual programs may also require summer enrollment to maintain candidacy. Students admitted to candidacy who fail to maintain continuity of enrollment may be dropped from candidacy.

Students who are not admitted to candidacy may take courses intermittently if allowed by their program and if they are not using University facilities or consulting with faculty while they are not enrolled.

Students who have completed all requirements for a degree (including the thesis or dissertation defense and submission of the ETD) prior to the beginning of the term of graduation do not need to enroll during that term.

Leaves of Absence

Graduate students in good standing who wish to be away from their academic endeavors at WVU for one or more semesters but intend to return at a later date may request a leave of absence. Students should consult with their program or school/college concerning the required procedure to request a leave of absence. Some programs (such as some master’s programs or part-time programs) may not require students to request a leave of absence in order to enroll sporadically and remain in good standing. Doctoral students admitted to candidacy who wish to not enroll for one or more semesters must be granted a leave of absence in order to maintain their candidacy. Leaves of absence are not required for summer terms unless otherwise specified by a student’s program.

Minimally, requests for leaves of absence must be submitted in writing to a student’s program director or department chair prior to the beginning of the semester for which the leave is desired. The program director or department chair (or an appropriate faculty committee or other administrator) determines whether or not to grant the leave of absence, the length of time granted, and any conditions the student must meet to return to the program following the leave of absence (including a date by which the student must inform the program that he or she plans to return). The student is informed in writing of the outcome of his or her request, and a copy of the outcome is retained in the student’s records.

Information concerning military deployments during a semester is available in the Undergraduate Catalog.

Non-Degree Students

Non-degree students are normally those taking classes for enrichment purposes, public school teachers taking classes for certification renewal, or students taking classes as prerequisites for admission to degree programs. Non-degree students may enroll in any course in the University for which they meet the prerequisites and any other restrictions on the course. However, some departments restrict enrollments to majors only or require non-degree students to obtain instructor permission to enroll.

A non-degree graduate student may accumulate unlimited graduate credit hours. However, under no circumstances may a non-degree student apply more than twelve hours of previously earned credit toward a degree (see section on Course Credit Limitations (http://catalog.wvu.edu/graduate/advisingcoursesdegrees/#Limitations)). If the student is later admitted to a degree program, the faculty of that program will decide whether any credit earned as a non-degree student may be applied to the degree.

Auditors

An auditor may register for courses and must pay full fees but does not receive credit for the course. A student who audits a course must let one semester pass before enrolling in the course for credit. A student may change his or her status from audit to grade or grade to audit only during the registration period. Attendance requirements for auditors are determined by the instructor of the course. The instructor may direct the Office of the University Registrar to remove an auditor from a class list or grade report if attendance requirements are not met.

Attendance Policies

Instructors may set attendance policies that are appropriate for the goals and instructional strategies of their courses and instructors may include attendance records in determining the final course grade. All attendance policies that affect students’ grades must be announced in writing (typically
within the course syllabus) within the first week of class. Moreover, instructors are responsible for keeping accurate enrollment records, and for keeping accurate attendance records when attendance is used in grading.

Students who are absent from class for any reason are responsible for all missed work and for contacting their instructors promptly, unless the instructors' policies require otherwise. However, instructors cannot require documentation of student illness from any medical provider as part of an attendance policy, as medical conditions are confidential and frequently not verifiable.

Withdrawal Policy

There are two types of withdrawals: withdrawal from individual courses for which a student has registered and a complete withdrawal from the University. Deadlines, procedures, and polices concerning withdrawals are available at the Registrar's website. Students are encouraged to discuss withdrawals with their advisor and to consider the impact of withdrawals on their required enrollment and degree progress as well as their eligibility for graduate assistantships, financial aid, or international full-time status. Students who decide not to return for a subsequent term must withdraw from all registered courses prior to the term to avoid being charged tuition and fees.

RE-ENROLLMENT AFTER WITHDRAWAL

After a student withdraws from WVU in two consecutive semesters (excluding summer sessions), a student may not register for further work without approval of the dean of the college or school in which the student wants to register. Enrollment is subject to conditions set by that dean.

Preferred Name Policy

West Virginia University recognizes that students may use a different first name from their legal name. To facilitate this, the University allows students to select a preferred name to be used on class rosters, in DegreeWorks, MIX, eCampus and the online University directory (unless the student has directed nondisclosure), and other systems that do not contain official records as technically feasible. Preferred names are first names that are different than a student's legal first name. Official records of the University such as the transcript, diplomas, financial aid documents, and others, where legal name is required will not be available for the use of a preferred name. If a student changes names legally, these documents will reflect the legal name.

This accommodation is available to two groups of students: transgender and international students. The Office of the University Registrar may make exceptions for other students upon review.

Transgender students who wish to use a preferred name should contact one of the following units on campus to initiate use of their preferred name:

Morgantown Campus
Office of the University Registrar
Evansdale Crossing
Carruth Counseling Center/WellWVU
Health and Education Building
390 Birch Street

LGBTQ+ Center
Hodges Hall G-06
127 Hough Street

Beckley Campus
Trio and Diversity Programs
136 Benedum Center

Keyser Campus
Office of Enrollment Services
75 Arnold Street

International students who wish to use a preferred name should contact the Office of International Students and Scholars (Purinton House) to initiate use of the preferred name.

All students, regardless of University point of contact, will be asked to complete a form to request use of their preferred name. Submission of the form requires verification of photo ID by a WVU staff member. In the alternative, students may also send a letter to the Office of the University Registrar requesting the use of a preferred name. The letter should contain both the legal name and the preferred name as well as the student's WVU ID number. All letters must be signed and witnessed by a notary public.

The preferred name will remain in use until the student requests that it be deactivated. Deactivation can be initiated via the units listed above.

This process for using a preferred name does not impact students who officially change their legal name.
In this section:
- Grades in Graduate Courses (p. 24)
- Grading System (p. 24)
- Satisfactory/Unsatisfactory-Pass/Fail (p. 24)
- Grade Point Average (GPA) (p. 24)
- Incompletes (p. 25)
- Repeated Courses (p. 26)
- Official Transcripts (p. 26)

Grades in Graduate Courses

Letter grades are assigned in many graduate courses. Grades of C or below are considered substandard. Some programs allow credit toward the degree for courses in which a grade of C is earned; others do not. No credit is earned for graduate courses in which a grade of D is earned; individual programs determine if credit is earned toward the degree for professional courses in which a grade of D is earned.

Grading System

<td>Unforgivable F (Not eligible for D/F repeat policy.)</td>
</tr>
</tbody>
</table>

Note: Grades that are not reported by faculty at the end of a term will be designated with an NR on the official transcript. Grades that are not reported will become an F at the conclusion of the next semester if a final grade is not submitted.

*Sno credit is earned for graduate courses in which a grade of D is earned; individual programs determine if credit is earned toward the degree for professional courses in which a grade of D is earned.

Satisfactory/Unsatisfactory - Pass/Fail Grading

At the graduate level, the satisfactory-unsatisfactory ("S/U") grading option is used only for the course numbers 697/797 "Research." The "S" and "U" grades for 697/797 are not applied to the calculation of the GPA. "S/U" shall be the only grading option for 697/797.

Other courses for which faculty wish to use a binary grading option should use the pass-fail ("P/F") grading option. Grades of "F" earned using this option do apply to the GPA.

Grade Point Average (GPA)

GRADE POINTS

Each letter grade has a numeric value. Grade points are based on this number value and the credit hour value of the course.

- A- 4
- B- 3
- C- 2
- D- 1
• F/UF- 0
• I- 0
• U- 0

The GPA is computed on all work for which a student registers, with the following exceptions:

• Courses with a grade of CR, H, PR, P, S, W, and X carry no grade value. The grade of incomplete (I) initially carries no grade value.
• When a student receives the grade of I and the incomplete grade is later removed, the grade point average is calculated on the basis of the new grade. If the I grade is not removed within the next semester, the grade is treated as an F (failure).
• If a student is working toward teacher certification, he or she is responsible for every registration in a course in which the grade of A, B, C, D, F, P, X or I is received.

GRADE POINT AVERAGE

All academic units of the University have minimum standards of scholastic quality that must be met or exceeded. Beginning in January 2012, grades earned in Baccalaureate-level college work attempted at other accredited US institutions are included in the calculation of the overall GPA. All credits and grades accepted as transfer credit from all accredited US institutions will be used in the calculation of the cumulative GPA and total attempted and earned credits. Study Abroad credit is treated as non-US and is awarded as credit only, regardless of whether it is taken through a US institution. Only courses with a grade of “D” or higher will be transferred to WVU as earned Study Abroad Credit. To be eligible to receive a baccalaureate degree, a student must have a GPA of at least 2.0 at the time of graduation. To be eligible to receive a graduate degree, a student must have a GPA of at least 2.75. To be eligible to receive a graduate certificate, a student must have a GPA of at least 2.75 in courses applied to the certificate. Some degree or certificate programs require a higher grade point average overall or in the major courses. GPA is based on all work for which a student received a letter grade other than W and P and coursework excluded under the provisions of the D/F Repeat Policy. The GPA for honors consideration for a baccalaureate is based on baccalaureate-level college work attempted at WVU as well as other regionally accredited US institutions.

GPA CALCULATION

Students need to know how to calculate their overall and semester GPAs. The following example shows how to do it.

Assume a student registered for 16 hours and receive the following grades in these courses:

• English 101 – B
• Mathematics 126 - A
• Geology 101 - C
• Political Science 101 - B
• Spanish 101 - D
• Psychology 491 - P

1. Multiply the credit by the grade value to get the grade points earned for each course using values for letter grades as described in the Grade Points section.
   • English 101, 3, B, 3 x 3 = 9
   • Geology 101, 3, C, 2, 3 x 2 = 6
   • Spanish 101, 3, D, 1, 3 x 1 = 3
   • Mathematics 126, 3, A, 4, 3 x 4 =12
   • Political Science 101, 3, B, 3, 3 x 3 = 9
   • Psychology 491, 1, P, 0, 1 x 0 = 0

2. Add the total grade points earned and divide by the total credit hours with a grade value. Remember that P grades have no grade value, so in this case, the grade points earned total 39 (9+6+3+12+9) and there are 15 credit hours (3+3+3+3+3) for the GPA calculation. The GPA calculation for this student would be: 39/15=2.6.

Incomplete Grades

A grade of I (Incomplete) is a temporary grade assignment used when unforeseen, non-academic circumstances arise that prohibit students from completing the last course assignments or examinations at the end of the semester. The grade of Incomplete is typically assigned because of an excused absence from the final examination, or because assignments are unavoidably incomplete, as determined by the instructor. Students who are failing a course (exclusive of the incomplete work) may not request an Incomplete.

Students who want be considered for an Incomplete must apply to their instructor prior to the end of the term. If the instructor agrees, the instructor and the student must negotiate the conditions under which the grade of I will be changed to a letter grade and sign a contract. The date to submit the incomplete work should not be set beyond the last day of class of the following semester. If the student does not complete the terms of contract then the instructor should submit a grade of F. All incomplete contracts must be filed with the department and Dean’s Office.
To remove the grade of I, a student does not register for the course again.

If the Incomplete grade is not changed by the end of the next major term (excluding summer), the I grade will be replaced with an IF.

### Repeated Courses

Courses repeated that cannot be taken again for credit follow this procedure:

1. Both the original course grade and the second course grade are included in determining the overall GPA. The original course is excluded from earned or degree hours and is marked with an (A).
2. The original grade is not deleted from the student’s permanent record.
3. The second grade is entered on the student’s transcript and marked as included (I) in the semester that the course was repeated.
4. Courses repeated more than once are handled the same way with the final attempt carrying earned or degree hours. All attempts are used for determining the GPA.

### Official Transcripts

Students can order official transcripts through the Office of the University Registrar (http://registrar.wvu.edu/transcripts). Before ordering a transcript, students should ensure that all grades and degree(s) have been posted as transcript requests are processed immediately. All financial obligations to West Virginia University must be cleared before transcripts can be released. A West Virginia University transcript is a complete record of a student’s enrollment at WVU that includes all undergraduate, graduate, and professional courses.

**THESES & DISSERTATIONS:**

- Theses and Dissertations
- Defense
- Submission

**Statement on Awarding Degrees**

All degrees are conferred by the WVU Board of Governors as recommended by the faculties of the various colleges and schools. A degree is granted at the end of the semester or summer term in which a student completes all the requirements for that degree, provided the student has submitted an application for graduation at his or her major department's academic dean's office and the dean has certified completion of all degree requirements.

A student becomes eligible to graduate when he or she completes the requirements of the University, college or school, and major degree program according to the Graduate Catalog in effect at the time the student first entered WVU, although these requirements are subject to change at any time with reasonable notice provided to students. With the consent of the student's advisor and dean, a student may choose to meet the conditions published
in a later catalog. If a student entered WVU more than seven years previously, the student must complete the requirements in a catalog that is no more
than seven years old.

Students must observe any program changes that are enacted by the West Virginia University Graduate Council, West Virginia University Faculty
Senate, West Virginia University Board of Governors, West Virginia Higher Education Policy Commission, or by local, state, or federal law.

WVU will not issue a diploma or a transcript to any student until payment of all tuition, fees, and other indebtedness to any unit of the University is made.

In this section:
- Master's Degree (p. 28)
- Doctoral Degree (p. 28)

Master's Degree

Master's degree students are permitted to continue in a program for a maximum of eight years following their term of admission to the program. Students
who have been inactive for two or more years or who exceed eight years following their term of admission are required to apply for readmission to the
University and their graduate program.

Graduate course work used to meet master's degree requirements must be satisfactorily completed within a period of eight years immediately preceding
the conferring of the degree. The rationale for this limit is to ensure that students earning a master's degree have current knowledge (no more than eight
years) in their field. Courses completed in the same term as degree conferral (fall, spring, summer) eight years previously are considered to fall within
the eight-year limit (for example, a course completed in fall 2008 would fall within the limit for fall 2016 degree conferral). A course completed more
than eight years prior to the term of degree conferral must be revalidated if it is to be used toward meeting degree requirements. Revalidation can be
accomplished through the following procedure:

- The current instructor of the course determines the method used to revalidate the course. The student may, for example, be required to complete
  specific activities (such as repeating all or some of the course or completing a set of readings). The instructor then assesses the student’s
  knowledge of course material (through such means as a written or oral examination, a paper, a project, or some other assessment) and determines
  if the student's knowledge is adequate to justify revalidation of the course.
- The instructor submits a description of the revalidation method and results of the assessment to the college or school dean or designee.
- The college or school dean or designee submits a letter describing the revalidation process and supporting the revalidation to the Associate Provost
  for Graduate Academic Affairs.
- The Associate Provost informs the Office of the Registrar that the course has been revalidated.

Doctoral Degree

Doctoral candidates are allowed no more than five years in which to complete the remaining requirements of their program after being admitted to
doctoral candidacy. The rationale for this limit is to insure that students earning a doctoral degree have current knowledge (no more than five years old)
in their field. Admission to doctoral candidacy must occur at least one semester prior to graduation, and normally is expected to precede work on the
dissertation (check program guidelines for exceptions to this expectation).

In the event a student anticipates failing to complete the doctorate within five years after admission to candidacy (calculated from the beginning of the
academic term following admission to candidacy), an extension of up to 12 months may be requested. Only one extension is allowed. Once the initial
candidacy period expires, a student will be changed to non-degree status and must be readmitted to the program before an extension can be requested.
Prior to requesting an extension, the student must repeat the program’s examination for admission to candidacy or an alternate procedure (approved
by the student's college or school dean or designee) for assessing the student’s academic competence and current knowledge in their field of study. If
appropriate, the student may be expected to retake or revalidate courses (using the procedure described for master’s students) in order to insure that
the student’s subject knowledge is up-to-date. A request for an extension of time in order to complete degree requirements must be submitted by the
student’s college or school dean or designee to the Associate Provost for Graduate Academic Affairs and must include the following:

- A statement documenting the circumstances that justify the request, including information about any leaves of absence approved for the student.
- A description of the procedures followed to insure the student’s academic competence and up-to-date knowledge in the field of study (repetition of
  the admission to candidacy examination or alternate procedure).
- A timeline by which the student is expected to complete remaining degree requirements, including a final deadline by which all degree requirements
  must be completed. The extension may not exceed 12 months.
- Evidence of endorsement of the request from the student’s advisory committee and the office of the dean.

In this section:
- Master's Degree Requirements (p. 29)
- Doctoral Degree Requirements (p. 29)
- Foreign Language Competency (p. 29)
Master’s Degree Requirements

Students in a master's program must complete a minimum of 30 total credits, of which at least 24 credits must be coursework other than research, thesis, project, internship, etc. Many programs set requirements for higher numbers of coursework credits to earn the master's degree. Some, but not all, master's programs require completion of a thesis.

Doctoral Degree Requirements

The doctorate is a research or performance degree and does not depend solely on the accumulation of credit hours. The requirements of the degree are admission to candidacy, residency, completion of the program of doctoral study (plan of study (http://catalog.wvu.edu/graduate/advisingcoursesdegrees/advising_and_evaluation/#Plan_of_Study)), and completion and defense of a dissertation.

ADMISSION TO DOCTORAL CANDIDACY

Admission to graduate study and enrollment in graduate courses do not in themselves imply acceptance of the student as a candidate for a doctoral degree. Admission to doctoral candidacy is accomplished only by satisfactorily passing a candidacy examination (which may have a different label in different programs) and by meeting other requirements specified by the program. The doctoral student's competency is generally assessed and verified through a candidacy examination in a reasonable period of time after acceptance into a program. Admission to doctoral candidacy must occur at least one semester prior to graduation, and normally is expected to precede work on the dissertation (check program guidelines for exceptions to this expectation).

Because the candidacy examination attests to the academic competence of the student and is the formal mechanism for admitting the student to candidacy, it cannot precede the conferring of the degree by too long a period of time (refer to the section on time limits for the doctoral degree (http://catalog.wvu.edu/graduate/advisingcoursesdegrees/degree_regulations/#timelimitstext)).

The candidacy examination typically assesses the student’s knowledge of the important issues in their field of study, as well as their ability to engage in research. The examination is intended to determine whether the student has the academic competence to undertake independent research in the discipline and to insure that the student possesses a thorough grasp of the fields outlined in the plan of study. The exam is generally taken after a student has completed the major portion of the program course requirements and other program-specific requirements (such as the acceptance of a prospectus, a grant exercise, or other forms of student evaluation).

Candidacy examinations are evaluated by a faculty examining committee consisting of at least three members. If two members vote to fail the student, all or part of the candidacy examination must be repeated. Academic tradition does not allow a candidacy examination to be administered more than three times; many programs limit administration to two times.

RESIDENCY

Doctoral education involves many learning experiences that take place outside the formal classroom setting. These involve observing and participating in activities conducted by the graduate faculty, using departmental and University libraries, attending lectures presented by visiting scholars, informally debating other students, and similar activities. To ensure that graduate students experience this kind of informal learning, doctoral programs at WVU generally require at least two semesters in residence on campus. However, an individual student or graduate committee may propose an alternative plan by which the student can gain equivalent educational experience. This plan must be submitted in writing, approved by the college or school dean or designee, and placed in the student's program file.

PROGRAM OF DOCTORAL STUDY ( PLAN OF STUDY (HTTP://CATALOG.WVU.EDU/GRADUATE/ADVISINGCOURSESDEGREES/ADVISING_AND_EVALUATION/#ADVISINGTEXT))

The program of doctoral study is planned with the student’s graduate advisor and committee to combine any or all of the following: graduate courses of instruction, special seminars, independent study, supervised research, and supervised training designed to promote a broad and systematic knowledge of the major field and to prepare the student to complete the requirements for admission to candidacy and to successfully complete the dissertation.

Foreign Language Competency

Competence in one or more foreign languages may be a requirement in some graduate degree programs. The faculty in the program specifies the language or languages and the level of competence to be demonstrated. Students should contact their graduate program coordinator or chair for more information.
GPA Standards

A minimum GPA of 2.75 based on all courses taken while a graduate student (including undergraduate level courses) or transferred to a student's graduate transcript is required for conferment of a degree (although some professional programs use different grading systems and standards; see individual listings). Individual academic units may designate a higher GPA or other academic standards required for students to receive a degree.

A minimum GPA of 2.75 based on courses applied to a certificate is required for the award of a certificate. Some certificates may have higher or additional standards.

Graduation

Students anticipating completion of all degree requirements by the end of a term must complete an Application for Graduation (see registrar.wvu.edu/current_students) by the posted deadline for that term. The candidate must complete all requirements by posted deadlines. If the degree is not earned during that term, the student must submit a new Application for Graduation by the posted deadline for the term in which completion is again anticipated.

Colleges and schools are responsible for certifying that master's and doctoral students meet the minimum requirements of the University as well as any additional college or school requirements.

Participation in commencement ceremonies is a public recognition of students' academic efforts and accomplishments, but does not imply that all degree requirements have been met. Students may be allowed to participate in commencement ceremonies ("walk") if the college/school has sufficient evidence that the student is highly likely to complete all degree requirements in the academic term following the commencement ceremony. The dean may allow graduate students to be hooded if they have successfully defended the thesis or dissertation work, even if all follow-up work has not yet been completed, as long as the dean believes that the work will be completed in the academic term following the commencement ceremony. Students should be hooded by an individual who holds the same or higher degree as that being awarded. Other individuals may hood or assist with hooding only if approved by the dean of the student's college or school.

Diploma Retention Policy

Diplomas retained by or returned to the Office of the University Registrar will be held for two years. This includes diplomas that are retained in the office for financial holds, have been returned to sender, or shipped to the office for pick up. After two years of the conferral date, any request for a diploma by the student will incur fees and fall under all policies associated with ordering a replacement diploma.

In this section:

- General Requirements for All Graduate Committees (p. 30)
- Master's Thesis Committees (p. 30)
- Doctoral Dissertation Committees (p. 30)

General Requirements for All Graduate Committees

The majority of the members of any graduate thesis or dissertation committee must be regular members of the graduate faculty, including the chair of the committee. Co-chairs of committees are allowed, but at least one of the co-chairs must be a regular member of the graduate faculty. No more than one committee member may be a nonmember of the graduate faculty. No family member may serve on the graduate committee of his or her relative. Committee members who are not graduate faculty members normally are expected to hold the same or higher degree (or equivalent professional experience) as that sought by the student. All graduate thesis and dissertation committees are subject to the approval of the chairperson/director or designee of the department/or program and the dean or designee of the college or school.

Once a graduate thesis or dissertation committee has been officially established, it will not be necessary to alter it if the graduate faculty status of a member of the committee is downgraded. However, at the time of the defense, the chair or at least one co-chair must be a current WVU faculty member. Any changes in the membership of a graduate thesis or dissertation committee require approval of the dean or designee of the college or school. Depending on circumstances and the judgment of the dean or designee, replacement of the chair may require that activities already completed (such as a prospectus approval meeting) be repeated.

Membership of graduate committees other than thesis or dissertation committees are subject to the rules of individual programs. It is recommended that such committees include a majority of graduate faculty members (regular or associate).

Master's Thesis Committees

Master's thesis committees consist of no fewer than three members. It is recommended that at least one member of the committee be from outside the student's department/program.

Doctoral Dissertation Committees

Doctoral dissertation committees consist of no fewer than four members. At least one member of the committee must be from a department/program other than the one in which the student is seeking a degree.
In this section:

- Theses and Dissertations (p. 31)
- Defense (p. 31)
- Submission (p. 31)

Theses and Dissertations

Many master's degrees and all research doctoral degrees require the completion of a research project under the direction of the faculty of the University on some topic in the field of the major subject. The thesis must present the results of the master's degree candidate's investigation. The dissertation must present the results of the doctoral candidate's individual investigation and must embody a definite contribution to knowledge. Regulations concerning the constitution of thesis and dissertation committees are in the section on graduate committees. (http://catalog.wvu.edu/graduate/advisingcoursesdegrees/degree_regulations/#committeestext)

Defense

After the thesis or dissertation committee has tentatively approved the student's written thesis or dissertation, the final defense can be scheduled. This defense is usually held in the term in which all other requirements for the degree are to be met. At the option of the faculty responsible for doctoral degree programs, a comprehensive final written examination also may be required of doctoral students.

The student's committee chairperson must obtain approval of the time, place, and committee members for the defense from the college or school dean or designee at least three weeks before the defense date. All dissertation defenses are open to the public and the university community and must be posted on the University calendar by the college or school dean or designee.

The student cannot be considered as having satisfactorily passed their defense if there is more than one unfavorable vote among members of the committee. Results of each defense must be reported to the college or school dean or designee within twenty-four hours. If the defense is not passed, a repeat of the defense may not be scheduled without approval by the college or school dean or designee.

The student and all committee members are expected to be physically present for a defense. In extraordinary circumstances, and only with the approval of the college or school dean or designee, an individual may attend by audio or videoconference (with videoconferencing preferred). Anyone attending the defense electronically must remain available during the entire time of the defense.

In extraordinary circumstances, the dean or designee may permit another person to attend the defense as a substitute for one of the committee members, provided that the original committee member was not the chair. There can be no substitute at the defense for the chair. Only one substitute at the defense is allowed, and the request for a substitute must be made in writing to the dean or designee before the defense. The request for a substitute at the defense should be signed by the committee chair, the student, and both the original member (if available) and the substitute member. A substitute committee member must have the same or higher graduate faculty status as the original committee member and represent the same academic discipline or specialization. If a substitute committee member attends the defense, the substitute signs the shuttle sheet; however, the original committee member should provide written comments to the student on the thesis or dissertation and sign the Thesis and Dissertation Signature Form required for submission of the document to the University Libraries. This paragraph applies only to a substitution for a committee member at the defense; see the section on General Requirements for All Graduate Committees (http://catalog.wvu.edu/graduate/advisingcoursesdegrees/degree_regulations/#committeestext) for information on changing the formal membership of a committee.

Submission

Once approved by a student's graduate committee, the final version of all WVU theses and dissertations must be submitted electronically through the University Libraries. Information about formatting, submission, and approval of electronic theses and dissertations is available at thesis.wvu.edu.

FERPA

In this section:

- Notice to Students Regarding FERPA (p. 31)
- Designation of Directory Information (p. 32)
- Designation of Limited Use Directory Information (p. 32)
- Withholding Directory Information (p. 32)
- Parent/Guest Access to Online Student Records (p. 32)

Notice to Students Regarding FERPA

Students at West Virginia University (WVU) benefit from the Family Educational Rights and Privacy Act of 1974. This Act, with which WVU intends to comply fully, was designed to protect the privacy of education records, to establish the right of students to inspect and review their education records,
and to provide guidelines for the correction of inaccurate or misleading data through informal and formal hearings. A more detailed explanation of rights afforded to students by FERPA can be found at: http://ferpa.wvu.edu/home.

**Designation of Directory Information**

WVU designates the following categories of student information as public or “Directory Information.” This information may be disclosed at West Virginia University’s discretion for any purpose:

- Name of Student
- Official Address
- Telephone Number
- Place of Birth
- Age of Student
- Names and Addresses of Parents
- Major and Minor Fields of Study
- Class Status (i.e., freshman)
- Enrollment Status (i.e., full time or part time)
- Dates of Attendance
- Previous Educational Institution(s) Attended
- Degree(s) and Date(s) Conferred, including anticipated graduation dates
- Awards
- Honors
- Participation in Officially Recognized Activities and Sports
- Weight and Height of Members of Athletic Teams
- Duties and Responsibilities, including Dates of Service, of Graduate Assistants, Student Workers, Interns, or Student Volunteers

**Designation of Limited Use Directory Information**

WVU designates the following categories of student information as “Limited Use Directory Information:”

- University issued student electronic mail addresses (“Email Addresses”)
- Photographs, videos or other media containing a student’s image or likeness (collectively “Student Images”)

Accordingly, this information will not be provided to external parties not contractually affiliated with the University. Use and disclosure of this information shall be limited to (1) publication on websites hosted by, on behalf of, or for the benefit of the University, including the online directory available at: http://directory.wvu.edu; (2) those officials within the University who have access, consistent with the Family Educational Rights and Privacy Act, to such information and only in conjunction with an official institutional purpose.

**Withholding Directory Information**

Currently enrolled students, using the official West Virginia University Confidentiality form, may withhold disclosure of Directory Information under the Family Educational Rights and Privacy Act of 1974. To withhold disclosure, completed forms must be received in the Mountaineer Hub or mailed to the Office of the University Registrar at West Virginia University, PO Box 6878, Morgantown, WV 26506. Official forms are available at http://registrar.wvu.edu/forms. Requests will be processed as soon as is practicable upon receipt.

The failure on the part of any student to specifically request, on the official form, the withholding of Directory Information indicates individual approval for disclosure. Additionally, a request to withhold Directory Information shall have no effect on previous disclosures, if any, made by WVU before the receipt of a request to withhold Directory Information; nor will a student’s request to withhold Directory Information revoke an otherwise valid written FERPA release already on file with the University.

**Parent/Guest Access to Online Student Records**

The Parent/Guest Portal is the exclusive method by which a University student may grant a third-party access to his or her records. Information that is protected from disclosure pursuant to the Family Educational Rights and Privacy Act (FERPA), such as grades, financial aid details, and student account/billing information is maintained in a secure online environment. A student may grant permission to a parent or guest to access this information and make payments through this portal. Due to the protection of students’ rights under FERPA, a student may restrict the information that a parent or guest is able to access and revoke access at any time. For more information on the Parent/Guest Portal, please visit: http://parent-guest.portal.wvu.edu/.

For FERPA updates and more information on West Virginia University’s FERPA policy, please visit: http://ferpa.wvu.edu or contact the Office of the University Registrar.
Financial Aid

In this section:

- Application Process (p. 33)
- Aid Offer Notification (p. 33)
- Employment Opportunities (p. 33)

To receive an offer of aid, a student must be admitted to WVU as a degree seeking student. Students who believe they need financial assistance should apply as early as possible.

Application Process

To apply for financial aid, a student must first apply for a US Department of Education Federal Student Aid ID at https://fafsa.ed.gov. If the student is considered a dependent for financial aid purposes, a parent must also apply for a Federal Student Aid ID at https://fafsa.ed.gov. The FSA ID is used to sign the online Free Application for Federal Student Aid (FAFSA), review processed information, correct FAFSA data, and conduct other important business directly with the US Department of Education. Students are advised to save their FSA ID because they will need it for future transactions.

Students can complete the FAFSA at https://fafsa.ed.gov and include WVU’s school code – 003827 – on their application. The FAFSA should be submitted prior to March 1 for full consideration. The FAFSA must be completed annually for continued consideration for aid.

Aid Offer Notification

WVU will receive students’ FAFSA information electronically if the WVU school code was included on the FAFSA. After a FAFSA is reviewed for accuracy, a financial aid award notification will be sent to the student’s MIX email.

Employment Opportunities

Student employment opportunities are available on-and-off campus. For assistance go to http://studentemployment.wvu.edu or call the Mountaineer Hub at 304-293-1988.

In this section:

- Satisfactory Academic Progress (p. 33)
- Consequences of Withdrawal (p. 33)

Satisfactory Academic Progress

Students who wish to receive funds administered by Student Financial Support and Services (http://financialaid.wvu.edu) must make measurable academic progress toward completion of an eligible degree. Regulations require students meet minimum standards for grade point average and successfully complete a minimum percentage of attempted credit hours. The complete Satisfactory Academic Progress Policy (http://financialaid.wvu.edu/home/maintain/academic-progress) is available online.

Consequences of Withdrawal

If a student receives federal, state, or institutional financial aid and withdraws from all classes during the semester, the student may be required to return a portion of their financial aid. Refer to the Financial Aid Repayment Policy (http://financialaid.wvu.edu/home/maintain/withdrawing) or the terms and conditions accompanying other financial awards from WVU. Withdrawing from one or more classes may also impact future financial aid eligibility per the Satisfactory Academic Progress Policy (http://financialaid.wvu.edu/home/maintain/academic-progress).

Additional Information

For more information on applying and maintaining financial aid eligibility while enrolled at WVU, visit financialaid.wvu.edu.

Financial Assistance for Graduate and Professional Students

Regular or provisional graduate and professional students admitted to a financial aid eligible program may be eligible for financial assistance through fellowships and scholarships (http://graduateeducation.wvu.edu/funding-and-cost/fellowships-and-scholarships), graduate assistantships (http://graduateeducation.wvu.edu/funding-and-cost/graduate-assistantships), tuition waivers (http://graduateeducation.wvu.edu/funding-and-cost/tuition-waivers), loans (http://graduateeducation.wvu.edu/funding-and-cost/financial-aid-loans), and other forms of aid (http://graduateeducation.wvu.edu/funding-and-cost). In addition, the Office of Student Employment (http://studentemployment.wvu.edu) can assist students in securing on-campus and off-campus jobs.
Fellowships and scholarships (http://graduateeducation.wvu.edu/funding-and-cost/fellowships-and-scholarships) provide students with funds that do not require employment. Fellowships usually include a stipend, University tuition waiver, College tuition scholarship, and student health insurance, and may also provide funds for research and travel. Scholarships provide funds to help defray students’ educational expenses.

Graduate assistantships (http://graduateeducation.wvu.edu/funding-and-cost/graduate-assistantships) may be available through a student’s own department/program or other units on campus. Regular graduate assistantships require 20 hours per week of work and partial graduate assistantships require 10 hours per week of work (typically teaching, research, or service) and provide the student with a stipend, a full or partial waiver of University tuition (but typically not College tuition or University fees; see Tuition, Fees, and Residency (http://catalog.wvu.edu/graduate/graduateeducationexpenses) and student health insurance (http://studentinsurance.wvu.edu)).

Waivers of University tuition (http://graduateeducation.wvu.edu/funding-and-cost/tuition-waivers) may be provided to some students based on merit, employment with the University, or prior participation in certain programs such as McNair Scholars (http://graduateeducation.wvu.edu/funding-and-cost/fellowships-and-scholarships/mcnair-scholars) or the Health Science and Technology Academy (HSTA (http://www.wv-hsta.org/resources-events/graduate-resources)).

The Mountaineer Hub (http://mountaineerhub.wvu.edu) provides information and instruction to students interested in obtaining federal and private loans or Federal Work Study (http://studentemployment.wvu.edu/home/fws) positions to help cover educational expenses. To apply for federal support, students must complete the online Free Application for Federal Student Aid (FAFSA (https://fafsa.ed.gov)). WVU receives students’ FAFSA information electronically if the WVU school code (003827) is included on the FAFSA. After a FAFSA is reviewed for accuracy, an award notification is sent to the student.

**Graduate Certificates**

**Academic Certificate Policies**

Academic certificates at the undergraduate level may only be awarded simultaneously with a baccalaureate degree. Academic certificates at the graduate and professional levels may be awarded either simultaneously with a graduate or professional degree or independently of any degree program. Completion of an academic certificate will be noted on students’ transcripts.

Certificate programs may require admission to the certificate program prior to enrollment in specified certificate courses. Students must be admitted to the certificate program in order to be awarded the certificate.

Students who complete a WVU graduate certificate prior to enrolling in a degree program may apply up to 12 credit hours to the degree program. No more than 6 credits earned from a different institution or applied to both a certificate and a degree can be used to meet certificate requirements. Applicability of credits earned from a different institution to certificate requirements is the decision of the program offering the certificate.

**Programs, Courses & Credits**

**In this section:**

- Official Program Designation (p. 34)
- Graduate Certificate Programs (p. 35)
- Multiple Graduate Degrees (p. 35)
- Approved Dual Master's Degree Programs (p. 35)
- Accelerated Bachelor's/Master's Programs (p. 35)

**Official Program Designations**

**Degree program:** A degree program is an area of study approved as such by the institution and the Board of Governors (BOG) and listed on the official inventory of degree programs (https://www.wvhepc.org/resources/degree%20inventory%20update/progoffpubpriv.html#IDX1). The degree, which is an award signifying a rank or level of educational attainment and which is conferred on students who have successfully completed a degree program, is represented by the official degree designation (e.g., B.A.—bachelor of arts, B.S.—bachelor of science, etc.)

**Major:** A major is a field of study within an approved degree program, having its own curriculum. A degree program may have more than one major.

**Area of Emphasis:** An area of emphasis is a specific subject area within an approved degree program and major. Normally, a minimum of 12 credit hours and no more than 18 credit hours are expected for an area of emphasis within a baccalaureate degree program. Normally, a minimum of 6 and no more than 12 credit hours would be expected for an area of emphasis within a graduate degree program.

**Minor:** A minor is an area of study outside of the major that encourages students to pursue a secondary field. Students may not earn a minor in the same field as their major. Requirements for a minor are set by the academic unit offering the minor and must include at least 15 hours of coursework, with a minimum of 9 hours at the upper division level (course numbers 300 or above). Minors are only available to students earning a baccalaureate degree.
Certificate program: A certificate program is a coherent, specialized curriculum designed for students in search of a specific body of knowledge for personal/career development or professional continuing education. Normally, a minimum of 12 and no more than 21 credit hours constitute a certificate program at the baccalaureate or graduate level.

Graduate Certificate Programs
For a complete list of certificates and information on WVU's graduate certificates, please see our Graduate Certificates Page (p. 34).

Multiple Graduate Degrees
University policy permits students to obtain more than one WVU graduate degree either simultaneously or sequentially. Students must have permission from all programs to pursue degrees simultaneously. See the section on Course Credit Limitations for limits on the use of credits for more than one program.

Approved Dual Degree Programs
West Virginia University offers several approved dual degree programs. Approved dual degree programs are programs in which certain courses or credits are accepted for credit by each program. Students in such programs must also successfully complete any specific program requirements. Students in approved dual degree programs must graduate from both programs simultaneously (or the limits in the section on Degree Programs Credit Limitations (http://catalog.wvu.edu/graduate/advisingcoursesdegrees/#Limitations) apply). Students should contact the individual units regarding admission and academic requirements and regulations for these approved dual degree programs.

Approved Dual Degree Programs:

- Doctor of Dental Surgery/Master of Public Health
- Doctor of Dental Surgery/Master of Business Administration
- Doctor of Jurisprudence/Master of Business Administration
- Doctor of Jurisprudence/Master of Public Administration
- Doctor of Medicine/Master of Public Health
- Doctor of Medicine/Master of Business Administration
- Doctor of Medicine/Doctor of Philosophy
- Doctor of Pharmacy/Master of Business Administration
- Master of Public Administration/Master of Social Work
- Master of Business Administration/Master of Science in Finance
- Master of Business Administration/Master of Science in Industrial Relations
- Master of Business Administration/Master of Science in Nursing
- Master of Business Administration/Master of Science in Sports Management
- Master of Public Health/Doctor of Philosophy in Psychology
- Master of Public Health/Master of Business Administration

Accelerated Bachelor's/Master's Programs
Accelerated Bachelor's/Master's degree programs (ABM programs) offer WVU students the opportunity to pursue both a bachelor's and a master's degree in the same discipline or in related disciplines in an accelerated time frame. Students in these approved programs are able to begin taking courses for the master's degree prior to completion of the bachelor's degree.

Students in ABM programs complete all requirements for both degrees. Students are conferred both degrees simultaneously following completion of the requirements for both degrees. Students accepted to an ABM program will be dually enrolled in the bachelor's and master's degree programs after completion of at least 60 undergraduate credits and admission to the master's degree program. Students must complete a separate application for admission to the master's degree program.

Students enrolled in a master's degree program as part of an ABM program may enroll in graduate-level courses approved for their program without completing a Senior Petition.

Unless given specific permission by the relevant dean, students admitted to an ABM program must maintain full-time continuous enrollment during fall and spring terms. Enrollment requirements in summer term are determined by individual programs.

Students who are admitted to an ABM program may not pursue a dual degree, double major, or certificate. They may pursue minors and areas of emphasis, as approved by their advisor. However, students admitted to an ABM program will not be approved for course overloads (more than 17 credits in any term that includes more than one graduate-level course, more than 20 credits in any term that does not include graduate-level courses).
APPROVED ABM PROGRAMS:

- Bachelor of Science/Master of Science in Applied and Environmental Microbiology
- Bachelor of Science/Master of Science in Physical Education Teacher Education

In this section:

- Degree Program Credit Limitations
- Credit Hour Definition

Degree Program Credit Limitations

Credit toward a graduate degree may be obtained only for courses listed in the graduate catalog and numbered 400–799 (although some professional programs allow credit for lower-level courses). No more than forty percent of course credits counted toward any graduate degree may be at the 400-level. Graduate credit is obtained only for courses in which the grade earned is A, B, C, P or S. Courses taken as audits or courses in which the grade earned is D, F, or U do not count toward a graduate degree.

Up to a total of 12 credits earned at WVU or at another institution prior to admission to a graduate degree program at WVU may be applied to that program. Students pursuing two degrees simultaneously at WVU may apply up to 12 total credit hours to both degrees. Furthermore, students who pursue a certificate concurrently with a master’s or doctoral degree at WVU may apply up to 6 credit hours of certificate coursework to the degree program (See Academic Certificates Policies (http://catalog.wvu.edu/graduate/graduatecertificates)). Doctoral programs that require or allow students to earn a master’s degree in the same discipline may count the courses earned in the master’s degree program toward the doctoral program. Some approved dual degree programs are allowed to share more than 12 credits. Applicability of credits is at the discretion of the program offering the degree.

Credit Hour Definition

West Virginia University courses offered for credit are based on semester hours. Semesters are fifteen weeks long plus one week for final exams. A single credit hour is equivalent to fifty minutes of guided instruction within the classroom. An hour of preparation, or related activity outside of the classroom, is equivalent to sixty minutes.

FACE-TO-FACE CLASSROOM LEARNING

One credit hour is equivalent to one hour of guided instruction (fifty minute class) and a minimum of two hours of out-of-class student work each week for approximately fifteen weeks for one semester or the equivalent amount of work over a different amount of time such as during the summer academic term, when courses may vary in duration. One credit hour in other academic activities, as established by the institution, such as laboratory work, internships, practicums, studio work, study abroad, experiential learning opportunities, and online learning, must include an equivalent amount of required work.

ONLINE LEARNING

One credit hour of online learning is equivalent to fifteen hours of direct instruction and thirty hours of additional student work. Direct instruction can occur via computer-assisted (modules), multi-media interaction, discussions, and/or completion of exams/quizzes/assessments as documented in the course syllabus and approved to meet best practices in online learning. Student work includes activities like readings and supplemental home work. Students must fulfill these hours to complete the course requirements as set forth by the course instructor. Online courses developed from existing face-to-face instruction adhere to the defined learning outcomes and assessments of the original face-to-face format for the course. All WVU online programs are reviewed for nationally accepted standards for online learning.

EXPERIENTIAL LEARNING

In experiential learning, including opportunities representing laboratory/lecture courses, undergraduate research (with or without laboratory), professional development internships, and service learning, a total of three hours of classroom and preparation time per week over a period of fifteen weeks for one credit hour or the equivalent amount of work over a shorter period of time is required. Courses must incorporate adequate opportunities to document student progress and student completion of the stated learning objectives for each experience.

STUDY ABROAD

One credit hour is equivalent to fifteen hours of guided instruction and thirty hours of cultural, linguistic or other types of engagements as described by the syllabus and approved by the faculty, department Chair, Dean, and Associate Provost. Exceptions to this general rule would need to be justified and approved on an individual basis.

STUDIO/ENSEMBLE WORK

In studio courses in the arts, design, and theatre, one credit hour is equivalent to one and a half hours of guided instruction and three hours for studio class practice or projects each week for fifteen weeks as defined by the National Association of Schools of Art and Design (NASAD). In accordance with the National Association of Schools of Music standards, one credit hour of ensemble work in the music field represents three hours of practice each week, on average, for a period of fifteen weeks plus the necessary individual instruction as defined by the major subject.
VARIABLE CREDIT OFFERINGS

Variable credit courses often represent student experiences that range in credit hours based on the focus and discipline of the experience. Practicums (teaching and research), field experience, undergraduate and graduate research and laboratory rotations and credit, and independent studies offer a range of contact. One credit hour is equivalent to fifteen contact hours of guided instruction (e.g., student progress meetings, mentoring) and thirty hours of student work to complete the requirements set forth by the advisor or course instructor (e.g., team meetings, review sessions, thesis/dissertation preparation) over a fifteen week period. Instructors/mentors and students should discuss the appropriate number of total credit hours for a given course based on the time needed to attain outcomes of the particular endeavor.

Tuition, Fees & Residency

In this section:

• Cost of an Academic Year's Work (p. 37)
• Tuition and Fees (p. 37)
• Identification Card (p. 37)

Cost of an Academic Year's Work

Student Financial Support & Services (http://financialaid.wvu.edu) provides an estimate of the total cost of attendance (http://tuition.wvu.edu) for an academic year. This estimate includes university tuition and fees and estimated campus room and board, but does not include books and supplies, transportation, and personal expenses.

Tuition and Fees

Tuition and fee structures (http://revenueservices.wvu.edu/tuition-and-fees) vary by residency classification and academic program at WVU. Students are charged for university tuition, college tuition, and university fees. In some cases, students are charged an additional fee for WVU Online courses or programs. Senior citizens of West Virginia (age 65 and older) may take courses at WVU for reduced tuition and fees (https://admissions.wvu.edu/how-to-apply/senior-citizen-students).

Identification Card

Registered students are eligible for an identification card (Mountaineer Card (http://wvucard.wvu.edu)). The Mountaineer Card gives access to certain activities and privileges on campus. Students have free access to the Student Recreation Center, the PRT, and athletic events, and may ride the local bus system (Mountain Line (http://www.busride.org)) by using their ID card. On- and off-campus students have access to the WVU Libraries. WVU reserves the right to refuse issuance of an identification card and misuse may result in confiscation of the card. Lost or broken cards can be replaced for a fee.

Residency Classification

Residency policy (http://admissions.wvu.edu/forms-and-procedures/residency-reclassification) is established by the WV Higher Education Policy Commission Series 25. The WVU Office of Admissions assigns students a residency classification for admission, tuition, and fee purposes. Students who are legal residents of West Virginia pay "resident" tuition and fees at WVU; students who are residents of other states and nations pay "non-resident" tuition and fees.

Academic Common Market

West Virginia University participates in the Academic Common Market (ACM) of the Southern Regional Education Board (SREB). Hundreds of undergraduate and graduate programs are available for residents of SREB states. The ACM program is not competitive or merit-based, but applicants must meet state residency and college program requirements.

To qualify, students must be a resident of one of the 16 SREB states, select and plan to enroll in a program eligible for residents of their home state, complete the admission process at the institution offering the eligible ACM program and be certified as a resident of their home state by contacting the coordinator for their state of residence.

Key components of the Academic Common Market include the following:

• The ACM eliminates unnecessary duplication of academic programs among participating states, recognizing that it is impractical for any institution or single state to develop or maintain degree programs in every field of knowledge.
• The ACM provides access across state lines for programs not available in a student's home state. Programs may be added to, or deleted from, the inventory at any time due to program availability, curricular, instructional, or other needs. Currently enrolled students continue to study at resident rates if a program is deleted during their academic careers.
• The ACM lists existing degree programs that have the capacity to serve additional students. The ACM degrees available at West Virginia University for residents of SREB states are available at http://admissions.wvu.edu/cost-and-aid/academic-common-market.
• First-professional degree programs, such as law, medicine, dentistry, pharmacy and optometry, are not offered in the ACM and cannot be requested.
• Some institutions and states may impose additional acceptance requirements, such as full-time enrollment status or GPA requirements.

For more information about the ACM at WVU, visit http://admissions.wvu.edu/cost-and-aid/academic-common-market. (http://undergraduateacademicaffairs.wvu.edu/home/acmatwvu)

For further information regarding specific state requirements, students should contact the Southern Regional Education Board (www.sreb.org (http://catalog.wvu.edu/graduate/graduateeducationexpenses/www.sreb.org)).

**Tuition and Fee Regulations**

All tuition and fees are payable to the Office of Student Accounts prior to the first day of each term. Policies are in place concerning late fees, financial holds, and collections (http://studentaccounts.wvu.edu/policies). Students can review their charges, waivers, scholarships, and payments online through the STAR Information System, which can be accessed through the WVU portal at portal.wvu.edu. Payments can also be made from the same website. Payments of tuition, fees, and other charges by check, draft, or money order are subject to WVU’s Non-Sufficient Funds Check Policy (http://financialservices.wvu.edu/policies/nsf-non-sufficient-fund-check-policy). A processing fee is added to credit card payments.

Arrangements can be made with the Office of Student Accounts for payment from officially accepted scholarships, loan funds, grants, or contracts.

WVU places restrictions on students who have outstanding debts to the University. The restriction may include, but is not limited to, the withholding of a student’s registration, diploma, or transcript. No degree is conferred and no transcripts are issued to any student before payment is made of all tuition, fees, and other indebtedness to any unit of the University. The Office of Student Accounts provides information concerning refunds (http://studentaccounts.wvu.edu/refunds).

Students who fail to drop courses prior to the end of the add/drop period are responsible for tuition and fees whether or not they attend those courses. See the Registrar's Office for withdrawal information.
Agriculture, Natural Resources, and Design- Davis College of

Degrees Offered

• Master of Agriculture with a major in Agriculture, Natural Resources, and Design

SCHOOL OF AGRICULTURE AND FOOD

• Master of Science with a major in Agronomy
• Master of Science with a major in Animal Physiology
• Master of Science with a major in Applied and Environmental Microbiology
• Master of Science with a major in Entomology
• Master of Science with a major in Genetics and Developmental Biology
• Master of Science with a major in Horticulture
• Master of Science with a major in Nutritional and Food Science
• Master of Science with a major in Plant Pathology
• Master of Science with a major in Reproductive Physiology
• Doctor of Philosophy with a major in Animal and Food Science
• Doctor of Philosophy with a major in Genetics and Developmental Biology
• Doctor of Philosophy with a major in Plant and Soil Science
• Doctor of Philosophy with a major in Reproductive Physiology

SCHOOL OF DESIGN AND COMMUNITY DEVELOPMENT

• Master of Landscape Architecture with a major in Landscape Architecture
• Master of Science with a major in Agricultural and Extension Education
• Master of Science with a major in Design and Merchandising
• Doctor of Philosophy with a major in Agricultural and Extension Education

SCHOOL OF NATURAL RESOURCES

• Master of Science in Forestry with a major in Forestry
• Master of Science with a major in Agricultural and Resource Economics
• Master of Science with a major in Recreation, Parks, and Tourism Resources
• Master of Science with a major in Wildlife and Fisheries Resources
• Doctor of Philosophy with a major in Forest Resources Science
• Doctor of Philosophy with a major in Human and Community Development
• Doctor of Philosophy with a major in Natural Resource Economics
• Doctor of Philosophy with a major in Resource Management

The Davis College of Agriculture, Natural Resources, and Design is comprised of three schools: Agriculture and Food, Design and Community Development, and Natural Resources. The college’s faculty and staff are located in four buildings on the Evansdale campus; on farms administered by the Davis College of Agriculture, Natural Resources, and Design in Kearneysville, Morgantown, Reedsdale, Union, and Wardensville; and at the West Virginia University Forest on nearby Chestnut Ridge.

Students study many different subjects concerned with human behavior, plants, animals, trees, and microorganisms. Curricula in the college stress the life sciences, applied and basic research, and economic and social relationships among people as they live and work in a wide variety of settings. Courses offered in the college give students a comprehensive understanding of the natural environment and resources from which we produce our food, fiber, wood, energy, and leisure activities.

The Davis College of Agriculture, Natural Resources, and Design's research is conducted in the West Virginia Agricultural and Forestry Experiment Station. Research proposals are generated, evaluated, approved, and funded through the Experiment Station. The university controls extensive lands, which are administered by the college, with specific areas set aside for research and teaching purposes agronomy, entomology, horticulture, livestock, poultry, organic farming, forestry, wildlife and fisheries, and outdoor and adventure recreation. Graduate students in the Davis College benefit both from a variety of educational and research settings and from extensive opportunities for hands-on learning.
ADMINISTRATION

DEAN
• Daniel J. Robison - Ph.D. (University of Wisconsin-Madison)
  Director, West Virginia Agricultural and Forestry Experiment Station

ASSOCIATE DEAN FOR ACADEMIC AFFAIRS
• J. Todd Petty - Ph.D. (University of Georgia)
  Academic Affairs

ASSOCIATE DEAN FOR RESEARCH AND OUTREACH
• Tim T. Phipps - Ph.D. (University of California)
  Associate Director, West Virginia Agricultural and Forestry Experiment Station

Degree Designation Learning Goals

MASTER OF AGRICULTURE (MAGR)
The Master of Agriculture, Natural Resources and Design is an interdisciplinary degree that offers advanced study in all areas of agriculture, natural resources, and design. This program provides an opportunity for students to expand on the knowledge and skills they acquired during their undergraduate studies and enables students to tailor their education to fit individual career goals. The Master of Agriculture, Natural Resources and Design may benefit individuals who are seeking a higher paying position, wish to improve chances for admission to a professional school, want to make a career change, start an entrepreneurship, or improve their skills to enhance their current careers.

Students earning an MAGR degree will be able to:
• Communicate professional concepts orally and in writing.
• Explain the holistic nature of opportunities and problems pertaining to agriculture, natural resources, or design.
• Explain the role of inquiry and research in addressing opportunities and problems pertaining to agriculture, natural resources, or design.
• Construct a theoretical framework that addresses a particular opportunity or problem in agriculture, natural resources, or design and generalize that framework to aid in understanding similar opportunities or problems.
• Apply research skills to analyze agriculture, natural resources, or design opportunities or problems.

MASTER OF LANDSCAPE ARCHITECTURE (MLA)
The MLA program provides students with the knowledge necessary to develop the skills and abilities in design, planning, and management that are pivotal to effectiveness and success in the workforce, and that are responsive to the unique qualities of the state and the region. The program prepares students to become effective professionals and citizens by emphasizing a philosophy of responsibility and commitment to ethical standards regarding the natural environment, professional practice, and personal relationships.

Students earning an MLA degree will be able to:
• Demonstrate a solid professional educational foundation that encompasses knowledge and skills of design, construction, problem-solving, plant materials, landscape management, and professional practice and that is responsive to the needs of the environment, society, and the landscape architecture profession.
• Understand ethical standards regarding the environment, the profession, personal relationships, and social responsibility.
• Proficiently communicate professional concepts graphically, orally, and in writing.
• Incorporate professional information through the study of real-life problems in Morgantown, the state of West Virginia, and the region.

MASTER OF SCIENCE (MS)
The Davis College of Agriculture, Natural Resources, and Design offers numerous MS programs.

Students earning an MS degree will be able to:
• Communicate professional concepts orally and in writing.
• Explain the holistic nature of opportunities and problems pertaining to agriculture, natural resources, or design.
• Explain the role of inquiry and research in addressing opportunities and problems pertaining to agriculture, natural resources, or design.
• Construct a theoretical framework that addresses a particular opportunity or problem in agriculture, natural resources, or design and generalize that framework to aid in understanding similar opportunities or problems.
• Apply research skills to analyze agriculture, natural resources, or design opportunities or problems.
• Produce and defend original research in their major area of study.
MASTER OF SCIENCE IN FORESTRY (MSF)

This program prepares students for careers in professional forestry ranging from consulting for private woodland owners to managing vast tracts of public forestlands. Students are trained in life sciences—biology, ecology, tree identification, sustainable forestry—and specialized sciences such as forest biometrics, forest economics, geographic information systems (GIS), and remote sensing of forest resources.

Students earning an MSF degree will be able to:

- Understand taxonomy and identify forest and other tree species, their distribution, and associated vegetation and wildlife.
- Understand soil properties and processes, hydrology, water quality, and watershed functions.
- Understand ecological concepts and principles including the structure and function of ecosystems, plant and animal communities, competition, diversity, population dynamics, succession, disturbance, and nutrient cycling.
- Demonstrate the ability to make ecosystem, forest, and stand assessments.
- Understand tree physiology and the effects of climate, fire, pollutants, moisture, nutrients, genetics, insects and diseases on tree and forest health and productivity.
- Identify and measure land areas and conduct spatial analysis.
- Design and implement comprehensive inventories that meet specific objectives using appropriate sampling methods and units of measurement.
- Analyze inventory data and project future forest, stand, and tree conditions.
- Develop and apply silvicultural prescriptions appropriate to management objectives, including methods of establishing and influencing the composition, growth, and quality of forests, and understand the impacts of those prescriptions.
- Analyze the economic, environmental, and social consequences of forest resource management strategies and decisions.
- Develop management plans with specific multiple objectives and constraints.
- Understand valuation procedures, market forces, processing systems, transportation and harvesting activities that translate human demands for timber-based and other consumable forest products into the availability of those products.
- Understand valuation procedures, market, and non-market forces that avail humans the opportunities to enjoy non-consumptive products and services of forests.
- Understand administration, ownership, and organization of forest management enterprises.
- Understand forest policy and the processes by which it is developed.
- Understand how federal, state, and local laws and regulations govern the practice of forestry.
- Understand professional ethics, including the Society of American Foresters Code, and recognition of the responsibility to adhere to ethical standards in forestry decision making on behalf of clients and the public.
- Understand the integration of technical, financial, human resources, and legal aspects of public and private enterprises.
- Communicate professional concepts orally and in writing.
- Explain the holistic nature of forestry opportunities and problems.
- Explain the role of inquiry and research in addressing opportunities and problems pertaining to forestry.
- Construct a theoretical framework that addresses a particular opportunity or problem in forestry and generalize that framework to aid in understanding similar opportunities or problems.
- Apply research skills to analyze forestry opportunities or problems.
- Produce and defend original research in their major area of study within forestry.

DOCTOR OF PHILOSOPHY (PHD)

The Davis College of Agriculture, Natural Resources, and Design offers numerous doctoral programs.

Students earning a doctoral degree will be able to:

- Conduct independent and original research of publishable quality in agriculture or natural resources
- Effectively communicate, orally and in writing, the state of knowledge in the student’s discipline, field, sub-field, and specific research area.
- Teach, at any undergraduate level or beyond, core courses in the student’s discipline and field and specialized courses in the student’s sub-field and research area.
- Write research manuscripts and technical reports that lead to refereed publications.

General Admission Requirements and Information

REGULAR

A regular graduate student is a degree-seeking student who meets all of the criteria for regular admission to a program of his/her choice. The student must possess a baccalaureate degree from a college or university, have at least a grade point average of 2.75 on a 4.0 scale (or an average of 3.0 or higher for the last sixty credit hours), meet all criteria established by the degree program, and be under no requirements to make up deficiencies.
The student must:

- Have an adequate academic aptitude at the graduate level as measured by the Graduate Record Examination (GRE) or the New Medical College Admissions Test (New MCAT).
- Provide three letters of reference from persons acquainted with the applicant’s professional work, experience, or academic background.
- Submit a written statement of 500 words or more indicating the applicant’s goals and objectives relative to receiving a graduate degree.
- International students have the additional requirement to submit a minimum score of 550 on the paper TOEFL examination or 213 on the electronic TOEFL examination if their native language is not English.
- The specific graduate programs may have additional requirements for admission.

PROVISIONAL

A student may be admitted as a provisional graduate student when the student possesses a baccalaureate degree but does not meet the criteria for regular admission. The student may have incomplete credentials, deficiencies to make up, or may have an undergraduate scholastic record that does not meet grade point requirements for regular admission. After successful fulfillment of the deficiencies, the student will be granted regular graduate student status.

NON-DEGREE

A non-degree student is a student not admitted to a program. Admission as a non-degree student does not guarantee admission to any course or program.

A student must present evidence of a baccalaureate degree. A maximum of twelve credit hours of work as a non-degree student may be applied to a graduate degree if the student is later accepted into a graduate program.

School of Agriculture and Food

Robert L. Taylor, Jr., Director of the Division of Animal and Nutritional Sciences  
e-mail: Bob.Taylor@mail.wvu.edu

Matthew A. Jenks, Director of the Division of Plant and Soil Sciences  
e-mail: majenks@mail.wvu.edu

Degrees Offered

- Master of Science with a major in Agronomy
- Master of Science with a major in Animal Physiology
- Master of Science with a major in Applied and Environmental Microbiology
- Master of Science with a major in Entomology
- Master of Science with a major in Genetics and Developmental Biology
- Master of Science with a major in Horticulture
- Master of Science with a major in Nutritional and Food Science
- Master of Science with a major in Plant Pathology
- Master of Science with a major in Reproductive Physiology
- Doctor of Philosophy with a major in Animal and Food Science
- Doctor of Philosophy with a major in Genetics and Developmental Biology
- Doctor of Philosophy with a major in Plant and Soil Science
- Doctor of Philosophy with a major in Reproductive Physiology

The master of science allows maximum flexibility in courses and research problems. Students may major in agronomy, animal and nutritional sciences, animal physiology, applied and environmental microbiology, entomology, genetics and developmental biology, horticulture, nutrition and food science, plant pathology, or reproductive physiology. A master of science degree is available as a thesis or coursework option. Research problems in plants and animals of agricultural importance, laboratory organisms, and human subjects form the basis for many studies, but a comparative approach is emphasized. The school offers the registered dietetic certification (RD) preparation internship program to qualified students as a component of the animal and nutritional sciences master of science program.

A student seeking admission to work toward the degree of doctor of philosophy in the School of Agriculture and Food may choose from one of the following majors: animal and food science, genetics and developmental biology, plant and soil science, or reproductive physiology. Within these major fields of study, specialization is limited only by the range of competencies in the graduate faculty.

A limited number of graduate research assistantships are available to highly qualified students on a competitive basis.
FACULTY

DIRECTOR

• Matthew A. Jenks - Ph.D. (Purdue University)
  Plant genetics; specialty crops
• Robert L. Taylor, Jr. - Ph.D. (Mississippi State University)
  Immunology and genetics of disease resistance

PROFESSORS

• Alan R. Biggs - Ph.D. (Pennsylvania State University)
  Plant Pathology, Tree Fruits
• Kenneth P. Blemings - Ph.D. (University of Wisconsin)
  Nutritional Biochemistry
• Mirjana Butalovic-Danilovich - Ph.D. (University of Ljubljana, Slovenia)
  Extension Specialist, Consumer Horticulture, Master Gardener Program Coordinator
• Rakesh Chandran - Ph.D. (Virginia Tech)
  Weed management in horticultural systems, IPM, Innovative strategies for weed control
• Robert A. Dailey - Ph.D. (University of Wisconsin)
  Reproductive Physiology
• Jason Hubbart - Ph.D. (University of Idaho-Moscow)
  Fresh water supply regimes, Biogeochemical cycling, and ecohydrology
• Jacek Jaczynski - Ph.D. (Oregon State University)
  Food science and technology
• P. Brett Kenney - Ph.D. (Kansas State University)
  Meat Science
• Hillar Klandorf - Ph.D. (British Council for National Academic Awards)
  Physiology
• William L. MacDonald - Ph.D. (Iowa State University)
  Plant Pathology, Forest and Shade Tree Diseases
• Kristen E. Matak - Ph.D. (Virginia Tech)
  Food science and human nutrition
• Louis M. McDonald - Ph.D. (University of Kentucky)
  Soil Science, Soil Chemistry
• Joseph S. Moritz - Ph.D. (Kansas State University)
  Nutrition and feed manufacture
• Joseph B. Morton - Ph.D. (Montana State University)
  Plant Pathology, Mycorrhizal Interactions, Field Crop Diseases
• Daniel Panaccione - Ph.D. (Purdue State University)
  Plant Pathology, Mycology, Mycotoxins, Molecular Biology
• Jeffrey Skousen - Ph.D. (Texas A&M University)
  Soil Science, Land Reclamation, Soil and Water Conservation, Watershed Restoration
• James A. Thompson - Ph.D. (University of Minnesota)
  Soil science, Pedology, and Land use
• Janet C. L. Tou - Ph.D. (University of Toronto, Canada)
  Nutrition in bone health and chronic diseases
• Matthew E. Wilson - Ph.D. (Iowa State University)
  Reproductive Physiology
• Jianbo Yao - Ph.D. (McGill University)
  Functional genomics

ASSOCIATE PROFESSOR

• Kimberly M. Barnes - Ph.D. (University of Nebraska)
  Lipid metabolism
• Vagner Benedito - Ph.D. (Wageningen University, The Netherlands)
  Genetics and developmental biology, Plant genomics, Functional genetics and plant physiology
• Scott A. Bowdridge - Ph.D. (Virginia Tech)
Food animal production, parasite immunology
• Eugene E. Felton - Ph.D. (University of Missouri)
  Animal science and ruminant nutrition
• Thomas C. Griggs - Ph.D. (Texas Tech University)
  Agronomy, Field and forage crops
• Marlon Knights - Ph.D. (West Virginia University)
  Reproductive Physiology and Animal Production
• James B. Kotcon - Ph.D. (University of Wisconsin)
  Plant Pathology, Agroecology, Nematology, Organic Farming Practices
• K. Marie Krause - Ph.D. (University of Wisconsin-Madison)
  Ruminant nutrition
• Melissa D. Olfert - Dr.P.H., M.S., R.D. (Loma Linda University)
  Human Nutrition and Foods
• Yong-Lak Park - Ph.D. (Iowa State University)
  Entomology, Geospatial Ecology of Insects, Integrated Pest Management, Spatial Interaction between Insect and Plant Diseases
• Eugenia M. Pena-Yewtukhiw - Ph.D. (University of Kentucky)
  Soil Science
• Sven Verlinden - Ph.D. (Purdue University)
  Horticulture, Post Harvest Physiology, Molecular Biology

ASSISTANT PROFESSOR
• Daniel L. Frank - Ph.D. (Virginia Tech)
  Extension specialist, horticulture
• Michael Gutensohn - Ph.D. (University of Cologne, Germany)
  Plant biochemistry and genetics, Metabolic engineering, Plant-insect interactions
• Matthew Kasson - Ph.D. (Pennsylvania State University)
  Forest pathology, fungal-insect interactions, Fungal phylogenetics
• Teiya Kijimoto - Ph.D. (Tokyo Institute of Technology)
  Evolutionary developmental biology of morphological diversification, Evolution of novel traits
• Nik Kovinich - Ph.D. (Carleton University)
  Metabolic engineering, Metabolite transport, Plant metabolic response to stress
• Kang Mo Ku - Ph.D. (University of Illinois Urbana-Champaign)
  Food crops physiology and quality, Plant metabolomics
• Melissa D. Ventura-Marra - Ph.D., R.D. (Florida International University)
  Diet related health disparities
• Daniel J. Mathew - Ph.D. (University of Missouri)
  Reproductive Physiology
• Ember Morrissey - Ph.D. (Virginia Commonwealth University)
  Environmental microbiology
• Cangliang Shen - Ph.D. (Colorado State University)
  Safety of meat and fresh produce
• Nicole Waterland - Ph.D. (Ohio State University)
  Horticulture, Flower Senescence
• Amy Welsh - Ph.D. (University of California-Davis)
  Conservation genetics of fish and wildlife populations, Wildlife forensics

RESEARCH ASSISTANT PROFESSOR
• David Belesky - Ph.D. (West Virginia University)
  Agronomy, Animal nutrition
• Domingo Jose Mata Padrino - Ph.D. (Universidad Central de Venezuela)
  Agronomy

TEACHING ASSOCIATE PROFESSOR
• Megan Govindan - MPH, MS, RD, LD (West Virginia University)
  Director of Didactic Program in Dietetics and Human nutrition and foods
• Margaret A. Minch - D.V.M. (Ohio State University)
  Veterinary Medicine
• Crystal Smith - Ed.D. (West Virginia University)  
  Equine management

TEACHING ASSISTANT PROFESSOR
• Adam M. Burda - MS, RDN, LDN (Indiana University of Pennsylvania)  
  Director of the Graduate Dietetic Internship Program
• David Davis - Ph.D. (Virginia Tech)  
  Landscape, turf, specialty crops

VISITING ASSISTANT PROFESSOR
• John Hando - Ph.D. (West Virginia University)  
  Environmental health and safety specialist, Genetics and developmental biology

FACULTY EMERITI
• James W. Amrine, Jr.
• Robert E. Anderson
• John A. Balasko
• John F. Baniecki
• Bradford C. Bearce
• Gary K. Bissonnette
• James L. Brooks
• William B. Bryan
• Linda Butler
• William E. Collins
• Leslie Dozsa
• Betty J. Forbes
• Mannon E. Gallegly, Jr.
• Henry W. Hogmire
• William H. Hoover

ADJUNCT FACULTY
• Robert L. Cochrane - Reproductive physiology
• Jesse Fallon - Veterinary medicine
• Michael Glenn - Soil Science
• Ann Hubbs - Veterinary medicine
• Cynthia Huebner - Invasive Plants and Ecology
• Eric K. Johnson - Mechanical and aerospace engineering
• Lee Kass - Plant and Soil Sciences, History of Genetics
- Barbara Jean Meade - Veterinary sciences
- Stephen S. Miller - Horticulture
- Donald Nuss - Plant Pathology
- Tong-Man Ong - Genetics
- Dale W. Porter - Toxicology
- Caird E. Rexroad III - Genetics
- George R. Seiler - Veterinary sciences
- Alfred H. Stiller - Chemistry
- Richard Z. Woodworth - Agriculture
- Paul F. Ziembiewicz - Land Reclamation
- Thomas van der Zwet - Plant Pathology

**Agronomy**

**Degree Offered:**
- Master of Science with a major in Agronomy

A candidate for the M.S. degree in Agronomy must meet all University, College, Division, and Program requirements as outlined in the WVU Graduate Catalog.

**Program Requirements**

All M.S. degree candidates are required to follow a planned program of study. The student develops the plan of study during their first year in the program in conjunction with the graduate committee. The plan must be approved by the Director of the Division and the Associate Dean for Academic Affairs of the Davis College.

**Thesis Option:**

A minimum cumulative GPA of 3.0 is required in all courses applied toward degree requirements.

Total Hours  36

* Students must complete a minimum of 30 total hours, of which at least 24 hours must be coursework other than research, thesis, project, internship, etc. credits.

Major Learning Goals

AGRONOMY

Students will acquire fundamental knowledge of agronomy and soil science.

Students will acquire detailed knowledge of their particular subdiscipline or research area, including the scientific literature fundamental to their discipline and the ability to stay current on scientific literature.

Students will acquire technical skills in the field and laboratory.

Students will develop the ability to communicate in writing and orally about scientific concepts and the results of their research.

Students will develop the ability to design, conduct, and interpret the results of experiments.

Animal and Food Science

Robert L. Taylor, Jr., Division Director of Animal and Nutritional Sciences
e-mail: Bob.Taylor@mail.wvu.edu (matt.wilson@mail.wvu.edu)

Matthew Jenks, Division Director of Plant and Soil Sciences
e-mail: majenks@mail.wvu.edu

Degree Offered

- Doctor of Philosophy with a major in Animal and Food Science

The Davis College of Agriculture, Natural Resources, and Design offers graduate studies leading to the degree of doctor of philosophy in agricultural sciences with a major in Animal and Food Science. The objective of the degree program is to provide doctoral students an opportunity to study and conduct research with faculty in areas of excellence within the college. Students entering this program may select research and classes in areas of emphases including: agricultural biochemistry, animal nutrition, animal physiology, and production management.

Admissions

Applications and required fees are submitted to the Office of Graduate Admissions at grad.wvu.edu/admissions. Applications must be submitted by October 15 for fall semester and March 15 for spring semester. Applicants must hold a master’s or its equivalent to be eligible for admission into the program. The following admission and performance standards are normally required in the doctor of philosophy in agriculture sciences program:

- An applicant must possess a master’s degree and hold a grade point average (GPA) of 3.0 or above (on a 4.0 scale) in postgraduate courses.
- The graduate record examination is required for the major in plant and soil sciences but not for the major in animal and food sciences.
- A student whose native language is not English must have obtained a minimum score of 79 on the TOEFL examination.
- An applicant must provide three letters of reference.
- A one or two-page letter of intent from the student describing his/her research and professional aspirations is required.

After a student is admitted into the doctoral program, the student will select a major professor who will provide and direct an appropriate research opportunity. Doctoral students will conduct research in support of projects approved by the West Virginia Agricultural and Forestry Experiment Station (WVAFES) or externally funded grants. The student in consultation with the major professor, will select a graduate committee within the first semester of study. The committee will consist of five or more members; the majority must be WVU faculty and at least one member representing a discipline outside
the college. Each student and his or her committee will formulate a plan of study, which will be filed in the Office of the Associate Dean for Academic Affairs of the College. WVU regulations concerning committee membership will apply.

A candidate for the Ph.D. degree in Animal and Food Science must meet all University, College, Division, and Program requirements as outlined in the WVU Graduate catalog.

**Program Requirements**

All Ph.D. degree candidates are required to follow a planned program of study. The student develops the plan of study during their first year in the program in conjunction with the graduate committee. The plan must be approved by the Director of the Division and the Associate Dean for Academic Affairs of the Davis College.

A minimum cumulative GPA of 3.0 is required in all courses applied toward degree requirements.

</tr>
</tbody>
</table>

Doctoral students must satisfactorily complete a set of core courses before they will be admitted to candidacy for the Ph.D. degree. Certain course requirements may be waived if the student has received equivalent training in prior coursework. Additional coursework pertaining to the student’s area of specialization will be determined by the student’s major professor and graduate committee. Although not required, presentation of research results at meetings of a professional society and submission of manuscripts for publication are encouraged.

**Major Learning Goals**

**ANIMAL AND FOOD SCIENCE**

The student demonstrates fundamental knowledge of plants, soils, natural sciences, microorganisms, macroorganisms, pathogens and associated fields such as biochemistry, chemistry, and biology.

The student demonstrates detailed knowledge of their particular subdiscipline or research area, including the scientific literature fundamental to their discipline and the ability to stay current on scientific literature.

The student demonstrates technical skills in the laboratory.

The student demonstrates the ability to communicate in writing and orally about scientific concepts and the results of their research.

**Animal Physiology**

Robert L. Taylor, Jr., Division Director of Animal and Nutritional Sciences  
e-mail: Bob.Taylor@mail.wvu.edu (bob.taylor@mail.wvu.edu)

**Degrees Offered**

- Master of Science with a major in Animal Physiology

**DEGREE DESCRIPTION**

The master of science in animal physiology in the Davis College of Agriculture, Natural Resources and Design allows maximum flexibility in courses and research problems. They may work with beef and dairy cattle; sheep, swine, poultry, or laboratory animals. Research problems in farm animals and laboratory animals form the basis for many studies, but a comparative approach is emphasized. A master of science degree is available as a thesis or coursework option. For additional information, contact Dr. Robert L. Taylor, Jr., at (304) 293-2831 or Bob.Taylor@mail.wvu.edu.

**Admissions**

Requirements are similar to those in other biological sciences. The student should have completed basic courses in the physical and biological sciences, including genetics, nutrition, and physiology. Deficiencies may prolong the time needed to complete degree programs.

Applications must be submitted by October 15 for fall semester and March 15 for spring semester for the M. S. in Animal Physiology. A composite graduate record examination score of 1,000 or better will be considered as a basis for admission. Meeting the above requirements shall not guarantee the applicant admission since each professor will accept only the number of students that can be supervised adequately with available facilities, time, and funds.
A candidate for the M.S. degree in Animal Physiology must meet all University, College, Division, and Program requirements as outlined in the WVU Graduate Catalog.

Program Requirements

All M.S. degree candidates are required to follow a planned program of study. The student develops the plan of study during their first year in the program in conjunction with the graduate committee. The plan must be approved by the Director of the Division and the Associate Dean for Academic Affairs of the Davis College.

Thesis option: The thesis option will require 30 credit hours, 24 hours of regular course work plus 6 hours credit for a thesis. A student must maintain a grade point average of 3.0 or better to remain in good standing. There will be a common core curriculum for the two majors. All additional course requirements will be determined by the student in consultation with the major advisor and graduate committee members.

Total Hours 30

Non-Thesis option: The non-thesis option will require 36 hours of course work. A student must maintain a grade point average of 3.0 or better to remain in good standing. There will be a common core curriculum for the non-thesis masters. Additional courses to meet the degree requirements will be determined by the student in consultation with the major advisor and the graduate committee members and presented in the student’s Plan of Study. No more than three hours of research/problem report credits can be applied to the Non-Thesis option.

Total Hours 36

Students in the MS- Thesis Option will be required to complete a thesis. They may identify a problem for study on their own, with approval from their graduate committee or they may work on a faculty member’s research study. The scope of the research problem must be approved by the student’s graduate committee. Students are required to defend their thesis in an open seminar presentation. Students in either the thesis or the non-thesis option must pass an oral examination to be approved for graduation.

* Students must complete a minimum of 30 total hours, of which at least 24 hours must be coursework other than research, thesis, project, internship, etc. credits.

Major Learning Goals

ANIMAL PHYSIOLOGY

Students who complete a Master of Science degree in Animal and Nutritional Sciences with a major in Animal Physiology will:

- Critically evaluate the literature in their field of study as new knowledge is accumulated.
- Identify research needs germane to providing answers to societal problems.
- Apply research findings to professional practice in their fields.
- Effectively use oral and written communication to share information and ideas.
- Be qualified to take advanced-level professional positions in their respective fields of study.
- Be qualified for doctoral studies in their fields.

Applied and Environmental Microbiology

Matthew Jenks, Division Director of Plant and Soil Sciences
email: majenks@mail.wvu.edu

Daniel Panaccione, Assistant Director of Graduate Programs
Degree Offered

- Master of Science with a major in Applied and Environmental Microbiology

Admissions

**M.S. APPLIED AND ENVIRONMENTAL MICROBIOLOGY**

In order for a student to be admitted to the program, the applicant normally must fulfill the following admission criteria to be considered:

- Possess a baccalaureate degree.
- Have a minimum undergraduate grade point average of 2.75 (3.0 for acceptance as a regular graduate student).
- Have an adequate academic aptitude at the graduate level as measured by the Graduate Record Examination (GRE) or other tests/evidence.
- Provide three letters of reference from persons acquainted with the applicant's professional work, experience, or academic background.
- Submit a written statement of approximately 500 words indicating the applicant's goals and objectives relative to receiving a graduate degree.

International students have the additional requirement to submit a minimum score of 213 on the computer based TOEFL examination if their native language is not English. Interviews are encouraged but not required.

**ACCELERATED B.S./M.S. APPLIED AND ENVIRONMENTAL MICROBIOLOGY**

The ABM-AEM program will directly admit first year students (early admission) or admit students after the completion of at least 60 credit hours.

**Early Admission**

For early admission, entering WVU first-year students must have a minimum high school GPA of 3.0 and SAT or ACT test scores at or above the 70th percentile. Early admitted students must meet the standards described below for regular admission to continue in the ABM-AEM program after the completion of 60 credits. Students must provide a personal statement of no less than 500 words identifying the applicant's goals and objectives in obtaining the ABM-AEM degree and three letters of reference, at least two of which are required from persons familiar with the applicant's academic performance including those serving in an advisory role such as teachers, school administrators, or a guidance counselor.

**Regular Admission**

Only currently enrolled WVU students may be considered for regular admission to the program. Transfer students must complete at least 24 credit hours as degree-seeking students at WVU before applying to the program. ABM-AEM is not available to students seeking a second (or subsequent) bachelor's degree. Regular admission may not be any earlier than the semester in which an undergraduate student is expected to complete 60 credits or any later than the semester after which the student needs two additional semesters to complete the bachelor's degree. The minimum standard for regular admission is a cumulative undergraduate GPA of 3.0, with no provisional admissions allowed. Students must provide a personal statement of no less than 500 words identifying the applicant's goals and objectives in obtaining the ABM-AEM degree and three letters of reference, at least two of which are required from persons familiar with the applicant's academic performance including those serving in an advisory role such as teachers, school administrators, or a guidance counselor.

A candidate for the M.S. degree in Applied and Environmental Microbiology must meet all University, College, Division, and Program requirements as outlined in the WVU Graduate Catalog.

Program Requirements

All M.S. degree candidates are required to follow a planned program of study. The student develops the plan of study during their first year in the program in conjunction with the graduate committee. The plan must be approved by the Director of the Division and the Associate Dean for Academic Affairs of the Davis College.

**Thesis Option:**

A minimum cumulative GPA of 3.0 is required in all courses applied toward degree requirements.

Genetics and Development Biology

Matthew Jenks, Division Director of Plant and Soil Sciences
email: majenks@mail.wvu.edu

Daniel Panaccione, Assistant Director of Graduate Programs
email: danpan@mail.wvu.edu

Degrees Offered

• Master of Science with a major in Genetics and Developmental Biology
• Doctor of Philosophy with a major in Genetics and Developmental Biology

AREAS OF EMPHASIS

The degree is offered in genetics and developmental biology, an interdisciplinary program involving the faculty and facilities of a number of departments in the various colleges and schools of the university. A student may concentrate in genetics or developmental biology. The areas in which emphases are offered are as follows:

Genetics – Biochemical and molecular genetics, cytogenetics, developmental genetics, immunogenetics, mutagenesis, toxicology, human genetics, plant genetics, population and quantitative genetics, and animal breeding.

Developmental Biology – Molecular aspects of development, experimental morphogenesis, teratology, regeneration, descriptive embryology, and life cycles of animals and plants.

The student may also minor in one or more other scientific fields.
PROGRAM OBJECTIVE

The objective of this program is an increased level of understanding of modern concepts and methodologies employed in genetic and developmental biological work and to prepare a student to pursue a career in teaching and/or research. Responsibility for a student’s program is vested in a graduate committee charged with arranging the student’s coursework, conducting examinations, and supervising the research.

Admissions

To be considered for admission in the program, the student must possess a baccalaureate degree from an accredited college or university, and the student must have a grade point average of at least a 2.75 (on a 4.0 scale), an average of 3.0 or higher for the last sixty credit hours, or an average of 3.0 or higher in all courses in sciences and mathematics.

GRE AND NEW MCAT

The student must submit the scores of the Graduate Record Examination (GRE) or the New Medical College Admission Test (New MCAT). The student must provide three letters of reference from persons acquainted with the applicant’s professional work, experiences, or academic work, and also submit a written statement of 500 words or more indicating the applicant’s goals and objectives relative to receiving a graduate degree.

Basic training in mathematics, physics, chemistry, and biology is required for admission. Students lacking prerequisites may be accepted in a provisional status but must fulfill them before graduation. Applications for graduate study should be sent in as early in the year as possible, but no later than April 1 for entry the following August; however, applications are accepted year-round for admission to the program in the following semester. Official transcripts of baccalaureate and/or master’s degrees must be sent directly to the WVU Office of Admissions. Application forms can be received from the WVU Office of Admissions, P.O. Box 6009, Morgantown, WV 26506-6009. For further information, write to the department chair.

Program Requirements

A candidate for the M.S. degree in Genetics and Developmental Biology must meet all University, College, Division, and Program requirements as outlined in the WVU Graduate Catalog.

Program Requirements

All M.S. degree candidates are required to follow a planned program of study. The student develops the plan of study during their first year in the program in conjunction with the graduate committee. The plan must be approved by the Director of the Division and the Associate Dean for Academic Affairs of the Davis College. For a more complete statement of requirements, the student is referred to the program’s Guidelines for Graduate Students in the Genetics and Developmental Biology Program.

A minimum cumulative GPA of 3.0 is required in all courses applied toward degree requirements.

Major Learning Goals

HORTICULTURE

Students will acquire fundamental knowledge of horticulture and associated fields of plant and soil science.

Students will acquire detailed knowledge of their particular subdiscipline or research area, including the scientific literature fundamental to their discipline and the ability to stay current on scientific literature.

Students will acquire technical skills in the field, greenhouse, or laboratory.

Students will develop the ability to communicate in writing and orally about scientific concepts and the results of their research.

Students will develop the ability to design, conduct, and interpret the results of experiments.

Nutritional and Food Sciences

Robert L. Taylor, Jr., Division Director of Animal and Nutritional Sciences
e-mail: Bob.Taylor@mail.wvu.edu (bob.taylor@mail.wvu.edu)

Degrees Offered

• Master of Science with a major in Nutritional and Food Science

DEGREE DESCRIPTION

The master of science in nutritional and food science in the Davis College of Agriculture, Natural Resources and Design allows maximum flexibility in courses and research problems. They may work with issues in human health and nutrition. Research problems in human nutrition issues form the basis for many studies, but a comparative approach is emphasized. A master of science degree is available as a thesis or coursework option. For additional information, contact Dr. Robert L. Taylor, Jr., @ (304) 293-2631 or Bob.Taylor@mail.wvu.edu.

The division offers the graduate dietetic internship program as a component of the masters of science degree program (see below). For additional information, contact Mr. Adam Burda at (304) 293-2651 or Adam.Burda@mail.wvu.edu.

Graduate Dietetic Internship

The Graduate Dietetic Internship is a two-year combined master’s/ internship program for individuals who have completed at least a bachelor’s degree, as well as the Accreditation Council for Education in Nutrition and Dietetics (ACEND) coursework requirements from a Didactic Program in Dietetics (DPD). The dietetic internship provides the supervised practice experience that is required to be eligible to take the registration examination for dietitians. The combined program offers interns the opportunity to complete a Master of Science degree in addition to the required supervised practice component. There is a thesis as well as a non-thesis option for the master’s degree. The program will provide interns with at least 1,200 hours of supervised practice experience. For additional information contact the program director Mr. Adam M. Burda at (304) 293-2651 or Adam.Burda@mail.wvu.edu.

Admissions

Requirements are similar to those in other biological sciences. The student should have completed basic courses in the physical and biological sciences, including genetics, nutrition, and physiology. Deficiencies may prolong the time needed to complete degree programs.

Applications must be submitted by October 15 for fall semester and March 15 for spring semester for the M. S. in Nutrition and Food Science. A composite graduate record examination score of 1,000 or better will be considered as a basis for admission. Meeting the above requirements shall not guarantee the applicant admission since each professor will accept only the number of students that can be supervised adequately with available facilities, time, and funds.

A candidate for the M.S. degree in Nutritional and Food Science must meet all University, College, Division, and Program requirements as outlined in the WVU Graduate Catalog.

Program Requirements

All M.S. degree candidates are required to follow a planned program of study. The student develops the plan of study during their first year in the program in conjunction with the graduate committee. The plan must be approved by the Director of the Division and the Associate Dean for Academic Affairs of the Davis College.
Thesis option: The thesis option will require 30 credit hours, 24 hours of regular course work plus 6 hours credit for a thesis. A student must maintain a grade point average of 3.0 or better to remain in good standing. There will be a common core curriculum for the two majors. All additional course requirements will be determined by the student in consultation with the major advisor and graduate committee members.

Non-Thesis option: The non-thesis option will require 36 hours of course work. A student must maintain a grade point average of 3.0 or better to remain in good standing. There will be a common core curriculum for the non-thesis masters. Additional courses to meet the degree requirements will be determined by the student in consultation with the major advisor and the graduate committee members and presented in the student’s Plan of Study.

Total Hours 36

Students in the MS- Thesis Option will be required to complete a thesis. They may identify a problem for study on their own, with approval from their graduate committee or they may work on a faculty member’s research study. The scope of the research problem must be approved by the student’s graduate committee. Students are required to defend their thesis in an open seminar presentation. Students in either the thesis or the non-thesis option must pass an oral examination to be approved for graduation. No more than three hours of research/problem report credits can be applied to the Non-Thesis option.

* Students must complete a minimum of 30 total hours, of which at least 24 hours must be coursework other than research, thesis, project, internship, etc. credits.

Major Learning Goals

NUTRITIONAL AND FOOD SCIENCES

Students who complete a Master of Science degree in Animal and Nutritional Sciences with a major in Nutrition and Food Sciences will:

- Critically evaluate the literature in their field of study as new knowledge is accumulated.
- Identify research needs relevant to providing answers to societal problems.
- Apply research findings to professional practice in their fields.
- Effectively use oral and written communication to share information and ideas.
- Be qualified to take advanced-level professional positions in their respective fields of study.
- Be qualified for doctoral studies in their fields.

Plant and Soil Science

Matthew Jenks, Division Director of Plant and Soil Sciences
email: majenks@mail.wvu.edu

Daniel Panaccione, Assistant Director of Graduate Programs
email: danpan@mail.wvu.edu

Degree Offered

- Doctor of Philosophy with a major in Plant and Soil Science
AREA OF EMPHASIS

The doctor of philosophy in plant and soil sciences degree is offered to students who wish to study crops agronomy, entomology, applied and environmental microbiology, horticulture, plant pathology, or soil sciences.

Admissions

In order for a student to be admitted to the program, the applicant normally must fulfill the following admission criteria to be considered:

- Possess a baccalaureate degree.
- Have a minimum undergraduate grade point average of 2.75 (3.0 for acceptance as a regular graduate student).
- Have an adequate academic aptitude at the graduate level as measured by the Graduate Record Examination (GRE) or other tests/evidence.
- Provide three letters of reference from persons acquainted with the applicant’s professional work, experience, or academic background.
- Submit a written statement of approximately 500 words indicating the applicant’s goals and objectives relative to receiving a graduate degree.

International students have the additional requirement to submit a minimum score of 213 on the computer based TOEFL examination if their native language is not English. Interviews are encouraged but not required.

A candidate for the Ph.D. degree in Plant and Soil Science must meet all University, College, Division, and Program requirements as outlined in the WVU Graduate catalog.

Program Requirements

All Ph.D. degree candidates are required to follow a planned program of study. The student develops the plan of study during their first year in the program in conjunction with the graduate committee. The plan must be approved by the Director of the Division and the Associate Dean for Academic Affairs of the Davis College.

A minimum cumulative GPA of 3.0 is required in all courses applied toward degree requirements.

* A student must be enrolled in Seminar all semesters in residence.

Doctoral students must satisfactorily complete a set of core courses before they will be admitted to candidacy for the Ph.D. degree. All core courses will be at the 600 or 700 level, except where indicated below. Certain course requirements may be waived if the student has received equivalent training in prior coursework. Additional coursework pertaining to the student’s area of specialization will be determined by the student’s major professor and graduate committee.

Major Learning Goals

PLANT AND SOIL SCIENCE

1. Students will acquire fundamental knowledge of their area of emphasis and associated fields in plant and soil science.
2. Students will acquire detailed knowledge of their particular subdiscipline or research area, including the scientific literature fundamental to their discipline and the ability to stay current on scientific literature.
3. Students will acquire technical skills in the field or laboratory.
4. Students will develop the ability to communicate in writing and orally about scientific concepts and the results of their research.
5. Students will develop the ability to design, conduct, and interpret the results of experiments.

Plant Pathology

Matthew Jenks, Division Director of Plant and Soil Sciences

Reproductive Physiology

Robert L. Taylor, Jr., and Michael W. Vernon, Co-Chairs of the Interdisciplinary Faculty  
e-mail: Bob.Taylor@mail.wvu.edu, mvernon@hsc.wvu.edu

Degrees Offered
- Master of Science with a major in Reproductive Physiology
- Doctor of Philosophy with a major in Reproductive Physiology

The graduate program in reproductive physiology is interdisciplinary, with faculty located in the Division of Animal and Nutritional Sciences; and the Departments of Obstetrics and Gynecology; Physiology and Pharmacology; and Internal Medicine.

RESEARCH

Research topics include studies of control of fertility, function and regression of the corpus luteum, aging of the oocyte, seasonal and other environmental factors in reproduction, steroidogenesis, control of estrus and ovulation, artificial insemination, ovarian follicular development, novel ovarian genes, endocrine functions of polypeptides, embryonic and fetal mortality, neuroendocrine control of gonadotropic hormone secretion, neuroendocrine regulation of puberty and breeding seasons, effects of nutrition on reproductive function, and immunology of reproduction. The focus of research is both basic and applied and is almost entirely with farmed animals.

Admissions

Requirements for admission include completion of the following prerequisites with a grade of C or better in each: calculus, genetics, organic chemistry, physics, and vertebrate embryology. The Graduate Record Examination is not required. Only a limited number of students are accepted each year.

A candidate for the M.S. degree in Reproductive Physiology must meet all University, College, Division, and Program requirements as outlined in the WVU Graduate Catalog.

Program Requirements

All M.S. and Ph.D. degree candidates are required to follow a planned program of study. The student develops the plan of study during their first year in the program in conjunction with the graduate committee. The plan must be approved by the Director of the Division and the Associate Dean for Academic Affairs of the Davis College.

A minimum cumulative GPA of 3.0 is required in all courses.

Course Requirements as determined by the Plan of Study  

Total Hours
* Students must complete a minimum of 30 total hours, of which at least 24 hours must be coursework other than research, thesis, project, internship, etc. credits.

**Courses**

**A&VS 699**  
Graduate Colloquium  
1

**Other graduate classes dependent on student background, focus and advisory committee recommendations**  
6

The program draws on courses offered in various departments and includes courses in endocrinology, advanced reproductive physiology, biochemistry, physiology, statistics, and developmental embryology. Students present seminars and participate in journal clubs each semester.

**Major Learning Goals**

**REPRODUCTIVE PHYSIOLOGY**

1. Knowledge of the reproductive system and its functions in animals and man.

2. Knowledge of the endocrine and neuroendocrine regulation of reproduction.
4. Ability to think comprehensively in the field of reproductive biology, design, analyze, interpret and report results of experiments to increase knowledge of the field.
5. Ability to utilize knowledge of reproductive biology to teach the subject and some associated disciplines at multiple levels.
6. Ability to understand and critique current research publications relevant to the control of reproduction and relate these results to previous work in the field.

School of Design and Community Development

Judith Wasserman, Director of Design and Community Development
email: Judith.Wasserman@mail.wvu.edu

Degrees Offered

- Master of Landscape Architecture with a major in Landscape Architecture
- Master of Science with a major in Agricultural and Extension Education
- Master of Science with a major in Design and Merchandising
- Doctor of Philosophy with a major in Agricultural and Extension Education

The School of Design and Community Development's primary mission is to prepare leaders, who influence the economic, social, aesthetic, and functional development of communities, states, and nations, dedicated to the improvement of quality of life for all members of society in harmony with the natural environment.

The School offers curricula in agricultural and extension education, design and merchandising, and landscape architecture. The mission of the agricultural and extension education program is to empower their majors for the choices and challenges of the twenty-first century. The faculty members in this program bring their love of the profession to students in an educational setting.

The graduate program in landscape architecture at WVU provides study opportunities for students entering the program from disciplines other than landscape architecture as well as advanced study opportunities for students who already have a design background. Our students work closely with faculty members and practicing professionals in the field to develop the skills essential to their professions and to examine the underlying theories on which they will ground their practice. The landscape architecture graduate program provides students with real world experiences and research opportunities. Graduate students are also exposed to faculty who have doctoral or advanced degrees in their field and who work collaboratively with national, state, and community agencies or organizations. Our faculty members are engaged in extensive research and are considered experts in their field of study.

FACULTY

DIRECTOR

- Judith Wasserman - Master of Landscape Architecture and Master of Regional Planning (Cornell University)
  Director, School of Design and Community Development

PROFESSORS

- Cindy Beacham - Ph.D. (Virginia Tech)
  Design Studies-Design thinking, Design pedagogy, Design for children, Evidence based design
- Deborah A. Boone - Ph.D. (Ohio State University)
  Agricultural & Extension Education-Extension education, Leadership development, Program evaluation and development
- Harry N. Boone, Jr. - Ph.D. (Ohio State University)
  Agricultural & Extension Education-Computing technology, Teaching methods, Social science research
- Michael J. Dougerty - Ph.D. (Virginia Tech)
  Landscape Architecture-Environmental design and planning
- Stacy A. Gartin - Ph.D. (Ohio State University)
  Agricultural & Extension Education-Communications, Program planning, Leadership development, Teaching methods
- Nora MacDonald - M.S. (Iowa State University)
  Fashion, Dress & Merchandising-Educational pedagogy, Apparel design, Functional apparel, Fashion merchandising, Visual merchandising

ASSOCIATE PROFESSORS

- Peter Butler - M.L.A. (Iowa State)
  Landscape Architecture-Cultural landscape planning and interpretation, Community design
- Ronald Dulaney Jr. - M. Arch. (Virginia Tech)
  Interior Design-Architectural design, Design and culture, Design media, Material and fabrication processes, Poetics of construction
• Hodjat Ghadimi - Ph.D. (Ohio State University)
  Design Studies-Intelligent build environment, Innovation economics, Energy-environment-economy interaction modeling, Sustainable development planning, GeoDesign
• Michael Hasenmyer - M.L.A. (North Carolina State University)
  Landscape Architecture-Virtual simulation and design education
• Kerry S. Odell - Ph.D. (Ohio State University)
  Agricultural & Extension Education-Research methodology, Microcomputer applications, Teaching methods
• Charles B. Yuill - M.L.A. (University of Massachusetts)
  Landscape Architecture-Computer applications, Site analysis

ASSISTANT PROFESSOR
• Jessica Blythe - Ph.D. (University of Florida)
  Agricultural & Extension Education-Agricultural education, STEM education, Teaching methods, Effective teacher professional development, Quantitative and qualitative research methods
• Vaike Haas - M.L.A. (University of Michigan)
  Landscape Architecture-Native species, Stormwater management, Regional greenspace
• J. Chris Haddox - M.S. (West Virginia University)
  Design Studies-LEED AP, Green advantage certified, Sustainable design and construction, Green building theory and practice
• Shan Jiang - Ph.D. (Clemson University)
  Landscape Architecture-Planning and design of the build environment, Architecture and health, Therapeutic landscapes
• Katie Baker Jones - Ph.D. (University of Missouri)
  Fashion, Dress & Merchandising-Fashion media, Fashion studies, Sustainable fashion, Fashion as material culture
• Ashley Kyber - M.S. (Clemson University), M.F.A. (Cranbrook)
  Landscape Architecture-Community design landscape/public art, Environmental/green design
• Craig Nelson - M.I.D. (North Carolina State University)
  Design Studies-Designing consumer products, Industrial design, Prototyping, Brand identity
• Lisa Orr - M.L.A. (University of California, Berkeley)
  Landscape Architecture-Vernacular and cultural landscape analysis and theory, Landscape architectural graphics and representation
• Stefania Staniscia - Ph.D. (IUAV University of Venezia, IT)
  Landscape Architecture-Landscape Design with focus on brownfields and energy landscape
• Jennifer Yang - Ph.D. (Virginia Tech)
  Fashion, Dress & Merchandising-Merchandising, planning and control, Product merchandising, Mass-customization, Product fit

VISITING ASSISTANT PROFESSORS
• Jason McKibben - MEd (Texas A&M)
  Agricultural & Extension Education-Teaching and learning in agricultural mechanics, Expiriential learning, STEM in agriculture
• Lee Mullett - M.S. (West Virginia University)
  Interior Design-Teaching, Design
• William Plyler - Ph.D. (West Virginia University)
  Interior Design-Architectural design, Design technology
• Elijah Pollard - M.F.A. (SUNY)
  Fashion, Dress & Merchandising-Fine arts, Design

PROFESSORS EMERITI
• Donald R. Armstrong
• William H. Hagerty
• Mary Rose Jones
• Layle D. Lawrence
• Marian B. Liddell
• George W. Longenecker
• Janice Yeager

Admissions
The following admission and performance standards, in addition to university and college requirements, are normally required to qualify for acceptance as a regular student to the Ph.D. program in Resource Management and Sustainable Development, the Human and Community Development option:
• A master’s degree and a grade point average (GPA) of 3.0 or higher (on a 4.0 scale) in graduate courses is normally required for the AGEE and HCD areas.
• A minimum combined score of 300 for the verbal and quantitative sections of the Graduate Record Examination (GRE).
• Three letters of reference from individuals who can attest to the applicant’s potential for academic success and/or relevant career-related experiences should be sent directly to the graduate program coordinator.
• A current resume or curriculum vita.
• Four years of career-related experience for those seeking admittance into the AGEE area.
• Other supporting materials you wish to have considered with your application.

Applications are reviewed by the Graduate Admission Committee, the graduate program coordinator, and the School Director who jointly make the admission decision. Applicants who do not meet the requirements but have special qualifications or circumstances may be admitted as provisional graduate students.

Agricultural and Extension Education

Harry N. Boone, Jr., Graduate Program Coordinator
e-mail: Harry.Boone@mail.wvu.edu

Degrees Offered

• Master of Science with a major in Agricultural and Extension Education
• Doctor of Philosophy with a major in Agricultural and Extension Education

There are two graduate options available in Agricultural and Extension Education. Individuals desiring advanced study in teaching agriculture in public schools, communication and leadership, or extension education may earn a master of science in agricultural and extension education. For individuals interested in the opportunity to study and conduct research with faculty in agricultural and extension education, a Ph.D. in resource management and sustainable development with an emphasis in agricultural and extension education is available.

The Agricultural and Extension Education faculty offer master’s programs for persons desiring advanced study in teaching agriculture in public schools, communications and leadership, or extension education. Candidates for the master of science degree may be admitted on a regular or provisional basis. A student who does not have a B.S. in agriculture with a major in agricultural and extension education may be required to complete undergraduate courses in agriculture and professional education if he or she plans to obtain certification to teach. Students in the curriculum take graduate courses in both technical and professional education. Programs are planned to ensure that candidates develop competence in the following areas:

• Communications and leadership
• Design, operation, and philosophy of agricultural and extension education programs
• Research and evaluation processes (In addition, students pursuing programs that emphasize agricultural and extension education will be expected to develop an understanding of teaching/learning processes.)

A candidate for the M.S. degree in Agricultural and Extension Education must meet all University, College, School, and Program requirements as outlined in the WVU Graduate Catalog.

Program Requirements

All M.S. degree candidates are required to follow a planned program of study. The student develops the plan of study during their first year in the program in conjunction with his/her graduate committee. The plan must be approved by the candidate’s graduate committee, Director of the School for Design and Community Development and the Associate Dean for Academic Affairs of the Davis College.

All students will conduct a research study and submit the results in the form of a thesis to the WVU ETD Repository. Students with an Extension Education area of emphasis must complete AGEE 650 (Program Development in Community Education) and AGEE 651 (Program Evaluation in Comm Ed.).

A minimum cumulative GPA of 3.0 is required in all courses applied toward degree requirements.

</table>

Total Hours 30

* Students must complete a minimum of 30 total hours, of which at least 24 hours must be coursework other than research, thesis, project, internship, etc. credits.
Program Requirements

All Ph.D. degree candidates are required to follow a planned program of study. The student develops the plan of study during their first year in the program in conjunction with the graduate committee. The plan must be approved by the candidate’s graduate committee, Director of the School of Design and Community Development, and the Associate Dean for Academic Affairs of the Davis College.

A candidate for the Ph.D. degree in Agriculture and Extension Education must meet all University, College, Division, and Program requirements as outlined in the WVU Graduate catalog.

A minimum cumulative GPA of 3.0 is required in all courses applied toward degree requirements.

Course Requirements as determined by the plan of study. The plan of study must include:

Dissertation Defense

Agriculture and Extension Education Area of Emphasis Requirements

A minimum of 6 and no more than 12 hours of coursework within an approved major but distinct from required major coursework will be completed as determined by the plan of study. The plan of study must include a minimum of 12 hours of research.

Beyond the core, AGEE majors take four courses covering research design, data analysis, program development, and program evaluation. Additional courses in teaching and learning theory, educational psychology, supervision, administration and leadership, and statistics are recommended. Students will have two fields of specialization consisting of a minimum of twelve to fifteen semester hours of coursework each, not counting research.

Beyond the core, HCD majors take four courses covering research design, data analysis, program development, and program evaluation. Additional courses related to qualitative research, policy, administration, and the philosophical, theoretical, and empirical foundations related to human community growth and sustainability are recommended. Students will have two fields or specialization consisting of a minimum of twelve to fifteen semester hours of coursework each.

Major Learning Goals

AGRICULTURAL AND EXTENSION EDUCATION

Upon completion of the Master of Science degree, all students will:

- Complete a minimum of 24 hours of coursework in an area of emphasis selected by the student and his/her adviser.
- Complete a minimum of 6 hours of coursework in research methods and data analysis.
- Conduct an “agricultural education” research study (maximum of 6 hours credit) on a topic of interest to the student.
- Present the findings from their research study in a professional manner including the completion of a thesis approved by West Virginia University’s Electronic Thesis and Dissertation (ETD) system.

Students may be admitted to the Agricultural and Extension Education Master of Science program to complete hours/courses needed to maintain their teaching certification.

Design and Merchandising

Degree Offered

- Master of Science in Design and Merchandising

The objective of this program is to raise each student’s ability to apply fully developed design thinking, mastery of merchandising systems, and deep understanding of selected contexts to applications in targeted areas. These areas currently include cultural resource management/historic preservation, healthcare design, integrated marketing communications, and sustainable design practices. Areas of focus may be expanded, however, to meet student demands if resources and faculty expertise is available.

A candidate for the M.S. degree in Design and Merchandising must meet all University, College, Division, and Program requirements as outlined in the WVU Graduate Catalog.
Program Requirements

All M.S. degree candidates are required to follow a planned program of study. The student develops the plan of study during their first year in the program in conjunction with the graduate committee. The plan must be approved by the Director of the Division and the Associate Dean for Academic Affairs of the Davis College.

A minimum cumulative GPA of 3.0 is required in all courses applied toward degree requirements.

<tbody>
<tr>
<td>* Students must complete a minimum of 30 total hours, of which at least 24 hours must be coursework other than research, thesis, project, internship, etc. credits.</td>
<td>30</td>
</tr>
</tbody>
</table>

Major Learning Goals

**DESIGN AND MERCHANDISING**

Graduates will be able to:

- Conduct research appropriate to their cognate specialty and process (design & merchandising) focus.
- Teach at a post-secondary level within their discipline.
- Apply systemic design thinking to industry innovation at advanced levels.
- Apply iterative design process to solve real world problems.
- Analyze user wants and needs at both micro and macro levels.
- Utilize advanced technology where appropriate.
- Place the right product at the right price in the right place at the right time.
- Communicate effectively.

Landscape Architecture

Charles B. Yuill, Graduate Program Coordinator
email: charlie.yuill@mail.wvu.edu

Degree Offered

- Master of Landscape Architecture (MLA)

The MLA (Master of Landscape Architecture) is a professional master’s level program offered by the Landscape Architecture Program in the Division of Resource Management. The Program provides two tracks for students who wish to pursue graduate education in landscape architecture and environmental design. The program provides for a three-year course of study for students without a design-related undergraduate degree who wish to pursue graduate studies in landscape architecture. That track provides one year of leveling courses, so students may then pursue advanced studies in their remaining two years. Students pursuing the three-year MLA are then able to engage in the profession of landscape architecture as practicing professionals.

The program also provides a two-year course of study for students entering the program with an undergraduate design degree in landscape architecture or a related field such as architecture. The program provides opportunities to engage in landscape architectural design as well as the potential to engage in specializations such as community planning and design, environmental restoration, and environmental informatics focusing on GIS-based planning and design methods. With both the two-year and three-year programs, the student concludes their studies by completing either an applied capstone project or a thesis.

The master of landscape architecture program provides opportunities for both foundation and advanced training in the core areas of landscape architecture, including site and environmental design, land use planning, construction methods and materials, landscape management, and plant materials and planting design. It is anticipated that many students, particularly those pursuing the post-professional degree, will take interdisciplinary approaches to their studies as well as use them in practice. There are twelve credit hours of electives in the curriculum. These would allow the student to tailor a series of courses in areas of focus such as community planning and design, environmental restoration, or environmental and natural resource analysis methods including geographic information systems and remote sensing.

Graduates of the program will be prepared for competitive entry-level positions in private firms and public agencies. In the course of their graduate education, students may pursue one of four options, ranging from a general professional background to a focus on environmental restoration, community design, or environmental and natural resource analysis.
1. A comprehensive education in landscape architecture, environmental design and planning. Students pursue a program of study to provide a well-rounded design background suitable for entry into the landscape architecture profession. This option would be most appropriate for students in the first-professional-degree MLA program who do not possess design or technical science undergraduate degrees.

2. Environmental Restoration. Through elective course selection and thesis or professional project selection, students may pursue a course of study focusing on environmental restoration including soils and water restoration, brownfields, mined areas, and wetlands and watersheds. This option allows students to take advantage of the strengths of the Davis College for collaborative in-depth study in many aspects of environmental and community restoration.

3. Community Design and Planning. Building on the existing Community Design Team (CDT) and a number of other allied programs, students will be able to pursue focused studies emphasizing comprehensive community design and planning. This option will provide students with in-depth knowledge in the theory and practice of community-based design, including outreach, public participation, and visioning. The general emphasis will be on small communities that are typical to the Appalachian Region, although studies will be applicable to urban and regional design as well.

4. Environmental and Natural Resource Analysis Methods. With a greater focus on the environmental aspects of landscape architectural practice, this option will permit students to focus on environmental analysis methods including geographic information systems (GIS), remote sensing, statistical and field survey methods, and the incorporation of these methods into landscape architectural and environmental design projects. This option recognizes the strengths and expertise found in the landscape architecture program as well as other programs in the College and University.

Admissions

The landscape architecture faculty offers the master of landscape architecture (MLA) as a professional degree leading to the practice of landscape architecture. Candidates for the MLA may enter the program with a BSLA, BALA, or a related design degree and pursue a thirty-eight credit hour course of study culminating in the preparation of either a master's thesis or terminal project. For these students, the MLA will serve as a post-professional degree providing the opportunity for advanced or specialized studies in particular areas of landscape architecture. Students entering the program with a BS or BA in a non-design discipline are required to complete up to an additional twenty-eight credits of leveling courses prior to entering the second year of a three-year course of study with the thirty-eight credit hour course of study to be completed in years two and three. The number of leveling courses that any student may be required to take will be dependent on the student's academic background and will be determined in collaboration with the student's academic advisor. For these students, the MLA will serve as the first professional degree that is required for entry into the profession of landscape architecture. Studies for these students will also culminate in the preparation of a master's thesis or terminal project.

A candidate for the M.L.A. degree in Landscape Architecture must meet all University, College, School, and Program requirements as outlined in the WVU Graduate Catalog.

Program Requirements

All M.L.A. degree candidates are required to follow a planned program of study. The student develops the plan of study during their first year in the program in conjunction with the graduate committee. The plan must be approved by the Director of the School and the Associate Dean for Academic Affairs of the Davis College.

A minimum cumulative GPA of 3.0 is required in all courses applied toward degree requirements.

Course Requirements as determined by the Plan of Study

<table>
<thead>
<tr>
<th>Total Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>30</td>
</tr>
</tbody>
</table>

* Students must complete a minimum of 30 total hours, of which at least 24 hours must be coursework other than research, thesis, project, internship, etc. credits.

COURSEWORK

A total of thirty-eight credit hours are required for the post-professional M.L.A. program. The requirements for the first professional degree may include an additional twenty-eight undergraduate and graduate credits prior to commencing with subsequent graduate courses.

THESIS OR TERMINAL PROJECT

Students will be required to complete either a research thesis on a problem in environmental or community design or landscape architecture or to complete an applied comprehensive professional project. Each student selecting the thesis option will defend their thesis in a public forum before their committee. The comprehensive project option will result in a professional submission that includes a written report and appropriate professional drawings documenting the design project for a project subject to realistic conditions. It will also include a formal public presentation/defense before the student's committee.

The composition of graduate advisory committees will follow Davis College and WVU guidelines and must have at least two landscape architecture faculty members and one outside member. Two of the committee members must be full members of the graduate faculty, and the third may be an associate member.
Major Learning Goals

LANDSCAPE ARCHITECTURE

Mission

The mission of the Master of Landscape Architecture Program at West Virginia University is to provide students with the knowledge necessary to develop the skills and abilities in design, planning, and management that are pivotal to their effectiveness and success in the workforce, and that are responsive to the unique qualities of the state and the region. The program prepares students to become effective professionals and citizens by emphasizing a philosophy of responsibility and commitment to ethical standards regarding the natural environment, professional practice and personal relationships.

Learning Goals:

• To provide students with a solid professional educational foundation that encompasses knowledge and skills of design, construction, problem-solving, plant materials, landscape management, and professional practice and that is responsive to the needs of the environment, society, and the landscape architecture profession.
• To instill ethical standards in the students regarding the environment, the profession, personal relationships and social responsibility.
• To prepare students to be proficient in communicating professional concepts graphically, orally, and in writing.
• To provide students with cognitive opportunities to incorporate professional information through the study of real-life problems in Morgantown, the state of West Virginia, and the region.
• To enhance course offerings, collaborative faculty research opportunities, and avenues for scholarly activities by increasing and diversifying ties with other disciplines across campus.
• To strengthen the Landscape Architecture Program’s role as an integral part of the Davis College of Agriculture, Forestry, and Consumer Sciences’ research and scholarly activities regarding landscape design, landscape ecology, landscape planning, cultural and sustainable environments, and geographic information systems.
• To provide design and planning expertise to West Virginians in the areas of community development, and improvement of the quality of life by offering the skills of the faculty and students of the Landscape Architecture Program.

School of Natural Resources

Robert Burns, Division Director of Forestry and Natural Resources
email: robert.burns@mail.wvu.edu

Gerard D’Souza, Division Director of Resource Management
email: gdsouza@mail.wvu.edu

Degrees Offered

• Master of Science in Forestry with a major in Forestry
• Master of Science with a major in Agricultural and Resource Economics
• Master of Science with a major in Recreation, Parks, and Tourism Resources
• Master of Science with a major in Wildlife and Fisheries Resources
• Doctor of Philosophy with a major in Forest Resources Science
• Doctor of Philosophy with a major in Human and Community Development
• Doctor of Philosophy with a major in Natural Resource Economics
• Doctor of Philosophy with a major in Resource Management

The School of Natural Resources offers master of science degree programs in four areas: agricultural and resource economics; forestry; recreation, parks and tourism resources; and wildlife and fisheries resources. Students wishing to pursue a master of science emphasizing forest resources management or wood science and technology should apply for admission to the master of science in forestry.

A student seeking admission to work toward the degree of doctor of philosophy in forest resources science in the School of Natural Resources may choose from one of the following Areas of Emphasis as their major field of study: forest resources management; recreation, parks, and tourism resources; wood science and technology; or wildlife and fisheries resources. Within these major fields of study, specialization is limited only by the range of competencies in the graduate faculty.

A limited number of graduate research assistantships are available to highly qualified students on a competitive basis.
FACULTY

DIRECTOR

- Robert C. Burns - Ph.D. (Pennsylvania State University)
  Director, Division of Forestry and Natural Resources
- Gerard E. D’Souza - Ph.D. (Mississippi State University)
  Director, Division of Resource Economics and Management

PROFESSORS

- James T. Anderson - Ph.D. (Texas Tech University)
  Wildlife ecology and management
- Robert C. Burns - Ph.D. (The Pennsylvania University)
  Understanding recreational behavior, motivations, and satisfaction levels
- Alan R. Collins - Ph.D. (Oregon State University)
  Resource economics
- Benjamin E. Dawson-Andoh - Ph.D. (University of British Columbia)
  Wood chemistry and preservation
- Gerard E. D’Souza - Ph.D. (Mississippi State University)
  Production economics, Finance
- John W. Edwards - Ph.D. (Clemson University)
  Endangered Species Ecology and Management, Forest Wildlife/Habitat Relationships
- Jerald J. Fletcher - Ph.D. (University of California, Davis)
  Energy, environmental and resource economics
- Tesfa Gebremedhin - Ph.D. (Oklahoma State University)
  Farm management, Agribusiness
- Kyle J. Hartman - Ph.D. (University of Maryland)
  Fisheries and Aquatic Ecology, Fish Management, Trophic Ecology
- David W. McGill - Ph.D. (Pennsylvania State University)
  Extension Specialist, Forest Resources, Non-industrial Private Forestry
- Joseph F. McNeel - Ph.D. (Virginia Tech)
  Forest harvest and operations
- J. Todd Petty - Ph.D. (University of Georgia)
  Stream and Watershed Ecology
- Tim T. Phipps - Ph.D. (University of California, Davis)
  Resource economics, Agricultural policy
- Chad Pierskala - Ph.D. (University of Minnesota)
  Wildland recreation management and policy
- Peter V. Schaeffer - Ph.D. (University of Southern California)
  Regional science, Applied microeconomics
- Steven Selin - Ph.D. (University of Oregon)
  Human dimensions and Natural resources management
- Dennis K. Smith - Ph.D. (Pennsylvania State University)
  Rural development, Agribusiness management
- Jingxin Wang - Ph.D. (University of Georgia)
  Biomass logistics, utilization and bioenergy, forest BMPs

ASSOCIATE PROFESSORS

- Cheryl Brown - Ph.D. (University of California, Berkley)
  Agricultural and food policy and economics, Agribusiness
- Gregory A. Dahle - Ph.D. (Rutgers University)
  Arboriculture and urban forestry
- Jinyang Deng - Ph.D. (University of Alberta)
  Recreation, Parks, and Tourism; Recreation and Leisure Studies
- David DeVallance - Ph.D. (Oregon State University)
  Biomaterial processing, manufacturing, and development
- Kathryn Gazal - Ph.D. (Mississippi State University)
  Forest Economics
• Donald J. Lacombe - Ph.D. (Florida State University)
  Spatial econometrics, Public choice and industrial organization
• Jingjing Liang - Ph.D. (University of Wisconsin-Madison)
  Forest ecology and biodiversity
• Jamie Schuler - Ph.D. (North Carolina State University)
  Forest regeneration and restoration
• Kaushlendra Singh - Ph.D. (University of Georgia)
  Thermo-chemical conversion and bioenergy
• Dave Smaldone - Ph.D. (University of Idaho)
  Environmental and Cultural Interpretation, Nature-based tourism
• Mark Sperow - Ph.D. (Colorado State University)
  Production and resource economics
• Ben D. Spong - Ph.D. (Oregon State University)
  Forest operations, roads, and harvesting
• Doolarie Singh-Knights - Ph.D. (West Virginia University)
  Agribusiness and entrepreneurship

ASSISTANT PROFESSORS
• Donald Brown - Ph.D. (Texas State University)
  Herpetology, wildlife ecology
• Levan Elbakidze - Ph.D. (Texas A&M)
  Shale gas; water and energy economics
• Xiaoli Etienne - Ph.D. (University of Illinois)
  Econometric methods in agriculture and energy
• Shawn Grushecky - Ph.D. (West Virginia University)
  Energy land management
• Christopher Lituma - Ph.D. (University of Tennessee)
  Ornithology and bird ecology
• Kudzayi Maumbe - Ph.D. (Michigan State University)
  Tourism Marketing
• Gloria S. Oporto - Ph.D. (University of Maine - Orono)
  Wood-based Composites and Bioproducts
• James S. Rentch - Ph.D. (West Virginia University)
  Forest ecology
• Nicholas P. Zegre - Ph.D. (Oregon State University)
  Forest and watershed hydrology

ADJUNCT PROFESSORS
• Patricia M. Mazik - -- Ph.D. (Memphis State University)
  Aquatic toxicology, fish physiology
• Sheldon Owen - Ph.D. (West Virginia University)
  Extension wildlife specialist
• Stuart A. Welsh - Ph.D. (West Virginia University)
  Ichthyology
• Petra B. Wood - Ph.D. (University of Florida)
  Avian ecology
VISITING ASSISTANT PROFESSORS

- Charlene Kelly - Ph.D. (Virginia Tech)
  Watershed biogeochemistry
- Kirsten Stephan - Ph.D. (University of Idaho)
  Soil and vegetation management

Agricultural and Resource Economics

Alan R. Collins, Graduate Program Coordinator

e-mail: Alan.Collins@mail.wvu.edu

Degrees Offered

- Master of Science with a major in Agricultural and Resource Economics

The M.S. program in Agricultural and Resource Economics (ARE) provides advanced training in the areas of natural resource, environmental, agricultural, mineral, energy, agribusiness, international, and rural development economics. The primary objective of this program is to prepare students for further graduate study or a variety of careers in business and government. A candidate for the degree must comply with University, College, and Program requirements. The M.S. degree in Agricultural and Resource Economics can be obtained under either course work or thesis options.

Candidates for the master of science degree may be admitted on a regular or provisional basis. Prerequisites for admission include the following:

- Twelve or more semester credits in economics, agricultural and resource economics, statistics, or appropriate social science courses (should include a course in intermediate microeconomics)
- Three or more semester hours of credit in calculus

Students lacking these prerequisites have to complete coursework to acquire them. Graduate programs are planned to ensure that candidates develop competence in the following:

- Communicating economic policy issues
- Theoretical and analytical skills to analyze and evaluate economic policies
- Research to develop economic policy proposals

A candidate for the M.S. degree in Agricultural and Resource Economics must meet all University, College, Division, and Program requirements as outlined in the WVU Graduate Catalog.
Program Requirements

All M.S. degree candidates are required to follow a planned program of study. The student develops the plan of study during their first year in the program in conjunction with the graduate committee. The plan must be approved by the Director of the Division and the Associate Dean for Academic Affairs of the Davis College.

A minimum cumulative GPA of 3.0 is required in all courses applied toward degree requirements.

Course Requirements as determined by the Plan of Study

<table>
<thead>
<tr>
<th>Total Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>30</td>
</tr>
</tbody>
</table>

* Students must complete a minimum of 30 total hours, of which at least 24 hours must be coursework other than research, thesis, project, internship, etc. credits.

Graduate courses offered toward the degree must be approved by the student’s graduate committee. Thesis and non-thesis options are available for the master’s degree. Students should select one option by the time twelve hours of coursework are completed (usually by the end of the first semester in the program) and after consulting with their graduate advisor or committee. Candidates with graduate research assistantships must select the thesis option.

**THESIS OPTION**

A minimum of thirty credit hours of approved coursework can include not more than six hours of credit for the thesis. Proficiency in economics plus agricultural and resource economics is expected. Approved courses in closely related areas may be included. The student’s graduate committee must approve the student’s course of study and thesis topic.

**COURSEWORK OPTION**

A minimum of thirty-six credit hours of approved coursework to provide proficiency in economics, resource, and agricultural and resource economics. Courses in closely related areas may be included if approved by the student’s graduate committee. The student must satisfactorily complete a written and oral examination administered by the student’s graduate committee.

Major Learning Goals

**AGRICULTURAL AND RESOURCE ECONOMICS**

The M.S. program in Agricultural and Resource Economics (ARE) provides advanced training in the areas of natural resource, environmental, agricultural, mineral, energy, agribusiness, international, and rural development economics. The primary objective of this major is to prepare students for further graduate study or a variety of careers in business and government. Learning goals are that each graduate:

• is qualified for and prepared to seek admission to a Ph.D. program in agricultural or natural resource economics.
• can apply microeconomic theories to solve problems in agricultural and natural resource economics.
• demonstrates an ability to use the quantitative tools of econometrics and math programming in the analysis of applied problems in agricultural and natural resource economics.

Forest Resources Science

**Degree Offered**

• Doctor of Philosophy with a major in Forest Resources Science

**AREAS OF EMPHASIS OFFERED**

• Forest Resource Management
• Recreation, Parks, and Tourism Resources
• Wildlife and Fisheries Resources
• Wood Science and Technology

The Division of Forestry and Natural Resources also offers a program option leading to the degree of doctor of philosophy in forest resources science. Students who choose this option have the opportunity to choose one of the following as their major field of study: forest resources management; recreation, parks, and tourism resources; wood science and technology, or wildlife and fisheries resources. Within these major fields of study, specialization is limited only by the range of competencies in the graduate faculty.

Admissions

A student seeking admission to work toward the degree of doctor of philosophy in forest resources science in the Davis College of Agriculture, Natural Resources, and Design may choose as the major field of study forest resources management; recreation, parks, and tourism resources; wood science
and technology; or wildlife and fisheries resources. Within these major fields of study, specialization is limited only by the range of competencies in the graduate faculty.

A candidate for the Ph.D. degree in Forest Resources Science must meet all University, College, Division, and Program requirements as outlined in the WVU Graduate catalog.

**Program Requirements**

All Ph.D. degree candidates are required to follow a planned program of study. The student develops the plan of study during their first year in the program in conjunction with the graduate committee. The plan must be approved by the Director of the Division and the Associate Dean for Academic Affairs of the Davis College.

A minimum cumulative GPA of 3.0 is required in all courses applied toward degree requirements.

**Course Requirements as determined by the Plan of Study**

<table>
<thead>
<tr>
<th>Research</th>
</tr>
</thead>
<tbody>
<tr>
<td>Dissertation</td>
</tr>
<tr>
<td>Dissertation Defense</td>
</tr>
</tbody>
</table>

Curriculum requirements for all Ph.D. candidates include a block of graduate courses in the major field, which will constitute a comprehensive review of the significant knowledge in that field and a block of graduate courses in a minor field of study. A minimum of sixty semester hours beyond the bachelor’s degree and exclusive of the dissertation is required.

**DISSERTATION AND FINAL EXAMINATION**

The research work for the doctoral dissertation must show a high degree of scholarship and must present an original contribution to the field of forest resources science. In addition to coursework and the dissertation, the candidate is required to pass a qualifying examination and a final examination.

**Major Learning Goals**

**FOREST RESOURCES SCIENCE**

- Demonstrate mastery of historic and contemporary issues and practices in one of the four emphasis areas (Forest Resource Management; Recreation, Parks and Tourism Resources; Wildlife and Fisheries Resources; or Wood Science and Technology).

- Critique and assess peer-reviewed literature and apply research findings to the resources and management of their emphasis area.

- Conduct and defend independent, original research focused on Forest Resource Management; Recreation, Parks and Tourism Resources; Wildlife and Fisheries Resources; or Wood Science and Technology; that includes project design, collecting, analyzing and interpreting data, publishing results in scientific journals, and presenting results to scientific audiences.

**Forestry**

**Degree Offered**

- Master of Science in Forestry with a major in Forestry.

**AREAS OF EMPHASIS OFFERED**

- Forest Resources Management
- Wood Science and Technology

Students seeking admission for the degree of master of science in forestry should have completed an undergraduate curriculum emphasizing forestry or wood science. A student whose undergraduate degree is in a field other than these two areas of study will ordinarily be required to take supplemental undergraduate courses. Candidates may emphasize study in bioenergy, biocomposites, forest biometry, forest ecology, forest economics, forest hydrology, forest management, forest operations, silviculture, sustainable construction, or forest products marketing. The candidate must complete thirty hours of approved study, six hours which shall constitute a thesis, or thirty-six hours of approved study without a thesis but including a three-hour problem paper. For details regarding the Forest Resources Management Program, go to: http://forestresources.wvu.edu/. For details regarding the Wood Science and Technology Program, go to: http://woodscience.wvu.edu/.

A candidate for the M.S.F. degree in Forestry must meet all University, College, Division, and Program requirements as outlined in the WVU Graduate Catalog.
Program Requirements

All M.S.F. degree candidates are required to follow a planned program of study. The student develops the plan of study during their first year in the program in conjunction with the graduate committee. The plan must be approved by the Director of the Division and the Associate Dean for Academic Affairs of the Davis College.

A minimum cumulative GPA of 3.0 is required in all courses applied toward degree requirements.

Course Requirements as determined by the Plan of Study

<table>
<thead>
<tr>
<th>Total Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>30</td>
</tr>
</tbody>
</table>

* Students must complete a minimum of 30 total hours, of which at least 24 hours must be coursework other than research, thesis, project, internship, etc. credits.

Candidates for the degree may emphasize in forest biometry, forest ecology, forest economics, forest business, forest management, forest hydrology, silviculture, wood science and technology, forest operations, wood composites, wood marketing, bio-energy, or bio-fuels. The candidate must complete thirty hours of approved study, six hours of which shall constitute a thesis. The program ordinarily requires two years of residence. The master of science in forestry has a non-thesis option. For this option, the candidate must complete thirty-six hours of approved study, eight hours of which shall consist of an applied problem as approved by the candidate's graduate committee. The Division of Forestry and Natural Resources in the Davis College of Agriculture, Natural Resources, and Design requires three letters of recommendation and a one-page goal statement which identifies the area of specialization the student desires to study.

Major Learning Goals

**FORESTRY**

- Demonstrate mastery in one of the areas of emphasis (Forest Resources Management or Wood Science and Technology)
- Engage in and conduct original research in Forest Resources Management or Wood Science and Technology

**Human and Community Development**

Alan R. Collins, Graduate Program Coordinator
e-mail: Alan.Collins@mail.wvu.edu

**Degrees Offered**

- Doctor of Philosophy in Resource Management

The Ph.D. degree is the most advanced degree offered and prepares candidates for work at the highest level of the profession as a faculty member, staff in a research organization or governmental and non-governmental agencies, or as a consultant.

A candidate for the Ph.D. degree in Human and Community Development must meet all University, College, Division, and Program requirements as outlined in the WVU Graduate catalog.

**Program Requirements**

All Ph.D. degree candidates are required to follow a planned program of study. The student develops the plan of study during their first year in the program in conjunction with the graduate committee. The plan must be approved by the Director of the Division and the Associate Dean for Academic Affairs of the Davis College.

A minimum cumulative GPA of 3.0 is required in all courses applied toward degree requirements.

**Major Learning Goals**

**HUMAN AND COMMUNITY DEVELOPMENT**

Learning goals for this degree program include:

- Demonstrate the capacity to produce research that can be accepted for publication in inter-disciplinary journals of the social sciences.
- Be proficient in oral and written communication skills in order to have research accepted by and presented at professional conferences.
• Show the ability to organize and to assess a community engagement project.

Natural Resource Economics

Alan R. Collins, Graduate Program Coordinator
e-mail: Alan.Collins@mail.wvu.edu

Degrees Offered

• Doctor of Philosophy in Natural Resource Economics

The Ph.D. degree is the most advanced degree offered and prepares candidates for work at the highest level of the profession as a faculty member, staff in a research organization or governmental and non-governmental agencies, or as a consultant.

A candidate for the Ph.D. degree in Natural Resource Economics must meet all University, College, Division, and Program requirements as outlined in the WVU Graduate catalog.

Program Requirements

The requirements for obtaining a Ph.D. degree in Natural Resource Economics are outlined in the graduate handbook available on-line at http://resourcemanagement.wvu.edu/. All Ph.D. degree candidates are required to follow a planned program of study. The student develops this plan of study in conjunction with the graduate committee. The plan must be approved by the Director of the Division and the Associate Dean for Academic Affairs of the Davis College.

**Major Learning Goals**

**NATURAL RESOURCE ECONOMICS**

Learning goals for this degree program include:

- Demonstrate the capacity to produce research that can be accepted for publication in leading journals within the applied agricultural and natural resource economics and/or economic development disciplines.
- Be proficient in oral and written communication skills in order to have research accepted by and presented at professional conferences.

**Recreation, Parks, and Tourism Resources**

**Degrees Offered**

- Master of Science with a major in Recreation, Parks, and Tourism Resources

The Division of Forestry and Natural Resources offers program options leading to the master of science for students who wish to major in Recreation, Parks, and Tourism Resources. Students selecting this graduate program may focus on field-related specialties including (but not limited to) recreation management and policy, environmental interpretation, and natural resource-based tourism. All students are required to complete a total of thirty-five credit hours and complete a thesis.

Students seeking admission for the degree of Master of Science in recreation, parks, and tourism resources should have completed an undergraduate curriculum emphasizing natural resources recreation. A student whose undergraduate degree is in a field other than this discipline will ordinarily be required to take supplemental undergraduate courses as part of their degree work. Students selecting this graduate program may emphasize recreation management and policy, environmental education and interpretation, or natural resource-based tourism. All students are required to complete a total of thirty-five credit hours and complete a thesis. For more information, go to: http://recreation.wvu.edu/.

A candidate for the M.S. degree in Recreation, Parks, and Tourism must meet all University, College, Division, and Program requirements as outlined in the WVU Graduate Catalog.

**Program Requirements**

All M.S. degree candidates are required to follow a planned program of study. The student develops the plan of study during their first year in the program in conjunction with the graduate committee. The plan must be approved by the Director of the Division and the Associate Dean for Academic Affairs of the Davis College.

A minimum cumulative GPA of 3.0 is required in all courses applied toward degree requirements.

A thesis requires collecting a qualitative or quantitative data set for the purpose of conducting action-oriented research (e.g., program or needs assessments), cooperative research (e.g., cooperative problem solving), and/or theory development (e.g., hypothesis testing). The specific requirements for each student are determined by the thesis chair and committee members. This program ordinarily requires two years of residence.

Major Learning Goals

RECREATION, PARKS, AND TOURISM RESOURCES

1. Students will be able to apply a broad range of social science theories and methods to policy, planning, and management challenges and opportunities in the recreation, tourism, and natural resource fields.
2. Students will be able to design and conduct field relevant research to address natural resource based recreation and tourism questions and problems.
3. Students will be able to analyze and interpret research data that addresses natural resource based recreation and tourism questions and problems.
4. Students will communicate effectively in writing and oral presentations to professional and lay audiences about issues in the RPTR field.
5. Students will demonstrate the ability to remain current with contemporary issues within one’s field and related areas.

Resource Economics and Management

Alan R. Collins, Graduate Program Coordinator
e-mail: Alan.Collins@mail.wvu.edu

Degrees Offered

- Doctor of Philosophy in Resource Management

The Ph.D. degree is the most advanced degree offered and prepares candidates for work at the highest level of the profession as a faculty member, staff in a research organization or governmental and non-governmental agencies, or as a consultant.

A candidate for the Ph.D. degree in Resource Management must meet all University, College, Division, and Program requirements as outlined in the WVU Graduate catalog.

Program Requirements

All Ph.D. degree candidates are required to follow a planned program of study. The student develops the plan of study during their first year in the program in conjunction with the graduate committee. The plan must be approved by the Director of the Division and the Associate Dean for Academic Affairs of the Davis College.

A minimum cumulative GPA of 3.0 is required in all courses applied toward degree requirements.

Major Learning Goals

RESOURCE MANAGEMENT

Learning goals for this degree program include:

- Demonstrate the capacity to produce research that can be accepted for publication in leading inter-disciplinary journals that combine ecological or physical sciences with social science disciplines.
- Be proficient in oral and written communication skills in order to have research accepted by and presented at professional conferences.

Wildlife and Fisheries Resources

Degrees Offered

- Master of Science with a major in Wildlife and Fisheries Resources

The Wildlife and Fisheries Resources Program at WVU is dedicated to developing the next generation of young fisheries and wildlife professionals. This program offers two levels of advanced degree with a master of science in wildlife and fisheries resources and a Ph.D. in forest resources available. At the M.S. or Ph.D. level, students work closely with their faculty advisor and mentor to develop a unique research program that will prepare them for a career in this field. Students typically focus on either wildlife or fisheries for these advanced degrees. Coursework for these degrees varies depending upon the career goals of the student, past course history, and educational needs for the intended research project. Since 2011, we have required that all
graduates complete necessary coursework to obtain professional certification as a biologist by The Wildlife Society or The American Fisheries Society by the time of graduation. Typically all students take two semesters of statistics (STAT 511 and 512) and an advanced GIS class. Students interested in graduate study in our program can apply online through the graduate admissions office but are encouraged to contact faculty members who may share their research interests.

Admissions

Students seeking admission for the degree of Master of Science in wildlife and fisheries resources should have completed an undergraduate curriculum emphasizing wildlife and/or fisheries sciences. A student whose undergraduate degree is in a field other than this discipline will ordinarily be required to take supplemental undergraduate courses as part of their degree work. Students selecting this graduate program may emphasize in either wildlife or fisheries resources in their studies. The candidate must complete thirty hours of approved study, six hours which shall constitute a thesis, or thirty-six hours of approved study without a thesis but including a three-hour problem paper. For more information, go to: http://wildlife.wvu.edu/.

A candidate for the M.S. degree in Wildlife and Fisheries Resources must meet all University, College, Division, and Program requirements as outlined in the WVU Graduate Catalog.

Program Requirements

All M.S. degree candidates are required to follow a planned program of study. The student develops the plan of study during their first year in the program in conjunction with the graduate committee. The plan must be approved by the Director of the Division and the Associate Dean for Academic Affairs of the Davis College.

A minimum cumulative GPA of 3.0 is required in all courses applied toward degree requirements.

* Students must complete a minimum of 30 total hours, of which at least 24 hours must be coursework other than research, thesis, project, internship, etc. credits.

Major Learning Goals

Upon the successful completion of a Wildlife and Fisheries Resources degree students will be able to:

- Demonstrate mastery of historic and contemporary wildlife or fisheries topics.
- Critique and assess peer-reviewed literature and apply research findings to the conservation and management of wildlife and fisheries resources.
- Conduct and defend original research focused on wildlife or fisheries that includes project design, collecting, analyzing and interpreting data, publishing results in scientific journals, and presenting results to scientific audiences.

College Wide Degrees

Degrees Offered

- Master of Agriculture, Natural Resources and Design

Agriculture, Natural Resources and Design

Degree Offered

- Master of Agriculture, Natural Resources and Design
The Master of Agriculture, Natural Resources and Design is an interdisciplinary degree that offers advanced study in all areas of agriculture, natural resources, and design. This program provides an opportunity for students to expand on the knowledge and skills they acquired during their undergraduate studies.

Coursework options are varied with a program that enables students to tailor their education to fit individual career goals. This is a non-thesis program, which requires 36 hours of graduate level coursework. A minimum of 18 hours must be selected from graduate courses within two divisions of the Davis College, with no fewer than six hours in either division. A three-hour problem report approved by the graduate committee members is required.

The Master of Agriculture, Natural Resources and Design may benefit individuals who want to expand their skills and increase their competitiveness in the job market, wish to improve their chances for admission to a professional school, want to make a career change, or want to start a business.

**Career Opportunities**

Positions for employment are available in numerous settings including private industry, education, and federal and state government agencies. Graduates may find employment as educators, researchers, agriculturalists, extension agents, conservationists, or may start their own business. Many graduates also enter professional schools and doctoral programs.

**Admission Requirements**

Applicants must meet the minimum graduate admission requirements of West Virginia University. The student must have earned a baccalaureate degree from a regionally accredited college or university and must have had a grade point average of 2.75 or higher on a 4.0 scale. Applicants to this degree program are asked to identify an advisor from the college faculty and provide a 500-word Statement of Academic and Professional Goals and Objectives. International students have the additional requirement to submit a minimum score of 550 on the paper TOEFL examination or 213 on the electronic TOEFL examination if their native language is not English. A standardized graduate examination score (GRE or MCAT) is not required for admission to this degree, however, it is strongly encouraged.

A candidate for the M.S. degree of Agriculture, Natural Resources and Design must meet all University, College, Division, and Program requirements as outlined in the WVU Graduate Catalog.

**Degree Requirements**

Must maintain an overall grade-point average of 2.75 in all courses completed as a graduate student.

A minimum GPA of 3.0 must be attained in all graduate courses approved by a graduate advisory committee for degree completion.

<table>
<thead>
<tr>
<th>Course Requirements as determined by the Plan of Study *</th>
<th>36</th>
</tr>
</thead>
<tbody>
<tr>
<td>Total Hours</td>
<td>36</td>
</tr>
</tbody>
</table>

* A minimum of 18 hours must be selected from among graduate courses available within two divisions of the Davis College, with no fewer than 6 hours in either division. No more than 12 hours of independent study may be counted towards the degree.

** A 3-hour problem report approved by the graduate committee members is required. The graduate committee shall consist of at least three members representing at least two divisions with at least two being members of the graduate faculty of the college.

**Learning Goals**

Students earning a Masters of Agriculture, Natural Resources & Design degree will be able to:

- Communicate professional concepts orally and in writing.
- Explain the holistic nature of opportunities and problems pertaining to agriculture, natural resources, or design.
- Explain the role of inquiry and research in addressing opportunities and problems pertaining to agriculture, natural resources, or design.
- Construct a theoretical framework that addresses a particular opportunity or problem in agriculture, natural resources, or design and generalize that framework to aid in understanding similar opportunities or problems.
- Apply research skills to analyze agriculture, natural resources, or design opportunities or problems.
Arts and Sciences- Eberly College of

The Eberly College of Arts and Sciences, West Virginia University’s largest college, has approximately 460 faculty in academic departments and program areas in the following: literature and the humanities, social and behavioral sciences, and mathematics and natural sciences. These departments occupy twelve buildings on the Downtown campus and include programs that lead to master's degrees in twenty fields and doctoral degrees in twelve fields. Many of the faculty have earned distinguished national and international reputations and have been honored for excellence in teaching, research, and service. Their awards not only acknowledge extreme dedication but also accentuate the relationship between the faculty and students. Graduate students often collaborate with faculty on specialized research projects which lead to publications in national and international journals.

Degrees Offered

Graduate programs leading to a master’s degree are available in biology, chemistry, communication studies, english, world languages, forensic and investigative science, geography, geology, history, legal studies, liberal arts, mathematics, physics, psychology, public administration, social work, sociology and anthropology, and statistics. Each program prepares students for further study or for productive roles in professional environments. Information concerning graduate programs in the Eberly College of Arts and Sciences may be obtained by contacting the Graduate Records Assistant, Eberly College of Arts and Sciences, 201 Woodburn Hall, West Virginia University, P.O. Box 6286, Morgantown, WV 26505-6286; telephone (304) 293-4611.

- Master of Science, Doctor of Philosophy in Biology
- Master of Science, Doctor of Philosophy in Chemistry
- Master of Arts, Doctor of Philosophy in Communication Studies
- Master of Arts, Master of Fine Arts, Doctor of Philosophy in English
- Master of Arts in Foreign Languages
- Master of Science in Forensic Science
- Master of Arts, Doctor of Philosophy in Geography
- Master of Science, Doctor of Philosophy in Geology
- Master of Arts in History and Public History, Doctor of Philosophy in History
- Master of Legal Studies
- Master of Science, Doctor of Philosophy in Mathematics
- Master of Science, Doctor of Philosophy in Physics
- Master of Arts, Doctor of Philosophy in Political Science
- Master of Science, Doctor of Philosophy in Psychology
- Master of Public Administration
- Master of Social Work
- Master of Arts, Doctor of Philosophy in Sociology and Anthropology
- Master of Science in Statistics

The Eberly College of Arts and Sciences offers doctoral programs in biology, chemistry, communication studies, english, geography, geology, history, mathematics, physics, political science, psychology, sociology, and statistics. Available research or teaching concentrations are as follows:

- Biology—ecology and evolutionary biology, forensic biology, genetics and genome biology, and neurobiology and endocrinology
- Chemistry—analytical, biological, inorganic, organic, and physical
- Communication studies— instructional, interpersonal, and organizational
- English—literature
- Geography—human geography, environmental geography, geographic information science
- Geology—energy geology, geophysics, hydrogeology, environmental geology
- History—United States (Appalachia), Europe, Africa, science, and technology
- Mathematics—selected areas of pure, applied, and discrete mathematics
- Physics—condensed matter, applied physics, plasma physics, astrophysics, electro-optics, elementary particle physics, and radio astronomy
- Political science—public policy analysis (domestic and international)
- Psychology—behavior analysis, behavioral neuroscience, clinical psychology, clinical child psychology, and developmental psychology
- Sociology—crime, community, and culture
- Statistics—statistical machine learning, computational statistics, statistical theory
ADMINISTRATION

DEAN

• R. Gregory Dunaway - Ph.D.  
  University of Cincinnati

ASSOCIATE DEANS

• Joan S. Gorham - Ed.D. (Northern Illinois University)  
  Associate Dean for Academic Affairs
• Valerie Lastinger - Ph.D. (University of Georgia)  
  Associate Dean for Undergraduate Studies
• Asuntina S. Levelle - J.D. (West Virginia University)  
  Associate Dean for Financial Planning and Management
• Tracy L. Morris - Ph.D. (University of Mississippi)  
  Associate Dean for Research, Graduate Studies, and Outreach
• Michael Perone - Ph.D. (University of Wisconsin)  
  Associate Dean for Faculty

ASSISTANT DEAN

• Anna Justice - C.F.R.E.  
  Development
• Katie Stores - Ph.D. (West Virginia University)  
  Assistant Dean for Research

Degree Designation Learning Goals

MASTER OF ARTS (MA)

The Eberly College of Arts and Sciences offers numerous MA programs.

Students earning an MA degree will be able to:

• Describe the student’s discipline, field, sub-field, area, and subject.
• Proficiently communicate area and subject matter specific concepts orally and in writing.
• Explain the role of inquiry, research, and/or creativity in addressing questions, issues, problems, and/or opportunities pertaining to the student’s subject area.
• Construct a theoretical and/or creative framework that addresses a particular question, issue, problem, and/or opportunity pertaining to the student’s subject area and generalize that framework to aid in understanding similar questions, issues, problems, and/or opportunities.
• Apply research skills and/or creative abilities to analyze and/or explore the student’s subject area.
• Produce and defend original research and/or creative work in the student’s area of study.
• Discuss future research and/or creative work that might follow from the student’s project.
• Articulate the student’s contribution to his or her research and/or creative community.

MASTER OF LEGAL STUDIES (MLS)

The MLS program is designed for professionals practicing in areas such as human relations, criminal and juvenile justice, court administration (including probation officers), healthcare administration, social work, regulatory agencies, county and municipal government, law enforcement, national security, journalism, business – and for other professionals who work with, although not necessarily in, the legal system.

Students earning an MLS degree will be able to:

• Demonstrate an understanding of the United States legal system.
• Demonstrate an understanding of legal research practices.
• Demonstrate an understanding of the relationships between law and society.
• Demonstrate an understanding of the administrative legal process.
• Demonstrate an understanding of the legislative process at the local, state, and national levels.
• Demonstrate an understanding of alternative dispute resolution processes
• Demonstrate basic familiarity with family law, employment law, commerce law, criminal law and procedure, healthcare law, constitutional law, media and the law, and/or administrative ethics (depending on the student’s specific coursework).
• Produce a major research paper as part of the student’s capstone course.
• Apply program knowledge and skills to perform the student’s job more effectively, advance in the student’s current career field, and/or venture into other professional endeavors.
• Provide private and public organizations the benefit of enhanced knowledge about the United States legal system.

**MASTER OF SCIENCE (MS)**
The Eberly College of Arts and Sciences offers numerous MS programs.

Students earning an MS degree will be able to:

• Describe the student’s discipline, field, sub-field, area, and subject.
• Proficiently communicate area and subject matter specific concepts orally and in writing.
• Specify a focused research question based on description, explanation, interpretation, and/or prediction.
• Explain why the student’s research question, area, and/or topic is important and worthy of investigation.
• Synthesize a literature review discussing what is already known from other scholars about the student’s research question, area, or topic.
• Describe the gaps in existing knowledge and discuss the specific gap(s) the student’s research addresses.
• State the student’s theory or perspective and the hypothesis(es) or interpretation(s) that follow(s) from that theory or perspective.
• Specify the student’s research design including how hypotheses will be tested and how the usefulness of the theory or perspective will be assessed.
• Describe the units of analysis and data used – including all sources and data collection/compilation procedures.
• Describe the methodology(ies) used – and the appropriateness of those methods.
• Discuss the student’s findings – statistically (if appropriate for the methodology employed) and substantively (for all methodologies employed).
• Summarize primary conclusions and the student’s contribution to his or her research area, program, and community.

Discuss future research that might follow from the student’s project and findings.

**MASTER OF SOCIAL WORK (MSW)**

Students earning an MSW degree will be able to:

• Identify as a professional social worker
• Apply ethical principals
• Apply critical thinking
• Engage diversity in practice
• Advance human rights and social and economic justice
• Engage in research-informed practiced and practice-informed research
• Apply human behavior knowledge
• Engage in policy practice to advance well-being and deliver services
• Respond to practice contexts
• Demonstrate competency in practice engagement
• Demonstrate competency in practice assessment
• Demonstrate competency in practice intervention
• Demonstrate competency in practice evaluation

**DOCTOR OF PHILOSOPHY (PHD)**
The Eberly College of Arts and Sciences offers numerous doctoral programs.

Students earning a doctoral degree will be able to:

• Achieve all learning goals listed above under the MA or MS degree (depending on the student’s research or creative area)
• Effectively communicate, orally and in writing, the state of knowledge in the student’s discipline, field, sub-field, and specific research or creative area.
• Conduct independent and original research or creative work of publishable quality
• Teach, at any undergraduate level or beyond, core courses in the student’s discipline and field and specialized courses in the student’s sub-field and research or creative area.
• Write research manuscripts or creative work leading to refereed or juried publications.
Biology

Degrees Offered

- Master of Science
- Doctor of Philosophy

Nature of the Program

The Department of Biology’s graduate program is dedicated to scholarship in academics and research. The objectives of the program are to empower students through the following:

1. Recognize important biological problems
2. Design, execute, and analyze experiments aimed at solving important problems
3. Communicate their findings in oral and written form
4. Foster an awareness of the social and political issues of the day related to biology
5. Create a desire to continue independent study after graduation

The Department of Biology offers graduate courses and research that lead to M.S. and Ph.D. degrees in biology. The focal areas of research in the graduate program are: plant sciences, biochemistry and molecular biology, bioinformatics, genetics, genomics and evolutionary biology, biology education, cell and developmental biology, ecology, forensic biology, neuroanatomy and neurophysiology and behavioral neurobiology.

FACULTY

CHAIRPERSON

- Richard B. Thomas - Ph.D. (Clemson University)

PROFESSORS

- Jonathan R. Cumming - Ph.D. (Cornell University)
  Plant Physiology, Rhizosphere Ecology
- James B. McGraw - Ph.D. (Duke University)
  Plant Ecology, Plant Population Biology, Conservation Biology
- Richard B. Thomas - Ph.D. (Clemson University)
  Physiological Plant Ecology, Global Environmental Change
- Ashok Bidwai - Ph.D. (Utah State University)
  Biochemical and Molecular Genetic Analysis of Protein Kinases
- Stephen DiFazio - Ph.D. (Oregon State University)
  Plant Genomics, Ecological Genetics

ASSOCIATE PROFESSOR

- Michelle D. Withers - Ph.D. (University of Arizona)
  Biology Education: Scientific Teaching
- Rita V.M. Rio - Ph.D. (Yale University)
  Symbioses
- Clifton P. Bishop - Ph.D. (University of Virginia)
  Developmental and Molecular Biology of Drosophila
- Kevin C. Daly - Ph.D. (University of Arizona)
  Psychophysics and Neurophysiology of Manduca Sexta
- Sarah M. Farris - Ph.D. (University of Illinois)
  Nervous System Evolution and Development, Entomology
- William T. Peterjohn - Ph.D. (Duke University)
  Biogeochemistry, Ecosystem Ecology

ASSISTANT PROFESSOR

- Craig Barrett - PhD The Ohio State University
  Plant evolutionary Biology
- Sadie Bergeron - Ph.D. (University of Massachusetts - Amherst)
  Developmental Neuroscience
- Edward Brzostek - Ph.D. (Boston University)
Forest ecology, ecosystem modeling
• Andrew Dacks - Ph.D. (University of Arizona)
  Neural Basis of Behavior States, Nervous System Evolution
• Timothy Driscoll - Ph.D. (Virginia Tech)
  Bioinformatics, microbial metagenomics
• Jennifer Gallagher - Ph.D. (Yale University)
  Molecular Mechanisms of Genetic Variation
• Jennifer Hawkins - Ph.D. (Iowa State University)
  Plant Comparative Genomics, Molecular Evolution, Regulation of Gene Expression
• Gary Marsat - Ph.D. (McGill University)
  Sensory Processing of Communication Signals; Systems Neuroscience and Computational Neuroscience

CLINICAL ASSOCIATE PROFESSOR
• Donna Ford-Werntz - Ph.D. (Washington University, St. Louis)
  Plant Systematics

CLINICAL ASSISTANT PROFESSOR
• Zachariah Fowler - Ph.D (West Virginia University)
  Forest ecology

PREREQUISITES AND ADMISSION
The program for the degree of doctor of philosophy reflects a flexible, research-oriented approach geared to develop the interests, capabilities, and potentials of mature students. Applicants must have met all the entrance requirements listed above for the master of science program, but a fiftieth percentile ranking or higher in the verbal quantitative and analytical section of the Graduate Record Examination is expected. Acceptance into the Ph.D. program is by vote of the Graduate Committee of the Department of Biology. This committee ensures that all entrance requirements are met or that provisions have been made to remedy the deficiencies, and that facilities and personnel are adequate to support the program to a successful conclusion.

Master of Science
Students must have a program of study formulated and approved by an Advisory Committee at the end of the second semester of entering the M.S. program. The program of study outlines the coursework to be taken in support of the proposed research. The advisory committee ensures that all of the Department of Biology, Eberly College of Arts and Sciences, and University requirements are met during the course of the student’s program of study.

MAJOR REQUIREMENTS
Minimum GPA of 3.0 is required.

* Excludes BIOL 486, BIOL 490, BIOL 796, BIOL 797, BIOL 799

THESIS
All M.S. students must write and defend a thesis. A final oral examination is administered after an original, written thesis has been submitted to the Advisory Committee. Full-time students in the department are expected to complete all requirements for the program within four years. Regardless of status, all requirements for the M.S. degree must be completed within a period of eight years, starting with the initial enrollment after the most recent degree. For complete guidelines, please see the graduate student handbook at http://biology.wvu.edu/students/graduate-students/forms-and-policies.

Doctor of Philosophy
Each student admitted to the Ph.D. program works under the close supervision of a faculty research advisor and an advisory committee; details on the composition and establishment of an advisory committee are available in the department’s Graduate Student Handbook. Students must have a program
of study formulated and approved by the end of the second semester of entering the Ph.D. program; all deficiencies must have been removed earlier. Significant deviations from an established program of study require approval from the advisory committee and the Graduate Committee.

**MAJOR REQUIREMENTS**

Minimum GPA of 3.0 is required.

**EXAMINATIONS AND DISSERTATION PROPOSAL**

The advisory committee is responsible for overseeing the progress of the student and for administering and judging performance in the required examinations. The advisory committee ensures that all of the Department of Biology, Eberly College of Arts and Sciences, and University requirements are met during the course of the student’s program of study. The program of study outlines the coursework to be taken in support of the proposed research.

Students must successfully complete a preliminary exam with written and oral components before being promoted to candidacy for the Ph.D. The preliminary exam is given no later than the end of the third semester in residence. All doctoral students must also write and defend a research proposal (the proposal exam) no later than the end of the fourth semester in residence. For complete guidelines, see the graduate student handbook at http://biology.wvu.edu/students/graduate-students/forms-and-policies.

**CANDIDACY**

Successful passage of the preliminary examination leads to promotion to candidacy. Because the qualifying examination attests to the academic competence of the student who will become an independent researcher or practitioner, the examination cannot precede the conferring of the degree by an extended period. Consequently, doctoral candidates are allowed no more than five years in which to complete remaining degree requirements (http://catalog.wvu.edu/graduate/advisingcoursesdegrees/#Doctoral_Coursework). The expected time to completion of the Ph.D. degree is four-five years; however, all requirements for a graduate degree must be completed within a period of eight years, starting with the initial enrollment after the most recent degree. The final examination consists of the submission of a completed and acceptable written dissertation and an oral dissertation defense. A formal departmental seminar covering the dissertation research must be presented before graduation.

**Major Learning Goals**

**BIOLOGY**

The graduate programs in the Department of Biology provide rigorous training in several fields of biology. The central mission of our graduate program is to train the next generation of Biologists for careers in the field, laboratory and several other professional settings that rely on deep expertise in the biological sciences.

Students earning a M.S. or Ph.D. in Biology will be able to:

- Explain general biological principles as well as those specific to their research sub-discipline.
- Comprehend and critically evaluate literature published within their field.
- Independently design and execute experiments and provide quality data, analysis and interpretation, critical to progress in their research area.
- Effectively communicate their research in oral and written formats, including the ability to author manuscripts suitable for publication in peer reviewed scientific journals.
- Understand the role of ethics in personal and professional behavior.
- Learn and apply best laboratory practices (i.e. proper laboratory safety procedures and experimental protocols).
Chemistry

Degrees Offered

- Master of Science
- Doctor of Philosophy

Nature of the Program

The Department of Chemistry offers graduate studies leading to the degrees of master of science and doctor of philosophy with research concentration in the areas of analytical, biological, inorganic, organic, and physical chemistry. The master of science and doctor of philosophy degrees require completion of a research project which represents the principal component of the graduate program. The M.S. program is limited in scope and involves advanced coursework and a study of a problem in chemical research culminating in the preparation and oral defense of a M.S. thesis.

The Ph.D. program has a much wider scope than the M.S. program. Ph.D. students are expected to take a broad range of advanced coursework, both within and outside of the major area of interest. The major emphasis of the Ph.D. program is on research. A typical research problem may take several years to complete and involves many advanced techniques and concepts at the frontiers of chemical knowledge. The Ph.D. program culminates in the preparation and defense of the Ph.D. dissertation.

The program for the degree of doctor of philosophy reflects a flexible, research-oriented approach geared to develop the interests, capability, and potential of students. A program of courses is recommended to suit individual needs based on background and ability. These courses are classified as basic graduate courses, which present the essentials of a given discipline on an advanced level, and specialized graduate courses, which take one to the frontiers in a specific area of research. The course offerings are designed to provide guidelines from which students can launch their independent studies in preparation for candidacy examinations. Students are required to enroll in the departmental seminar program and attend special lectures and seminars offered by visiting scientists. Graduate students in the Ph.D. program are required to satisfactorily complete a minimum of three courses (three credits each) at the 500 to 700-level offered by the Department of Chemistry and distributed in at least two areas outside their major area of research. In addition, each major area in chemistry requires students in that area to enroll in basic graduate courses presenting the essentials of that discipline on an advanced level.

FACULTY

CHAIR
- Gregory Dudley - Ph.D. (Massachusetts Institute of Technology)
  Eberly Family Distinguished Professor, Chemical Synthesis, Organic Reaction Methodology, Medicinal Chemistry

ASSOCIATE CHAIR
- Jeffrey L. Petersen - Ph.D. (University of Wisconsin-Madison)
  Physical Inorganic Chemistry, Electrophillic Transition Metal Complexes, X-ray Crystallography

PROFESSORS
- Harry O. Finklea - Ph.D. (California Institute of Technology)
  Analytical/Physical Chemistry, Electron Transfer Kinetics, Solid Oxide Fuel Cells, Gas Phase Sensors
- Terry Gullion - Ph.D. (William and Mary)
  Physical Chemistry, Solid State NMR, Biological Materials, Polymers
- Lisa Holland - Ph.D. (University of North Carolina-Chapel Hill)
  Micro-separations, High Throughput Drug Screening
- Charles Jaffe - Ph.D. (University of Colorado)
  Theoretical Chemistry, Molecular Dynamics, Chaotic Systems
- Fred L. King - Ph.D. (University of Virginia)
  Analytical Chemistry, Mass Spectrometry, Trace Elements, Gas-phase Chemistry
- John H. Penn - Ph.D. (University of Wisconsin-Madison)
  Chemical Education, Online Instruction Methods in Organic Chemistry
- Kenneth Showalter - Ph.D. (University of Colorado)
  Bennett Distinguished Professor, Physical Chemistry, Chemical Kinetics, Multistability and Oscillating Systems
- Bjorn C. Soderberg - Ph.D. (Royal Institute of Technology, Sweden)
  Organic Synthesis Using Transition Metals
- Kung K. Wang - Ph.D. (Purdue University)
  Eberly Distinguished Professor of Chemistry, Organic Chemistry, Stereoselective Synthesis, Natural Products

ASSOCIATE PROFESSOR
- Suzanne Bell - Ph.D. (New Mexico State University)
Analytical Chemistry, Forensic Science
• Jonathan Boyd - Ph.D. (Texas Tech University)  
  Analytical Biochemistry and Toxicology
• Justin Legleiter - Ph.D. (Carnegie Mellon University)  
  Biophysical Chemistry, Scanning Probe Microscopy
• Michelle Richards-Babb - Ph.D. (Lehigh University)  
  Chemical Education
• Alan M. Stolzenberg - Ph.D. (Stanford University)  
  Inorganic Chemistry, Bioinorganic Chemistry, Organometallic Chemistry

ASSISTANT PROFESSOR
• Fabien Goulay - Ph.D. (University of Rennes, France)  
  Physical Chemistry, Laser Spectroscopy
• Jessica Hoover - Ph.D. (University of Washington)  
  Organometallic Chemistry, Catalysis
• Peng Li - Ph.D. (Texas Tech University)  
  Bioanalytical Chemistry
• Blake Mertz - Ph.D. (Iowa State University)  
  Computational Biophysics and Chemistry
• Carsten Milsmann - Ph.D. (Max-Planck-Institute for Bioinorganic Chemistry)  
  Inorganic and Organometallic Chemistry
• Brian Popp - Ph.D. (University of Wisconsin-Madison)  
  Organic and Organometallic Chemistry, Catalysis
• Stephen Valentine - Ph.D. (Indiana University)  
  Mass Spectrometric Analysis of Biomolecules

Admission
Applicants for graduate studies in chemistry must have a bachelor’s degree as a minimum requirement. Applicants must have a major or concentration in chemistry and an appropriate background in physics and mathematics. All entering graduate students in chemistry are required to take departmental guidance examinations in the major areas of chemistry. These examinations, at the undergraduate level, are administered before registration and serve to guide the faculty in recommending a course program for the beginning graduate student. Deficiencies revealed by the departmental guidance examinations need to be corrected in a manner prescribed by the faculty.

Master of Science
A research project is chosen in the area of the student’s interest and in consultation with the faculty. The thesis defense shows the ability of the student to defend scientific conclusions based on their research project.

MAJOR REQUIREMENTS
Minimum GPA of 3.0 is required.

Thesis/Credits
Graduate students in the M.S. program in chemistry are required to submit a research thesis. They may apply up to 6 hours of research credit toward the 30-hour requirement. The remaining 24 hours of credit must be earned in the basic graduate courses which reflect a diversified exposure to chemistry; no more than 10 hours may be elected outside the department, and coursework taken at the 500 to 700-level must include at least three 3-credit-hour courses distributed in at least two areas outside the student’s major area of research. Students are required to enroll in the departmental seminar program and are required to attend special lectures and seminars offered by visiting scientists. A final oral examination is administered after completion and submission of the thesis.
Doctor of Philosophy

Students are required to enroll in the departmental seminar program and attend special lectures and seminars offered by visiting scientists. In addition, each major area in chemistry requires students in that area to enroll in basic graduate courses presenting the essentials of that discipline on an advanced level.

MAJOR REQUIREMENTS

* Graduate students in the Ph.D. program are required to satisfactorily complete a minimum of three courses (three credits each) at the 500 to 700-level offered by the Department of Chemistry and distributed in at least two areas outside their major area of research.

Research

Research, which is the major theme of graduate studies, may be initiated as early as the student and faculty feel appropriate for the individual. Normally, a student will begin laboratory work no later than the second semester. Upon successful completion of an original piece of research, the candidate will present results in a Ph.D. dissertation and, at the appropriate time, defend the work in a final oral examination.

Candidacy

Candidacy examinations contain written and oral portions. The written examinations are of the cumulative type and are offered eight times a year. After notification of successful completion of the written cumulative exams, the student will present and defend an original research proposal. The proposal must demonstrate originality and independence on the part of the student. This proposal is presented in writing to the student’s research committee and defended before that group and any other interested faculty members.

Major Learning Goals

CHEMISTRY

The graduate programs in the C. Eugene Bennett Department of Chemistry provide rigorous training in chemistry. The central mission of the Graduate Program is to train the next generation of Chemists for productive careers in the global economy.

Students earning a M.S. or Ph.D. in Chemistry will be able to:

- Explain chemical principles as they pertain to their specific field of research.
- Demonstrate the ability to understand and critically evaluate the existing literature published within their field.
- Independently design and execute new chemical experiments that can address important scientific questions.
- Understand and apply good laboratory practices (chemical hygiene, personal protective wear, etc.) and the proper handling of chemical waste streams.
- Generate quality data using a variety of experimental and/or computational techniques.
- Interpret the meaning and implication of their data.
- Effectively communicate their research in oral and written formats, including the ability to author manuscripts suitable for publication in peer reviewed scientific journals.
- Understand the ethical impact of personal and professional behavior.
Communication Studies

Degrees Offered

- Master of Arts
- Doctor of Philosophy

Nature of Program

The Department of Communication Studies offers the M.A. and the Ph.D. degrees in Communication Studies. Communication scholars seek to discover the mechanisms and rules that govern the wide range of communication activities using a battery of social scientific techniques. We try to develop theories that will account for why we act the way we do. The graduate faculty in the Department of Communication Studies is well-known at the regional, national, and international level for accomplishments in research, teaching, and service.

The Department of Communication Studies offers work leading to the degree of master of arts. Persons who possess a bachelor’s degree from an accredited college or university may be admitted to the program. Qualified graduate students from a variety of disciplines are admitted to the program. The master of arts degree program is intended to qualify the student to do the following:

- Assume a variety of professional roles in educational, organizational, health, governmental, or media institutions
- Teach the subject matter in high school and/or college
- Undertake advanced training toward a doctorate in the behavioral/social sciences

The M.A. in Communication Studies offers three areas of emphasis:

COMMUNICATIONS THEORY & RESEARCH AREA OF EMPHASIS

All students planning to continue graduate study past the M.A. level are encouraged to enter this program.

CORPORATE & ORGANIZATIONAL COMMUNICATION AREA OF EMPHASIS

All students planning a professional career in a field other than education are encouraged to enter this program. This is normally a terminal degree program in communication studies.

COMMUNICATION IN INSTRUCTION AREA OF EMPHASIS

All students planning a professional career in elementary or secondary education are encouraged to enter this program. This is normally a terminal degree program in communication studies. Students may complete this program through off-campus study, on-campus study, or a combination.

The Ph.D. program in Communication Studies is one that affords students the opportunity to focus on numerous domains of communication, including instructional communication, interpersonal communication, health communication, and mediated communication, among others.

FACULTY

CHAIR

- Matthew M. Martin - Ph.D. (Kent State University)

PROFESSORS

- Melanie Booth-Butterfield - Ph.D. (University of Missouri)
  McConnell Chair in Speech Communication, Health and Interpersonal Communication
- Joan S. Gorham - Ph.D. (Northern Illinois University)
  Associate Dean, Instructional, Intercultural, and Mass Media
- Matthew M. Martin - Ph.D. (Kent State University)
  Chairperson, Interpersonal, Instructional, Communication Traits
- Scott A. Myers - Ph.D. (Kent State University)
  Group, Instructional, Interpersonal
- Keith Weber - Ed.D. (West Virginia University)
  Communication Campaigns, Quantitative Methods, Instructional Communication

ASSOCIATE PROFESSOR

- Megan Dillow - Ph.D. (Pennsylvania State University)
  Interpersonal Communication, Communication Theory, Relational Communication
- Alan Goodboy - Ph.D. (West Virginia University)
Instructional Communication, Interpersonal Communication, Quantitative Methods

- Brian R. Patterson - Ph.D. (University of Oklahoma)
  Developmental Communications, Communication Theory
- Andrea Weber - Ed.D. (West Virginia University)
  Communication Assessment, Leadership, Communication Ethics

ASSISTANT PROFESSOR

- Jaime Banks - Ph.D. (Colorado State University)
  Communication Technology, Human Identity, Social Network Analysis
- Nicholas Bowman - Ph.D. (Michigan State University)
  Communication Technology, Media Psychology, Mass Communication, Media Effects, Entertainment and Emotion
- Elizabeth Cohen - Ph.D. (Georgia State University)
  Media Psychology, Entertainment Education, New Media, Health and Risk Communication
- Christy Rittenour - Ph.D. (University of Nebraska)
  Family, Life-span, Interpersonal

PROFESSOR EMERITA

- Virginia P. Richmond - Ph.D. (University of Nebraska)

APPLYING FOR ADMISSION TO THE PROGRAM

To apply for admission to the Ph.D. program, applicants must submit the following materials:

1. The application for admission to graduate school at West Virginia University.

2. Scores on the Graduate Record Examination (GRE). Applicants should have a minimum combined score in the 290-310 range on the verbal and quantitative components of the GRE and a minimum score of 4.0 on the analytical component of the GRE. Scores should not be older than five years at the time of application.

3. Scores on the Test of English as a Foreign Language Examination (TOEFL) (for international students only whose native language is not English). Scores will be accepted from any of three versions (i.e., internet-based test, computer-based test, paper-based test). Applicants should score in the ninetieth percentile of the test version taken.

4. All official undergraduate and graduate transcripts. Transcripts must be mailed directly from the registrar of the college and/or university attended. Applicants should have a minimum undergraduate GPA of 3.00 and a minimum graduate GPA of 3.30.

5. A vita. The vita should include all formal education, any teaching or professional work experience, and any research projects conducted to date.

6. A statement of interest. The statement of interest is a three to four-page, typed document in which applicants identify the following:
   - their reasons for pursuing a Ph.D. in communication studies
   - their reasons for wanting to attain their Ph.D. degree in communication studies at West Virginia University
   - their research interests and how these interests correspond with the research conducted by the department faculty
   - the faculty members whose research interests are most closely aligned with their own educational and career goals
   - why attaining the Ph.D. degree in communication studies specifically from West Virginia University is vital to the achievement of their career goals

7. Three letters of recommendation from individuals familiar with the applicant’s academic progress and potential. These letters of recommendation should address whether the applicant has the ability to succeed in the Ph.D. program in communication studies at West Virginia University as both a Ph.D. student and as a graduate teaching assistant.

8. A sole-authored sample of scholarly writing completed in the applicant’s M.A. program. This sample can be a course paper, a convention paper, a thesis or major project, or a journal article.

9. Any additional supporting evidence. This evidence can include, but is not limited to, awards received for outstanding research, teaching, or academic endeavors; a convention paper or journal article of which the applicant is a co-author; a newspaper or magazine article, or teaching evaluations.

The transcripts, vita, statement of interest, recommendation letters, scholarly writing example, and supporting evidence should be mailed directly to:

Students who receive more than six credit hours of Cs may not be permitted to remain in the program.

**COMPREHENSIVE EXAMINATIONS/DISSertation**

Upon admission to the program, students are advised by the Ph.D Graduate Studies coordinator. Working with the coordinator, students devise their schedule for their first year. During the second semester, in conjunction with the coordinator, students select an advisor. This advisor serves as the chair of each student’s comprehensive examination and dissertation committees. Working with their advisor, students then select four other committee members, at least one of which, but no more than two, must be graduate faculty members external to the Department of Communication Studies.

Upon completion of the thirty-nine hours of coursework, students take a comprehensive examination. The comprehensive examination consists of three sections on which students will be tested on the primary and secondary areas of communication emphasis and research methods. The written examination will be followed by an oral examination approximately two weeks later.

Once the written and oral comprehensive examinations have been successfully defended (as determined by the committee), students write a dissertation proposal and submit the proposal to their committee. Once the proposal has been approved, students write and defend their dissertation. The dissertation defense is open to the public.

**Major Learning Goals**

**COMMUNICATION STUDIES**

Students earning a M.A. or Ph.D. in Communication Studies will be able to:

1. Demonstrate the ability to understand and critically evaluate research in communication studies
2. Design and execute empirical research in communication studies
3. Communicate their research in oral and written formats, including the ability to author manuscripts suitable for conference presentation and professional publication
4. Demonstrate expert knowledge in their area of emphasis
5. Present and argue the historical, philosophical, and theoretical issues in communication studies
6. Understand the ethical impact of personal and professional behavior

**English**

**Degrees Offered**

- Master of Arts
- Master of Arts in Professional Writing and Editing
- Master of Fine Arts
- Doctor of Philosophy

**MASTER OF ARTS**

The Master of Arts (M.A.) in English is a two-year program designed for students who have shown an aptitude for sustained literary study and who desire to pursue a more intensive and extensive academic training. The M.A. program has five primary goals: (1) to extend the student’s knowledge of the cultural, linguistic, and literary heritage of Great Britain, America, and other English-speaking lands, (2) to introduce students to the critical and professional discourses of academics in literary and linguistic studies, (3) to develop the student’s research, writing, and analytical skills, which are necessary for professional success, (4) to provide professional training to prepare students to teach English at the post-secondary level, and (5) to counsel students to craft their program of study to meet their professional and personal needs.

The M.A. program meets these goals by providing a rotation of courses in literature, linguistics, theory, and pedagogy that require extensive reading, writing, research, and oral presentations. With small classes, students receive individual attention from the faculty, which facilitates student progress. M.A. students are eligible for teaching assistantships within the English Department, which provides training in pedagogy.

The knowledge and skills that students acquire in the M.A. program provide the requisite foundation to pursue doctoral work in English, with the ultimate goal of becoming a professional scholar and academic at a post-secondary institution. The academic training provided by the M.A. also is applicable for careers in secondary education, professional writing, and editing.

**MASTER OF ARTS IN PROFESSIONAL WRITING AND EDITING**

The M.A. in Professional Writing and Editing is a thirty-hour degree that combines theories of writing with practice in real-world writing situations. Students will study professional writing theory, the history of rhetoric, editing, rhetorical analysis, new modes of digital composition, and writing ethics. This degree prepares students for a variety of career options, including technical writing and editing, project management, writing consulting, writing
instruction, and advanced graduate study in rhetoric and composition. The degree is designed for both newly-graduated undergraduates and working adults who want more training in writing and editing.

MASTER OF FINE ARTS
The Master of Fine Arts in creative writing is a three-year academic/studio program that combines an apprenticeship to the craft with more traditionally academic elements. This approach seeks to train students in ways that reflect the realities of the writer/artist’s evolving role in the academy. Because writers, when hired to teach, are often asked to handle a variety of courses beyond the creative writing workshop, the academic/studio format requires students to take literature and pedagogy courses in addition to writing workshops.

Thus, the M.F.A. is both an academic and a professional degree. As part of WVU’s comprehensive Center for Writing Excellence, this degree allows students to prepare for careers in teaching or professional writing/editing. Our objective is to nurture and mentor the many writers in the region seeking professional training. We also intend to attract student writers from all over the country to West Virginia for the opportunity to live and write in this culturally-rich state and to work with our faculty. The ultimate goal is to produce writers who will publish literature and contribute to the culture. A secondary goal is to offer practical skills and opportunities to writers interested in pursuing writing-related professions.

DOCTOR OF PHILOSOPHY
The doctoral program in English offers opportunities for specialization in literary studies, cultural studies, or composition and rhetoric. The program has five goals: (1) to build upon the broad foundations of the M.A. degree’s focus on the cultural, linguistic, and literary heritage of Britain, America, and other English-speaking lands, (2) to help students to develop fluency in the critical discourses of the profession, (3) to help students to develop professional competency in three fields of research, as dictated by the Examination for Formal Admission to Candidacy, (4) to help students to develop the research, writing, and analytical skills necessary for professional success, and (5) to provide professional training and counseling to prepare graduates to teach English professionally on the post-secondary level.

These goals are met by the various features of our program, which include coursework, examinations, and both formal and informal instruction and advising regarding professional teaching and research responsibilities. Doctoral study culminates in the writing of the dissertation, which is designed to contribute to the critical and/or theoretical discussion in its field and to prepare the doctoral candidate for further research and publication as a professional scholar and teacher.

• Carolyn Nelson
• Kevin Oderman
• Ethel Morgan Smith

Admissions

MA IN ENGLISH

To be admitted to the Department of English as prospective candidates for the degree of master of arts, students are expected to have completed work comparable to the department’s undergraduate requirement for English majors (but with records distinctly above the average), and to present as part of their applications their scores on the verbal and analytic sections of the Graduate Record Examination General Aptitude Test and, if non-native speakers of English, their TOEFL scores. Past experience has shown that successful graduate students usually score at least the sixtieth percentile on the verbal section of the GRE. Students also must provide three letters of reference and a sample of their academic writing.

PROFESSIONAL WRITING AND EDITING

Prospective candidates for admission are expected to have completed an undergraduate degree in English or an allied field with a record distinctly above average or to have at least two years’ work experience in writing and editing. Applications must be supported by a portfolio of written work and three letters of recommendation. The GRE analytical writing test, taken within the last five years, is recommended; successful candidates will typically present a score of five or above. The program recognizes, however, that not all potentially excellent graduate students fit this profile and welcomes applications from individuals who can make a strong case that they will succeed. Non-native English speakers must present TOEFL scores of at least 600 for the written exam or equivalent scores for the online version.

CREATIVE WRITING

Prospective candidates for the degree of master of fine arts are normally expected to have completed a bachelor’s degree in English. Admission to the program is based primarily on the excellence of a substantial writing sample in fiction, nonfiction, or poetry (ten to twenty pages of poetry; twenty to thirty pages of prose). Also required are Graduate Record Examination scores, three letters of recommendation, and a personal statement. Non-native speakers of English must present TOEFL scores. Past experience has shown that successful graduate students usually score above the sixtieth percentile on the verbal section of the GRE.

PHD IN ENGLISH

Applicants for admission to the program will be judged on the bases of academic record, three recommendations from former teachers, a statement of purpose outlining their academic and professional goals, a sample of their academic writing, and Graduate Record Examination General Aptitude Test scores. Non-native speakers of English must also present their TOEFL scores.

**Coursework or Thesis Option:** 6
- 600 or 700-level seminars
- ENGL 698 Thesis or Dissertation

**Seminar Requirement (700 level courses excluding ENGL 790):** 6

**Foreign Language Requirement**

- The foreign language requirement for the M.A. is satisfied by successfully completing (receiving an A or B in the last course) a second-year level of foreign language study at an accredited college or university (or its international equivalent) within the last five years or by passing (with a B or better) the examination administered by the Department of Foreign Languages for “credit by exam” for the fourth semester course of a language sequence. Exams are available in French, German, Spanish, or Latin.

**Master of Arts in Professional Writing and Editing**

**MAJOR REQUIREMENTS**

<tbody>
<tr>
<td>ENGL 601</td>
<td>Studies in Composition and Rhetoric</td>
</tr>
</tbody>
</table>
ENGL 602  Editing  3
ENGL 605  Professional Writing Theory  3
ENGL 609  College Composition Pedagogy  3
Internship or Thesis Option:  3-6
  ENGL 610  Professional Writing Internship
  ENGL 698  Thesis or Dissertation
Professional Writing and Editing 600-level electives  6
General Distribution English coursework  9
Language Requirement
Total Hours  30-33

* Students who do not hold an assistantship will substitute three additional hours of electives.

Professional Writing and Editing Electives
In consultation with the advisor, students will individualize their plan of study by choosing two 600-level courses that develop a specific focus within the general field of professional writing and editing. Students must work with an advisor to file an approved plan of study by the end of their first semester of study.

General Distribution
Students must complete nine–twelve hours of general English studies. Courses will include literature, writing, and/or linguistics courses offered by the Department of English and chosen in consultation with the advisor. General distribution hours may often include requirements dictated by graduate teaching status, prior coursework, and departmental guidelines. Students may not use the same course(s) to fulfill the general distribution and professional writing electives requirements.

Practical Experience
Students must choose one of the following two summative experiences: ENGL 610 (three hours) or ENGL 698 (six hours). The directed study option is a workplace internship.

Language Requirement
The M.A. in PWE requires that students demonstrate proficiency in foreign language, statistics, or computer programming in one of following ways:

• Completing a 204 (Intermediate II) or 200 (Intensive Intermediate) language course in a modern foreign language with a grade of B or above or completion of the Graduate Student Foreign Language Exam administered by the Department of World Languages, Literatures, and Linguistics
• Earning a B or above in the second-year level of foreign language study at an accredited college or university (or its international equivalent) within the last five years
• Participating in a University-approved study abroad program of four or more weeks in a non-English-speaking host country will also fulfill the language requirement if, as part of the experience, students are required to study the language and culture of the host country. As part of the study abroad program, students must enroll in at least one three-credit-hour course and earn a grade of B or above.
• Completing STAT 201 Applied Statistical Modeling with a grade of B or above
• Completing CS 110 Introduction to Computer Science and its accompanying one credit hour lab with a grade of B or above

A student should state in the plan of study the means by which he or she plans to satisfy the language requirement.

Master of Fine Arts
MAJOR REQUIREMENTS
Minimum grade of B- is required in all courses applied toward degree.

Creative Writing Workshops:  15
  ENGL 618  Graduate Writing Workshop: Poetry
  ENGL 618A  Graduate Writing Workshop: Fiction
  ENGL 618B  Graduate Writing Workshop: Non-Fiction
Pedagogy Requirement  3
  ENGL 609  College Composition Pedagogy
  ENGL 688  Creative Writing Mentoring
Non Creative Writing English Courses  12
  ENGL 698  Thesis or Dissertation
Thesis  9
  * Students who do not hold an assistantship will substitute three additional hours of electives.
Electives  6
Book-length Manuscript  ***

Thesis Defense

Total Hours  45

‡ Students must complete fifteen hours of creative writing workshops with three hours outside of the student’s primary genre.

* Any courses at the 500 or 600 or 700 level, except ENGL 611, ENGL 618, or ENGL 618A, or ENGL 618B, or ENGL 688, or ENGL 689, or ENGL 698, or ENGL 790.

** Any courses at the 500 or 600 or 700 level, except ENGL 689, or ENGL 698, or ENGL 790.

*** The student is required to submit a book-length manuscript (ideally 48 pages in poetry, 150 pages in fiction or nonfiction) suitable for publication on its own, that has been approved by a thesis advisor and two additional thesis committee members. Final approval is granted following an oral defense of the thesis.

Doctor of Philosophy

During the second year in residence, students must submit for approval a portfolio of academic work.

MAJOR REQUIREMENTS

English Coursework *

ENGL 609 College Composition Pedagogy
ENGL 680 Introduction to Literary Research
ENGL 782 Current Directions in Literary Study
6 hours of 700-level seminars

Teaching Practicum **

ENGL 790 Teaching Practicum

Foreign Language Requirement

Dissertation Credit

ENGL 798 Thesis or Dissertation

Portofolio

Dissertation Proposal

Dissertation

Dissertation Defense

Total Hours  30

* Students may take up to twelve hours of coursework in another department, subject to the approval of the Graduate Program Committee.

** Students are required to teach one 3-hour composition course and one three-hour literature course while in residence and to register concurrently for ENGL 790; this requirement may be waived pending departmental approval for candidates who have substantial prior teaching experience. ENGL 790 does not count toward the 30 required hours of coursework.

FOREIGN LANGUAGE REQUIREMENT

The foreign language requirement is the same as for the M.A. program and must be completed prior to taking the examination for formal admission to candidacy.

DOCTORAL DISSERTATION

After completing coursework, passing the examination for formal admission to candidacy, and fulfilling the language and teaching requirements, the student, under the direction of the dissertation committee chairperson, writes a prospectus of the final project. The prospectus must be approved by the dissertation committee. The dissertation, meant to be an original contribution to scholarship in its field, should be able to be completed in one year. The final examination (oral defense of the dissertation) is open to the public.

Major Learning Goals

ENGLISH

PhD in Literature

The doctoral program in English has five goals: (1) to build upon the broad foundations of the M.A. degree’s focus on the cultural, linguistic, and literary heritage of Britain, America, and other English-speaking lands; (2) to help students to develop fluency in the critical discourses of the profession; (3) to help students to develop professional competency in three fields of research, as dictated by the Examination for Formal Admission to Candidacy; (4)
to help students to develop the research, writing, and analytical skills necessary for professional success; and (5) to provide professional training and
counseling to prepare graduates to teach English professionally on the post-secondary level.

These goals are met by the various features of our program, which include course work, examinations, and both formal and informal instruction and
advising regarding professional teaching and research responsibilities. Doctoral study culminates in the writing of the dissertation, which is designed
to contribute to the critical and/or theoretical discussion in its field and to prepare the doctoral candidate for further research and publication as a
professional scholar and teacher.

MA in Literature

The Master of Arts (M.A.) degree in English is designed for students who have shown an aptitude for sustained literary study, and who desire to
pursue a more intensive and extensive academic training. The two-year M.A. program has five primary goals: (1) to extend the student’s knowledge
of the cultural, linguistic, and literary heritage of Great Britain, America, and other English-speaking lands; (2) to introduce students to the critical and
professional discourses of academics in literary and linguistic studies; (3) to develop the student’s research, writing, and analytical skills, which are
necessary for professional success; (4) to provide professional training to prepare students to teach English at the post-secondary level; and (5) to
counsel students to craft their program of study to meet their professional and personal needs.

The M.A. program meets these goals by providing a rotation of courses in literature, linguistics, theory, and pedagogy that require extensive reading,
writing, research, and oral presentations. With small classes, students receive individual attention from the faculty, which facilitates student progress.
M.A. students are eligible for teaching assistantships within the English Department, which provide training in pedagogy.

MA in Professional Writing and Editing

The learning outcomes for the M.A. in PWE reflect the program’s mixture of theory and practice:

1. Recognize and evaluate a variety of ethical, social, legal, and political values intertwined in the production and consumption of technical
communications.
2. Analyze the uses and applications of new communication technologies.
3. Acquire historical and critical understanding of rhetorical theories and practices.
4. Master a variety of research and analytical methods, especially as these apply to the study and practical application of oral, written, and visual
communication in professional contexts.
5. Acquire a practical and theoretical understanding of workplace dynamics including client relations and project management skills.

MFA in Creative Writing

The Master of Fine Arts in Creative Writing emphasizes the following as goals and outcomes for students graduating from the program:

1. The mastery of a specific literary tradition relevant to the student's genre and craft;
2. The mastery of the revision process;
3. The clear articulation of aesthetic principles;
4. A solid familiarity with genres other than the student's principal genre;
5. A firm understanding of the writing profession.

Forensic and Investigative Science

Degrees Offered

- Master of Science
- Doctor of Philosophy

M.S. FORENSIC AND INVESTIGATIVE SCIENCE

The M.S. degree is accredited by the Forensic Science Education Programs Accreditation Commission (FEPAC) and is rigorous, quantitative and
science-based.

The degree is unique in that it shares aspects of a professional education degree, such as an MBA, while retaining a very strong research component.
Students are required to complete a minimum of 40 credit hours. The coursework is comprised of a core of advanced chemistry and biology courses and
complemented with additional laboratory-based instruction in microscopy, analytical chemistry, impression evidence and other specialty courses such as
trace evidence, pattern evidence, DNA analysis, forensic chemistry, and laboratory management.

An independent research project/thesis under the supervision of a faculty member is required. The learning and research environments are supported by
state-of-the-art instrumentation and laboratory facilities.
This degree recognizes that future forensic scientists will need even greater education and training to work in national and state forensic laboratories.

All students should identify a faculty mentor and a research topic as soon as possible. In order to register for FIS 697 Research, the student must have successfully completed his or her thesis proposal defense.

Each student is responsible for ensuring that, with the assistance of the Coordinator of Graduate Studies, his or her committee is correctly constituted. Upon successful completion of the research, the candidate will present his or her results in a thesis and at the appropriate time defend the work in a final oral examination according to the rules of the College or University.

**PH.D. FORENSIC SCIENCE**

The objective of the Ph.D. program in Forensic Science is to prepare students to work as professionals in academia, government laboratories, and private industry as laboratory specialists. Through a core of advanced course work and a requisite independently executed research project, the program is designed to provide students with the skills needed to critically assess the current state of knowledge within the field, and to solve complex problems at the frontier of the discipline.

The program is strongly science-based and prepares students to work across the foundations of criminalistics; students learn the underpinnings of the discipline, research design, quantitative methods, statistical analysis, and communication skills such as scientific writing and presenting. Since students may enter the program with a wide array of backgrounds, Ph.D. candidates typically enroll in a common core of advanced forensic science courses, followed by additional courses as deemed necessary by their dissertation committees.

The program for the Ph.D. degree reflects a combination of prescriptive course work as well as a flexible, research-oriented approach geared to develop the interests, capability, and potential of the student. In addition to the curriculum for the MS degree, doctoral students are required to take three additional core courses and two colloquium courses. These courses present the essentials of a given discipline on an advanced level and expose the student to the frontiers in a specific area of research. The course offerings are designed to provide guidelines from which students can launch their independent research projects. Ph.D. students are required to enroll and participate in the departmental seminar program for at least six semesters. By doing so, it is anticipated that they will serve as role models for the graduate students in the M.S. program.

**FACULTY**

**CHAIR**

- Luis Arroyo - Ph.D. (Florida International University)  
  Toxicology, Environmental Forensics
- Tina Moroose - M.S. (Marshall University)  
  Graduate Studies Coordinator, Forensic Biology, Quality Assurance
- Robert O'Brien - M.S. (St. Joseph's University)  
  Blood Stain Analysis, Crime Scene Analysis, Trace Evidence Analysis
- Jacqueline Speir - Ph.D. (Rochester Institute of Technology)  
  Informatics
- Tatiana Trejos - Ph.D. (Florida International University)  
  Trace Evidence, Forensic Chemistry

**CLINICAL ASSISTANT PROFESSOR**

- Casper Venter - M.S. (Northwest University)  
  Director, Forensic Facilities, Controlled Substances, Toxicology

**CLINICAL INSTRUCTOR**

- Kelly Ayers - M.S. (West Virginia University)  
  Director, Forensic Science Academy for Professionals, Forensic Photography, Crime Scene Analysis
TEACHING INSTRUCTOR

- Robin Bowen - M.S. (West Virginia University)
  Ethics

- Rachel Mohr - Ph.D. (Texas A&M University)
  Forensic Entomology

Admission Requirements

Master of Science Program

- A bachelor’s degree in natural science, forensic science, or equivalent which includes at least one year of the following courses:
  1. Fundamentals of Chemistry (inclusive of laboratories),
  2. Organic Chemistry (inclusive of laboratories),
  3. Biology (inclusive of laboratories),
  4. Physics (inclusive of laboratories), and
  5. Calculus

- On-line graduate application
- Departmental Application
- Official transcripts from all institutions of higher education attended
- GRE taken within the last five years with a score of 300 or better.
- GPA of 3.0 or better on a 4.0 scale
- Department specific writing sample or published article
- Two letters of recommendation from persons who can address potential for success in graduate study and research

Upon receipt and evaluation of the application package, suitable candidates will be invited for a final interview with the graduate committee.

Applications will be accepted throughout the year on a rolling basis.

If the upcoming class is not filled by the fall or spring semester, we may entertain other applicants for admission to the MS program.

Doctor of Philosophy Program

- MS Degree from accredited college or university (research-based)
- On-line graduate application
- GPA of 3.0 or better on a 4.0 scale
- Eight MS Program courses or equivalent with a grade of C or better
- Research writing example: (1) peer-reviewed publication where the student is the lead author, (2) thesis research converted to a publication-ready document - note that this document must conform to a preprint to be submitted to a peer reviewed journal(such as JFS or FSI), including appropriate subsections and reasonable length, or (3) thesis research proposal converted to a white paper (maximum length of 6 pages, single-spaced)
- Three letters of recommendation (all three references must be able to comment on the applicant's academic and/or research skillset)

Upon receipt and evaluation of the application package, suitable candidates will be invited for a final interview with the graduate committee.

For fall admission, the application deadline for the Ph.D. Program is January 15.

Late admissions will be evaluated on a case by case basis.

Master of Science

MAJOR REQUIREMENTS

Minimum GPA of 3.0 is required.
Minimum grade of C is required for all courses applied toward degree.

**Comprehensive Oral Examination**

**Dissertation Proposal**

**Dissertation**

**Dissertation Defense**

**Total Hours** 37

Note: Each student must take at least two colloquium courses, one of which must be outside his/her research area. These colloquium courses are modeled after the tutorials offered at Oxford College, where the student works directly with the faculty member exploring a certain topic in greater depth. Each student will take a tutorial colloquium under the direction of his/her advisor and one from another faculty member who is a member of the dissertation committee.

The PhD program requires the completion of the courses listed above, including at least 15 hours of PhD level research. Each student must earn a cumulative GPA of 3.0 or better with no grade less than a C- in any course.

**Major Learning Goals**

**FORENSIC AND INVESTIGATIVE SCIENCE**

1. Develop and understanding of the areas of knowledge that are essential to forensic science.
2. Acquire skills and expertise in the application of basic forensic science concepts and of specialty knowledge to problem solving.
3. Ensure the student is oriented in professional values, concepts, and ethics.
4. Demonstrate integration of knowledge and skills through independent research.
5. Educate and prepare fundamentally sound criminalists.

**Academic Standards**

During graduate study, a minimum grade point average of 3.0 must be maintained in all required courses. A student who fails to maintain the required average at the completion of any semester will be placed on probationary status and allowed one academic year (two semesters) to attain the required average. If unsuccessful, the student will be dismissed from the graduate program. Students must earn a C or better in all required courses and a
student can attempt (enroll) in an FIS graduate course a maximum of two times. Please note that this maximum applies to student enrollment at the end of a respective semester’s registration deadline. In other words, if a student drops a course after the first week of school the dropped course still accrues an attempt. Any student that enrolls in a required FIS course twice, and earns less than a C in the best attempt will be dismissed from the program.

Thesis Research

All students should identify a faculty mentor and research topic as soon as possible. In order to register for FIS 697 Research, the student must have successfully completed his or her thesis proposal defense. A student cannot register for research hours until the proposal has been successfully defended and a Plan of Study Form is completed and signed by all committee members. The Plan of Study form must be submitted to the Graduate Studies Coordinator within 24 hours of the proposal defense.

Each student is responsible to ensure that, with the assistance of the Graduate Studies Coordinator, his or her committee is correctly constituted. Upon successful completion of the research, the candidate will present his or her results in a thesis and at the appropriate time defend the work in a final oral examination according to the rules of the College and University.

Pathways to Ph.D. Program

Pathway to the PhD via the Department’s MS

Students who have completed the MS at WVU must formally apply for admission to the PhD program.

Pathways to the PhD beside that of the Department’s MS

Students who have completed an MS at another institution can enter the PhD program; their course work will be evaluated against that of WVU’s program and each student will be appraised of any course deficiencies that need to be completed as part of his/her course of study under the PhD program.

Academic standards are similar for the MS and Ph.D. program. Thesis research is different in that students are encouraged to use the manuscript model for preparing the results of their research, which consists of a series of interrelated chapters/papers on the topic. The quality and contribution of each chapter/paper should be that of an article published in a peer-reviewed scholarly journal. Some chapters/papers may actually be published in advance of the final dissertation. In fact, this latter approach is generally preferable because the chapter/paper in question will already have gone through peer review by experts outside the institution. The form for the dissertation, should include 1) an introductory chapter that clarifies the theme of the dissertation, 2) a number of interrelated papers, and 3) a concluding chapter that synthesizes and integrates the papers and proposes ideas for future work.

Geography

Degrees Offered

- Master of Arts
- Doctor of Philosophy

Nature of the Program

The graduate program in geography at West Virginia University provides students with the opportunity to study for a master of arts or a doctor of philosophy degree with an area of emphasis in one or more of the following fields:

- Geographic information science
- Environmental geography
- Human geography

The M.A. is designed so that full-time students should satisfy all program requirements within two years. Students are expected to be well-grounded in one or more of the program’s three areas of specialization (environmental geography, geographic information science, and space, place, and development). The M.A. degree program in geography was designated a program of excellence by the West Virginia University Board of Governors in 1998, 2003, and 2008. This award is given to superlative degree programs in recognition of their contribution to higher education in West Virginia and national recognition.

Research

Students who are interested in pursuing research in an area other than these may do so provided the research area matches the interest of a faculty member in the department who agrees to supervise the student’s program. Students who wish to focus their research on a particular region are encouraged to do so. The Graduate Program in Geography at WVU has strong links with the University’s Regional Research Institute, the State GIS Technical Center, the Geology Program, the Water Research Institute, the International Studies Program, the West Virginia Geological and Economic Survey, the Center for Women’s Studies, and the Center for Black Culture and Research.
Computing Facilities
The geography program has extensive computing facilities housed in a new 98,000 square foot building dedicated exclusively to geography and geology. The new building has five computer laboratories dedicated to teaching and research. The department has ESRI ArcGIS, ERDAS Imagine, and ENVI site licenses. In addition, the department supports SAS, SAS-Graph, JMP, Surface III, Oracle, and extensive database and statistical packages. The department’s geovisualization research group operates an immersive four-wall 3-D display environment or CAVE. The remote sensing program operates an ASD full-range portable spectroradiometer.

FACULTY

CHAIR
• Tim Carr - Ph.D. (University of Wisconsin-Madison)

ASSOCIATE CHAIR FOR GEOGRAPHY
• Karen Culcasi - Ph.D. (Syracuse University)

PROFESSORS
• Trevor Harris - Ph.D. (University of Hull)
  Geographic Information Science
• Amy Hessl - Ph.D. (University of Arizona)
  Biogeography, Forest Ecosystems
• Randall Jackson - Ph.D. (University of Illinois)
  Director Regional Research Institute, Economic Geography
• Brent McCusker - Ph.D. (Michigan State University)
  Land Use Change, Africa
• Timothy Warner - Ph.D. (Purdue University)
  Remote Sensing

PROFESSOR EMERITUS
• Greg Elmes - Ph.D. (Penn State University)
  Geographic Information Science
• Ken Martis - Ph.D. (University of Michigan)
  Political, Electoral and Historical Geography

ASSOCIATE PROFESSORS
• Jamison Conley - Ph.D. (Penn State University)
  Spatial Analysis, Geocomputation
• Karen Culcasi - Ph.D. (Syracuse University)
  Political Cartography, Middle East
• J. Steven Kite - Ph.D. (University of Wisconsin-Madison)
  Geomorphology, Quaternary Studies, Geoarchaeology
• Brenden McNeil - Ph.D. (Syracuse University)
  GIScience, Environmental Modeling
• Bradley Wilson - Ph.D. (Rutgers University)
  Food Justice, Solidarity Economies, Political Ecology

ASSOCIATE PROFESSOR EMERITUS
• Robert Hanham - Ph.D. (Ohio State University)
  Regional Development

ASSISTANT PROFESSORS
• Martina Caretta - Ph.D (Stockholm University)
  Feminist Geography, Human Dimensions of Water
• Jonathan Hall - Ph.D. (Ohio State University)
  Desert Ecology, Biogeography
• Insu Hong - Ph.D. (Arizona State University)
  GIScience, Virtual Reality and Spatial Optimization
• Rick Landenberger - Ph.D. (West Virginia University)
  Remote Sensing, Geosciences Education
• Eungul Lee - Ph.D. (University of Colorado)
  Climatology, Land-Atmosphere Interactions
• Aaron Maxwell - Ph.D. (West Virginia University)
  Remote Sensing, GISc, Physical Geography
• Maria Alejandra Perez - Ph.D. (University of Michigan)
  Human Geography, Science & Society, Speleology, Latin America
• Jamie Shinn - Ph.D. (Penn State University)
  Environmental Governance, Political Ecology, Adaptation to Climate Change

Admission/Application Requirements

M.A. applicants must submit GRE scores, a personal two-page statement defining the applicant’s interest in geography and career intentions, and two letters of recommendation from people who are familiar with the student’s undergraduate training.

Ph.D. applicants should send three letters of recommendation, GRE scores, and a two-page research statement. Applicants are strongly encouraged to contact potential doctoral advisors among the faculty prior to application.

To receive full consideration, including consideration for funding opportunities, all applications for Fall admission must be submitted by January 1. To be considered for Fall admission without financial assistance, application material must be received by April 1.

Prospective M.A. students must have an overall cumulative undergraduate GPA of 3.0.

Prospective Ph.D. students must hold a M.A./M.S. degree and a cumulative GPA of at least 3.3 in their previous graduate work. Students with degrees in other non-geography disciplines are encouraged to apply although they may be asked to make up deficiencies in geography during the first year in the program.

International students are encouraged to submit their materials at least three months in advance of all deadlines.

Teaching Assistantships

A small number of graduate teaching assistantships are competitively awarded by the Geography program on an annual basis. Teaching assistants are employed to work in support of undergraduate courses. Applicants who wish to be considered for a teaching assistant position should make that request known in their application.

Research Assistantships

Research assistantships must be applied for through the faculty member whose research is providing the funding. The geography faculty are engaged in numerous funded research projects, many of which provide graduate students with opportunities for obtaining research skills and experience as well as employment and tuition aid. Furthermore, the professional contacts made in the course of faculty research frequently provide graduate students with opportunities for career development.

Master of Arts

The Master’s Program in Geography at West Virginia University provides students with cutting edge training in the history and theory of geography, experience with advanced geographic research methodologies and specialized mentoring from faculty experts across three sub-disciplinary fields (Human Geography; Environmental Geography; Geographic Information Science).

DEGREE REQUIREMENTS

To earn an M.A. in Geography at WVU students must complete 31 credit hours of graduate courses (based upon the curriculum described below), form a committee of graduate faculty to supervise your thesis or project, and then complete and publicly defend your thesis or project.

ADVISING

Throughout the admissions process the Graduate Committee coordinates with faculty to assist new students to identify a potential advisor. In the Fall semester M.A. students are required to select an advisor who can aid the student to develop a Plan of Study. The student should choose an advisor no later than two weeks before the end of their first semester in the program. Until an advisor is selected doctoral students will be supported by the Graduate Committee.

ACADEMIC PROGRESS

Students must maintain a GPA of 3.0 and complete all course, examination and dissertation requirements in a timely fashion. The academic progress of every doctoral student is reviewed each year. Students must submit a self-evaluation signed by their advisor by January 15. The Graduate Committee will conduct its annual review of students in February and communicate with students in March. Waivers to the PhD deadlines, timing requirements, and other rules may be requested from the Graduate Coordinator. Waivers are only given under extraordinary circumstances.

The M.A. Thesis Option

The M.A. thesis is an independent research project undertaken by the student. The thesis research should adhere to the following:

- Demonstrate knowledge of the literature in the student’s chosen field
- Use data and methods appropriate to the research
- Draw conclusions from the research endeavor

M.A. thesis option students develop a thesis proposal toward the end of the first year and during the first summer. The first step is to develop a written thesis proposal. This must be completed to the satisfaction of the student’s advisor and thesis committee no later than October 1 of the student’s second year. This is followed by an oral presentation to all students and faculty in the geography program no later than October 31 (unless there are scheduling conflicts). Presentations must be advertised within the department. Students should aim to complete the thesis proposal process well before the October deadline in order to ensure progress towards graduation the following semester. Students not able to meet this schedule should seek a meeting with their advisor to resolve the issue prior to the deadline dates.

The defense of the thesis takes place when the advisor and the committee agree that a defendable copy of the thesis is complete. The defense date must be advertised at least two weeks in advance. Only in exceptional circumstances will the thesis committee waive the two-week requirement for advertising thesis proposals and defenses. The thesis examination is graded on a pass/provisional pass/fail basis. To pass the examination, there can be no more than one unsatisfactory grade from the committee members. A student who fails may submit another thesis or a revised version upon the approval of the student’s committee. No student may be re-examined more than once. A student who is given a provisional pass will generally be required to make minor revisions or corrections to the thesis.

Thesis proposals and defenses are not normally scheduled between June 15 and August 15.

The Professional Master’s Option

Overview

The professional master's option consists of an additional graduate course and a three-credit-hour project (GEOG 780). The professional master's option is designed for students interested in a more focused project than the traditional research thesis option. It is not recommended for students considering entering a Ph.D. program. The thesis project has strict deadlines and must be completed in one semester and after the completion of GEOG 601 and either GEOG 603 or GEOG 701.

Deadlines and Timetable

Students planning on selecting the professional masters’ option must make a written request to the Geography Graduate Committee no later than two weeks before the start of the semester in which the project is undertaken. The request should be endorsed by the student’s advisor. Only after the written request has been received will the geography graduate director issue a permit for the course. It is strongly recommended that the project topic be selected prior to the beginning of the semester.

A written project plan is to be submitted to the advisor and committee no later than three weeks after the start of the semester. The project plan includes an objective, methods, and timetable. No public presentation of the proposal is required.
The student is required to have meetings with the advisor and the committee in weeks seven and eleven to present progress reports.

The project must be completed and successfully defended by the end of the semester in which the project was undertaken. If the student completes the project, passes the defense, and submits the project to the library by the end of the semester, the student will be given a grade of S (satisfactory) for the project (GEOG 780).

If the student completes and defends the project, but is unable to submit the project to the library by the university deadline, the student will be assigned an (I) incomplete for the project. The student then has up to two weeks after the last day of exam week to submit the project to the library; otherwise, the I is converted to a U (unsatisfactory).

If the student completes the project and fails the defense or if the project is not completed and defended by the end of the semester, the student will be given a grade of U for the GEOG 780 course.

Students who receive a grade of U may reapply to do a different project the following semester. Students cannot reapply more than once.

The Graduate Committee may grant an extension to the one semester deadline under exceptional circumstances.

**Project Topic and Defense**

The choice of a project topic is to be determined by close interaction and agreement between the student, advisor, and committee. The project may comprise a wide range of activities, but is usually either (a) an applied problem-solving exercise with minimal literature review, (b) an empirical test of an idea from the literature with minimal literature review, or (c) a literature review or development of a conceptual idea using the literature.

The project is defended in a public presentation at the end of the project semester, but no later than the university deadline for a thesis defense. The defense time and location must be published in the department no less than two weeks in advance. The standard for passing will be that the majority of the advisory committee (two or more of the three members) evaluate the work as substantially meeting the goals identified in the written research plan.

Most projects are expected to be in written form (fifteen to twenty pages). Other forms of presentation may be acceptable such as maps, software, video, land-use plan, image classification, field-trip guide, work of art, etc.; however, a written document explaining the project is still required.

**Doctor of Philosophy**

A limited number of the required courses may be waived if the student has already completed an equivalent course and can demonstrate proficiency with the material.

EXAMINATIONS AND DISSERTATION

The student is required to pass an oral and three written comprehensive examinations no later than the fourth semester. The student will be examined on two areas of specialization and the student's dissertation research topic. Upon successful completion of the comprehensive examination and no later than the end of the fifth semester, the student will be expected to defend a dissertation research proposal. The award of the Ph.D. is granted upon the successful defense of the dissertation itself.

Major Learning Goals

GEOGRAPHY

The Graduate Program in Geography at West Virginia University trains students at the highest level to assume leadership roles in research, teaching, and applied work in Human Geography, Environmental Geography, and Geographic Information Science.

M.A. Program

- Master the existing scholarship in the study of Geography with the goal of using this scholarship in the pursuit of their own professional and/or research field.
- Conduct research in their area of specialization or engage in an applied geography project oriented to their professional goals.
- Prepare to be professionals in careers that require training at a high level in Geography.

Ph.D. Program

- Master the existing scholarship in the study of Geography with the goal of using this scholarship in the pursuit of their own research.
- Engage in and conduct original research in their area of specialization.
- Prepare to be professionals in careers that require training at the highest level in Geography.
The Geography Graduate Committee regularly reviews the structure and content of the M.A. and Ph.D. programs to provide the best possible education to students in order to meet the needs for highly trained individuals in Human Geography, Environment Geography, and Geographic Information Science.

Geology

Degrees Offered

- Master of Science
- Doctor of Philosophy

Nature of the Program

The graduate program in geology at WVU provides study opportunities in the following areas:

- Hydrogeology and environmental geology with strengths in flow and contaminant-transport modeling, mine reclamation, shallow geophysics, floods, and debris flows
- Basin analysis and sedimentary geology with strengths in seismic modeling, basin structures, deposystem analysis, sequence stratigraphy, biostratigraphy, paleoecology, diagenesis, and plate tectonics
- Energy geology and geophysics with strengths in the exploration and development of oil, gas, and coal; the computational analysis of hydrocarbon systems; and environmental impacts of fossil fuel usages

Research Linkages Around Morgantown

The WV Geological and Economic Survey (WVGES), located five miles from Morgantown, makes available laboratory equipment, fossil collections, cataloged drill cuttings and core, and subsurface logs from deep wells in the region. WVGES also offers students work and thesis opportunities in coal resources and petroleum geology. Several survey geologists are adjunct faculty.

The National Energy Technology Laboratory (NETL) of the U.S. Department of Energy laboratory located in Morgantown carries out and funds research on fossil-fuel resources and environmental problems. NETL projects support geology faculty and graduate-student research.

Extensive mining in the Appalachian region provides an excellent opportunity for students to study the environmental effects of coal extraction. The WVU geology faculty collaborates with the National Mine Land Reclamation Center (NMLRC) based on the WVU Evansdale campus. The NMLRC is the main center for coordination of acid-mine drainage research in the United States. WVU Geology has instrumented groundwater research sites in the region for both training and research.

The department houses the Statewide GIS Technical Center, the central source for GIS resources in West Virginia. The tech center is responsible for scanning and digitization of USGS, DLGs, DOQs, and a host of other data products. The center provides technical-support services for the development and operation of GIS in West Virginia. A limited number of RA opportunities are available related to center activities.

Facilities

COMPUTER FACILITIES AND NETWORK

Research and teaching computing facilities in the department are outstanding and are centered around a Windows client-server network. The research cluster has access to more than ten terabytes of redundant networked storage based on a series of RAID servers as well as diverse networked printers, large-format plotters, large-format digitizers, and scanners. The teaching cluster provides interactive computing resources for 125 students on networked computers. Classroom demonstration facilities are available in every teaching lab. The research cluster includes many workstations with dual-format displays. All resources are regularly upgraded with a replacement period of one to two years. Clusters for the GEO workgroup are linked to the WVGIS center and have gateway access to the university backbone. The entire building is networked. The department houses the GeoVirtual Lab which is centered around a four-walled immersive CAVE environment.

SOFTWARE RESOURCES

The department maintains software for instructional and research usage. A full range of common applications software is available on all network machines. In addition, statistical packages allow students to undertake detailed statistical analysis, whereas graphical analysis packages (TruFlite, Surfer, Geographix, RockWorks) enable users to render both 2-D and 3-D surfaces. GIS licenses include ARCGIS which is accessible to students for integration of complex geological and geophysical data. ERDAS IMAGINE provides a suite of image-processing tools for analyzing remotely sensed data. Dynamic Graphics EarthVision provides an interactive 3-D visualization environment. AutoCAD, Adobe Illustrator, and other graphics design packages allow accurate rendering of technical diagrams.

State-of-the-art geological and geophysical modeling and processing software are available for instructional and research use. Landmark Inc. GeoGraphix Discovery Suite, Seismic Micro Technology's Kingdom Suite, and Sclumberger’s Petral software provide state-of-the-art tools for analysis of seismic reflection data and geophysical logs. Seismic processing capability is provided through Landmark’s ProMax 2-D, 3-D, and VSP. We use Sensors and Software’s EKKO View Deluxe software for processing and display of ground penetrating radar data. Interpex’s IXID software is available.
for forward and inverse modeling of resistivity and terrain conductivity data. Northwest Geophysical Associates’ GM-SYS software is used in the forward and inverse modeling of gravity and magnetic data. A host of Landmark products including Discovery Suite, Seisworks, Strat-works, and seismic modeling packages enhance geophysical and subsurface studies. We have recently improved our capability in integrated subsurface analysis through the addition of IHS Petra, Schlumberger’s Interactive Petrophysics for reservoir property analysis, and Petrel. The focus of these products is on collaborative work-flows that unite geophysics, geology, and reservoir engineering domains.

Software for groundwater simulation includes aquifer characterization packages (AQTESOLV), finite-difference flow and particle-tracking codes (MODFLOW2000, MODPATH3), solute-transport codes (MT3-D, MODFLOWT), and preprocessors (Groundwater Vistas). Streamflow-modeling capabilities include HEC-2 step-backwater and peak value flood frequency software.

For structural geology studies we use 2-D and 3-D move (Midland Valley) and TriShear (created by R. Almendinger) in addition to standard structural analysis software. Basin modeling and evaluation of the generation of hydrocarbons are carried out with the GENEX (Baisip-Franlab) software.

Laboratory And Field Instrumentation

**GEOLOGICAL**

The department has a rock-crushing room equipped with jaw crusher and disk grinder as well as laboratories devoted to geological sample preparation which include standard mineral separation equipment (Frantz magnetic separator, Gemeni table, and heavy liquids set-up).

**GEOPHYSICAL**

The department owns a Geonics very low frequency sensor, an EM34 terrain conductivity meter, a Bison Instruments 12 Channel Seismograph, and a Geometrics magnetometer. The geophysics facility also offers large format plotting on twenty-four to forty-two inch HP plotters. Additional survey equipment includes a Leitz Model 2100 Total Station Survey System and a two-station GPS Traveler. Wide spectrums of software resources (see above) enhance geophysical research.

**GEOCHEMICAL**

Department laboratories own a Philips PW1800 X-ray diffraction unit for solid-state mineral analyses and a Philips PW9550 energy dispersion spectrometer for elemental analyses. A complete suite of equipment is available for the analysis of organic-rich materials including a Leco sulfur analyzer, a Leco proximate analyzer for moisture, carbon, and ash content, a Leco CHN analyzer for coal and shale, a Leco calorimeter, and a Biorad FTIR with microscope attachment to do FTIR analysis of microscopic entities in rocks. Water analytical facilities include a Dionex 100 Ion Chromatograph and a Beckmen Autotitrator. Outside White Hall, Varian sequential ICP and Finnemat ICP-MS units for water analysis are available to geology faculty in the WV Water Research Institute.

**HYDROGEOLOGICAL**

Groundwater field equipment includes an array of Global Water vented pressure transducer/datalogger instruments, Grundfos 4” and Redi-Flo 2 pumps, Geotech peristaltic pumps and flow-through sampling cells, and analog well recorders as well as a variety of generators, sampling pumps, flumes, and conductivity meters, bailers, and current meters.

**QUATERNARY GEOLOGY AND GEOMORPHOLOGY**

Quaternary geology and geomorphology research is served by a particle-size analysis laboratory as well as field instrumentation such as Garmin and Trimble GPS units, laser levels, and a Leica TC400 electronic distance meter.

**REMOTE SENSING**

The Remote Sensing Laboratory has a comprehensive suite of computing and field equipment. The laboratory operates two portable full-range (0.4 to 2.5 micrometer) field spectroradiometers and an aerial small format photography system based on two Nikon cameras. The laboratory shares a digital ADAR infra-red aerial acquisition system with biology and resource management. The ADAR system can be deployed in both helicopters and fixed wing aircraft. Remote sensing software includes site licenses for ERDAS Imagine, ENVI/IDL, and ARC/INFO image analysis and GIS software.

**FACULTY**

**CHAIR**

- Timothy Carr - Ph.D. (University of Wisconsin-Madison)

**ASSOCIATE CHAIR FOR GEOLOGY**

- Shikha Sharma - Ph.D. (Univ. of Lucknow, India)

**PROFESSORS**

- Timothy Carr - Ph.D. (University of Wisconsin-Madison)
  - Sedimentary and Petroleum Geology
- Joseph J. Donovan - Ph.D. (Pennsylvania State University)
Hydrogeology, Quaternary Paleochemistry
- Gregory A. Elmes - Ph.D. (Pennsylvania State University)  
  Geographic Information Science
- Dengliang Gao - Ph.D. Duke Univ.
- Trevor M. Harris - Ph.D. (University of Hull)  
  Eberly Professor, Geographic Information Science
- Jaime Toro - Ph.D. Stanford Univ.
- Timothy A. Warner - Ph.D. (Purdue University)  
  Remote Sensing

ASSOCIATE PROFESSORS
- Amy Hessl - Ph.D. (University of Arizona)  
  Biogeography, Forest Ecosystems
- J. Steven Kite - Ph.D. (University of Wisconsin-Madison)  
  Geomorphology, Quaternary Studies, Geoarchaeology
- Shikha Sharma - Ph.D. Univ. of Lucknow, India
- Dorothy J. Vesper - Ph.D. (Pennsylvania State University)  
  Aqueous Geochemistry and Hydrogeology
- Amy Weislogel - Ph.D. Stanford Univ.

PROFESSORS EMERITI
- Robert E Behling - Ph.D. Ohio State Univ.
- Alan C. Donaldson - Ph.D. (Pennsylvania State University)  
  Past Chair, Stratigraphy, Clastic Sedimentation
- Thomas W Kammer - Ph.D. Indiana Univ.
- Helen M Lang - Ph.D. Univ. of Oregon
- Henry W Rauch - Ph.D. Penn State Univ
- John J Renton - Ph.D. West Virginia Univ.
- Robert C. Shumaker - Ph.D. (Cornell University)  
  Structural Geology, Tectonics
- Richard A. Smosna - Ph.D. (University of Illinois)  
  Sedimentation, Stratigraphy, Carbonate Petrology
- Thomas Wilson - Ph.D. West Virginia Univ.

ASSISTANT PROFESSORS
- Graham Andrews - Ph.D. Univ. of Leicester
- Kenneth Brown - Ph.D. Miami Univ., Ohio
- James Lamsdell - Ph.D. Univ. of Kansas
- Joseph Lebold - Ph.D. (West Virginia University)  
  Earth Science Education, Stratigraphy, Paleocology
- Eungul Lee - Ph.D. (University of Colorado)  
  Climate, Regional Climate Modeling
- Brenden McNeil - Ph.D. (Syracuse University)  
  GIScience and Environmental Modeling

CLINICAL ASSISTANT PROFESSOR
- Rick Landenberger - Ph.D. (West Virginia University)  
  Remote Sensing, Geoscience Education

POST DOCTORAL RESEARCHER
- Maria Perez - Ph.D. (University of Michigan)  
  Karst and Cavers, Science and Society

Admission Procedures and Prerequisites
Applicants for graduate studies in geology must have as a minimum requirement a bachelor's degree and an overall grade point average of at least 3.0. Acceptance by the Department of Geology and Geography is necessary before admission of any prospective student to the program. All candidates for a graduate degree in geology must submit scores in the general aptitude tests of the Graduate Record Examination. Applicants seeking admission and
financial support for the fall semester should apply by February 1. For spring semester, apply by October 1. Write to the department for an application package or download it from the website (see above).

Students seeking admission to the master’s program or the Ph.D. program must complete the equivalents of all allied science and mathematics courses required for the B.S. in geology at WVU, plus the following geology courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>

<tr>
<td>GEOL 404</td>
<td>Geology Field Camp</td>
<td>6</td>
</tr>
</tbody>
</table>

Similar courses from other universities or relevant experiences may be substituted if approved during admission review. A requirement may be waived by the committee if the student can demonstrate competence in that subject area.

**GPA Requirements**

During graduate study a minimum grade point average of 3.0 must be maintained in required formal courses in geology and cognate fields for the master’s degree and 3.3 for the Ph.D. A student who fails to maintain the required average at the completion of any semester will be placed on probationary status and allowed one academic year (two semesters) to attain the required average. If this is unsuccessful, the student will be dropped from enrollment in the graduate program.

**Master of Science**

The M.S. in Geology offers two options: research and professional studies. Students are required to take courses specified by their advisory committee, with whom they meet at the beginning of each semester. Students must take approved graduate courses from at least five different faculty from any department in the university.

**MAJOR REQUIREMENTS**

Select an Area of Emphasis: 30-39

<table>
<thead>
<tr>
<th>Area</th>

</tbody>
</table>

Total Hours 32-41

**RESEARCH AREA OF EMPHASIS**

This has been the traditional option for the master of science in geology. Students considering continued studies (doctor of philosophy) or seeking employment in an area of geological research should choose this option. A minimum of twenty-four formal course hours, six research hours (GEOL 697), and two hours of GEOL 699 are required for graduation. A thesis based on original research under direction of a research committee is also required. With consent of the candidate’s research committee, the field work need not be done while in residence at WVU.

<table>
<thead>

</tr>
</tbody>
</table>

* Approved graduate courses in biology, chemistry, physics, computer science, mathematics, engineering, soil sciences, business, or law may be taken as outside courses by geology graduate students. Students are free to take as many courses as they choose outside the department as long as the coursework is approved by their advisory committee.

**PROFESSIONAL STUDIES AREA OF EMPHASIS**

This option is designed specifically for students seeking experience in preparing and presenting professional problems. Students choosing this option typically expect to seek professional employment in the profession using the master’s as their terminal degree. A minimum of thirty-three formal course hours, six directed study research hours (GEOL 692), and two hours of GEOL 699 are required for graduation. The research hours are in lieu of a thesis and are designed to simulate the work of professional geologists as they seek solutions to open-ended problems within a limited time frame.
Experience in presentation of problems and solutions are an integral part of the program. Research hours may be earned in conjunction with off-campus experiences by consent of the candidate’s advisory committee.

Geology Courses *

Total Hours 39

* Approved graduate courses in biology, chemistry, physics, computer science, mathematics, engineering, soil sciences, business, or law may be taken as outside courses by geology graduate students. Students are free to take as many courses as they choose outside the department as long as the coursework is approved by their advisory committee.

**Doctor of Philosophy**

The candidate for the Ph.D. must complete a program of courses outlined by the candidate’s doctoral research committee. A candidacy preliminary examination must be successfully completed within one year after enrollment. The proposal defense and oral examination must also be successfully completed. Participation in two GEOL 796 Graduate Seminars is required. No other formal course requirements exist; these are chosen by the student in conjunction with his or her research committee.

**Major Learning Goals**

**GEOLOGY**

Students obtaining a masters in geology degree will be able to:

- Communicate geologic concepts orally and in writing
- Apply research skills to analyze geologic questions
- Propose, produce and defend original research in their field of study
- Explain geologic principles as they relate to their area of research

Students obtaining a doctorate in geology degree will be able to:

- Communicate geologic concepts orally and in writing
- Apply research skills to analyze geologic questions
- Propose, produce and defend original research of publishable quality
- Explain geologic principles as they relate to their area of research
- Effectively communicate the state of knowledge in their research area
- Identify research questions in geology
- Critique and assess peer-reviewed literature

**History**

**Degrees Offered**

- Master of Arts
- Atlantis Dual Degree Master of Arts
- Doctor of Philosophy
Nature of the Program

The Department of History offers graduate work in the history of Africa, Asia, Europe, Latin America, public history, the United States including Appalachia/regional, and world history. In addition to our core areas of strength, the department encourages research that is comparative and transnational in perspective and scope. Faculty research and teaching interests are clustered thematically around four areas: Gender and Kinship, Imperial and Postcolonial Societies, Labor and Political Economy, and War and Society. Our program is designed to give students flexibility to create a plan of study that matches their interests, while at the same time provide a breadth of training in different fields that will prepare students in historiography, research methods, and teaching approaches. Students can select concentrations leading to preparation for careers in teaching and scholarship and as specialists for various branches of government, business, and public service. Students in the program are normally expected to pursue the degrees of master of arts or doctor of philosophy.

Atlantis Dual Degree Master of Arts

The department also participates, together with Collegium Civitas of Warsaw, Poland and the University of Tartu in Estonia, in a unique transatlantic multidisciplinary dual degree M.A. program in East-Central European area studies. Students from both sides of the Atlantic spend two academic semesters overseas and will complete relevant coursework at West Virginia University and one of the two European institutions. They also have the opportunity to acquire language training and gain valuable experience through professional internships.

Students will complete the equivalent of sixty U.S. credit hours: thirty hours in the history program at WVU, and thirty hours in the international relations program at Collegium Civitas or the Baltic studies program at the University of Tartu. Master’s theses will be defended at one of the two European institutions and WVU. The dual degrees, in history from WVU and in international relations or Baltic studies from one of the two European institutions, are awarded once credit hour and degree requirements are met at all three institutions.

FACULTY

CHAIR

• Joseph Hodge - Ph.D. (Queen's University at Kingston)  
  Modern Britain, British Empire, decolonization, international development, Africa

ASSOCIATE CHAIR

• Kathryn Staples - Ph.D. (University of Minnesota)  
  Medieval, gender, England, material culture

PROFESSORS

• Katherine Aaslestad - Ph.D. (University of Illinois)  
  Modern Europe, Germany

• Robert E. Blobaum - Ph.D. (University of Nebraska)  
  Eberly Family Professor of History, modern Central and Eastern Europe

• William I. Brustein - Ph.D. (University of Washington)  
  European fascism, European political and religious extremism, comparative anti-Semitism

• Elizabeth Fones-Wolf - Ph.D. (University of Massachusetts)  
  20th-century U.S., social and economic

• Kenneth Fones-Wolf - Ph.D. (Temple University) Stuart and Joyce Robbins Distinguished Chair in History  
  U.S. labor, Appalachia, immigration, religion

• Robert M. Maxon - Ph.D. (Syracuse University)  
  Africa, East Africa, colonial Kenya

• Matthew A. Vester - Ph.D. - (University of California)  
  Early modern Europe, Italy

ASSOCIATE PROFESSOR

• Joshua Arthurs - Ph.D. (University of Chicago)  
  Modern Europe, Italy, cultural

• Melissa Bingmann - Ph.D. (Arizona State University)  
  Public history, 20th-century U.S.

• Tyler Boulware - Ph.D. (University of South Carolina)  
  Early U.S., frontier, Native American

• Joseph Hodge - Ph.D. (Queen's University at Kingston)  
  Modern Britain, British Empire, decolonization, international development, Africa

• Brian Luskey - Ph.D. (Emory University)  
  19th-century U.S, social and cultural
• Jason Phillips - Ph.D. (Rice University)
  Eberly Professor of Civil War Studies, civil war, reconstruction, southern history, 19th-century U.S.
• James Siekmeier - Ph.D. (Cornell University)
  U.S. diplomatic, Latin America
• Kathryn Staples - Ph.D. (University of Minnesota)
  Medieval, gender, England, material culture
• Mark B. Tauger - Ph.D. (UCLA)
  20th-century Russia/USSR, world/comparative, historiography

ASSISTANT PROFESSOR
• Krystal Frazier - Ph.D. (Rutgers University)
  African American, oral history
• Macabe Keliher - Ph.D. (Harvard University)
  East Asia, China
• William Gorby - Ph.D. (West Virginia University)
  West Virginia, Appalachia
• Tamba E. M'bayo - Ph.D. (Michigan State University)
  West Africa, African diaspora and Pan-Africanism
• Michele Stephens - Ph.D. (University of Oklahoma)
  Latin America, indigenous peoples race and gender

LECTURERS
• Jenny Boulware - M.A. (University of South Carolina)
  Public history
• Carletta Bush - Ph.D. (West Virginia University)
  West Virginia regional

REGULAR M.A. ADMISSION
Students seeking admission to the regular master of arts program should have the equivalent of a bachelor’s degree in history. Applicants lacking this degree may be required to make up deficiencies. Application requirements include transcripts (a minimum of a 3.0 average in history courses is expected), three letters of recommendation, a statement of purpose, writing sample, résumé, and a combined score of 300 on the verbal and quantitative sections and 4.0 on the written section of the Graduate Record Examination General Aptitude Test (GRE).

M.A. WITH EMPHASIS IN PUBLIC HISTORY ADMISSION
Students apply for admission to the public history area of emphasis as they would for the regular M.A. in history. The statement of purpose should highlight relevant background and reasons for interest in public history. Students in public history should have an undergraduate degree in history. Applicants lacking this degree may be required to make up deficiencies.
ATLANTIS DUAL DEGREE MASTER OF ARTS ADMISSION

Students apply for admission to the Atlantis program as they would for the regular M.A. in history. The statement of purpose should highlight relevant background and reasons for interest in the East-Central European region. Students should have an undergraduate degree in relevant disciplines and programs such as history, Slavic and East European studies, international studies, geography, and/or political science. Otherwise, they must meet the same criteria for admission as applicants to the regular M.A. program.

PH.D. ADMISSION

Students seeking admission to the doctor of philosophy program should have the equivalent of a M.A. in history. Application requirements include a transcript (a minimum of a 3.0 average in graduate history courses is required), three letters of recommendation, and a combined score of 300 on the verbal and quantitative sections and a 4.0 on the written section of the Graduate Record Examination General Aptitude Test (GRE). Students should also include a statement of purpose, an example of their written work, and a résumé as a part of the application.

Master of Arts

Individual faculty may require their students to master one or more languages to demonstrate proficiency in particular research methods (quantitative analysis, paleography, GIS, etc.) or to develop other skills as necessary for their areas of study and thesis projects.

MAJOR REQUIREMENTS

Minimum GPA of 3.0 is required.

THESIS OPTION

The M.A. in history (thesis or examination option) consists of thirty hours of coursework, of which no more than twelve hours may be at the 400 or 500-levels and the remainder at the 600 of higher level. Students who choose the thesis option must take one readings/research seminar sequence (HIST 701 and higher) as part of their thirty credit hours of coursework. They are also required to write a master's thesis in consultation with their main faculty advisor. The thesis must be based on original research that demonstrates a critical engagement with the secondary literature and is developed in multiple chapters. Students must first prepare a thesis prospectus, which must be approved by their thesis committee, before writing and successfully defending the thesis in an oral examination. A maximum of six hours of credit for HIST 697 can be taken for writing the thesis.

EXAMINATION OPTION

Students who choose this option must take one readings/research seminar sequence (HIST 701 and higher) plus an additional readings seminar (HIST 701 and higher) as part of their thirty credit hours of coursework. They cannot count thesis research credits as part of their thirty credit hours of coursework. In addition, in their final semester students must complete comprehensive exams in their major and minor fields, based on their coursework and in consultation with a faculty advisor for each field. The comprehensive exams include a written component and an oral defense. To prepare for the exam, students may take 3 hours of independent study (HIST 795) that count toward the required 30 hours.

PUBLIC HISTORY AREA OF EMPHASIS

Public historians are trained to conduct historical research and interpret the past for a variety of audiences. They generally work in museums, heritage sites, historic preservation, and archives as consultants and for the federal government. The M.A. in History with an area of emphasis in public history consists of thirty hours of coursework, of which no more than twelve hours may be at the 400 or 500-levels and the remainder at the 600 and higher level plus a six credit-hour internship (HIST 614).
Doctor of Philosophy

Individual faculty advisers may require their students to master one or more languages, to demonstrate proficiency in particular research methods (quantitative analysis, paleography, GIS, etc.), or to develop other skills as necessary for their fields of study and dissertation projects.

MAJOR REQUIREMENTS

Minimum GPA of 3.0 is required.

HIST 700 Historiography 3
Reading/Research Seminars 12
HIST 799 Graduate Colloquium 4-6
Coursework in four fields of study (major field and three minor fields)
Comprehensive Examination
Dissertation Proposal
Dissertation
Dissertation Defense
Total Hours 19-21

FIELDS OF STUDY

A candidate must offer a program of study in four fields (a major field and three minor fields). At least three fields must be in history while the other may be in a related field with the approval of the director of graduate studies. Doctoral students must maintain a 3.0 grade point average to remain in good standing. Fields available in the department include, but are not limited to Africa, Appalachia/regional, Europe, Latin America, and the United States. Students may also take a minor field in East Asia, public history, or world history. At least one field must be in a geographic area outside the student’s main area of concentration for dissertation work. For each field of study, students take a comprehensive examination (written and oral) based on knowledge derived from course work and readings from a book list prepared in consultation with the faculty field adviser.

Dissertation work should normally be in the history of the United States, Europe, Appalachia/regional, or modern Africa. Students working in these areas, either at the M.A. or Ph.D. level, have the opportunity to study with adjunct professors and faculty from other departments and universities.

Cultural Resource Management Certificate

The Eberly College of Arts and Sciences also offers an interdisciplinary graduate-level fifteen-hour certificate in cultural resource management (CRM) that is coordinated by the Department of History. Most CRM students earn the graduate certificate in conjunction with an M.A. in history, public administration, recreation parks and tourism, geography, design, art history, or one of several other related graduate degree programs. The requirements for the CRM certificate consist of twelve credit hours of coursework and a three-hour internship or an individual research project (HIST 620). All CRM students must successfully complete HIST 600. Students who are currently admitted to or enrolled in a graduate degree program must register their intent to earn the CRM certificate with the CRM coordinator during the semester prior to their internship. Students who wish to pursue the graduate certificate independent of a graduate degree program must be admitted as non-degree graduate students prior to registering their intent to earn the CRM certificate. Each student is expected to maintain an average GPA of 3.0.

Minimum GPA of 3.0 is required.

HIST 600 Cultural Resource Management 3
HIST 620 Practicum in Cultural Resource Management 3
Graduate coursework 9
Total Hours 15

Major Learning Goals

HISTORY

Students earning a M.A. or Ph.D. in History will be able to:

• Demonstrate general knowledge of the facts, concepts, and approaches of history.
• Demonstrate the ability to understand and critically evaluate the existing literature published within their specific field of research.
• Critically analyze and assess both primary and secondary sources.
• Conduct original historical research and construct manuscripts that are coherently argued, grammatically correct, and use proper historical documentation.
• Clearly and effectively communicate the results of their research in oral and written formats.
• Abide by the ethical and professional principles of the discipline of history.

Legal Studies

Degree Offered

• Master of Legal Studies

Nature of the Program

West Virginia University’s Master of Legal Studies (MLS) program is part of the Department of Public Administration. The MLS is a degree program designed to build greater public understanding of the law and the United States legal system, to provide graduates with the ability to apply knowledge and skills gained to performing their jobs more effectively and to provide private and public organizations the benefit of enhanced experience. It is a graduate program of study designed for professionals practicing in areas such as human relations, criminal justice, juvenile justice, journalism, social work, court administration, national security, probation and law enforcement, or regulatory agencies. It is neither a law degree nor a paralegal program.

The MLS is offered entirely online (there are no on-campus courses). Courses are offered each term (including summers). Students following the prescribed course of study should be able to finish the degree in six terms (two calendar years, including summers).

Prospective and current students should frequently check the program’s website at http://legalstudies.wvu.edu for up-to-date program information, forms, and other guidelines.

Degree Completion

According to university regulations, master’s students are permitted to continue in a program for a maximum of eight years under their original application. A student is generally not allowed to count any courses taken more than eight years prior to the conferring of a degree toward completion of that degree. Graduate students are expected to maintain continuous enrollment, excluding summer sessions unless permitted by the director. All graduate students must enroll for at least one credit hour during the semester (or summer) of graduation. No course in which the grades D, P (pass), F, or U (unsatisfactory) are earned can be counted toward a graduate degree, nor can courses taken under the audit option. Students in the Master of Legal Studies program must earn a 3.0 GPA to qualify for graduation.

FACULTY

CHAIR
• Maja Husar Holmes - Ph.D. (Syracuse University)

DIRECTOR
• Maja Husar Holmes

COORDINATOR
• Carla J. See - M.A., M.S. (West Virginia University)

PROFESSOR EMERITUS
• Nancy L. Adams

Admission

In order to be considered for admission to the MLS program, one must have completed a baccalaureate degree in any major with a cumulative GPA of at least 3.0 on a 4.0 scale. In addition, it is recommended that a prospective student have some work experience in an area broadly related to the field of legal studies. Applicants who do not possess a GPA of at least 3.0 may apply to the Eberly College of Arts and Sciences for admission as a non-degree student in order to register for certain classes and to document academic ability. Acceptance as a non-degree student does not guarantee acceptance into the legal studies program.

Steps to apply for the MLS program:

• Application for admission and transcripts: (Apply here: http://admissions.wvu.edu/admissions/how-to-apply)
• Three Letters of Recommendation: References should be requested through the online Graduate Application portal. Reference writers should be persons who are able to write directly to the applicant's ability to think critically; analyze situations, information, or data; to write clearly; and to apply one's self in an academic program of study. At least one letter should be from an academic reference, if possible.
• Current resume or curriculum vitae
• One to two page personal statement on the subject of why and how the Master of Legal Studies Program will further your career or special interests.
• Results from a standardized graduate-level test (i.e. GRE, LSAT, GMAT or MCAT) or a petition of waiver for the standardized test requirements.

A form for the waiver request can be located on the Legal Studies Admissions webpage: http://publicadmin.wvu.edu/mls. A prospective student may apply for a waiver of the graduate test score requirement if he or she possesses an undergraduate degree and has five or more years of work experience in a field related to legal studies.

All application materials should be submitted no later than November 15 of each year for admission in the Spring semester and by May 1 for admission in the Fall semester. Applicants are encouraged to submit materials early. Early applications that are complete will be reviewed by the Admissions Committee on a rolling basis. Otherwise, the Admissions Committee will render decisions by November 30 for Spring admission and by May 15 for Fall admission. **Applications for admission may be considered after these deadlines on a space-available basis. Incomplete applications will not be considered.

Additional information and forms may be found on the program's website at http://legalstudies.wvu.edu or by calling the program at (304) 293-7977.

Total Hours 36

**Major Learning Goals**

**MASTER OF LEGAL STUDIES**

• Students will be prepared to articulate with and differentiate between the law, the courts, other legal institutions and legal actors and to define their impact on society;
• to identify sources of law;
• develop research plans and conduct legal research;
• prepare for and assist with civil and criminal litigation;
• understand policymaking and rulemaking, develop and implement strategies and plans to affect policy making and rulemaking.

**Mathematics**

**Degrees Offered**

• Master of Science
• Doctor of Philosophy
Programs

The Department of Mathematics offers graduate programs leading to the Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees. The master's degree program offers specializations in pure mathematics, applied mathematics, industrial/applied/interdisciplinary mathematics, and mathematics for secondary educators. The Ph.D. program provides for a common core of fundamental mathematics followed by specialized studies culminating in an original research dissertation directed by a faculty advisor. Depending on the student's program and interests, there are diverse career opportunities available in education, government, and industry.

Financial Support

Many graduate students receive financial support in the form of a graduate teaching assistantship, which provides a stipend and a full waiver of university tuition. These are awarded taking into account primarily the student's academic record along with the letters of recommendation and any supplementary information reflecting on the student's potential for success in the program. In some cases, teaching experience and/or the potential for outstanding teaching can be a consideration. Teaching assistants have the opportunity to work with the mathematics education faculty of the Department's Institute for Mathematics Learning (IML). A small number of research assistantships are also available. Applications from students requesting financial aid should be received no later than February 15 to ensure full consideration for the subsequent fall semester. Late applications are accepted, but students are advised to check with the graduate director as to the availability of assistantships. Applications for admission (alone) can also be considered at other times, but for best consideration, particularly for the Ph.D. program, students should adhere to the February 15 deadline. Other financial aid includes partial university tuition waivers and part-time positions assisting in the instructional computer labs. TOEFL scores are required for international students whose native language is not English, with a university requirement of a 550 minimum score for admission.

Doctor of Philosophy

The doctor of philosophy is a research program in which the final product is an original, publishable research thesis. For students entering with regular admission status, the program requires a minimum of twenty-four hours of approved coursework along with research and graduate seminar requirements. As reflected in the interests and expertise of the faculty, students may specialize in a variety of areas of pure, applied, and discrete mathematics as well as research in undergraduate mathematics education.

EXAMINATIONS AND DISSERTATION

The student must pass the Department's Ph.D. Entrance Examination within two years: a student enrolling in a given calendar year must pass by the end of the spring semester two years after. The examination is over two subjects selected from the four areas of algebra, real analysis, differential equations, and topology.

Within three years of enrolling, the student is expected to pass a qualifying oral and written examination on the major and minor areas of study and present an approved dissertation prospectus. A minor examination is waived if the student has obtained at least a 3.5 GPA in the corresponding courses. If the qualifying examination results are unsatisfactory (U), the dissertation committee may reexamine the student once.

A Ph.D. candidate must complete a dissertation, representing at least twenty-four hours of 700-level research credit, under the supervision of a dissertation advisor. The research upon which the dissertation is based must conform to scholastic standards and constitute an original and publishable contribution to mathematics.

COMBINATORIAL COMPUTING AND DISCRETE MATHEMATICS (C.C.D.M.)

This is an option within the mathematics Ph.D. program, emphasizing interdisciplinary research at the intersection of computer science, statistics, and discrete mathematics. A minimum of thirty-three credit hours of coursework is required and includes designated core courses in discrete mathematics, statistics, and computer science. Students may undertake mathematics research of an interdisciplinary nature among these three areas.

LANGUAGE REQUIREMENT

Each Ph.D. student must demonstrate a reading knowledge of French, German, or Russian. The Graduate Programs Committee may approve the substitution of a different foreign language or a computer language for fulfillment of this requirement.

Further information may be obtained from the department's website at http://www.math.wvu.edu or by contacting the graduate director at gradprog@math.wvu.edu. Details on program requirements can be found in the Department's Graduate Handbook, available at http://www.math.wvu.edu/graduate_handbook.

FACULTY

CHAIR

• Edgar Fuller - Ph.D. (University of Georgia)

PROFESSORS

• Ian Christie - Ph.D. (University of Dundee)

• Gary H. Ganser  
  Applied Mathematics, Fluid Mechanics, Numerical Analysis

• Adam Halasz - Ph.D. (State University of New York at Stony Brook)  
  Mathematical Biology, Swarm Robotics

• David Miller - Ph.D. (Oklahoma State University)  
  Undergraduate Mathematics Education, Cognitive Science

• James E. Moseley  
  Partial Differential Equations, Modeling

• Vicki Sealey - Ph.D. (Arizona State University)  
  Mathematics Education

• Adrian Tudorascu - Ph.D. (Carnegie Mellon University)  
  Partial Differential Equations

ASSISTANT PROFESSOR

• Nicole Engelke-Infante  
  Undergraduate Mathematics Education

• Kevin Milans - Ph.D. (University of Illinois at Urbana Champaign)  
  Combinatorics, Graph Theory

• Charis Tsikkou  
  Nonlinear PDE
Master’s Admission Information

Admission to the M.S. program requires a WVU admission application and submission of applicable transcripts. International students must supply a passing TOEFL score or other acceptable evidence of English proficiency. Students seeking financial aid should also supply an assistantship application and three letters of recommendation. GRE scores are not required.

Programs are available for students to study applied mathematics, pure mathematics, industrial/applied/interdisciplinary mathematics, or mathematics for secondary educators. For regular admission to the M.S. program, students should have the equivalent of an undergraduate major in mathematics, including at least one semester of advanced calculus (Math 451 or equivalent) and courses in linear algebra and modern algebra. Students with deficiencies may be admitted provisionally; deficiencies are expected to be made up in the first year of study. A minimum of three semesters of calculus is normally required for such admission, but students can often complete their remaining calculus courses during the summer prior to full-time enrollment. To be in good standing, a student is expected to maintain at least a 3.0 average (B) in mathematics courses and to present at least a 3.0 average in all work offered in fulfillment of the degree program.

ADVISORY COMMITTEE

Each student will be assigned an advisory committee consisting of at least three members of the graduate faculty. This committee will assist the student in designing a written plan of study that takes into account the student's interests and needs as well as the aims of the department’s graduate programs. Later changes in the plan are possible only through mutual agreement of the student and the committee.

PROGRAMS

The student’s plan of study is developed in one of these programs: applied mathematics, pure mathematics, industrial/applied/interdisciplinary mathematics, or mathematics for secondary educators. The programs are designed either for students who intend to pursue a doctor of philosophy in mathematics or the mathematical sciences or for those planning to seek employment in education, government, or industry. Depending upon the program selected, thirty to thirty-three semester hours of approved coursework are required.

Note: MATH 590/690/696/697/790/797 may not be counted for credit to satisfy graduate course requirements.

EXAMINATIONS/THESSES/PROJECTS

Upon beginning graduate study, all M.S. students are given a basic exam in advanced calculus and linear algebra for purposes of course placement. Depending on the program chosen, students must complete examinations, a thesis, or a project as a graduation requirement.

Ph.D. Admission Requirements

For regular admission, applicants for the Ph.D. program must have completed a graduate degree similar to the M.S. in mathematics. Students with an exceptionally strong undergraduate background may sometimes be admitted provisionally, with twelve–eighteen credit hours of additional coursework required.

The following materials should be submitted:

• A WVU admission application
• An application for financial support (optional)
• Official undergraduate and graduate transcripts
• Three letters of recommendation from individuals having experience with the applicant’s mathematical ability
• TOEFL or IELTS scores for students whose native language is not English

All doctoral students must demonstrate that they are prepared to undertake doctoral work and research by passing an entrance examination, given each year in April and August, within two years after enrolling. Specifically, students entering the program in a given calendar year must pass the entrance examination by the end of the spring semester in the calendar year two years after. Students must pass examinations in two areas from among the four areas of algebra, real analysis, topology, and differential equations. For students in the CCDM option (see below), one of these area exams is replaced by an examination over the CCDM core curriculum.

Beyond any coursework taken to remove deficiencies while a provisional student, a minimum of twenty-four hours of approved coursework is required of all doctoral students, which must include a major area of four courses and two minor areas of two courses each. Certain level and distribution requirements apply to a student’s program. In addition, doctoral students must enroll for one credit hour of graduate seminar each semester they are in residence.

Ph.D. students may choose the CCDM option, which requires a minimum of 33 credit hours of coursework and includes designated core courses in discrete mathematics, statistics, and computer science. Students may undertake mathematics research of an interdisciplinary nature among these three areas.
Dissertation Committee

After the above requirements are satisfied, a student must request that the Director of Graduate Studies select a dissertation committee of at least five members (with a dissertation advisor as chairperson and one member from outside the department) for them.

Master of Science

MAJOR REQUIREMENTS

A minimum GPA of 3.0 is required in all courses applied toward the degree.
A minimum grade of B or higher is required for Mathematics courses included in the program of study.

<table>
<thead>
<tr>
<th>Select an Area of Emphasis</th>
<th>28-34</th>

Total Hours 34-43

* At most four courses in the plan of study may be from outside mathematics.

Other Curriculum Requirements:

Students must also meet these option prerequisites:

Partial differential equations (MATH 261 or MATH 465)
(may be satisfied by taking MATH 522)

Probability Theory (STAT 215 or STAT 461)
(may be satisfied by taking STAT 561)

Students must complete at least two courses from Math 452, Math 541, Math 543, Math 551, Math 555, and Math 581 with a grade of at least B in each.

Including required courses above, at least one course from 4 different groups below must be included. Within two different groups there must be a sequence of two suitably linked courses. Overall, at most 4 courses may be taken from outside the Mathematics Department, subject to approval by the Graduate Director.

I. Computation/optimization: MATH 521, MATH 522

II. Probability theory/mathematical statistics: STAT 561-562 (other approved STAT courses provided STAT 562 is taken)

III. Algebra/Discrete Math: MATH 541, MATH 543, MATH 571, MATH 573, MATH 545, MATH 645. CS courses as approved by the advisor and the Graduate Director

IV. Modeling: MATH 563, an approved course involving modeling, possibly outside Mathematics.

V. Mathematical Analysis: MATH 452, MATH 551, MATH 651, MATH 555

VI. Graduate courses (one 400-level possible with permission) from outside MATH/STAT/CS. These are to be approved by the Graduate Director.

Doctor of Philosophy

MAJOR REQUIREMENTS

Minimum GPA of 3.0 is required.

| MATH 694 | Seminar | 2 |
| or MATH 696 | Graduate Seminar |

Foreign Language Requirement

Complete the following coursework or select an area of emphasis:

| Major Area | 12 |
| Minor Area 1 | 6 |
Minor Area 2

**Group A (Algebra/Number Theory/Discrete Mathematics/Set Theory) Courses and possible minor sequences:**

<table>

**Total Hours 50**

**LANGUAGE REQUIREMENT**

Each Ph.D. student must demonstrate a reading knowledge of French, German, or Russian. The Graduate Programs Committee may approve the substitution of a different foreign language or a computer language for fulfillment of this requirement.

Further information may be obtained from the department’s website at http://www.math.wvu.edu or by contacting the graduate director at gradprog@math.wvu.edu. Details on program requirements can be found in the Department’s Graduate Handbook, available at http://www.math.wvu.edu/graduate_handbook.

**Applied Mathematics Area of Emphasis**

Students in this option must complete the four course RUME sequence. Students must also complete six additional mathematics courses, chosen from the areas in Groups A and B above in include at least four courses at the 700-level. At least two courses should be chosen from each group A and B so as to fulfill the requirements of a minor area. The remaining two courses can be used, for instance, to acquire additional breadth in mathematics or to achieve research level depth in an area. Course options are listed above. In cases where RUME 1-2 have been taken in the M.S program, only RUME 3-4 are required.

Major Learning Goals

MATHEMATICS

The Department of Mathematics offers the M.S. and Ph.D. degrees and has programs emphasizing pure and applied mathematics (M.S., Ph.D.), mathematics for secondary educators (M.S.) and research in undergraduate mathematics education (Ph.D). Major goals include the following:

Students in the M.S. program receive broad, rigorous training in areas fundamental to mathematics, with options depending on their post-graduation goals:

• Master's level students planning to continue graduate study will have a solid grounding in mathematics basic to their intended graduate programs.
• Students preparing for industry jobs will possess the breadth of applicable mathematical knowledge and experience needed for the challenges of mathematics in industry.
• Students preparing for secondary education will have a broad based deep appreciation of the core of mathematics and effective pedagogy.

Ph.D. students continue advanced training with the following goals:

• Obtain specialized, advanced training in a major field giving them a research-level background and the ability to contribute in their field.
• Under the mentorship of their thesis supervisor, conduct independent, original research in mathematics leading to a significant contribution in their field of study.
• Become acquainted with mathematical research in a variety of fields through course work, seminars, colloquia, and conference presentations.
• Gain significant experience in teaching at the university level and in communicating mathematics.
M.S. Examinations

Students in the Applied Mathematics area of emphasis must pass the M.S Advanced Exam by passing two subject area exams at the M.S level, taken from among Real Analysis, Algebra, Topology, and Differential Equations. No more than three attempts at any one subject area exam are permitted.

Students in the Pure Mathematics area of emphasis must pass the M.S. Advanced Exam by passing two subject area exams at the MS level, taken from among Real Analysis, Algebra, Topology, and Differential Equations. No more than three attempts at any one subject area exam are permitted.

Students in the Mathematics for Secondary Education area of emphasis must pass a final written examination based on their course work, consisting of four sections: algebra, geometry, applied/discrete mathematics, and probability/statistics. With the approval of the Advisory Committee, the exam may be taken after completion of the required 18 hours of graduate mathematics courses and the core curriculum.

Ph.D. Examinations

1) Students must pass the Ph.D. Entrance Examination by the end of their second year in the program. This entails passing two subject area exams at the Ph.D. level, from among Algebra, Real Analysis, Topology, and Differential equations. Any exam may be taken up to three times.

2) Students must pass the Qualifying Examination by the end of their third year. Students whose dissertation area is Research in Undergraduate Mathematics Education will be provided by their committee with a research assignment, based on content areas and research techniques in the field, to be completed over a four-week period. The results will be presented in written form and orally examined by the student's committee. Second, the student must present a thesis prospectus. The student's committee must approve the outcome of both the exam and the prospectus.

3) For each minor area in which the GPA is not 3.5 or above, as part of the Qualifying Exam, the student must take an exam over the minor area to assess competency.

Physics

Degrees Offered

- Master of Science
- Doctor of Philosophy

Nature of the Program

The graduate program is designed to provide a solid background in classical and modern physics, a broad understanding of major research fields, and concentrated research experience in one area. Applicants normally enter with a bachelor of science degree in physics. A student whose background is weak in a particular area is encouraged to register for the appropriate undergraduate course. The normal first-year courses include PHYS 611, PHYS 651, PHYS 631, and PHYS 633 plus possible electives. In the courses, no distinction is made between those students who intend a terminal M.S. degree and those who intend a Ph.D. degree. The minimum grade for credit in graduate courses is C, and a grade point average of 2.75 must be maintained. A GPA of 3.0 is required for graduation with either a M.S. or Ph.D. degree. Progress of all graduate students is reviewed annually by the graduate advisor or their PhD committee.

Financial Aid

With rare exceptions, all students who are admitted receive financial support. Beginning students usually receive teaching assistantships; more advanced students receive research assistantships. Several fellowships are available for outstanding students, allowing full-time concentration on coursework and research and a more rapid progress toward the degree.

  General Relativity
• H. Arthur Weldon - Ph.D. (Massachusetts Institute of Technology)
  Particle Physics

Admission
Applicants are expected to have a bachelor’s degree in physics with upper-division courses in electricity and magnetism, mechanics, quantum mechanics, thermodynamics, and mathematical methods. Students lacking some of these courses may be admitted provisionally and will be allowed to remedy the deficiencies by taking the appropriate undergraduate courses. The GRE General Test is required. The GRE Physics Subject Test is strongly recommended, particularly for students from non-US institutions. If English is not the student’s native language, TOEFL or IELTS scores are also required. The application deadline is January 15. Contact the department for additional information.

Master of Science

MAJOR REQUIREMENTS
Minimum grade of C or higher is required in all courses applied toward degree.

PH.D. CANDIDACY EXAMINATIONS

To be admitted to candidacy for the Ph.D., a student must pass both a written and an oral candidacy examination. The written examination consists of three parts: quantum mechanics, electromagnetism, and classical mechanics. The exam is given twice a year, in August and in January. To be eligible to take any candidacy exam, the student must be in good standing (see below).

The oral part of the candidacy exam is a presentation to the faculty on the student’s doctoral committee. The student gives a lecture on some published research that has been assigned by his or her research advisor.

The doctoral committee has four members. Three or more members must be members of the WVU graduate faculty. Three members must be from the faculty of the Department of Physics and Astronomy. The fourth member may be internal or external to WVU. If external to WVU, the fourth member must hold a PhD in a field related to the candidate’s dissertation research. If internal to WVU, the fourth member must be from a department other than Physics and Astronomy. All members must have a PhD.

RESEARCH REQUIREMENTS

Research is the central focus of the degree and is directed by a faculty advisor over a period of several years. When the research is completed, the student must write a dissertation and defend it before the doctoral committee of four faculty. The average completion time for the Ph.D. is five years beyond the B.S. Research specialties within the department include astrophysics/astronomy, condensed matter physics, physics education research, and plasma physics.

Major Learning Goals

PHYSICS AND ASTRONOMY

The central missions of the Graduate Program in Physics and Astronomy are to train the next generation of Physicists and Astronomers for productive careers in the global economy and to expand the scientific boundaries of physics and astronomy.

Students earning a M.S. or Ph.D. in Physics and Astronomy will be able to:

• Explain physics and astronomy principles as they pertain to their specific field of research.
• Demonstrate the ability to understand and critically evaluate the existing literature published within their field.
• Independently design and execute new experimental, theoretical, or computational studies that can address important scientific questions in physics and astronomy.
• Effectively communicate their research in oral and written formats, including the ability to author manuscripts suitable for publication in peer reviewed scientific journals.
• Understand the ethical impact of personal and professional behavior.

Academic Standards

To be a graduate student in good standing requires the following:

• Maintain a GPA of 2.75 or better in graduate physics courses taken at WVU, excluding PHYS 797.
• A GPA of 3.0 or better is required for graduation.
• All entering Ph.D. students are required to take all three written graduate exams at the beginning of, or immediately prior to, their first semester.
• Following the initial exam, as needed, Ph.D. students can retake exams up to three times, but no later than the beginning of their fourth semester of graduate studies.
• Ph.D. students must pass two sections of the written candidacy examination by the end of three years.
• Ph.D. students must pass the remaining third section of the written candidacy examination by the end of four years.
• Ph.D. students must select a Ph.D. committee of four faculty after passing the written exams.
• Ph.D. students must complete the oral candidacy examination within three semesters (after completing the third section of the written candidacy examination).
• Students admitted as M.S. degree candidates are not expected to take the graduate qualifying exams but must maintain at GPA of 2.75 and complete their M.S. degree within three years.

Political Science

Degrees Offered
• Master of Arts
• Doctor of Philosophy

Nature of the Program
To give advanced training to students who desire to enter research or teaching fields relating to American politics, public policy (either U.S. domestic or international), comparative politics, and/or international politics, and to those seeking careers as policy analysts in government or the private sector.

The Master of Arts is designed to provide students with a broad knowledge of political science and the policy-making process. This includes the study of many over-arching factors shaping political thought, analysis, decision-making, and an examination of specific influences that shape public policies at the international, national, state, and local levels of government. Students choose classes from the fields of American politics, comparative politics, international relations, and public policy in addition to taking three classes in political methodology designed to ensure students possess expertise in how to conduct systematic quantitative research. Most graduates will take jobs in government or with private firms needing specialists in policy analysis; however, this degree also leaves students well-placed for further study of these issues in Ph.D. programs.

The Doctor of Philosophy degree is designed for people planning careers as researchers and teachers in institutions of higher education or as policy analysts in government or the private sector. All students are expected to complete coursework that should include mastery of two of the four major subfields (the subfields include American politics, international politics, comparative politics, and public policy) and to pass general exams in two of them. The student's coursework will provide them with a firm grounding in relevant literatures and prepare them to make their own contributions to the fields in which they specialize. Coursework is also available to train students as expert analysts who will leave the program with a comprehensive knowledge of policy formulation, implementation, and evaluation, as well as a thorough understanding of the dynamics of political institutions. The design of the program will ensure that our graduates are trained in research methodology and statistical techniques.

Faculty
The Department of Political Science has nineteen full-time faculty members. The major strengths of the graduate faculty consist of American politics (specialties include political institutions, political behavior, public opinion, and judicial politics), public policy (specialties include bureaucracy, law and society, and social welfare policies), international politics (specialties include U.S. foreign policy, comparative foreign policy, international political economy, and national security policy), comparative politics (specialties include comparative political institutions, elections systems, contentious politics, and cross-national political analysis), and research methods.

Research
Graduate students have opportunities to conduct research with political science faculty. Several members of the faculty regularly co-author papers with graduate students. Some graduate students have co-authored articles and book chapters with faculty and have worked on externally-funded grant projects.

Financial Aid
The department has a number of Graduate Assistant (GA) positions. All new applicants are considered for these positions. GA positions cover university tuition and provide a stipend. In addition, the Department provides waiver hours for graduate students. These waiver hours provide for payment of all, or a portion, of university tuition. The Department awards GA positions and waiver hours on a competitive basis because there are fewer GA positions and fewer waiver hours than students who desire them. The Department considers applicants' GRE scores, undergraduate and/or graduate GPAs, letters of recommendation, and so on when determining the merit of applicants. Although Ph.D. students receive priority for funding, outstanding MA candidates have received funding in the past. Some students in the program also find GA positions outside of the department. Students interested in financial assistance should apply directly to the Department of Political Science. Graduate assistants may enroll for no more than nine credit hours per semester (excluding colloquium).
FACULTY

CHAIR
• R. Scott Crichlow - Ph.D. (Louisiana State University)

PROFESSORS
• Joe D. Hagan - Ph.D. (University of Kentucky)

M.A. ADMISSION INFORMATION

Most applicants for the Master of Arts degree will have completed a B.A. in Political Science. However, students from other fields and disciplines are also encouraged to apply. Applicants should have an overall grade point average of 3.0 or better and should submit three letters of recommendation from faculty familiar with their work. All students wishing to be considered for departmental financial support during their first year in the program must also submit the results of the Graduate Record Examination (GRE). The GRE requirement will be waived for applicants not seeking departmental financial support who have an undergraduate or graduate GPA of at least 3.5 at the time of application.

In order to remain in good standing, students must maintain a 3.0 cumulative average and receive a 3.0 average in each semester for which they are enrolled. Students who do not maintain a 3.0 cumulative average will be placed on probation and will be suspended if they fail to regain a 3.0 cumulative average in their next nine hours of study. Successful completion of the degree entails completing 36 hours of Political Science courses, not counting any hours earned for POLS 799. 9 of those hours must include completion of POLS 600, POLS 601, and POLS 602. All students must enroll in POLS 799 each semester in residence.

PH.D. ADMISSION INFORMATION

Admission to the Ph.D. program is open to students with either a bachelor’s or master’s degree. Students with degrees in political science, economics, public administration, sociology, history, psychology, engineering, social work, business, law, medicine, or journalism are encouraged to apply. Applicants will ideally have a grade point average of 3.5 or better. Some training in statistics and a strong background in written communication is desired. In addition, all applicants must submit the results of the Graduate Record Examination and at least three letters of recommendation from faculty familiar with the applicant’s work. Applicants from foreign countries must submit the official results of the Test of English as a Foreign Language (TOEFL) as well. Admission will be based on an overall assessment of the individual’s record.

Students must complete 42 hours of coursework. This should include 12 hours in each of two subfield specialties (students will work with their advisors to build an appropriate combination of classes to cover two of the following four subfields – American politics, public policy, comparative politics, and international relations), 12 hours of research methods courses, and 6 hours of Political Science electives. In addition to their coursework, students must also pass written comprehensive examinations in their two specialty subfields and complete and defend a dissertation. All coursework completed for the M.A. at West Virginia University also counts toward the Ph.D. Coursework from other institutions will be evaluated on a case-by-case basis.

In order to remain in good standing, students must maintain a 3.0 cumulative average and receive a 3.0 average in each semester during which they are enrolled. Students are required to spend at least one year (two semesters) in residence. All graduate students must enroll in POLS 799 each semester in residence.

### Comparative Politics (12 hours)

- POLS 493: Special Topics
- POLS 493: Special Topics
- POLS 493: SPTP: International Organiztns
- POLS 550: Comparative Politics
- POLS 555: Comparative Public Policy
- POLS 559: Contentious Politics
- POLS 591: ADTP: State in World Politics
- POLS 591: Advanced Topics
- POLS 593: SPTP: Contentious Politics
- POLS 593: SPTP: Comp Pol Developing World
- POLS 691: ADTP: African Politics
- POLS 691: Advanced Topics
- POLS 691: ADTP: Western Dem Politics

### International Relations (12 hours)

- POLS 560: International Theory and Policy
- POLS 591: ADTP: State in World Politics
- POLS 591: ADTP: International Conflict
- POLS 600: Introduction to Political Research
- POLS 665: Comparative Foreign Policy
- POLS 666: National Security Policy
- POLS 667: Foreign Policy Decision Making

### Public Policy (12 hours)

- POLS 493: Special Topics
- POLS 493: SPTP: Minority Politics
- POLS 530: Policy Analysis
- POLS 531: Economic Analysis of Politics
- POLS 536: Politics of Agenda Setting
- POLS 555: Comparative Public Policy
- POLS 591: Advanced Topics
- POLS 591: ADTP: Research Ethics
- POLS 611: Intergovernmental Relations
- POLS 635: Seminar: Policy Evaluation
- POLS 638: Seminar: Policy Implementation
- POLS 691: Advanced Topics

### Political Science electives (any 500, 600, 700 level POLS course excluding coursework used to satisfy field coursework requirement and POLS 797 and POLS 799)

- POLS 600: Introduction to Political Research
- POLS 601: Quantitative Political Analysis
- POLS 602: Advanced Quantitative Methods

### Dissertation

- POLS 797: Research
Major Learning Goals

POLITICAL SCIENCE

1. A command of basic substantive knowledge about the basic institutions, political actors, and relevant processes in state, national, and international political systems – in particular as they apply to the student’s particular area of emphasis.

2. A knowledge of major policy issues in state, national, and international affairs and an appreciation of the complexity reflective of the uncertainties, trade-offs, and institutional/bureaucratic context of problems confronting governments.

3. An ability to think critically about political phenomena in a way that applies alternative explanatory perspectives across the major theoretical schools of thought in the political science literature.

4. A demonstrated capability to carry out systematic empirical research in political science, i.e. articulate a theoretical question, construct a rigorous research design, and analyze data or cases using appropriate methodological approaches.

5. An appreciation of the policy implications of different theoretical approaches and, more generally, how they relate to the larger ethical issues facing the West Virginia, national, and international communities.

Psychology

Degrees Offered

• Master of Science
• Doctor of Philosophy

Doctoral Program Majors

The doctoral degree major areas of study in Behavior Analysis, Behavioral Neuroscience, Clinical & Clinical Child Psychology, and Life-Span Developmental Psychology prepare students for careers in research, teaching, and/or practice.

Program Accreditation

The Clinical Program at West Virginia University is comprised of two major areas of study: Clinical Psychology and Clinical Child Psychology. The Program has been accredited continuously by the American Psychological Association since 1966. In 2012, the Program was re-accredited for a full 7 years, with the next site visit scheduled to occur in 2019. For any questions regarding accreditation of this or any other program, contact the Office of Program Consultation and Accreditation of the American Psychological Association, 750 First Street, NE, Washington, DC 20002. Phone number: (202) 336-5979. Website: http://www.apa.org/ed/accreditation.

The Behavior Analysis Program at West Virginia University is accredited by the Association for Behavior Analysis International. In 2014, the Program was re-accredited from 2014-2019.

Admission

Students are admitted only at the beginning of the fall semester. Applications must be completed by the preceding December 1.

Acceptance is based on the following:

• Adequate academic aptitude at the graduate level as measured by the Graduate Record Examination
• Achievement in undergraduate coursework with a minimum grade point average of 3.0
• Personal qualities that predict success in graduate study and as a professional after graduation
• Adequate preparation in psychology and related fields
• Fit between the applicant's interests and the offerings of a department graduate program major area of study

Non-Degree Students

Graduate courses in psychology are designed for regularly admitted degree-seeking psychology students as part of an extensive program of preparing those students for professional careers. Thus, students not admitted into one of the psychology graduate program areas are discouraged from taking graduate courses in psychology. Non-psychology graduate students must obtain the instructor's permission to enroll in any psychology graduate course.
FACULTY

CHAIR

• Kevin Larkin - Ph.D. (University of Pittsburgh)
  Clinical Health Psychology, Applied Psychophysiology, Cardiovascular Behavioral Medicine

PROFESSORS

• Christina Duncan - Ph.D. (Louisiana State University)
  Behavioral Pediatrics, Chronic Illness, Adherence

• Barry A. Edelstein - Ph.D. (University of Memphis)
  Eberly Family Distinguished Professor of Clinical Psychology, Clinical Gero-psychology, Anxiety and Decision-making in Older Adults

• Katherine Karraker - Ph.D. (Michigan State University)
  Associate Provost for Graduate Academic Affairs. Adults’ Perceptions of Infants, Infant Social Development

• Kennon A. Lattal - Ph.D. (University of Alabama)
  Centennial Professor. Experimental Analysis of Behavior, History and Philosophy of Psychology, Human-Pet Interactions

• Cheryl B. McNeil - Ph.D. (University of Florida)
  Disruptive Behavior Disorders of Children, Child Behavior Therapy, Parent-Child Interactions

• Daniel W. McNeil - Ph.D. (University of Alabama)
  Eberly Family Professor for Outstanding Public Service. Experimental Psychopathology, Behavioral Dentistry and Behavioral Medicine, Pain and Anxiety

• Tracy L. Morris - Ph.D. (University of Mississippi)
  Eberly Distinguished Professor of Outstanding Teaching and Associate Dean for Research, Graduate Studies, and Outreach. Developmental Psychopathology, Social Anxiety, Peer Relationships

• Melanie C. Page - Ph.D. (Arizona State University)
  Assistant Vice President for Creative and Scholarly Activity. Quantitative/Developmental Psychology

• Michael Perone - Ph.D. (University of Wisconsin-Milwaukee)
  Associate Dean for Faculty. Positive and Negative Reinforcement, Animal and Human Operant Behavior, Research Methodology

• JoNell Strough - Ph.D. (University of Utah)
  Life-Span Development, Decision Making, Everyday Problem Solving, Gender Development

ASSOCIATE PROFESSORS

• Karen G. Anderson - Ph.D. (University of Florida)
  Behavioral Pharmacology, Self-Control and Impulsivity

• Amy Fiske - Ph.D. (University of Southern California)
  Late Life Depression and Suicide

• Amy Gentzler - Ph.D. (Kent State University)
  Emotion Regulation and Coping in Childhood, Positive Psychology

• Amy Herschell - Ph.D. (West Virginia University)
  Dissemination of Evidence-Based Treatments

• Elisa Krackow - Ph.D. (Binghamton University-SUNY)
  Adult and Child Testimony, Developmental Psychopathology

• Aaron Metzger - Ph.D. (University of Rochester)
  Adolescent Social-Cognitive Development, Civic Engagement, Adolescent-Parent Communication

• Hawley Montgomery-Downs - Ph.D. (University of Connecticut)
  Sleep, Sleep Disorders, Developmental Psychobiology

• Julie Hicks Patrick - Ph.D. (University of Akron)
  Decision Making, Family Processes in Mid- and Late-Life

• Claire St. Peter - Ph.D. (University of Florida)
  Applied Behavior Analysis, Assessment and Treatment of Problem Behavior, School-Based Interventions

• Natalie Shook - Ph.D. (Ohio State University)
  Social Psychology, Attitudes and Emotion, Cognitive Bias

ASSISTANT PROFESSORS

• Melissa Blank - Ph.D. (Virginia Commonwealth University)
  Behavioral Neuroscience, Tobacco Use, Tobacco-Related Health Risks, Genetics of Substance Use

• Regina Carroll - Ph.D. (University of Nebraska Medical Center)
  Applied Behavior Analysis, Autism and Developmental Disabilities
• Steven Kinsey - Ph.D. (Ohio State University)
  Behavioral Neuroscience, Stress and Inflammation
• Shari Steinman - Ph.D. (University of Virginia)
  Cognitive Bias in Anxiety Disorders, Treatment of Anxiety and Obsessive Compulsive Disorders
• Nicholas Turiano - Ph.D. (Purdue University)
  Personality, Health, and Aging
• Cole Vonder Haar - Ph.D. (University of Southern Illinois – Carbondale)
  Behavioral Dysfunction and Traumatic Brain Injury, Behavioral Neuroscience

TEACHING ASSOCIATE PROFESSOR
• Connie Toffle - Ph.D. (West Virginia University)
  Teaching of Psychology

TEACHING ASSISTANT PROFESSORS
• Elizabeth Levelle - Ph.D. (West Virginia University)
  Teaching of Psychology, Academic Advising
• Kris Martens - Ph.D. (Southern Illinois University – Carbondale)
  Behavioral Neuroscience, Recovery from Traumatic Brain Injury
• Sharon Tenenholz - Ph.D. (University of California, Los Angeles)
  Teaching of Psychology, Curriculum Design, Academic Advising

CLINICAL INSTRUCTOR
• Stephanie McWilliams - MA (Columbia University)
  Youth Mentorship; Sport and Exercise Psychology, Health Psychology, Behavior Change and Weight Management

PROFESSORS EMERITI
• Stanley Cohen - Ph.D.
• Philip Comer - Ph.D.
• William J. Fremouw - Ph.D.
• Robert Hawkins - Ph.D.
• Kent Parker - Ph.D.
• Hayne Reese - Ph.D.

ADJUNCT ASSISTANT PROFESSORS
• Martin Boone - Ph.D., (Oklahoma State University)
• Kimberly Foley - Ph.D. (West Virginia University)
• Keegan Kowcheck - MA (West Virginia University)
• Kara Samaj - MA (West Virginia University)

Master of Science

Students who are accepted into the doctoral (Ph.D.) program in psychology will receive the M.S. degree upon completing the requirements listed below.

Total Hours: 85

* Research Methods in Clinical Psychology counts as the third departmental methods course.
** Students must complete at least 18 hours of practica (660 Clinical Psychology Practicum or 670 Clinical Child Practicum) and three hours of internship (750 Clinical Internship). At least two academic years of practica must be through a Quin Curtis Center Clinical Team, and you must have at least two different supervisor/team experiences, each lasting one academic year or twelve month period.
*** Students are expected to be involved in research throughout their graduate career, and their enrollment in PSYC 795 (Independent Study), should reflect this activity. Students must complete at least six hours.

**Qualifying Examination**

- Admission to Doctoral Candidacy
- Defense Declaration Form
- Dissertation
- Oral Defense Form
- ETD Approval

- Application for Graduation
- Graduation Certification: Department
- Graduation Certification: College

**Total Hours**: 47-51

---

* Other courses approved by the Life-Span Developmental Training Committee may also be used to fulfill this requirement. PSYC 711 may be repeated for credit when the seminar topic is different.

** Students are expected to be involved in research throughout their graduate career, and their enrollment in PSYC 795 (Independent Study) should reflect this activity.

*** Usually, electives include at least three credit hours of PSYC 745 (Seminar in Life-Span Development). PSYC 745 may be repeated for credit when topics differ.

---

### Major Learning Goals

#### PSYCHOLOGY

Students graduating with a doctorate in psychology will acquire the following research and communication skills:

- Students will design and execute empirical research to investigate psychological topics.
- Students will conduct and interpret statistical analyses.
- Students will clearly communicate results of empirical research, both orally and in writing.
- Students will create and deliver professional oral presentations.
- Students will demonstrate expert knowledge of their area of emphasis.
- Students will be conversant with historical, philosophical, and theoretical issues in psychology.
- Students will abide by the ethical principles of the discipline of psychology.

### Public Administration

#### Degree Offered

- **Master of Public Administration**

The Master of Public Administration (MPA) degree prepares individuals for a career in public service. WVU's Department of Public Administration offers the only nationally accredited MPA program in West Virginia. The MPA degree prepares individuals to work in government and nonprofit agencies to develop and implement public policies and programs. The MPA program offers flexible class times, full and part-time enrollment, small class settings, and opportunities to work directly with community and government organizations through team-based class projects, the internship experience, professional development activities and community service.

#### Dual Degrees

The department has established dual degree programs with a number of other graduate programs. A dual JD/MPA degree program established with the College of Law provides preparation in both law and public administration. A dual MSW/MPA degree in cooperation with the School of Social Work provides preparation for administrators in the social services. Dual degree programs may also be arranged with other academic programs and professional schools. Graduate studies regulations permit limited credit from one graduate degree to be applied to a second degree. Students may pursue two degrees and use approved coursework for both degrees.
FACULTY

CHAIR
• Maja Husar Holmes - Ph.D. (Syracuse University)
  Public Management and Public Leadership

PROFESSOR
• L. Christopher Plein - Ph.D. (University of Missouri)
  Eberly Professor of Outstanding Public Service, Legal and Political Foundations, Public Policy Analysis, Social Policy, Community and Economic Development

ASSOCIATE PROFESSORS
• Karen Kunz - D.P.A. (University of Illinois, Springfield)
  Financial Management, Corporate Use of Public Funds, Political Economy
• Margaret Stout - Ph.D. (Arizona State University)
  Local Government, Community Development, Public Policy and Public Planning

ASSISTANT PROFESSORS
• Matthew Barnes - Ph.D. (Princeton University)
  American, state and local politics, environmental and energy politics and policy, and public opinion
• Paolo Farah - LLM, JD (College of Europe, University of Paris)
  Energy, Environment, and Natural Resource Law, Human Rights

PROFESSORS EMERITI
• Nancy L. Adams - Ph.D. (Fielding Institute)
• Gerald M. Pops - Ph.D. (Syracuse University)
• David G. Williams - Ph.D. (State University of New York at Albany)

Admission

Candidates must meet the WVU general admission requirements for a bachelor's degree from an accredited college. Admission into the MPA program is competitive with decisions based on the following material:

• Application for admission and transcripts. Apply here (http://admissions.wvu.edu/admissions/how-to-apply)
• Two Recommendations. Recommendations from professional or academic references should be requested through the online Graduate Application portal.
• Current Resume. Please list work experience, volunteer activities, internships, academic degrees and honors, and other accomplishments you feel the admissions committee should take into account in reviewing your application.
• Personal Statement. Provide a letter of intent indicating your interest in a career in public service, what you hope to gain from the MPA program, and why WVU offers you the best opportunity for achieving your professional goals. Please note in the letter of intent if you are applying for a graduate exam waiver request in the application based on one of the exceptions noted below.
• Graduate Exam Scores (GRE, GMAT or LSAT). Submit standardized test scores from one of the following Graduate Exams:
  • Graduate Record Examination (GRE)
  • Graduate Management Admission Test (GMAT)
  • Law School Admissions Council Exam (LSAT)

Exemptions to the Graduate Exam requirement

The requirement that applicants submit GRE, GMAT, or LSAT scores will be waived under the following circumstances:

Expedited Admission based on Undergraduate GPA: The applicant who earned a bachelor's degree from an accredited college or university in West Virginia and achieved a cumulative GPA of 3.4 or higher are eligible to waive the GRE/GMAT/LSAT requirement to apply for the program. Please note in your letter of intent that you are applying for an expedited admissions.

Evidence of Graduate Level Competence: Applicants who already hold a graduate degree or have successfully completed at least 18 semester hours in another accredited graduate program, may request a waiver of the GRE/GMAT/LSAT requirement. Please state in your letter of intent that you are requesting a waiver based on graduate level competence.

Significant Managerial Administrative Experience: Applicants with at least 5 years of managerial administrative experience after completing their undergraduate degree may request a waiver of the GRE/GMAT/LSAT requirement by providing a letter of intent about their verbal/written competency...
and quantitative competency. The letter of intent should provide specific examples of their ability to write effectively, analyze complex situations, and complete quantitative analysis.

**Application Deadline**

The MPA program accepts students for both Fall and Spring admission. The deadline for all application materials for Fall admission is April 1. Applicants will be notified of the committee's decision around April 15. The deadline for all application materials for Spring admission is October 15. Applicants for the spring term will be notified around October 31. Applications for admission may be considered after these deadlines on a space-available basis. Incomplete applications will not be considered.

For further information, please contact:

Debbie.Koon@mail.wvu.edu (dkoon@wvu.edu)  
(304) 293-2614  
or publicadmin.wvu.edu

**GENERAL REQUIREMENTS**

The MPA degree requires the completion of forty-five (45) credit hours in the following courses:

**Master of Public Administration**

**MAJOR REQUIREMENTS**

Minimum GPA of 3.0 is required.

Minimum grade of C is required in all required courses.

Students who desire to specialize in this area as part of their MPA degree take elective courses offered in healthcare administration. A certificate program is also available for students who are just interested in the healthcare specialization as a non-degree seeking student. For more information, please consult: http://publicadmin.wvu.edu/.

Local Governance and Community Development Area of Emphasis

Counties and municipalities are the levels of government most directly involved in community and economic development. Localities are where we live, learn, work, and recreate. These and other local governments, like school districts and public utilities, comprise the largest sector of public employment in the United States. In fact, employment in local government has even been growing while it declines at other levels of government. Adding to this sub-sector the many nonprofit organizations that engage in community and economic development, the opportunities for employment in this field of public service abound.

Capstone Experience

PUBA 780 Healthcare Administration Practicum (or equivalent capstone course approved by the Director.) 3

Total Hours 15

Major Learning Goals

MASTER OF PUBLIC ADMINISTRATION

1. Define democratic values and explain how they frame public service ethics.
2. Make personal choices among and synthesis of differing approaches to public service.
3. Integrate public service values into human resource management.
4. Explain the changes occurring in society as they affect human capital appropriate and recommend responses.
5. Interpret and apply concepts of multiculturalism, diversity, acculturation, culture, and theories of difference.
6. Define and differentiate public management concepts and leadership approaches.
7. Examine, select, and recommend appropriate management strategies and actions to address public issues.
8. Define, distinguish, and apply multiple theoretical frameworks to situational analysis and synthesize preferred approaches.
9. Define, frame, evaluate, and recommend responses to important public issues.
10. Examine the stages and actors involved in public policy making process.
11. Engage in evidence-based and empirical analysis and evaluation that informs policy.
12. Apply management tools and leadership skills in field-based activities.
13. Participate in the policy decision making process in the public or nonprofit context.
15. Define, frame, evaluate, and recommend responses to specific public contexts.
16. Generate, co-produce, and share innovative research with students.

Social Work

Degree offered

- Master of Social Work

Nature of the Program

The mission of the M.S.W. Social Work Program at West Virginia University is to train graduate students in advanced social work practice either with individuals, families, and groups or in community organizing and social administration. The focus of this training is to produce competent and effective practitioners committed to enhancing social well-being and quality of life with particular emphasis on vulnerable and oppressed populations in small towns and rural areas characteristic of the Appalachian region.
All M.S.W. students complete coursework in social work practice, social welfare policy, human behavior and the social environment, social work research, and field instruction. In addition, students select a practice track—direct practice or community organizing and social administration.

Direct practice students gain the knowledge and skills to provide direct and clinical services to individuals, families, and small treatment groups. Community organizing and social administration students gain knowledge and skills to provide leadership to communities in the development, administration, and support of service programs.

Students have the opportunity to complete their field internships with agencies throughout West Virginia and adjacent areas. In addition, a dual degree option is offered in conjunction with the Department of Public Administration. Graduate certificates are available in the areas of gerontology and nonprofit management (http://grad.wvu.edu/). All degree programs offered by the university are accredited by the Council on Social Work Education.

The School of Social Work supports both full-time and part-time graduate study at the campus in Morgantown and part-time graduate study at several extended campus sites, including Charleston, Beckley, Keyser, Wheeling, and Martinsburg. Regular-standing students—those with degrees in areas other than social work or those with social work degrees who do not meet the criteria for advanced-standing status—begin the program in fall semesters. It takes two years to complete the program on a full-time basis (including two summer sessions between the first and second years of the program) and three years to complete the program on a part-time basis (including summer sessions). Full-time advanced standing students (those with a qualifying B.S.W. degree) begin the program in January and complete the program in sixteen months. Part-time advanced-standing students begin in the fall semester and finish in just under two years.

Applicants to the M.S.W. program come from a variety of academic disciplines and have varying degrees of experience in the field of social work. Students interested in applying should consult the website: http://socialwork.wvu.edu or contact:

M.S.W. Admissions
School of Social Work
West Virginia University
P.O. Box 6830
Morgantown, WV 26506-6830

Phone: (304) 293-3501

Application information is also available on our website: http://socialwork.wvu.edu.

Career Opportunities

Graduates of the M.S.W. program are employed throughout the United States and internationally. They work as individual, family, and group treatment specialists, planners, community organizers, and social researchers. They also work as social work educators and as administrators in a variety of programs such as mental health clinics, hospitals, correctional institutions, courts, delinquency programs, aging programs, family counseling agencies, child protective agencies, public welfare departments, child development programs, drug and alcohol abuse programs, public schools, community action agencies, settlement houses, city governments, state government planning agencies, federal administrative agencies, and private research and development organizations concerned with human problems.

There has been a constant growth in the need for professional social workers. It is anticipated by the Bureau of Labor Statistics and other research bodies that the employment demand for social workers will continue to increase in numbers and in varieties of programs. The WVU social work curriculum is designed to help students prepare for these careers.

FACULTY

DIRECTOR
  • Tracy Morris, Interim Director - Ph.D. (University of Mississippi)

PROFESSORS
  • Elise Fullmer - Ph.D. (State University of New York Albany)
    Rural Social Work, Aging, LGBT and Gender Studies

EMERITUS FACULTY

• Marjorie H. Buckholz-Cleveland - Ph.D. (West Virginia University)
• Barry Locke - Ed.D. (West Virginia University)
• Roger A. Lohmann - Ph.D. (Brandeis University)
• Nancy Lohmann - Ph.D. (Brandeis University)
• Caroline T. Mudd - M.S.W. (University of Pennsylvania)

M.S.W. ADMISSION PROCESS

The School of Social Work has adopted an online application process. Please carefully read and follow all instructions as outlined.

APPLICATION DEADLINES

Please remember that all required materials must be received and processed by the following deadline dates. Keep in mind transcripts, references, and test scores often take longer than anticipated to arrive.

• March 1 is the priority deadline. Applications submitted by March 1 will be given preference for graduate assistantships and scholarships.
• April 1 is the standard deadline. All applications must be submitted by April 1 for consideration.
May 1 is the late application deadline. All applications must be submitted by May 1, and late application acceptance is based upon available space.

Requirements
Note: Materials marked with an ‘*’ must be uploaded/submitted at http://grad.wvu.edu/apply in the Supplemental Material section.

COLLEGE PREP
• Bachelor’s degree from an accredited college or university

PREREQUISITE COURSES
• Successful completion of thirty hours of courses in the liberal arts, including the social, behavioral, and biological sciences
• Evidence of study related to diverse cultures, social conditions, social problems, and individual lifespan

ADVANCED-STANDING
Applicants who have received a B.S.W. from a Council on Social Work Education-accredited program within the last eight years may apply for advanced-standing. Advanced-standing enables the baccalaureate-holding social worker to move directly to the program’s advanced curriculum, waiving twelve credits of foundation-level courses as well as the foundation field experience.

The School of Social Work does not give academic credit for work or life-experience.

GRADE POINT AVERAGE
• At least a 3.0 overall GPA
• A 3.0 or higher GPA for advanced-standing applicants in their undergraduate social work courses

APPLICATION AND APPLICATION FEE*
• Complete the combined WVU Graduate/School of Social Work application
• $60 application fee

TRANSCRIPTS
• Submit official transcripts to the WVU Office of Graduate Admissions at P.O. Box 6009, Morgantown, WV 26506

RESUME*:
• Submit a current resume including employment and volunteer experience

LETTERS OF RECOMMENDATION*
Three letters of recommendation are required. Contact information for these individuals should be provided within the online Graduate Application. Please submit a recommendation from each of the following categories:
• Academic
• Social Work/Human Service Experience (volunteer or paid)
• Employer

Advanced-standing applicants must submit a supporting recommendation from the director of their undergraduate program.

TESTING
Applicants with an undergraduate GPA above 3.0 do not have to take the General Requirements Examination (GRE). Applicants whose undergraduate GPA is below 3.0 must take the GRE. Official copies of test scores must be sent directly from Educational Testing Services (ETS) to WVU. Our Institution code is 5904.

International Students whose first language is not English must take the Test Of English as a Foreign Language (TOEFL). The GRE is also required if GPA is below 3.0.

ADMISSION ESSAY*:
All applicants must submit an Admission Essay. Please read the detailed description below.

Admission Essay Guidelines
This essay is one essential part of the student's admission application. This is the student's opportunity to communicate with the Graduate Program Committee members about their professional goals. Before submitting, make certain that the essay gives the reader a clear picture of your personal
interests, experiences, and professional objectives. Once complete, please upload the Admissions Essay to your online application under the “Personal Statement” tab.

The Admission Essay must address each of the following:

**HUMAN SERVICES AND COMMUNITY WORK**

Please discuss any volunteer or paid experiences in human services, community work, and/or other experiences that contributed to your choice of social work as a profession. The Program Committee is looking for evidence of some leadership ability, experience, or interest in working with diverse populations or oppressed groups; commitment to social and economic justice; and other interests congruent with WVU’s School of Social Work mission and social work practice in a rural setting.

**PROFESSIONAL ETHICS**

The NASW Code of Ethics includes the following statement:

“Social workers treat each person in a caring and respectful fashion, mindful of individual differences and cultural and ethnic diversity. Social workers promote clients’ socially responsible self-determination. Social workers seek to enhance a client’s capacity and opportunity to change and to address their own needs. Social workers are cognizant of their dual responsibility to clients and to the broader society. They seek to resolve conflicts between client’s interests and the broader society’s interests in a socially responsible manner consistent with the values, ethical principles, and ethical standards of the profession.”

Using a specific experience you have had with someone/some group different than you (in terms of race, socioeconomic background, gender, religion, sexual orientation, culture, age, etc.), discuss what challenges you had and what lessons you learned from this. How did the interaction affect your personal views about this individual/group? How will you reconcile any conflicts between your personal values and the requirement of the profession?

**SOCIAL WORK PRACTICE**

Please describe an aspect of social work that interests you most and explain how you became interested in this issue. Identify how you think social work, as a profession, should respond to this issue. Feel free to describe a response at the policy, program, or practice levels of social work.

**ADDENDUM**

If necessary, applicants should submit an addendum that addresses any gaps or deficiencies in their academic record, including incomplete grades, withdrawals from courses, etc.

**ADVANCED-STANDING APPLICANTS MUST ALSO ADDRESS:**

Please choose a practice example on individuals, group, family, or organization and describe it, disguising names and identifying information. Please introduce the example with a brief paragraph describing the agency, its function, and its purpose. Please limit your response to 500 words.

Your description headings should include the following:

- **Assessment** – A summary of the essential case data, including age, ethnicity, race, presenting problem, history of the problem, coping abilities. (If the assessment is based on a group or organization, describe the type of group/organization, membership makeup, and purpose.)

- **Case Plan** – Describe the plan and how it relates to the assessment evaluation.

- **Interventions** – Describe and analyze your practice interventions and how they are related to the case plan or assessment formulation.

- **Evaluation** – Critically analyze the strength and limitations of your intervention. With hindsight, how might you have intervened differently and why?

Admission Essay Guidelines have been compiled and adapted from the following institutions: University of Maine, UNC-Chapel Hill, University of Maryland at Baltimore, and the University of Michigan.

**Dual M.S.W/M.P.A.**

A dual degree option resulting in the master of social work (M.S.W.) and master of public administration (M.P.A.) is available through the School of Social Work and the Division of Public Administration. For a student admitted to the regular M.S.W. program, a total of eighty-two credit hours are required to meet the dual degree requirements. For a student admitted to the advanced standing M.S.W. program, a total of sixty-nine credit hours are required to meet dual degree requirements. Many students complete such requirements through one or more additional semesters of study beyond the semesters required for the M.S.W. degree.

Applicants must meet the admission requirements of each program. Acceptance by one program does not guarantee acceptance by the other. Additional information and descriptive materials about the dual degree program are available from either of the following:

DUAL M.S.W/M.P.A.

A dual degree option resulting in the master of social work (M.S.W.) and master of public administration (M.P.A.) is available through the School of Social Work and the Division of Public Administration. For a student admitted to the regular M.S.W. program, a total of eighty-two credit hours are
required to meet the dual degree requirements. For a student admitted to the advanced standing M.S.W. program, a total of sixty-nine credit hours are required to meet dual degree requirements. Many students complete such requirements through one or more additional semesters of study beyond the semesters required for the M.S.W. degree. Applicants must meet the admission requirements of each program.

Graduate Certificate in Gerontology

CERTIFICATE CODE - CG03

The Graduate Certificate in Gerontology is available to students who meet WVU graduate admission requirements and have an interest in learning more about the aging processes and older people. The certificate affords students an opportunity to explore the basic biological, psychological, and sociological processes of aging; the effects on needs and experiences of older people; and the impact of social policies related to human aging. An understanding of the unique problems and needs of older adults in Appalachia and other rural areas is emphasized.

- The certificate requires fifteen graduate credits as detailed below.
- A 3.0 grade-point average must be maintained in all certificate coursework.

Coordination of the Graduate Certificate in Gerontology was assumed by the Beatrice Ruth Burgess Center for WV Families and Communities of the WVU School of Social Work in Fall 2009. As Certificate requirements are reviewed, it is possible that some of them may be modified. You may want to check this site periodically or contact Dr. Kristina Hash, Director of the Gerontology Certificate Program, for the latest information about program requirements.

Students must apply to be enrolled in the certificate program. An application form (http://socialwork.wvu.edu/certificate-programs/graduate-certificate-in-gerontology) is available on this website or may be obtained from Dr. Hash who may be contacted at (304) 293-8807.

Those interested in the Gerontology Certificate may also want to explore the Summer Institute on Aging (http://socialwork.wvu.edu/continuing-education/west-virginia-summer-institute-on-aging).

Curriculum Requirements for Gerontology Certificate Program are as follows:

A grade of B- or better must be earned in all required courses

Graduate Certificate in Integrated Mental and Behavioral Health

CERTIFICATE CODE - CG33

ADMISSION AND PERFORMANCE STANDARDS

The goal of the program is to train students to become effective mental and behavioral health care providers. To be admitted to the Certificate program, applicants must demonstrate graduate student status at West Virginia University (either degree or non-degree) and be in good standing. The requirements for participation in the required Capstone course also impact admission criteria. The capstone course requires students to complete an individualized project that applies content learned in the certificate program to their target population of focus. In order to complete this capstone course, students must have access to field placement, clinical practicum, internship, or employment setting in which they have the ability for “hands-on” practice with the target population. Applicants will be asked to explain and document their anticipated access to this type of experience at the time they would be completing the capstone course. To continue their progress in the Certificate program, students must maintain a grade of "B" or higher in certificate coursework.
PROGRAM REQUIREMENTS:

The Graduate Certificate in Integrated Mental and Behavioral Health will consist of 15 credit hours:

Major Learning Goals

SOCIAL WORK

The mission of the MSW Social Work Program at West Virginia University is to train graduate students in advanced social work practice either with Individuals, Families and Groups or in Community Organizing and Social Administration. The focus of this training is to produce competent and effective practitioners committed to enhancing social well-being and quality of life with particular emphasis on vulnerable and oppressed populations in small towns and rural areas characteristic of the Appalachian region.

The Direct Practice Curriculum prepares students with the knowledge and skills to provide direct services to individuals, families, and small treatment groups.

The Community Organization and Social Administration (COSA) Curriculum prepares students with the knowledge and skills to provide leadership to communities in the development, administration, and support service programs.

MSW programs are available at West Virginia University’s campus in Morgantown or around the state at our extended campus locations.

Field Instruction

Field instruction provides the student with an opportunity to test classroom knowledge as well as to develop and refine advanced-practice skills. Field instruction opportunities are available throughout West Virginia and adjacent areas as well as in a select number of settings outside the region.

Full-time regular-standing M.S.W. students have a generalist field experience during the second semester of study. Advanced-field placement is typically completed on a concurrent plan requiring sixteen–twenty-four hours of field instruction activity each week throughout the second year of study according to degree plans.

Students are required to take at least three credits of classroom coursework concurrently with the advanced field placement and to complete assignments designed to facilitate the integration of field and classroom study. Decisions regarding the field placement assignment are jointly reached by the student, faculty advisor, and field instruction coordinator. Only sites on the School of Social Work’s list of approved agencies may be used for field instruction.

Grade Point Average (GPA) Requirements for Good Standing

All graduate courses must be completed with a grade of B or better; students may repeat any course for which the final grade is less than B one time only. Students are required to maintain an overall minimum GPA of 3.00 (on a four-point scale) to continue in the program, to be eligible for field instruction, and to be eligible for graduation.

Sociology

Degrees Offered

- Master of Arts
- Doctor of Philosophy

Nature of the Program

The Department of Sociology and Anthropology offers a Ph.D. in Sociology with an area of specialization in Crime, Community, or Culture. The program trains students in the core areas of sociology, including research design, quantitative and qualitative methods, data analysis, theory, and sociological writing. It also teaches a range of professional skills designed to help graduates enter the academic or non-academic job markets. Emphasis is placed on writing and presentation skills, knowledge of statistical software, teaching ability, and the ability to communicate and apply sociological theory. In addition to coursework, students will have an opportunity to work with faculty who are actively engaged in research.

The M.A. program serves as a foundation for students who wish to pursue doctoral studies or move on to a research-oriented career in government, universities, or private industry. Students who are accepted into the Ph.D. program in Sociology will receive the M.A. degree upon completion of 38 credit hours of core requirements and a thesis manuscript.

FACULTY

CHAIR

- Jeralynn S. Cossman - Ph.D. (Florida State University) Sociology
  Demography, Health, Inequalities

PROFESSORS

- Walter S. DeKeseredy - Ph.D. (York University) Sociology
  Anna Deane Carlson Endowed Chair of Social Sciences. Violence against women, Critical criminology, Masculinities and crime, Criminology theory

- R. Gregory Dunaway - Ph.D. (University of Cincinnati) Sociology
  Dean of the Eberly College of Arts and Sciences

- S. Melissa Latimer - Ph.D. (University of Kentucky) Sociology
  Gender/race/ethnicity, Inequality/labor markets/welfare systems

- Lawrence T. Nichols - Ph.D. (Boston College) Sociology
  Criminology, Theory, Business

- James Nolan, III - Ph.D. (Temple University) Sociology
  Criminal justice, Group and social processes

- Rachael A. Woldoff - Ph.D. (Ohio State University) Sociology
  Community, Crime, Inequality/race/class

ASSOCIATE PROFESSORS

- Corey Colyer - Ph.D. (Syracuse University) Sociology
  People processing systems, Agencies of social control

- Amy Hirshman - Ph.D. (Michigan State University) Anthropology
  Mesoamerican archaeology, Social complexity, Ceramics

- Daniel Renfrew - Ph.D. (Binghamton University) Anthropology
  Environmental and political anthropology, Social movements, Latin American cultures

- Rachel Stein - Ph.D. (University of Akron) Sociology
  Criminology, Victimization, Media and crime

- Karen Weiss - Ph.D. (SUNY-Stony Brook) Sociology
  Criminology, Victimization, Gender/sexuality/culture

- Joshua Woods - Ph.D. (Michigan State University) Sociology
  Social psychology, Media, Complex organizations, Sociology of risk
CLINICAL ASSOCIATE PROFESSOR

- Jennifer Steele - Ph.D. (Pennsylvania State University) Rural Sociology
  Natural resource sociology, Rural and community development

TEACHING ASSOCIATE PROFESSOR

- Adam Dasari - Ph.D. (Oklahoma State University) Sociology
  Social stratification, Globalization, Environmental sociology, Theory

ASSISTANT PROFESSORS

- Katie E. Corcoran - Ph.D. (University of Washington) Sociology
  Theory, Organizations, Culture, Criminology, Religion, Social networks
- Lisa M. Dilks - Ph.D. (University of South Carolina) Sociology
  Social psychology, Group processes, Law and society, Quantitative methods
- Jason Manning - Ph.D. (University of Virginia) Sociology
  Conflict and social control, Violence, Sociology of knowledge
- Christopher P. Scheitle - Ph.D. (Pennsylvania State University) Sociology
  Religion, Science in society, Crime, Organizations
- Heathen M. Washington - Ph.D. (Ohio State University) Sociology
  Community, Crime, Family, Inequality
- Jesse Wozniak - Ph.D. (University of Minnesota) Sociology
  Policing, Criminology, Deviance, State power

TEACHING ASSISTANT PROFESSORS

- Susanna Donaldson - Ph.D. (University of Iowa) Anthropology
  Anthropology of work, Identity, Appalachian cultures
- Amanda Hall-Sanchez - Ph.D. (University of Hawaii at Manoa) Sociology
  Violences against women, Incarcerated individuals, Victimology, Deviance, Feminist theory & methodologies
- Cheryl Johnson-Lyons - J.D. (West Virginia University)
  Law and society, Inequalities, Political sociology

PROFESSOR EMERITUS

- Ronald C. Althouse - Ph.D. (University of Minnesota) Sociology
  Theory, Work, Occupational safety and health

ASSOCIATE PROFESSORS EMERITI

- Ann L. Paterson - Ph.D. (Michigan State University) Sociology
- Patricia C. Rice - M.A. (Ohio State University) Anthropology
- Joseph J. Simoni - Ph.D. (University of Notre Dame) Sociology
- William I. Torry - Ph.D. (Columbia University) Anthropology

Admission

Applications must include official transcripts from all colleges and universities previously attended, references from at least three people familiar with the student's academic record and potential for graduate study, a writing sample, a personal statement, a non-refundable application fee, and an official statement of the Graduate Record Examination (GRE) scores.

The application process is online. Please see the Graduate Admissions website (https://graduateadmissions.wvu.edu) for more information and the University Graduate Application.

International students for whom English is not a native language are required by the University to submit the Test of English As a Foreign Language (TOEFL). WVU accepts either the TOEFL or the IELTS for this purpose. Please see English Language Proficiency Requirements (https://admissions.wvu.edu/how-to-apply/international-students/#anchor-intlelp) for more information.

Application Deadline

The application deadline is February 1 for fall admission. Students are not admitted in the spring semester.

Students who are accepted to the Ph.D. program will receive the M.A. degree upon completing 23 credit hours of Master's required coursework, 9 hours of electives, and 6 credit hours of thesis as shown below, as well as a completed thesis manuscript. The thesis may follow either a journal article or applied report model. Students will be dually enrolled in the M.A. and Ph.D. programs until they complete the M.A. requirements.

### Electives

- 9 hours

### Total Hours

- 38 hours

Students are accepted into the Ph.D. program upon their entry into the department and are formally admitted to doctoral candidacy upon completion of the M.A. requirements. Students who move on to the doctoral program are required to take two additional core courses, five additional courses in one of the three areas of specialization, and nine hours of dissertation credits, as shown below. Doctoral students must pass comprehensive examinations and successfully defend a dissertation.

## Major Learning Goals

### SOCILOGY

Students graduating with a Ph.D. in Sociology will be able to:

1. Apply sociological theories and methodological skills to evaluate social issues and develop a research program.
2. Critically analyze the canonical literature in one of the three specialty areas (crime, community, or culture).
3. Explain professional practice and ethics as they relate to sociology.
4. Describe the current state of knowledge, research, and needs of sociology as a discipline.
Statistics

Degrees Offered

• Master of Science

Nature of the Program

The Department of Statistics offers a Master of Science (M.S.) in Statistics. The M.S. degree is intended to qualify the student to assume a professional role in educational, industrial, or governmental research projects; to teach in a college; or to undertake advanced training toward a doctorate in statistics or one of the quantitative fields of science.

Because many students receive baccalaureate degrees from colleges that do not offer undergraduate programs in statistics, and because historically statistics has been primarily a field of graduate education, a student does not need a degree in statistics to enter the degree program. A good background in mathematics, science, or engineering is reasonable preparation for graduate work in statistics.

The Department of Statistics also participates in the Combinatorial Computing and Discrete Mathematics (CCDM) Area of Emphasis within the Computer and Information Science Ph.D. Program or the Mathematics Ph.D. Program.

The Department of Statistics offers a Certificate in Applied Statistics for professionals or students who want to take applied statistics courses to enhance their quantitative skills and job opportunities.

FACULTY

CHAIR
• Michael Mays - Ph.D. (Penn State University)

PROFESSORS
• Erdogan Gunel - Ph.D. (State University of New York, Buffalo) 
  Bayesian Inference, Biostatistics, Categorical Data Analysis
• Robert Mnatsakanov - Ph.D. (Moscow State Institute of Electronics and Mathematics) 
  Nonparametric statistics, Statistical Inverse Problems, Mixture Models, Change-set Problems

ASSOCIATE PROFESSORS
• Mark V. Culp - Ph.D. (University of Michigan) 
  Statistical Machine Learning, Computational Statistics, Semi-supervised and Multi-view Learning, Biometrics
• Kenneth J. Ryan - Ph.D. (Iowa State University) 
  Experimental Design, Statistical Machine Learning, Biometrics

TEACHING ASSOCIATE PROFESSOR
• Huey Miin Lee - Ph.D. (Johns Hopkins University) 
  Bioinformatics, Statistical Education

ASSISTANT PROFESSORS
• Stacey Culp - Ph.D. (University of Michigan) 
  Statistics Education and Statistical Consulting
• Casey Jelsema - Ph.D. (Western Michigan University) 
  Spatial statistics, mixed effects models, Bayesian hierarchical modeling, constrained inference, bootstrap methods, environmental statistics, microbiome, statistical computation.
• Erin R. Leatherman - Ph.D. (Ohio State) 
  Prediction and Design for Computer and Physical Experiments.

TEACHING INSTRUCTOR
• Anthony Billings - M.S. (West Virginia University, A.B.D. (Carnegie Mellon University) 
  Statistical Computing, Statistical Modeling, Robust Estimation, Nonlinear Dynamic Systems, Statistical Education

PROFESSOR EMERITUS
• William V. Thayne - Ph.D. (University of Illinois) 
  Experimental Design, Statistical Genetics, Regression Analysis
• E. James Harner - Ph.D. (Cornell University) 
  Dynamic graphics, Statistical computing and modeling, Statistical education.
• Edwin C. Townsend - Ph.D. (Cornell University)
ASSOCIATE PROFESSOR EMERITUS

- Daniel M. Chilko - M.S. (Rutgers University)
  Statistical Computing, Computer Graphics
- Gerald R. Hobbs Jr. - Ph.D. (Kansas State University)
  Biostatistics, Nonparametric Statistics, Regression Analysis

ADMISSIONS AND PREREQUISITES FOR MASTER OF SCIENCE IN STATISTICS

Students are expected to know the material contained in the following courses or areas upon admission to the program. Otherwise, these deficiencies must be removed as early as possible in the student’s degree program under the terms specified by the Admissions and Standards Committee.

- Single and multivariable calculus (MATH 155, MATH 156, MATH 251, or equivalent)
- Linear or matrix algebra (MATH 441 or equivalent)
- Probability and statistics (STAT 215 or equivalent)
- Knowledge of a high-level programming language

ADMISSIONS AND PREREQUISITES FOR THE CERTIFICATE IN APPLIED STATISTICS

Admission to the Certificate of Applied Statistics (CAS) may be done at any time. Students who are currently admitted to or enrolled in a graduate degree program that want to earn the CAS should contact the Statistics Department to enroll in the certificate program. Students who want to pursue the CAS independent of a graduate degree program must be admitted as a non-degree graduate student prior to registering for the certificate program.

Those seeking admission to the CAS must have a minimum GPA of 2.75, have graduated from an accredited institution with a minimum of a Baccalaureate degree and successfully completed College Algebra. Single and Multi-variable Calculus are recommended.

The GRE General Test is not required for admission.

To obtain a Master of Science in Statistics, the student must complete the course and comprehensive examination requirements. The student must maintain a minimum GPA of 3.0 and earn a grade of C- or better in all courses counting toward the degree.

MASTER OF SCIENCE

MAJOR REQUIREMENTS

To obtain a Master of Science in Statistics, the student must complete the course and comprehensive examination requirements.

Minimum cumulative GPA of 3.0 is required.

Minimum grade of C- in all courses applied toward the degree

* Non-STAT electives require departmental consent.
EXAMINATIONS

Students must pass a written comprehensive examination on foundational material. The examination covers the theory taught in STAT 461 and STAT 462 and the applications taught in STAT 512, STAT 513, and STAT 545. The exam is given twice a year on the Thursday during the second full week following spring semester final exams and on the third Saturday in October. Students have a maximum of three attempts for this exam.

Certificate in Applied Statistics

CERTIFICATE CODE - CG29

The Certificate in Applied Statistics (CAS) is designed for professionals or students who what to take applied statistics courses to enhance their quantitative skills and job opportunities. The certificate will provide students with a solid foundation in statistical methodology, and depending on the elective courses selected, predictive analytics, statistical computing, or statistical theory. The flexibility in the certificate course work is intended to allow the student to select courses that will meet their needs, whether enhancing professional quantitative skills or research productivity.

Admissions to the CAS may be done at any time. Students who are currently admitted to or enrolled in a graduate degree program that are wishing to earn the CAS should contact the Statistics Department to enroll in the CAS. Students who wish to pursue the CAS independent of a graduate degree program must be admitted as a non-degree graduate student prior to registering their intent to earn the certificate.

Students must earn a grade of C- in all courses applied to the CAS, and must earn at least an overall 3.0 GPA in the courses counted toward the certificate.

REQUIRED COURSES:

Students in the certificate program will complete a minimum of 15 credit hours of graduate level Statistics courses. The courses required for the completion of the CAS are defined below.

Students must earn a grade of C- in all courses applied to the CAS.

* Credit towards the Certificate is also given for STAT 461 and STAT 462.
** All courses applied to the certificate must be Statistics (STAT) courses; courses listed as equivalent to Statistics courses in the Catalog may not be counted.

Major Learning Goals

STATISTICS

Graduate courses in statistics, and sequences of statistics courses leading to a Master of Science in Statistics or a Certificate in Applied Statistics, provide a foundation of statistical literacy, statistical reasoning, and statistical thinking. Our aim is for all of our students to be challenged and encouraged in their statistical course work. In particular, we enable our students to

• Appreciate the inherent variation and uncertainty of information, and understand that statistics can be a resource for improved decision making;
• Develop critical thinking skills for application of statistics;
• Effectively communicate the results of statistical analysis;
• Become responsible and competent practitioners of statistics in order to attain personal goals, either in a profession or in further educational experiences.

Women's and Gender Studies

Program Description

The Graduate Certificate in Women’s and Gender Studies is available to any student admitted to a graduate degree program at West Virginia University. The graduate certificate consists of fifteen hours of graduate-level work in women’s and gender studies, using courses approved as primary or component courses by the Women’s and Gender Studies Curriculum Committee. The certificate offers students interdisciplinary perspectives on gender and its intersection with race, class, ethnicity, and sexuality. The breadth of the curriculum provides dynamic courses in theory and methods that help students understand the complex social, cultural, economic, political, and historical dimensions of men’s and women’s lives.
In pursuing a Graduate Certificate in Women’s and Gender Studies, students make connections between their primary field of study and issues surrounding gender, race, class, culture, and sexuality. By applying multifaceted problem solving and critical thinking skills learned in women’s and gender studies courses to their primary field of study, students bring a broader base of experience and perspectives to their future careers.

**Financial Aid is Available**

Women’s & Gender Studies students are eligible to apply for graduate teaching assistantships (GTAs) in Women’s & Gender Studies. The Center for Women’s & Gender Studies has five GTA positions available each year. GTAs work with the lead instructor and teach two sections of the course or assist with other courses. Students can apply for GTA positions each winter, usually in early February. Salaries include tuition waivers for the academic year and subsequent summer. GTAs must be enrolled as full-time students (at least nine hours).

For further information about GTA positions, please contact the Center for Women’s & Gender Studies. Students may be eligible for GTA positions in the Academic Advising Center and should contact that center directly for more information.

**ADJUNCT PROFESSOR**
- Allyson Perry

**Graduate Certificate in Women’s & Gender Studies**

**CERTIFICATE CODE - CG30**

The Graduate Certificate in Women’s and Gender Studies consists of 15 credit hours of course work that can complement any graduate degree program.

Course Requirements (15 hours):

No more that two 400-level course may be counted toward certificate.

In lieu of an exam at the end of the graduate certificate program, students may also make a presentation in the seminar course at the end of the semester in which they take that course.

**WGST Electives**

* WGST Electives from list of Approved Courses. Petitions for other courses possible
To enroll in the Graduate Certificate in Women’s & Gender Studies, contact either the Center for Women’s and Gender Studies at their location, 325 Willey Street, or by phone at (304) 293-2339 or contact Cari Carpenter, the Interim Director of the Center for Women’s & Gender Studies, by phone at (304) 293-2063 or via e-mail at cari.carpenter@mail.wvu.edu for an appointment to discuss your program.

Check in at least once a semester with the center to update your progress toward completion of the certificate.

Per WVU policies, students can complete this certificate while completing the requirements for a graduate degree, as 12 of the 15 credit hours can count for both the degree and certificate.

Major Learning Goals

WOMEN’S AND GENDER STUDIES

In completing a graduate certificate in Women’s and Gender Studies, students will be able to:

• Use the lens of feminist and gender theory to analyze manifestations of human endeavor
• Integrate key terms and concepts related to women’s and gender studies in an interdisciplinary approach to their primary discipline
• Engage in discourse addressing how gender, class, race, ethnicity, age, sexualities and sexual identities shape experience and reflect societal constructs
• Analyze, dissect, and criticize arguments to demonstrate an understanding of the scholarship and theoretical underpinning of the field of women’s and gender studies

World Languages, Literatures, and Linguistics

Degree Offered

• Master of Arts, with five possible areas of emphasis

AREAS OF EMPHASIS

• French (no longer admitting students)
• Spanish
• Linguistics
• Teaching English as a Second Language (TESOL)
• Combined Areas

Nature of Program

The M.A. program in World Languages, Literatures, and Linguistics offers courses in literature, culture, and literary criticism as well as in theoretical and applied linguistics, and language-teaching methodology. Students also have the opportunity to engage in research projects that reflect their interests within a given subject and that serve to complement and augment the information imparted through in-class activities. The master’s degree is intended for those students who seek more specialized knowledge in order to teach in their chosen area, as well as for students who plan to prepare for doctoral studies or other professional employment.

Available Financial Aid

Graduate teaching assistantships are available for different languages, including Arabic, Chinese, French, German, English as a Second Language, Italian, Japanese, Russian, Portuguese, and Spanish. The assistantships carry full tuition remission and a nine-month stipend (August–May); there are also limited opportunities to teach during the university’s summer session. Assistantships are awarded annually to those students who have demonstrated potential to become effective teachers. In order to be considered for a teaching assistantship, students must fill out the department application and submit a writing sample as well as a recorded sample of their speech in the language they are applying to teach.

In addition to the graduate teaching assistantships, a limited number of meritorious tuition waiver awards are sometimes available from the Eberly College of Arts and Sciences through the department. These awards are based on academic performance and financial need.

Graduate Teaching Assistants

The department values the contributions made by our graduate assistants and strives to help them become effective teachers. Graduate assistants normally teach two courses (six class-hours per week). They work under the direct supervision of the course coordinator in the language area, but they are fully responsible for their courses (including evaluating their students’ work). The coordinator will conduct orientations and organizational meetings with graduate assistants and provide course materials (such as syllabi). In addition, the coordinator will periodically observe individual classes in order to assess the graduate assistants’ performance and to provide encouragement and assistance.

All graduate teaching assistants teaching Arabic, French, Italian, and Spanish must register for LANG 621 during their first semester. Graduate assistants teaching any other language must register for LANG 521 in their first semester. In addition, graduate assistants must register for
LANG 690 each semester of employment. Students who have already received an M.A. in World Languages, Literatures, and Linguistics from West Virginia University may be ineligible for an assistantship in this department.

Additional Points of Information

ADVISING

All graduate students will have a primary advisor (to be assigned by the chairperson). Students should consult with their advisor when they register for courses or add and/or drop courses. In addition, the Graduate Program Coordinator is available to answer questions regarding the degree program, requirements, comprehensive examinations, graduation, etc. Students may consult with the chairperson regarding departmental matters.

INTERNATIONAL STUDENTS

An F-1 student visa is required for study in the U.S. The visa must be obtained in the student’s home country with an I-20 Form from the WVU Office of Admissions. The I-20 will be sent by the Office of Admissions to the student’s home address once all academic, English proficiency, and financial requirements have been satisfied.

International students studying in the department on an F-1 Visa should remember that they are required to carry a minimum course load of nine hours each semester (excluding the summer) in order to maintain their legal status for their visa. International students, who may be forced to withdraw from a course and thus fall below nine hours in any semester, must first check with the department chair and the Office of International Students and Scholars in E. Moore Hall. Exceptions may be possible in the student’s final semester of study.

STUDY ABROAD OPPORTUNITIES FOR GRADUATE STUDENTS

Qualified graduate students in French may compete for the Marguerite Eynard McBride Award, which funds an academic year in France. Year-long exchange programs for graduate students are also in place for France and Spain. The department also sponsors study abroad during the summers in Canada, China, France, Germany, Italy, Japan, Jordan, Mexico, Spain, and Taiwan that graduate students may participate in if they meet the program’s requirements. Grants are available on a competitive basis through the department, the Eberly College of Arts and Sciences, and through the Office of International Programs to assist students who wish to study abroad.

FACULTY

CHAIR
• Ángel T. Tuninetti - Ph.D. (Washington University)
  Latin American Literature and Culture

ASSOCIATE CHAIR
• Susan Braidi - Ph.D. (University of Delaware)
  ESL/Linguistics, Applied Linguistics, Second Language Acquisition, Syntax

GRADUATE COORDINATOR
• Sandra Stjepanovic - Ph.D. (University of Connecticut)
  Linguistics, Syntax, Psycholinguistics

PROFESSORS EMERITI
• Pablo González - Ph.D. (University Complutense de Madrid)
  Spanish American Literature and Culture
• Kathleen McNerney - Ph.D. (Universidad Nacional Autonoma de Mexico)
  Spanish, Catalan Language and Literature, Spanish Literature and Culture, Women Writers

PROFESSORS
• Ahmed Fakhri - Ph.D. (University of Michigan)
  ESL/Linguistics, Second Language Acquisition, Applied Linguistics, Discourse Analysis
• Daniel Ferreras - Ph.D. (Michigan State University)
  French and Spanish, Comparative Romance Literature, French/Spanish 19th and 20th Century Novel, Theory of the Fantastic
• Valérie Lastinger - Ph.D. (University of Georgia)
  French, 18th-century French Literature, French Women Writers
• Janice Spleth - Ph.D. (Rice University)
  French and Francophone Literature and Culture

ASSOCIATE PROFESSORS
• Maria Amores - Ph.D. (Pennsylvania State University)
  Spanish, Foreign Language Acquisition
• Susan Braidi - Ph.D. (University of Delaware)
  ESL/Linguistics, Applied Linguistics, Second Language Acquisition, Syntax
• Cynthia Chalupa - Ph.D. (Ohio State University)
  Fin de Siècle German and Austrian Literature, Poetry, Foreign Language Pedagogy
• Tania de Miguel Magro - Ph.D. (The State University of New York, Stony Brook)
  Spanish Literature and Culture, Spanish Language, Spanish Golden Age Literature
• Pablo García Loaeza - Ph.D. (Indiana University Bloomington)
  Spanish Language, Latin American Colonial Literature
• Deborah Janson - Ph.D. (University of California)
  German, 18th-21st-century German Literature, Enlightenment, Romanticism, GDR and Post-Wende Literature, Ecofeminism
• Xiangying Jiang - Ph.D. (Northern Arizona University)
  ESL/Linguistics, Second Language Acquisition
• Twyla Meding - Ph.D. (University of Virginia)
  French, 16th and 17th-century French Literature, The Pastoral Novel
• Sandra Stjepanovic - Ph.D. (University of Connecticut)
  Linguistics, Syntax, Psycholinguistics, Semantics
• Ángel T. Tuninetti - Ph.D. (Washington University)
  Chairperson, Spanish, Spanish-American Literature and Culture, Travel Literature

ASSISTANT PROFESSORS
• Manal AlNatour - Ph.D. (University of Arkansas)
  Arabic Studies, Comparative Literature, Cultural Studies
• Sandra Dixon - Ph.D. (Brown University)
  Spanish, Spanish American Literature, Brazilian Literature
• Lourdes Estrada López - Ph.D. (University of Connecticut)
  Spanish Literature and Culture, Spanish Language, Contemporary Spanish Literature, Gender and Sexuality Studies
• Jonah Katz - Ph.D. (Massachusetts Institute of Technology)
  Phonetics, Phonology, Theoretocal and Experimental Linguistics, Music Cognition
• Sergio Robles-Puente - Ph.D. (University of Southern California)
  Spanish Phonetics, Phonology, and Sociolinguistics
• Elena Shimanskaya - Ph.D. (University of Iowa)
  French, Second Language Acquisition

TEACHING ASSOCIATE PROFESSOR
• Lisa Di Bartolomeo - Ph.D. (University of North Carolina-Chapel Hill)
  Russian, Russian and Polish Language and Literature, Slavic Folklore, Culture and Cinema, Science Fiction, the Holocaust
• Hannah Lin - Ph.D. (Ohio State University)
  Chinese Studies
• Jennifer Orlikoff - Ph.D. (Rutgers University)
  French, 16th, 18th, 19th Century French Literature, Second Language Acquisition and Methodology, Art History, and Feminist Criticism
• Annastella Vester - Ph.D. (University of California, Los Angeles)
  Italian, Contemporary Italian Literature, 18th and 19th-century Italian

TEACHING ASSISTANT PROFESSOR
• Rafael Osuna Montanez - Ph.D. (University of Connecticut)
  Spanish

ADMISSION REQUIREMENTS
To be admitted to the program, a student is expected to have an undergraduate degree in the desired area of study (or an acceptable related-area) with a GPA of 3.0 (overall as well as within the major). The student must complete the university admission application, including payment of the required fee and completion of the supplemental departmental application form, which requires a 300-word statement of purpose, an extended writing sample in the language of the area to which the student is applying, and three letters of recommendation. International students must also submit an acceptable TOEFL or IELTS score. For more information about the admission requirements and application guidelines, please visit our website (http://worldlang.wvu.edu/graduate_programs/graduate/graduate_programs_how_to_apply).

In this section:
• Degree Requirements (p. 166)
• Spanish Area of Emphasis (p. 167)
• Linguistics Area of Emphasis (p. 167)
• TESOL Area of Emphasis (p. 168)
• Combined Areas (p. 168)

Degree Requirements
Students may select from five areas of emphasis (French, Spanish, Linguistics, TESOL, or a combined area that allows them to combine two areas for their degree) to complete a Master of Arts in World Languages, Literatures, and Linguistics. Students must meet all university and college requirements as outlined in the WVU Graduate Catalog as well as the specific departmental requirements described below:

GENERAL
• A minimum of thirty-six credit hours at the graduate level, of which thirty hours of coursework must be taken within the department. (No more than twelve hours of coursework done at the 400 level will be counted toward the degree.)
• No more than three hours of independent study will apply to the degree (unless approved by the departmental chairperson). Note: Independent studies will be permitted only in special circumstances; in most instances, students must enroll in the regularly-scheduled courses.
• No more than twelve hours can be transferred to our program from another accredited institution. (In the case of combination concentrations, no more than six hours can be transferred to any of the combined areas, for a total of twelve hours.)
• No courses for the degree may be taken pass/fail.
• No more than six hours of thesis credits (697/698) can be applied to the degree.
• A 3.0 GPA is required for graduation. Note: No course for which the grade of D or below is recorded can be counted for graduation credit.
• Students must satisfy the foreign language requirement.
• Students must pass comprehensive examinations or successfully defend a thesis.

FOREIGN LANGUAGE REQUIREMENT
Native speakers of English in TESOL, Linguistics, or a combination of the two, must demonstrate proficiency in a second language prior to graduation by completing one language course of level 204 or above, with a grade of B or better, or by taking the departmental placement examination in one language and placing above the 204-level.

International students whose native language is not English are considered to have satisfied this requirement by virtue of their TOEFL score.

COMPREHENSIVE EXAMINATIONS
The comprehensive examinations are intended to evaluate students’ knowledge, including the ability to synthesize and evaluate ideas in their area of emphasis. The examinations are based on standardized reading lists (http://worldlang.wvu.edu/graduate_programs/comprehensive_exams_reading_lists) and coursework. Although many of the works on the reading lists will be included in coursework, independent reading will be necessary. Students must take the comprehensive examinations the semester they intend to graduate.

THESIS
A student may request to write a thesis and prepare an oral defense. The feasibility of writing a thesis may be limited due to faculty availability, the student’s academic performance, or other factors (to see the qualifying requirements for writing a thesis, consult the Graduate Program Handbook). Under this option, the student is not required to take the written comprehensive examinations but may be asked to comment on coursework and the reading lists, particularly as they relate to the thesis. For more information about this option, see the document “Thesis Guidelines (http://worldlang.wvu.edu/r/download/99265).”

**Major Learning Goals**

**WORLD LANGUAGES, LITERATURE, AND LINGUISTICS**

Upon completion of M.A. in World Languages, Literatures, and Linguistics, students will be able to:

1. Demonstrate in-depth foundational knowledge in their areas of emphasis (Spanish language and literature, Linguistics, and/or TESOL).
2. Demonstrate the knowledge of the cultural, social, and/or historical developments pertinent to their areas of emphasis.
3. Proficiently communicate subject matter in their areas of emphasis both orally and in writing.
4. Demonstrate research and analytical skills relevant to their areas of emphasis, and clearly communicate outcomes of their research and analyses both orally and in writing.
5. Use professional skills that correspond to their goals, which may be attending a PhD program in, or acquiring a job related to, their areas of emphasis.
Business and Economics

Degrees Offered

- Master of Arts in Economics
- Master of Business Administration
- Master of Accountancy
- Master of Science in Business Data Analytics
- Master of Science in Finance
- Master of Science in Forensic and Fraud Examination
- Master of Science in Industrial Relations
- Doctor of Philosophy in Business Administration
- Doctor of Philosophy in Economics

The College of Business and Economics was founded in November of 1951 and graduated its first class in the spring of 1953. Since that time, the College of Business and Economics has become one of the largest colleges at West Virginia University. In 1954, the college became fully accredited by the AACSB International (http://www.aacsb.edu), the highest level of business accreditation.

In 1990, the new College of Business and Economics building was completed on the site of Old Mountaineer Stadium on the downtown campus adjacent to historic Woodburn Hall. The four-story facility houses modern classrooms, two auditoriums, state-of-the-art computer laboratories, and space for the college’s research and service centers.

Overview of Programs

All graduate programs at the College of Business and Economics require that the candidate achieve a cumulative grade point average of at least 3.0 on all work counting toward the graduate degree.

The doctor of philosophy and master of arts degrees in economics prepare students for careers in business, government, and higher education. Students receive in-depth education in the concepts and methods of economic analysis and econometrics and specialize in two fields of study from financial, international, monetary, public, regional, urban economics, and resource economics. These programs are well-suited to students with undergraduate degrees in economics, finance, mathematics, statistics, public policy, history, and other humanities majors.

The doctor of philosophy degree in business administration has four areas of specialization: accounting, finance, management and marketing. Students develop deep content knowledge in their specialty along with a strong foundation in research methodology. The programs are focused on preparing graduates for research and academic careers.

The master of business administration (M.B.A.) program exposes students to graduate-level coursework in all the functional areas of business. Coursework includes an even exposure to all of the functional areas of business and provides a broad general management orientation. The M.B.A. program is offered during the day for full-time students in Morgantown. The M.B.A. program is also offered for working professionals in an online with four mandatory residencies on campus.

The master of science in industrial relations (M.S.I.R.) provides an interdisciplinary education for the student desiring a career in human resources management and industrial relations. All undergraduate majors are acceptable. Elective areas of study may include the functional areas of business, counseling, law, safety, and others.

The master of accountancy (MAcc) program is available to students with undergraduate degrees in accounting. Students without accounting undergraduate degrees can fulfill specific accounting prerequisites and be admitted to the program. The program follows the AICPA’s recommendations for a five-year accounting education and meets the requirements of most states with 150-hour requirements for C.P.A. certification. The division of accounting also offers a graduate certificate in forensic accounting and fraud.

The master of finance (M.S. Fin.) program is available to students with a strong background in finance or accounting (either through undergraduate degree in finance or accounting or with five years of experience in a finance-related field). The program offers a series of courses which provides graduates with a thorough understanding of material in the C.F.A. (Chartered Financial Analyst) Candidate Body of Knowledge.

The master of science in business data analytics (MS BUDA) can be completed in a one-year or two-year plan of study. The online hybrid program offers students flexibility while encouraging them to simultaneously learn valuable business analysis skills, apply concepts in a real-world setting, and experience improved results in an accelerated learning cycle. The MS program is taught by faculty across various disciplines with both industry and academic experience from around the globe.

The master of science in forensic and fraud examination (MS FFE) is a 12-month online hybrid program geared toward early career professionals in accounting or investigative sciences looking to enhance their career opportunities through a specialized educational experience incorporating case
studies and experiential learning in the field of Forensic and Fraud Examination. Students in this program will receive the required preparation for the Certified Fraud Examiners test.

Specific information about graduate programs in the College of Business and Economics may be obtained from Office of Graduate Programs, 340 Business and Economics Building, P.O. Box 6027, West Virginia University, Morgantown, WV 26506-6027, Telephone (304) 293-6579.

  Assistant Dean for Undergraduate Programs
• Elizabeth Vitullo - Ph.D. (West Virginia University)
  Assistant Dean of Graduate Programs

Degree Designation Learning Goals

Each degree has designated learning goals. Please refer to program webpages for specific program leaning goals.

Special Requirements

Admission to all College of Business and Economics graduate programs requires a bachelor’s degree from an accredited institution. The Graduate Management Admissions Test (GMAT) is preferred for all of the business graduate programs. For the M.S.I.R, the M.B.A., and the Ph.D. in Business Administration in Management program, the Graduate Record Examination (GRE) may be substituted for the GMAT. The economics programs require the GRE. Refer to program webpages for specific application requirements.

Accountancy

Degree Offered

• Master of Accountancy (MAcc)

Given the changing environment in both the public and private sectors of the economy, many accountants will need an educational background that goes beyond that obtained in an undergraduate degree program. Accountants must be proficient in applying professional concepts and principles to a wide variety of existing and emerging situations as an effective member of a team and also have the ability to adapt to new standards and methods of doing business. Competing in such an environment requires a solid technical foundation, adeptness in analyzing complex business situations, and the ability to effectively communicate recommended solutions and conclusions. Thus, the objectives of the MAcc program include the integration of financial and non-financial data in problem-solving and decision-making, the application of relevant research techniques and information technologies, the integration of varying viewpoints and techniques of conflict resolution, and the importance of adhering to a strong ethical code.

The accounting programs at WVU, both undergraduate and graduate, have separate accounting accreditation by the AACSB International—The Association to Advance Collegiate Schools of Business. Students pursuing the MAcc program can also pursue a certificate in forensic accounting and fraud examination.

Program

The MAcc. program is a thirty credit-hour program, which can be completed in approximately twelve months of full-time study. The program requires that the student has an undergraduate degree and meets very specific accounting and business course prerequisites. Work experience is not a requirement
for admission. Careful selection of degree candidates limits the size of classes, leads to high-quality efforts in the program, and permits frequent and direct contact between students and faculty. The full-time program consists of two twelve credit-hour semesters and a six credit-hour summer session.

No thesis is required in the program, but communication skills are emphasized in all courses. Extensive use is made of information technology in accounting applications.

**Academic Standards**

A cumulative grade point average of at least 3.0 in all course work towards the MAcc. degree is required for graduation from the program. A student whose cumulative grade point average falls below 2.75 will be placed on probation. If the average is not brought up to 2.75 by the end of the following semester, the student will be suspended from the program. A grade below C- in more than one course taken while enrolled as a graduate student will result in suspension from the graduate program. A course with a grade below C- will not count for the thirty semester credit-hour requirement for graduation unless repeated with a grade of C- or above. Complete information about the MAcc. program may be obtained from [http://www.be.wvu.edu/macc/index.htm](http://www.be.wvu.edu/macc/index.htm).

**Requirements to Sit for C.P.A. Examination**

The specific requirements to sit for the Uniform C.P.A. Examination vary with each state board of accountancy. Some states (or other jurisdictions such as the District of Columbia or Guam) require candidates to have a bachelor’s degree with a specified distribution of accounting and business courses as the minimum educational requirement to take the examination, whereas others require a bachelor’s degree and the completion of 150 semester hours of academic credit (including a specified distribution of courses) as the minimum. These standards are subject to change; thus, students should review the requirements (including the distribution of courses) of the board in the jurisdiction in which they plan to sit for the examination. Incidentally, these are the requirements to sit for the examination, not to be certified. Most boards of accountancy require 150 semester hours of academic credit for certification.

For the specific requirements to sit for the C.P.A. examination in West Virginia, go to the Board’s website at [https://www.boa.wv.gov/](https://www.boa.wv.gov/) or call (304) 558-3557. For requirements in other jurisdictions, go to the National Association of State Boards of Accountancy’s website at [http://www.nasba.org](http://www.nasba.org).

Content specification of the C.P.A. examination and related information may be found at [http://www.cpa-exam.org](http://www.cpa-exam.org).

**Admission to Program**

Admission to the MAcc program is determined by a committee of accounting faculty members. The committee acts upon individual applications within a short period of time after receipt of the completed application.

The admission committee seeks applicants who ideally possess a 3.2 cumulative grade point average and a total GMAT score in the 60 percentile or higher. The GMAT score is used in consideration for awarding graduate assistantship.

Applicants who have passed the Certified Public Accountant examination are exempt from the GMAT requirement. Candidates who meet most of the above requirements will still be considered. Other factors such as work experience and other graduate degree work may also be a part of the committee’s decision-making.

International students should note that the College of Business and Economics TOEFL requirement is higher than the university’s requirement. Applicants must have a TOEFL score of 580 (paper), 237 (computer), or 92 (internet-based). If applicants have taken the IELTS instead of the TOEFL, the minimum score is 7.0.

**Prerequisites**

To assure that all students in the program have the same foundation in business, the following prerequisite courses (or their equivalent) must be completed before enrolling in MAcc graduate courses:

- principles of accounting (six hours)
- intermediate accounting (six hours)
- cost accounting
- income tax accounting
- auditing
- principles of microeconomics
- principles of marketing
- principles of management
- principles of finance
- statistics
- business law (six hours, three of which may be taken concurrently with graduate courses)
- accounting systems

Major Learning Goals

ACCOUNTANCY

Goal 1: Students will demonstrate competence in advanced technical topics.

Goal 2: Students will demonstrate research skills by finding and interpreting authoritative literature.

Goal 3: Students will communicate the results of research and/or analysis.

Goal 4: Students will identify an ethical dilemma and propose a solution.

Business Administration

Master of Business Administration

The master of business administration program is accredited by the AACSB. The program is offered in two formats. An accelerated full-time, day-class program in Morgantown can be completed in 14 months while an online program can be completed in two years. The online program, referred to as the Online Hybrid M.B.A. Program, is designed for working professionals. The standards of excellence that support accreditation by the AACSB are maintained across both formats of the program.

The M.B.A. degree program recognizes the need for future managers to be able to anticipate and recognize change and then to manage resources advantageously in that environment. Thus, the curriculum emphasizes a general, broad-based approach to graduate education in management which provides the student with the qualitative and quantitative skills necessary for a manager to succeed in such an environment. The program develops a managerial perspective that is primarily line-oriented as opposed to staff-oriented and is relevant to those in both private and public organizations.

Full-Time M.B.A. Program

The full-time M.B.A. plan of study requires a total of fifty credit hours of graduate credit. The program is designed for individuals with varying educational and professional backgrounds. Students must have pre-requisite courses to be eligible for the program: ACCT 201, ECON 201, and ECON 225 or STAT 211. If students are applying to the M.B.A. program from outside WVU, the course descriptions can be used to match courses at other institutions. Students not able to meet the prerequisite coursework prior to completing their undergraduate degree can meet this requirement via an online software program. No master’s thesis is required for completion of the degree.

The full-time M.B.A. degree program is completed on the Morgantown campus. The full-time program begins in June of each year and students graduate in mid-August of the following year.

Online Hybrid M.B.A. Program

The online hybrid M.B.A. plan of study requires forty-eight credit hours of graduate credit. The program is designed for working professionals with varying educational and professional backgrounds. The program requires a minimum of two years of work experience. Students may enter the online hybrid M.B.A. program at the start of either the fall or spring semester, completing the program two years later. In addition to the online curriculum, four 3-4 day residencies are required. The residencies occur once a semester.

Dual Degree Programs

The College of Business of Economics offers a number of joint programs through both the full-time and the executive M.B.A. programs. Please contact the Office of Graduate Programs for details regarding admission criteria and plans of study.

Dual Degree Programs in conjunction with the full-time M.B.A.:

- M.B.A./M.S.I.R.
- M.B.A./M.S. Sport Management
- M.B.A./M.S. Finance
- M.B.A./M.D.
- M.B.A./D.D.S.
Dual Degree Programs in conjunction with the online hybrid M.B.A.:

- M.B.A./J.D.
- M.B.A./Pharm.D.
- M.B.A./M.S.N.

Financial Aid

Scholarships are available for the full-time M.B.A. program on a competitive basis.

- Frank DeGeorge - M.S.A. (Duquesne University)
Admissions to the Full-Time M.B.A. Program

To gain admission to the full-time M.B.A. program, an applicant must have a bachelor’s degree from an accredited institution. Admissions decisions are based on an assessment of expected success in the program shown by the application materials and on space available. The Admissions Committee considers grade point average in all previous college-level work and also the grade-point average in the last sixty hours of coursework. Applications for admission to the M.B.A. program and official transcripts of all prior academic work should be submitted to the WVU Office of Admissions as early as possible. Applicants who have attended institutions other than WVU must request the registrar or records office of those institutions to forward a complete official transcript directly to the WVU Office of Admissions. The Graduate Management Admissions Test (GMAT) or the Graduate Record Examination (GRE) is required and the Admissions Committee takes no action on an application for admission to the full-time program until the applicant submits a GMAT or GRE score. Each applicant must also submit a resume, statement of purpose and letters of recommendation with the application. The priority deadline for the full-time M.B.A. program is March 1st of each year.

Admissions to the Online Hybrid M.B.A. Program

To gain admission to the online hybrid M.B.A. program, an applicant must have a bachelor’s degree from an accredited institution and a minimum of two years of full-time work experience post bachelor’s degree. Admissions decisions are based on an assessment of expected success in the program shown by the application materials and on space available. The Graduate Management Admissions Test (GMAT) is required unless an applicant has a terminal degree. GMAT waivers may also be granted if the applicant has five or more years of professional work experience and an undergraduate GPA of 3.0 or better. Applicants must apply for the GMAT waiver; these requests are reviewed by the Admissions Committee. The applicant must have submitted an application to be considered for a GMAT waiver. Each applicant must submit a resume showing prior work experience. For applicants with five or more years of experience, the Admissions Committee will place greater emphasis on the work history. For applicants with terminal degrees, the Admissions Committee may waive the GMAT requirement. Additionally, applicants are required to submit a statement of purpose and letters of reference. The priority deadline for receipt of applications and transcripts in the College’s Office of Graduate Programs is July 1 for the fall intake and December 1 for the spring intake. Admission to the program is competitive and subject to space being available. Students applying for admission into the online hybrid program as a dual degree student are not required to have work experience.

M.B.A. Program

The M.B.A. requires that the candidate achieve a cumulative grade point average of at least 3.0 on all work counting toward the graduate degree. A regular graduate student whose cumulative grade point average falls below 2.75 will be placed on probation. If the average is not brought up to 2.75 by the end of the following semester, the student will be suspended from the program. A grade below C in more than one course taken while enrolled as a graduate student will result in suspension from the program. In addition, the student must maintain a 3.0 average in all work counting toward the graduate degree.

M.B.A. Requirements

A minimum GPA of 3.0 is required in all courses

A grade of C or higher must be earned in all required courses

**Business Data Analytics Area of Emphasis Requirements**

The Area of Emphasis in Business Data Analytics is intended to prepare MBA students to support the growing demand of expertise in dealing with big data. Students will be exposed to course work in business intelligence, data mining, statistical methods and best practices for presenting and implementing finds.

**Course Requirements.** In order to satisfy the requirements of the Area of Emphasis, a student must completed the required courses below. Note, that a cumulative GPA of 3.0 is required for graduation from the MBA program. The courses and grades from the Area of Emphasis will be counted towards a student's cumulative GPA (a C or better is required in courses, with an overall cumulative GPA of 3.0) in the MBA program.

Business Data Analytics Area of Emphasis Requirements

The Area of Emphasis in Business Data Analytics is intended to prepare MBA students to support the growing demand of expertise in dealing with big data. Students will be exposed to course work in business intelligence, data mining, statistical methods and best practices for presenting and implementing finds.

Course Requirements. In order to satisfy the requirements of the Area of Emphasis, a student must completed the required courses below. Note, that a cumulative GPA of 3.0 is required for graduation from the MBA program. The courses and grades from the Area of Emphasis will be counted towards a student's cumulative GPA (a C or better is required in courses, with an overall cumulative GPA of 3.0) in the MBA program.

- BUDA 510 Foundations of Business Intelligence 3
- BUDA 520 Data Management 3
The MBA/EMBA students will be required to have a quantitative background to be eligible for this AoE. This could include degrees in STEM or have work experience where there is a significant quantitative work responsibilities.

**Energy Finance Area of Emphasis Requirements**

The Area of Emphasis in Energy Finance is intended to prepare MBA students to work in the growing energy industry. Students will be exposed to course work in finance, law and ethics and risk management as it pertains to the field of energy.

**Course Requirements.** In order to satisfy the requirements of the Area of Emphasis, a student must have completed the required courses with a passing grades. Note, that a cumulative GPA of 3.0 is required for graduation from the MBA program. The courses and grades from the Area of Emphasis will be counted towards a student's cumulative GPA in the MBA program.

**Integrated Marketing Communications Area of Emphasis Requirements**

The Area of Emphasis in Integrated Marketing Communications is intended to prepare EMBA students to develop the skills required to manage integrated marketing communications campaigns for their firms. Students will be exposed to coursework in integrated marketing communications, audience insight, brand equity management and emerging media.

**Course Requirements.** In order to satisfy the requirements of the Area of Emphasis, a student must completed the required courses below. Note, that a cumulative GPA of 3.0 is required for graduation from the EMBA program. The courses and grades from the Area of Emphasis will be counted towards a student's cumulative GPA (a C- or better is required in courses, with an overall cumulative GPA of 3.0) in the EMBA program.

EMBA students who elect to enroll in this Area of Emphasis will be required to complete IMC 610 before moving on to the other courses in the Area of Emphasis.

**Major Learning Goals**

**Full-time Master of Business Administration Program**

**Goal 1:** Students will be able to integrate the functional areas of business into management decisions in a global environment

1.1 Students will be able to assess the impact of different cultures, governments, legal, political, competitive, currency systems, and trade organizations on the multinational national enterprise.

1.2 Students will be able to assess trends in the global business environment.

**Goal 2:** Students will be able to identify problems, collect appropriate data and analyze the data to make informed management decisions

2.1 Students will be able to evaluate potential business projects and make economically feasible recommendations.

2.2 Students should be able to prepare and interpret financial statements.

2.3 Students will be able to make data-driven, fact-based decision making using statistical techniques and principles.

2.4 Student will be able to assess emerging, new technologies from a business management perspective.
Goal 3: Students will be able to articulate a succinct business analysis and make recommendations

3.1 Students will be able to make business recommendations using appropriate analyses to support their position.

3.2 Students will be able to communicate the management information systems needs of an organization.

3.3 Students will be able to make recommendations for an organization based on a supply chain analysis.

Goal 4: Students will be able to make management decisions in an ethically sensitive and socially responsible manner

4.1 Students will become familiar with personnel/human resource management policies and procedures with consideration for international, multi-cultural, and ethical implications.

4.2 Students will be able to negotiate and control information ethically to meet organizational needs.

Goal 5: Students will be able to effectively manage teams and work units and implement strategies to achieve organizational goals.

5.1 Students will evaluate the processes through which goals are set and accomplished in organizations.

5.2 Students will demonstrate effective management, leadership, teamwork skills.

5.3 Students will be able to apply basic theories of human behavior and individual differences to the process of energizing and directing behavior (of both self and others).

Online Hybrid Master of Business Administration Program

Goal 1: Students will be able to integrate the functional areas of business into management decisions in a global environment

1.1 Students will be able to evaluate factors that influence the competitive behavior of the firm.

1.2 Students will be able to predict and anticipate company and market responses to external factors.

1.3 Students will be able to identify the risks and opportunities in global markets.

Goal 2: Students will be able to identify problems, collect appropriate data and analyze the data to make informed management decisions

2.1 Students will be able to evaluate business reports to make meaningful decisions for the organization.

2.2 Students will be able to make data-driven, fact-based decision making using statistical techniques and principles.

2.3 Students will be able to take real-world problems and express them in quantitative terms.

Goal 3: Students will be able to articulate a succinct business analysis and make recommendations

3.1 Students will be able to evaluate potential business projects and make economically feasible recommendations.

3.2 Students will be able to provide analysis to a business problem that they are currently facing in their professional lives and provide a plan for next steps.

Goal 4: Students will be able to make management decisions in an ethically sensitive and socially responsible manner

4.1 Students will be able to negotiate and control information ethically to meet organizational needs.

4.2 Students will understand how to use and acquire information in ethically sensitive manner.

4.3 Students will be able to synthesize various ethical theories and design a corporate code of ethics.

Goal 5: Students will be effective team members in a virtual environment

5.1 Students will be able to work together in a supportive and effective way.

Goal 6: Students will be an effective leader who influences people toward the attainment of organizational goals

6.1 Students will recommend actions for leader effectiveness in a scenario case and apply a theory or framework to propose and defend their recommendations.

6.2 Students will identify various leadership styles and their relative effectiveness, along with real-life examples.

6.3 Students will evaluate, in a case setting, the processes through which goals are set and accomplished in organizations.
PHD Business Administration-Accounting

Overview
The Ph.D. in Business Administration with a major in Accounting is designed to prepare qualified individuals for a career in scholarly accounting research and teaching at the university level. The doctoral program is offered to a relatively small, highly qualified, and motivated group of students who demonstrate the potential to become highly regarded scholars in the field. Doctoral students are expected to be in residence on a full-time basis throughout the duration of the program. Typically, a student will be in-residence, full-time for a period of four years.

Individualized Program
Each doctoral student is paired with a faculty member with similar research interests. The faculty member will work closely with the student and will serve as a research mentor throughout the duration of the program. Currently, the training, background, and interests of the doctoral faculty support behavioral and archival research in fraud, forensics, and ethics across the functional accounting areas of audit, financial, governmental, information systems, international, managerial, and tax accounting. The individual plan of study for each candidate will be determined by the student, the faculty mentor, and the Ph.D. committee.

Admission Requirements
Admission to the Ph.D. program in accounting is open to qualified individuals. To be considered for admission into the program, prospective students must:

- Submit an online application by December 1 to be considered for University fellowships. Completed applications submitted by February 1 of each year will be given full consideration for College fellowships and admission in the succeeding fall semester
- Have a bachelor’s degree in accounting from an accredited college/university OR a bachelor’s degree in any field AND a master’s degree in accounting from an accredited university
- Provide a statement of purpose describing why the applicant is pursuing a Ph.D. and the applicant’s career aspirations upon completion of the degree (typically submitted as part of the application)
- Provide a current resume or curriculum vitae (typically submitted as part of the application)
- Provide three letters of reference (typically coordinated and submitted as part of the application)
- Have official transcripts from all colleges and universities attended sent directly from the applicant’s colleges and/or universities to the West Virginia University Graduate School. A cumulative GPA on undergraduate courses should be 3.0 or higher and a cumulative GPA on graduate courses should be 3.25 or higher (based on the U.S. standard of 4.0)
- Have an official score on the Graduate Management Admissions Test (GMAT) sent directly from the test administrator to the West Virginia University Graduate School. The GMAT score should be 620 or higher.
- Obtain a score of at least 100 on the TOEFL-ibt (250 on the old computer-based exam or 600 on the paper-based exam) or a score of at least 7.0 on the IELTS test IF English is not the applicant’s native language. It should be noted that the College of Business and Economics TOEFL requirement for applicants to the Ph.D. in Business Administration is higher than the University requirement. Go to www.toefl.org or www.ielts.org to register and find out more about these tests.
- Applicants who have received a high school diploma or a bachelor’s degree from an accredited college or university in the United States, the United Kingdom, or other predominately English-speaking country are usually exempt from the TOEFL/IELTS requirement. However, applicants having only a master’s degree from one of these countries must still provide acceptable TOEFL or IELTS scores.

The items listed above are minimum requirements for admission into the program. Since there is limited space in each class, meeting the above requirements does not guarantee admission. Applicants will not be admitted on a provisional basis.

Doctor of Philosophy
The requirements for a Doctor of Philosophy with a major in Accounting includes successful coursework, a comprehensive examination, a dissertation proposal, and a dissertation defense.

Additionally, candidates are required to work under the guidance of tenure-track research-oriented faculty as graduate research and teaching assistants and are required to teach four courses after successfully passing their comprehensive exams. The program requires full-time enrollment and on-campus attendance, and requires attendance and participation in research workshops and presentations.

The plan of study for each candidate is individualized by the faculty mentor and student, based upon the nature and objectives of the selected research stream. This plan is to be developed by the student and the faculty mentor during the first year.

**Total Hours** 72

---

* A minimum of fifteen semester hours of graduate coursework is required in graduate statistical research methods and analysis. Graduate statistic courses offered by the Statistics, Psychology, and Management departments may fulfill this requirement.

**SEMINAR**

The first doctoral seminar provides an introduction to research and the philosophy of research. This course will be taken with other business doctoral students within the college. Then, each student must take the three accounting focused seminars: Behavioral Research, Archival Research, and Fraud and Forensic Accounting. Each course covers seminal research within the functional areas of accounting.

**INDEPENDENT STUDY**

One graduate independent study course is required. The course will be centered on a research project selected in conjunction with the faculty mentor.

**MINOR AREA**

A minimum of fifteen semester hours of graduate coursework is required in a minor supporting area. A minor area is one that is outside, but complementary to, the major area of accounting and the research in which the candidate is interested, e.g., information systems, finance, economics, public finance, psychology, sociology, operations management, law, and industrial engineering. The minor area focus and courses will be selected with the faculty mentor.

**WORKSHOPS**

Throughout the student's tenure at West Virginia University, the faculty expect the doctoral students to attend the accounting workshops. These workshops consist of internal (faculty and students) and external scholars invited to present their research. Doctoral students are expected to read the research papers carefully and are encouraged to participate in the workshop by asking questions and making comments.

**COMPREHENSIVE EXAMINATION**

At the end of the second year and after successfully completing at least 39 credit hours of course work from the plan of study, which must include all accounting graduate seminars, each student is required to take a written comprehensive examination. This two-day exam will cover course-related topics and materials from the candidate’s plan of study.

Upon successful completion of the comprehensive exam, candidates are considered to be ABD, or “all but dissertation”. In the event that all or parts of the exam are not considered to be successful, the candidate may be asked either to re-take select courses and the entire exam or re-take select deficient parts of the exam. A student may retake part of all of the examination only once, and if their efforts are still considered to be unsuccessful, will be asked to leave the doctoral program.
DISSERTATION PROPOSAL

During the third year after a successful comprehensive examination, the doctoral candidate must select a dissertation committee comprised of five members, one of which will be outside of the Accounting Department. The candidate will develop a dissertation proposal through work with the Chair of the Committee (presumably the faculty mentor) and the Committee members. Once the Chair and Committee members feel that the candidate and the research idea is ready, a public presentation of the dissertation proposal is to be made by the candidate. The Chair and Committee will take note of comments, suggestions, and critiques by those in attendance, and make certain requirements of alteration to the candidate to the proposal. Once the alterations to the proposal are incorporated by the candidate, the Chair and the Committee will approve the candidate’s dissertation proposal.

After a successful dissertation proposal the candidate may begin the specific research related to the dissertation. It is recommended that the candidate continue to work closely with the Chair and Committee and keep them appraised of progress towards completion of the dissertation, and to timely notify the Chair and Committee of any unforeseen difficulties as it relates to the dissertation process.

DISSERTATION DEFENSE

After a successfully executing the dissertation proposal and writing the results in a manner appropriate and consistent to the accounting academe and the University guidelines for dissertations, the candidate must defend the dissertation. The dissertation defense should occur during the fourth year, and is conducted in a formal setting with the Chair and the Committee. The candidate will present the information, field questions from the Chair and the Committee, and make adjustments to the dissertation as deemed necessary by the Chair in working with the Committee.

If the changes are minor in nature, the Chair and Committee may approve the dissertation contingent upon making the minor changes. If the changes are substantial, the Chair and Committee may require the candidate to make corrections and defend again at a later date.

Upon a successful dissertation defense, the candidate must follow the University Electronic Thesis and Dissertation (ETD) guidelines for electronic publication. Once the dissertation has been successfully approved by the University, the candidate is eligible for formal graduation ceremonies.

PHD Business Administration-Finance

Overview

The Ph.D. in Business Administration with a major in Finance is a full-time, in-residence program lasting 4-5 years. It is a relatively small, high-quality program. The primary goal of the program is to prepare students for careers in research and teaching at comprehensive universities. The program of study requires the satisfactory completion of coursework, a first year summer research paper, a comprehensive examination, and dissertation research. Students will take courses in various finance topics, economics, econometrics and research methods, and statistics. The program distinguishes itself with small classes and an “open-door” policy which allows for close interaction between students and faculty, with plentiful opportunities to discuss ideas and work on joint research projects. Early involvement of students in faculty-directed research projects provide students with the opportunity to develop a pipeline of research while in their doctoral program of study. Our aim is that all students will have the opportunity to present their work at academic conferences and also have at least one published scholarly paper by the time they graduate. Students also acquire teaching experience through teaching undergraduate finance courses during the third and fourth years of the program.

Admission Requirements

Students who have an M.S. in finance or an MBA with concentration in finance from an accredited academic institution can enter into the Ph.D. program directly. Alternatively, if students lack sufficient academic background in finance, our M.S. in finance program will serve as an essential preliminary step towards a Ph.D. degree. The following will be considered for admission into the program:

• A completed application received by December 1 is required to be considered for University fellowships. Completed applications received by February 1 of each year will be given full consideration for College fellowships and admission in the succeeding fall semester
• A Bachelor's degree or equivalent from an accredited university
• A statement of purpose regarding the Ph.D. program describing why the applicant is pursuing a Ph.D. in Business Administration with a major in finance and the applicant's career aspirations upon completion of the degree
• A current résumé
• Three letters of reference
• Official copies of all university transcripts with cumulative GPA scores of 3.25 or better on all undergraduate courses and 3.50 on graduate courses (based on U.S. standard of 4.0)
• An official Graduate Management Admissions Test (GMAT) score is preferred. However, in some cases a GRE (Graduate Record Examination) will be accepted. (A High GMAT/GRE score is required for admission to the Ph.D. Program in Business Administration with a major in finance, usually a GMAT score of 650 or above.)
• The College of Business & Economics TOEFL requirement for Ph.D. in Business Administration applicants is higher than the University’s. Students whose first language is not English must obtain a score of at least 100 on the TOEFL-ibt (250 under the old computer-based exam or 600 under the paper-based exam) or a score of at least 7.0 on the IELTS test to be admitted to graduate study. Go to www.toefl.org or www.ielts.org to register and find out more about the test. This is a university requirement.
• Applicants who have received a high school diploma or a bachelor's degree from an accredited college or university in the United States, the United Kingdom, or other predominately English-speaking country usually are exempt from the TOEFL/IELTS requirement. However, applicants only having a master's degree from one of these countries must still provide acceptable TOEFL or IELTS scores.

These entrance requirements are minimum requirements for regular admission. Since there is limited space in each year’s class, meeting these entrance requirements does not guarantee admission. Applicants will not be accepted on a provisional basis.

Program Requirements

The program is designed to be completed in four or five years, depending on the student’s background, interests, and dissertation progress. The program of study requires the satisfactory completion of coursework plus dissertation research. Students will take courses in economic theory, econometrics, and finance, followed by a comprehensive examination and dissertation research.

The Ph.D. program in business administration at WVU is a full-time graduate program and requires at least three years in residence. The residency requirement is important not only because the doctoral degree has aspects of an apprenticeship which can only be accomplished on campus by working directly with the business faculty but because teaching on campus is a requirement of the program.

To prepare Ph.D. candidates for eventual university teaching responsibilities, students are expected to teach after their first year in the program. They will work closely with faculty to ensure quality instruction and receive feedback on their development as university-level teachers.

Doctor of Philosophy

Our program is built around an applied curriculum with a strong theoretical and quantitative foundation. The program involves doctoral level coursework, a first year research paper, and presentation to faculty, passing a finance comprehensive exam, and defending a dissertation.

PHD Business Administration-Management

Overview

The Management Ph.D. program is a small, high quality, full-time, residential program designed to prepare qualified individuals for careers in scholarly research and teaching at the university level. The Management Department faculty is engaged in research in a wide range of topics in strategic management, organizational behavior, international business, and entrepreneurship.

The program of study requires the satisfactory completion of coursework, a qualifying paper, a comprehensive examination, and dissertation research. Students take courses in various management topics, research methods, and statistics. Small classes and an "open-door" policy allow for close interaction between students and faculty, with frequent opportunities to discuss ideas and collaborate on joint research projects.

Ph.D. students have ample opportunity to work closely with faculty on a one-on-one basis and become involved with their research activities. We strive for our students to gain experience presenting their work at academic conferences and publishing research articles in quality academic journals. Students also acquire teaching experience through teaching undergraduate management courses on several occasions during their time in the program.

The Ph.D. program is designed to provide students with enough flexibility to discover an intellectual niche while ensuring that all students acquire general research knowledge in the broader field of management, in-depth expertise in a selected area of specialization (i.e., strategic management or organizational behavior), and competence in quantitative research methods.

FACULTY

COORDINATOR
• Jodi Goodman - Ph.D. (Georgia Tech University)

PROFESSORS
• Mark Gavin - Ph.D. (Purdue University)
• Jodi Goodman - Ph.D. (Georgia Tech University)
• Usha Haley - Ph.D. (New York University)

ASSOCIATE PROFESSORS
• Gerald Blakely - Ph.D. (University of North Carolina at Chapel Hill)
• David Dawley - Ph.D. (Florida State University)
• Jeff Houghton - Ph.D. (Virginia Tech University)
• Curt Moore - Ph.D. (Texas Tech University)
• Abhishek Srivastava - Ph.D. (University of Maryland)
• Edward Tomlinson - Ph.D. (Ohio State University)

ASSISTANT PROFESSORS
• Ajay Aluri - Ph.D. (Oklahoma State University)
• Olga Bruyaka - Ph.D. (Jean Moulin University Lyon)
• James Field - (Virginia Commonwealth University)
• Jennifer Sexton - Ph.D. (Florida State University)

Admission Requirements

The following will be considered for admission into the program:

• Application deadline. Students begin their graduate work in the fall semester. For full consideration for August admission and/or financial aid, the department must have received completed applications by February 1. The department makes most admission decisions during February and March. Given application processing time, we encourage potential students to apply early to ensure all materials are received prior to the due date.
• Official transcripts/GPA. To be admitted as a Ph.D. student, applicants must have completed a Bachelor's degree from an accredited university and should have cumulative GPA scores of 3.25 or better for undergraduate work and 3.5 or better for graduate work (based on U.S. standard of 4.0). Applicants must have official transcripts sent to WVU's Office of Admissions.
• GMAT or GRE scores. An official GMAT (Graduate Management Admissions Test) or GRE (Graduate Records Exam) score must be submitted. A minimum 620 GMAT score is required. The GRE-GMAT comparison tool (https://www.ets.org/gre/institutions/about/mba/comparison_tool) will be used to evaluate GRE scores submitted. Test scores no more than five years old generally will be accepted.
• TOEFL / IELTS. Applicants whose native language is not English or who did not complete an undergraduate degree at an institution in an English-speaking country must obtain a score of 600 on the TOEFL paper-based format, 250 on the TOEFL computer-based format, 100 on the TOEFL-ibt, or 7.0 on the IELTS. Go to www.toefl.org or www.ielts.org to register and find out more about the test. This is a University requirement.
• Current resume.
• Three letters of recommendation.
• Statement of purpose. The statement of purpose should address why you are interested in earning your Ph.D. from WVU (what you hope to learn, career goals, etc.). You should demonstrate your understanding of what academic research is and your commitment to doing this type of work, both in the Ph.D. program and throughout your career. You should discuss any research experience you have, your general area of interest and your specific research interests.
• Writing Sample (if available). Examples include class research papers, conference papers, published research articles, research manuscripts in progress, white papers, technical reports, etc.
• Other materials the applicant wishes to submit in support of the application.
• Other application materials as required by WVU.

The entrance requirements are minimum requirements for admission. Since there is limited space in each year's class, meeting these entrance requirements does not guarantee admission. Applicants will not be accepted on a provisional basis.

Doctor of Philosophy

The coursework in management is designed to provide a theoretical, methodological, and statistical foundation for critically evaluating extant research and conducting independent research. Students will take six content courses in management and six research methods and statistics courses. Additional requirements include a qualifying paper and a comprehensive examination. Subsequent to completing coursework and passing comprehensive examinations, students will be admitted to doctoral candidacy. Remaining hours will focus on completing a dissertation.

PHD Business Administration-Marketing

Overview

The Ph.D. in Business Administration with a major in Marketing is a full-time, residential program that seeks to prepare students to contribute to the marketing discipline though the discovery, development, and dissemination of knowledge. The goal is to strive for continuous improvement in training world-class researchers and college professors who are able to conduct independent, original academic research and teach university-level courses in their major areas of study.

Admission Requirements

The following will be considered for admission into the program:

- A completed application received by December 1 is required to be considered for University fellowships. Completed applications received by February 1 of each year will be given full consideration for College fellowships and admission in the succeeding fall semester
- A master’s degree or equivalent from an accredited university
- A statement of purpose regarding the Ph.D. program describing why the applicant is pursuing a Ph.D. in Business Administration and the applicant’s career aspirations upon completion of the degree
- A current résumé
- Three letters of reference
- Official copies of all university transcripts with cumulative GPA scores of 3.0 or better on all undergraduate courses and 3.25 on graduate courses (based on U.S. standard of 4.0)
- An official Graduate Management Admissions Test (GMAT) score is preferred. However, in some cases a GRE (Graduate Record Examination) may be accepted. (A High GMAT/GRE score is required for admission to the PhD Program in Business Administration.)
- The College of Business & Economics TOEFL requirement for PhD in Business Administration applicants is higher than the University’s. Students whose first language is not English must obtain a score of at least 100 on the TOEFL-ibt (250 under the old computer-based exam or 600 under the paper-based exam) or a score of at least 7.0 on the IELTS test to be admitted to graduate study. Go to www.toefl.org or www.ielts.org to register and find out more about the test. This is a university requirement.
- Applicants who have received a high school diploma or a bachelor’s degree from an accredited college or university in the United States, the United Kingdom, or other predominately English-speaking country usually are exempt from the TOEFL/IELTS requirement. However, applicants only having a master’s degree from one of these countries must still provide acceptable TOEFL or IELTS scores.
The entrance requirements are minimum requirements for regular admission. Since there is limited space in each year's class, meeting these entrance requirements does not guarantee admission. Applicants will not be accepted on a provisional basis.

Business Data Analytics

Degrees Offered

• M.S. Business Data Analytics

This program is designed to provide students with the ability to perform data analytics in order to enhance business decision making and increase organizational value. The Business Data Analytics degree is particularly attractive to graduating Accounting, Computer Science, Economics, Engineering, Finance, Management, Marketing, Management Information Systems, Math and Statistics students. The degree is also relevant to those already in the workforce, with an emphasis on those already working in the technology/MIS sector, who are looking to broaden their skills and increase their competitive position in the job market. Students can opt to complete the program with a one-year or two-year plan of study. The M.S. in BUDA program is delivered in a hybrid online format with two required residencies. Students will not be required to move to Morgantown, thereby allowing students from a wider geographical area who can remain employed while pursuing the degree. Graduates will understand emerging technology trends in the job market and be well-positioned by way of their strong technology and analytical/quantitative skills. This program is complementary with the University’s goal of transforming curriculum to provide the skills students need to succeed as well as positioning students for career and lifelong success. Business data analytics, often referred to as “Big Data”, is a rapidly emerging segment in business and industry, and all indications are that it represents one of the fastest growing job markets and has a sustainable future. This program seeks to provide students with the knowledge, skills and tools to successfully compete for a variety of positions in the emerging job market.

FACULTY

CHAIR

• Virginia Franke Kleist - Ph.D. (University of Pittsburgh)
  Professor, Management Information Systems

ASSOCIATE PROFESSOR

• Nanda Surendra - Ph.D. (University of Cincinnati)
  Associate Professor, Management Information Systems

ASSISTANT PROFESSORS

• Stephane Collignon - Ph.D. (Virginia Tech)
  Assistant Professor, Management Information Systems

• Gregory J DeAngelo - Ph.D. (University of California at Santa Barbara)
  Assistant Professor, Economics

• Brad Price - Ph.D. (University of Minnesota)
  Assistant Professor, Business Data Analytics

PROFESSOR EMERITUS

• E James Harner - Ph.D.

Admission

The Admissions Committee is made up of faculty teaching in the M.S. in Business Data Analytics Program and representatives of the Office of Graduate Programs. The committee members are looking for individuals who have an interest and demonstrated aptitude in quantitative and analytical domains. The committee will take a holistic approach to the admission process and will consider the following factors:

• Undergraduate Degree (students can have an undergraduate degree in a number of areas, undergraduate degrees in the following areas are preferred but not required: engineering, business discipline, math, statistics, computer science, management science, most other sciences, operations research, production/operations management, economics, or industrial/organizational psychology)

• GMAT or GRE test scores in the top 25% (GMAT or GRE waiver can be requested if the applicant has 5 or more years of work experience)

• Strong undergraduate record

• 3 letters of recommendation

• Statement of purpose
• Work experience in the following areas – business intelligence, business analytics, data mining, data warehousing, database management, computer science, programming, web development, web analytics, risk management and related fields – are considered favorably.

If you have any questions, please contact the College of Business and Economics Office of Graduate Programs.

Degree Requirements

The 30-hour online program is comprised of ten courses that collectively expose students to data uses to facilitate business operations and decision making. The introductory course (BUDA 510) helps students understand the role of data analytics in the context of business. The next set of courses (BUDA 515 and BUDA 520) covers the collection of data as well as the building, manipulation and management of large databases. This is followed by a set of courses (BUDA 525, BUDA 530, BUDA 535, BUDA 540, BUDA 545 and BUDA 550) that cover analytical tools that can be applied to the large databases, including statistical, data mining, visualization, and simulation modeling tools. Formal coursework concludes with a capstone course (BUDA 555) that requires students to take the knowledge and skills built in the previous nine courses and apply them to a real-world business problem. Throughout all ten courses, there will be an overarching emphasis on 1) the application of data analytics to a business context, and 2) the ethical issues surrounding the collection and use of data. The MS in BUDA program also has two residency requirements. The first residency will occur at the front-end of the program. Students will meet and interact with faculty and staff associated with the MS in BUDA program, as well as their fellow students. This will also provide an opportunity to cover the logistics of the program, build networking capacity in the program, and provide an on-campus experience to strengthen the students’ connection to WVU. The second residency will occur at the end of the program. This residency will include presentations by student teams of their capstone project and a recognition/celebratory event surrounding completion of the program.

A minimum cumulative GPA of 3.0 is required

Major Learning Goals

BUSINESS DATA ANALYTICS

The educational goals and objectives of the M.S. in Business Data Analytics are as follows:

• Students will be able to demonstrate expertise in statistical techniques, data mining, utilizing databases, and analytical tools.
• Students will be able to apply data analytics to enhance the decision-making of the firm in performance metrics and measurement, risk indicators, assessment and response, and compliance.
• Students will be able to use business analytics to synthesize data trends and competitive drivers.
• Students will be able to communicate the analysis and findings of an analytics initiative in moving an organization forward.

Economics

Degrees Offered

• Master of Arts
• Doctor of Philosophy

The master of arts and doctor of philosophy degrees in economics enable students to broaden and refine their knowledge of the concepts and methods of economic analysis. These programs are designed to prepare students for careers in higher education, government, and business. Student programs are planned with the assistance of a faculty advisor and approval of the director of graduate programs. Additional information about the graduate programs in economics and the regulations and requirements pertaining to them is available at http://www.be.wvu.edu/phd_economics/index.htm. Students are bound by these regulations and requirements, as well as those of the College of Business and Economics.

Prerequisites

Applicants with a bachelor's degree may apply directly to the Ph.D. program. To be admitted as a regular M.A. or Ph.D. student, applicants must have a grade point average of 3.0 or better for all undergraduate work completed. Applicants must also complete the general aptitude portion of the Graduate Record Examination (GRE) and receive a minimum combined score of 300 for the verbal and quantitative sections and a minimum score of 3.0 for the analytical writing section. International students must submit their scores on the Test of English as a Foreign Language (TOEFL) or, alternatively, the scores on the International English Language Testing System (IELTS). In addition, applicants must have completed at least one semester of each of the following courses: intermediate microeconomic theory, intermediate macro-economic theory, calculus, and statistics. Applicants not meeting these entrance requirements may be admitted on a provisional and/or deficiency basis, subject to certain performance conditions during their first semester in residence.

Assistantships

Virtually all full-time students newly accepted into the Ph.D. program are also offered a graduate assistantship, which includes a cash stipend and tuition waiver. Graduate assistants engage in research and teaching activities under the supervision of a faculty member. Assistantships are evaluated and renewed each year for four years, so long as the student remains full-time, in good standing, and performs duties satisfactorily. A fifth year is also typically available to full-time students who are making satisfactory progress on their dissertations. The faculty of the Department of Economics also nominates outstanding applicants for university fellowships. Special scholarships are available on a competitive basis to minority students. For further information, see http://www.be.wvu.edu/phd_economics/prospective.htm.

Academic Standards

To qualify for a graduate degree in economics, students must earn a cumulative grade point average (GPA) of 3.0 or better for all courses completed as a graduate student at WVU. A regular graduate student in economics whose cumulative GPA falls below 3.0 (B) upon completion of the first nine hours of graduate study is not in good-standing and will be placed on probation at the end of the semester in which the GPA fell below 3.0. Such a student, placed on probation, who fails to raise his or her cumulative GPA to 3.0 by the end of the semester succeeding that in which his or her GPA fell below 3.0 is subject to suspension from the program at the end of that probationary semester.

Other academic reasons for suspension from the program include failing grades on more than fifty percent of the coursework taken in any semester, a third failure on either a micro-economic theory or macroeconomic theory comprehensive examination, a fourth failure on comprehensive field examinations, or failure to complete all degree requirements within the specified time limits.
FACULTY

CHAIR
• Clifford Hawley - Ph.D. (Duke University)

  Applied Microeconomics
• Michael Sacks - Ph.D. (University of California, Irvine)
  Economics of Innovation, Industrial Organization, Public/club theory, Game theory

Admissions
The current policy and practice of the Department of Economics is not to accept applications for the Master of Arts degree. Instead, all students who receive a Master of Arts in Economics have first been admitted into the Doctor of Philosophy in Economics program with the intention of earning a doctorate. Those who receive the Masters degree do so either as a “milepost” on their way to the Ph.D. or as a degree in lieu of the Ph.D. when leaving the program.

Doctor of Philosophy

The Ph.D. degree is not awarded for the mere accumulation of course credits nor for the completion of the specified residence requirements. At least four years of full-time graduate work beyond the baccalaureate degree are usually required to complete the doctorate. A minimum of two consecutive semesters in actual residence as a full-time graduate student is required.

CURRICULUM REQUIREMENTS

</table>
**Comprehensive Examinations**

Students must pass written comprehensive examinations in microeconomic theory, in macroeconomic theory, and in two fields. For detailed rules, see http://www.be.wvu.edu/phd_economics/rulesregulations.htm.

**Candidacy and Dissertation**

When an applicant has passed the written comprehensive examinations, the applicant will be formally promoted to candidacy for the Ph.D. degree. The candidate must submit a dissertation pursued under the supervision of a member of the graduate faculty in economics on some problem in the area of the candidate’s major interest. The dissertation must present the results of the candidate’s individual investigation and must embody a definite contribution to knowledge. It must be approved by a committee of the graduate faculty in economics. After approval of the candidate’s dissertation and satisfactory completion of other graduate requirements, a final oral examination on the dissertation is required.

Each Ph.D. candidate is required to present a dissertation proposal to the graduate director after approval by at least three members of his or her dissertation committee including the chairperson. This proposal will include a statement of the problem (topic summary), a preliminary survey of the literature, a description of the research methodology, and other pertinent material. With the approval of the graduate director, the student is then required to present the proposal in a faculty-student seminar. Credit for dissertation research and writing is available under ECON 797, but only if the student has a dissertation chairperson and an approved topic.

---

* Six semester hours (or the equivalent) must be taken in each of the student’s two Areas of Emphasis. The Areas of Emphasis offered by the Department are international economics, monetary economics, public economics, regional and urban economics, and resource economics. Other fields, conducted in cooperation with other units on campus, may possibly be approved in unusual cases. Only one of the Areas of Emphasis may be in an outside area; selection must be approved by the graduate economics faculty.

** Students must complete two additional three-hour 700-level elective courses in Economics in addition to their core courses, field courses, ECON 795, and ECON 797.

Major Learning Goals

ECONOMICS

The doctoral program in economics trains students to 1) conduct independent and original research in economics of publishable quality; 2) analyze questions of interest to economists and policymakers, employing tools and methods of theoretical and empirical economics in a manner that meets or exceeds the expectations of the economics profession for a doctorate in economics; and 3) effectively communicate both what economists in general know and the fruits of the student's own research.

- Students will demonstrate the ability to teach, at any undergraduate level or beyond, core courses in economics and courses in at least two areas of specialization within economics.
- Students will produce research papers that lead to refereed publications in economics journals.
- Students will demonstrate the ability to apply the methods and insights of economics in ways that are valued by society.
Finance

Degree Offered

- Master of Science in Finance with an optional Area of Emphasis in Energy

The West Virginia University is a CFA® Institute Partner School through the M.S. Finance program. Program graduates are prepared to sit for examination for the Chartered Financial Analyst designation and graduates boast a high pass rate on all three testing levels.

The M.S. Finance program is ideal for potential candidates with undergraduate degrees in accounting, finance, engineering, mathematics, physics, geology, or economics, or those with industry experience and the drive to be successful. M.S. Finance graduates, especially those earning the Chartered Financial Analyst credential, enjoy careers with leadership positions across the gamut of financial positions. This includes investment banking positions, portfolio management, financial analyst, fund management, and corporate finance positions, among others.

The optional area of emphasis in Energy Finance prepares graduates for leadership careers in the energy sector. This area of emphasis is part of West Virginia University’s Shale Gas Initiative and offers B-School graduates entrée into the energy sector and Energy Sector geologists, engineers, and other practitioners the business acumen for energy sector advancement into leadership and decision-making positions.

FACULTY

COORDINATOR

- Paul J. Speaker - Ph.D. (Purdue University)
  Corporate finance, Public sector financial management, Business valuation, Business of forensics

PROFESSORS

- K. Victor Chow - Ph.D. (University of Alabama), C.F.A.
  Portfolio Management, Investments
- William B. Riley - Ph.D. (University of Arkansas)
  Investments, Capital Markets

ASSOCIATE PROFESSORS

- Ashok Abbott - Ph.D. (Virginia Polytechnic Institute and State University)
  Financial Institutions, Corporate Finance, Mergers and Acquisitions
- Naomi Boyd - Ph.D. (The George Washington University)
  Financial Market Microstructure, Behavioral Finance
- Ann Marie Hibbert - Ph.D. (Florida International University)
  International Finance, Asset Pricing, Behavioral Finance
- Alex Kurov - Ph.D. (State University of New York, Binghamton), C.F.A.
  Financial Market Microstructure, Futures Markets
- Costanza Meneghetti - Ph.D. (Georgia State University)
  Corporate Finance
- Terry L. Rose - Ph.D. (University of Illinois)
  Insurance, Risk Management
- Paul J. Speaker - Ph.D. (Purdue University)
  Corporate Finance, Public Sector Financial Management, Business Valuation, Business Forensics

ASSISTANT PROFESSORS

- Bingxin Li - Ph.D. (University of Houston)
  Energy finance, Investments, Risk management
- Gulnara Zynutdinova - Ph.D. (Washington State University)
  Mutual Funds and Investor Behavior

TEACHING ASSISTANT PROFESSOR

- Frank DeGeorge, C.P.A. - M.S.A. (Duquesne University)
  Financial Statement Analysis

Admission

To gain admission to the M.S. in Finance program, an applicant must have a bachelor’s degree from an accredited institution. Admissions decisions are based on an assessment of expected success in the program shown by the application materials and according to space available. The Admissions Committee considers grade point average in all previous college-level work and also the grade point average in the last sixty hours of coursework. The
Graduate Management Admissions Test (GMAT) is required and the Admissions Committee takes no action on an application for admission to the program until the applicant submits a GMAT score. Each applicant must submit a resume with the application. Additionally, applicants are encouraged to submit a personal statement and two letters of reference. Provisional admissions are rare and evaluated on a case-by-case basis.

The following prerequisite courses may be taken at other institutions but must be successfully completed prior to entering the M.S. in Finance program:

- Principles of Economics – six hours
- Principles of Accounting – six hours
- Investments
- Business Finance
- Statistics
- Calculus

Transcripts and Deadlines

Application for admission to the M.S. in Finance program and official transcripts of all prior academic work should be submitted to the WVU Office of Admissions as early as possible. Applicants who have attended institutions other than WVU must request the registrar or records office of those institutions to forward a complete official transcript directly to the WVU Office of Admissions. Review of applications and consideration of financial awards will begin in January and continue until April 15.

**Dual Degree-MBA and M.S. Finance**

For students who have been accepted into both the MBA and M.S. Finance program, the program of study involves a combination of coursework described above and that required by the MBA program. University policy permits up to 12 credit hours to overlap. Currently, the initial summer session includes FIN 513 or FIN 530, which meets the MBA requirement of BADM 527 and the M.S. Finance course FIN 512, which meets the MBA requirement of BADM 512 or FIN 531. The initial fall semester M.S. Finance offering FIN 511 meets the MBA requirement of BADM 511.

**Major Learning Goals**

**FINANCE**

Goal 1: Students will demonstrate understanding of the ethical and professional standards in the securities industry.

Goal 2: Students will demonstrate understanding of how microeconomic and macroeconomic factors influence the values of financial assets.

Goal 3: Students will apply appropriate quantitative investment analysis tools.

Goal 4: Students will interpret and analyze external financial information from the viewpoint of investors and creditors.

Goal 5: Students will master the fundamental economic techniques for valuing financial assets.

Goal 6: Students will construct, evaluate, and manage diversified portfolios and effectively communicate the process.

**Forensic and Fraud Examination**

**Degree Offered**

- Master of Science

**Program**

The 30 credit-hour program is comprised of a core curriculum of forensic and fraud examination classes centered on data analytics for success in this career path. Students complete an intensive 12-month program with online classes and two required residencies. The core curriculum is paired with a focused selection of online MBA courses to create a well-balanced approach to the field. Courses build throughout the program to incorporate previously acquired skills and allow students to immediately put those skills to use through hands-on experiential learning. During the residencies, students will evaluate a simulated crime scene in order to make a pitch to a prosecutor as to whether or not an indictment should be pursued and serve as an expert witness in moot court. Content incorporates auditing, information technology, financial, and managerial accounting, etc. particularly as these topics interface with forensic and fraud examination material.
Admission to Program

Admission to the MS-FFE or FAFE Certificate programs is determined by a committee including accounting faculty members. The committee acts upon individual applications within a short period of time after receipt of the completed application.

Academic Requirements

The Admission Committee seeks applicants with a bachelor's degree who possess a minimum overall GPA of 2.9 and a 500 on the Graduate Management Admission Test (GMAT). Exemption from the GMAT requirement is available for applicants with a current Certified Public Accountant (CPA) certificate, a related Certification by an approved credentialing body, a law degree, or two years of relevant accounting or forensic work experience.

Prerequisite Courses

- ACCT 201 Principles of Accounting
- ACCT 311 Intermediate Accounting
- ACCT 322 Accounting Systems
- ACCT 451 Auditing Theory

The prerequisites may be taken at any accredited institution of higher education including online courses. Two years of related professional experience may be substituted for the prerequisite courses. The program admissions committee will assess prior experience.

International Students

International students who are required to take the TOEFL (Test of English as a Foreign Language) examination should note that the Department of Accounting requires a minimum of 250 (computer scoring) or 600 (paper scoring).

Application

Apply to the MS in FFE program or the FAFE Graduate Certificate program using the West Virginia University Application for Graduate Admission. This can be accomplished online.

- Official transcripts from all prior academic work must be forwarded to the WVU Office of Admissions and Records
- Applicants round out their profile with other evidence provided in their résumé. The resume should include enough information for the admissions committee to trace the applicant’s entire professional work history and should indicate any relevant affiliations.

Additionally, applicants have the option of submitting:

- Letters of recommendation (up to three): We recommend that references provide some information that is not found in the other materials being submitted. Anecdotal comments from the reference writer’s shared experience is encouraged.
- Statement of Purpose, a short essay in which an applicant reflects on the expected contribution of the MS in FFE degree (or FAFE Certificate) to the applicant’s future and the special characteristics that the applicant brings to the program. We are interested in value-added experiences, both from the program to the student and from the individual student to the program.

Major Learning Goals

FORENSIC AND FRAUD EXAMINATION

After completing the program, graduates will be able to:

- Discuss the impact of legal, societal, and ethical considerations on business decision-making and strategic planning in forensic and fraud examination, and how civil litigation and fraud interact with and impact the global economy.
- Explain how money laundering schemes and policies influence organizations around the world from a microeconomic perspective, and how these issues affect economic profitability and success.
- Evaluate financial reports focusing on fraudulent financial statements and the associated nuances regarding fraud examination.
- Evaluate evidentiary material associated with asset misappropriation (i.e., theft of assets) and complete fraud examinations that meet judicial standards of investigation.
- Complete examination of facts and circumstances associated with fraud acts and other financial violations of the law with the goal of remediating those issues based on investigative outcomes.
- Discuss and apply the various investigative tools in forensic and fraud examination across different industries.
- Develop an analytical skill set including the utilization of electronic techniques and data mining software used to assist forensic professionals and fraud examiners in developing litigation.
- Develop anti-fraud knowledge, skills, and abilities that address the issues of prevention, deterrence, and detections of financial shenanigans.

Graduate Certificate in Forensic Accounting and Fraud Examination (FAFE)

CERTIFICATE CODE - CG31

The widespread growth in white-collar crime, litigation disputes, the illegal international movement of money and terrorism financing have greatly raised the demand for forensic accountants, fraud examiners and for accounting professionals who possess those skills. Federal, state, and local governmental agencies, such as the Securities and Exchange Commission, Public Company Accounting Oversight Board, The US Bureau of Alcohol Tobacco, Firearms and Explosives, the Federal Bureau of Investigation, the Internal Revenue Service, Homeland Security, and the Offices of Inspector General all need professionals with forensic accounting and fraud examination skills. In the private sector, legislation (e.g., Dodd-Frank of 2010, Sarbanes-Oxley Act of 2002) and auditing standards (Statement on Auditing Standard No. 99) require companies and their auditors to be more aggressive in detecting, preventing and deterring fraud.

CFE Exam Prep Course: Included in your tuition is the ACFE (http://www.acfe.com) Exam Prep Course, making you eligible and qualified to sit for the CFE Exam.

Further, our experiential learning assignments are designed to ensure that graduates can “hit the ground running” in their jobs using their knowledge, skills and abilities developed in the FAFE program.

A unique program creating employment opportunities for graduates.
The WVU Department of Accounting has responded to the demand for forensic accountants and fraud examiners by developing an academic program designed to prepare students for careers in litigation support, forensic accounting and fraud examination. Although many schools offer a single fraud examination or forensic accounting course, very few offer a multi-course program. The 12-credit graduate Certificate Program in Forensic Accounting and Fraud Examination (FAFE) is offered via three options:

- **Option 1**: Complete the four course Graduate Certificate program curriculum on-line over two semesters. The on-line option requires two, 2-day on-campus residencies (described below)
- **Option 2**: Complete the four course Graduate Certificate program curriculum during the summer
- **Option 3**: Complete the Master of Professional Accountancy (MPA) on-campus degree plus complete two advanced FAFE certificate courses to earn the both FAFE Graduate Certificate and the MPA over 11 months. To explore the MPA program, please click here: http://www.be.wvu.edu/mpa/index.htm. All MPA students are exposed to essentially all of the material covered in ACCT 581 and ACCT 582. Various fraud-related topics are covered in several MPA courses, but the primary overlap with ACCT 581 and ACCT 582 is in ACCT 556 Fraud Detection & Deterrence and ACCT 521 Information Technology Auditing, respectively. ACCT 556 is a required MPA course that responses to changing demands of the accounting profession. ACCT 521 covers data analysis techniques.

FAFE students are eligible to participate in all College of B&E’s Center for Career Development (CCD) services. Even for on-campus interviews, online students not residing in Morgantown, WV can participate via phone call / internet-based interviews. WVU typically has more than 25 employers visit campus each year seeking qualified accounting students, several of which also recruit students with FAFE credentials. Please see http://www.be.wvu.edu/careers/index.htm.

### ADMISSION REQUIREMENTS

1. A bachelor’s degree with two years of relevant work experience, Certified Public Accountant (CPA) certificate, a related Certification by an approved credentialing body, law degree or admission to an accredited law school OR a
2. A bachelor’s degree with an overall GPA of 2.9 or above, and a score of 500 on the Graduate Management Admission Test (GMAT) (http://www.mba.com/us/the-gmat-exam.aspx) or a score of 1000 on the Graduate Record Examination (GRE).
3. The following courses, or equivalent in terms of professional experience, are prerequisites for admission to the Certificate Program:

The prerequisites may be taken at any accredited institution of higher education including online courses. Two years of related professional experience may be substituted for the prerequisite courses. An Admissions Committee for the Department of Accounting will assess prior experience.

Not all applicants may be admitted to the program. Because the program consists of intense hands-on cases and specialized assignments, enrollment in the program is limited. An Admissions Committee of three accounting faculty members will review applications and will accept individuals demonstrating the greatest potential for success.

Applicants whose first language is not English must provide proof of English language proficiency. The Test of English as a Foreign Language (TOEFL) (http://www.ets.org/portal/site/ets/menuitem.fab2360b1645a1de9b3a0779f1751509/?vgnextoid=69c0197a484f4010VgnVCM100000229f5190RCRD&WT.ac=Redirect_ets.org_toefl) is used as the measure of English language proficiency. A score of 250 on the computer-based TOEFL or 600 on the paper-based TOEFL is the minimum required of all such applicants. Applicants who have received a high school diploma or a bachelor’s degree in the United States need not submit a TOEFL score.

### FAFE PROGRAM DETAILS

Students will complete four courses. All four courses are taught using actual and simulated case materials, a hands-on approach to prepare students for their careers in litigation support, forensic accounting and fraud examination. To mimic real-world expectations, students are required to perform two actual case engagements and report their findings both in writing and orally – see pitch-to-prosecutor and moot court exercise description below.

The four courses are:

</table>

Total Hours: 12
The program includes two in-class / on-line case investigations and two investigative engagements that students must complete in a team format. Both require students to present and defend their work in front of practicing professionals as follows:

“Pitch to Prosecutor” Exercise in Accounting 581 - Students will complete one major case investigation (MCI) over the course of study in Act 581. The purpose is to provide students with experience in performing basic investigative tasks and analysis. These projects involve analyzing simulated case information based on actual frauds / financial crimes as well as related corporate and business records to determine if fraud has occurred, who did and how. Students mimic investigative processes used in conducting analytical reviews, soliciting information from clients, and reporting suspicious activity for a fictitious client / target company.

The exercise culminates in a (“Pitch to Prosecutor”) exercise where students “pitch” the results of their investigations to a “prosecutor” to see if the case merits taking it to the next level. The “prosecutor” is a role played by a qualified professional with experience in the area. The job of the prosecutor is to listen to the presentation, ask appropriate questions and then critique the team on the areas where they excelled, met expectations, or were deficient. Students have 20-25 minutes for their presentation and the prosecutor has 5-10 minutes for Questions and Answers. The critique by the prosecutor has a major impact on the student’s grade for this portion of the case investigation.

Prosecutors are expected to come to the pitch “blind,” meaning that they are responding to a request for a meeting by an investigative team. The prosecutor has no advance preparation. The prosecutor simply attends the pitch meeting, listens, asks questions, and evaluates whether the case should be moved forward and formal action taken against the alleged perpetrator(s). Students must utilize a variety of communication tools during the exercise including direct and indirect financial analyses, Excel spreadsheet financial analyses that highlight important case points, PowerPoint, link charts, flow diagrams and time lines, and the hypothesis-evidence matrix.

“Moot Court” Exercise (Capstone Experience) in Accounting 584 Supported by attorneys from the IRS and Steptoe & Johnson, PLLC

This course includes an integrative capstone experience using simulated actual case material as a basis for conducting an investigation throughout the course. In order to complete the assignments, students must integrate and draw upon the knowledge and skills developed in the other three courses, including the use of digital tools and techniques, developed in Fraud Data Analysis.

The purpose of this integrated exercise is to provide students with experience in performing complex investigative tasks and analyses. (These cases are complex financial crimes / frauds that include money laundering, RICO, mail fraud, wire fraud, tax fraud and conspiracy. The cases are usually centered on organized crime, drug trafficking or terrorism financing.) These projects involve analyzing real-world case information (public data and open source research techniques) as well as corporate and business records to determine if fraud or a financial crime has occurred. Students mimic investigative processes found in practice by conducting analytical reviews, soliciting information from clients, and reporting suspicious activity for a fictitious client company. Finally, the capstone experience culminates when students testify to their findings in a moot court scenario using direct and in-direct financial analyses, other Excel spreadsheet financial analyses that highlight important case points, PowerPoint, link charts, flow diagrams and time lines and the hypothesis-evidence matrix. The role of “judge” in the moot court exercise is played by practicing attorneys with related professional experience.

Other experiential learning activities:

Crime Scene Investigation – Financial (CSI-F). As part of the advanced courses, student visit the West Virginia University Crime Scene Complex where they are offered instruction and then collect evidence that incorporated in the major case investigation, both the oral and written activities. Click here to see video.

Advanced Data Mining. Part of Accounting 582 is centered on “big data,” students’ developing data mining skills, using data mining such as IDEA or ACL. As part of the advanced courses, student visit the West Virginia University computer lab where they are offered supplemental instruction in advance data mining tools and techniques. The data mining analytical findings are then incorporated in the major case investigation, both the oral and written activities.

Academic Standards

Students in the Master of Science Master in Forensic and Fraud Examination program are subject to the following performance standards:

1. Students are required to maintain a 3.0 or better overall GPA for all courses completed as a Masters student at WVU.
2. A student whose cumulative grade point average falls below 2.75 will be placed on probation. If the average is not brought up to 2.75 by the end of the following semester, the student will be suspended from the program. The suspension will last one year and the student will be eligible to reengage in courses after that time period.

Industrial Relations

Degree Offered

• Master of Science in Industrial Relations

The Department of Management offers the Master of Science in Industrial Relations (M.S.I.R.). The AACSB-accredited program of study prepares students for professional positions in human resources (employee relations) and labor relations. The curriculum is aligned with the standards set forth by the Society of Human Resource Management.
Entry-level professional opportunities for M.S.I.R. graduates include such positions as human resource business partner, human resource manager, labor relations specialist, training coordinator, talent acquisition specialist, compensation analyst, and benefits administrator. Other positions include opportunities in government such as National Labor Relations Board Field Examiner, entry-level positions with the Federal Mediation and Conciliation Service, state and local Human Rights Commission representatives, and Department of Labor compliance officers. Many graduates are employed by Fortune 500 companies. Some find positions with organized labor, all levels of government, and advocacy organizations. The department, in conjunction with the College of Business and Economics Center for Career Development, makes a concerted effort to place graduates in positions that fulfill student job objectives.

**Industrial Relations Student Association (IRSA) and Society for Human Resource Management (SHRM)**

Students are encouraged to participate in academic-related extracurricular activities. Many are co-sponsored by the Industrial Relations Student Association including: the IRSA Newsletter, the mentorship program, company site visits, guest speakers, community service efforts, social events, and honors banquets. Outstanding academic achievement is recognized by membership in the Industrial Relations Honor Society. The faculty makes Outstanding IR Student awards annually to persons selected on the basis of scholarship, informal leadership, and extracurricular activities. A student SHRM chapter is operational within the College of Business and Economics and is an additional student-centered organization that emphasizes the career specialties of the M.S.I.R. degree.

**Academic Common Market**

The WVU M.S.I.R. program is a member of the Southern Regional Education Board's Academic Common Market program. Residents of Delaware, Florida, Georgia, Kentucky, Louisiana, Maryland, and Virginia who are admitted to the M.S.I.R. program can currently pay tuition at West Virginia University's in-state (resident) rates. See http://www.sreb.org for more information.

**FACULTY**

**CHAIR, DEPARTMENT OF MANAGEMENT**

- Abhishek Srivastava - Ph.D. (University of Maryland, College Park)
  Leadership, Team effectiveness, and Knowledge sharing

**ASSOCIATE PROFESSOR**

- Jeffery D. Houghton - Ph.D. (Virginia Polytechnic Institute & State University)
  International HRM, Organizational Behavior, Self Leadership, Team Processes

**TEACHING ASSOCIATE PROFESSOR**

- Suzanne Gosden Kitchen - Ed.D. (West Virginia University)
  Human Capital Management, EEO, Training and Development

**TEACHING ASSISTANT PROFESSOR**

- Thomas Zeni - Ph.D. (University of Oklahoma, Norman)
  Training and Development, Organizational Change

**EXECUTIVE IN RESIDENCE**

  Benefits, HR Strategy
- Jon Reed - J.D.
  Employment Law
- Kellyn Smith - M.S.I.R.
  Talent Acquisition
- Mark Sullivan - M.S.I.R.
  Labor Relations
Admission

The M.S.I.R. degree is interdisciplinary in nature and no specific undergraduate major is required. Coursework in computer science, labor economics, statistics, and business disciplines is helpful. To gain admission into the M.S.I.R. program, an applicant must have a bachelor’s degree from an accredited institution. Overall grade point average is considered with additional attention given to the grade point average achieved in the last sixty hours of coursework. Either the Graduate Record Examination (GRE) or the Graduate Management Admissions Test (GMAT) is required. No action is taken on an application for admission until a GRE or GMAT score is submitted. International students must also submit a satisfactory TOEFL score.

Applicants must also send additional supportive material: a personal statement of purpose addressing their desire and reasons for applying, a minimum of two reference letters, and a professional resume of their educational and occupational experiences.

Application Deadlines

The MSIR program accepts applications for fall (August) admission only. The application deadline is March 15. Later applications, while acceptable, may diminish the chances for admission due to the graduate class being filled. Because no admission decision can be made without the applicant’s GRE/GMAT score being submitted, applicants should keep in mind the GRE/GMAT test schedule. Students applying to the M.S.I.R. program should attempt to complete the GRE/GMAT by no later than March 1.

Industrial Relations Master of Science Degree Program Requirements

A minimum GPA of 3.0 is required in all courses.

A grade of C or higher must be earned in all required courses

* GPA

The M.S.I.R. program requires that the student maintain a grade point average of at least 3.0 on all work taken as a graduate student while enrolled in the College of Business and Economics. In addition, the student must maintain a 3.0 average in all work counting toward the graduate degree. A student whose cumulative grade point average falls below 2.75 will be placed on probation. If the student’s average is not brought up to 2.75 by the end of the following semester, the student will be suspended from the program. A grade below C in more than one course taken while enrolled as a graduate student will result in suspension from the program.

SUGGESTED PLAN OF STUDY

### 1 Year Master of Science in Industrial Relations Dual Degree Option

Some graduates with a J.D., M.B.A., or other business-related master's degree from a US institution may apply to complete the M.S.I.R. degree program in one year. Not all applicants will be approved for the one-year option, but each application will be evaluated individually by the Admissions Committee. Combining study for the M.S.I.R. and the M.B.A. degrees is another option available to qualified candidates. Students need to apply separately for admission to each program. A plan of study will be created for any student admitted in the dual degree option.

### Major Learning Goals

#### INDUSTRIAL RELATIONS

#### Student Learning Goals

**GOAL 1: The HR Functional Environment**

Graduates acquire knowledge and skills in basic HR functional areas that prepare them for their future careers in human resources management and industrial relations and related fields

1.1 **Selection, Performance Management, and Training and Development.** Graduates are able to participate and lead in the selection processes in their organizations as well as in the measurement of performance of the human asset and the identification of training and development activities either to enhance performance or correct deficiencies in the output of human assets.

1.2 **Compensation and Benefits.** Graduates are able to establish and maintain equitable compensation programs and associated benefits and insurance in their organizations. Graduates are familiar with and able to impact organizational economics through the development, modification, and implementation of compensation systems and benefit plan design and administration.

**GOAL 2: The Current Global Environment**

Graduates have capabilities and knowledge relating to current HR/IR trends, both domestically and internationally, that prepare them for their future careers in human resources management and related fields.
2.1 International HR/IR and Understanding Cultural Differences. Graduates are able to apply human resource and industrial relations functional tools in an international context based on a detailed comprehension of the economic, social and moral ramifications of globalization and cultural differences.

2.2 Management of Change, Current Trends, and Technologies. Graduates are able to participate in managing change processes within their organizations and to apply knowledge of current events, trends and developments in the human resources profession and in the overall business environment, including contemporary information systems and associated technologies, in order to solve problems and perform functions commonly encountered in human resource management.

GOAL 3: The Employee and Labor Relations Environment

Graduates acquire knowledge and skills in employee and labor relations that prepare them for their careers in human resources management and industrial relations and related fields.

3.1 Management of Conflict. Graduates are able to use foundational knowledge of individual behavior and interpersonal relations in order to successfully manage and resolve conflict through processes such as mediation and facilitation.

3.2 Negotiation. Graduates are able to demonstrate effective negotiating capacities and competencies in win-win and position bargaining in general and specifically in labor relations. Students are effective advocates in labor relations, mediation, alternate dispute resolution, employee/management concerns and disputes.

GOAL 4: The Legal and Ethical Environment

Graduates develop comprehensive knowledge and skill in the areas of employment law and ethical decision making.

4.1 Legal and Ethical Decision Making. Graduates are able to successfully implement the procedural and substantive aspects of labor and employment law in making ethical decisions and taking ethical actions that reflect a standard of professional behavior and values within their organizations. Employment law principles are embedded in each of the major course offerings to insure a solid fact-based application of legal practices, precedents, and contemporary interpretations.

GOAL 5: The Strategic Environment

Graduates develop knowledge and skills in strategic decision making, leadership, teamwork and communications

5.1 Strategic Decision Making. Graduates are able to participate in and support strategic decision-making in human resources, industrial relations and beyond. Students are knowledgeable in the use and application of strategic planning tools and techniques and are aware of the economic and social impact of strategic business decisions.

5.2 Leadership, Teamwork and Communication. Graduates possess leadership and teamwork skills and abilities and are able to effectively communicate recommendations to management and other constituencies, orally and in writing.
Creative Arts

Degrees Offered

- Master of Arts in Art & Design
- Master of Fine Arts in Art & Design or Theatre
- Master of Arts in Music Industry
- Master of Arts in Musicology
- Master of Music
- Doctor of Musical Arts
- Doctor of Philosophy in Music

Introduction

Creative development in art, music, theatre, and dance is central to the College of Creative Arts. Made up of three professionally accredited and nationally recognized Schools of Art & Design, Music, and Theatre & Dance, the College provides graduate students with a place where they can forge a personal understanding between artistic practice and theory, and form both personal and professional insights that explore and expand the nature of human creativity. Combining performance, exhibition, and scholarship in ways that address both traditional and innovative approaches to art, music, theatre, and dance, graduate students gain a greater understanding of the arts and—in turn—theirselfs.

A distinguished faculty of scholars and artists bring to the college’s outstanding facilities a commitment to a creative process of artistic growth and advanced education. In a rich environment of plays, exhibitions, and concerts, the college offers graduate students the knowledge, skills, and inspiration necessary for artistic and professional success.

Graduate programs in art, music, and theatre are characterized by quality of faculty, students, and curricular opportunity. Each school is an accredited member of the nationally recognized accrediting agency for professional instruction in the discipline: art programs by the National Association of Schools of Art and Design, music programs by the National Association of Schools of Music, and theatre programs by the National Association of Schools of Theatre.

VISION STATEMENT

We envision broadening our role as a leader of innovation and engagement in the arts.

MISSION STATEMENT

The College of Creative Arts educates succeeding generations of artists, teachers, and scholars through an experimental student-centered approach to learning. The college advocates the arts as a medium through which the diversity of human experience is understood and valued. Exemplifying excellence and innovation in performance, exhibition, scholarship, and creative research, the college offers artistic and cultural opportunities for the citizens of West Virginia and the global community.

FACILITIES

The Creative Arts Center, which houses the college, is a modern, multimillion-dollar instructional and performance facility with four theatres, recital halls, and recording studio; scenery, painting, drawing, design, costume, printmaking, sculpture, ceramic, puppet, and instrumental studios; additional art studios and two art galleries.

PROGRAMS OF STUDY

The doctor of musical arts (D.M.A.) curricula in performance (piano, collaborative piano, voice, percussion, flute, oboe, clarinet, bassoon, saxophone, horn, trumpet, trombone, tuba, violin, viola, cello, double bass, or conducting) or composition and the Ph.D. curriculum in music education prepares students for careers as teachers in higher education.

The master of fine arts (M.F.A.) is a terminal degree in art and theatre that prepares students for careers in ceramics, graphic design, intermedia/photography, painting, printmaking, sculpture, acting, theatre technical direction, or theatre design and technology (costume, scenery, and lighting).

The master of music (M.M) degree enhances undergraduate training in performance, music education, theory, composition, collaborative piano, piano pedagogy, jazz pedagogy, and conducting.

The master of arts (M.A.) has concentrations in art education, art history, music industry, musicology, and studio art.

For More Information

Additional information on programs of study and areas of emphasis within each degree can be found in the individual school’s description in this catalog and/or on the school’s website listed below. Students may also contact the individual Graduate Coordinators for each School’s graduate program.

ADMINISTRATION
INTERIM DEAN
• Keith Jackson - D.M.A. (Arizona State University)

ASSOCIATE DEAN
• John Hendricks III - M.M. (West Virginia University)

Degree Designation Learning Goals
The language stated in the learning goals for the College of Creative Arts graduate programs is based on (directly quoted, paraphrased or modified) current standards written and employed by the Council of Arts Accrediting Associations (National Association of Schools of Art and Design, National Association of Schools of Dance, National Association of Schools of Music and National Association of Schools of Theatre).

The appropriate association of the Council has awarded accreditation to all of West Virginia University’s graduate degree programs within the College of Creative Arts.

As stated by the Council of Arts Accrediting Association:
National accreditation requirements outline threshold standards for institutional and individual achievement. These thresholds indicate essentials; they are rigorous. Attaining them represents a significant accomplishment. Therefore, these standards are both a foundation and a framework for specific achievements and evaluations of their quality.

The general learning goals listed below are for graduate degrees offered by the College. Specific learning goals for individual programs are listed under each School’s section of the catalog. Due to the nature of the College’s specialized degrees, none of these goals listed are intended to be comprehensive.

MASTER OF ARTS
The following are general learning goals for students pursuing a Master of Arts:
• Develop advanced capacities to work independently and make effective artistic and intellectual judgments and professional decisions in the area of specialization.
• Demonstrate professional competence in the area of specialization before peers and faculty.
• Gain knowledge and skills in one or more areas outside the major.
MASTER OF MUSIC

The Master of Music (MM) degree focuses on the development of professional competence in a music specialization or in a music-related field. The MM may be taken in performance (including conducting), music education, composition, collaborative piano, piano pedagogy, jazz pedagogy, or music theory.

- Develop advanced capacities to work independently and make effective artistic and intellectual judgments and professional decisions in the area of specialization.
- Demonstrate professional competence in the area of specialization before peers and faculty.
- Gain knowledge of repertory and historical performance practices.
- Gain knowledge and skills in one or more fields of music outside the major such as theory, history, musicology, ethnomusicology and performance.

MASTER OF FINE ARTS

The Master of Fine Arts (MFA) degree is for advanced graduate-level programs that focus on the practice of some aspect of the Visual and Performing Arts.

- Awareness of current issues and developments that influence the principal field of study, and professional ability and clear potential to contribute to the practice and advancement of the field.
- Writing and speaking skills to communicate clearly and effectively to the public and in formal or informal teaching situations.
- Understanding of appropriate related disciplines, the ability to think independently, and to integrate and synthesize information associated with high levels of practice in an area of specialization.
- Develop advanced competencies to work independently and make effective artistic and intellectual judgments and professional decisions in the area of specialization.
- Demonstrate professional competence in the area of specialization before peers and faculty.
- Demonstrate a breadth of understanding of the related disciplines, the ability to think independently and to integrate and synthesize information associated with high levels of practice in an area of specialization.
- Understanding of professional ethics and practice associated with the major field.

DOCTOR OF MUSICAL ARTS AND THE DOCTOR OF PHILOSOPHY

The Doctor of Philosophy (Ph.D.) in music education prepares students for careers as teachers in higher education. The Doctor of Musical Arts (DMA) degree is intended for those planning to work at the most advanced academic and professional levels of musical endeavor. The DMA degree may be taken in performance (including conducting), collaborative piano, or composition.

- Intellectual awareness and curiosity sufficient to predict continued growth and contribution to the discipline.
- Significant advanced, professional-level accomplishment in performance, composition, scholarship or conducting.
- Knowledge of the techniques of music theory sufficient to perform advanced analysis.
- Knowledge of representative literature and composers of each major period of music history.
- Knowledge of general bibliographical resources in music.
- Considerable depth of knowledge in some aspect of music, such as an historical period, an aspect of theory, performance practice or compositional styles.
- Writing and speaking skills to communicate clearly and effectively to members of the scholarly community and the wider community, and especially in teaching situations.

Admission Requirements

The College of Creative Arts uses the admission standards and procedures of the university for the admission of graduate students. Each school within the college also has individual admission requirements.

Potential graduate students should refer to the specific admission criteria of each school found in their program descriptions in this catalog and on the school’s website.

Because of the creative nature of the arts, some students may be admitted under the individual consideration clause of the university’s general admission policy. This category allows admission of exceptionally talented students in art, music, and theatre who might not meet the criteria for grade point averages and standardized test scores to be admitted to one of the College’s programs of study.

Tuition

In addition to University tuition and fees, College of Creative Art students will also be charged College tuition. Music students (undergraduate and most graduate) and musical theatre undergraduate students will also be charged an Applied Lesson tuition. Music minor students who must take applied lessons for their programs will also be assessed the Applied Lesson tuition.
Assistantships, Tuition Waivers and Financial Awards

To assist in funding the cost of graduate education, West Virginia University and the College of Creative Arts offer a number of financial assistance packages for qualified applicants. These include graduate assistantships, graduate tuition waivers, and cash awards.

Assistantships are offered in each school; however, the number of assistantships is limited and their award is competitive based on their availability as well as the quality of the applicants and their potential for significant contribution to the school and college. Assistantships pay stipends, health insurance, and a university tuition waiver. In return, graduate assistants provide approximately twenty hours of work per week during the nine month academic year with duties that range from instructional to service positions within each school.

For more information on assistantships, graduate tuition waivers, cash awards, application process, and important deadlines, please refer to each school’s individual website.

Additional information on funding for graduate study at West Virginia University can be found at http://grad.wvu.edu/

School of Art and Design

Degrees Offered

• Master of Arts
• Master of Fine Arts

The graduate programs in the School of Art and Design lead to a master of arts (M.A.) with emphasis in art history, art education, or studio art (two years and a minimum of thirty credit hours; thirty-six is recommended) or to a master of fine arts (M.F.A.) with emphasis in studio art (three years and seventy-two credit hours). These programs are highly selective and closely integrated. All applicants are expected to have academic competence, artistic maturity, and the motivation to achieve excellence in their areas of concentration.

The master of fine arts is a professionally-oriented terminal degree in the studio arts, with concentration in ceramics, graphic design, intermedia/photography, painting, printmaking, or sculpture. Applicants typically hold a baccalaureate degree in art or its equivalent for admission. Recommended preparation includes twelve hours of art history, seventy hours of studio art or equivalent experience, and thirty-six hours of general education.

Accreditation

The School of Art and Design is an accredited institutional member of the National Association of Schools of Art and Design (NASAD), the only nationally recognized accrediting agency for professional art instruction. Applicants for graduate studies must comply with the standards for admission set by West Virginia University, the College of Creative Arts, and the School of Art and Design.

Reviews

All students enter the graduate programs in art as preliminary candidates. Students in the M.F.A. program are reviewed for advancement to degree candidacy at the end of their third semester of study or upon the completion of a minimum of thirty credit hours. Candidacy status is obtained upon review by the full faculty of the school and must be approved by the student’s graduate committee. Students in the M.A. program are reviewed for advancement to degree candidacy at the end of their first semester of study or upon the completion of a minimum of twelve credit hours.

The School of Art and Design has high expectations for its graduate students. Because of this, certain standards of achievement exceed the minimum standards set by the university for all graduate students. The School of Art and Design reserves the right to impose stricter limitations on all art graduate students. Credit hours in courses with an earned grade of C do not automatically count toward graduate degree requirements. The graduate committee and the school director have the right to declare such credit hours unacceptable.

Program Transfer

A preliminary candidate in a graduate art program is not guaranteed acceptance into another graduate art program. A change from the M.F.A. program to the M.A. program (or the reverse) must be approved by the graduate faculty of the School of Art and Design. Under normal conditions, such a change is not considered until the student has established credibility by successfully completing a minimum of twelve approved credit hours of study at WVU. Transfer to a program outside the School of Art and Design must be approved by the receiving unit. To make an application for a double degree program or a special interdepartmental program at the graduate level, students must have prior written approval of the School of Art and Design Director.

Thesis

All candidates for a graduate degree in art must prepare a written thesis (or graduate project) related to their work and activity as a graduate student. The chair of the student’s graduate committee supervises the preparation of the thesis. The thesis must be prepared according to the form prescribed in the WVU regulations governing the preparation and electronic submission of dissertations and theses as well as school guidelines, unless an exception is authorized in advance by the student’s graduate committee and the school director. A final draft of the thesis must be submitted to committee members at least one month prior to the electronic filing date for review and approval.
Residence Requirements

M.F.A. students take nine to fifteen hours per semester. All students accepted into the M.F.A. program are required to spend six full-time semesters (excluding summer sessions) in residence. Approved study abroad semesters count toward the residency requirement.

FACULTY

DIRECTOR

• Alison Helm - M.F.A. (Syracuse University)
  Sculpture

ASSOCIATE DIRECTOR, UNDERGRADUATE ADVISOR

• Kristina Olson - M.A. (Stony Brook University)
  Art History-Modern and contemporary, Art criticism

GRADUATE ADVISOR

• Joseph Lupo - M.F.A. (University of Georgia)

- Ronald Hollingshead - M.F.A. (West Virginia University)

Sculpture
- Katherine Inge - Ph.D. student (University of Arizona)

Art History
- Patrick Jones - M.F.A. and M.A. (West Virginia University)
- Lourdes Karas - B.A. (Allegheny College)

Art Education
- Linda Rosefsky - M.A. (West Virginia University)
- J. Bernard Schultz - Ph.D. (University of Pittsburgh)

PROFESSORS EMERITI
- Clifford Harvey - M.F.A.
- Margaret Rajam - B.A.

ASSOCIATE PROFESSORS EMERITI
- Victoria Fergus - Ph.D.

Admission to Masters Program

Applicants for the M.A. in art history must submit a copy of a written research project, three letters of recommendation, a statement of purpose, and GRE scores.

Applicants for the M.A. (studio and art education) or the M.F.A. must present a portfolio for admission to the School of Art and Design. This portfolio must contain twenty JPG images with a minimum of 800 x 600 pixels or equivalent video documentation. Applicants should take care to select images of recent and representative work for inclusion in the portfolio. Each image should be documented with name, date of completion, size of work, and type of medium. Applicants must also submit a statement of purpose and three letters of recommendation from college faculty or persons knowledgeable about the applicant’s interests and abilities.

In addition to the application materials listed, transfer students must transfer graduate work completed elsewhere. Transcripts must accompany the written request. The acceptance of transfer credit is not automatic. The graduate faculty, the graduate advisor, and the School Director will determine how much, if any, previous graduate-level work may be transferred. The maximum allowable number of graduate transfer credits toward the degree is nine. All transfer credits must be in place by the end of the first semester.

Details about additional application requirements and the link to the online application form can be located at: http://artanddesign.wvu.edu/future-students. Materials should be submitted to: Graduate Advisor, School of Art and Design, College of Creative Arts, West Virginia University, P.O. Box 6111, Morgantown, WV 26506-6111.
In addition to the School of Art and Design’s graduate application and portfolio requirements, prospective students are required to fill out a separate West Virginia University student application form, which is to be submitted electronically to the Office of Admissions at http://grad.wvu.edu/ along with an application fee and official transcripts.

Financial Aid
Financial aid information is available through the Student Financial Aid Office, West Virginia University, P.O. Box 6004, Morgantown WV 26506-6004.

Graduate Assistantships
Graduate assistantships and other forms of financial aid are awarded to students of exceptional promise by the faculty of the School of Art and Design.

Art Education

Master of Arts in Art Education
Specialization in art education requires the completion of a minimum of thirty hours with a recommended total of thirty-six. The exact course of study is determined through consultation with the student’s advisor and graduate committee.

M.A. art education students are required to produce a written thesis or, at the graduate committee’s discretion, may complete a research project.

Graduate Certificate in Visual Arts Therapy

CERTIFICATE CODE - CG35
The Graduate Certificate in Visual Arts Therapy program will help to provide additional training for art teachers that the Bachelor of Fine Arts and/or Masters of Arts in Art Education currently do not offer. As such, this field offers new professional opportunities to art educators who are trained, knowledgeable, and versed in its systems, methods, and practices for using Visual Arts Therapy within their teaching practice in the PreK-21 classroom.

To be considered for admission, the applicant must have a bachelors’ degree in studio art or art education from a program accredited by NASAD with a minimum cumulative GPA of 3.0 or better. Students in the post bachelors’ certificate program must maintain a 3.0 GPA to progress. Additionally, any student currently enrolled in a Graduate school at WVU may also take courses.

For those interested in a visual arts therapy graduate certificate, students should apply to the Graduate School and the School of Art and Design Graduate School.

Note: Admission criteria are subject to change. Please see the School of Art and Design website for the most up-to-date criteria on how to apply.

The required courses for a graduate certificate in Visual Arts Therapy are as follows:

A minimum GPA of 3.0 is required.

Total Hours 18

Major Learning Goals

ART EDUCATION
The following are general learning goals for students pursuing a Master of Arts:
• Develop advanced capacities to work independently and make effective artistic and intellectual judgments and professional decisions in the area of specialization.
• Demonstrate professional competence in the area of specialization before peers and faculty.
• Gain knowledge and skills in one or more areas outside the major.

Art History

Master of Arts in Art History

The Master of Arts in art history program offers a two-year degree that provides a solid foundation in historical and theoretical study of the history of Western Art, from Medieval to Contemporary. The program emphasizes independent exploration and interdisciplinary research.

Art history studies the traditions and techniques of the visual arts. It is an interdisciplinary field, drawing upon philosophy, history, literature, religion, and mythology to examine works of art and their contexts. The history of art provides means to penetrate cultural constructions and their aesthetic and artistic productions. To assist the student in developing skills needed to analyze and understand the object, the course of study includes requirements in academic coursework and research.

The collection of the Art Museum of West Virginia University provides both first-hand experience with works of significant aesthetic and cultural value and introduces students to curatorial and museum practice. The Laura and Paul Mesaros Galleries in the Creative Arts Center and the Visiting Artist and Scholar program form a crucial link in the course of study, presenting installation and curatorial opportunities. Through the School of Art and Design's association with regional institutions, museum and gallery internships are encouraged.

DEGREE REQUIREMENTS

Students must matriculate having attained reading proficiency in a language other than English through course credit or to be demonstrated by passing a proficiency exam. If incoming students have not yet acquired reading proficiency in a second language, they should plan to obtain it before completing the M.A. degree.

Completion of the program culminates in the master's thesis, which may take a variety of forms within the context of art's historical and critical practices. The student will select a thesis topic that must be approved by the art history faculty. The thesis consists of a research paper demonstrating critical knowledge of relevant sources, skill in analysis and interpretation, and ability to present the results in a well-organized and intelligent manner. The thesis must be defended in an oral examination.

Applicants for admission to the master's program are expected to demonstrate competence in the history of art, equivalent to an undergraduate major, as well as reading competence of at least one language other than English (four-semester equivalent), and must submit GRE examination scores. The B.A. degree in an area of substantial humanistic research plus a foreign language may also be considered appropriate preparation.

Major Learning Goals

ART HISTORY

• Demonstrate a broad general knowledge of the history of art, as well as specialization in a more limited area.
• Knowledge of historiography and methods of scholarship and be capable of undertaking independent research.
• Demonstrate knowledge of at least one foreign language.

Ceramics

Master of Fine Arts

The Master of Fine Arts is a terminal degree in studio art. Our selective and limited enrollment ensures regular individual contact with dedicated, diverse faculty who are committed to a sustained professional exchange with each student. A collaboratively designed curriculum is augmented by regular critiques engaging all studio majors and faculty. Media experimentation is encouraged. Students must be able to apply and communicate a diverse body of knowledge of historical, cultural, contemporary, and aesthetic issues to their professional practice. Students are expected to articulate and defend their position within the context of contemporary art discourse.

PRINTMAKING

The Master of Fine Arts (M.F.A.) degree is for advanced graduate-level programs that focus on the practice of some aspect of the Visual and Performing Arts.

- Awareness of current issues and developments that influence the principal field of study, and professional ability and clear potential to contribute to the practice and advancement of the field.
- Writing and speaking skills to communicate clearly and effectively to the public and in formal or informal teaching situations.
- Understanding of appropriate related disciplines, the ability to think independently, and to integrate and synthesize information associated with high levels of practice in an area of specialization.
- Develop advanced competencies to work independently and make effective artistic and intellectual judgments and professional decisions in the area of specialization.
- Demonstrate professional competence in the area of specialization before peers and faculty.
- Demonstrate a breadth of understanding of the related disciplines, the ability to think independently and to integrate and synthesize information associated with high levels of practice in an area of specialization.
- Understanding of professional ethics and practice associated with the major field.
Sculpture

Master of Fine Arts

The Master of Fine Arts is a terminal degree in studio art. Our selective and limited enrollment ensures regular individual contact with dedicated, diverse faculty who are committed to a sustained professional exchange with each student. A collaboratively designed curriculum is augmented by regular critiques engaging all studio majors and faculty. Media experimentation is encouraged. Students must be able to apply and communicate a diverse body of knowledge of historical, cultural, contemporary, and aesthetic issues to their professional practice. Students are expected to articulate and defend their position within the context of contemporary art discourse.

- Demonstrate a breadth of understanding of the related disciplines, the ability to think independently and to integrate and synthesize information associated with high levels of practice in an area of specialization.
- Understanding of professional ethics and practice associated with the major field.

Studio Art

Master of Arts

The studio art concentration promotes advanced study in ceramics, painting, printmaking, graphic design, intermedia/photography, and sculpture. M.A. studio art students are required to produce a written thesis and, at the graduate committee's discretion, may be required to hold a thesis exhibition.

This course of study requires a baccalaureate degree in art or its equivalent for admission. Preparation should include twelve hours of art history, forty-five hours of studio art related to professional needs, and thirty-six hours of general education.

### Major Learning Goals

#### STUDIO ART

The following are general learning goals for students pursuing a Master of Arts:

- Develop advanced capacities to work independently and make effective artistic and intellectual judgments and professional decisions in the area of specialization.
- Demonstrate professional competence in the area of specialization before peers and faculty.
- Gain knowledge and skills in one or more areas outside the major.

### School of Music

#### Degrees Offered

- Master of Arts
- Master of Music
- Doctor of Musical Arts
- Doctor of Philosophy

The School of Music is an accredited institutional member of the National Association of Schools of Music, the only nationally recognized accrediting agency for professional music instruction. All programs comply with the objectives and guidelines required by this organization.

### FACULTY

#### INTERIM DIRECTOR

- Michael Ibrahim - D.M.A. (Manhattan School of Music)
  Saxophone
DIRECTOR OF GRADUATE STUDIES

- Cynthia Babin Anderson - M.M. (Manhattan School of Music)
  Oboe, Theory

PROFESSORS

- Peter Amstutz - D.M.A. (Johns Hopkins University, Peabody Institute)
  Coordinator of Keyboard Instruments, Piano
- Andrew Kohn - Ph.D. (University of Pittsburgh)
  Coordinator of Theory and Composition, Double Bass, Theory
- Mikylah McTeer - D.M.A. (University of Houston)
  Coordinator of String Instruments, Violin, Chamber Music
- David Taddie - Ph.D. (Harvard University)
  Music Theory, Electronic Music
- Molly Weaver - Ph.D. (University of Michigan)
  Research Faculty
- John F. Weigand - D.M.A. (Florida State University)
  Coordinator of Woodwinds, Clarinet, Chamber Music
- Cecil B. Wilson - Ph.D. (Case Western Reserve University)
  Associate Provost, Musicology, 19-century Music, Orchestration
- John Winkler - D.M.A. (Northwestern University)
  Coordinator of Brass Instruments, Trumpet, Chamber Music

ASSOCIATE PROFESSOR

- Mitchell Arnold - D.M.A. (Northwestern University)
  Director of Orchestral Activities, Conducting
- Nina Assimakopoulos - M.M. (Munchin Academy of Music)
  Flute, Chamber Music
- Lynn Hileman - D.M.A. (University of Rochester, Eastman School of Music)
  Bassoon, Theory
- Hope Koepler - D.M.A. (University of Kentucky)
  Coordinator of Voice Studies, Voice
- Lucy Mauro - D.M.A. (Johns Hopkins University, Peabody Institute)
  Piano Pedagogy, Class Piano, Piano, Chamber Music
- Dena Register - Ph.D. (Florida State University)
  Music Therapy
- Sandra Schwartz - Ph.D. (University of Miami)
  Choral Music Education
- Travis D. Stimeling - Ph.D. (University of North Carolina - Chapel Hill)
  Musicology
- Michael Vercelli - D.M.A. (University of Arizona)
  Director of World Music Performance Center
- George Willis - M.M. (Temple University)
  Coordinator of Percussion Studies

ASSISTANT PROFESSOR

- Robert Chafin - M.M. Cincinnati Conservatory of Music
  Voice
- Erin Ellis - D.M.A. (Eastman School of Music)
  Cello, Chamber Music, String Pedagogy
- Matthew Heap - Ph.D. (University of Pittsburgh)
  Theory, Composition
- Andrea Houde - M.M. (Johns Hopkins University, Peabody Institute)
  Viola, String Pedagogy, Chamber Music
- Ching-Wen Hsiao - D.M.A. (Juilliard School)
  Piano
- Laura Very Knoop - M.M. (Yale University)
  Voice - Visiting
• Evan MacCarthy - Ph.D (Harvard University)
  Music History
• James Kenon Mitchell - M.M. (Westminster Choir College)
  Opera, Vocal Coaching - Visiting
• Angela Munroe - M.M.E. (Northwestern University)
  General Music Education
• Kym Scott - D.M.A. (University of Southern California)
  Director of Choral Activities
• Jared Sims - D.M.A. (Boston University)
  Director of Jazz Studies
• Jonas Thoms - M.M. (University of Cincinnati-College Conservatory of Music)
  Horn, Chamber Music
• Scott C. Tobias - D.M.A. (The University of Georgia)
  Director of Bands
• Darko Velichkovski - M.A. (City University of New York)
  Director of Music Industry
• Lindsey Williams - Ph.D. (Florida State University)
  Music Education - Visiting

FACULTY EQUIVALENT ACADEMIC PROFESSIONAL
• Mark Benincosa - M.S. (West Virginia University)
  Recording Technology
• Sun Jung Lee - D.M.A. (West Virginia University)
  Accompanying, Piano, Chamber Music

LECTURERS
• Clifford Barnes
  Jazz Piano
• Scott Elliott - M.M. (Duquesne University)
  Guitar
• William Koehler - D.M.A. (University of Minnesota)
  Voice
• Rebecca Kreider - M.M. (Indiana University)
  General Education Courses
• Diana B. Love - Ed.D. (Virginia Polytechnic Institute and State University)
  Music Education
• Christine Mazza - M.M. (Cleveland Institute of Music)
  Harp
• Carson McTeer - B.A. (Rice University)
  Tuba, Euphonium, Chamber Music
• Adam Osmianski - M.M. (West Virginia University)
  General Education Courses
• Brian Plitnik - D.M.A. (West Virginia University)
  Trombone, Euphonium, Chamber Music
• Kathleen Shannon - D.M.A. (University of Miami)
  General Education Courses
• Brian Wolfe - B.M. (West Virginia University)
  Drum Set, Percussion, Jazz
• Renee Wyatt - M.M. (West Virginia University)
  Music Education

• Gilbert Trythall
• Don G. Wilcox
• Christopher Wilkinson

ASSOCIATE PROFESSORS EMERITI

• Joyce A. Catalfano
• Rose M. Crain
• John E. Crotty
• June D. Swartwout

Prospective graduate students in music are required to have completed the appropriate curriculum of undergraduate study in music at WVU or its equivalent at another institution of recognized standing. For acceptance into a degree program, the applicant should make inquiry to the Director of Graduate Studies, School of Music, College of Creative Arts, P.O. Box 6111, Morgantown, WV 26506-6111.

Applicants for degree study in composition, music theory, musicology, and performance (including conducting) must take a diagnostic test in music theory; masters students must pass a piano proficiency. In addition, performance majors in voice and conducting take diagnostic tests in pedagogy and literature. Applicants for degree study in music education must take proficiencies in piano and voice. Applicants in music education have the option to take the diagnostic exam in music theory. The results of these tests may indicate the need for remedial study, which must be completed before admission to candidacy.

Admission to Masters Program

Applicants to the program leading to the degree of master of music or master of arts in musicology must present necessary credentials for evaluation of previous training and experience to the School of Music. These include transcripts from all institutions previously attended showing a grade point average of at least 3.0 in all undergraduate study submitted through the WVU Office of Admissions. Applicants for musicology and music theory must also submit scores from the Graduate Record Examination General Aptitude Test. Three letters of recommendation from individuals who are qualified to judge the applicant’s potential success as a graduate student in music may be submitted to the WVU Office of Graduate Admissions or directly to the Director of Graduate Studies in Music.

With the exception of applicants in composition, musicology, and music industry, all applicants are also required to demonstrate, by audition, their level of attainment in a principal performance area. The evaluation of performance proficiency is based on technical ability, repertoire, and musicianship. A listing of representative material for each performance area, graded by proficiency level, is available upon request. A recording may be submitted in cases where travel makes an audition impractical. Each degree option has established standards which must be met for admission. For performance majors, the estimated proficiency level must be confirmed by a jury examination at the end of the first semester of performance study. Credit in performance may be counted toward degree requirements only after the proficiency-level prerequisite has been reached.

Applicants seeking admission as composition majors must submit representative compositions for evaluation and approval. When the application for composition is complete, it will be reviewed by the composition faculty. If this review is favorable, a representative of the composition faculty will contact the applicant to schedule an entrance audition and interview.

Applicants seeking admission as music theory or musicology majors must submit a sample of writing, such as a term paper. A musical subject is recommended but not required. Musicology applicants must have taken the equivalent of four semesters of training in a language other than English; remedial work in languages may be recommended during masters degree study, if necessary.

Applicants seeking admission to the master of arts in music industry must submit transcripts from a bachelor’s degree from an accredited university showing a GPA of 3.0 or higher. GPA exceptions will be made on an individual case-by-case basis, depending upon previous experience and/or years of applicable professional experience. Applicants must submit GRE scores, as well as a CV, and a 500 word essay describing the student’s professional preferences, goals and aspirations. Students must achieve 153 on the verbal and 144 on the quantitative GRE sections. The GRE requirement may be waived if the student’s bachelor’s degree GPA is 3.3 or higher (on 4.0 scale), and/or if his/her professional experience in the industry exceeds 5
years, with strong academic and/or professional recommendations. The master of arts in music industry degree is offered online through online.wvu.edu. Admission to the master of arts in music industry is selective and competitive.

Applicants to music education curricula must submit the following:

1. An essay describing and discussing your training, experiences, present interests, and career aspirations in the field of music education
2. A current résumé
3. A video recording of teaching, preferably a K-12 music class or rehearsal (Please submit a detailed lesson plan for each class or rehearsal presented on your video of teaching. When the application for music education is complete, it will be reviewed by the music education faculty. If this review is favorable, a representative of the music education faculty will contact the applicant to schedule an entrance interview and audition. Note: This is not required of those who are applying for the certification option.)

**PROVISIONAL ADMISSION**

Applicants whose admission profile does not meet the qualifications outlined above may be considered for acceptance as provisional students. If, upon completion of up to twelve semester hours of graduate study, they have achieved a minimum of a B (3.0) average and satisfied any previous undergraduate deficiencies or other conditions, such students may be accepted as degree students.

**Admission to Doctor of Musical Arts Programs**

Acceptance into doctoral programs is competitive. Applicants to the program leading to the D.M.A. must present necessary credentials for evaluation of previous training and experience. These include transcripts showing an average of at least a 3.0 grade point average in a minimum of twenty-eight hours in liberal arts studies submitted through the WVU Office of Admissions. Copies of programs of recent major recitals must be submitted directly to the Director of Graduate Studies in Music. Three letters of recommendation from individuals who are qualified to judge the applicant’s potential success as a graduate student in music may be submitted to the WVU Office of Graduate Admissions or directly to the Director of Graduate Studies in Music. Normally, the admission process also includes an on-campus audition and interview with the faculty of the major performance area. Applicants to the D.M.A. in composition must also submit scores and recordings for review. Applicants to the D.M.A. in vocal pedagogy and performance must submit a letter detailing their previous pedagogic experience which states their purpose in attaining such a degree and a sample of their scholarly writing (the School of Music is not currently accepting applicants to the D.M.A. in vocal pedagogy and performance). Applicants who do not meet all of the criteria for regular admission to the D.M.A. degree program may be considered for provisional admission subject to the satisfactory completion of certain specified courses or the attainment of a specified grade point average within a semester’s work.

Applicants for the D.M.A. in conducting must meet language prerequisites: at least two years of undergraduate study of one language (French, Italian, German, or Spanish) or appropriate undergraduate study in diction (English, French, Italian, German, or Latin). At the discretion of the conducting faculty, a demonstrated ability to read in a language other than English may be accepted as meeting the prerequisite. Students who have not taken the required courses at the undergraduate level may meet the prerequisite by passing a proficiency exam subsequent to admission or may be directed to take additional language or diction courses to address any deficiencies, as determined by the conducting faculty, and as appropriate to the expectations of the degree.

**AUDITION REQUIREMENTS**

Have a complete résumé and prepared list of your completed repertoire in hand for examination by the audition committee. On this list, using asterisks indicate those numbers that you have performed from memory. Auditions are approximately sixty minutes of performance. Live auditions are strongly recommended, but tapes or other recorded formats can be considered when travel distance poses a hardship.

The following repertoire guidelines are intended to be flexible and to encourage diversity of individual interests, but they also provide a sense of expected scope. Offering repertoire from all the categories listed below is not mandatory at your audition, but you should certainly choose a program that contains stylistic variety and represents your own strengths. Works customarily performed from memory in public recitals should be performed from memory at your audition.

**PERCUSSION**

- Keyboard
  a. Major contemporary marimba work
  b. Solo violin work (one movement) from J.S. Bach Sonatas and Partitas
  c. Vibraphone solo of any style
  d. Perform six orchestral excerpts (xylophone and glockenspiel)
- Snare Drum
  a. Solo or etude from the advanced classical repertoire
  b. Solo or etude from the advanced rudimental repertoire
  c. Three orchestral excerpts
- Drumset
  a. Perform at least four varying styles
b. World percussion (optional) (Possibilities include steel drums, African drumming, taiko, etc.)

- Multi-media
  a. Video recording of last solo percussion recital that includes multiple percussion and chamber music (if possible)

**PIANO**

- A major Baroque work, such as a group of Scarlatti sonatas, a suite by Bach, or one or more preludes and fugues from the well-tempered Clavier
- A complete sonata, variation set, or similar work by Beethoven or another classical composer
- A major Romantic or Impressionist work
- Another work of your choice, preferably a major composition (or several shorter pieces) representative of twentieth-century style

**COLLABORATIVE PIANO**

- Sixty minutes of music, including a major instrumental sonata and art songs, as well as one solo memorized major work

**VOICE**

Have a prepared list of your previous vocal teachers and vocal coaches and a precise statement of your present language background, e.g., foreign language study, diction, phonetics, etc.

1. An Aria from an Oratorio: Handel, Haydn, or Mendelssohn
2. One selection of your own; preferably a major operatic aria
3. At least two selections from each of the four language categories:
   - Italian - 17th and 18th-century, Aria by Mozart, 19th and 20th-century opera
   - German - An Aria by Bach, Lieder, Mozart, Schubert, Schumann, Brahms, Wolf, Mahler, Strauss
   - French - Art Songs: Debussy, Ravel, Faure, Poulenc
   - English - Early Songs: Purcell or Arne, Contemporary American and British songs (such as Britten, Menotti, or Floyd)

**STRINGS**

Audition repertoire for the D.M.A. in music performance should be chosen to demonstrate the applicant’s current level of achievement. Early in the application process, potential students should contact the major teacher in the area and discuss audition repertoire possibilities. Suggested repertoire could include a concerto, sonata, show piece, solo Bach, and for the double bass, three major orchestral excerpts.

**WOODWINDS, BRASS**

Audition repertoire for the D.M.A. in music performance should be chosen to demonstrate the applicant’s current level of achievement. Early in the application process, potential students should contact the major teacher in their area and discuss audition repertoire possibilities.

**CONDUCTING**

An on-campus audition with the WVU Wind Symphony, University Choir, or Symphony Orchestra is preferred, although video recorded auditions are allowed when great distance precludes a visit to campus. The student is encouraged to audition in his/her strongest performance area: wind band, choir, or orchestra. Further audition requirements are as follows:

1. The applicant will perform a conducting audition with an appropriate WVU ensemble which will consist of twenty–thirty minutes of rehearsal of repertoire to be assigned at least two weeks in advance by the appropriate conducting faculty.
2. The applicant will perform an audition on his/her major instrument or voice before appropriate music faculty. Those who have been away from solo performance for a period of several years may offer evidence of past proficiency (e.g. recital programs, letters, reviews, video or audio recording, etc.)
3. Knowledge of literature and techniques appropriate to the applicant’s desired area of emphasis will be assessed by appropriate faculty.
4. Applicants desiring a choral emphasis will also be asked to demonstrate knowledge of appropriate vocal pedagogy within the choral rehearsal as well as appropriate piano skills.

**Admission to the Doctor of Philosophy in Music Education Program**

A prospective doctoral student in music education is required to have completed appropriate undergraduate and master’s degrees in music or their equivalent at institutions of recognized standing. Also, an applicant must provide evidence of excellence in teaching and musicianship demonstrated during at least three years of successful, full-time contractual K-12 music teaching. Applicants to the program leading to the doctor of philosophy must present necessary credentials for evaluation of previous training and experience to the School of Music. These include transcripts showing at least a 3.0 grade point average in a minimum of twenty-eight hours in liberal arts studies submitted through the WVU Office of Admissions. The following items must be submitted directly to the Director of Graduate Studies in Music:

1. An essay describing and discussing your training, experiences, present interests, and career aspirations in the field of music education
2. A current résumé
3. A video recording of teaching, preferably a K-12 music class or rehearsal (Please submit a detailed lesson plan for each class or rehearsal presented on your video of teaching. When the application for music education is complete, it will be reviewed by the music education faculty. If this review is favorable, a representative of the music education faculty will contact the applicant to schedule an entrance interview and possible audition.)

Applicants who do not meet all of the criteria for regular admission to the Ph.D. degree program may be granted a provisional admission subject to the satisfactory completion of certain specified courses or the attainment of a specified grade point average within a semester’s work.

   - Time Limitation (p. 235)

Master of Music/Master of Arts

The degree of master of music may be taken in music education, performance, composition, or music theory. The degree master of arts may be taken in musicology or music industry.

ADDITIONAL REQUIREMENTS FOR MASTER OF MUSIC AND MASTER OF ARTS IN MUSICOLGY PROGRAMS:

In addition to fulfilling the degree requirements for each specific program, the following pertains to all students in master of music programs or the master of arts in musicology program:

- Master’s degree students must establish an overall grade point average of 3.0.
- A representative public recital is required of candidates majoring in performance. Composition majors must submit a composition in a large form as a thesis.
- All candidates for the master of music degree are required to participate for credit for two semesters (or summer sessions) in a performing group which meets at least two clock-hours per week and which is selected with the advisor’s approval. Candidates for the master of arts in musicology are required to participate for credit in a performing ensemble for two semesters.
- A general comprehensive oral examination must be passed by all candidates for the master of music degree and the master of arts in musicology degree. Unsuccessful candidates may repeat this examination after a three-month period. The results of the second oral examination will normally be considered final. The examining committee will decide immediately after an unsuccessful second attempt whether a petition for a third attempt will be granted.
- Students must complete their programs within eight calendar years. Failure to do so will result in the loss of credit for courses taken at the outset of the program.

ADDITIONAL REQUIREMENTS FOR MASTER OF ARTS IN MUSIC INDUSTRY:

- Students must complete their programs within eight calendar years. Failure to do so will result in the loss of credit for courses taken at the outset of the program.
Doctor of Musical Arts

The primary objective of the doctor of musical arts degree is the recognition of the highest achievement in music performance and teaching. The principal objective of the degree is to prepare artist-pedagogues for careers in higher education and in the professional world.

The degree may be taken in performance and literature (with specialization in piano, collaborative piano, voice, percussion, flute, oboe, clarinet, saxophone, bassoon, horn, trumpet, trombone, tuba, low brass, violin, viola, cello, double bass, or conducting), vocal pedagogy and performance, or in composition. Historical and theoretical knowledge sufficient to support individualized interpretations for performers, original voice research for vocal pedagogues, and original creative work for composers is expected, as are writing and speaking skills needed to communicate clearly and effectively. To assist the student in achieving these objectives, the course of study includes requirements in performance or composition, pedagogy, academic coursework, and research.

The doctor of musical arts curriculum in conducting prepares students for careers in higher education and in the professional world. During the program of study, students will study repertoire and technique specific to ensembles in all three major performance areas: wind band, choir, and orchestra. Demonstration of knowledge, skill, expressive fluency, and general conducting competency will be developed through public performance preparation with all three areas; however, most performing will be completed in the student’s primary area of emphasis.

CURRICULUM

The exact amount and nature of coursework undertaken will be determined by the student’s advisor with the approval of the committee on graduate studies in light of previous preparation and field of specialization. A paradigm detailing recommended courses and other requirements is available upon request.

CANDIDACY

Upon completion of the requirements of the School of Music and the general WVU graduate studies requirements, the student will be recommended for admission to candidacy for the degree. These requirements are (in order of occurrence):

1. Pass written qualifying examinations satisfactorily to show the following:
   - Broad knowledge in music theory and music history and literature
   - In-depth knowledge of the literature of the field of specialization or of the craft of composition

2. Satisfactorily pass a comprehensive oral qualifying examination.

The qualifying examinations shall be considered one integral examination consisting of written and oral parts. If the first attempt is unsuccessful, the student is allowed to try the entire examination a second time. The second attempt will be considered final. The applicant’s committee may elect to discourage a second attempt if the first does not indicate probable success upon repetition. Graduate students who have met these requirements and who have maintained a minimum average of B (3.0) in courses completed shall be admitted to candidacy.

RESIDENCY REQUIREMENTS

Completion of the requirements for this degree normally requires at least three years of full-time graduate work. A minimum of two consecutive semesters must be spent in full-time graduate study at WVU beyond the master’s degree or its equivalent.

ACADEMIC REQUIREMENTS

- Academic requirements include courses in music theory, musicology, and music literature.
- Academic requirements for the D.M.A. in vocal pedagogy will also include courses in vocal pedagogy, voice pathology, and voice acoustics/teaching technology (this degree is not offered at this time).

PERFORMANCE REQUIREMENTS (FOR D.M.A. IN PERFORMANCE)

Performance requirements include private lessons, master classes in applied repertory, and public performance of at least two solo recitals and other types of presentations appropriate for the preparation of an artist-teacher, such as chamber music programs, concerto performances, lecture recitals, major roles in opera oratorio, musical theater, or major accompaniments. Collaborative piano requirements include private lessons, master classes in applied collaborative repertory, and public performances of collaborative vocal and instrumental repertoire, along with presentations appropriate for the preparation of a collaborative artist-teacher, such as chamber music programs, concerto performances, piano in large ensemble works, major large ensemble accompaniments, and lecture recitals. Credit for each public performance is determined in advance, usually during the first semester of study, along with the establishment of the student’s doctoral committee. A performance prospectus indicating projected performance repertoire is prepared by the student in consultation with his/her committee and the major ensemble directors as appropriate.

COMPOSITION REQUIREMENTS (FOR D.M.A. IN COMPOSITION)

Composition requirements include private lessons and the creation of a composition portfolio. The student will be encouraged by the major professor to compose works in a timely manner in a wide variety of genres from which can be drawn a select number of pieces for the portfolio. The comprehensive examination determines the admission to candidacy and is normally taken after the successful completion of required coursework in music theory and
music history. Work on the major project and research document normally will commence only after admission to candidacy. The candidate will submit to his/her doctoral committee for approval a prospectus for the portfolio to include the proposed major work, the proposed research document, and the other compositions with proposed credit weighting for each.

**RESEARCH REQUIREMENTS (FOR ALL D.M.A. PROGRAMS)**

Research requirements are intended to develop theoretical and historical investigative techniques sufficient to enable the performer to form valid individualized interpretations and to assist the composer in developing an original style. These requirements consist of the course Music Research and Bibliography (MUSC 771); for composers, a doctoral seminar; and for all students, a research project culminating in an extended written study related to the student’s area, although not necessarily constituting original research. The research project for vocal pedagogy and performance students must include original research. Projects will be supervised by an approved graduate faculty member who is a member of the student’s doctoral committee in consultation with the entire doctoral committee.

**FINAL EXAMINATION**

For performers, the final examination will consist of a major solo recital (which will be regarded as the equivalent of the Ph.D. dissertation defense). Immediately following the public performance, the candidate’s committee will meet to evaluate the performance as evidence of mature musicianship and finished technique. The final recital will not occur in the same semester as the qualifying examination.

For composers, when all compositions and the major project have been approved and all other requirements have been fulfilled, the candidate’s doctoral committee will administer the final oral examination. At the option of the committee, a written examination may also be required. The final examination(s) shall be concerned with the compositions, the major project, and the candidate’s grasp of the field of specialization and its relation to other fields. The final examination will not be given in the same semester as the qualifying examination.

For vocal pedagogy and performance candidates, the final examination will be the oral defense of the doctoral research document.

**TIME LIMITATION**

Following admission to candidacy, doctoral students are allowed five years to complete all remaining degree requirements. An extension of time may be permitted only upon repetition of the qualifying examination and completion of any other requirements specified by the student’s doctoral committee.

**Doctor of Philosophy in Music Education**

The doctor of philosophy curriculum in music education prepares students for careers as teachers and researchers in higher education. A main purpose of the program is to develop skilled and knowledgeable professionals who will challenge the present and enrich the future with significant contributions to the field through teaching, research, and service. Acceptance into the doctoral program is competitive.

**EXAMINATIONS**

**WRITTEN QUALIFYING**

Each student must demonstrate the following areas of knowledge:

- A broad knowledge in the fields of music history and music theory
- Appropriate knowledge in the cognate field
- In-depth knowledge in the field of music education

**ORAL QUALIFYING**

The student’s doctoral committee will administer a comprehensive oral examination integral with the written examinations; passage of all is the basis for formal admission to candidacy.

**CANDIDACY**

Upon completion of the requirements of the School of Music and the general WVU graduate studies requirements, the student will be recommended for admission to candidacy for the degree. These requirements are (in order of occurrence):

1. Complete all coursework.
2. Complete a major project from a graduate music education seminar. (This project should be appropriately refined and presented publicly under the supervision of a member of the graduate music education faculty. A concise written proposal articulating the scope and context of the project and the nature of its intended forum must be submitted to the graduate music education faculty for consensus approval.)
3. Pass written qualifying examinations demonstrating the following:
   a. Broad knowledge in music history and music theory
   b. Appropriate knowledge in the cognate field (usually integrated into the music education exam)
   c. In-depth knowledge in the field of music education
4. Pass a comprehensive oral qualifying examination.
The qualifying examinations shall be considered as one integral examination consisting of the written and oral parts. If the first attempt is unsuccessful, the student is allowed to try the entire examination a second time. The second attempt will be considered final. The applicant's committee may elect to discourage a second attempt if the first does not indicate probable success upon repetition.

**DISSERTATION PROSPECTUS**

1. The requirement for doctoral seminars must be completed before the presentation of the dissertation prospectus.
2. The prospectus must include the following: table of contents, introduction, statement of purpose, research hypothesis, summary of related literature, specifics of methodology, research design, data collection process, analysis procedures, appendices, and a comprehensive bibliography.

**DISSERTATION**

The candidate must submit a dissertation produced at WVU under the direction of a major professor that demonstrates a high-order of independent scholarship, originality, and competence in research and that makes an original contribution to the field of specialization.

After the dissertation has been approved and all other requirements have been fulfilled, the candidate’s doctoral committee will administer the final oral examination. However, a final examination will not be given in the same semester as the qualifying examination. At the option of the student’s committee, a final written examination may also be required. The final examination(s) shall be concerned with the dissertation, its contribution to knowledge, its relation to other fields, and the candidate’s grasp of the field of specialization.

**RESIDENCE REQUIREMENTS**

Completion of the requirements for this degree normally requires at least three years of full-time graduate work. A minimum of two consecutive semesters must be spent in residence in full-time graduate study at WVU beyond the master’s degree or its equivalent.

**TIME LIMITATION**

Following admission to candidacy, Ph.D. students are allowed five years to complete all remaining degree requirements. An extension of time may be permitted only upon repetition of the qualifying examination and completion of any other requirements specified by the student’s doctoral committee.

**Collaborative Piano**

**Degrees Offered**

- Master of Music in Collaborative Piano
- Doctor of Musical Arts in Collaborative Piano

The Master of Music in Collaborative Piano provides students wishing to specialize in piano accompaniment an opportunity to study and achieve an advanced degree in this highly demanding and lucrative professional field. Students in the Master of Music in Collaborative Piano program will develop the necessary skills for collaborative performance in today’s market, including opera and art song coaching techniques, diction, and vocal and instrumental accompanying, and will engage in a wide array of performing ensemble settings already in place in the School. Applicants should hold an undergraduate performance or collaborative piano degree. In the MM in Collaborative Piano degree, students will further develop their performing abilities as highly skilled and marketable pianists.

The primary objective of the Doctor of Musical Arts degree is the recognition of the highest achievement in music performance and teaching, preparing artist-pedagogues for careers in higher education and in the professional world. The degree may be taken in performance and literature (with specialization in piano, collaborative piano, voice, vocal pedagogy, percussion, flute, oboe, clarinet, bassoon, saxophone, horn, trumpet, trombone, tuba, low brass, violin, viola, cello, double bass, conducting) or in composition. Historical and theoretical knowledge sufficient to support individualized interpretations for performers and original creative work for composers is expected, as are writing and speaking skills needed to communicate clearly and effectively. To assist the student in achieving these objectives, the course of study includes requirements in performance or composition, academic coursework, and research.

Applicants must earn a Performance Level ten for admission. Undergraduate piano performance or collaborative piano degree required. Jury is required at end of first semester (solo/collaborative). Students need to have appropriate amount of diction at undergraduate level or they will be required to register for diction for every semester in residence.

**Degree Requirements**

Overall GPA of 3.0 or higher required.

Written Qualifying Examination

Comprehensive Oral Qualifying Examination

Final Oral Examination of Research and Performance of Final Recital

Total Hours 60

Major Learning Goals

COLLABORATIVE PIANO

Students who earn graduate degrees in Collaborative Piano will develop:

- Advanced competencies in vocal and/or instrumental collaboration.
- Knowledge and skills in one or more fields of music outside the major such as theory, history, musicology, ethnomusicology, and performance.
- Knowledge of repertory and historical performance practices.
- Language diction competencies.
- Competencies in chamber music.

Composition

Degrees Offered

- Master of Music in Composition
- Doctor of Musical Arts in Composition

Graduate instruction in composition at the masters level is generally in contemporary art music styles but also includes work in various electronic mediums (fixed playback pieces, instrument(s) and electronics, interactive electronics, etc.) with studies available in jazz, world music, and other vernacular musical styles. At least one submitted work must be in the style of art (concert) music for traditional acoustic instruments.

The primary objective of the Doctor of Musical Arts degree is the recognition of the highest achievement in music performance and teaching, preparing artist-pedagogues for careers in higher education and in the professional world. The degree may be taken in performance and literature (with specialization in piano, collaborative piano, voice, vocal pedagogy, percussion, flute, oboe, clarinet, bassoon, saxophone, horn, trumpet, trombone, tuba, low brass, violin, viola, cello, double bass, conducting) or in composition. Historical and theoretical knowledge sufficient to support individualized
interpretations for performers and original creative work for composers is expected, as are writing and speaking skills needed to communicate clearly and effectively. To assist the student in achieving these objectives, the course of study includes requirements in performance or composition, academic coursework, and research.

Applicants must demonstrate a piano proficiency (level four); evaluation of previously completed compositions at a graduate major level.

Applicants for entrance to the MM in Composition should send a portfolio of compositions that include a major work (a work of at least a ten-minute duration and/or a work for large ensemble with or w/o voice) and two or three other works in various genres. Scores may be submitted as Finale or Sibelius files or as pdf’s. Recordings and/or MIDI realizations of application compositions are strongly encouraged but not mandatory. Electronic submission of both score and audio files is highly recommended.

Applicants for entrance to the DMA in Composition should send a portfolio of compositions that include a major work (master’s thesis or equivalent) and two or three other works in various genres. Scores may be submitted as Finale or Sibelius files or as pdf’s. Recordings and/or MIDI realizations of application compositions are strongly encouraged but not mandatory. Electronic submission of both score and audio files is highly recommended.

**Degree Requirements**

Final Oral Examination

Total Hours 62

### Major Learning Goals

#### COMPOSITION

Students who earn graduate degrees in Composition will develop:

- Advanced competencies in composition.
- Knowledge and skills in one or more fields of music outside the major such as history and literature, theory and analysis, musicology and ethnomusicology, performance, and pedagogy.

#### Conducting

#### Degrees Offered

- Master of Music in Conducting
- Doctor of Musical Arts in Conducting

During the program of study, students at both the masters and doctoral levels will study repertoire and technique specific to ensembles in all three major performance areas: wind band, choir, orchestra. Demonstration of knowledge, skill, expressive fluency and general conducting competency will be developed through public performance preparation with all three areas; however, most performing will be completed in the student’s primary area of emphasis.

For the M.M. in Conducting, it is strongly recommended that those desiring admission to this degree have a minimum of 2 years successful teaching/conducting experience beyond their undergraduate conducting courses.

The doctor of musical arts curriculum in conducting prepares students for careers in higher education and in the professional world.

An on-campus audition with the WVU Wind Symphony, University Choir, or Symphony Orchestra is preferred, although video recorded auditions are allowed when great distance precludes a visit to campus. The student is encouraged to audition in his/her strongest performance area: wind band, choir, or orchestra. Further audition information is located on the WVU School of Music website.

**Total Hours**: 60

**Major Learning Goals**

**CONDUCTING**

Students who earn graduate degrees in Conducting will develop:

- Advanced knowledge in major field of study (wind band, choral, or orchestra) and competencies in the other two areas
- Advanced competencies in conducting, score study, and rehearsal techniques
- Advanced knowledge of repertoire
- Knowledge and skills in one or more fields of music outside the major such as history and literature, theory and analysis, musicology and ethnomusicology, performance, and pedagogy.

**Jazz Pedagogy**

**Degree Offered**

- Master of Music in Jazz Pedagogy

The program is designed to prepare students for independent jazz teaching, public school teaching, college or university studio or group teaching, ensemble coaching, and the teaching of jazz improvisation and pedagogy at the college of university level.
Admission to the program requires a score of level nine in the major performance area, piano proficiency (level three), and one year of jazz pedagogy/group or equivalent teaching experience.

Applicants are required to sight-read both musical notation and chord changes. Applicants should be prepared to play common jazz scale forms and improvise in a number of jazz and contemporary styles. In addition, applicants may choose additional music that best reflects their technical ability, overall musicianship, and musical interests. The applicant should demonstrate their versatility and creativity.

### Degree Requirements

### Major Learning Goals

#### JAZZ PEDAGOGY

Students who earn the Master of Music in Jazz Pedagogy will develop:

- Advanced competencies in jazz studies including areas such as jazz performance, improvisation, composition, and arranging.
• Advanced competencies in pedagogy specific to the study of jazz and its repertory.
• Knowledge and skills in one or more fields of music outside the major such as history and literature, theory and analysis, musicology and ethnomusicology, and recording and studio techniques.

Music Education

Degrees Offered

• Master of Music in Music Education
• Doctor of Philosophy in Music Education

The M.M. music education degree is designed to cultivate continued development of professional competence beyond the baccalaureate degree. High levels of musicianship and pedagogical expertise are integrated into a comprehensive program of study. Unique to the degree in music education are four degree options that enable students to pursue individual interests and talents. At the core of each of the 30-hour degree option is coursework that immerses students in the foundations and research of music education, performance studies, music history, and music theory. To complete the degree, students can select from the following four options of coursework and culminating projects:

• Field Study Option: This degree option emphasizes teaching and includes opportunities to integrate performance studies and research with a school-based field study that demonstrates application of knowledge and skills from graduate study as a culminating project.
• Recital Option: This degree option emphasizes performance studies and includes opportunities to integrate research and teaching with a representative public recital that demonstrates advanced performance competence as a culminating project.
• Thesis Option: This degree option emphasizes research and includes opportunities to integrate performance and teaching with an original thesis that demonstrates advanced research and writing competence as a culminating project.
• Certification Option: This degree option is designed for persons who obtained an undergraduate degree in music other than music education. Coursework (including student teaching) leads to a professional certificate (birth-adult music, West Virginia) and is combined with a master’s degree in music education with the generation of a professional portfolio as a culminating project. Students begin the program with a series of undergraduate courses that are necessary for certification. This block of undergraduate courses ranges from zero to twenty credits depending on the student’s previous coursework.

The Doctor of Philosophy curriculum in music education prepares students for careers as teachers in higher education. A main purpose of the program is to develop skilled and knowledgeable professionals who will challenge the present and enrich the future with significant contributions to the field through teaching, research, and service. Acceptance into the doctoral program is competitive. A prospective doctoral student in music education is required to have completed appropriate undergraduate and master’s degrees in music or their equivalent at institutions of recognized standing.

**Major Learning Goals**

**MUSIC EDUCATION**

Students who earn the graduate degrees in Music Education will develop:

- Advanced competencies in music education.
- Graduate-level perspectives on contemporary issues and problems in music education.
- Knowledge and skills in one or more fields of music outside the major such as performance, conducting, theory and analysis, and history and literature.

**Music Industry**

**Degree Offered**

- Master of Arts in Music Industry

**MUSIC INDUSTRY - MA**

The music industry is a vibrant, multi-billion dollar global industry, vast in scope and reach, offering a product that is deeply ingrained into the fabric of every country and culture, across social strata, around the world. As such, it offers extensive professional opportunities to those who are trained, knowledgeable, and versed in its systems, methods, and practices.

The Master of Arts Program in Music Industry at the School of Music offers such knowledge and training by providing an engaging, systematic, and rigorous course of study leading to analytical, creative, regulatory, and entrepreneurial understanding and skills necessary to succeed in today’s complex and challenging music industry field.

The program is offered online as a high quality graduate-level distance-learning opportunity. The program will provide all students possessing appropriate interest, qualifications, and ambition, regardless of their geographic location, access to extensive academic training and acquisition of professional skills necessary for building or furthering their careers in the music industry.

**Admissions and Performance Standards**

Admission is selective and competitive. Minimum application materials will include the following:

- a bachelor’s degree from an accredited university and a GPA of 3.0 or higher;
- GRE results with minimum scores including 153 on the verbal and 144 on the quantitative GRE sections. (The GRE requirement may be waived if the student’s Bachelor’s Degree GPA is 3.3 or higher [on a 4.0 scale], and/or if his/her professional experience in the industry exceeds 5 years, with strong academic and/or professional recommendations.)
- a curriculum vitae
- a 500 word essay describing student’s professional preferences, goals and aspirations.

**Course Requirements**

If a student has not already completed the following undergraduate course(s) prior to registering for the program, they must complete them during the first year of the program:

- Bachelor’s Degree in Music earned - Undergraduate Accounting / Financial Management course needed
• Bachelor's Degree in Business earned - Undergraduate Music Appreciation course needed
• Other Bachelor Degree(s) earned - Undergraduate Accounting / Financial Management course and Undergraduate Music Appreciation course needed

Degree Requirements

Minimum Grade in any course: C-.
Minimum GPA requirement: 2.75.

Major Learning Goals

**MUSIC INDUSTRY**

Students who earn the Master of Arts in Music Industry will develop the following:

- The ability to delineate and analyze current music industry regulations regarding their commercial implications, business opportunities, and appropriate music industry management practices across the industry income streams.
- The knowledge of the historical progress and development of various music business sectors and relevant regulatory frameworks in demonstrating mastery and understanding of the present music business regulations, systems and methods.
- The ability to perform and manage standard and management level music business procedures and processes utilized in the music publishing, recording, and live music industries, including conception and management of various music product development and placement strategies and plans.
- The ability to construct and evaluate budgets and financial projections across the music industry income streams based on the project parameters, and the relevant market level, regulations, indicators and trends.
- The ability to plan and manage music production processes and activities in recording and live music business sectors including scheduling, budgeting, equipment, personnel, union issues, and regulatory requirements.
- The ability to utilize the music industry research and analysis knowledge and skills to make a constructive contribution to the scholarship in the field, and/or to create a proper business opportunity, or to productively manage a music product, so to create new value and generate positive returns on investments.

Total Hours 15

**Music Theory**

**Degree Offered**

- **Master of Music in Music Theory**

The Master of Music in Music Theory is intended for performers and music educators who desire advanced training in the analysis of Western art music and preparation for teaching basic musicianship in either a high school or college setting. This degree can also prepare students for doctoral work in either academic or applied areas, depending upon the electives chosen. It is recommended that those considering this degree have above average keyboard skills; specifically the student should be able to play select Bach Two-Part Inventions and be able to sight read a hymn or chorale.
Applicants for Music Theory must submit:

• Graduate Record Examination (GRE) General Aptitude Test scores to the WVU Office of Graduate Admissions (http://graduate.wvu.edu).
• A sample of writing, such as a term paper; a musical subject is recommended, but not required. Send directly to the School of Music.

Admission to the program requires a score of level eight in the major performance area, piano proficiency (level four), equivalent undergraduate courses of MUSC 461 16th-century counterpoint and 18th-century counterpoint (MUSC 461 and MUSC 462 will be required if not taken at the undergraduate level.)

**Degree Requirements**

Overall GPA of 3.0 or higher required.

**Major Learning Goals**

**MUSIC THEORY**

Students who earn the Master of Music in Music Theory will develop:

• Advanced competencies in music theory.
• Knowledge and skills in one or more fields of music outside the major such as history and literature, composition, musicology and ethnomusicology, performance, and pedagogy.

**Musicology**

**Degree Offered**

• Master of Arts in Musicology

Students completing the Master’s Program in Musicology develop a broad understanding of the primary methods used in musicological and ethnomusicological research. Courses and seminars explore a wide range of musical repertories and scholarly debates, and the curriculum encourages students to engage meaningfully with the field through pedagogical training and focused research.
The theses of recent graduates have explored the construction of female identity through sheet music collection in the post-bellum U.S. South, the musical subcultures of 20th-century Greek and Italian immigrants to western Pennsylvania, and early twentieth-century violin pedagogy and African American racial uplift.

Recent graduates have entered leading North American doctoral programs or have found employment in occupations drawing heavily upon the expertise and skills developed through our degree program.

Admissions

Admission to the Master of Arts in Musicology requires academic transcripts, two letters of reference from academic faculty, a personal statement, and a representative sample of academic writing (minimum of 10 pages in length).

DEGREE REQUIREMENTS

Students must demonstrate the equivalent of four semesters of training in a language other than English and must demonstrate Level 2 piano proficiency.

Overall GPA of 3.0 or higher is required.

Major Learning Goals

MUSICOLOGY

Students who earn the Masters of Arts in Musicology will develop:

- Advanced competencies in music history and literature and/or musicology and/or ethnomusicology.
• Knowledge and skills in one or more fields of music outside the major such as theory and analysis, pedagogy, and performance, including participation in ensembles appropriate to the major emphasis.

**Performance**

**Degrees Offered**

- Master of Music in Performance
- Doctor of Musical Arts in Performance

**PERFORMANCE MAJORS MAY SPECIALIZE IN THE FOLLOWING:**

- piano
- voice
- percussion
- flute
- oboe
- clarinet
- bassoon
- saxophone
- horn
- trumpet
- trombone
- tuba
- violin
- viola
- cello
- double bass
- guitar

**Degree Requirements**

Overall GPA of 3.0 or higher required.

**Major Learning Goals**

**PERFORMANCE**

Students who earn the graduate degrees in Performance will:

- Demonstrate advanced competencies in performance.
- Develop knowledge and skills in one or more fields of music outside the major such as theory and analysis, history and literature, musicology and ethnomusicology, and pedagogy.
- Expand competencies sufficient to understand texts in the repertoire. Voice majors are expected to be proficient in English, German, French, and Italian diction and to have general phonetic knowledge and skills that can be applied to other languages.

**Piano Pedagogy**

**Degree Offered**

- Master of Music in Piano Pedagogy

WVU offers a Master of Music degree in Piano Pedagogy. This program offers a variety of courses and comprehensive experience in individual and group piano instruction.

This Master of Music degree is designed to provide advanced training to help prepare students to teach piano successfully in an independent studio, community music program or college. Topics covered may include:

- Teaching students of all ages
- Teaching students at beginning, intermediate and advanced levels
- Teaching in private- and group-lesson formats
- Evaluating recommended music, methods and materials
- Using technology to enhance music teaching
- Developing well-rounded curriculum for pre-college students
- Teaching students how to help their pupils develop a healthy and efficient technique as well as musical and stylistic playing
- Reviewing research on learning theory, memorization and other topics of importance to piano teachers
- Operating the independent studio as a successful business
- Special topics related to teaching college group instruction and private students
- Special topics related to teaching pre-college and advanced students

**Degree Requirements**

Overall GPA of 3.0 or higher required.

**Major Learning Goals**

**PIANO PEDAGOGY**

Students who earn the Master of Music in Piano Pedagogy will develop:

- Advanced competencies in pedagogy specific to the study of piano and its repertory.
- Knowledge and skills in one or more fields of music outside the major such as history and literature, theory and analysis, musicology and ethnomusicology, and recording and studio techniques.

**Vocal Pedagogy and Performance**

**Degree Offered:**

- Doctor of Musical Arts in Vocal Pedagogy and Performance

The primary objective of the Doctor of Musical Arts degree is the recognition of the highest achievement in music performance and teaching, preparing artist-pedagogues for careers in higher education and in the professional world.

The degree may be taken in performance and literature (with specialization in piano, collaborative piano, voice, vocal pedagogy, percussion, flute, oboe, clarinet, bassoon, saxophone, horn, trumpet, trombone, tuba, low brass, violin, viola, cello, double bass, conducting) or in composition. Historical and theoretical knowledge sufficient to support individualized interpretations for performers and original creative work for composers is expected, as are writing and speaking skills needed to communicate clearly and effectively. To assist the student in achieving these objectives, the course of study includes requirements in performance or composition, academic coursework, and research.

The School of Music is currently not accepting applications for the DMA Vocal Pedagogy and Performance program.

Entrance requirements: audition; 1 year of college study of French, German and Italian; proof of piano proficiency (equivalent of level 3 at WVU School of Music); entrance exams in music history, music theory, and vocal pedagogy

### Major Learning Goals

**VOCAL PEDAGOGY AND PERFORMANCE**

Students who earn the Doctor of Musical Arts in Vocal Pedagogy and Performance will develop:

- The ability to conduct inquiries and develop methodologies and repertories for music study.
- Performance competence at a professional level with historical and theoretical knowledge supportive of the development of individualized interpretations.
- A broad knowledge of repertory and literature.
The School of Theatre & Dance offers the Master of Fine Arts (MFA) as the terminal degree in the following majors:

- Acting
- Scenic Design & Technology
- Costume Design & Technology
- Lighting Design & Technology
- Technical Direction

All MFA degree programs in the School of Theatre & Dance are 3-year, 6-semester programs resulting in a terminal degree in that field of study.

West Virginia University is accredited by the National Association of Schools of Theatre (NAST).

**FACULTY**

**DIRECTOR**
- Joshua Blackmer Williamson - M.F.A. (University of Wisconsin - Madison)
  Associate Professor of Lighting & Sound Design

**PROFESSORS**

Admission
Prospective candidates for the degree of master of fine arts in theatre must have a B.A. or B.F.A. degree or equivalent from an accredited institution. Ordinarily, a minimum of thirty semester hours in theatre at the undergraduate level is expected to have been completed with a grade point average of no less than 2.75; although, students with an undergraduate grade point average of 2.25 to 2.75 may be admitted with probationary status.

Auditions
Applicants must audition/interview to gain admittance into the program. Applicants intending to specialize in acting must submit a complete resume of their acting experience, at least two letters of recommendation from acting coaches or directors, and must present an audition before at least one member of the acting faculty. Those intending to specialize in design must submit a complete portfolio of their work, a resume of their design experience, and at least two letters of recommendation from design instructors or directors. An interview with members of the design faculty is also required.

For further details regarding these requirements, please contact the School of Theatre & Dance, West Virginia University, P.O. Box 6111, Morgantown, WV 26506-611, visit theatre.wvu.edu, or call (304) 293-2020.

Advanced Standing
Students may be eligible for eighteen hours of graduate transfer credit for advanced-standing if they meet the regular requirements of graduate admission. Students admitted with advanced standing are required to be in residence at WVU for a minimum of two semesters and a summer session. The request for advanced standing should be made to the school chairperson at the time of application.

Acting
MASTER OF FINE ARTS IN ACTING
The M.F.A. acting program is an intensive three-year course of study designed to train students for the professional theatre world and its related fields including teaching pedagogy. The graduate acting studio program offers conservatory-style actor training in all aspects of acting, voice/speech, and movement. In addition to the studio program, students are required to complete coursework in theatre history, text analysis, criticism, and research methods.

M.F.A. acting students are accepted every three years and must follow the prescribed course sequence in the order that they are offered. The next entrance date will be Fall 2018 and the School of Theatre and Dance will be recruiting and auditioning students in the 2017-18 academic year.

Major Learning Goals

ACTING

General Requirements:

Graduates of M.F.A. programs in the School of Theatre & Dance must exhibit exceptional skill in theatre practice and a well-developed personal aesthetic. The competencies outlined below are combined and synthesized to achieve this result. The standards do not require a specific course for each competency.

1. Advanced professional competence in some aspect of theatre practice as exemplified by a considerable depth of knowledge and achievement demonstrated by a significant body of work.

2. A breadth of understanding in theatre and any appropriate related disciplines, the ability to think independently, and to integrate and synthesize information associated with high levels of practice in an area of specialization.

3. Awareness of current issues and developments that are influencing the principal field(s) of study, and professional ability and clear potential to contribute to the practice and advancement of the field.

4. Writing and speaking skills to communicate clearly and effectively to the theatre communities and the public.

5. Advanced capabilities with technologies normally utilized in the creation of work.

6. An understanding of professional ethics and practice associated with the major field.

Specific Requirements:

The graduate must demonstrate advanced professional competence in acting including, but not limited to:

1. The ability to employ a broad range of acting knowledge and skills in the creation and presentation of roles.

2. The ability to perform in plays of various types and from various periods.

3. The acquisition of advanced understanding and capabilities in voice and speech, movement, and play analysis.

4. A working knowledge of historical, critical, and theoretical content and the ways they inform playwriting and dramatic writing, the creation of roles, and other aspects of production.

The student must perform regularly and should have at least two significant roles in full-length, public productions during the period of study.

Costume Design and Technology

MASTER OF FINE ARTS IN COSTUME DESIGN & TECHNOLOGY

The M.F.A. design program is an intense three-year course of study for students seeking professional preparation in scenic, costume, or lighting design.

Studio design courses, together with fully realized production experience, offer expectations found in the real world.

- Three years of graduate courses and production work totaling at least sixty-four designated credit hours
- A production or research thesis
- Oral defense of the thesis project
- A successful evaluation at the end of each semester of study
- An overall grade point average of 3.0

Degree Requirements

Minimum GPA 3.0 required.

Major Learning Goals

LIGHTING DESIGN AND TECHNOLOGY

General Requirements:

Graduates of M.F.A. programs in the School of Theatre & Dance must exhibit exceptional skill in theatre practice and a well-developed personal aesthetic. The competencies outlined below are combined and synthesized to achieve this result.

1. Advanced professional competence in some aspect of theatre practice as exemplified by a considerable depth of knowledge and achievement demonstrated by a significant body of work

2. A breadth of understanding in theatre and any appropriate related disciplines, the ability to think independently, and to integrate and synthesize information associated with high levels of practice in an area of specialization

3. Awareness of current issues and developments that are influencing the principal field(s) of study, and professional ability and clear potential to contribute to the practice and advancement of the field

4. Writing and speaking skills to communicate clearly and effectively to the theatre communities and the public

5. Advanced capabilities with technologies normally utilized in the creation of work

6. An understanding of professional ethics and practice associated with the major field

Specific Requirements:
The graduate must demonstrate advanced professional competence in lighting design including, but not limited to:

1. Advanced knowledge and skills in working with photometrics, brightness relationships, color, computer/digital technology and the history of design.

2. Advanced knowledge and abilities in electrical and optical control and distribution, regulation of lighting equipment, and mechanical drafting or visualization of lighting design.

3. Thorough understanding of (a) human response to light, (b) energy and materials, (c) photographic and photoelectric reproduction technology, and (d) safety codes and practices.

4. Creative and technical ability to develop the lighting design of a production from concept to finished product.

5. A working knowledge of play analysis and an overview understanding of ways that historical, critical, and theoretical content inform various aspects of design and production.

6. The ability to work with theatre professionals in their processes of production.

The student must design at least two fully-mounted, public productions during the period of study.

**Technical Direction**

**MASTER OF FINE ARTS IN TECHNICAL DIRECTION**

The M.F.A. program is an intense three-year course of study for students seeking professional preparation in Technical Direction.

- Three years of graduate courses and production work totaling a minimum of sixty-one designated credit hours
- A production or research thesis
- Oral defense of the thesis project
- A successful evaluation at the end of each semester of study
- An overall grade point average of 3.0

**Degree Requirements**

Minimum GPA of 3.0 required.

## Major Learning Goals

### TECHNICAL DIRECTION

This degree program may be especially appropriate for students interested in pursuing opportunities as technical directors or theatrical project managers.

- The graduate must demonstrate advanced professional competence in technical direction including, but not limited to:
  1. The ability to supervise the safe construction of scenery and properties within the scope of allocated/budgeted materials, labor/time, and space.
  2. The ability to understand various elements related to (a) theatrical design; (b) the set up and operation of lighting components and systems; (c) the use of sound reinforcement and playback systems; (d) methods of scenic art and construction; (e) rigging and motor systems; (f) fluid power systems (pneumatics and hydraulics) and motion control; and (g) mechanical, structural, and electrical engineering. The ability to work with these elements as appropriate to specific productions is essential.
  3. The ability to read and direct personnel based on computer-aided technical drawings.
  4. Personnel management, including the ability to safely supervise and, when appropriate, schedule the work of personnel within and across various theatrical shops.
  5. The ability to work with theatre professionals in their processes of production.
  6. The ability to articulate and apply federal, state, and local health and safety practices and regulations associated with production and performance including, but not limited to, appropriate Occupational Safety and Health Administration (OSHA) regulations and the National Fire Protection Association (NFPA) Life Safety Code.
  7. Facilities management, including a) the ability to oversee the daily operations and maintenance of various theatrical shops; and b) the ability to maintain a working schedule of work done in, and outside requests to use, various shops and theatrical facilities.

- The student must successfully serve as the technical director for at least two fully realized productions during the period of study, at least one of which must be fully mounted for the public.
Dentistry

Degrees Offered

- D.D.S. in Dentistry
- M.S. in Dental Specialties (Endodontics, Orthodontics, Periodontics and Prosthodontics)
- M.S. in Dental Hygiene

Historical Background

The School of Dentistry was established by an act of the West Virginia Legislature on March 9, 1951, and the first class was enrolled in September 1957. A class of twenty-three students graduated in 1961, receiving the first dental degrees awarded in West Virginia. In September 1961, the first two students were enrolled in the school’s baccalaureate degree program in dental hygiene and graduated in 1965.

Mission

It is the mission of the West Virginia University School of Dentistry to promote a diverse and dynamic learning environment that addresses the present and future oral health needs of the citizens of West Virginia and beyond by providing an oral health center committed to excellence and innovation in education, research, patient care, service, and technology.

The WVU School of Dentistry offers degrees of doctor of dental surgery, master of science in dental specialties and dental hygiene, and bachelor of science in dental hygiene. The Department of Oral and Maxillofacial Surgery offers a four-year residency program, a one-year internship, and a one-year general practice residency program. Programs leading to the master of science and doctor of philosophy degrees are available in the associated basic sciences, public health, and business. Continuing education courses for dentists and auxiliaries are offered throughout the year on a wide variety of dental topics.

Accreditation

All programs are accredited by the Commission on Dental Accreditation of the American Dental Association.

Administration

The dean is responsible for implementing the established policies of the School of Dentistry, the Health Sciences Center, and the University. The dean of the School of Dentistry reports to the vice president for Health Sciences.

Dental Clinic

Clinical training and experience constitute a major part of the curriculum for dental and dental hygiene students. Facilities for dental and dental hygiene students include over seventy-five treatment cubicles and all necessary related laboratories. Students treat their assigned patients under close supervision of faculty and receive practical experience while rendering service to thousands of patients annually.

Books and Instruments

Dental and dental hygiene students are required to obtain necessary textbooks for the scheduled courses and special instruments for use in the various laboratories and clinics. Lists of approved instruments and books will be provided at the time of registration, and these supplies will be made available through University services. Official authorization is essential in the purchase of all instruments and books used in dental courses. All dental students must maintain a library of required textbooks through graduation. Used instruments and equipment are not acceptable. A designated laptop computer must also be purchased prior to the first day of class.

Organizations

American Student Dental Association. Pre-doctoral and advanced education dental students are eligible to become members of the American Student Dental Association. Membership provides for student membership in the American Dental Association.

American Association of Dental Research. All dental and auxiliary students, including advanced education students, are eligible to become student members of the American Association of Dental Research during the period of enrollment in the School of Dentistry.

American Dental Education Association. All dental and auxiliary students, including advanced education students, are eligible to become student members of the American Dental Education Association during the period of enrollment in the School of Dentistry.

American Association of Women Dentists. The objectives and purposes of the West Virginia University School of Dentistry Chapter of the American Association of Women Dentists are to offer opportunities for personal growth through association with women in the dental profession, support the goals of the American Association of Women Dentists, aid in the advancement of women in dentistry, promote professional support and cooperation among its members, and promote the fundamentals of good oral health.
Academy of Dentistry for Persons with Disabilities. The Academy of Dentistry for Persons with Disabilities is an international organization for dental students and dental hygiene students interested in management and treatment of special care patients. Community services are provided by assisting with Special Olympics and presenting disability awareness programs to area grade schools. Guest speakers are sponsored on topics such as: "Managing the Hearing Impaired Patient in the Dental Office," "Use of Restraint in Treating Patients with Disabilities," and "Child Abuse and Neglect in Special Needs Children."

WVU School of Dentistry Alumni Association. In a series of meetings held during May 1961, the first senior class of the School of Dentistry established the WVU School of Dentistry Alumni Association. The association promotes the educational program of the School of Dentistry. Full membership is extended to all graduates of the school, and associate memberships are available to others interested in the aims of the association.

Omicron Kappa Upsilon. On February 6, 1961, the Alpha Beta Chapter of Omicron Kappa Upsilon, national honorary dental society, was chartered at the School of Dentistry. Student membership is limited to twelve percent of each senior class. Candidates are from the academically superior twenty percent.

Dental Fraternity. Chapter of Delta Sigma Delta International Dental Fraternity.

Student American Dental Hygienists’ Association. Dental hygiene students are eligible for membership in the official organization representing the dental hygiene profession.

Sigma Phi Alpha. The Alpha Xi chapter of the national dental hygiene honorary society, Sigma Phi Alpha, was established on March 19, 1968. Student membership is limited to ten percent of each graduating class. Candidates are selected on the basis of scholarship, character, and leadership potential as a dental hygienist.

ADMINISTRATION

DEAN

- Anthony T. Borgia - D.D.S., M.H.A.
  Georgetown University

ASSOCIATE DEANS

- Christina B. DeBiase - Ed.D. (West Virginia University)
  Academic and Postdoctoral Affairs
- Michael J. Meador - D.D.S (West Virginia University)
  Clinic Education and Patient Care
- Shelia S. Price - D.D.S. (West Virginia University)
  Admission, Recruitment and Access

ASSISTANT DEAN

- Robert L. Wanker - D.D.S. (West Virginia University)
  Student and Alumni Affairs

CHAIRS

- Michael Bagby - D.D.S. (Loyola University of Chicago)
- Bryan Dye - D.D.S. (West Virginia University)
- L. Keith Hildebrand - D.D.S. (West Virginia University)
- Richard Meckstroth - D.D.S. (Loma Linda University)
- Peter Ngan - D.M.D. (Harvard)
- Patrick Petley - D.M.D. (University of Pittsburgh)
- Gian Pietro Schincaglia - D.D.S.(University of Ferrara)
- Bryan Weaver - D.D.S., M.D. (West Virginia University)

PROGRAM DIRECTORS

- Marvin L. Speer - D.D.S., M.S. (Loyola University of Chicago)
  Endodontics
- Amy Funk - M.S.D.H. (West Virginia University)
- William Marshall - D.D.S. (West Virginia University)
  General Practice Residency
- Peter Ngan - D.M.D. (Harvard University)
  Orthodontics
- Matthew Bryington - D.M.D. M.S. (University of North Carolina)
Prosthodontics
- Gian Pietro Schincaglia - D.D.S. (University of Ferrara)

Periodontics
- Bryan Weaver - D.D.S., M.D. (West Virginia University)

Oral and Maxillofacial Surgery

Degree Designation Learning Goals
The postgraduate programs in dentistry are designed to train well qualified dentists in all aspects of the designated dental specialties offered. Advanced training consists of an integrated education program designed to provide both knowledge in the dentally applied basic sciences and experiences in the clinical science of the designated specialty. A series of structured didactic and clinical courses provides the student with a level of knowledge and skill development necessary to practice a specialty and to prepare for a career in teaching and research. The program qualifies the student for examination and certification by the specialty board.

MASTER OF SCIENCE (MS)
The Master of Science degree program requires the development of an in-depth research problem which must be reported in the form of a thesis.

LEARNING GOALS:

1. Develop competent and skilled clinicians at the specialty level.
2. Prepare and qualify residents to achieve certification by the specialty board.
3. Prepare residents to successfully manage a specialty practice.
4. Prepare and promote a career long interest in continued professional development.
5. Develop the background and experience necessary to select materials and techniques which will appropriately meet the biological, physiological and biomechanical requirements for various oral rehabilitations.
6. Introduce residents to teaching techniques and experiences enabling them to gain an appreciation for their potential role as educators.
7. Prepare residents to critically evaluate the literature and to formulate and conduct a program of research in their specialty and to write and defend a thesis [Master of Science] presenting the results of original research.

DOCTOR OF DENTAL SURGERY (DDS)
Competencies are the skills, knowledge base, attitudes and judgment abilities that a dentist must have at the start of unsupervised independent practice. A graduating student must possess an array of competencies although he or she may not be proficient or expert yet. By defining a curriculum-wide spectrum of competencies, the educational mission of the School is enhanced in two ways: First, the competencies guide our curriculum design and enable increased abilities to analyze curricular content. Second, we can be more focused and efficient in assessing the students’ acquisition of the defined competencies. To the extent that it can be affirmed that the student acquires sufficient competency to enter the independent practice of dentistry both safely and ethically, the curriculum has more value.

The ultimate benefits of Competencies for the Graduating Dentist will be a more efficient and rational curriculum that is responsive to the educational mission of the School of Dentistry.

I. Scientific and Critical Thinking

1. Scientific Process: The graduating dentist must acquire, critically evaluate and assimilate scientific information necessary for the evaluation, diagnosis, treatment, management and prevention of oral health problems.

II. Patient Evaluation

2. Examination of the Patient: The graduating dentist must be able to perform an examination that collects the medical, physical, psychological and social information needed to evaluate the systemic and oral condition(s) of patients of all ages (infant through older adult) or with special needs (including, but not limited to, persons with developmental disabilities, complex medical problems and physical limitations) and manage behavioral factors which affect oral health and use the information to implement strategies that facilitate the delivery of oral health care.

III. Diagnosis

3. Diagnosis: The graduating dentist must be able to determine a differential, provisional or definitive diagnosis by interpreting and correlating findings from the history, clinical and radiographic examination and other diagnostic tests.

IV. Treatment Planning

4. Treatment Planning: The graduating dentist must be able to develop, present, and discuss individual treatment plans for patients of all ages consistent with the patient's condition, interest, goals and capabilities.
V. Patient Treatment and Management

5. Prevention of Disease and Maintenance of Health: The graduating dentist must be able to provide care for patients of all ages that emphasizes prevention of oral diseases and supports the maintenance of existing systemic and oral health.

6. Tobacco Cessation: The graduating dentist must be able to provide evidence-based tobacco cessation strategies.

7. Diversity Awareness: The graduating dentist must be able to discuss cultural factors that impact oral health and provide culturally-sensitive care to persons with varying individual characteristics and backgrounds.

8. Control of Pain and Anxiety: The graduating dentist must be able to employ techniques to manage orofacial discomfort and psychological distress.

9. Caries Management: The graduating dentist must be able to treat and manage caries in the primary, mixed and permanent dentition.

10. Endodontic Therapy: The graduating dentist must be able to treat diseases of pulpal and periradicular origin in the primary, mixed and permanent dentitions.

11. Periodontal Therapy: The graduating dentist must be able to treat and manage periodontal disease in the primary, mixed, permanent and implant dentitions utilizing a non-surgical approach.

12. Surgical Therapy: The graduating dentist must be able to recognize, evaluate, treat and/or manage conditions requiring surgical procedures on the hard and soft tissues in patients of all ages.

13. Emergency Situations: The graduating dentist must be able to prevent and manage dental and medical emergency situations encountered in the practice of general dentistry.

14. Occlusal/TMD Therapy: The graduating dentist must be able to manage functional disorders of occlusal or non-occlusal origins.

15. Orthodontic Therapy: The graduating dentist must be able to manage developmental or acquired abnormalities in esthetics or occlusion.

16. Stomatolody: The graduating dentist must be able to manage limited or common non-life threatening oral mucosal diseases or disorders.

17. Restorative/Prosthodontic Therapy: The graduating dentist must be able to provide restorations and prostheses that are correct in anatomical form, comfortable and functionally effective, and which satisfy the esthetic requirements of the patient or legal guardian.

18. Implant Therapy: The graduating dentist must be able to assess, diagnose, treatment plan and treat patients requiring single tooth posterior implant-supported restorations and mandibular implant-supported overdentures.

19. Assessment of Patient Treatment: The graduating dentist must be able to determine the prognosis for proposed patient care, evaluate the initial results of the care and determine appropriate periodic maintenance.

VI. Disease Prevention and Health Promotion

20. Community Engagement: The graduating dentist must be able to assume a leadership role in improving the oral health of individuals, families and groups in the community by planning, implementing and evaluating programs to eliminate oral health disparities through a dynamic, evidence-based and interprofessional approach to wellness.

VII. Practice Dynamics

21. Ethics: The graduating dentist must be able to discern and manage the ethicolegal issues of dental practice.

22. Dental Informatics: The graduating dentist must be able to utilize or appreciate office computerization, different forms of digital imaging and electronic communication and information retrieval for patient care, practice management and professional development.

23. Professional Practice: The graduating dentist must possess the skills to transition from dental school to various practice settings.

24. Scope of Practice: The graduating dentist must be able to know the limit of one's competence and when to make referrals to colleagues.

25. Dental Sleep Medicine: The graduating dentist must recognize and refer patients at high risk for sleep disorders and prescribe and manage oral appliances, as a member of the sleep medicine team.

Dental Hygiene

Degree Offered

- Master of Science in Dental Hygiene
The Profession

Dental hygiene is an exciting profession with many rewarding and challenging career opportunities which include clinical/patient care, administration, education, research, and sales/marketing. Dental hygienists are employed in diverse settings such as private dental practices; clinics; hospitals; long-term care facilities/rehabilitation centers; dental hygiene education programs; national, state, and local government agencies; and private business/industry. As a licensed health professional and oral health educator, the dental hygienist has an important role in the overall health and welfare of the public. The dental hygienist is an integral part of the dental team, providing direct patient care based on the prevention of disease. The duties and responsibilities of dental hygienists vary from state to state but may include oral prophylaxis (removing stains and deposits from teeth); root debridement; exposing radiographs; application of preventive and therapeutic agents; local delivery of antimicrobial agents; nutritional counseling; oral, head, and neck cancer screenings; monitoring nitrous oxide sedation; and administration of local anesthesia. The educational background of a dental hygienist provides the knowledge, attitudes, and skill necessary to be successful in a wide variety of careers. From providing clinical care to research to public administration, dental hygiene opens the door to many successful career options. For more information concerning licensure, please visit: http://dentistry.hsc.wvu.edu/education/programs/dental-hygiene-programs/licensure/.

Nature of the Program

The Master of Science Program in Dental Hygiene provides the terminal degree for the dental hygiene profession. The program is designed to provide both full-time and part-time students with the advanced education in dental hygiene necessary to assume roles in teaching, administration, research and management. Emphasis is also placed on preparing graduates to conduct the evaluate research and to continually advance their knowledge and skills through self directed learning. Graduates from this program will assist in meeting the dental health care needs of the community, the state of West Virginia, and the nation. The program seeks to maintain high quality dental hygiene care by offering a curriculum that provides students with the ability to:

- attend school on a full-time or part-time basis and gain an advanced education in dental hygiene necessary to assume roles in teaching, administration, research and management;
- achieve competency in the development and evaluation of a research project;
- acquire the initiative to grow in his/her capability for independent thought, responsible action, and the motivation to continue professional development.

The dental hygiene program has a strong commitment to providing care and educational programs to residents of West Virginia, which is demonstrated by the required 25 hours of service learning. To provide students in dental hygiene program with the necessary clinical experience that is required, the School of Dentistry maintains and operates dental clinics in the Robert C. Byrd Health Sciences Center School of Dentistry. Through the West Virginia University Institute for Community and Rural Health (WVUICRH), students may be provide direct patient care for the citizens of West Virginia at a rural site. Please visit http://dentistry.hsc.wvu.edu/education/programs/dental-hygiene-programs/ for more information.

The dental hygiene program has an excellent reputation for producing outstanding clinicians and many faculty members as well as graduates are recognized as leaders in dental education and organized dentistry. Please visit http://dentistry.hsc.wvu.edu/education/programs/dental-hygiene-programs/master-of-science/ for more information.

Academic and Professional Standards

The Dental Hygiene Academic and Professional Standards, including the Student Rights and Responsibilities, are available at: http://dentistry.hsc.wvu.edu/education/programs/dental-hygiene-programs/academic-professional-standards/

FACULTY

DIRECTOR
- Amy D. Funk - M.S.D.H.

PROFESSOR
- Christina B. DeBiase - Ed.D. (West Virginia University)
  Curriculum and Instruction, Special Patient Care

ASSOCIATE PROFESSORS
- M. Suann Gaydos - MSDH (WVU)
- Alcinda K. T. Shockey - BSDH, MA, DHSc (NOVA Southeastern University)

CLINICAL ASSISTANT PROFESSORS
- Kristafer L. Adkins - MSDH (WVU)
- Lisa E.Lisauckis - MSDH
Admission Requirements

To apply to the program, please go to http://dentistry.hsc.wvu.edu/education/programs/dental-hygiene-programs/master-of-science/apply-now/ and follow the directions provided. You do not need to complete a separate application for WVU, you must choose Dental Hygiene in the WVU on-line application to be considered for the Program.

The program’s admission requirements are as follows:

- Meet WVU requirements for admission to graduate study. Applicants who do not meet the minimum requirements for admission must gain provisional acceptance into the program. All provisions of admission must be met no later than completion of the eighteenth credit hour to be reclassified as a regular student. A student who fails to meet the provisions of admission or who fails to meet the required GPA will be suspended.
- Possess a baccalaureate degree in dental hygiene from an accredited dental hygiene program or a baccalaureate degree in another field of study from an approved institution of higher education while holding a certificate or associate’s degree in dental hygiene from a program fully accredited by the American Dental Association Commission on Dental Accreditation.
- Demonstrate evidence of scholastic and clinical achievement to indicate the applicant’s ability to progress in a program of this nature. Generally, a minimum grade point average of 3.0 or above on a 4.0 scale on all college work attempted is required.
- Complete the Graduate Record Examination (GRE) with an acceptable score within the last five years.
- Submit all information requested in the graduate application to the Office of Academic and Postdoctoral Affairs.
- Consent to and pass a criminal background investigation prior to final acceptance.

Total Hours 37

* Students must achieve an overall grade point average of a 3.0 GPA in all work attempted in the master's program. A grade of C or below in one course will require a faculty review of the student’s progress. A second C or below will result in dismissal from the program. A student may repeat only one course one time to bring the GPA up to the 3.0 requirement. Credit hours for courses with a grade lower than C do not count toward degree requirements.

Major Learning Goals

DENTAL HYGIENE

The goals of this program are to provide graduates with the knowledge, attitudes, and behaviors necessary to be competent in the:

1. Design, implementation, administration, and evaluation of dentally-related educational courses (i.e., nutrition, radiology, histology, pharmacology, pathology, and periodontics) and programs a) in schools of dentistry, dental hygiene, dental assisting, b) public or private institutions or groups requiring in-service, and c) in elementary and secondary schools;
2. Design, implementation, administration and evaluation of dental health care delivery programs; i.e., patient services rendered in professional schools, hospitals, institutions for the mentally and physically disabled, geriatric centers, public health departments etc.;
3. Administration of office/personnel management related areas such as a) group dynamics, collaboration, b) accounting issues, e.g., computerized recall, billing, inventory, third party payment, and insurance, and c) legislation and public policy;
4. Design, obtaining of financial support, conduct, management, evaluation, and presentation of research projects;
5. Development of independent thought, responsible action, and the motivation to continue professional development.

**Doctor of Dental Surgery**

**Doctor of Dental Surgery**

The WVU School of Dentistry prepares students to provide high-quality, comprehensive oral health care. A dental degree offers a variety of career options including private practice, teaching, research, and public health dentistry. In addition to the Doctor of Dental Surgery (DDS) degree, specialty practice areas may be pursued by advanced training. Oral health professionals are essential members of the health care team. The school offers enriching interprofessional learning opportunities with other Health Sciences Center health profession programs.

Our students train using state-of-the-art technology which includes but is not limited to electronic health record, digital radiography, and dental simulation. Community service is integral to our mission. Students participate in a plethora of local and global community outreach programs. Prior to graduation students experience a community-based clinical rotation in rural West Virginia for at least six weeks. Due to a large number of applications and limited class size, qualified West Virginia residents receive priority consideration, and outstanding nonresident applicants are also considered. Residency status is determined by the WVU Office of Admission in accordance to the Higher Education Policy Commission Rules and Policies, Series 25. The dental admissions committee utilizes a holistic selection process that takes into account cognitive and non-cognitive attributes in accordance with defined admission criteria. Competition for admission has elevated the academic profile of admitted candidates to a rather high plateau. Nonresident applicants generally have earned a GPA of 3.75 or about and DAT scores of 19 or above. The School of Dentistry recognizes the importance of diversity in fulfilling its mission and encourages individuals from diverse backgrounds to apply.

**Admission Requirements**

Admission to the WVU School of Dentistry Doctor of Dental Surgery (D.D.S.) program is contingent upon satisfactory completion of all admission requirements, appropriate completion of all application instructions, submission of all transcripts from each college attended, submission of Dental Admission Test (DAT) scores, a personal interview, satisfactory completion of all courses taken before registration in dental school (includes courses taken during the summer session immediately preceding initial enrollment), and all other requirements as set forth by the dental admission committee. Detailed information is available on the dental admissions webpage: http://dentistry.hsc.wvu.edu/education/programs/doctor-of-dental-surgery/apply-now/.

Applications should be submitted in the summer or early fall of the year prior to anticipated enrollment. Candidates for the D.D.S. degree must have abilities and skills of five varieties including observation; communication; motor; intellectual, conceptual, integrative, quantitative; behavioral and social. Technological compensation can be made for some disabilities in certain areas, but a candidate should be able to perform in a reasonably independent manner. (Refer to the School of Dentistry website for additional details about technical standards).

A minimum of three years of college course work completed at U.S. or Canadian colleges or universities is required. Applicants must have earned a minimum of ninety semester credit hours at the time of application. Up to 64 semester credit hours completed at community colleges are accepted toward the minimum course hour requirement. The prerequisites for admission include:

Completion of courses in microbiology, embryology/developmental biology, physiology, cellular and molecular biology, genetics and psychology are strongly recommended. In addition, courses in the humanities and the social sciences are suggested to acquire a well-rounded intellectual background for the study and practice of dentistry. Admitted students must complete all required courses by June 1st. The School of Dentistry participates in the Associated American Dental Schools Application Service (AADSAS). All applications must be submitted online via AADSAS at http://www.adea.org. Each year the AADSAS application becomes available in early June. The application deadline is November 1st of the year immediately prior to the applicant's anticipated enrollment. The school uses a rolling admission process and begins admitting highly qualified individuals on December 1st. Applicants are required to have letters of recommendation submitted to AADSAS. Specific information regarding recommendation sources and quantity is available on the School of Dentistry website. Satisfactory completion of the Dental Admission Test (DAT) is required. The test is given at
testing centers throughout the U.S. and in Canada. DAT registration is available on the American Dental Association (ADA) website www.ada.org (http://www.ada.org). DAT scores must be submitted by November 1st of the year preceding the date of matriculation. Scores are valid up to five years after the test date. Applicants must complete shadowing experiences in clinical dental settings including private offices, community health clinics, and service missions. While there is no specific minimum shadowing hour requirement, successful candidates usually observe at least 75 hours in a variety of dental environments. The Dental Admission Committee evaluates all AADSAS applications and invites selected applicants to submit a secondary (WVU) application. West Virginia resident applicants are usually offered an interview, although the admissions committee may elect not to interview unrealistic applicants. Selected non-resident applicants are invited to interview depending on their qualifications. Individuals who received provisional acceptance must obtain criminal background clearance and provide documentation of the specified immunizations prior to matriculation.

**INTERNATIONAL DENTAL GRADUATE GUIDELINES**

International dental graduates who wish to apply to the WVU School of Dentistry Doctor of Dental Surgery (D.D.S.) program as a student in the first-year class must:

1. Submit an application through the Associated American Dental Schools Application Service (AADSAS) by November 1. To obtain additional information, please refer to the general admissions requirements, which include completion of at least 90 semester credit hours at a U.S. or Canadian College or University prior to application submission.
2. Provide documentation of a D.D.S. or D.M.D. degree (or equivalent) from a non-U.S. dental school.
3. Demonstrate proficiency in the English language as demonstrated by performance on the Test of English as a Foreign Language (TOEFL) - paper-based minimum score of 500 or computer-based minimum score of 173 or internet-based test minimum score of 61 - and completion of English 1 and English 2 (or equivalent) at an accredited U.S. college or university earning grade of C or above.
4. Provide three letters of recommendation by college instructors who are familiar with the applicant, excluding family members.
5. Submit Dental Admission Test (DAT) scores showing at least average competence in the various subsections of the test - 17 minimum score, or provide evidence of having successfully passed the National Board Dental Examination, Part I, within five years preceding the application.
6. Have all previous coursework from non-U.S. colleges evaluated by Educational Credential Evaluators (ECE) or the World Educational Services (WES). An official or certified copy of the evaluation must be provided to WVU. The applicant is responsible for payment of fees for this service.
7. Provide official transcripts from all schools attended in the original language of issue.

If granted an interview, applicants must present to the school for personal interview with the admissions committee. Applicants who are invited for an interview must complete the secondary (institution) application for admission and submit the associated fees. The transcripts of international dental graduates who are approved for an interview will be evaluated by the WVU Office of Admission, International unit. West Virginia residents will be given priority consideration.

**Promotion**

At the end of each grading period (i.e., each academic semester or summer session) all students will have their individual progress reviewed by the Academic and Professional Standards Committee convened for their class. The progress of each student in the curriculum is governed by minimum acceptable performance standards upon which the committee bases its decisions.

The standards consist of three categories: scholastic performance, clinic performance and utilization, and professional development. Scholastic performance requires that each student must earn a specified grade point average to be promoted to the succeeding year. Clinic performance and utilization requires that each student must utilize a specified percentage of available clinic time to demonstrate steady progress toward attainment of clinical competency. Professional development is an important component of the study of dentistry. The criteria for determining this development are based on the student's personal behavior and patient management skills.

These performance standards are explained in detail in the document entitled WVU School of Dentistry Academic and Professional Standards. All first-year students are presented this document prior to entering school and are required to acknowledge by their signature that they have read and accepted the conditions set by the material contained therein. At the completion of each academic term, following the Committee on Academic and Professional Standards meetings, the status of each student is reported to the dean. The committee may decide that a student be promoted unconditionally, be promoted on probation, be allowed to make up deficiencies, be given the opportunity to repeat the year, or be suspended or dismissed from further studies in the School of Dentistry. Final disposition in each case is the prerogative of the Dean of the School of Dentistry.

**Degree Requirements**

Candidates for graduation are recommended by the faculty of the School of Dentistry to the Board of Governors for approval and for the conferring of the degree of Doctor of Dental Surgery (D.D.S.), provided they fully meet the following conditions:

- Shall have been a full-time student in regular attendance in the School of Dentistry for the academic period prescribed for each student.
- Shall have completed the prescribed curriculum for each of the academic sessions.
- Shall have shown good moral character and shall have demonstrated a sense of professional responsibility in the performance of all assignments as a student.
- Shall have met in full all financial obligations to the University.
In view of public and professional responsibilities, the faculty of each of the professional schools of WVU has the authority to recommend to the president of the University the removal of any student from its rolls whenever, by formal decision reduced to writing, the faculty finds that the student is unfit to meet the qualifications and responsibilities of the profession.

Major Learning Goals

DOCTOR OF DENTAL SURGERY

The ultimate benefits of Competencies for the Graduating Dentist will be a more efficient and rational curriculum that is responsive to the educational mission of the School of Dentistry.

The twenty-five major competencies are divided into seven categories of thought, behavior or knowledge. Each major competency is furthered by course objectives the sum total of which, when accomplished by the student, enable acquisition of the competency. Assessment of the acquisition of each competence will occur in many ways that are appropriate to the subject matter.

I. Scientific and Critical Thinking

1. Scientific Process: The graduating dentist must acquire, critically evaluate and assimilate scientific information necessary for the evaluation, diagnosis, treatment, management and prevention of oral health problems.

II. Patient Evaluation

2. Examination of the Patient: The graduating dentist must be able to perform an examination that collects the medical, physical, psychological and social information needed to evaluate the systemic and oral condition(s) of patients of all ages (infant through older adult) or with special needs (including, but not limited to, persons with developmental disabilities, complex medical problems and physical limitations) and manage behavioral factors which affect oral health and use the information to implement strategies that facilitate the delivery of oral health care.

III. Diagnosis

3. Diagnosis: The graduating dentist must be able to determine a differential, provisional or definitive diagnosis for patients of all ages by interpreting and correlating findings from the history, clinical and radiographic examination and other diagnostic tests.

IV. Treatment Planning

4. Treatment Planning: The graduating dentist must be able to develop, present, and discuss individual treatment plans for patients of all ages consistent with the patient's condition, interest, goals and capabilities.

V. Patient Treatment and Management (for Patients in all Stages of Life)
5. Prevention of Disease and Maintenance of Health: The graduating dentist must be able to provide evidence-based interprofessional care for patients of all ages that emphasizes prevention of oral diseases and supports the maintenance of existing systemic and oral health.

6. Tobacco Cessation: The graduating dentist must be able to provide evidence-based tobacco cessation strategies.

7. Diversity Awareness: The graduating dentist must be able to discuss cultural factors that impact oral health and provide culturally-sensitive care to persons with varying individual characteristics and backgrounds.

8. Control of Pain and Anxiety: The graduating dentist must be able to employ techniques to manage orofacial discomfort and psychological distress.

9. Caries Management: The graduating dentist must be able to treat and manage caries in the primary, mixed and permanent dentitions.

10. Endodontic Therapy: The graduating dentist must be able to treat diseases of pulpal and periradicular origin in the primary, mixed and permanent dentitions.

11. Periodontal Therapy: The graduating dentist must be able to treat and manage periodontal disease in the primary, mixed, permanent and implant dentitions utilizing a non-surgical approach.

12. Surgical Therapy: The graduating dentist must be able to recognize, evaluate, treat and/or manage conditions requiring surgical procedures on the hard and soft tissues in patients of all ages.

13. Emergency Situations: The graduating dentist must be able to prevent and manage dental and medical emergency situations encountered in the practice of general dentistry.

14. Occlusal/TMD Therapy: The graduating dentist must be able to manage functional disorders of occlusal or non-occlusal origins.

15. Orthodontic Therapy: The graduating dentist must be able to manage developmental or acquired abnormalities in esthetics or occlusion.

16. Stomatology: The graduating dentist must be able to manage limited or common non-life threatening oral mucosal diseases or disorders.

17. Restorative/Prosthodontic Therapy: The graduating dentist must be able to convey laboratory instructions and provide restorations and prostheses that are correct in anatomical form, comfortable and functionally effective, and which satisfy the esthetic requirements of the patient or legal guardian.

18. Implant Therapy: The graduating dentist must be able to assess, diagnose, treatment plan and treat patients requiring single tooth posterior implant-supported restorations and mandibular implant-supported overdentures.

19. Assessment of Patient Treatment: The graduating dentist must be able to determine the prognosis for proposed patient care, evaluate the initial results of the care and determine appropriate periodic maintenance.

VI. Disease Prevention and Health Promotion

20. Community Engagement: The graduating dentist must be able to assume a leadership role in improving the oral health of individuals of all ages, families and groups in the community by planning, implementing and evaluating programs to eliminate oral health disparities through a dynamic, evidence-based and interprofessional approach to wellness.

VII. Practice Dynamics

21. Ethics: The graduating dentist must be able to discern and manage the ethicolegal issues of dental practice.

22. Dental Informatics: The graduating dentist must be able to utilize or appreciate office computerization, different forms of digital imaging and electronic communication and information retrieval for patient care, practice management, research and professional development.

23. Professional Practice: The graduating dentist must possess the skills to transition from dental school to various practice settings.

24. Scope of Practice: The graduating dentist must be able to know the limit of one’s competence and when to make referrals to colleagues.

25. Dental Sleep Medicine: The graduating dentist must recognize and refer patients at high risk for sleep disorders and prescribe and manage oral appliances, as a member of the sleep medicine team.

Endodontics

Degree Offered

- Master of Science
General Information

The School of Dentistry and the Department of Endodontics offer a program of advanced study and clinical training leading to the degree of Master of Science. The program requires a minimum of thirty months of full-time residency in the School of Dentistry. It is designed to qualify dentists for careers in endodontic clinical practice, teaching, and research.

A stipend plus tuition waiver will be provided for graduate students in Endodontics during spring semester of year two, and summer session and fall semester of year three. Special fees are not covered by the tuition waiver. You must pay these each term/semester.

Inquiries concerning this program should be directed to the Office of Dental Admissions and Recruitment. Applications will be processed by the School of Dentistry. Applicants approved for admission to the program will be notified soon after interviews are completed.

This program is accredited by the Commission on Dental Accreditation of the American Dental Association. For details about the faculty, publications, and alumni information, please visit the Department website at http://dentistry.hsc.wvu.edu/education/programs/graduate-programs/endodontics/.

Program Goals

- Provide the education and training necessary for graduate dentists to practice in the specialty of Endodontics.
- Provide the basis for a specialist in Endodontics to achieve Board Certification in Endodontics.

Graduate Courses

**Advanced Oral Surgery**: Advanced study of therapeutics, hospital protocol, and surgical aspects of oral surgery involving lectures, seminars, demonstrations, and clinical applications.

**Advanced Topics**: Biomedical Sciences Module Series: The Biomedical Sciences Module series has been designed as an online course for students enrolled in the advanced education programs in the WVU School of Dentistry. Three modules currently exist. They include pharmacology, anatomy/histology/embryology, and microbiology/immunology/genetics.

The content of these modules focuses on the clinical application of each of the biomedical sciences to dentistry. Cases will be used to integrate theory and practice. Students will attend a virtual classroom by viewing online lectures, reading prescribed materials, and interacting with faculty and classmates through an online discussion forum.

**Advanced Topics**: Investigation of advanced topics not covered in regularly scheduled courses.

**Applied Biostatistics for Health**: Statistical models, distributions, probability, random variables, tests of hypotheses, confident intervals, regression, correlation, transformations, F and Chi-square distributions, analysis of variance and multiple comparisons.

**Clinical Endodontics**: Graduate of an accredited dental school and admission to the Advanced Education Program in Endodontics or consent. Clinical endodontic practice in the areas of: ordinary endodontic cases, complex endodontic cases, hemisection, root amputation, replantation, transplantation, endodontic implantation, vital pulp therapy, apexification, and bleaching.

**Endodontic Theory**: Provides seminar discussions in the topics of: basic endodontic techniques, advanced endodontic techniques, endodontic literature review, case presentation, and advanced endodontic theory.

**Research**: Research activities leading to a thesis, problem report, research paper, or equivalent scholarly project.

**Special Studies in Oral Pathology**: Advanced study of local or systemic disease processes affecting oral structures through seminars.

**Teaching Practicum**: Supervised practice in college teaching of dentistry.

FACULTY

ASSISTANT PROFESSORS

- Marvin L. Speer - DDS, MS, FACD
  Graduate Program Director
- Keith L. Hildebrand - DDS, MS
  Department Chair

Admission Requirements

The program’s requirements are as follows:

- Must have passed the National Dental Board Examination - Part 1 at the time of application and Part 2 upon entrance to the program.
- Must have earned a D.M.D. or D.D.S. degree, or equivalent.
• Must be proficient in the English language and report most recent TOEFL score (if foreign applicant).
• Must display evidence of scholastic and clinical achievement that would indicate the applicant’s ability to progress in a program of this nature. A minimum grade-point average of 3.0 is required.
• Must apply to the program through the Postdoctoral Application Support Service (PASS) http://www.adea.org/ and have all application materials submitted by August 1. For more detailed information, go to the School of Dentistry website (http://dentistry.hsc.wvu.edu/education/programs/graduate-programs/endodontics/).
• Must complete and submit a WVU Graduate Application.
• Must participate in an onsite interview.
• Must consent to and pass a criminal background investigation prior to final acceptance.
• Must submit documentation of all required immunizations. A complete list is available on the School of Dentistry website.
• Must become familiar with the West Virginia University School of Dentistry’s policy and procedure for Bloodborne Pathogens and Infectious Diseases.
• Must be eligible for a West Virginia dental resident permit upon entrance to the program.

Degree Requirements

• Fulfill University requirements for graduate study.
• Complete 30 months (two and a half academic years and two summer sessions) of consecutive full-time advanced study and clinical training at the School of Dentistry.
• Complete an approved master’s thesis based on original research completed during the course of study in an area related to endodontics.
• Must pass a final oral examination.
• Must successfully complete all didactic and clinical work in the required curriculum.
• Must demonstrate satisfactory clinical competency in endodontics.
• Must complete the written portion of the American Board of Endodontics examination.
• Complete a minimum of 91 credit hours, including 62 hours of endodontic courses, a minimum of 10 hours of selected basic sciences subjects, 8 hours teaching practicum, and a thesis (11 hours).
• Achieve a 3.0 GPA or an overall competence in the student’s field. A minimum grade of B must be earned in all work attempted in the master’s program. A grade of C or below in two courses will require a faculty review of the student’s progress. A third C or below will result in suspension from the program.

CURRICULUM REQUIREMENTS

Minimum GPA of 3.0 is required.
Minimum grade of B is required in all courses.

Major Learning Goals

ENDODONTICS
- Provide the educational and training necessary for graduate dentists to practice in their specialty.
- Provide the education and training necessary for a specialist to achieve Board Certification.

Orthodontics

Degree Offered
- Master of Science

General Information

The Department of Orthodontics at West Virginia University offers a 34-month (three academic years and two summers) advanced education Master of Science program. The program models a private practice atmosphere with state-of-the-art clinical facilities. The curriculum is centered on daily clinical seminars and private instruction with each individual class. Also included are regularly scheduled orthognathic surgery conferences and seminars with other dental and medical specialists.

A stipend plus tuition waiver will be provided for graduate students in Orthodontics at the end of the second year for summer session and fall/spring semesters. Special fees are not covered by the tuition waiver. You must pay special fees each term/semester.

Inquiries concerning this program should be directed to the Office of Admissions, Recruitment & Access (http://dentistry.hsc.wvu.edu/departments/administrative-offices/office-of-dental-admissions-recruitment-access). This program is accredited by the Commission on Dental Accreditation of the American Dental Association. Applications will be processed by the School of Dentistry. For details about the faculty, publications, and alumni information, please visit the Department website at Department of Orthodontics (http://dentistry.hsc.wvu.edu/departments/orthodontics).

Program Goals

The postgraduate program is designed to develop skilled practitioners who can easily transition into and manage a busy orthodontic practice. The goal of this program is to teach a variety of treatment mechanics that are scientifically valid, and let the residents make choices based on treatment needed on a case-by-case basis. Clinical experiences are diverse, including cleft lip and palate and orthognathic surgery cases.

An original master's thesis project is required and is designed to obtain results suitable for publication in a reputable dental journal. The curriculum focuses on didactic and clinical materials to prepare residents in taking the American Board of Orthodontics (ABO) Examinations. Classes pertaining to the written board are given throughout the three-year program. It is a requirement for every third year resident to take and pass the written component of the ABO, and all residents are encouraged to complete the board certification process.

Program Curriculum

The thirty-four-month Master in Science program in Orthodontics begins July 1. First-year residents begin an intensive Orthodontic Technique course on July 1 and begin seeing new patients in mid-July. In August, first year residents begin a full clinic schedule which includes morning and afternoon clinic sessions.

Didactic course work at the WVU Department of Orthodontics consists of faculty led, resident taught lectures and seminar sessions for an average of two hours each day. Seminar topics range from patient diagnosis and treatment planning to practice management and financial planning. In addition, the department maintains a relationship with many commercial orthodontic companies that regularly visit the clinic to present new products and techniques.

Clinical work simulates the private practice environment. There are two dental assistants and a patient service coordinator available in the clinic to aid residents during clinic sessions. All orthodontic records are computerized. Diagnosis and treatment planning can be completed entirely in the digital realm. Billing, scheduling, and record storage is accomplished using a commercial dental office management system. The orthodontic clinic is completely paperless to maximize clinical efficiency so residents are able to increase their number of patient experiences.
FACULTY

CHAIR
• Peter Ngan - D.M.D. (Harvard University)

ASSOCIATE PROFESSORS
• Chris A. Martin - D.D.S. (West Virginia University)
• Timothy J. Tremont - D.D.S. (University of Pittsburgh)

Admission Requirements

The program's admission requirements are as follows:

• Must have passed the National Dental Board Examination - Part I at the time of application and Part 2 upon entrance to the program.
• Must have earned a D.M.D./D.D.S. degree, or its equivalent.
• Must report most recent GRE scores.
• Must be proficient in the English language and provide a TOEFL score (if you are a foreign applicant).
• Must display evidence of scholastic and clinical achievement that would indicate the applicant’s ability to progress in a program of this nature. A
  minimum grade point average of 3.0 is required.
• Must apply to the program through the Postdoctoral Application Support Service (PASS) http://www.adea.org/ and have all application materials
  submitted by September 15.
• Must complete and submit WVU Graduate Application.
• Must have applied only to schools participating in the Match program (http://www.natmatch.com). Students applying to other programs will
  not be accepted. Applicants must also obtain a match number from National Matching Services (https://natmatch.com) and sign a form (http://
  dentistry.hsc.wvu.edu/media/1460/ortho-grad-program-match-program-application-policyapproved-112216.pdf) indicating that they are not applying
  to a nonmatched program.
• Must submit documentation of required immunizations. A complete list is available on the School of Dentistry website.
• Must participate in an onsite interview.
• All residents will be subject to a criminal background check, by fingerprinting or the most recent technology available. The resident may not begin
  their training program beyond the orientation phase until the criminal background check has been submitted.
• Must become familiar with the West Virginia University School of Dentistry's policy and procedure for Bloodborne Pathogens and Infectious
  Diseases (http://dentistry.hsc.wvu.edu/media/1380/wvu-school-of-dentistry-policy-on-dental-health-care-workers-and-patients-infected-with-
• Must be eligible for a West Virginia dental resident permit upon entrance to the program.

Degree Requirements

• Fulfill University requirements for graduate study.
• Complete 34 months (three academic years and two summer sessions) of consecutive full-time advanced study and clinical training at the School of
  Dentistry.
• Complete an approved master’s thesis based on original research completed during the course of study in an area related to Orthodontics.
• Must pass the Mock ABO clinical examination which includes a written and an oral examination.
• Must pass the written component of the ABO examination.
• Must successfully complete all didactic and clinical work in the required curriculum.
• Must demonstrate satisfactory clinical competency in orthodontics.
• Complete a minimum of 91 credit hours, including 69 hours of orthodontic courses and a minimum of 5 hours of selected basic science subjects, 6
  hours of teaching practicum, and a research/thesis (11 hours).
• Achieve a 3.0 GPA or an overall competence in the student’s field. A minimum grade of B must be earned in all work attempted in the master’s
  program. A grade of C or below in two courses will require a faculty review of the student’s progress. A third C or below will result in suspension from
  the program.

Major Learning Goals

ORTHODONTICS

• Provide the educational and training necessary for graduate dentists to practice in their specialty.
• Provide the education and training necessary for a specialist to achieve Board Certification.

Periodontics

Degree Offered

• Master of Science

General Information

The School of Dentistry and the Department of Periodontics offer a program of advanced study and clinical training leading to the degree of Master of Science. The program requires a minimum of thirty-four months (three academic years and two summers) of full-time residency in the School of Dentistry. It is designed to qualify dentists for careers in periodontic clinical practice, teaching and research.

A stipend plus tuition waiver will be provided for graduate students in Periodontics at the end of the second year for summer session and fall/spring semesters. Special fees are not covered by the tuition waiver. You must pay special fees each term/semester.

Inquiries concerning this program should be directed to the Office of Dental Admissions and Recruitment. Applications will be processed by the School of Dentistry. Applicants approved for admission to the program will be notified soon after interviews have been completed.

This program is accredited by the Commission on Dental Accreditation of the American Dental Association. For details about the faculty, publications and alumni information, please visit the Department website at http://dentistry.hsc.wvu.edu/departments/periodontics/

Program Goals

The postgraduate program is designed to train well-qualified dentists in all aspects of periodontics. The program is organized into five components: biomedical science didactics, periodontal didactics, clinical activity, research and teaching. The department philosophy is to provide comprehensive training that encompasses all aspects of periodontal and implant therapy. The program qualifies the student for examination and certification by the American Board of Periodontology.

The Master of Science degree program requires the development of an in-depth research problem which must be reported in the form of a thesis.

Program Curriculum

FIRST-YEAR PROGRAM

In the first year of the program, the resident is introduced to the specialty of periodontics, its scope and its history. The resident receives instruction in the scientific and clinical aspects of periodontics and implant dentistry.

Seminars on current and classic periodontal literature will be offered in addition to case presentations and interdisciplinary seminars. The residents will also participate in didactic courses in biostatistics and research methodology. The didactic activity will be combined with supervised patient care.

SECOND-YEAR PROGRAM

The second year of the program is a continuation of the first year of training, with increased emphasis on the clinical treatment of patients and the advanced concepts of periodontics. The resident will spend more time conducting a research study and in the development of a thesis.

THIRD-YEAR PROGRAM

Throughout the training, the resident is encouraged to be inquisitive regarding all phases of treatment and to use initiative to be resourceful. The senior resident should become a severe critic of his or her own accomplishments and be able to support clinical decisions with references from the literature. Completion of a research problem and thesis are required and the resident must successfully defend the thesis to Committee. The senior resident will be expected to present lectures and patient presentations in preparation for Board certification and future teaching responsibilities. Satisfactory completion of this year of training qualifies the resident for examination and certification by the American Board of Periodontics.
Admission Requirements

The program's admission requirements are as follows:

- Must have passed National Dental Board Examination - Part I at the time of application and Part 2 upon entrance to the program.
- Must have earned a D.M.D./D.D.S. degree, or its equivalent.
- Must be proficient in the English language or provide a recent TOEFL score (if foreign applicant).
- Must display evidence of scholastic and clinical achievement that would indicate the applicant's ability to progress in a program of this nature. A minimum grade point average of 3.0 is required.
- Must apply to the program through the Postdoctoral Application Support Service (PASS) http://www.adea.org/ and have all application materials in PASS by August 1. For more detailed information go to the School of Dentistry website (http://dentistry.hsc.wvu.edu/education/programs/graduate-programs/periodontics/)
- Applicants must also obtain a match number from National Matching Services (https://natmatch.com)
- Must complete and submit WVU Graduate Application.
- Must participate in an onsite interview.
- Must consent to and pass a criminal background investigation prior to final acceptance.
- Must submit documentation of required immunizations. A complete list is available on the School of Dentistry website.
- Must become familiar with the West Virginia School of Dentistry's policy and procedure for Bloodborne Pathogens and Infectious Diseases.
- Must be eligible for a West Virginia dental resident permit upon entrance to the program.

Degree Requirements

- Fulfill University requirements for graduate study.
- Complete 34 months (three academic years and two summer sessions) of consecutive full-time advanced study and clinical training at the School of Dentistry.
- Complete an approved master’s thesis based on original research completed during the course of study in an area related to Periodontics.
- Must pass the Mock AAP oral examination.
- Must pass the In-Service AAP written examination with a score > 60 percentile.
- Must successfully complete all didactic and clinical work in the required curriculum.
- Must demonstrate satisfactory clinical competency in periodontics.
- Complete a minimum of 93 credit hours, including 72 hours of periodontic courses and a minimum of 8 hours of selected basic science subjects, 6 hours of teaching practicum, and a research/thesis (7 hours).
- Achieve a 3.0 GPA or an overall competence in the student’s field. A minimum grade of B must be earned in all work attempted in the master’s program. A grade of C or below in two courses will require a faculty review of the student’s progress. A third C or below will result in suspension from the program.

CURRICULUM REQUIREMENTS

Minimum GPA of 3.0 is required.
Minimum grade of B- is required in all courses.

Major Learning Goals

PERIODONTICS

• Provide the education and training necessary for graduate dentists to practice in their specialty.
• Provide the education and training necessary for a specialist to achieve Board Certification.

Prosthodontics

Degree Offered

• Master of Science

General Information

The School of Dentistry and the Department of Restorative Dentistry offer a program of advanced study and clinical training leading to the degree of Master of Science. The program requires a minimum of thirty-four months (three academic years and two summers) of full-time residency in the School of Dentistry. It is designed to qualify dentists for careers in prosthodontic clinical practice, teaching, and research.

A stipend plus tuition waiver will be provided for graduate students in Prosthodontics at the end of the second year for summer session and fall/spring semesters. Special fees are not covered by the tuition waiver. You must pay special fees each term/semester.
Inquiries concerning this program should be directed to the Office of Dental Admissions and Recruitment. Applications will be processed by the School of Dentistry. Applicants approved for admission to the program will be notified soon after interviews have been completed.

This program is accredited by the Commission on Dental Accreditation of the American Dental Association. For details about the faculty, publications and alumni information, please visit the Department website at http://dentistry.hsc.wvu.edu/education/programs/graduate-programs/prosthodontics/.

Program Goals

The postgraduate program is designed to train well qualified dentists in all aspects of prosthodontics. Advanced training in prosthodontics consists of an integrated education program designed to provide both knowledge in the dentally applied basic sciences and experiences in the clinical science of prosthodontics. These include but are not limited to, complete denture prosthodontics, removable partial denture prosthodontics, fixed partial denture prosthodontics, maxillofacial prosthetics, and surgical and prosthodontics dental implantology. A series of structured didactic and clinical courses provides the student with a level of knowledge and skill development necessary to practice prosthodontics as a specialty and to prepare for a career in teaching and research. The program qualifies the student for examination and certification by the American Board of Prosthodontics.

The Master of Science degree program requires the development of an in-depth research problem which must be reported in the form of a thesis.

Program Curriculum

FIRST-YEAR PROGRAM

In the first year of the program, the resident is introduced to the specialty of prosthodontics, its scope, and its history. The resident receives instruction in the laboratory and clinical aspects of complete dentures, removable partial dentures, fixed partial dentures, maxillofacial prosthetics, implant prosthodontics, implant surgery and treatment of temporomandibular dysfunction. The resident is required to know and use the materials and techniques for fabricating oral prostheses and to become proficient in performing all phases of laboratory work related to clinical patients.

The resident will participate in seminars on specific topics in prosthodontics and on the relationship of prosthodontics to the other specialties. The resident will study biostatistics, research methodology, and select an in-depth research problem for thesis development and publication.

SECOND-YEAR PROGRAM

The second year of the program is a continuation of the first year of training, with increased emphasis on the clinical treatment of patients and the advanced concepts of prosthodontics. The resident will spend more time conducting a research study and in the development of a thesis. A topic in the field of prosthodontics will be selected and developed into a high quality table clinic for presentation at the American College of Prosthodontists annual session.

THIRD-YEAR PROGRAM

The third year of the program continues with more advanced clinical treatment and concepts of prosthodontics, including the completion of three patients to meet the current requirements for presentation to the American Board of Prosthodontics. The resident will spend a significant amount of time treating older adult patients.

Throughout the training, the resident is encouraged to be inquisitive regarding all phases of treatment and to use initiative to be resourceful. The senior resident should become a severe critic of his or her own accomplishments and be able to support clinical decisions with references from the literature. Completion of a research problem and thesis are required and the resident must successfully defend the thesis to Committee. The Senior resident will be expected to present lectures and patient presentations in preparation for Board certification and future teaching responsibilities. Satisfactory completion of this year of training qualifies the resident for examination and certification by the American Board of Prosthodontics.

FACULTY

DIRECTOR
• Bryan Dye - D.D.S
  West Virginia University

ASSISTANT DIRECTOR
• Matthew Bryington - D.M.D.
  U of Penn

PROFESSOR
• Mohssen Ghalichebaf - D.D.S.
  University of Istanbul

Admission Requirements

The program's admission requirements are as follows:
• Must have passed National Dental Board Examination - Part I at the time of application and Part 2 upon entrance to the program.
• Must have earned a D.M.D./D.D.S. degree, or its equivalent.
• Must be proficient in the English language or provide a recent TOEFL score (if foreign applicant).
• Must display evidence of scholastic and clinical achievement that would indicate the applicant’s ability to progress in a program of this nature. A minimum grade point average of 3.0 is required.
• Must apply to the program through the Postdoctoral Application Support Service (PASS) http://www.adea.org/ and have all application materials in PASS by August 1. For more detailed information go to the School of Dentistry website (http://dentistry.hsc.wvu.edu/education/programs/graduate-programs/prosthodontics/).
• Must complete and submit WVU Graduate Application.
• Must participate in an onsite interview.
• Must consent to and pass a criminal background investigation prior to final acceptance.
• Must submit documentation of required immunizations. A complete list is available on the School of Dentistry website.
• Must become familiar with the West Virginia School of Dentistry's policy and procedure for Bloodborne Pathogens and Infectious Diseases.
• Must be eligible for a West Virginia dental resident permit upon entrance to the program.

Degree Requirements

• Fulfill University requirements for graduate study.
• Complete 34 months (three academic years and two summer sessions) of consecutive full-time advanced study and clinical training at the School of Dentistry.
• Complete an approved master’s thesis based on original research completed during the course of study in an area related to Prosthodontics.
• Must pass a final oral examination.
• Must successfully complete all didactic and clinical work in the required curriculum.
• Demonstrate satisfactory clinical competency in this field.
• Complete a minimum of 87 credit hours. This includes 60 credit hours of prosthodontic courses, a minimum of 14 credit hours of selected basic science subjects, 6 hours of teaching practicum, and a research/thesis (7 hours).
• Achieve a 3.0 GPA or an overall competence in the student’s field. A minimum grade of B must be earned in all work attempted in the master's program. A grade of C or below in two courses will require a faculty review of the student's progress. A third C or below will result in suspension from the program.

CURRICULUM REQUIREMENTS

Minimum GPA of 3.0 required.
Minimum grade of B required in each course.

Total credit hours: 87

**Major Learning Goals**

**PROSTHODONTICS**

- Provide the educational and training necessary for graduate dentists to practice in their specialty.
- Provide the education and training necessary for a specialist to achieve Board Certification.
Education and Human Services

Degrees Offered

- Doctor of audiology
- Doctor of philosophy in counseling psychology
- Doctor of philosophy in education
- Doctor of education in curriculum and instruction
- Doctor of education in educational leadership studies
- Doctor of education in educational psychology
- Doctor of education in higher education administration
- Doctor of education in instructional design and technology
- Doctor of education in special education
- Master of arts in counseling
- Master of arts in education leadership/public education administration
- Master of arts in educational psychology (areas of emphasis: CDFS, program evaluation and research and educational psychology)
- Master of arts in education
- Master of arts in higher education administration
- Master of arts in instructional design and technology
- Master of arts in literacy education
- Master of arts in special education
- Master of science in rehabilitation counseling
- Master of science in speech pathology

The College of Education and Human Services, located in Allen Hall on the Evansdale campus, offers graduate-level programs of study in counseling, counseling psychology, curriculum and instruction, educational leadership, educational psychology, elementary education, literacy education, instructional design and technology, rehabilitation counseling, secondary education, special education, communication sciences and disorders and higher education administration. Thesis programs are devoted to the study and development of human talent and resources in the school, family, and community. Instruction, research, and extended service are carried out in close cooperation with related departments and units of the university. Students may also complete teaching certification-only programs in education and special education areas.

Some graduate programs require the successful completion of clinical experiences in approved sites. Clinical placements are arranged by faculty and the professional judgments of faculty are used to determine continuation of students in these placements.

Non-Degree Status

Students not admitted to or terminated from a degree program may apply for classification as a non-degree graduate student to the Assistant Dean for Student Services in the Office of Student Advising and Records of the College of Education and Human Services, P.O. Box 6122, Morgantown, WV 26506-6122. Non-degree classification allows the student to take coursework for certificate renewal, certification, or personal interest. A non-degree graduate student may accumulate unlimited graduate credit hours, but only 12 hours of graduate credit may be applied toward a degree should the student be admitted to a degree program. If the student is later admitted to a degree program, the faculty of that program will decide whether or not credit earned as a non-degree student may be applied to the degree. Under no circumstances may a non-degree student apply more than twelve hours of previously earned credit toward a degree. Course work for a graduate degree must have been taken within eight years of the student’s graduation.

Students may obtain additional information about a particular graduate program by writing to the coordinator of that program or by contacting the Center for Advising and Records, 304-293-2169.

ADMINISTRATION

DEAN
- Gypsy Denzine - Ph.D.

ASSOCIATE DEAN FOR ACADEMIC AFFAIRS
- Dale S. Niederhauser - Ph.D.

ASSOCIATE DEAN FOR RESEARCH AND GRADUATE EDUCATION
- M Cecil Smith - Ph.D.
ASSISTANT DEAN FOR STUDENT SERVICES

• Laura Porter - Ph.D.

Degree Designation Learning Goals

MASTER OF ARTS (MA) AND MASTER OF SCIENCE (MS)

The College of Education and Human Services offers graduate programs that lead to Masters and Doctoral degrees in specific fields of study and areas of professional practice. Learning goals for students in Master of Arts and Master of Science degree programs include:

• Developing depth and breadth of knowledge across the specialized body of theoretical information and applied topics
• Developing knowledge of the issues and discourses that are central to the discipline
• Learning to effectively communicate one’s knowledge about the discipline
• Learning to engage in analytical thinking to address problems in the discipline
• Engaging in collaborative activities in communities of practice with the discipline

DOCTOR OF EDUCATION (EDD) AND DOCTOR OF PHILOSOPHY (PHD)

Doctoral programs build on and extend knowledge and skills related to Masters level programs. Students in both the Doctor of Education (EdD) and Doctor of Philosophy (PhD) programs engage in structured research experiences to develop a deeper understanding of educational research as they build research skills by designing and conducting theory-driven inquiry-based studies.

DOCTOR OF AUDIOLOGY (AUD)

The Doctor of Audiology (Au.D) program has been designed to provide a firm understanding of the normal processes of hearing and communication with the academic and clinical preparation to diagnose and treat the full range of hearing disorders in all age groups. Our goal is to prepare audiologists who are competent to work in a wide variety of clinical settings, including hospitals, clinics, special treatment centers, schools, industry, and private practice. The program’s intent is to provide the knowledge and skills necessary to practice audiology autonomously in an effective, ethical manner. To this end, the following goals have been established by the Department of Speech Pathology and Audiology at West Virginia University:

1. Graduates will demonstrate mastery of knowledge and skills necessary to practice audiology in diverse settings encompassing all of the many facets of our profession.
2. Graduates will demonstrate an ability to work autonomously, using sound judgment in a competent and ethical manner.
3. Graduates will contribute to the profession and their community via active membership in professional organizations, scholarly activity, and taking the initiative in public education concerning hearing and balance disorders.
4. Graduates will be employed as audiologists serving the hearing impaired populaces, industry, and the medical community with special emphasis in underserved areas of our state.

Admission

Admission, curriculum, and specific requirements of the various degree programs of the College of Education and Human Services are provided in each program section in this catalog. It is the responsibility of the student to take steps to ensure that he or she is properly informed of the degree requirements and/or the certification standards being sought. Graduates of our state-approved preparation programs are eligible for recommendations for certification/licensure issued by appropriate state agencies. Since certification requirements are changed periodically by the state, the fulfillment of certification requirements as presented in this catalog cannot guarantee compliance with the most recent requirements. The West Virginia State Department of Education requires that a degree be from an accredited institution of higher education for licensure and salary purposes. Students are therefore encouraged to seek the counsel of members of the faculty, their advisers, and the college certification officer on matters pertaining to degree and certification requirements.

All applicants for admission to the doctoral program in the College of Education and Human Services must submit their scores on the Graduate Record Examination and/or the Miller Analogies Test, three letters of recommendation, a current vita, and a sample of long-range and short-range goals. Applicants to the college must comply with the general university graduate study regulations. Personal interviews are required by several programs. Additional information may be required by the faculty of a specific area of emphasis prior to program admission.

In this section:

• Master's Degree Programs (p. 294)
• Doctoral Degree Programs (p. 295)

Master’s Degree Programs

Master’s degree programs are offered in counseling, rehabilitation counseling, speech pathology, educational leadership studies, educational psychology, elementary education, instructional design and technology, reading, secondary education, and special education.
Three options are generally available in the college’s master’s programs; the student should refer to the specific program to determine the option that applies.

1. At least thirty semester hours of coursework, including six semester hours of research
2. At least thirty semester hours of coursework, including three semester hours of research, selected in conference with the candidate’s committee, directed by the adviser, with final approval of the committee
3. At least thirty-six semester hours of approved coursework

- The student must comply with specific graduate requirements of the university, the College of Education and Human Services, and the program.
- All students will be assigned an adviser. For options A and B, two additional faculty members will be assigned to serve as the remainder of the three-member master’s committee. For option C, only the adviser is required.
- No student may be awarded a master’s degree unless the student has a minimum grade point average of 3.0 on all work taken for the graduate degree. (A grade of less than C does not carry credit toward a graduate degree but counts in determining the grade point average.)
- No student will be permitted to repeat a required graduate course more than once.

Some programs may require the comprehensive examination in options A, B, and C above. The candidate’s committee (options A and B) or adviser (option C) will determine whether the examination will be oral or written or both. Within the first two weeks of the semester in which the student intends to take the final master’s degree examination, he or she must submit to the appropriate department chair an application to take the examination. A student must have completed a minimum of twenty-seven semester hours of approved coursework before taking the comprehensive examination. In addition, a student must have achieved a 3.0 grade point average on all work taken for graduate credit before applying to take the comprehensive examination.

**Time Limit**

All requirements must be completed within eight years immediately preceding the awarding of the degree.

**Doctoral Programs**

If you would like additional information about the graduate programs in the College of Education and Human Services, contact the chairperson of the department most relevant to your program interests. Students in the doctor of education (Ed.D.) program may elect an area of emphasis in curriculum and instruction, educational leadership studies, instructional design and technology, or special education. Specific information about doctoral studies in these emphasis areas is listed in the program description area of the catalog. Students interested in the doctor of audiology (Au.D.) and the doctor of philosophy (Ph.D.) in counseling psychology and in education will find information about those programs in separate areas of this catalog. Students in the interdisciplinary (Ph.D.) program select a focus area from one of the following major areas of study: educational leadership and policy studies, learning, instructional design and technology; or curriculum, literacy and cultural studies, and human development and family studies.

**Committee Formation**

Typically after admission to a specific program, the student, in consultation with the adviser, selects a chairperson and four committee members to serve as his or her doctoral committee. This committee must be approved by the department chair and the dean of the college. The doctoral committee must meet the following minimum standards:

- The doctoral committee must be composed of a minimum of five members, the majority of whom must be regular members of the graduate faculty.
- At least three members of the doctoral committee must be members of the graduate faculty of the College of Education and Human Services.
- The student’s major adviser must be from the student’s major program and must be a regular member of the graduate faculty. No more than two other members of the doctoral committee may be from the student’s major program area of study.
- At least two members of the doctoral committee must be from the student’s major program area of study.
- At least one member of the doctoral committee must be from the student’s minor program area of study.
- The doctoral committee must include at least one member from outside the student’s program area and that individual must have knowledge and insights relevant to the student’s program of study.
- No more than one member of the doctoral committee may be a nonmember or associate of the graduate faculty.

**Program Plan**

The final determination of the program of coursework and research is the responsibility of the student’s doctoral committee. Doctor degrees are not awarded on the basis of the completion of any set number of credits but is awarded on the basis of demonstrated academic achievement and scholarly competence. Seventy-two semester hours of relevant graduate work, excluding dissertation credit, but including credits of relevant graduate work completed at the master’s degree level, constitute the minimum coursework acceptable.

**Candidacy**

The student and the committee at the time of program planning will identify competencies to be developed and how they will be assessed. These will be stated in the student’s individual program. The doctoral student and his or her doctoral committee will determine when the student is ready for assessment of competencies. The examination will be prepared and assessed by the student’s doctoral committee and will address all work in the
doctoral program plan of the student. The student must be enrolled in the semester in which candidacy examination occurs. The chairperson will notify
the student and the student records office. Personnel in the student records office will notify all appropriate university and college offices of the outcome.
Upon successful completion of the examination, the student will formally propose the dissertation prospectus to the committee.

Prospectus

The candidate must submit and justify a prospectus for a doctoral dissertation. The doctoral committee must review and approve, approve with change,
or reject the outline or prospectus. The student must consult with all members of the committee and with other appropriate members of the university
faculty during the dissertation phase of the program.

Dissertation Defense

Upon fulfillment of the program requirements set by the doctoral committee, the student must successfully defend the dissertation. The defense will be
conducted by the students doctoral committee and the publicized meeting will be open to all members of the university faculty. If the student receives
more than one unfavorable vote from the committee, the candidate will not be recommended for the doctoral degree.

Time Limit

Doctoral students admitted to any degree program within the College of Education and Human Services are allowed a maximum period of 10 years (20
semesters, not including summer terms) – from date of admission to successful defense of the dissertation – to earn the degree. Students may have up
to five years (10 semesters, not including summer terms) to successfully complete the dissertation, post-comprehensive examinations. Exceptions to this
policy will be determined on a case-by-case basis where necessary (e.g., student leave of absence due to illness).

Because the qualifying examination attests to the academic competence of the student who is about to become an independent researcher or
practitioner, the length of time between the examination and degree must be limited. Consequently, doctoral candidates are allowed no more than
five years after the qualifying examination in which to complete remaining degree requirements. If the student should fail to complete an approved
dissertation within five years, he or she must repeat the admission to candidacy examination and any other requirements specified by the student’s
doctoral committee.

Residency

Doctoral education involves many learning experiences that take place outside the formal classroom setting. These involve observing and participating
in activities conducted by the graduate faculty, using departmental and University libraries, attending lectures presented by visiting scholars, informally
debating other students, and similar activities. To ensure that graduate students experience this kind of informal learning, doctoral programs at WVU
generally require at least two semesters in residence on campus. However, an individual student, in consultation with their graduate committee, may
propose an alternative plan by which the student can gain equivalent educational experience. This plan must be submitted in writing, approved by the
college or school dean or designee, and placed in the student’s program file.

Department of Counseling, Rehabilitation Counseling, and Counseling Psychology

Degrees Offered

- Master of arts in counseling (CACREP-Accredited)
- Master of science in clinical rehabilitation and mental health counseling (CORE-Accredited and designed to meet CACREP Standards)
- Doctor of philosophy in counseling psychology (APA-Accredited)

Department of Counseling, Rehabilitation Counseling, and Counseling Psychology offers three graduate programs. These are the master of arts
program in counseling, with specializations in clinical mental health counseling and school counseling; the master of science program in clinical
rehabilitation and mental health counseling, an e-campus program; and the Ph.D. program in counseling psychology.

The key unifying component in all of our programs is “counseling.” The American Counseling Association (ACA) defines professional counseling as
“the application of mental health, psychological, or human development principles, through cognitive, affective, behavioral or systematic intervention
strategies, that address wellness, personal growth, or career development, as well as pathology.”

These interrelated fields all hold great promise in the job market and for your life. Professionals who make their careers in these fields are dedicated to
making a difference in the lives of others. We support their learning in many ways—through classroom activities, research, and service learning.

FACULTY

CHAIR

- Jeffrey A. Daniels - Ph.D. (University of Nebraska)
  Chair, Professor, Counseling Psychology, Global Hostage-taking, Averting Lethal School Violence, Violence Prevention
ASSISTANT PROFESSORS

- John Blake - Ph.D. (University of Wisconsin-Madison)

Allen Hall, P.O. Box 6122
http://counseling.wvu.edu

DEGREE OFFERED

- Master of science
Master of Science in Clinical Rehabilitation and Mental Health Counseling

The clinical rehabilitation and mental health counselor education program in the College of Education and Human Services offers a curriculum at the master’s degree level. All students complete coursework related to disability, mental health, and rehabilitation issues as well as coursework in counseling and resource management. The clinical rehabilitation and mental health counseling program is available for both full- and part-time students in an e-campus delivery modality. It is offered through WVU Online and starts in the fall of each year. Students may work with a faculty advisor to substitute on-campus counseling courses for those offered online as part of their plan of study, on a case by case basis.

This specialty prepares professional counselors to coordinate resources and to provide assistance in employment, independent living, and personal or economic development to persons with disabilities and other individuals to achieve their personal, career, and independent living goals in the most integrated setting possible. It also prepares counselors as mental health counselors to provide services in community mental health settings and independent practice.

The objectives of the program are linked to the intent to provide: educational experiences for every student that facilitates the development of knowledge, skills, and beliefs necessary to practice as a qualified rehabilitation and mental health counselor; learning opportunities to support students’ ability to implement culturally responsive and ethically sound counseling practices, and clinical training environments that are focused on real world expectations. Graduates work in vocational rehabilitation agencies and companies, and mental health and substance abuse service agencies. The program is fully accredited by the Council on Rehabilitation Education (CORE) and is a WVU Program of Excellence. Please note that CORE is merging with the Council for Accreditation of Counseling and Related Education Programs in July 2017.

FACULTY

PROGRAM COORDINATOR

- Margaret K. Glenn - Ed.D., CRC (The George Washington University)

ASSISTANT PROFESSORS

- John Blake - Ph.D. (University of Wisconsin-Madison)
  Rehabilitation Counseling, Vocational Rehabilitation program outcome, psychosocial issues, attachment, hope
- George Mamboleo - Ph.D. (University of Arizona)
  Rehabilitation Counseling

TEACHING INSTRUCTOR

- Regina Burgess - M.S., CRC, LPC (West Virginia University)

Application

Applications for admission to the clinical rehabilitation and mental health counseling program must be made to the WVU Office of Admissions. In addition to the admission requirements of the university and the College of Education and Human Services, the program has the following admission requirements.

- A baccalaureate degree with coursework in appropriate areas
- A minimum undergraduate grade point average of 2.8 based on a 4.0 system (students with a lower grade point average and otherwise exceptional credentials may be admitted provisionally); under 2.5 GPA cannot be admitted
- GRE or MAT scores
- Three letters of reference
- Completion of the WVU Graduate School Application (http://grad.wvu.edu)
- Completion of the program’s supplemental application found on the program's website (http://counseling.wvu.edu/rehabilitation_counseling/future_students)

The initial screening decision is based upon this information as well as considering the applicant’s previous work or related experiences related to persons with disabilities, to include physical, psychological, and cognitive. Successful applications are then interviewed by program faculty members. Final decisions about admission are based on both the requirements and the interview process.

Admission

Admission to the program is a two-step procedure. Step one involves a review of credentials presented in the application materials including references, program application (relevant major; general quality of application), UGPA, and GRE scores (verbal, quantitative, and analytical writing) or the Miller’s Analogy Test (MAT) scores. Step 2 is the department interview which considers personal style relevant to working as a counselor, communication skills, capacity for empathic understanding and communication, ability to articulate professional goals, goals congruent with department focus, knowledge and understanding of rehabilitation counseling as well as an assessment of applicants’ capacity to complete the rehabilitation counseling curriculum successfully.
The application deadline for receiving completed materials is March 15.

**Major Requirements**

A minimum GPA of 3.0 is required in all courses

A grade of C- or higher is required in all courses

**Major Learning Goals**

**CLINICAL REHABILITATION AND MENTAL HEALTH COUNSELING**

The objectives of our program are linked to our mission statement. They are to provide:

- Educational experiences for every student that facilitates the development of knowledge, skills and beliefs necessary to practice as qualified clinical rehabilitation and mental health counselors in a wide variety of circumstances.
- Learning opportunities to support students’ ability to implement culturally responsive and ethically sound clinical rehabilitation and mental health counseling practices.
- Clinical training environments that are focused on real world expectations and standards of clinical practice.

**Counseling**

**Edward E. Jacobs, Ph.D., Program Coordinator**

**Allen Hall, P.O. Box 6122**

http://counseling.wvu.edu

**Degree Offered**

- Master of arts in counseling

The Department of Counseling, Rehabilitation Counseling, and Counseling Psychology of the College of Education and Human Services offers a master’s program in counseling. The counseling M.A. program is fully accredited by the Council for Accreditation of Counseling and Related Educational Programs (CACREP). Variations of the curriculum allow emphasis in school counseling and clinical mental health counseling. All applicants must comply with university, the College of Education and Human Services, and departmental requirements.

A degree in counseling provides a broad opportunity to work with children at the elementary-school level, adolescents at the secondary-school level, and all ages at the community level. The school counselor is involved in personal counseling, career guidance, vocational and educational counseling, family counseling, and consultation on classroom problems with teachers and administrators. Clinical mental health counselors work with all ages and populations in various community settings such as correctional facilities, treatment centers, mental health agencies, etc. Counselors must be equipped to work with both individuals and groups.
Students are encouraged to pursue their studies on a full-time basis; however, part-time students are accepted. Part-time admission is meant only for those who plan to take one or two courses a semester. If admitted with part-time status, students will NOT automatically be able to move into the full-time program. There are no summer practicum or internship placements.

Application

Applications for admission to the counseling program should be made to WVU's Office of Admissions. In addition to the admission requirements of the university and the College of Education and Human Services, the Department of Counseling, Rehabilitation Counseling, and Counseling Psychology has the following admission requirements:

- A baccalaureate degree with coursework in appropriate areas
- A minimum undergraduate grade point average of 2.8, based on a 4.0 system
- GRE scores: 290 preferred
- Three letters of reference
- Completed WVU Graduate School Application
- Completion of the departmental application (http://counseling.wvu.edu/counseling/future_students/admissions) to the counseling program

Admission

The West Virginia University counseling department’s admission process is a two-step procedure:

Step 1 is a review of paper credentials including references, department application (relevant major, general quality of application), work experience, GRE scores, and GPA. The initial screening decision is based upon this information. Successful applicants are then interviewed by program faculty.

Step 2 is the department interview, which considers interpersonal style relevant to working as a counselor, communication skills, capacity for empathic understanding and communication, ability to articulate professional goals, goals congruent with department focus, knowledge, understanding of counseling, and assessment of applicants' capacity to complete the counseling curriculum successfully.

Application deadline for fall admission is March 1 with review of completed applications beginning February 15. We only accept students once a year.

Major Requirements

All students who are candidates for a master’s in counseling are required to take the following core courses:

A minimum cumulative GPA of 3.0 is required

Total Hours 60

* Required for school counselor certification only. A special school counselor certificate is available for individuals without a teaching background. The program includes an additional six hours of coursework.
** Required for clinical mental health counseling students only.

In addition to completing all coursework and the practicum and internship satisfactorily, the candidate must demonstrate the ability to assume the responsibility required of a professional counselor and the personal characteristics and ethical standards essential to effective working relationships with others.

These personal characteristics are assessed throughout the entire program with special emphasis during the clinical coursework components of the program and during the field experience. Students who do not meet professional and clinical standards in these areas are provided feedback, and resources for remediation are recommended. In these cases, successful remediation is required as a prerequisite for successful program completion. Students who violate ACA ethical standards will be evaluated for possible dismissal from the program.

**Non Education Degree Students**

Students seeking a degree in school counseling who do not have an education degree must take COUN 660 and a C&I elective.

**Certification**

Certification requirements in school counseling are the same as for the master’s of arts in counseling, except as noted below:

- A minimum grade point average of 3.0
- Recommendation of the faculty
- A valid professional teaching certification is required or the completion of a six-hour block of professional education coursework (see department for list) in addition to the sixty-hour master’s degree program
- Specialization area examination (Satisfactory performance is required for certification eligibility. This examination is administered under the auspices of the State Department of Education.)

**Major Learning Goals**

**COUNSELING**

The objectives of our program in School and Clinical Mental Health Counseling are linked to our mission statement. Specifically, they are to provide:

- An environment that fosters the personal growth and development of each student.
- Educational experiences for every student that fosters individual and group counseling skill development.
- Learning opportunities to support students’ interests in diverse populations and cultures.
- Training in schools and clinical mental health settings that give students an opportunity to practice and integrate the skills learned in the classroom.

**Counseling Psychology**

G. David Allen, Ph.D., Director of Training for Counseling Psychology
Allen Hall, P.O. Box 6122
http://counseling.wvu.edu

**DEGREE OFFERED:**

- Doctor of philosophy in counseling psychology

All applicants must comply with the graduate requirements of the College of Education and Human Services and the Counseling Psychology program of study. The program includes coursework hours and training experiences in addition to the College of Education and Human Services requirements for the Ph.D. degree.

Admitted students are expected to understand and comply with the current revision of the Ethical Principles of Psychologists and Code of Conduct published by the American Psychological Association.

The aim of the doctoral program at West Virginia University is to provide trainees the means to become competent Health Service Psychologists who, upon graduation, are ready for entry-level practice in the area of Counseling Psychology. Students are expected to work closely with faculty in doing research and in supervised practicum experiences as they integrate science with practice and practice with science. Successful completion of the program requires core coursework and engagement in learning experiences designed to cultivate competence in Discipline-Specific Knowledge (i.e., affective, biological, cognitive, developmental, and social bases of behavior, history and systems of psychology, psychometrics, quantitative methods, research methods, and advanced integrative psychological science), Profession-Wide Competencies (i.e. research, ethical and legal standards, individual and cultural diversity, professional values/attitudes/behaviors, communications and interpersonal skills, assessment, intervention, supervision, consultation and inter-professional/interdisciplinary skills), and Counseling Psychology Area Specific Competencies to include understanding self as
instrument; understanding contextual and cultural influences in practice, science, teaching, supervision, and other roles; commitment to holistic strength-based development through preventative, vocational, and social justice approaches.

The Counseling Psychology program at West Virginia University is fully accredited by the American Psychological Association to offer the doctor of philosophy in this specialty area of Health Service Psychology. Our next program review is scheduled for 2017.

Accreditation is a process that reflects the commitment of the institution to self-study and external-review by one’s peers in seeking not only to meet professional standards but also to continuously seek ways in which to enhance the quality of education and training provided by the program.

For more information, please refer to The Office of Program Consultation and Accreditation, American Psychological Association, 750 First Street, NE, Washington, DC 20002-4242, phone: (202) 336-5979, fax: (202) 336-5978, e-mail: apaaccred@apa.org.

COMPETENCY BASED TRAINING

Training in Health Service Psychology in our Ph.D. program is based on the Competency Benchmarks initiative developed in conjunction with the Council of Counseling Psychology Training Programs (CCPTP) and the Council of University Directors of Clinical Psychology (CUDCP). They can be found on our website (http://counseling.wvu.edu/counseling_psychology) and in our Doctoral Student Handbook (http://counseling.wvu.edu/counseling_psychology/future_students). Seminal documents and related material can also be found on the APA website at: http://www.apa.org/ed/graduate/benchmarks-evaluation-system.aspx. All students are evaluated yearly to document their attainment of the various competencies germane to their level of training within the program.

CANDIDACY

Students are accepted for the preliminary study toward the Ph.D. degree upon admission into the program. Candidacy for the degree is the next stage in the program of study, and requires the following:

• Students must complete the prerequisite doctoral coursework with a 3.25 or better grade point average. The “Readiness for Practicum” benchmark competencies must be achieved.
• Passing scores on the written, comprehensive doctoral qualifying examination covering core Profession-Wide and Counseling Psychology Area Specific competencies. Once advanced to candidacy for the degree, students are afforded an additional five years to complete all remaining elements of the program of study leading to the Ph.D. in Counseling Psychology.

PRACTICUM TRAINING

A minimum of nine credit-hours requiring 600 on-site clock-hours, and must include at least 200 hours of direct client/patient service and 125 hours of one-to-one supervision by a licensed psychologist. Sites available to our students include the Carruth Center for Psychological and Psychiatric Services at WVU, other college counseling centers within a ninety-minute drive, Veterans Medical Centers, medical centers/hospitals, county agencies, community mental health centers, and private practice settings. All sites must be approved by the program as meeting the standards set forth in the Doctoral Counseling Psychology Handbook.

Internship

A one-year, full-time predoctoral internship is required in order to complete the program. Students are required to apply via the APPIC Match to APA-accredited programs. As part of the match policies, students must accept and attend the predoctoral internship provided by the match. These are typically out-of-state as only a few such programs exist in West Virginia and Morgantown. Students who do not match must petition for an alternative arrangement, approved at the discretion of the Counseling Psychology faculty.

As of the 2013-14 academic training-year the Counseling Psychology faculty adopted the training model recommend by the Council of Counseling Psychology Training Programs (CCPTP) that recommends the following practicum training requirements for readiness for the predoctoral psychology internship:

Trainees successfully complete at least 450 face-to-face, program-sanctioned, doctoral practicum hours of assessment/intervention that includes evidence-based practice and at least 150 hours of supervision by a licensed psychologist that includes observation of the trainee’s work. An additional aspect of readiness for internship is the submission for publication as an author or co-author of a professional manuscript, or presenting at least two papers/posters/workshops at a regional, national or international professional conference or meeting.

Admissions

• The admission process consists of two stages and the pertinent materials are evaluated on several facets. Trainees are admitted each fall only for a typical cohort size of six. December 1 is the application deadline for the following fall semester.
• In Stage I, all submitted complete applications are reviewed by the faculty. Completed applications received after December 1 deadline are not guaranteed a review for the coming year, but time permitting, the admissions committee may choose to review them prior to the final selections for interviews.
Applications are screened based on the Departmental Application, Application to the Graduate School, and academic credentials provided to the Admissions Committee, including the following:

- Completion of a master's degree in an area related to counseling psychology
- Graduate grade point average of 3.5 or higher, verified by the official transcripts of graduate coursework
- Three letters of recommendation are required that support the applicant's competency in counseling, assessment, research, and personal qualities that indicate readiness for advanced study in professional psychology.
- GRE Scores: the Educational Testing Service has provided a new set of norms for those persons taking the Graduate Records exams on or after August 1, 2011. We have revised our recommended score levels to reflect these changes. For the Verbal Reasoning section, the faculty recommends a minimum score of 153. For the Quantitative Reasoning section a minimum score of 144 is recommended. If you are reporting scores on the GRE taken prior to August 1, 2011 a combined Verbal and Quantitative score of 1,000 points is recommended. Please remember the Educational Testing Service only reports scores that are five years aged or less. If your scores are older than that, you will need to take the test again.
- Applicants reporting GRE scores less than these recommended minima may still apply, but their applications may not be competitive with others whose scores achieve the recommended levels. Students offered admission typically have scores well above these minimal, however GRE scores are not the only factor considered by the admissions committee.
- Two years of relevant work experience is desirable, not necessarily full-time.
- Stage II: Those persons whose basic preparation, references, and relevant application materials recommend them for graduate study in Health Service Psychology/Counseling Psychology are invited to campus for a personal interview with the program faculty and selected students. These typically occur in early to mid-February.

The personal interview is required for a final admission decision. The interview helps to determine the applicant's interpersonal and clinical skills, which are predictive of success in graduate study, internship, and post-degree placement. If an applicant is unable to be on campus during interview day, a phone interview may be scheduled instead. However, in-person interviews are highly recommended. Based on a review of all written materials and the interview, the faculty determines to whom admission will be offered. A waiting list of qualified applicants is usually prepared as well.

- Preliminary admissions decisions are typically made in the two weeks following interviews. Applicants invited to join the program have until April 15 to accept or decline the offer. Final admissions will occur in the next few weeks if openings remain.

THE DOCTORAL DISSERTATION

- By the end of the second year of study, the candidate must define and refine a research topic and select a doctoral dissertation chair. At that time, students must also secure an additional four members to serve on the doctoral committee whose credentials must meet specific criteria as determined by the College of Education and Human Services.
- The candidate prepares and orally presents a research prospectus that elucidates the relevant theory and scientific literature, the research design, and the quantitative or qualitative methods to be used in the study. The written prospectus must be approved by the committee prior to submitting an IRB protocol.
- Approval must be granted by the Institutional Review Board at West Virginia University to proceed with the proposed study.
- Upon completion of the research as determined by the dissertation chair, the student will present an oral defense of his or her study to the full committee and scholarly community. The committee must agree the defense is successful, and the document is ready to be submitted to the Electronic Thesis and Dissertation (ETD) office at West Virginia University. The dissertation is considered complete when the ETD office accepts the final draft approved by the committee.

PREDOCTORAL INTERNSHIP

- After admission to candidacy, students are required to enter the national psychology predoctoral internship matching program (APPIC). APPIC comprises the national database of APA-accredited and APPIC-listed internship programs and positions in the United States. The application process is lengthy and demanding both of time and resources.
- The "Readiness for Internship" benchmarks competencies must be achieved and documented on the competency benchmarks rating form, signed and attested by the candidate's advisor.
- In order to apply for internship, the student must have successfully proposed their dissertation.
- Only if a student is unsuccessful in matches across two years, or there are significant extenuating circumstances, will permission to seek an internship outside the match be granted at the faculty's discretion.
- APA-accredited/APPIC-listed internships are typically off-campus and likely to be out-of-state. They are full-time, twelve-month paid positions usually beginning and ending in August. A successful final evaluation from the internship supervisor is required to complete this element of doctoral study in professional psychology. See Internship on the program overview page for further details.

Additional specifics regarding the internship are available on the program website (http://counseling.wvu.edu/counseling_psychology).

Major Learning Goals

COUNSELING PSYCHOLOGY

The West Virginia University Doctoral Program in Counseling Psychology, in compliance with the Health Service Psychology training standards of the American Psychological Association, posits the following major learning goals:

- Students will demonstrate competency with regard to Discipline-Specific Knowledge to include affective, biological, cognitive, developmental, and social bases of behavior, history and systems of psychology, research methods, psychometrics, and advanced integrative psychological science.
- Students will demonstrate Profession-Wide Competencies in research, ethical and legal standards, individual and cultural diversity, professional values/attitudes/and behaviors, communication and interpersonal skills, assessment, intervention, supervision, consultation and inter-professional/interdisciplinary skills.
- Students will demonstrate Program-Specific Competencies in Counseling psychology to include understanding of self as instrument, understanding contextual and cultural influences in practice, science, teaching, supervision and other roles, commitment to holistic strength-based development through preventive, vocational, and social justice approaches.

Department of Curriculum and Instruction/Literacy Studies

Degrees Offered

- Master of Arts (without or with certification)
- Doctor of Education
- Doctor of Philosophy

The Department of Curriculum and Instruction/Literacy Studies is comprised of several areas including Curriculum and Instruction, Literacy Studies, Social and Cultural Foundations, Educational Leadership Studies and Higher Education. Degree programs prepare future educators and administrators
who aspire to research, develop, and implement effective leadership and innovative curricular and instructional practices for individuals ages pre-K to adult. Our programs provide opportunities for students to earn initial teacher licensure and pursue advanced degrees at the Masters and Doctoral levels. The primary focus of the Master of Arts and Doctor of Education programs in the department is to help students develop deeper knowledge, more diverse skills, an inquiry-oriented approach, and professional competencies related to the various areas in the department. Faculty in the department are recognized leaders in research, teaching, and service who are committed to providing a rigorous and engaging educational experience.

For more information, please visit our website at http://cils.wvu.edu/.

FACULTY

CHAIR

• Samuel F. Stack, Jr - Ph.D. (University of South Carolina)
  Social Foundations of Education

PROFESSORS

• Helen Hazi - Ph.D. (University of Pittsburgh)
  Educational Leadership Studies, Public Education Administration
• Dale S. Niederhauser - Ph.D. (University of Utah)
  Foundations of Education, Educational Technology; Elementary Education: Early Childhood
• James Rye - Ph.D. (Pennsylvania State University)
  Science Concept Learning; Science/Technology/Society Education, Human Nutrition and Health Education

ASSOCIATE PROFESSORS

• Johnna J. Bolyard - Ph.D. (George Mason University)
  Mathematics Education, Mathematics Teacher Development, Use of Representation in Mathematics Teaching
• Jeffrey Carver - Ed.D. (Illinois State University)
  Science Education, Organic Chemistry, Physics
• Sharon Hayes - Ph.D. (University of Florida)
  Elementary Education, Action Research, Professional Development & Literacy
• Charline J. Barnes Rowland - Ed.D. (Virginia Polytechnic Institute and State University)
  Literacy Education, Teacher Education
• Aimee L. Morewood - Ph.D. (University of Pittsburgh)
  Reading Education, Professional Development, Effective Teaching Strategies
• Allison Swan Dagen - Ph.D. (University of Pittsburgh)

• Barbara Mertins - M.S.L.S. (Syracuse University)
  Emerita

PROGRAM ADMISSION REQUIREMENTS

Master of Arts Admission
All applicants for the Elementary & Secondary Education Master of Arts program must:
• Submit WVU Graduate application for admission, found at https://admissions.wvu.edu/how-to-apply. (be sure to upload all required information)
• Hold a Bachelor’s degree with a 2.75 GPA or above
• Submit a one-page goal statement. The Statement should be of professional experiences, career ambitions and will be considered a writing sample
• Test requirements: Praxis Core Academic Skills for Educators. Student can take the combined test # 5751 this will include the 3 section (reading #5712, writing # 5722 & math #5732).
• The Praxis CORE may be waived with an enhanced ACT score of 26 or higher, a re-centered SAT score of 1125 (April 1995), or a revised SAT of 1170 (March 2005) or higher OR a 26 ACT or Math and Critical Reading SAT total of 1170 (pre-March 2016 test sitting) or an Evidence Based Reading/Writing and Math Section 1240 (post-March 2016 test sitting). (OR) Graduate Records Examination (GRE), no older than five years. Please contact department for minimum score requirements.
- TOEFL (international students) - TOEFL score must be at least 550 (paper) or 213 (computer) 79-80 iBT or IELTS 6.5.

### Elementary Education/Advance

**All applicants for the Elementary Education/Advance online (major code 4568) program must:**

- Submit WVU Graduate application for admission. The application can be found at https://admissions.wvu.edu/how-to-apply.
- Hold a Bachelor’s degree with a 2.75 GPA or above
- Attach a copy of your Teaching Certification.
- Submit a one-page goal statement. The Statement should be of professional experiences, career ambitions and will be considered a writing sample.

### Master in Literacy Studies

**All applicants for the Master in Literacy Studies (major code 4539) must:**

- Submit WVU Graduate application for admission. The application can be found at https://admissions.wvu.edu/how-to-apply
- Hold a Bachelor’s degree with a 2.75 GPA or above
- A valid state teaching license (Attached to application)

### Doctoral Admission, Ph.D.

**All applicants Interdisciplinary Ph.D. in Education, (major code 4545) must:**

- Submit the WVU Graduate application for admission, dated and received by the department by December 2. The application is found at http://graduateadmissions.wvu.edu/how-to-apply. Required information to be uploaded with the application is as follows:
- Scholarly writing samples that will be evaluated by teams of faculty members. A new writing sample may be requested if the student applies more than once.
- Three letters of recommendation, addressed to Interdisciplinary Ph.D. in Education Review Committee.
- A statement of purpose, discussing research goals and how they can be met through the Interdisciplinary Ph.D. program. We expect students to be familiar with the faculty in CEHS and how the faculty might help them achieve their research goals. Applicants must indicate their intended focus area (area of emphasis) for their Ph.D. program. Please review and add one of the following to the statement of purpose.
  - HO88 – Educational Leadership & Policy Studies
  - HO89 – Learning, Instructional Design & Technology
  - HO90 – Curriculum, Literacy & Culture Studies
  - HO95 – Human Development & Family Studies
- Achieved 3.0 GPA or above in their undergraduate degree and 3.5 or above GPA in their graduate degree.
- Completed the Graduate Records Examination (GRE) or Millers Analogy Test (MAT) within the last five years. Please contact the department for minimum score requirements
- Completed the TOEFL (international students). TOEFL scores must be at least 80 (internet version), 213 (computer-based), or 550 (paper-based) 79-80 iBT or IELTS 6.5.

Incomplete applications will not be reviewed.

A face-to-face, phone, or Internet interview may be required before students are formally admitted.

An Admissions Committee composed of faculty members will screen all applications.

### Doctoral Admission, Ed.D.

**All applicants for the Curriculum & Instruction Ed.D (major code 4515) must:**

- Comply with the requirements of West Virginia University, the College of Education and Human Services, and Curriculum and Instruction program
- Submit the WVU Graduate application for admission, found at http://graduateadmissions.wvu.edu/how-to-apply. The required information to be uploaded to the application is:
- Scholarly writing samples - writing samples will be evaluated by teams of faculty members.
- Three letters of recommendation, addressed to the Curriculum & Instruction Ed.D. Review Committee. The letters explicitly address the candidate’s potential as a doctoral student.
• Writing sample. The writing sample provides clear evidence of the student’s academic writing ability.
• Personal Vita
• Goal statement, a clear statement of professional goals, well written, and clearly indicates how the applicant’s goals fit with the program.
• Earned an undergraduate degree GPA of 3.0 or higher
• Earned a graduate degree GPA of 3.25 or higher
• Completed the Graduate Records Examination (GRE) or Millers Analogy Test (MAT) within the last five years. Please contact department for minimum score requirements.
• Completed the TOEFL if applying as an international student. The TOEFL score must be at least 79 (internet version), 213 (computer-based), or 550 (paper-based) or IELTS 6.5.

A face-to-face, phone, or Internet interview may be included in the application process before students are formally admitted.

An Admissions Committee composed of faculty members will screen all application.

Program Policies and Matriculation Benchmarks —Teaching Certification Programs

All students enrolled in Master and Certification (MAC) programs in the Department of Curriculum and Instruction/Literacy Studies must adhere to the following policies. Please consult with your adviser to discuss your program plan.

CRITERIA FOR ADMISSION TO THE M.A. PROGRAMS IN ELEMENTARY/SECONDARY EDUCATION:

• Bachelor’s degree
• GPA 2.75
• One page goal statement, describing the reason you wish to complete this program.
• Testing requirements: Passing scores on the combined Praxis Core Academic Skills for Educators: #5751 OR GRE. The tests may be waived if the student has completed another masters degree or had 26 on the ACT or 1170 on the SAT.
• TOEFL, required of International students, with the following scores: TOEFL 550 paper or 213 computer. (79-80 iBT)

MATRICULATION CRITERIA:

• Contact the Office of Student Success http://cehs.wvu.edu/advising, for a transcript analysis for content area requirements.
• A 3.0 GPA in graduate coursework, with a “C” or above in all graduate level courses are required for graduation
• C&I 602 and EDP 600 are prerequisite courses for content methods coursework.
• C&I 602 must be taken in the first or second semester after admission into the program, and completed with a “B” or better
• Provide the results of an “Online Criminal Background and Fingerprinting Check to school placement personnel. Please see the Office of Student Success http://cehs.wvu.edu/advising for more information.
• Application for transient credit for graduate courses taken at other institutions must be approved by the adviser and the associate dean for academic affairs, or designee
• Elective courses must be approved by the adviser prior to enrollment.
• All students must complete 125 hours of approved fieldwork (embedded in the program)
• All students must successfully complete a professional portfolio that demonstrates mastery of WV Professional Teaching standards and specialization content. Students submit the portfolio in C&I 680.

CRITERIA FOR ENTERING STUDENT TEACHING PLACEMENT:

• Completion of all professional education and subject content coursework is required before a student may enter a student teaching placement
• Completion and submission of Student Teaching Application 1 year before your Student teaching semester
• Hold a State Student teaching Permit
• Successful completion of the PRAXIS II in the content area in which you are student teaching. Test scores must be submitted to the Office of Student Success one full semester before the student teaching semester.
• Approval by the Certification Officer that all requirements have been met.

CERTIFICATION

Students seeking licenses to teach in the State of West Virginia must be recommended by the Certification Officer, Michael Sekula. Recommendations are provided after all the following criteria have been completed:

1. Program completion and Registrar’s verification of graduation
2. All students must submit passing scores for the appropriate Praxis PLT to the Office of Student Success prior to recommendation for certification.
3. Submission of all appropriate forms to the Certification Officer. As state certification requirements change, additional coursework may be required.

Note: State requirements for certification may change. Students are responsible for complying with all state requirements for certification at the time of their request for certification.

**Master of Arts Elementary Education with Initial Teaching Certification**

This program is available to those students who hold a bachelor’s degree in non-education fields or other education fields and choose to pursue a degree and certification in teacher education. This program is also designed for career changers, individuals who choose to change careers after several years on the job. Visit our web site http://cils.wvu.edu/mac

This program requires 36 hours of education core classes, 12 hours of clinical experience, and 45 hours of content areas courses. Students must consult with the Program Coordinator for a transcript analysis to determine the exact content requirements required.

Denise Lindstrom
denise.lindstrom@mail.wvu.edu
Allen Hall, 606B

**Secondary Education Master’s Degree Programs with Teaching Certification**

The purpose of the secondary education program is to provide rigorous experiences that prepare individuals to be highly qualified and effective teachers. Students pursuing a master of arts in secondary education with initial certification may choose one of eight content specialization areas (English, German, French, Spanish, math, science, or social studies). Teacher certification requirements are based on the West Virginia Department of Education’s Policy 5100, Approval of Educational Personnel Preparation Programs and Policy 5202, Licensure of Professional/Paraprofessional Personnel. This program requires 36 hours of education core classes, 12 hours of clinical experience, and 37-56 hours, (depending on the area) in content areas courses. Visit our web site http://cils.wvu.edu/mac. Students must consult with the Program Coordinator for a transcript analysis to determine the exact content requirements required.

Denise Lindstrom
denise.lindstrom@mail.wvu.edu
Allen Hall, 606B

**Online Masters (M.A.) in Higher Education Administration**

The master's program is designed to enhance leadership skills and prepare students for administration positions within college and university settings.

**FEATURES**

- Online graduate program with options for face-to-face courses. Visit our web site http://cils.wvu.edu/hied/masters
- Part-time or full-time enrollment options
- Courses can be taken from any geographic location
- Flexible program of study (two to eight years to complete the program)
- Advanced learning platform technologies (synchronous and asynchronous)
- Courses taught by full-time faculty and administrators

**CAREER PLACEMENT**

- Alumni have been placed in executive, administrative (business administration, academic affairs, and student affairs), and faculty support positions.
- Higher education administrators held about 161,800 jobs in 2012 and employment in this area is projected to grow 15% from 2012 to 2022, faster than the average for all occupations.
- Higher education administrators work at colleges, universities, community colleges, and technical schools.

**MAJOR OF ARTS IN HIGHER EDUCATION CURRICULUM AND TEACHING PROGRAM**

Designed for individuals who wish a master of arts degree in education focusing on teaching in higher education. This program provides flexibility, knowledge, and skills in education especially useful for international students and other students who do not wish to teach in an American public school setting. Program Coordinator Denise Lindstrom
denise.lindstrom@mail.wvu.edu
Online Advanced Master of Arts in Elementary Education Program

Designed for individuals who hold a teaching license. This program provides increased knowledge, skills, and competence for teachers working with students in elementary school settings. The program consists of 30 credit hours and is offered online through the Electronic Campus of the Southern Regional Education Board (SREC). All students pay in-state tuition rates for courses offered through the Electronic Campus regardless of residency. Visit our web site http://cils.wvu.edu/advanced-ma

Masters of Arts in Literacy Education

Designed for individuals who hold a teaching license. This 30-credit hour Master program, is nationally accredited through the Council for the Accreditation of Educator Preparation (CAEP) and International Literacy Association (ILA). This graduate program prepares candidates to be certified as Reading Specialists (Pre-K-Adult) and to fulfill the roles of specialized reading professionals currently outlined by the International Literacy Association (ILA). These roles include: Interventionist, Literacy Coach and School/Literacy Leader. Students should contact the Literacy Education Program Coordinator, Allison Swan Dagen (Allison.Swan@mail.wvu.edu). Visit our web site http://cils.wvu.edu/literacy-ed

DOCTORAL PROGRAMS

THE DOCTOR OF PHILOSOPHY WITH A MAJORITY IN EDUCATION

The Doctor of Philosophy degree program provides a rigorous course of study along with mentored research and teaching experiences to enable students to achieve core educational objectives as scholars in four specialization areas: Educational Leadership and Policy; Learning, Instructional Design and Technology; Curriculum, Literacy and Cultural Studies; Human Development and Family Studies. Several thematic contexts, critical to our state and region, provide the platform for the study of education and achieving the competencies in each specialization area. These unique themes include: the rural nature of our state context, the poverty many children and families live in throughout the region, and the cultural context of Appalachia, all as they impact education. The research interests of faculty members participating in the program address aspects of these themes. Research and scholarly experiences prepare graduates who plan to pursue a research agenda in higher education or in educational research/policy centers. Visit our web site http://cehs.wvu.edu/grad/doc/phd-education

DOCTOR OF HIGHER EDUCATION ADMINISTRATION

FEATURES:
1. Hybrid graduate program with options for online and face-to-face courses. Visit our web site http://cils.wvu.edu/hied/doc
2. Part-time or full-time enrollment options
3. Flexible program of study
4. Synchronous online courses
5. Courses taught by full-time faculty and professors

CAREER PLACEMENT:
• Executive, administrative (business administration, academic affairs, and student affairs) and faculty support placements.
• Higher education administrators held about 161,800 jobs in 2012 and employment in this area is projected to grow 15% from 2012 to 2022, faster than the average for all occupations.
• Faculty Positions
• Policy Positions
• Higher education administrators work at colleges, universities, community colleges, and technical schools.

THE DOCTOR OF EDUCATION WITH MAJOR IN CURRICULUM & INSTRUCTION

The Curriculum and Instruction Doctorate in Education Program provides a personal approach to graduate studies. This program creates individually-planned programs of study to meet the unique experiences and professional goals of each student. Designed to meet the needs of working professionals, the program's courses are offered in the evenings. The program provides flexibility to support career goals regarding educational research, curriculum design and evaluation, instructional support, and/or leadership in K-12 schools, universities, and other educational organizations. The program addresses three broad areas:

• A major emphasis in one of the following areas: curriculum studies, social theory, teaching and learning, diversity, and technology.
• A specialization or minor in one of the following areas: content (e.g. English education, STEM education, etc.) or integrated area (i.e., diversity, technology, evaluation, research, foundations, etc.)
• Research and educational foundations core: emphasizes the centrality of research commitment and competence—the ability and eagerness to conduct research as well as the ability to read, interpret and engage in professional discourse about research.

Graduate Certificate in Principal Certification

The Department of Curriculum and Instruction/Literacy Studies offers a graduate program for those who hold an earned Master’s Degree plus three years of teaching experience. The **Principal Certification** may be obtained by students holding master’s degrees in other areas in education, such as in reading, or elementary or secondary education, without completion of a second master’s degree in educational leadership. However, students not wishing to obtain a second master’s degree must complete all courses required for principal certification as defined below:

**OTHER REQUIREMENTS:**

All candidates completing the Principal Preparation Program are required to pass the PRAXIS II (0410) Educational Leadership Administration and Supervision Test and complete the Teacher Evaluation training seminar provided by the West Virginia Center for Professional Development.

Curriculum and Instruction

**Degree Offered**

• Doctor of Education with a major in Curriculum & Instruction

The Curriculum and Instruction Doctorate in Education Program provides a personal approach to graduate studies. This program creates individually-planned programs of study to meet the unique experiences and professional goals of each student. Designed to meet the needs of working professionals, the program’s courses are offered in the evenings. The program provides flexibility to support career goals regarding educational research, curriculum design and evaluation, instructional support, and/or leadership in K-12 schools, universities, and other educational organizations. The program addresses three broad areas:

• A major emphasis in one of the following areas: curriculum studies, social theory, teaching and learning, diversity, and technology.
• A specialization or minor in one of the following areas: content (e.g. English education, STEM education, etc.) or integrated area (i.e., diversity, technology, evaluation, research, foundations, etc.)
• Research and educational foundations core: emphasizes the centrality of research commitment and competence—the ability and eagerness to conduct research as well as the ability to read, interpret and engage in professional discourse about research.

**Program Objectives:**

The Ed.D. in Curriculum and Instruction prepares students to teach in higher education or to work with school districts or other agencies and organizations where teaching and learning is emphasized. The program provides flexibility to support career goals regarding curriculum design and evaluation, instructional support, and/or leadership in K-12 schools, universities, and other learning organizations.

**Program Outline:**

When admitted to the doctoral program each student is assigned an adviser. The role of the adviser is to help the student develop a program of study and put together the initial doctoral committee. Within the first 18 hours of formal doctoral coursework the student must submit a **Doctoral Committee Form** with signatures of at least 3 members, and a **Program of Study Form** signed by all Doctoral Committee members. Upon completion of the Program of Study form, the Doctoral committee must be composed of a minimum of five members, of which three must be regular members of the graduate faculty of the College of Education and Human Services. The student’s major adviser (chairperson) must be from the major program area and must be a regular member of the graduate faculty. At least two and no more than three members of the doctoral committee must be from the major program area of study. At least one member of the doctoral committee must be from the minor program area of study. At least one member of the doctoral committee, who has professional relevance to the program of study, may be from outside of the program area. *No more than one person may be a non-member of the graduate faculty.*
Once the student has selected a committee, it is formalized by the **Doctoral Committee Approval form**, which is signed by each committee member, the major chairperson, the department chairperson, and the student. It is then submitted to the Office of Student Success where the signature of the Dean or Dean’s designee will be obtained.

The student, with the approval of the student’s major adviser, may initiate a change in committee membership, by completing a **Change of Committee form** with signatures of the member being replaced (if still available to serve), the student, the major adviser, and the new committee member. It is then submitted to the Office of Student Success where the signature of the Dean or Dean’s designee will be obtained on the form. The Office of Student Success compiles all student forms, tracks students’ progress, and checks compliance with university and college procedures.

**Doctoral Admission, Ed.D.**

All applicants must comply with the requirements of West Virginia University, the College of Education and Human Services, and curriculum and instruction program area. Prospective candidates to the Curriculum & Instruction Ed.D must:

- Submit WVU Graduate application for admission, found at [https://admissions.wvu.edu/how-to-apply](https://admissions.wvu.edu/how-to-apply). (Be sure to upload all required information)
- Submit proof of 3.0 or higher undergraduate GPA
- Submit proof of 3.25 or higher graduate GPA
- Submit scores for Graduate Records Examination (GRE) or Millers Analogy Test (MAT), no older than five years. Please contact department for minimum score requirements.
- Submit scores for TOEFL (international students). TOEFL scores must be at least 79 (internet version), 213 (computer-based), or 550 (paper-based) 79-80 iBT or IELTS 6.5.

**Required Supplemental Materials to be uploaded to the WVU application:**

- Scholarly writing samples that provide clear evidence of the student’s academic writing ability.
- Three letters of recommendation that explicitly address the student’s potential as a C&I doctorate student.
- Personal Vita
- A goal statement that provides a clear statement of professional goals, well written and clearly indicates how the applicant's goals fit with the program.

A face-to-face, phone, or Internet interview may be required before students are formally admitted.

An Admissions Committee composed of faculty members will screen all applications and materials. **Incomplete applications will not be reviewed.**

**Doctor of Education**

**MAJOR REQUIREMENTS**

A minimum cumulative GPA of 3.25 is required in all graduate coursework

RESIDENCY

This program requires two consecutive semesters of residency.

COMPREHENSIVE EXAMINATIONS

Comprehensive examinations (major, minor and core) are sometimes called “comprehensives,” “competencies,” “prelims,” or “qualifying exams.” These examinations occur when coursework has been completed or substantially completed and are intended to provide a rigorous comprehensive assessment of the student’s achievement and professional potential. The nature of the examinations must be specified in the program of study and must include written products covering the major, minor, and college core areas. The written components may be followed by an oral examination.

ADMISSION TO CANDIDACY

A student is officially admitted to candidacy for the Ed.D. by satisfactorily passing the comprehensive examinations in the major and minor areas of study and submitting the completed Admission To Candidacy form to the Center for Student Advising and Records. Doctoral candidates are allowed a period of no more than five years beyond the date of Admission to Candidacy to complete the remaining degree requirements. In the event a student fails to complete the doctorate within five years after the date of Admission to Candidacy, s(he) must apply for an extension of time. This may require repeating comprehensive examinations and/or meeting any other requirements specified by the student's committee and University.

After Admission to Candidacy, students are required to register for at least one credit hour each term (excluding summer) as a condition of their continued candidacy. Students who fail to maintain continuity of enrollment can be dropped from candidacy.

Prospectus

When a student passes his or her comprehensive exam, s(he) then forms his or her dissertation committee by adding two additional committee members for a total of five members. These new committee members should be selected based upon the degree to which they support the research focus and the line of inquiry of the student’s dissertation. The prospectus should address the first three chapters of the dissertation (or their equivalent):

- Statement of the problem and rationale
- Review of relevant literature
- Research methods and study design

Prior to completing the prospectus, the student and his or her adviser should have a clear understanding of the role each committee member will play in terms of feedback for the prospectus. Some members may need to be more involved to provide guidance and feedback as the prospectus is developed while others may be able to wait until the document is complete before providing guidance or feedback. These roles and relationships should be negotiated and clearly communicated within the committee as the student begins his or her work on the prospectus. Each committee member must receive a copy of the prospectus at least two weeks before the prospectus defense. The student should confirm whether each committee member wants a hard copy or an electronic copy of the document at that time.

The prospectus defense should be advertised no later than one week before it takes place. The announcement should include the following: Title, abstract, author, defense time and location. It should take place on campus and in a location where the public can attend. While the prospectus defense is public up to the point of committee deliberation, the adviser may exercise discretion regarding attendees if he or she feels that the necessary conditions for a supportive and productive meeting are compromised. Guests to any defense are expected to limit their explicit participation in the defense to the specified question and answer period.

Dissertation

A student’s dissertation should demonstrate coherent line of inquiry that represents a reasonable outcome given the nature and content of his or her program. Members of the dissertation committee should have adequate expertise to judge the quality of the methods, content, and results of the dissertation. If the committee lacks any element of expertise needed to judge the quality of any part of the dissertation, then the student and adviser should strive to seek out external support to support those needed elements in order to ensure the overall quality of the dissertation.

When the dissertation committee feels that the final document has met reasonable expectations in terms of quality, the student, in consultation with his or her adviser, should set up the defense meeting with his or her full committee.

Committee members are to receive copies of the dissertation at least three weeks prior to the defense. The Graduate Advising Office must also receive the Shuttle Sheet Request form signed by the committee members three weeks prior to the defense. This sheet indicates that all committee members
have received the dissertation and can attend the defense (See Shuttle Sheet Request form). The defense date, including the title, abstract, author, time and location of defense, is advertised at this time.

During the dissertation defense, the student presents an overview of his or her study, focusing on the results and analysis. Members of the committee will ask questions of the student related to the study. The dissertation chair will facilitate the question and answer portion of the defense and will determine whether time and conditions permit additional questions from guests. Deliberations regarding the dissertation defense are conducted immediately following the presentation and question and answer period. The committee members conduct these deliberations exclusively while the student and guests are not in the room. Following the deliberations, the committee shares its decision regarding the student’s performance:

- Passing the dissertation and oral defense with minor corrections
- Deferral of judgment until substantive changes are made and approved by the dissertation chair
- Failure of oral defense and/or dissertation. The student cannot pass the dissertation and oral defense if more than one member of the committee judges that either is unacceptable.

After the student has passed the oral defense and the five-member committee has approved the document, the student completes the document according to the WVU Electronic Thesis Document format (See https://etd.lib.wvu.edu/). The Dissertation Defense form must be submitted to Char Allen Inn Center for Advising and Records within 24 hours of the defense.

Each student is required to complete his or her prospectus meeting and dissertation defense within five years of being admitted to candidacy. If the student fails to meet this requirement, he or she will be removed from the doctoral program.

**Major Learning Goals**

**CURRICULUM AND INSTRUCTION**

The learning goals for the Doctor of Education program in Curriculum and Instruction are to prepare students who:

- Have commitment and skills to engage in life-long learning;
- Are effective communicators;
- Recognize that teaching is a professional, moral, and ethical enterprise with well-developed ethical frameworks which facilitate effective teaching;
- Will serve as a facilitator of learning for all students;
- Possess in-depth knowledge of both pedagogy and content, and the relationships between them;
- Are reflective practitioners;
- Are aware of, and have respect for, human diversity;
- Value and integrate knowledge from a wide variety of fields, are creative and open to new ideas, and are able to act constructively in a world characterized by technological, cultural, and societal diversity and change.

**Early Childhood Education**

**WE ARE NOT CURRENTLY ACCEPTING APPLICANTS INTO THIS PROGRAM.**

Please contact connie.miranov@mail.wvu.edu for information.

**Masters Degree Program in Early Childhood Education**

The Department of Curriculum & Instruction/Literacy Studies, Social and Cultural Foundations, Educational Leadership Studies offers opportunities for graduate study and research leading to a Master's degree in Early Childhood Education. This program is designed to prepare individuals to be well informed about Early Childhood Education. The primary purposes of the graduate program in this department is to provide increased knowledge, skills, and professional competencies related to Early Childhood Education. Students in the program will work with faculty who contribute as educational scholars to the profession at university, state, and national levels. Additionally, the program offers opportunities to explore global initiatives, culturally responsive teaching, and current educational research in Early Childhood Education.

For more information, please visit our website at http://cils.wvu.edu/.

Curriculum and Instruction/Literacy Studies, Social and Cultural Foundations, Educational Leadership Studies

Department Chair, Samuel Stack
This program is not currently accepting applications. Please contact connie.miranov@mail.wvu.edu for information.

ADMISSION REQUIREMENTS

All applicants for the Early Childhood Education program must:

• Submit WVU Graduate application for admission
• Hold a Bachelor’s degree with a 2.75 GPA or above
• Submit a one-page goal statement. The Statement should be of professional experiences, career ambitions and will be considered a writing sample.

REQUIREMENTS FOR GRADUATION:

• Completion of all coursework, with C or better in all departmental coursework
• On-line application to graduate (The Office of Student Success)
• 3.0 GPA.

Major Learning Goals

EARLY CHILDHOOD EDUCATION

The learning goals for the Master’s program in Early Childhood Education are to prepare students who:

• Have commitment and skills to engage in life-long learning;
• Are effective communicators;
• Recognize that teaching is a professional, moral, and ethical enterprise with well-developed ethical frameworks which facilitate effective teaching;
• Will serve as a facilitator of learning for all students;
• Possess in-depth knowledge of both pedagogy and content, and the relationships between them;

• Value and integrate knowledge from a wide variety of fields, are creative and open to new ideas, and are able to act constructively in a world characterized by technological, cultural, and societal diversity and change.

Education

Degree Offered

• Doctor of Philosophy with a major in Education

Nature of the Program

The Doctor of Philosophy degree program provides a rigorous course of study along with mentored research and teaching experiences to enable students to achieve core educational objectives as scholars in one of the four specialization areas: Educational Leadership and Policy; Learning, Instructional Design and Technology; Curriculum, Literacy and Cultural Studies; Human Development and Family Studies. Several thematic contexts, critical to our state and region, provide the platform for the study of education and achieving the competencies in each specialization area. These unique themes include: the rural nature of our state context, the poverty many children and families live in throughout the region, and the cultural context of Appalachia, all as they impact education. The research interests of faculty members participating in the program address aspects of these themes.
Research and scholarly experiences prepare graduates who plan to pursue a research agenda in higher education or in educational research/policy centers.

The primary objective is to prepare students who have both breadth and depth of knowledge in education and who will (a) conduct original research and (b) contribute to the production and development of knowledge in the discipline. Candidates who achieve these objectives will be well prepared to serve as members of academic communities at peer institutions of higher education, and researchers and leaders in educational research and policy centers. The educational objectives of the program are clearly connected to the mission of West Virginia University; specifically, conducting focused research and providing professional service to the state and nation based on that research.

1. Students will become conversant with the Theoretical Foundations of Education in one of the four specialization areas: Educational Leadership and Policy, Learning, Instructional Design and Technology, Curriculum, Literacy, and Cultural Studies and Human Development and Family Studies, plus the Nature of Inquiry.
2. Students will demonstrate research competencies sufficient to design, conduct, analyze, and report qualitative, quantitative, and mixed-methods research on topics of relevance to their selected specialization.
3. Students will demonstrate teaching competencies sufficient to design, deliver, monitor, and revise instruction at the undergraduate and/or graduate level on content relevant to their selected specialization.
4. Students will demonstrate intellectual competencies sufficient to deliver instruction, conduct research, and provide service at the level of a university faculty member in specializations of relevance to their selected specialization.
5. Students will propose, conduct, analyze, and write a dissertation composed of original research that makes a contribution to the literature in their selected specialization.

ADMISSION REQUIREMENTS

Applicants for the Interdisciplinary Ph.D. in Education must:

- Submit WVU Graduate application for admission, found at https://admissions.wvu.edu/how-to-apply. Applications must be dated, completed and received in the department by 12-2-2017. (Be sure to upload all required information, see below)
- Have earned at least a 3.0 undergraduate GPA and at least a 3.5 graduate GPA.
- Submit scores for the Graduate Record Examination (GRE), 300 new score (before 2011) or 1,100 (combined score of verbal and quantitative sections) or Miller Analogies test (MAT) of at least 410-416.
- International applicants must provide TOEFL scores of at least 80 (internet version), 213 (computer-based), or 550 (paper-based) or IELTS 6.5.

Note: Test scores may be no older than five years.

Required Supplemental Materials to be uploaded to the WVU application:

Applicants are required to upload the following information to their on-line graduate application. Incomplete applications will not be reviewed.

- Scholarly writing samples that demonstrate the student’s academic writing skills.
- Three letters of recommendation that clearly attest to the student’s ability to be a successful doctoral student. (Addressed to Interdisciplinary Ph.D. in Education Review Committee).
- A Statement of Purpose, discussing research goals and how they can be met through the Interdisciplinary Ph.D. program. We expect students to indicate scholarly connections with CEHS faculty and how specific faculty might help them achieve their research goals. The Interdisciplinary Ph.D. program has four specialization areas applicants must identify their specialization. The connection between the applicants interests and their specialization area should be clearly related to the statement of purpose.

FOUR SPECIALIZATION AREAS:

1. HO88 – Educational Leadership and Policy Studies
2. HO89 – Learning, Instructional Design and Technology
3. HO90 – Curriculum, Literacy and Culture Studies
4. HO95 – Human Development and Family Studies

- A face-to-face, phone, or Internet-based video interview may be required as part of the application process before students are formally admitted.

* Elective should be related to research methodology employed for dissertation. This may require that the specific course not be specified on program of study, but rather identified during prospectus development.

**Admission to Candidacy and Dissertation Requirements**

**Program Features**

The Doctor of Philosophy degree program provides a rigorous course of study along with mentored research and teaching experiences to enable students to achieve core educational objectives as scholars in four specialization areas, as described below. Several thematic contexts, critical to our state and region, provide the platform for the study of education and achieving the competencies in each area. These unique themes include: the rural nature of our state context, the poverty many children and families live in throughout the region, and the cultural context of Appalachia, all as they impact education. The research interests of faculty members participating in the program address aspects of these themes.

**Mentored Research/Teaching Practica.** All students will complete a two-semester mentored research practicum [6 hours] that involves guidance from a faculty mentor who represents the student’s area of emphasis. This will result in a research document submitted for presentation and/or publication. This mentored research practicum is separate from and prior to the dissertation research project.

All students will complete a two-semester mentored teaching practicum [6 hours] that involves guidance from a faculty mentor who represents the student’s area of emphasis. This will result in an implemented and evaluated course design.

All students will attend periodic seminars designed to support their efforts and allow for discussion of those efforts with other doctoral students and faculty members mentoring those efforts throughout the Mentored Research and Mentored Teaching practica.
Candidacy and Dissertation Requirements. All students will be asked to show mastery of their area of interest by successful completion of the Candidacy Examination (preliminary comprehensive) designed by the student’s doctoral committee using guidelines developed by each area of emphasis faculty.

After students pass their comprehensive exams, they will complete a dissertation proposal/prospectus that will provide an in-depth overview of their research ideas for their dissertation. Upon approval of the dissertation proposal by (a) their doctoral committee and (b) the institutional review board, students will conduct their dissertation research. The faculty will assess the dissertation and its oral defense and will recommend approval based upon the quality of work. You have five years to complete your dissertation upon being admitted as a doctoral candidate.

Major Learning Goals

EDUCATION

The learning goals for the Doctor of Philosophy program in Education are to prepare students who:

- Have commitment and skills to engage in life-long learning;
- Are effective communicators;
- Recognize that teaching is a professional, moral, and ethical enterprise with well-developed ethical frameworks which facilitate effective teaching;
- Will serve as a facilitator of learning for all students;
- Possess in-depth knowledge of both pedagogy and content, and the relationships between them;
- Are reflective practitioners;
- Are aware of, and have respect for, human diversity;
- Value and integrate knowledge from a wide variety of fields, are creative and open to new ideas, and are able to act constructively in a world characterized by technological, cultural, and societal diversity and change.

Educational Leadership/Public School Administration

CURRENTLY NOT ACCEPTING NEW STUDENTS INTO THIS PROGRAM.

The Educational Leadership – Public Education Administration Program at West Virginia University prepares individuals for leadership positions in elementary, secondary, and post-secondary educational institutions. Although most of our students pursue administrative careers at the secondary-education level, some prepare for college or university research, teaching, and/or staff positions.

Degrees Offered

- Master of Arts (M.A.) in education leadership/public school administration
• Doctor of Education (Ed.D.) in educational leadership/public school administration

Certifications Offered
• Certification for elementary and secondary school principals
• Certification for instructional supervisors
• Certification for superintendents

FACULTY
CHAIR
• Samuel F. Stack, Jr - Ph.D. (University of South Carolina)
  Social Foundations of Education

PROFESSOR
• Helen Hazi - Ph.D. (University of Pittsburgh)
  Public Education Administration

Masters Degree Program in Elementary Education
The Department of Curriculum & Instruction/Literacy Studies, Social and Cultural Foundations, Educational Leadership Studies offers opportunities for graduate study, teacher certification, and research leading to a Master's degree with initial certification. This program is designed to prepare individuals to become educators in the classroom. The primary purposes of the graduate programs in this department are to provide increased knowledge, skills, and professional competencies for licenses related to each specialty area in the department (listed below). Each program has met national accreditation standards. Students in the programs will work with faculty who contribute as educational scholars to the profession at university, state, and national levels. Additionally, the programs offer opportunities to develop technology rich, culturally responsive, and active learning environments that associated with greater student achievement.

For more information, please visit our website at http://cils.wvu.edu/.

Admission Requirements

All applicants for the Elementary Education must:

• Submit WVU Graduate application for admission. The application can be found at https://admissions.wvu.edu/how-to-apply
• Hold a Bachelor’s degree with a 2.75 GPA or above
• Submit a one-page goal statement. The Statement should be of professional experiences, career ambitions and will be considered a writing sample
• Test requirements: Praxis Core Academic Skills for Educators. Student can take the combined test # 5751 this will include the 3 section (reading #5712, writing # 5722 & math #5732).
• The Praxis CORE may be waived with an enhanced ACT score of 26 or higher, a re-centered SAT score of 1125 (April 1995), or a revised SAT of 1170 (March 2005) or higher OR a 26 ACT or Math and Critical Reading SAT total of 1170 (pre-March 2016 test sitting) or an Evidence Based Reading/Writing and Math Section 1240 (post-March 2016 test sitting). (OR) Graduate Records Examination (GRE), minimum score 280 (combined score of verbal and quantitative sections) .
• TOEFL (international students) - TOEFL score must be at least 550 (paper) or 213 (computer) 79-80 iBT or IELTS 6.5.

PROGRAM REQUIREMENTS

• C&I 602 must be taken in the first semester after admission into the program. "B" or better is required in C&I 602.
• All student in the “Elementary Education Program”, must purchase a subscription for LiveText.
• State back ground check is required before entering a public school classroom (student teaching permit)
• 3.0 GPA in graduate coursework with "C" or better in all graduate courses.
• No more than twelve hours at a 400-level plus student teaching may count toward a thirty-six hour master’s degree.
• Application for transient credit for graduate courses taken at other institutions must be approved by the adviser and the Assistant Dean for Student Services.
• Student teaching application must be completed 1 year in advance. Student teaching application are available in the Office of Student Success (Allen Hall room 710) or http://cehs.wvu.edu/advising
• Elective courses must be approved by the adviser prior to enrollment.
• Passing scores on the Praxis II in content area, due one full semester before student teaching.
• edTPA completed during the student teaching semester. Successful completion of this assessment is required prior to applying for a WV teaching license and for WVU program completion.
• Completion of 125 hours of field experiences (embedded in the program).

REQUIREMENTS FOR GRADUATION:

• Completion of all coursework, with C or better in all graduate coursework
• On-line application to graduate (Contact the Office of Student Success for additional information) http://cehs.wvu.edu/advising (http://cehs.wvu.edu/advising)
• 3.0 GPA.

Major Learning Goals

ELEMENTARY EDUCATION

The learning goals for the Master's program in Elementary Education are to prepare students who:

• Have commitment and skills to engage in life-long learning;
• Are effective communicators;
• Recognize that teaching is a professional, moral, and ethical enterprise with well-developed ethical frameworks which facilitate effective teaching;
• Will serve as a facilitator of learning for all students;
• Possess in-depth knowledge of both pedagogy and content, and the relationships between them;
• Are reflective practitioners;
• Are aware of, and have respect for, human diversity;
• Value and integrate knowledge from a wide variety of fields, are creative and open to new ideas, and are able to act constructively in a world characterized by technological, cultural, and societal diversity and change.

Elementary Education/Advanced

Degree Offered

• Master of Arts with a major in Elementary Education/Advanced

The Department of Curriculum & Instruction/Literacy Studies, Social and Cultural Foundations, and Educational Leadership Studies offers a Masters of Arts program in Elementary Education/Advanced that is designed for individuals currently holding a teaching license in elementary education, but who desire to earn a Master's degree. This program provides increased knowledge, skill, and competence for teachers working with children in elementary
school settings. The program consists of 30 credit hours and is offered online through the Electronic Campus of the Southern Regional Education Board (SREC). All students pay in-state tuition rates for courses offered through the Electronic Campus regardless of residency. This degree leads to a Master of Arts only and will NOT lead to teaching certification.

Students will complete thirty hours of online coursework that is designed to broaden their professional knowledge and teaching skills. All student in the “Elementary Education/Advanced Program”, must purchase a subscription for LiveText. Courses in this program require students to submit class assignments and final portfolio into LiveText.

ADMISSION REQUIREMENTS

All applicants for the Elementary Education/Advance online program must:

• Submit WVU Graduate application for admission. The application can be found at https://admissions.wvu.edu/how-to-apply.
• Hold a Bachelor’s degree with a 2.75 GPA or above
• Attach a copy of your Teaching Certification.
• Submit a one-page goal statement. The Statement should be of professional experiences, career ambitions and will be considered a writing sample.

PROGRAM REQUIREMENTS:

All students in the Elementary Education/Advanced Program, must purchase a subscription for LiveText. Students submit class assignments and their final portfolio to LiveText. Please contact your adviser for information.

REQUIREMENTS FOR GRADUATION:

• Completion of all coursework, with C or better in all graduate coursework
• On-line application to graduate (Contact The Office of Student Success for additional information)
• 3.0 GPA.

Major Learning Goals

**ELEMENTARY EDUCATION/ADVANCED**

The learning goals for this program are to prepare students who:

- Have commitment and skills to engage in life-long learning;
- Are effective communicators;
- Recognize that teaching is a professional, moral, and ethical enterprise with well-developed ethical frameworks which facilitate effective teaching;
- Will serve as a facilitator of learning for all students;
- Possess in-depth knowledge of both pedagogy and content, and the relationships between them;
- Are reflective practitioners;
- Are aware of, and have respect for, human diversity;
- Value and integrate knowledge from a wide variety of fields, are creative and open to new ideas, and are able to act constructively in a world characterized by technological, cultural, and societal diversity and change.

**Elementary Education/MDS**

**Degree Offered**

- Master of Arts with a major in Elementary Education/MDS

**Five-Year Teacher Education Program Purposes and Goals**

The goals of the WVU Five-Year Teacher Education Program describe the qualifications that represent the end result of teacher preparation. Graduates of the Five-Year Teacher Education Program should have these qualifications:

- Possess a commitment to, and the skills for, life-long learning
- Be effective communicators
- Recognize that teaching is a professional, moral, and ethical enterprise with well-developed ethical frameworks which facilitate effective teaching
- Be a facilitator of learning for all students
- Possess in-depth knowledge of both pedagogy and content, as well as an integrated understanding of these two important knowledge areas
- Be reflective practitioners who can thoughtfully apply knowledge and experience to practice and critically examine choices
- Be aware of, and have respect for, human diversity
- Be liberally educated: value and integrate knowledge from a wide variety of fields, be creative and open to new ideas, and be able to act constructively in a world characterized by technological, cultural, and societal diversity and change.

The Five-Year Teacher Education Program is a five-year program culminating in two degrees which are awarded simultaneously: a Baccalaureate degree in the content area and a Master’s degree in Education. The program meets standards for teacher licensure in West Virginia*.

*Program requirements are subject to change based upon West Virginia State Department of Education and accreditation agency policies.

Five-Year Teacher Education Program for Elementary Education/MDS
All students in the Five-Year Teacher Education Program in Elementary Education prepare to teach multiple subjects in grades K–6. Students may choose to also complete one of the following specialization areas:

- French (Grades 5–9)
- General Science (Grades 5–9)
- English (Grades 5–9)
- Mathematics (Grades 5–9)
- Social Studies (Grades 5–9)
- Spanish (Grades 5–9)

-or-

- Special education, multi-categorical
- Pre-Kindergarten and Kindergarten

Year 5 Interns:

Having successfully completed semester 8, students are then recommended to be officially accepted into the graduate year prior to being enrolled in semesters 9 and 10 of the Five-Year Teacher Education Program. Upon entrance to semester 9 as a graduate student, students are referred to as Interns. Students will receive notification of acceptance in a letter from the Five-Year Teacher Program Office.

**Note:** Interns are restricted from ALL graduate and or resident assistantships during the semester in which they complete their practical experience (semester 9 / student teaching). No work responsibilities may interfere with the Interns’ commitment to meeting the program requirements.

**Admission**

**Admission into the graduate year (year 5 of the Five-year program)**

Having successfully completed semester 8, students are then recommended to be officially accepted into the graduate year prior to being enrolled in semesters 9 and 10 of the Five-Year Teacher Education Program. Upon entrance to semester 9 as a graduate student, students are referred to as Interns. Students will receive notification of acceptance in a letter from the Five-Year Teacher Program Office.

Criteria for successful admission into the graduate year are documented in the year 4 portfolio, including:

- demonstrated competency in clinical placement(s)
- earned a minimum GPA of 2.75 with “C” or better in all professional education courses
- passed all Praxis II content specialization test(s)
- completed a minimum of 128 undergraduate hours
- completed all five-year undergraduate program course work

**Note:** In the event that a pre-service teacher does not complete the aforementioned requirements by the established deadline of May 15 of year 4, s/he must submit a “program interruption form” to request a one-year program interruption to address the deficiencies that prompted the interruption. In the event that the deficiencies are fulfilled by July 31 of that same year, the student may submit a written appeal to be reinstated. (Refer to Program Student Handbook for details, “Milestone Two”)

**Master of Arts**

**Year 5 Interns:**

Having successfully completed the first four years of their studies to meet requirements of the Five-Year Teacher Education Program, Pre-Service Teacher Candidates are then recommended to be officially accepted into the graduate year. Upon entrance to semester 9 as a graduate student, Pre-Service Teacher Candidates are referred to as Interns. Students will receive notification of acceptance in a letter from the Five-Year Teacher Education Program Office.

**Note:** Interns are **not allowed** to hold graduate and or resident assistantships during their Student Teaching semester. Further, we strongly discourage students from taking on any employment during Student Teaching so they can focus all of their attention on preparing for their teaching career. No work responsibilities may interfere with the Interns’ commitment to meeting program requirements.

**Master of Arts**

Higher Education Administration

Degrees Offered

The Higher Education Administration program is designed to enhance leadership skills and prepare students for executive, administrative (business administration, academic affairs, and student affairs), academic support, and faculty positions.

• Master of Arts (M.A.) in higher education administration
• Doctor of Education (Ed.D.) in higher education administration

Online Masters (M.A.) - Higher Education Administration

The master’s program is designed to enhance leadership skills and prepare students for administration positions within college and university settings.

FEATURES

• Online graduate program with options for face-to-face courses
• Part-time or full-time enrollment options
• Courses can be taken from any geographic location
• Flexible program of study (two to eight years to complete the program)
• Advanced learning platform technologies (synchronous and asynchronous)
• Courses taught by full-time faculty and administrators
CAREER PLACEMENT

- Alumni have been placed in executive, administrative (business administration, academic affairs, and student affairs), and faculty support positions.
- Higher education administrators held about 161,800 jobs in 2012 and employment in this area is projected to grow 15% from 2012 to 2022, faster than the average for all occupations.
- Higher education administrators work at colleges, universities, community colleges, and technical schools.

DOCTOR OF EDUCATION (Ed.D.) - HIGHER EDUCATION ADMINISTRATION

FEATURES:
1. Hybrid graduate program with options for online and face-to-face courses
2. Part-time or full-time enrollment options
3. Flexible program of study
4. Synchronous online courses
5. Courses taught by full-time faculty and professors

CAREER PLACEMENT:

- Executive, administrative (business administration, academic affairs, and student affairs) and faculty support placements.
- Higher education administrators held about 161,800 jobs in 2012 and employment in this area is projected to grow 15% from 2012 to 2022, faster than the average for all occupations.
- Faculty Positions
- Policy Positions
- Higher education administrators work at colleges, universities, community colleges, and technical schools.

FACULTY

CHAIR
- Samuel F. Stack, Jr - Ph.D. (University of South Carolina)
  Social Foundations of Education

ASSISTANT PROFESSORS
- Rodney Hughes - Ph.D. (Penn State University)
  Higher Education and Economics
- Erin McHenry Sorber - Ph.D. (Pennsylvania State University)
  Educational Policy Studies, Administrative, Planning, and Social Policy
- Nathan Sorber - Ph.D. (Pennsylvania State University)
  Higher Education Administration

ADJUNCT ASSISTANT PROFESSOR
- John (Jay) Cole - Ph.D. (University of Michigan)

ADJUNCT
- Nicolas Valcik - Ph.D. (The University of Texas at Dallas)

PROFESSOR EMERITUS
- Ernest Goeres - Ph.D. (University of Iowa)

Acceptance Policy

Applicants for a master of arts degree in higher education administration (HIED) and/or Ed.D. must comply with the WVU requirements for admission to graduate studies, the requirements of the College of Education and Human Services, and those that the HIED program has specified. Admission to all programs is contingent on an assessment of complete official transcripts, including all higher education work attempted, and other evidence the faculty may deem necessary in order to judge students’ prospective success within the graduate program.

If applicants meet the minimum requirements, they may be invited to an on-campus interview. Students will receive official notification of acceptance or rejection within one month of the interview. All students accepted into the program will receive information about their assigned adviser and guidance on the development of a personalized program of study.
ADMISSION PROCEDURES - MASTER OF ARTS

Applicants are required to submit an online application, found at http://graduateadmissions.wvu.edu/how-to-apply. The Higher Education Administration Program admits students to the Master of Arts Program on a continuous basis. The following must accompany the online application:

1. Graduate Records Examination (GRE) Scores. Request that GRE scores be sent to WVU, code 5904. Test dates must be within five years of the date of application. In addition, all applicants whose native language is not English must have a minimum score of 93 on the internet-based test (IBT) TOEFL examination.

2. Personal statement, describing past work experience and goals for graduate study in higher education administration. Please upload under personal statement section to the supplemental materials page of the application.

3. Resume. Please upload your resume/vitae to the supplemental materials page of the application.

4. Complete contact information and description of professional relationship for three references. Please upload these under “other” section of the supplemental materials page. Do not submit references contacts under the “recommendations” section of the online application.

5. One Academic Writing Samples. Please upload under “other” section of the supplemental materials page.

ADMISSIONS PROCEDURE - DOCTOR OF EDUCATION (Ed.D.)

A committee of HIED faculty reviews applications to the program. Admissions materials include:

1. GRE/TOEFL: Applicants for the HIED Ed.D. need to earn 300 or better (new scoring) or 1000 or better (old scoring) on the Graduate Record Exam (GRE). In addition, students must score at the 50th percentile on the analytical writing section. International students must score a minimum of 550 on the paper version of the TOEFL or a minimum of 213 on the computer version of the TOEFL. Test scores submitted for consideration must be no more than five years old.

2. Personal resume/vita: Applicants must provide a chronological history of their education and experience in a vita. The vita should offer evidence that the applicant has appropriate professional experience that would support the goals and expectations of the program.

3. Goals statement: Each applicant must provide a clear statement of professional goals. This statement should be well written, and it should clearly indicate how the applicant’s goals fit with the program. Particular consideration will be given to goal statements that clearly demonstrate that the student has researched the program and faculty and knows how program offerings and faculty expertise meet his or her specific interests and needs.

4. Writing sample: All Ed.D. applicants must provide a writing sample with their application. The writing sample should provide clear evidence of the applicant’s writing ability as well as his or her ability to engage in research and/or scholarships.

5. Three current letters of reference: All Ed.D. applicants must provide three letters of reference that explicitly address the applicant’s potential as a doctoral student. References should know of the applicant’s academic performance and potential.

INTERVIEW: The HIED Ed.D. admissions committee may also request an interview to seek additional information in order to judge potential for success in the program.

RESIDENCY: The purpose of residency is to provide doctoral students with intellectual experiences and scholarly engagement with faculty and peers in the HIED program and the Curriculum and Instruction/Literacy Studies Department. In order to achieve residency, students must engage in meaningful work with faculty within the Department beyond their coursework. This work may include collaborative research, grant writing, team teaching, or assisting in university service. Residency plans must be negotiated with and approved by the student’s adviser in consultation with the student’s program committee. The adviser and committee must receive evidence of plan completion.

Curriculum Requirements

A minimum GPA of 3.25 is required in all major courses.
A grade of C- or higher is required in all major courses.

**Research**

Students are required to take 15 credits of research coursework, including 6 credits of graduate-level qualitative methods, 6 credits of graduate-level quantitative methods and 3 credits of additional advanced research. Courses may be taken outside CEHS as necessitated by the student in consultation with the student’s advisor. Note: With permission of advisor, students pursuing advanced quantitative methodologies may replace the second qualitative course with a fourth advanced quantitative course.

**Major Learning Goals**

**HIGHER EDUCATION ADMINISTRATION**

The learning goals for this program are to prepare students who:

- Have commitment and skills to engage in life-long learning;
- Are effective communicators;
- Recognize that teaching is a professional, moral, and ethical enterprise with well-developed ethical frameworks which facilitate effective teaching;
- Will serve as a facilitator of learning for all students;
- Possess in-depth knowledge of both pedagogy and content, and the relationships between them;
- Are reflective practitioners;
- Are aware of, and have respect for, human diversity;
- Value and integrate knowledge from a wide variety of fields, are creative and open to new ideas, and are able to act constructively in a world characterized by technological, cultural, and societal diversity and change.
Higher Education Curriculum and Teaching

Degree Offered:

- Master of Arts with a major in Higher Education Curriculum and Teaching

Students earn a Master of Arts Degree in Education with a major in Higher Education Curriculum and Teaching. This program provides knowledge and skills in curriculum development, teaching strategies, education psychology, and a general background in higher education. Electives allow students to continue to improve their knowledge of their particular content area of interest at the graduate level. The flexibility of the program lends itself to certified teachers, instructors in higher education, international students, students interested in pursuing a doctoral program, and others who are interested in teaching in higher education. This is a 30 credit hour program.

Admission Requirements

All applicants for the Higher Education Curriculum and Teaching must:

- Submit WVU Graduate application for admission. The application can be found at https://admissions.wvu.edu/how-to-apply
- Hold a Bachelor’s degree with a 2.75 GPA or above
- Submit a one-page goal statement, describing professional experiences and career ambitions. This will be considered a writing sample
- Test requirements: Praxis Core Academic Skills for Educators. Student can take the combined test # 5751 this will include the 3 section (reading #5712, writing # 5722 & math #5732).
- The Praxis CORE may be waived with an enhanced ACT score of 26 or higher, a re-centered SAT score of 1125 (April 1995), or a revised SAT of 1170 (March 2005) or higher OR a 26 ACT or Math and Critical Reading SAT total of 1170 (pre-March 2016 test sitting) or an Evidence Based Reading/Writing and Math Section 1240 (post-March 2016 test sitting). (OR) Graduate Records Examination (GRE), minimum score 280 (combined score of verbal and quantitative sections)
- TOEFL scores (required of international students) must be at least 550 (paper) or 213 (computer) 79-80 iBT or IELTS 6.5.

**Literacy Education**

**Degree Offered**

- Masters of Arts in Literacy Education (Online)

**INFORMATION**

This 30-credit Master program, housed in the Curriculum and Instruction/Literacy Studies, Social & Cultural Foundations, Educational Leadership Studies, is nationally accredited through the Council for the Accreditation of Educator Preparation (CAEP) and International Literacy Association (ILA). This graduate program prepares candidates to be certified as Reading Specialists (Pre-K-Adult) and to fulfill the roles of specialized reading professionals currently outlined by the International Literacy Association (ILA). These roles include: Interventionist, Literacy Coach and School/Literacy Leader.

**FEATURES**

- Online graduate coursework (synchronous and asynchronous)
- School based intervention practicum
- Flexible program scheduling (courses offered Fall, Spring and Summer)
- Fall, Spring and Summer Admission

**Allison Swan Dagen, Ph.D**

Program Coordinator, Literacy Education

Allison.Swan@mail.wvu.edu

**Department Chair**, Samuel F. Stack

**FACULTY**

**CHAIR**

- Samuel F. Stack, Jr - Ph.D. (University of South Carolina)
  Social Foundations of Education

**PROGRAM DIRECTOR**

- Allison Swan Dagen - Ph.D. (University of Pittsburgh)
ASSOCIATE PROFESSORS

- Aimee L. Morewood - Ph.D. (University of Pittsburgh)
- Charline Barnes Rowland - Ed.D. (Virginia Polytechnic Institute and State University)

Requirements

Professionals with successful teaching experience at the elementary, secondary, or college level may elect to enroll in these courses to increase their competencies as reading teachers, and/or literacy coaches to keep themselves informed of the latest trends and developments in reading education, or to prepare for positions of greater responsibility. Students who plan to enter the teaching field may also wish to enroll in these courses to increase their overall skills and knowledge.

Admission requirements for the Master in Literacy Studies include:

- Submit WVU Graduate application for admission. The application can be found at [https://admissions.wvu.edu/how-to-apply](https://admissions.wvu.edu/how-to-apply)
- Hold a Bachelor’s degree with a 2.75 GPA or above
- A valid state teaching license (Attached to application)
- All students in the Literacy Program must purchase a subscription for LiveText. Students submit class assignments and their final portfolio to LiveText. Please contact your adviser for information.

Master of Arts

- Students must complete six or more hours in reading within two years after admission (probationary or regular), or admission will be invalidated and the student will be required to reapply.
- The course requirements in the program lead to reading specialist certification for qualified candidates, assuming candidates meet other state certification requirements.
- Passing scores on the Praxis II in reading content area required.

MAJOR REQUIREMENTS

Minimum grade of C- is required in all coursework.
Minimum cumulative GPA of 3.0 is required.

Major Learning Goals

LITERACY EDUCATION

The M.A. program in Literacy Education aligns with the International Literacy Association’s *Standards for Reading Professionals* (2010) and prepares candidates for careers in preK to adult learning contexts. Accordingly, the specific learning goals of the program are as follows:

- Understand the theoretical and evidence-based foundations of reading and writing processes and instruction and apply this knowledge.
- Use instructional approaches, materials, and an integrated, comprehensive, balanced curriculum to support student learning in reading and writing.
- Use a variety of assessment tools and practices to plan and evaluate effective reading and writing instruction.
- Create and engage their students in literacy practices that develop awareness, understanding, respect, and valuing differences in our society.
- Create a literate environment that fosters reading and writing by integrating foundational knowledge instruction practices approaches and methods curriculum materials and the appropriate use of assessments.
- Recognize the importance of, demonstrate, and facilitate professional learning and leadership as a career long effort and responsibility.
- Serve as Reading Specialists, Reading Interventionist, and Literacy Coaches/Supervisors in underserved area of our state.
- Demonstrate professionalism by serving as leaders and advocates within professional organizations and local communities state holders.

Secondary Education

Degree Offered:

- Master of Arts with a major in Secondary Education

The Department of Curriculum and Instruction/Literacy Studies, Social and Cultural Foundations, Educational Leadership Studies offers opportunities for graduate study, teacher certification, and research leading to a Master of Arts degree and coursework and certification in a specialty area. These programs are specially designed to prepare individuals to become educators in the classroom. The primary purposes of the graduate programs in this department are to provide increased knowledge, skills, and professional competencies for licenses related to each specialty area in the department (listed below). Each program has met national accreditation standards. Students in the programs will work with faculty who contribute as educational scholars to the profession at university, state, and national levels. Additionally, the programs offer opportunities to develop technology rich, culturally responsive, and active learning environments that associated with greater student achievement.

For more information, please visit our website at http://cils.wvu.edu/.

Curriculum and Instruction/Literacy Studies, Social and Cultural Foundations, Educational Leadership Studies

Program Coordinator,
Denise Lindstrom
denise.lindstrom@mail.wvu.edu
Allen Hall, 606B

Department Chair,  Samuel F. Stack

Admission Requirements

All applicants for the Secondary Education must:

- Submit WVU Graduate application for admission. The application can be found at https://admissions.wvu.edu/how-to-apply
• Hold a Bachelor’s degree with a 2.75 GPA or above
• Submit a **one-page goal statement**. The Statement should be of professional experiences, career ambitions and will be considered a writing sample
• **Test requirements**: Praxis Core Academic Skills for Educators. Student can take the combined test # 5751 this will include the 3 section (reading #5712, writing # 5722 & math #5732).
• The Praxis CORE may be **waived** with an enhanced ACT score of 26 or higher, a re-centered SAT score of 1125 (April 1995), or a revised SAT of 1170 (March 2005) or higher OR a 26 ACT or Math and Critical Reading SAT total of 1170 (pre-March 2016 test sitting) or an Evidence Based Reading/Writing and Math Section 1240 (post-March 2016 test sitting). (OR) Graduate Records Examination (GRE), minimum score 280 (combined score of verbal and quantitative sections).
• TOEFL (international students) - TOEFL score must be at least 550 (paper) or 213 (computer) 79-80 iBT or IELTS 6.5.

**PROGRAM REQUIREMENTS**

• C&I 602 must be taken in the first semester after admission into the program. “B” or better is required in C&I 602.
• All student in the “Secondary Education Program”, **must purchase** a subscription for LiveText.
• State back ground check is required before entering a public school classroom (student teaching permit)
• 3.0 GPA in graduate coursework with “C” or better in all graduate courses
• No more than twelve hours at a 400-level plus student teaching may count toward a thirty-six hour master’s degree.
• Application for transient credit for graduate courses taken at other institutions must be approved by the adviser and the Assistant Dean for Student Services.
• Student teaching application must be completed **1 year** in advance. Student teaching application are available in the Office of Student Success (Allen Hall room 710) or http://cehs.wvu.edu/advising
• Elective courses must be approved by the adviser prior to enrollment.
• Passing scores on the Praxis II in content area, due one full semester before student teaching
• Principles of Teaching and Learning (PLT) test AND/OR edTPA completed during the final semester of the program.
• Completion of **125 hours** of field experiences (embedded in the program)

**REQUIREMENTS FOR GRADUATION:**

• Completion of all coursework, with C or better in all graduate coursework
• On-line application to graduate (Contact the Office of Student Success for additional information) http://cehs.wvu.edu/advising (http://cehs.wvu.edu/advising)
• 3.0 GPA.

Major Learning Goals

SECONDARY EDUCATION/ADVANCED

The learning goals for this program are to prepare students who:

• Have commitment and skills to engage in life-long learning;
• Are effective communicators;
• Recognize that teaching is a professional, moral, and ethical enterprise with well-developed ethical frameworks which facilitate effective teaching;
• Will serve as a facilitator of learning for all students;
• Possess in-depth knowledge of both pedagogy and content, and the relationships between them;
• Are reflective practitioners;
• Are aware of, and have respect for, human diversity;
• Value and integrate knowledge from a wide variety of fields, are creative and open to new ideas, and are able to act constructively in a world characterized by technological, cultural, and societal diversity and change.

Secondary Education/English

Degree Offered:

• Master of Arts with a major in Secondary Education/English

Five-Year Teacher Education Program

The goals of the WVU Five-Year Teacher Education Program describe the qualifications that represent the end result of teacher preparation. Graduates of the program should have these qualifications:

• Possess a commitment to, and the skills for, life-long learning
• Be effective communicators
• Recognize that teaching is a professional, moral, and ethical enterprise with well-developed ethical frameworks which facilitate effective teaching
• Be a facilitator of learning for all students
• Possess in-depth knowledge of both pedagogy and content, as well as an integrated understanding of these two important knowledge areas
• Be reflective practitioners who can thoughtfully apply knowledge and experience to practice and critically examine choices
• Be aware of, and have respect for, human diversity
• Be liberally educated: value and integrate knowledge from a wide variety of fields, be creative and open to new ideas, and be able to act constructively in a world characterized by technological, cultural, and societal diversity and change.

The teacher education program is a five-year program culminating in two degrees which are awarded simultaneously: a baccalaureate degree in the content area and a master’s degree in education. The program meets standards for teacher licensure in West Virginia.

Program requirements are subject to change based upon State Department and accreditation agency policies.

Year 5 Interns:
Having successfully completed semester 8, students are then recommended to be officially accepted into the graduate year prior to being enrolled in semesters 9 and 10 of the Five-Year Teacher Education Program. Upon entrance to semester 9 as a graduate student, students are referred to as Interns. Students will receive notification of acceptance in a letter from the Five-Year Teacher Program Office.

**Note:** Interns are restricted from **ALL** graduate and or resident assistantships during the semester in which they complete their practical experience (semester 9/student teaching). No work responsibilities may interfere with the Interns' commitment to meeting the program requirements.

### Admission Requirements

Admission into the graduate year (year 5 of the Five-year program)

Having successfully completed semester 8, students are then recommended to be officially accepted into the graduate year prior to being enrolled in semesters 9 and 10 of the Five-Year Teacher Education Program. Upon entrance to semester 9 as a graduate student, students are referred to as Interns. Students will receive notification of acceptance in a letter from the Five-Year Teacher Program Office.

Criteria for successful admission into the graduate year are documented in the year 4 portfolio, including:

- demonstrated competency in clinical placement(s)
- earned a minimum GPA of 2.75 with "C" or better in all professional education courses
- passed all Praxis II content specialization test(s)
- completed a minimum of 128 undergraduate hours
- completed all five-year undergraduate program course work

**Note:** In the event that a pre-service teacher does not complete the aforementioned requirements by the established deadline of May 15 of year 4, s/he must submit a "program interruption form" to request a one-year program interruption to address the deficiencies that prompted the interruption. In the event that the deficiencies are fulfilled by July 31 of that same year, the student may submit a written appeal to be reinstated. (Refer to Program Student Handbook for details, "Milestone Two")

• Recognize that teaching is a professional, moral, and ethical enterprise with well-developed ethical frameworks which facilitate effective teaching;
• Will serve as a facilitator of learning for all students;
• Possess in-depth knowledge of both pedagogy and content, and the relationships between them;
• Are reflective practitioners;
• Are aware of, and have respect for, human diversity;
• Value and integrate knowledge from a wide variety of fields, are creative and open to new ideas, and are able to act constructively in a world characterized by technological, cultural, and societal diversity and change.

Department of Special Education

Degrees Offered

• Master of Arts
• Doctor of Education

The graduate program leading to the M.A. in Special Education is designed to prepare teachers of infants, toddlers, children, and adults with exceptionalities or to prepare service providers in a range of disciplines who work with individuals with exceptionalities in community services programs. The graduate program leading to the Ed.D. in Education with a major in Special Education is focused on personnel preparation in special education and is designed to prepare graduates to engage in teaching, scholarship, and services as faculty members and researchers at colleges and universities.
Master’s Degree with Certification Program Options

- Autism Spectrum Disorders (autism grades K–6 and/or 5–adult)
- Early Childhood Special Education (preschool special needs grades Pre-K–K)
- Gifted Education (gifted grades 1–12)
- Low Vision/Blindness (visual impairments grades Pre-K–adult)
- Multicategorical Special Education (intellectual disabilities, learning disabilities, behavior disorders grades K–6 and/or 5–adult)
- Severe/Multiple Disabilities (severe disabilities grades K–adult)

Master’s Degree Only Program Options

- Special Education (includes area of emphasis in Applied Behavior Analysis* with other areas of emphasis coming soon)

THE MASTER’S DEGREE PROGRAMS ARE OFFERED ENTIRELY ONLINE ACROSS THE U.S. AND IN APPROVED INTERNATIONAL LOCATIONS.

Applicants interested in one of the program areas should review the detailed information provided at http://specialed.wvu.edu/ or contact sped@mail.wvu.edu for a brochure and application or an update on availability of specific courses.

NOTE: The titles of teaching certification categories may differ in other states, so prospective students should contact the state education agency to determine whether a program will qualify them for certification in that state.

Doctoral Program Option

- Personnel Preparation in Special Education

THE DOCTORAL DEGREE PROGRAM IN SPECIAL EDUCATION IS OFFERED ENTIRELY ONLINE ACROSS THE U.S.; IT IS NOT CURRENTLY AVAILABLE IN INTERNATIONAL LOCATIONS.

Applicants interested in the doctoral program should review the detailed information provided at http://cedwvu.org/education/ or contact sped@mail.wvu.edu for a brochure and application or an update on availability of specific courses.

FACULTY

CHAIR
- Barbara L. Ludlow - Ed.D. (West Virginia University)

PROFESSOR
- Barbara L. Ludlow - Ed.D. (West Virginia University)
  Severe/Multiple Disabilities, Early Intervention/Early Childhood Special Education, Personnel Preparation

ASSOCIATE PROFESSORS
- Kimberly K. Floyd - Ph.D. (Old Dominion University)
  Preschool Special Needs, Inclusive Preschools, Assistive Technology
- Michael D. Mayton - Ph.D. (Tennessee Technological University)
  Applied behavior analysis, Autism spectrum disorders, Intellectual disabilities
- Ann M. Richards - Ph.D. (University of Arizona)
  Multicategorical Special Education, Transition, Law and Policy Issues

TEACHING ASSOCIATE PROFESSOR
- Melissa B. Harley - Ph.D. (San Diego State University)
  High Incidence Disabilities, Personnel Preparation, Program Evaluation

ASSISTANT PROFESSORS
- Carla B. Brigandi - Ph.D. (University of Connecticut)
  Academic enrichment, Environmental perceptions, Creativity & creative problem solving
- Alexandra Hollo - Ph.D. (Vanderbilt University)
  High-incidence disabilities, Applied behavior analysis
- Colleen F. Wood-Fields - Ph.D. (Old Dominion University)
  Assistive technology, Evidence-based reading instruction & curriculum development for students with moderate/severe disabilities

CLINICAL ASSISTANT PROFESSOR
- Bernard C. Jones - Ed.D. (West Virginia University)
Inclusive Education, Cultural Competency, Emotional/Behavioral Disorders

PROFESSORS EMERITI
- Thomas P. Lombardi - Ph.D.
- Diane T. Woodrum - Ed.D.

ASSISTANT PROFESSOR EMERITUS
- Luise B. Savage - Ed.D.

Admission to the Master of Arts (M.A.) in Special Education Program

All individuals seeking certification and/or a degree must be admitted into the special education program. Students are admitted on a rolling basis as regular, provisional, or non-degree students as follows:

REGULAR STATUS
The individual who meets all admission requirements is granted regular status as a certification and/or degree-seeking student.

- An earned baccalaureate degree from a regionally accredited college or university with a minimum grade point average of 3.0 (regular admission)
- Passing scores on a nationally standardized test of academic ability (Praxis Core or GRE or MAT) - contact program for current minimum scores and waiver conditions
- Permission for field and clinical experiences form signed by a public school system
- Other requirements specific to each program option

OTHER REQUIREMENTS IN CERTIFICATION PROGRAMS
The individual must also meet these additional requirements:

- PRAXIS Core Academic Skills for Educators (Core) passing scores; scores may be waived in some circumstances - contact program personnel for current minimum scores
- Prior certification in education may be required in some program options - contact program personnel for current guidelines

PROVISIONAL STATUS
In some circumstances, individuals may be granted provisional status in the program if they meet ALL other admission requirements and fit into one of these categories:

- An earned baccalaureate degree from a regionally accredited college or university with a minimum grade point average of 2.75 (provisional admission);
- An earned baccalaureate degree from a regionally accredited college or university with a minimum grade point average of 2.50 IF prior successful completion of a Master’s degree in education or a closely related area with GPA of 3.25 (provisional admission);
- An earned baccalaureate degree from a regionally accredited college or university with a minimum grade point average of 2.5 IF prior successful completion of a graduate TEACHER certification program of 12 credits minimum with GPA of 3.25 (provisional admission).
- An earned baccalaureate degree from a regionally accredited college or university with a minimum grade point average of 2.5 IF prior successful completion of an undergraduate program with earned GPA of 3.00 in the final 30 credits (provisional admission).

Provisional status allows the student an opportunity to remediate deficiencies in grade point average or other requirements in order to achieve regular status. Deficiencies must be made up by the deadline set in the admission letter.

NON-DEGREE STATUS
The individual who has earned a baccalaureate degree from a regionally accredited college or university but who does not seek certification or a master’s degree may be admitted as a non-degree student. This status allows the student to take a limited number of courses for additional endorsement to the professional teaching certificate and/or for professional development and/or personal growth.

ADDITIONAL REQUIREMENTS FOR INTERNATIONAL STUDENTS
The individual who is not a native speaker of English must also meet these requirements:

- Test of English as a Foreign Language (TOEFL) score - contact program personnel for current guidelines
- Personal interview and writing sample to document fluency needed for success in courses and field experiences

NOTE: The certification and Master’s degree programs are online programs, and international students cannot obtain a visa for study in the U.S. but may participate while residing in their own home countries.
APPLICATION

All applications must comply with University, College, Department, and Program requirements. Teacher certification requirements are based on the West Virginia Department of Education’s Policy 5100 and Approval of Educational Personnel Preparation Programs and Policy 5202 Licensure of Professional/Paraprofessional Personnel

APPLICATION SUBMISSION PROCESS

Applications for admission beginning FALL semester:  DUE AUGUST 1
Applications for admission beginning SPRING semester:  DUE JANUARY 1
Applications for admission beginning SUMMER semester:  DUE MAY 1

Decisions for admission are sent as soon as all applications materials are received and processed.

Admission to the Doctoral Program (Ed.D.) in Special Education

All individuals seeking the doctoral degree emphasis in special education must be admitted into the special education program.

REGULAR STATUS

The individual who meets all of the following admission requirements is granted regular status as a degree-seeking student.

- An earned baccalaureate degree from a regionally accredited college or university with a minimum grade point average of 3.0
- An earned master’s degree from a regionally accredited college or university in special education or gifted education or disability services with a minimum grade point average of 3.25
- Prior teaching certification in some area of special education (for personnel preparation option) or in special education or disability services (for school leadership option)
- Submission of Graduate Record Examination (current version) within a five-year period - contact program for current minimum scores
- Two years of documented experience providing direct service in instruction or intervention to children or adults with exceptionalities in special education and/or gifted education and/or disability services
- Three letters of reference addressing the candidate’s past academic performance and qualities which would make the person suitable for doctoral-level study (contact program for specifications for reference letters)
- A personal goal statement illustrating a lifelong commitment to excellence in special education and/or gifted education and/or disability studies and articulating career goals focused on a faculty career
- An academic writing sample documenting knowledge of special education and/or gifted education and/or disability services and skill in organizing and expressing ideas and citing current sources in the professional literature

Applicants who meet the criteria specified above will also be required to undergo:

- A personal interview demonstrating communication and interpersonal skills
- A proctored writing sample to verify ability to express ideas with logic, clarity, and correct grammar

PROVISIONAL STATUS

Admission to the program with PROVISIONAL student status may be considered if openings are available:

--applicants who do not have a Master’s degree in Special Education but meet all other criteria may be admitted; they may need to complete additional graduate courses in special education or gifted education to enhance their knowledge and skills
--applicants who have only private school teaching experience but meet all other criteria may be admitted but may need to complete a practicum experience in a public school setting during the program

Admissions criteria are based on qualifications associated with academic success in doctoral study as well as qualifications that candidates applying for leadership positions are expected to have when seeking employment as faculty at colleges and universities. In recognition of the fact that no single criterion is an adequate predictor of satisfactory completion of a program of study or subsequent success in a professional career, faculty endorse multiple criteria for admission to this doctoral program. Requirements for admission are weighed using a +, 0, - system in judging each applicant and are considered necessary but not sufficient eligibility criteria for admission.

Applicants who meet all criteria are NOT automatically granted admission to the program. Admission is contingent upon number of applicants, number of current students, and availability of graduate faculty.

ADDITIONAL REQUIREMENTS FOR INTERNATIONAL STUDENTS

Not applicable
NOTE: The doctoral program is an online program, and international students cannot obtain a visa for study in the U.S. and the program is not currently available in international areas.

Application Submission and Review Process

Each applicant will submit all application materials and supporting documentation by the following dates:

Requests for PRIORITY admission beginning FALL semester: DUE JAN 15
Requests for LATE admission beginning FALL semester: DUE APRIL 15

Soon after the deadline, the Doctoral Admission Committee will review application files and meet to discuss applicants. Decisions will be based on applicant qualifications, program openings, and available faculty.

ALL applicants will be notified of the committee’s decision in writing by the following dates:

Decisions for PRIORITY admissions for FALL semester: SENT MARCH 1
Decisions for LATE admissions for FALL semester: SENT JUNE 1

Applied Behavior Analysis Certificate

CERTIFICATE CODE - CG38

The WVU Department of Special Education offers a graduate certificate program in Applied Behavior Analysis (ABA). The ABA course sequence is approved by the Behavior Analysis Certification Board (BACB®) as the course component for the Board Certified Behavior Analyst® (BCBA®) credential. To be eligible for the BCBA® credential, individuals must already hold a Master’s degree or complete the coursework in conjunction with a Master’s degree in an approved area: behavior analysis or other natural science (such as psychology), education (including special education, human services, health sciences, or another field related to behavior analysis approved by the Board.

To be admitted to this certificate, students must currently be already hold a master's degree or be enrolled in a graduate degree program at WVU in an approved area (see above).

A minimum grade of B- is all required courses and an overall GPA of 3.0.

Total credit hours: 18

The graduate certificate in Applied Behavior Analysis is offered entirely online.

NOTE: Completion of the courses does not guarantee a passing score on the (BCBA®) credential exam.

More information about the graduate certificate in Applied Behavior Analysis is available at http://specialed.wvu.edu/masters/sped-applied-behavior-analysis

Disability Studies Certificate

CERTIFICATE CODE - CG11

The WVU Center for Excellence in Disabilities, in collaboration with the Department of Special Education, offers a graduate certificate program in disability studies. The certificate in disability studies prepares students, as citizens, to cope with the complex economic and social issues related to disabilities by learning directly from persons with disabilities and their families. Students will be trained to enter the workforce with the knowledge, skills,
and experience needed to provide state-of-the-art services to persons with disabilities and their families and to interact with co-workers who have disabilities.

Through the certificate program, students collaborate with and learn from experts in the disability arena, including pediatric neurologists, geneticists, speech-language pathologists, audiologists, special education leaders, social workers, physical and occupational therapists, and others. These professionals, who are experienced clinicians, researchers, and educators, provide didactic instruction, clinical instruction, and mentorship to students.

Students will also have the opportunity to gain leadership and management skills that prepare them to enter the workforce with increased professional independence. The certificate program exposes students to social justice issues, Appalachian concerns, principles of practice, and cultural diversity while developing their expertise in rural practice environments. As part of the program, students have the opportunity to observe programs that serve those with disabilities and their families.

- Students must take two three-credit hour mandatory interdisciplinary courses: one of which is DISB 580.
- Six hours may be elective courses that cover subject matter related to persons with disabilities or courses within the student’s own academic discipline for which they have received prior approval from the certificate program director and the course instructor. Students will be required to complete a project that applies coursework to issues relating to persons with disabilities.
- Two credit hours are earned through thirty volunteer hours in which the student has direct interaction with persons who have disabilities.
- One credit hour is the capstone experience (DISB 686) which includes samples of the student’s accumulated work in disabilities, a final essay, and an oral presentation.
- Students must earn a B- or better in all courses to be awarded the certificate upon completion of all requirements.

The graduate Interdisciplinary Certificate in Disability Studies is offered on campus.

**Autism Spectrum Disorders**

**Degree Offered**

- Master of Arts with a major in Autism Spectrum Disorders

The Department of Special Education believes that children, adolescents, and adults with an autism spectrum disorder have a right to appropriate and adequate services to meet their needs in the home, inclusive preschool, inclusive school, and community settings; they and their families should be empowered to make decisions about services and supports without undue interference from service providers; and they deserve programs that develop skills enabling them to participate fully in family, preschool, school, and community life and enjoy civil rights and personal freedoms as responsible citizens in a free society.

The Master of Arts program in Autism Spectrum Disorders is designed to prepare professional educators to work with children and adults with autism spectrum disorders and pervasive developmental disabilities. This graduate level program prepares special education teachers and other disability services professionals to engage in current research-based practices to provide high quality educational programs and services in elementary and secondary schools or in community service agencies. WVU is fully accredited by the Higher Learning Commission (HLC), while the program is approved as a teacher education program leading to teaching certification by the West Virginia Department of Education, accredited by the Council for Accreditation of Educator Preparation (CAEP) and nationally recognized by the Council for Exceptional Children.

The program offers these options:

1. Master's degree in Special Education with certification in Autism Grades K-6 or 5-Adult (or the equivalent in other states)
2. Master's degree only in Special Education with emphasis in Autism Spectrum Disorders

**PROGRAM DELIVERY FORMAT**

This program is offered entirely ONLINE throughout the United States and in approved international locations.

**RETENTION REQUIREMENTS**

To maintain ACTIVE student status, students must enroll in at least one (1) course during the effective term of admission and also at least two (2) courses every year. Students who fail to sustain enrollment will be converted to inactive status and will be required to reapply to the university and program and meet any additional new requirements in effect at that time. Students are expected to comply with all academic and conduct policies as outlined in the WVU Graduate Catalog, in the WVU Student Handbook, and on the Department of Special Education website.

Retention in the program and/or graduation is based on SATISFACTORY PROGRESS or maintaining a GPA of 3.0 with a grade of A or B in ALL required courses. A grade of Incomplete will only be approved for emergency situations; all requirements must be completed BEFORE the end of the next academic semester. Students who DO NOT clear the grade of Incomplete by the deadline will be assigned a grade of FAIL by the instructor immediately after the due date.
Students who do NOT earn a grade of A or B in a required course will be required to RE-TAKE THE COURSE to be eligible for the culminating practicum or culminating project.

Students who do NOT maintain a GPA of 3.0 (includes courses with grade of Incomplete) in a given semester MAY be placed on PROBATION and permitted one (1) additional semester to increase the GPA to 3.0.

Students whose GPA is too low to be raised by a probationary period OR who do NOT obtain a GPA of 3.0 after the probationary period will be subject to DISMISSAL from the program.

Students who engage in academic dishonesty will be assigned 0 points for the assignment or exam for the first offense, an F for the course for the second offense, and dismissed from the program for the third offense. Students dismissed from a program will NOT be permitted to re-apply to ANY special education program.

### GRADUATION AND COMPLETION REQUIREMENTS

The MINIMUM time to complete most certification or degree programs in special education is:

- TWO (2) calendar years at the rate of SIX (6) credits per semester (part-time study – recommended for students who are working full time and/or have extensive family responsibilities)

- ONE AND ONE HALF (1.5) calendar years at the rate of NINE (9) credits per semester (full-time study - recommended for students who are not employed and/or have minimal family responsibilities).

The MAXIMUM time to complete a graduate degree program at WVU (including all transferred courses) is EIGHT (8) years.

### REGULAR ADMISSION

REGULAR admission is granted ONLY WHEN ALL these criteria are met:

Requirements for ALL graduate programs:

--Bachelor’s degree from a regionally accredited institution with minimum GPA* of 3.00 out of 4.0;

--passing scores on a nationally standardized test of academic ability (Praxis Core or GRE or MAT) - contact program for current minimum scores and waiver conditions

--Permission for Field/Clinical Experiences (see Program Application Form) completed by a school administrator.

NOTE: SCHOOL SYSTEMS MAY REQUIRE CRIMINAL BACKGROUND CHECKS AND FORMAL BOARD APPROVAL PRIOR TO PLACEMENT.

ADDITIONAL special requirements for certification plus degree programs only:

--PRAXIS Core Academic Skills for Educators (Core) passing scores; scores may be waived in some circumstances - contact program personnel for current minimum scores

### ADDITIONAL REQUIREMENTS FOR INTERNATIONAL STUDENTS

The individual who is not a native speaker of English must also meet these requirements:

- Test of English as a Foreign Language (TOEFL) score - contact program personnel for current guidelines

- Personal interview and writing sample to document fluency needed for success in courses and field experiences

NOTE: U.S. VISA CAN NOT BE ISSUED FOR ONLINE PROGRAMS BUT STUDENTS CAN ENROLL AS RESIDENTS IN THEIR HOME COUNTRIES.

INDIVIDUALS WHO ARE LEGAL RESIDENT ALIENS MAY PARTICIPATE IN ONLINE PROGRAMS IF THEY VERIFY THEIR RESIDENT STATUS.

### PROVISIONAL ADMISSION

PROVISIONAL admission** MAY be considered under SOME circumstances IF ALL other criteria are met:

--Bachelor’s degree from a regionally accredited institution with minimum GPA* of 2.75+ out of 4.0

--Bachelor’s degree from a regionally accredited institution with minimum GPA* of 2.50+ out of 4.0 ONLY IF:

  a. undergraduate degree transcript documents minimum GPA of 3.0 in final 30 credits; OR
  b. graduate transcript documents at least 18 credits leading to teaching certification with minimum GPA 3.25; OR
  c. prior Master’s degree in education or closely related area with minimum GPA 3.25

NOTE: UNDERGRADUATE COURSES ONLY ARE COUNTED IN CALCULATING THE GPA. APPLICANTS WITH LOW GPA’S MAY BE ABLE TO RAISE THEIR UNDERGRADUATE GPA BY TAKING ADDITIONAL UNDERGRADUATE COURSES BEFORE APPLYING.

NOTE: Provisional admission is contingent upon maintaining GPA of 3.0 and grades of A or B (and/or making up any identified deficiencies) within the first 9 credits or within 2 semesters, whichever comes first.
Applications submitted before the due date with all supporting documentation are eligible for EARLY ADMISSION. Applications that are incomplete will be rejected. Applicants who meet all regular admission criteria will be admitted automatically to the program. Applicants who meet criteria for provisional admission are ONLY considered IF additional openings remain at that point. Under NO circumstances will ANY admission requirement be waived. Dual enrollment is only permitted in exceptional circumstances.

The WVU Application for Graduate Admission is available at https://app.applyyourself.com/AYApplicantLogin/fl_ApplicantConnectLogin.asp?id=wvugrad.
The Department of Special Education Program Application Form can be obtained at sped@mail.wvu.edu.
For assistance in completing applications, please contact sped@mail.wvu.edu or 304-293-3450

APPLICATION SUBMISSION PROCESS

Applications for admission beginning FALL semester: DUE AUGUST 1
Applications for admission beginning SPRING semester: DUE JANUARY 1
Applications for admission beginning SUMMER semester: DUE MAY 1

Rolling admissions processing policy means that applications for admissions are processed and a decision is made as soon as all application materials are available, and applicants are notified immediately after the application review has been completed.

Major Learning Goals

AUTISM SPECTRUM DISORDERS

The M.A. degree program has been designed so that graduates can accomplish the following learning goals:

• promote academic achievement and self-determination by individuals with autism through design of individualized interventions and provision of appropriate supports
• demonstrate knowledge and application of current evidence-practices as exemplified by reputable research and professional standards to deliver instruction in inclusive environments in public schools and other community agencies
• collaborate with other professionals and agencies in delivery of services and engage in individual and systems advocacy for individuals and their families, and empower individuals and families to participate in program planning and decision-making
• reflect in and on practice and respond responsibly to the legal, ethical, social, and cultural issues encountered when working with young children, children, adolescents and adults with an autism spectrum disorder in today’s world

Early Intervention/Early Childhood Special Education

Degree Offered

• Master of Arts with a major in Early Intervention/Early Childhood Special Education

The graduate program in Early Childhood Special Education at WVU is designed to prepare professional educators to work with preschoolers and kindergarteners with developmental disabilities, delays and at risk conditions from age 3 through 6. This graduate level program prepares special education teachers, early intervention providers, and other disability services professionals to engage in current research-based practices to provide high quality educational programs and services in birth to three intervention services, in public or private preschools or kindergartens, or in community service agencies. WVU is fully accredited by the Higher Learning Commission (HLC), while the program is approved as a teacher education program leading to teaching certification by the West Virginia Department of Education, accredited by the Council for Accreditation of Educator Preparation (CAEP) and nationally recognized by the Council for Exceptional Children.

The program offers these options:

1. Master's degree in Special Education with certification in Preschool Special Needs Grades PreK-K (or the equivalent in other states)
2. Master's degree only in Special Education with emphasis in Early Childhood Special Education

PROGRAM DELIVERY FORMAT

This program is offered entirely ONLINE throughout the United States and in approved international locations.

RETENTION REQUIREMENTS

To maintain ACTIVE student status, students must enroll in at least one (1) course during the effective term of admission and also at least two (2) courses every year. Students who fail to sustain enrollment will be converted to inactive status and will be required to reapply to the university and
program and meet any additional new requirements in effect at that time. Students are expected to comply with all academic and conduct policies as outlined in the WVU Graduate Catalog, in the WVU Student Handbook, and on the Department of Special Education website.

Retention in the program and/or graduation is based on SATISFACTORY PROGRESS or maintaining a GPA of 3.0 with a grade of A or B in ALL required courses. A grade of Incomplete will only be approved for emergency situations; all requirements must be completed BEFORE the end of the next academic semester. Students who DO NOT clear the grade of Incomplete by the deadline will be assigned a grade of FAIL by the instructor immediately after the due date.

Students who do NOT earn a grade of A or B in a required course will be required to RE-TAKE THE COURSE to be eligible for the concluding practicum or culminating project.

Students who do NOT maintain a GPA of 3.0 (includes courses with grade of Incomplete) in a given semester MAY be placed on PROBATION and permitted one (1) additional semester to increase the GPA to 3.0.

Students whose GPA is too low to be raised by a probationary period OR who do NOT obtain a GPA of 3.0 after the probationary period will be subject to DISMISSAL from the program.

Students who engage in academic dishonesty will be assigned 0 points for the assignment or exam for the first offense, an F for the course for the second offense, and dismissed from the program for the third offense. Students dismissed from a program will NOT be permitted to re-apply to ANY special education program.

**GRADUATION AND COMPLETION REQUIREMENTS**

The MINIMUM time to complete most certification or degree programs in special education is:

- TWO (2) calendar years at the rate of SIX (6) credits per semester (part-time study – recommended for students who are working full time and/or have extensive family responsibilities)

- ONE AND ONE HALF (1.5) calendar years at the rate of NINE (9) credits per semester (full-time study - recommended for students who are not employed and/or have minimal family responsibilities.

The MAXIMUM time to complete a graduate degree program at WVU (including all transferred courses) is EIGHT (8) years.

**Early Intervention/Early Childhood Special Education**

**REGULAR ADMISSION**

Regular admission is granted **only** in cases when the following criteria are met:

- Bachelor’s degree from a regionally accredited institution with minimum GPA* of 3.00 out of 4.0;
- Passing scores on a nationally standardized test of academic ability (Praxis Core or GRE or MAT) - contact program for current minimum scores and waiver conditions
- Permission for Field/Clinical Experiences (see Program Application Form) completed by a school administrator.

NOTE: SCHOOL SYSTEMS MAY REQUIRE CRIMINAL BACKGROUND CHECKS AND FORMAL BOARD APPROVAL PRIOR TO PLACEMENT.

**ADDITIONAL REQUIREMENTS FOR CERTIFICATION PLUS DEGREE PROGRAM:**

- PRAXIS Core Academic Skills for Educators (Core) passing scores; scores may be waived in some circumstances - contact program personnel for current minimum scores

NOTE: OTHER TESTS MAY BE SUBSTITUTED IF DOCUMENTATION PROVIDED SHOWS CONTENT SUBSTANTIALLY EQUIVALENT TO CASE.

**ADDITIONAL REQUIREMENTS FOR INTERNATIONAL STUDENTS**

The individual who is not a native speaker of English must also meet these requirements:

- Test of English as a Foreign Language (TOEFL) score - contact program personnel for current guidelines
- Personal interview and writing sample to document fluency needed for success in courses and field experiences

NOTE: U.S. VISA CAN NOT BE ISSUED FOR ONLINE PROGRAMS BUT STUDENTS CAN ENROLL AS RESIDENTS IN THEIR HOME COUNTRIES. INDIVIDUALS WHO ARE LEGAL RESIDENT ALIENS MAY PARTICIPATE IN ONLINE PROGRAMS IF THEY VERIFY THEIR RESIDENT STATUS.

**PROVISIONAL ADMISSION**

PROVISIONAL admission** MAY be considered under SOME circumstances IF ALL other criteria are met:

- Bachelor’s degree from a regionally accredited institution with minimum GPA* of 2.75+ out of 4.0
--Bachelor's degree from a regionally accredited institution with minimum GPA* of 2.50+ out of 4.0 ONLY IF:

  a. undergraduate degree transcript documents minimum GPA of 3.0 in final 30 credits; OR
  b. graduate transcript documents at least 18 credits leading to teaching certification with minimum GPA 3.25; OR
  c. prior Master's degree in education or closely related area with minimum GPA 3.25

NOTE: UNDERGRADUATE COURSES ONLY ARE COUNTED IN CALCULATING THE GPA. APPLICANTS WITH GPAs MAY BE ABLE TO RAISE THEIR UNDERGRADUATE GPA BY TAKING ADDITIONAL UNDERGRADUATE COURSES BEFORE APPLYING.

NOTE: Provisional admission is contingent upon maintaining GPA of 3.0 and grades of A or B (and/or making up any identified deficiencies) within the first 9 credits or within 2 semesters, whichever comes first.

Applications submitted before the due date with all supporting documentation are eligible for EARLY ADMISSION. Applications that are incomplete will be rejected. Applicants who meet all regular admission criteria will be admitted automatically to the program. Applicants who meet criteria for provisional admission are ONLY considered IF additional openings remain at that point. Under NO circumstances will ANY admission requirement be waived. Dual enrollment is only permitted in exceptional circumstances.

The WVU Application for Graduate Admission is available at https://app.applyyourself.com/AYApplicantLogin/fl_ApplicantConnectLogin.asp?id=wvugrad.
The Department of Special Education Program Application Form can be obtained at sped@mail.wvu.edu.
For assistance in completing applications, please contact sped@mail.wvu.edu or 304-293-3450.

APPLICATION SUBMISSION PROCESS
Applications for admission beginning FALL semester: DUE AUGUST 1
Applications for admission beginning SPRING semester: DUE JANUARY 1
Applications for admission beginning SUMMER semester: DUE MAY 1

Rolling admissions processing policy means that applications for admissions are processed and a decision is made as soon as all application materials are available, and applicants are notified immediately after the application review has been completed.

Major Learning Goals

EARLY INTERVENTION/EARLY CHILDHOOD SPECIAL EDUCATION

The Department of Special Education believes that young children with special needs and their families have a right to appropriate services designed to meet their unique needs in home and community-based settings; young children and their families deserve programs that promote optimal child development and early learning, and foster positive child-parent interactions and enhance family functioning to support a meaningful quality of life; and families have the right to participate fully in decision-making about needed services and supports without in partnership with service providers and agencies. This program has been designed so that program graduates can accomplish the following learning goals:

- provide high quality early childhood special education services to young children with special needs and their families in inclusive environments within public schools and other community agencies
- demonstrate knowledge and application of current evidence-practices as exemplified by reputable research and professional standards to deliver instruction in inclusive environments in family homes, public schools and other community agencies
- collaborate with other professionals and agencies in delivery of services and engage in individual and systems advocacy for individuals and their families, and empower individuals and families to participate in program planning and decision making
- reflect in and on practice and respond responsibly to the legal, ethical, social, and cultural issues encountered when working with young children with special needs and their families in today’s world

Gifted Education

Degree Offered

- Master of Arts with a major in Gifted Education

The graduate program in Gifted Education at WVU is designed to prepare professional educators to work with children and adolescents with gifts and talents as well as other high ability learners. This graduate level program prepares special education teachers and other professionals to engage in current research-based practices to provide high quality educational programs and services for acceleration and enrichment in elementary or secondary schools or post-secondary programs. WVU is fully accredited by the Higher Learning Commission (HLC), while the program is approved as a teacher education program leading to teaching certification by the West Virginia Department of Education, accredited by the Council for Accreditation of Educator Preparation (CAEP) and nationally recognized by the Council for Exceptional Children.

The program offers these options:

1. Master's degree in Special Education with certification in Gifted Grades K-12 (or the equivalent in other states);
2. Master's degree only in Special Education with emphasis in Gifted Education
PROGRAM DELIVERY FORMAT
This program is offered entirely ONLINE throughout the United States and in approved international locations.

RETENTION REQUIREMENTS
To maintain ACTIVE student status, students must enroll in at least one (1) course during the effective term of admission and also at least two (2) courses every year. Students who fail to sustain enrollment each year will be converted to inactive status and will be required to reapply to the university and program and meet any additional new requirements in effect at that time. Students are expected to comply with all academic and conduct policies as outlined in the WVU Graduate Catalog, in the WVU Student Handbook, and on the Department of Special Education website.

Retention in the program and/or graduation is based on SATISFACTORY PROGRESS or maintaining a GPA of 3.0 with a grade of A or B in ALL required courses. A grade of Incomplete will only be approved for emergency situations; all requirements must be completed BEFORE the end of the next academic semester. Students who DO NOT clear the grade of Incomplete by the deadline will be assigned a grade of FAIL by the instructor immediately after the due date.

Students who do NOT earn a grade of A or B in a required course will be required to RE-TAKE THE COURSE to be eligible for the culminating practicum or culminating project.

Students who do NOT maintain a GPA of 3.0 (includes courses with grade of Incomplete) in a given semester MAY be placed on PROBATION and permitted one (1) additional semester to increase the GPA to 3.0.

Students whose GPA is too low to be raised by a probationary period OR who do NOT obtain a GPA of 3.0 after the probationary period will be subject to DISMISSAL from the program.

Students who engage in academic dishonesty will be assigned 0 points for the assignment or exam for the first offense, an F for the course for the second offense, and dismissed from the program for the third offense. Students dismissed from a program will NOT be permitted to re-apply to ANY special education program.

GRADUATION AND COMPLETION REQUIREMENTS
The MINIMUM time to complete most certification or degree programs in special education is:

- TWO (2) calendar years at the rate of SIX (6) credits per semester (part-time study – recommended for students who are working full time and/or have extensive family responsibilities)

- ONE AND ONE HALF (1.5) calendar years at the rate of NINE (9) credits per semester (full-time study- recommended for students who are not employed and/or have minimal family responsibilities.

The MAXIMUM time to complete a graduate degree program at WVU (including all transferred courses) is EIGHT (8) years

REGULAR ADMISSION
Requirements for ALL graduate programs:
--Bachelor’s degree from a regionally accredited institution with minimum GPA* of 3.00 out of 4.0;
--passing scores on a nationally standardized test of academic ability (Praxis Core or GRE or MAT) - contact program for current minimum scores and waiver conditions
--Permission for Field/Clinical Experiences (see Program Application Form) completed by a school administrator.

NOTE: SCHOOL SYSTEMS MAY REQUIRE CRIMINAL BACKGROUND CHECKS AND FORMAL BOARD APPROVAL PRIOR TO PLACEMENT.

ADDITIONAL special requirements for ALL certification or certification plus degree programs only:
--PRAXIS Core Academic Skills for Educators (CASE) passing scores; ; scores may be waived in some circumstances - contact program personnel for current minimum scores

NOTE: OTHER TESTS MAY BE SUBSTITUTED IF DOCUMENTATION PROVIDED SHOWS CONTENT SUBSTANTIALLY EQUIVALENT TO CASE.

ADDITIONAL REQUIREMENTS FOR INTERNATIONAL STUDENTS
The individual who is not a native speaker of English must also meet these requirements:

• Test of English as a Foreign Language (TOEFL) score - contact program personnel for current guidelines
• Personal interview and writing sample to document fluency needed for success in courses and field experiences

NOTE: U.S. VISA CAN NOT BE ISSUED FOR ONLINE PROGRAMS BUT STUDENTS CAN ENROLL AS RESIDENTS IN THEIR HOME COUNTRIES. INDIVIDUALS WHO ARE LEGAL RESIDENT ALIENS MAY PARTICIPATE IN ONLINE PROGRAMS IF THEY VERIFY THEIR RESIDENT STATUS.
PROVISIONAL ADMISSION

PROVISIONAL admission** MAY be considered under SOME circumstances IF ALL other criteria are met:
--Bachelor's degree from a regionally accredited institution with minimum GPA* of 2.75+ out of 4.0
--Bachelor's degree from a regionally accredited institution with minimum GPA* of 2.50+ out of 4.0 ONLY IF:
   a. undergraduate degree transcript documents minimum GPA of 3.0 in final 30 credits; OR
   b. graduate transcript documents at least 18 credits leading to teaching certification with minimum GPA 3.25; OR
   c. prior Master's degree in education or closely related area with minimum GPA 3.25

NOTE: UNDERGRADUATE COURSES ONLY ARE COUNTED IN CALCULATING THE GPA. APPLICANTS WITH GPAs MAY BE ABLE TO RAISE THEIR UNDERGRADUATE GPA BY TAKING ADDITIONAL UNDERGRADUATE COURSES BEFORE APPLYING.

NOTE: Provisional admission is contingent upon maintaining GPA of 3.0 and grades of A or B (and/or making up any identified deficiencies) within the first 9 credits or within 2 semesters, whichever comes first.

Applications submitted before the due date with all supporting documentation are eligible for EARLY ADMISSION. Applications that are incomplete will be rejected. Applicants who meet all regular admission criteria will be admitted automatically to the program. Applicants who meet criteria for provisional admission are ONLY considered IF additional openings remain at that point. Under NO circumstances will ANY admission requirement be waived. Dual enrollment is only permitted in exceptional circumstances.

The WVU Application for Graduate Admission is available at https://app.applyyourself.com/AYApplicantLogin/fl_ApplicantConnectLogin.asp?id=wvugrad.
The Department of Special Education Program Application Form can be obtained at sped@mail.wvu.edu.
For assistance in completing applications, please contact sped@mail.wvu.edu or 304-293-3450.

APPLICATION SUBMISSION PROCESS

Major Learning Goals

GIFTED EDUCATION

The Department of Special Education believes that students with gifts and talents are entitled to high quality, individualized educational programs because: a) a democratic society that recognizes the intrinsic worth of every citizen, schools has a duty to assist all students to achieve their highest potential, including that minority of youth at the upper end of the ability continuum who display gifts and talents in academic achievement as well as other performance dimensions; and b) various human gifts and talents can be suppressed or even wasted if the abilities and talents of such individuals are not developed and nurtured, resulting in the loss of potentially invaluable contributions to human welfare and social advancement.

This program has been designed so that program graduates can accomplish the following learning goals:

1. provide high quality educational services to children, adolescents, and young adults with gifts and talents and other high ability learners in elementary and secondary schools as well as post-secondary education settings;
2. demonstrate knowledge and application of current evidence-practices as exemplified by reputable research and professional standards to deliver instruction in to provide accelerated and enriched learning experiences;
3. collaborate with other professionals and agencies in delivery of services and engage in individual and systems advocacy for individuals and their families, and empower individuals and families to participate in program planning and decision making; and
4. reflect in and on practice and respond responsibly to the legal, ethical, social, and cultural issues encountered when working with individuals with gifts and talents and their families in today’s world.

Low Vision/Blindness

Degree Offered

- Master of Arts with a major in Low Vision/Blindness

The graduate program in Low Vision/Blindness at WVU is designed to prepare professional educators to work with children and adolescents with low vision, visual impairments and blindness. This graduate level program prepares special education teachers and other professionals to engage in current research-based practices to provide high quality educational programs and services for preschoolers, children and adolescents in elementary or secondary school programs and post-school programs. WVU is fully accredited by the Higher Learning Commission (HLC), while the program is approved as a teacher education program leading to teaching certification by the West Virginia Department of Education, accredited by the Council for Accreditation of Educator Preparation (CAEP) and nationally recognized by the Council for Exceptional Children.

THIS PROGRAM IS DORMANT AND IS CURRENTLY NOT ADMITTING STUDENTS

The program offers these options:

1. Master's degree in Special Education with certification in Visual Impairments Grades PreK-Adult (or the equivalent in other states);
2. Master's degree only in Special Education with emphasis in Low Vision/Blindness

PROGRAM DELIVERY FORMAT

This program is offered entirely ONLINE throughout the United States and in approved international locations.

RETENTION REQUIREMENTS

To maintain ACTIVE student status, students must enroll in at least one (1) course during the effective term of admission and also at least two (2) courses every year. Students who fail to sustain enrollment each year will be converted to inactive status and will be required to reapply to the university and program and meet any additional new requirements in effect at that time. Students are expected to comply with all academic and conduct policies as outlined in the WVU Graduate Catalog, in the WVU Student Handbook, and on the Department of Special Education website.

Retention in the program and/or graduation is based on SATISFACTORY PROGRESS or maintaining a GPA of 3.0 with a grade of A or B in ALL required courses. A grade of Incomplete will only be approved for emergency situations; all requirements must be completed BEFORE the end of the next academic semester. Students who DO NOT clear the grade of Incomplete by the deadline will be assigned a grade of FAIL by the instructor immediately after the due date.

Students who do NOT earn a grade of A or B in a required course will be required to RE-TAKE THE COURSE to be eligible for the culminating practicum or culminating project.

Students who do NOT maintain a GPA of 3.0 (includes courses with grade of Incomplete) in a given semester MAY be placed on PROBATION and permitted one (1) additional semester to increase the GPA to 3.0.

Students whose GPA is too low to be raised by a probationary period OR who do NOT obtain a GPA of 3.0 after the probationary period will be subject to DISMISSAL from the program.
Students who engage in academic dishonesty will be assigned 0 points for the assignment or exam for the first offense, an F for the course for the second offense, and dismissed from the program for the third offense. Students dismissed from a program will NOT be permitted to re-apply to ANY special education program.

**GRADUATION AND COMPLETION REQUIREMENTS**

The MINIMUM time to complete most certification or degree programs in special education is:

- TWO (2) calendar years at the rate of SIX (6) credits per semester (part-time study – recommended for students who are working full time and/or have extensive family responsibilities)

- ONE AND ONE HALF (1.5) calendar years at the rate of NINE (9) credits per semester (full-time study - recommended for students who are not employed and/or have minimal family responsibilities.

The MAXIMUM time to complete a graduate degree program at WVU (including all transferred courses) is EIGHT (8) years

**REGULAR ADMISSION**

REGULAR admission is granted ONLY WHEN ALL these criteria are met:

Requirements for ALL graduate programs:

--Bachelor’s degree from a regionally accredited institution with minimum GPA* of 3.00 out of 4.0;

--passing scores on a nationally standardized test of academic ability (Praxis Core or GRE or MAT) - contact program for current minimum scores and waiver conditions

--Permission for Field/Clinical Experiences (see Program Application Form) completed by a school administrator.

NOTE: SCHOOL SYSTEMS MAY REQUIRE CRIMINAL BACKGROUND CHECKS AND FORMAL BOARD APPROVAL PRIOR TO PLACEMENT.

ADDITIONAL special requirements for ALL certification or certification plus degree programs only:

--PRAXIS Core Academic Skills for Educators (CASE) - passing scores - scores may be waived in some circumstances - contact program personnel for current minimum scores.

NOTE: OTHER TESTS MAY BE SUBSTITUTED IF DOCUMENTATION PROVIDED SHOWS CONTENT SUBSTANTIALLY EQUIVALENT TO CASE.

**ADDITIONAL REQUIREMENTS FOR INTERNATIONAL STUDENTS**

The individual who is not a native speaker of English must also meet these requirements:

- Test of English as a Foreign Language (TOEFL) score - contact program personnel for current guidelines
- Personal interview and writing sample to document fluency needed for success in courses and field experiences

NOTE: U.S. VISA CAN NOT BE ISSUED FOR ONLINE PROGRAMS BUT STUDENTS CAN ENROLL AS RESIDENTS IN THEIR HOME COUNTRIES.

INDIVIDUALS WHO ARE LEGAL RESIDENT ALIENS MAY PARTICIPATE IN ONLINE PROGRAMS IF THEY VERIFY THEIR RESIDENT STATUS.

**PROVISIONAL ADMISSION**

PROVISIONAL admission** MAY be considered under SOME circumstances IF ALL other criteria are met:

--Bachelor’s degree from a regionally accredited institution with minimum GPA* of 2.75+ out of 4.0

--Bachelor’s degree from a regionally accredited institution with minimum GPA* of 2.50+ out of 4.0 ONLY IF:

- a. undergraduate degree transcript documents minimum GPA of 3.0 in final 30 credits; OR
- b. graduate transcript documents at least 18 credits leading to teaching certification with minimum GPA 3.25; OR
- c. prior Master’s degree in education or closely related area with minimum GPA 3.25

NOTE: UNDERGRADUATE COURSES ONLY ARE COUNTED IN CALCULATING THE GPA. APPLICANTS WITH GPAs MAY BE ABLE TO RAISE THEIR UNDERGRADUATE GPA BY TAKING ADDITIONAL UNDERGRADUATE COURSES BEFORE APPLYING.

NOTE: Provisional admission is contingent upon maintaining GPA of 3.0 and grades of A or B (and/or making up any identified deficiencies) within the first 9 credits or within 2 semesters, whichever comes first.

Applications submitted before the due date with all supporting documentation are eligible for EARLY ADMISSION. Applications that are incomplete will be rejected. Applicants who meet all regular admission criteria will be admitted automatically to the program. Applicants who meet criteria for provisional admission are ONLY considered IF additional openings remain at that point. Under NO circumstances will ANY admission requirement be waived. Dual enrollment is only permitted in exceptional circumstances.

Major Learning Goals

LOW VISION/BLINDNESS

The Department of Special Education believes that individuals with low vision, visual impairments and blindness are entitled to high quality, individualized educational programs individually designed to meet their unique needs in inclusive school and community program as well as residential centers; and these individuals and families should be empowered to make decisions about services and supports required to succeed academically and socially.

This program has been designed so that program graduates can accomplish the following learning goals:

1. provide high quality educational services to children, adolescents, and adults with low vision, visual impairments and blindness in elementary and secondary schools as well as post-secondary education settings;
2. demonstrate knowledge and application of current evidence-practices as exemplified by reputable research and professional standards to deliver instruction in to develop academic, social and functional skills;
3. collaborate with other professionals and agencies in delivery of services and engage in individual and systems advocacy for individuals and their families, and empower individuals and families to participate in program planning and decision making; and
4. reflect in and on practice and respond responsibly to the legal, ethical, social, and cultural issues encountered when working with individuals with low vision/blindness and their families in today's world.

Multicategorical Special Education

Degree Offered

- Master of Arts with a major in Multicategorical Special Education

The graduate program in Multicategorical Special Education at WVU is designed to prepare professional educators to work with children and adolescents with mild/moderate disabilities including learning disabilities, emotional/behavior disorders, and intellectual disabilities. This graduate level program prepares special education teachers and other professionals to engage in current research-based practices to provide high quality educational programs and services to promote academic achievement and post-school outcomes in inclusive elementary or secondary schools. WVU is fully accredited by the Higher Learning Commission (HLC), while the program is approved as a teacher education program leading to teaching certification by the West Virginia Department of Education, accredited by the Council for Accreditation of Educator Preparation (CAEP) and nationally recognized by the Council for Exceptional Children.
The program offers these options:

1. Master's degree in Special Education with certification in Multicategorical Special Education Grades K-6 or 5-Adult (or the equivalent in other states);
2. Master's degree only in Special Education with emphasis in Multicategorical Special Education

PROGRAM DELIVERY FORMAT
This program is offered entirely ONLINE throughout the United States and in approved international locations.

RETENTION REQUIREMENTS
To maintain ACTIVE student status, students must enroll in at least one (1) course during the effective term of admission and also at least two (2) courses every year. Students who fail to sustain enrollment each year will be converted to inactive status and will be required to reapply to the university and program and meet any additional new requirements in effect at that time. Students are expected to comply with all academic and conduct policies as outlined in the WVU Graduate Catalog, in the WVU Student Handbook, and on the Department of Special Education website.

Retention in the program and/or graduation is based on SATISFACTORY PROGRESS or maintaining a GPA of 3.0 with a grade of A or B in ALL required courses. A grade of Incomplete will only be approved for emergency situations; all requirements must be completed BEFORE the end of the next academic semester. Students who DO NOT clear the grade of Incomplete by the deadline will be assigned a grade of FAIL by the instructor immediately after the due date.

Students who do NOT earn a grade of A or B in a required course will be required to RE-TAKE THE COURSE to be eligible for the culminating practicum or culminating project.

Students who do NOT maintain a GPA of 3.0 (includes courses with grade of Incomplete) in a given semester MAY be placed on PROBATION and permitted one (1) additional semester to increase the GPA to 3.0.

Students whose GPA is too low to be raised by a probationary period OR who do NOT obtain a GPA of 3.0 after the probationary period will be subject to DISMISSAL from the program.

Students who engage in academic dishonesty will be assigned 0 points for the assignment or exam for the first offense, an F for the course for the second offense, and dismissed from the program for the third offense. Students dismissed from a program will NOT be permitted to re-apply to ANY special education program.

GRADUATION AND COMPLETION REQUIREMENTS
The MINIMUM time to complete most certification or degree programs in special education is:

- TWO (2) calendar years at the rate of SIX (6) credits per semester (part-time study – recommended for students who are working full time and/or have extensive family responsibilities.
- ONE AND ONE HALF (1.5) calendar years at the rate of NINE (9) credits per semester (full-time study- recommended for students who are not employed and/or have minimal family responsibilities.

The MAXIMUM time to complete a graduate degree program at WVU (including all transferred courses) is EIGHT (8) years

REGULAR ADMISSION
REGULAR admission is granted ONLY WHEN ALL these criteria are met:

Requirements for ALL graduate programs:
--Bachelor's degree from a regionally accredited institution with minimum GPA* of 3.00 out of 4.0;
--passing scores on a nationally standardized test of academic ability (Praxis Core or GRE or MAT) - - contact program for current minimum scores and waiver conditions
--Permission for Field/Clinical Experiences (see Program Application Form) completed by a school administrator.

NOTE: SCHOOL SYSTEMS MAY REQUIRE CRIMINAL BACKGROUND CHECKS AND FORMAL BOARD APPROVAL PRIOR TO PLACEMENT.

ADDITIONAL special requirements for ALL certification plus degree programs only:
--PRAXIS Core Academic Skills for Educators (CASE) passing scores - scores may be waived in some circumstances - contact program personnel for current minimum scores

NOTE: OTHER TESTS MAY BE SUBSTITUTED IF DOCUMENTATION PROVIDED SHOWS CONTENT SUBSTANTIALLY EQUIVALENT TO CASE.

ADDITIONAL special requirements ALSO NEEDED for certification or certification plus degree programs for grades K-6 only:
--prior certification in early childhood education (K-4) or elementary education (K-6 or K-8) (required for K-6 option only);
--prior certification in early childhood education (K-4) or elementary education (K-6) or secondary education (5-9, 7-15, 5-Adult) in biology, chemistry, English, general science, mathematics, physics, reading education/specialist, social studies (required for Gifted Education K-12 only).

OTHER special requirements for INTERNATIONAL STUDENTS only:
--TOEFL score: 550 or higher (paper); 215 or higher (computer); 80 or higher (Internet) (non-native English speakers ONLY) OR IELTS score: 6.5 or higher; the English language testing requirement will NOT be waived even for individuals enrolled in the WVU Intensive English Program;
--personal interview (by phone or in person) to verify proficiency in English (non-native English speakers ONLY).

ADDITIONAL REQUIREMENTS FOR INTERNATIONAL STUDENTS
The individual who is not a native speaker of English must also meet these requirements:

• Test of English as a Foreign Language (TOEFL) score - contact program personnel for current guidelines
• Personal interview and writing sample to document fluency needed for success in courses and field experiences

NOTE: U.S. VISA CAN NOT BE ISSUED FOR ONLINE PROGRAMS BUT STUDENTS CAN ENROLL AS RESIDENTS IN THEIR HOME COUNTRIES.
INDIVIDUALS WHO ARE LEGAL RESIDENT ALIENS MAY PARTICIPATE IN ONLINE PROGRAMS IF THEY VERIFY THEIR RESIDENT STATUS.

PROVISIONAL ADMISSION
PROVISIONAL admission** MAY be considered under SOME circumstances IF ALL other criteria are met:
--Bachelor’s degree from a regionally accredited institution with minimum GPA* of 2.75+ out of 4.0
--Bachelor’s degree from a regionally accredited institution with minimum GPA* of 2.50+ out of 4.0 ONLY IF:
   a. undergraduate degree transcript documents minimum GPA of 3.0 in final 30 credits; OR
   b. graduate transcript documents at least 18 credits leading to teaching certification with minimum GPA 3.25; OR
   c. prior Master’s degree in education or closely related area with minimum GPA 3.25

NOTE: UNDERGRADUATE COURSES ONLY ARE COUNTED IN CALCULATING THE GPA. APPLICANTS WITH GPAs MAY BE ABLE TO RAISE THEIR UNDERGRADUATE GPA BY TAKING ADDITIONAL UNDERGRADUATE COURSES BEFORE APPLYING.

NOTE: Provisional admission is contingent upon maintaining GPA of 3.0 and grades of A or B (and/or making up any identified deficiencies) within the first 9 credits or within 2 semesters, whichever comes first.

Applications submitted before the due date with all supporting documentation are eligible for EARLY ADMISSION. Applications that are incomplete will be rejected. Applicants who meet all regular admission criteria will be admitted automatically to the program. Applicants who meet criteria for provisional admission are ONLY considered IF additional openings remain at that point. Under NO circumstances will ANY admission requirement be waived. Dual enrollment is only permitted in exceptional circumstances.

The WVU Application for Graduate Admission is available at https://app.applyyourself.com/AYApplicantLogin/fl_ApplicantConnectLogin.asp?id=wvugrad.
The Department of Special Education Program Application Form can be obtained at sped@mail.wvu.edu.
For assistance in completing applications, please contact sped@mail.wvu.edu or 304-293-3450.

APPLICATION SUBMISSION PROCESS
Applications for admission beginning FALL semester: DUE AUGUST 1
Applications for admission beginning SPRING semester: DUE JANUARY 1
Applications for admission beginning SUMMER semester: DUE MAY 1

Rolling admissions processing policy means that applications for admissions are processed and a decision is made as soon as all application materials are available, and applicants are notified immediately after the application review has been completed.

Major Learning Goals

MULTICATEGORICAL SPECIAL EDUCATION

The Department of Special Education believes that students with mild/moderate disabilities have a right to equitable, appropriate, and high quality education programs and services designed to meet their unique needs in inclusive schools and community settings; special educators play a critical role in the education of children with mild/moderate disabilities as co-instructors in inclusive general education classrooms, primary instructors in resource rooms or special classes, or as consultants to the classroom teacher; and these individuals and families should be empowered to make decisions about services and supports required to succeed academically, socially, and as a part of the citizenry.

This program has been designed so that program graduates can accomplish the following learning goals:

1. provide high quality educational services to children and adolescents with mild/moderate disabilities in inclusive classrooms and resource rooms in elementary and secondary schools;
2. demonstrate knowledge and application of current evidence-practices as exemplified by reputable research and professional standards to deliver individualized instruction to develop academic and social skills;
3. collaborate with other professionals and agencies in delivery of services and engage in individual and systems advocacy for individuals and their families, and empower individuals and families to participate in program planning and decision making; and
4. reflect in and on practice and respond responsibly to the legal, ethical, social, and cultural issues encountered when working with individuals with mild/moderate disabilities and their families in today’s world.

Severe/Multiple Disabilities

Degree Offered

* Master of Arts with a major in Severe/Multiple Disabilities

The graduate program in Severe/Multiple Disabilities at WVU is designed to prepare professional educators to work with children, adolescents, and adults with moderate, severe or profound intellectual disabilities or such disabilities in combination with other impairments. This graduate level program prepares special education teachers and other professionals to engage in current research-based practices to provide high quality educational programs and services for students with significant disabilities on alternate assessment in elementary or secondary schools, or qualifying for developmental disability services in community-based programs for children or adults. WVU is fully accredited by the Higher Learning Commission (HLC), while the program is approved as a teacher education program leading to teaching certification by the West Virginia Department of Education, accredited by the Council for Accreditation of Educator Preparation (CAEP) and nationally recognized by the Council for Exceptional Children.
The program offers these options:

1. Master's degree in Special Education with certification in Severe Disabilities Grades K-Adult (or the equivalent in other states);
2. Master's degree only in Special Education with emphasis in Severe/Multiple Disabilities

Fall

Select one of the following:

SPED 629

SPED 680

Total credit hours: 36

NOTE: Courses may be completed in any order (except culminating practicum or project, which must be completed after all other required courses are completed) and students may start the program in any semester.

Major Learning Goals

SEVERE/MULTIPLE DISABILITIES

The Department of Special Education believes that children, adolescents, and adults with severe/multiple disabilities have a right to appropriate services designed to meet their unique needs in inclusive school and community settings; persons with disabilities must develop skills enabling them to participate as fully as possible in family and community life and to enjoy civil rights and personal freedoms as responsible citizens in a free society; and individuals and families should be empowered to make decisions about services and supports with sufficient support from service providers.

This program has been designed so that program graduates can accomplish the following learning goals:

1. provide high quality educational services to children, adolescents, and adults with severe/multiple disabilities in inclusive environments in elementary, secondary and post-secondary schools and/or community disability services programs;
2. demonstrate knowledge and application of current evidence-practices as exemplified by reputable research and professional standards to deliver individualized instruction and other supports to promote academic learning, social skill development and functional skill acquisition to lead to outcomes of independent or supported living, productive employment and community participation;
3. collaborate with other professionals and agencies in delivery of services and engage in individual and systems advocacy for individuals and their families, and empower individuals and families to participate in program planning and decision making; and
4. reflect in and on practice and respond responsibly to the legal, ethical, social, and cultural issues encountered when working with individuals with severe/multiple disabilities and their families in today’s world.

Special Education

Degrees Offered

- Master of Arts in Special Education
- Doctor of Education with a major in Special Education

MASTER OF ARTS IN SPECIAL EDUCATION

OVERVIEW

The graduate program in Special Education at WVU is designed to develop knowledge and skills related to working with children, adolescents and adults with exceptionalities in special education or disability services in schools or community agencies.

PROGRAM DELIVERY FORMAT

This program is offered entirely ONLINE throughout the United States and in approved international locations.

RETENTION REQUIREMENTS

To maintain ACTIVE student status, students must enroll in at least one (1) course during the effective term of admission and also at least two (2) courses every year. Students who fail to sustain enrollment each year will be converted to inactive status and will be required to reapply to the university and program and meet any additional new requirements in effect at that time. Students are expected to comply with all academic and conduct policies as outlined in the WVU Graduate Catalog, in the WVU Student Handbook, and on the Department of Special Education website.

Retention in the program and/or graduation is based on SATISFACTORY PROGRESS or maintaining a GPA of 3.0 with a grade of A or B in ALL required courses. A grade of Incomplete will only be approved for emergency situations; all requirements must be completed BEFORE the end of the next academic semester. Students who DO NOT clear the grade of Incomplete by the deadline will be assigned a grade of FAIL by the instructor immediately after the due date.
Students who do NOT earn a grade of A or B in a required course will be required to RE-TAKE THE COURSE to be eligible for the culminating practicum or culminating project.

Students who do NOT maintain a GPA of 3.0 (includes courses with grade of Incomplete) in a given semester MAY be placed on PROBATION and permitted one (1) additional semester to increase the GPA to 3.0.

Students whose GPA is too low to be raised by a probationary period OR who do NOT obtain a GPA of 3.0 after the probationary period will be subject to DISMISSAL from the program.

Students who engage in academic dishonesty will be assigned 0 points for the assignment or exam for the first offense, an F for the course for the second offense, and dismissed from the program for the third offense. Students dismissed from a program will NOT be permitted to re-apply to ANY special education program.

GRADUATION AND COMPLETION REQUIREMENTS

The MINIMUM time to complete most certification or degree programs in special education is:

-TWO (2) calendar years at the rate of SIX (6) credits per semester (part-time study – recommended for students who are working full time and/or have extensive family responsibilities)

-ONE AND ONE HALF (1.5) calendar years at the rate of NINE (9) credits per semester (full-time study- recommended for students who are not employed and/or have minimal family responsibilities.

The MAXIMUM time to complete a graduate degree program at WVU (including all transferred courses) is EIGHT (8) years

DOCTOR OF EDUCATION WITH MAJOR IN SPECIAL EDUCATION

OVERVIEW

The doctoral program in Special Education at WVU is designed to develop knowledge and skills related to leadership roles and responsibilities in personnel preparation at colleges and universities or in professional development at pubic schools or community agencies to prepare professionals who will work with children, adolescents and adults with exceptionalities in special education or disability services.

PROGRAM DELIVERY FORMAT

This program is offered entirely ONLINE throughout the United States; it is NOT available in international locations.

RETENTION REQUIREMENTS

To maintain ACTIVE student status, students must enroll in at least one (1) course during the effective term of admission and also at least two (2) courses every year. Students who fail to sustain enrollment each year will be converted to inactive status and will be required to reapply to the university and program and meet any additional new requirements in effect at that time. Students are expected to comply with all academic and conduct policies as outlined in the WVU Graduate Catalog, in the WVU Student Handbook, and on the Department of Special Education website.

Retention in the program and/or graduation in ANY doctoral program in the College of Education and Human Services is based on SATISFACTORY PROGRESS or maintaining a GPA of 3.25 with a grade of A or B in ALL required courses. A grade of Incomplete is only approved for emergency situations; all requirements must be completed BEFORE the end of the next academic semester. Students who DO NOT clear the grade of Incomplete by the deadline will be assigned a grade of FAIL by the instructor immediately after the due date.

Students who do NOT maintain a GPA of 3.25 (includes courses with grade of Incomplete) in a given semester MAY be placed on PROBATION and permitted one (1) additional semester to increase the GPA to 3.0. Students whose GPA is too low to be raised by a probationary period OR who do NOT obtain a GPA of 3.25 after the probationary period will be subject to DISMISSAL from the program. Students who engage in academic dishonesty will be assigned an F for the course for the first offense and dismissed from the program for the second offense. Students dismissed from a program will NOT be permitted to re-apply to ANY special education program.

RESIDENCY REQUIREMENT

WVU requires ALL students to complete one (1) academic year in residency as part of the requirements for any doctoral degree. In this online program, an alternative residency requirement will be satisfied by completing the professional practice experiences in local public schools and colleges/ universities over a two (2) year period.

ADMISSIONS TO THE MASTER'S DEGREE IN SPECIAL EDUCATION

REGULAR ADMISSION

REGULAR admission is granted ONLY WHEN ALL these criteria are met:

Requirements for ALL graduate programs:
• Bachelor’s degree from a regionally accredited institution with minimum GPA* of 3.00 out of 4.0;
• Passing scores on a nationally standardized test of academic ability within a 10 year period: 850 (old) OR 280 (new) on the Graduate Record Exam (GRE) OR 400 on the Miller Analogies Test (MAT) OR passing scores on the Praxis CASE (see below) OR passing scores on Praxis PPST (ONLY if already certified) OR Master’s degree in education or a closely related area from a regionally accredited institution with minimum GPA of 3.25 OR professional certificate or license plus documented two (2) years consecutive teaching or clinical experience within the past 10 years verified by copy of certificate or license plus employer letter;
• Recommendation for Graduate Study (see Program Application Form) completed by a previous course instructor;

NOTE: OTHER TESTS MAY BE SUBSTITUTED IF DOCUMENTATION PROVIDED SHOWS CONTENT SUBSTANTIALLY EQUIVALENT TO CASE.

PROVISIONAL ADMISSION
PROVISIONAL admission** MAY be considered under SOME circumstances IF ALL other criteria are met:

• Bachelor’s degree from a regionally accredited institution with minimum GPA* of 2.75+ out of 4.0
• Bachelor’s degree from a regionally accredited institution with minimum GPA* of 2.50+ out of 4.0 ONLY IF:
  a. undergraduate degree transcript documents minimum GPA of 3.0 in final 30 credits; OR
  b. graduate transcript documents at least 18 credits leading to teaching certification with minimum GPA 3.25; OR
  c. prior Master’s degree in education or closely related area with minimum GPA 3.25

NOTE: UNDERGRADUATE COURSES ONLY ARE COUNTED IN CALCULATING THE GPA. APPLICANTS WITH GPAs MAY BE ABLE TO RAISE THEIR UNDERGRADUATE GPA BY TAKING ADDITIONAL UNDERGRADUATE COURSES BEFORE APPLYING.

NOTE: Provisional admission is contingent upon maintaining GPA of 3.0 and grades of A or B (and/or making up any identified deficiencies) within the first 9 credits or within 2 semesters, whichever comes first.

Applications submitted before the due date with all supporting documentation are eligible for EARLY ADMISSION. Applications that are incomplete will be rejected. Applicants who meet all regular admission criteria will be admitted automatically to the program. Applicants who meet criteria for provisional admission are ONLY considered IF additional openings remain at that point. Under NO circumstances will ANY admission requirement be waived. Dual enrollment is only permitted in exceptional circumstances.

The WVU Application for Graduate Admission is available at https://app.applyyourself.com/AYApplicantLogin/fl_ApplicantConnectLogin.asp?id=wvugrad.
The Department of Special Education Program Application Form can be obtained at sped@mail.wvu.edu.
For assistance in completing applications, please contact sped@mail.wvu.edu or 304-293-3450.

APPLICATION SUBMISSION AND REVIEW PROCESS
Applications for admission beginning FALL semester: DUE AUGUST 1
Applications for admission beginning SPRING semester: DUE JANUARY 1
Applications for admission beginning SUMMER semester: DUE MAY 1

Rolling admissions processing policy means that applications for admissions are processed and a decision is made as soon as all application materials are available, and applicants are notified immediately after the application review has been completed.

ADMISSIONS TO THE DOCTORAL DEGREE IN SPECIAL EDUCATION

Admissions criteria are based on qualifications associated with academic success in doctoral study as well as qualifications that candidates applying for leadership positions are expected to have when seeking employment as faculty at colleges and universities (personnel preparation option). In recognition of the fact that NO SINGLE CRITERION is an adequate predictor of satisfactory completion of a program of study or subsequent success in a professional career, faculty endorse MULTIPLE CRITERIA for admission to this doctoral program. Requirements for admission are weighed using a +, 0, - system in judging each applicant and are considered necessary but not sufficient eligibility criteria for admission.

REGULAR ADMISSION

Admission to the program with REGULAR student status is based upon consideration of how well each applicant meets ALL the criteria outlined below.

Every applicant will be reviewed to determine the extent to which they meet these criteria:
*Bachelor’s degree from a regionally accredited institution with minimum GPA of 3.0 out of 4.0
*Masters degree from a regionally accredited institution in Special Education or Gifted Education with a minimum GPA of 3.25 out of 4.0
*Graduate Record Exam (GRE) TOTAL (verbal plus quantitative) score within a 7 year period of 1000 total (old) or 300 (new) with minimum verbal 450 (old) or 155 (new) and minimum analytical 4.5
*documentation of state teaching certification in some area of special education or gifted education
*MINIMUM of two (2) full years of documented experience providing instruction as a public school teacher of students with exceptionalities in grades PK-12
**personal goal statement illustrating a lifelong commitment to excellence in special education and/or gifted education and articulating specific research interests and clear career goals focused on a leadership position in special education in special education**

**academic writing sample documenting knowledge of special education/gifted education, skill in organizing and expressing ideas, and appropriate citations of current sources in the professional literature**

**three (3) letters of reference supporting academic ability AND professional commitment from professionals currently working in special education or gifted education; the first letter must be from an individual with a doctoral degree in special education or gifted education with direct knowledge of the applicant’s academic achievement during the Master’s degree program; the second letter must be from an employment supervisor who can verify job performance during the most recent employment as special educator or gifted educator; the third letter should be from another professional**

**NOTE: ALL letters should address leadership potential, work habits and ethics, and interpersonal skills**

Applicants who meet the criteria specified above will also be required to undergo:

* **a personal interview demonstrating knowledge of the field and communication and interpersonal skills**
* **a proctored writing sample to verify ability to express ideas with logic, clarity and correct grammar**

Applicants who meet all criteria are NOT automatically granted admission to the program. Admission is contingent upon number of applicants, number of current students, and availability of graduate faculty.

**PROVISIONAL ADMISSION**

Admission to the program with PROVISIONAL student status will be considered for individuals who meet most but not all of the criteria outlined above; however, students admitted provisionally may be required to complete additional requirements such as completing additional courses or practicum experiences.

Individuals from international areas can NOT obtain a U.S. visa to enroll in an online program and this online doctoral program is NOT currently available in international areas.

Students who are admitted but fail to enroll in that semester must re-apply for admission.

The WVU Application for Graduate Admission is available at [https://app.applyyourself.com/AYApplicantLogin/fl_ApplicantConnectLogin.asp?id=wvugrad](https://app.applyyourself.com/AYApplicantLogin/fl_ApplicantConnectLogin.asp?id=wvugrad). The Doctoral Program Application Form can be obtained by contacting sped@mail.wvu.edu.

For assistance in completing applications, please contact sped@mail.wvu.edu or 304-293-6932.

**APPLICATION SUBMISSION AND REVIEW PROCESS**

Each applicant will submit an application and supporting documentation by the following dates:

**Requests for PRIORITY admission beginning FALL semester:** DUE JAN 15  
**Requests for FINAL* admission beginning FALL semester:** DUE JULY 1

Soon after each deadline, the Doctoral Admission Committee will review application files and meet to discuss applicants. Decisions will be based on applicant qualifications, program openings, and available faculty.

ALL applicants will be notified of the committee’s decision in writing by the following dates:

**Decisions for PRIORITY admissions for FALL semester:** MAILED APRIL 1  
**Decisions for FINAL* admissions for FALL semester:** MAILED AUGUST 1

*FINAL admission dates are NOT applicable if all available program openings have already been filled.

PROGRAM OF STUDY

Programs are designed by the doctoral student, the student’s advisor, and the doctoral committee to meet the student’s career goals. Programs of study comply with all applicable institutional requirements, but typically they include coursework in excess of the minimum college requirements to meet these goals. The leadership training provided through this program draws on the many available strengths and resources of a major university. Development of research skills is a major focus of the program, along with advanced training related to the development, education, and rehabilitation of persons with exceptionalities. Students may complete coursework in a number of programs and colleges in order to take advantage of available interdisciplinary resources. The program encourages study and involvement with faculty from a broad range of disciplines in order to best prepare doctoral students to meet their individual career aspirations as leaders in special education and disability services.

RETENTION

Retention in any program requires completion of all required courses with a grade of A or B in all required courses, a passing score on all required performance assessments, and maintenance of an overall 3.25 GPA. Students who fail to maintain that average will be placed on academic probation and must achieve that average within the next semester or risk being dismissed from the program.

All students are expected to pass a comprehensive examination designed in cooperation with doctoral program committee members and administered after they have completed all required courses to be admitted to candidacy for the doctoral degree.

All students are expected to propose, conduct, and defend original research approved by the doctoral program committee to satisfy the requirements for the doctoral degree.

PERSONNEL PREPARATION IN SPECIAL EDUCATION AREA OF EMPHASIS

A minimum cumulative GPA of 3.25 is required
A grade of C or higher is required in all graduate coursework

Major Learning Goals

MASTER’S DEGREE

The Department of Special Education believes that children, adolescents, and adults with exceptionalities deserve high quality programs and services provided by master professionals who are well trained in legal, ethical, social and practical aspects of program development and delivery.

This program has been designed so that program graduates can accomplish the following learning goals:

1. to recognize applications of federal and state laws and policies that govern services to individuals with exceptionalities in school and community programs;
2. acquire knowledge and skills to provide effective educational programs and other support services to children, adolescents and adults with exceptionalities at the preschool, elementary, secondary, and post-secondary level in or community settings;
3. to design, implement and evaluate accommodations, adaptations, and interventions that are grounded in current evidence-based practices documented to be successful in the professional literature; and
4. reflect in and on practice and respond responsibly to the legal, ethical, social, and cultural issues encountered when working with young children, children, adolescents and adults with an autism spectrum disorder in today’s world.

DOCTORAL DEGREE

The Department of Special Education believes that future faculty who plan to work in professional preparation programs that prepare prospective and practicing special educators to work with children and adults with exceptionalities should be well-prepared to perform at a high level to succeed in the roles and responsibilities associated with the teaching, research, and service missions at colleges and universities.

This program has been designed so that program graduates can accomplish the following learning goals:

1. to provide effective and effective instruction and supervision for special education personnel in professional preparation programs at the preservice and inservice levels;
2. to design, conduct and disseminate experimental and applied research, engage in program development and evaluation, and participate in other scholarly activities;
3. to provide professional service to colleges and universities, local schools and community agencies, regional and state education and human services agencies, and national professional and advocacy organizations.
4. to interpret and apply the knowledge base in special education with respect to polices, practices, issues and trends in special education and/or disability services.
Department of Communication Sciences and Disorders

Degrees Offered

- Master of Science in Speech Pathology (CAA-Accredited)
- Doctor of Audiology (CAA-Accredited)
- Doctor of Philosophy in Communication Sciences and Disorders

The Master of Science (M.S.) and Doctor of Audiology (Au.D.) programs in the Department of Communication Sciences and Disorders address the knowledge and skills that prepare graduates to excel in the professions of speech-language pathology and audiology, respectively. Both graduate programs meet the clinical and academic requirements for professional licensure and certification, and both are accredited by the Council on Academic Accreditation in Audiology and Speech-Language Pathology (CAA) of the American Speech-Language-Hearing Association. Graduates of the professional programs are well-prepared to diagnose and treat the full range of communicative disorders in all age groups and to practice competently as speech-language pathologists and audiologists in a wide range of clinical settings.

The Doctor of Philosophy (Ph.D.) in Communication Sciences and Disorders is a customized post-professional program that prepares audiologists and speech-language pathologists to become effective teachers and researchers with an area of expertise within hearing science and disorders or within speech and language sciences and disorders.

The Department of Communication Sciences and Disorders provides professional services to the public through our on-campus clinic. The West Virginia University Speech and Hearing Center offers a wide variety of speech-language pathology services to children and adults as well as being well-equipped to provide complete diagnostic and rehabilitative audiology services. Fully staffed by professional supervisors, these state-of-the-art clinical facilities help meet the health care needs of the community, while supporting the professional education of the department’s graduate students.

Audiology

Doctor of Audiology (Au.D) Program

The Doctor of audiology (Au.D) program at West Virginia University was inaugurated in 2004 when the clinical doctorate became the entry-level degree for the profession of audiology. The Au.D. is a professional program that emphasizes the knowledge and skills requisite to practice audiology in an effective, ethical, and inclusive manner. The purpose of the Au.D. program is to provide students with the academic and clinical preparation to diagnose and treat the full range of hearing and vestibular disorders in all age groups. It is the goal of the program to prepare audiologists who are competent to work effectively in a wide variety of clinical settings, including hospitals, clinics, special treatment centers, schools, industry, and private practice. The program consists of 116 credit hours of academic coursework and clinical practicum experiences, including a fourth year residency. Graduates must demonstrate acquisition of all knowledge and skills delineated in the Standards for the Certificate of Clinical Competence in Audiology (CCC-A). The Au.D. program is accredited by the Council on Academic Accreditation in Audiology and Speech-Language Pathology (CAA) of the American Speech-Language-Hearing Association.

ADMISSION

All applicants for the Au.D. program must have a baccalaureate degree or equivalent from a regionally accredited institution of higher learning and present the following by the January 15 deadline:

1. An undergraduate major in speech pathology and audiology or communication sciences and disorders
   [In some cases, applicants without preparatory coursework in speech-language pathology and audiology may be considered for graduate admission, but the program of study will require completion of additional coursework, which may extend the length of the program];
2. One official transcript from each college attended, including final grades for the fall courses taken during the previous semester if applicable [Transcripts must be submitted to CSDCAS for verification];
3. An overall undergraduate grade point average (GPA) of at least 3.0 (A = 4.0);
4. An official copy of the applicant’s Graduate Record Examination (GRE) scores [GRE Scores must be submitted to CSDCAS using the ETS Designated Institution code 6934];
5. Proof of English language proficiency for any applicant whose first language is not English [A score of at least 213 on the computer-based TOEFL, 550 on the paper-based TOEFL, or 79 on the internet-based TOEFL, or a score of at least 6.5 on the IELTS is required of applicants whose first language is not English];
6. Three letters of recommendation (at least 2 from academic faculty) that reflect the applicant’s academic and clinical abilities, potential for success in graduate studies, and personal qualities predictive of professional success as a speech-language pathologist [Letters of recommendation must be submitted through CSDCAS];
7. A personal statement submitted through CSDCAS describing the applicant’s goals, aspirations, and motivation for pursuing professional doctoral education in audiology

Applications for the Doctor of Audiology program must be submitted through through the Communication Sciences & Disorders Centralized Application Service (CSDCAS). To access CSDCAS, visit https://portal.csdcas.org. To be considered for admission an application must be “complete” on or before
January 15. A complete application is one that has been e-submitted and all transcripts, scores, statement, letters of recommendation, and payments have been received by CSDCAS and attached to the application. Documents should be sent two weeks prior to the January 15 deadline to ensure that items arrive on time. The timeliness of the application is considered the responsibility of the applicant.

Applicants subsequently recommended for acceptance will then be instructed to submit a WVU Graduate application with the WVU application fee and official transcripts that include final fall grades to complete the admission process. It is only possible for admitted students to begin the Au.D. program in the fall semester.

Total Hours 116

**RESIDENCY REQUIREMENTS**

All students in the Au.D. program must be full-time in residence during the program of study. The minimum duration for graduate study is eleven consecutive semesters (including summer sessions). Part-time students are not eligible for admission to the Au.D. degree program.

**Major Learning Goals**

**AUDIOLOGY**

The Au.D. program has been designed to provide a firm understanding of the normal processes of hearing and communication with the academic and clinical preparation to diagnose and treat the full range of hearing disorders in all age groups. Our goal is to prepare audiologists who are competent to work in a wide variety of clinical settings, including hospitals, clinics, special treatment centers, schools, industry, and private practice. The program’s intent is to provide the knowledge and skills necessary to practice audiology autonomously in an effective, ethical manner. To this end, the following learning goals have been established by the program:

- Mastery of the knowledge and skills necessary to practice audiology in diverse settings encompassing all of the many facets of our profession.
- Ability to work autonomously, using sound judgment in a competent and ethical manner.
- Active contribution to the profession and community via active membership in professional organizations, scholarly activity, and taking the initiative in public education concerning hearing and balance disorders.
- Competence in audiology to serve: 1) individuals who are deaf or hearing impaired; 2) industry; and 3) the medical community with special emphasis in under-served areas of our state.

**Communication Sciences and Disorders**

**Doctor of Philosophy (Ph.D.) Program**

The Ph.D. degree program in Communication Sciences and Disorders provides a rigorous course of study along with mentored research and teaching experiences to enable students to become high-quality researchers and serve effectively as leaders in the discipline. Graduates of the program are prepared to assume careers as researchers and scholars at colleges, universities, hospitals, industrial settings, and research facilities. The program is not designed to provide an advanced clinical degree in either audiology or speech-language pathology. Rather, the Ph.D. degree will be conferred in recognition of the attainment of the highest academic excellence and productive scholarship. As doctoral programs are an integral step on a life-long journey of learning and scholarship, the Department of Communication Sciences and Disorders has established the Ph.D. program in Communication Sciences and Disorders to support students in developing knowledge, judgment, skills, and attitudes to facilitate their growth and learning throughout their careers as researchers, scholars, and teachers.

The Ph.D. program in Communication Sciences and Disorders is a highly individualized experience that includes prescribed and selected coursework designed to meet the objectives of the program, ongoing participation in research and other scholarly activities, and the independent completion of a dissertation under the mentorship of a research advisor. As such, the time needed to complete the program will vary to ensure sufficient time for
the building of adequate teaching and research skills and a creditable curriculum vitae. Some diligent and highly motivated students may be able to complete their work in less time, whereas others may require more time to achieve independence as a scholar and researcher.

ADMISSION AND PERFORMANCE STANDARDS

A Ph.D. Advisory Committee composed of one member from each of the major areas of study will screen the applications and make admissions decisions based on the following criteria, in consultation with the faculty in their area of emphasis. In particular, applicants must have the following:

1. An entry-level clinical degree for the profession of speech-language pathology (i.e., M.A. or M.S.) or audiology (i.e., M.A., M.S., or Au.D.)
2. A cumulative grade point average of 3.25 or higher (A=4.0) upon completion of a graduate degree
3. A score at or above the fiftieth percentile on the Verbal and Quantitative sections and a score of at least 4.0 on the Analytical Writing section on an official copy of the Graduate Record Examination (GRE)
4. A TOEFL score of at least 79 (internet version), 213 (computer-based), 550 (paper-based) or an IELTS score of at least 6.5, if English is not the applicant’s native language
5. An interview with the Ph.D. advisory committee that will include the writing of an essay on an assigned topic to be evaluated by program faculty
6. Three letters of recommendation, two of which must come from previous instructors or professors who can comment meaningfully on the applicant’s potential for Ph.D. study
7. A personal statement that addresses the applicant’s professional goals within speech and language sciences and disorders or within hearing science and disorders

Doctor of Philosophy (Ph.D.) Program

PROGRAM REQUIREMENTS

RESIDENCY COMMITMENT

The Ph.D. degree program in communication sciences and disorders requires a full-time commitment. Each student who is accepted into the program works on a daily basis with faculty who will help to hone skills and to sharpen the research focus. Furthermore, each student will be expected to conduct research and pursue scholarship activities that will inform classroom teaching and lead to meaningful presentations and publications. Consequently, applicants are required to sign a statement confirming their commitment to full-time status before they may be admitted to the program.

CURRICULUM

Upon admission to the Ph.D. program, students enroll in a series of required courses in the doctoral core, in the research core, and in the area of specialization. Ph.D. students are expected to maintain a cumulative GPA of at least 3.25 each semester. Upon completion of coursework, students must successfully complete written and oral comprehensive examinations to be eligible for candidacy.

Ph.D. students enroll in a minimum of six credits of independent study, extending over at least three semesters, under the supervision of their mentor. Typically, the focus of the independent study will be on the development of independent research skills through involvement with ongoing or forthcoming projects in the mentor’s research program. Each student will be expected to present at one or more scientific meetings and submit at least two manuscripts for publication in relevant peer-reviewed journals before graduating.

Major Learning Goals

COMMUNICATION SCIENCES AND DISORDERS

The primary objective of the Ph.D. degree program is to assist students to develop in-depth mastery of subject matter in a narrow and specific area within the broad discipline of communication sciences and disorders and, simultaneously, to broaden one’s knowledge base in other fields related to the special area of interest, such as health, linguistics, education, and the physical, biological, and socio-behavioral sciences. With the intent to prepare high-quality researchers to serve as leaders in the discipline of communication sciences and disorders, graduates of the program will be prepared to assume independent careers as researchers and scholars at colleges, universities, and hospitals, as well to become key personnel at leading private and public research institutes. Specifically, the learning goals of the Ph.D. program in Communication Sciences and Disorders include:

• The development of independent research skills through sequential experiences that involve the planning and conduct (or implementation) of research projects, the writing of grants, and the dissemination of research findings through the presentation of papers at scientific and other professional conferences and publication in peer-reviewed journals in the discipline;
• The preparation of academicians equipped to teach the university students of tomorrow through guided coursework in educational methods and evaluation, instructional technologies including online course delivery, international and intercultural experiences, and classroom practice; and
• The acquisition of advanced knowledge and understanding of a specialized area with the ability to apply this understanding to research, teaching, and scholarship.
Speech Pathology

Degree Offered:
• Master of Science with a major in Speech Pathology

Master of Science (M.S.) Program in Speech Pathology

The purpose of the Master of Science degree program in Speech Pathology is to provide aspiring professionals with a firm understanding of the normal processes of speech, language, and hearing; the competence to diagnose and treat the full range of communicative disorders in all age groups; and the opportunity to practice in a wide variety of clinical settings, including schools, hospitals, clinics, special treatment centers, and private practice. The M.S. in speech pathology, therefore, is a professional program that emphasizes the knowledge and skills requisite for competent and ethical clinical practice. Graduation thus depends on completion of all academic requirements and the demonstration of sound clinical expertise. The M.S. in speech pathology program is accredited by the Council on Academic Accreditation in Audiology and Speech-Language Pathology (CAA) of the American Speech-Language-Hearing Association. Students are expected to become familiar with the Standards for the Certificate of Clinical Competence in Speech-Language Pathology. Additional information regarding graduate student expectations is outlined in the current edition of the Graduate Student Handbook for Speech-Language Pathology.

ADMISSION

All applicants for the M.S. in Speech Pathology Program must have a baccalaureate degree or equivalent from a regionally accredited institution of higher learning, and present the following by the February 1 deadline:

1. An undergraduate major in speech pathology and audiology or communication sciences and disorders
   [In some cases, applicants without preparatory coursework in speech pathology and audiology (communication sciences and disorders) may be considered for graduate admission, but the program of study will require two additional semesters of added coursework];
2. One official transcript from each college attended, including final grades for the fall courses taken during the previous semester if applicable
   [Transcripts must be submitted to CSDCAS for verification];
3. An overall undergraduate grade point average (GPA) of at least 3.0 (A = 4.0);
4. An official copy of the applicant’s Graduate Record Examination (GRE) scores
   [Official GRE Scores including percentiles must be submitted to CSDCAS using the ETS Designated Institution code 6934];
5. Proof of English language proficiency for any applicant whose first language is not English
   [A score of at least 213 on the computer-based TOEFL, 550 on the paper-based TOEFL, or 79 on the internet-based TOEFL, or a score of at least 6.5 on the IELTS is required of applicants whose first language is not English];
6. Three letters of recommendation (at least 2 from academic faculty) that reflect the applicant’s academic and clinical abilities, potential for success in graduate studies, and personal qualities predictive of professional success as a speech-language pathologist
   [Letters of recommendation must be submitted through CSDCAS];
7. A personal statement submitted through CSDCAS that addresses the applicant’s goals for professional graduate study in speech-language pathology

Applications for the Master of Science program must be submitted through through the Communication Sciences & Disorders Centralized Application Service (CSDCAS). To access CSDCAS, visit https://portal.csdcas.org. See http://csd.wvu.edu for details. To be considered for admission, an application must be “complete” on or before January 15 to provide time for transcripts to be verified. A complete application is one that has been e-submitted and all transcripts, scores, statement, letters of recommendation, and payments have been received by CSDCAS and attached to the application. Documents should be received by CSDCAS by January 15 to ensure an application is verified by February 1. The timeliness of the application is considered the responsibility of the applicant.

All applicants being considered for admission will be provided with an interview with members of the CSD faculty. Applicants subsequently recommended for acceptance will then be instructed to submit a WVU Graduate application with the WVU application fee and official transcripts including the undergraduate degree to complete the admission process. It is only possible for admitted students to begin the M.S. program in the fall semester. Part-time students are not eligible for admission.

Major Learning Goals

SPEECH PATHOLOGY

The M.S. in Speech Pathology program is a professional program that emphasizes the knowledge and skills requisite to practice speech-language pathology in an effective, ethical, and inclusive manner. Its purpose is to provide aspiring professionals with the following:

- Understanding of the normal processes of speech, language, and hearing.
- Ability to autonomously diagnose and treat the full range of communicative disorders in all age groups.
- Competence to work in a wide variety of clinical settings, including hospitals, clinics, special treatment centers, schools, industry, and private practice.
- Mastery of knowledge and skills necessary to practice speech-language pathology in diverse settings encompassing all facets of the profession.

Department of Learning Sciences and Human Development

Degrees Offered

- Graduate Certificate in Health Professions Education
- Master of Arts in Educational Psychology (EdP) with areas of emphasis in the following: (1) Educational Psychology, (2) Evaluation and Research, (3) Child Development and Family Studies
- Doctor of Education in Educational Psychology (EdP) (not currently admitting new students as new PhD in Learning Sciences and Human Development is being developed)
- Master of Arts in Instructional Design and Technology (IDT)
- Doctor of Education in Instructional Design and Technology (IDT)
- Doctor of Philosophy in Education with areas of emphasis in the following: (1) Learning, Instructional Design, and Technology; and (2) Human Development and Family Studies

In the Department of Learning Sciences and Human Development, we focus on understanding and promoting deep learning and healthy human development across the lifespan as central unifying goals. To accomplish these goals, we believe three interrelated areas must be recursively considered: a) Socio/Cultural Context, b) Design, and c) Learning Theory/Human Development. These three areas align with traditional conceptions of Learning Sciences as a field, but we extend those conceptions to explicitly encompass contributions from the study of human development and to situate much of our work in rural or Appalachian social, cultural, and historical contexts. The department houses programs in child development and family studies, educational psychology, instructional design and technology, and program evaluation and research.

ADMINISTRATION

CHAIR
- Reagan Curtis - Ph.D.

ASSISTANT CHAIR
- Amy Root - Ph.D.

Educational Psychology

Degrees Offered

- Graduate Certificate in Health Professions Education
- Master of Arts in Educational Psychology (EdP)
  Areas of Emphasis in:
  Educational Psychology
  Evaluation and Research
  Child Development and Family Studies
- Doctor of Education in Educational Psychology (EdP)

GENERAL DESCRIPTION

The Educational Psychology Program in the College of Education and Human Services offers opportunities for graduate study and research leading to a Graduate Certificate in Health Professions Education, a Master of Arts (MA) degree with one of three areas of emphasis (General Educational Psychology, Program Evaluation and Research, or Child Development and Family Studies), and a doctoral degree. We also contribute to college-
wide PhD in Education emphases in a) Learning, Instructional Design, and Technology and b) Human Development and Family Studies (see http://cehs.wvu.edu/grad/doc/phd-education).

CERTIFICATE IN HEALTH PROFESSIONS EDUCATION (HPE)
The Certificate in Health Professions Education is designed for health professionals who are (1) looking to move into a new career as health care educators, (2) who may desire educational knowledge and skills in their present fields, and (3) for those who are in or are preparing for educational leadership positions, but may lack formal training in education. This program will provide a foundation in the theory and practice of curriculum design, instruction, student performance assessment, program evaluation, education leadership and management, and educational scholarship.

The Certificate in Health Professions Education (HPE) is a joint offering from the School of Medicine (SoM) in the Health Science Center and the Educational Psychology program in the College of Education and Human Services (CEHS). The program consists of completing an online orientation module before taking any courses, developing a professional development plan, and completing four courses in Educational Psychology, one of which requires a capstone project where an educational plan is developed for a health care setting.

MASTER OF ARTS IN EDUCATIONAL PSYCHOLOGY
The principal goal of the Master of Arts in Educational Psychology is the education and training of professionals who will serve teaching and learning environments with responsibilities related to instruction, service, and research. Graduates are well prepared to continue their education and professional development in relevant doctoral programs or to take positions in: educational agencies at local, state, and federal levels; public and private human service centers; medical centers; business and industry; and other settings.

Completion of the program develops competencies related to learning, development, instruction, and program evaluation and research. Professional preparation focuses on one of the following three areas of emphasis: General Educational Psychology, Program Evaluation and Research, or Child Development and Family Studies.

General Educational Psychology. The General Educational Psychology area of emphasis is designed for individuals who want to pursue general preparation in learning, development, measurement, and research with the flexibility of selecting individualized additional coursework that supports their professional development goals. All students in this area of emphasis complete four core courses, additional electives, and are required to design and conduct either 1) a project that solves a practical problem in learning or development or 2) a research thesis that investigates a topic of relevance to learning or development.

Evaluation and Research. The Evaluation and Research area of emphasis is designed for individuals with interest in conducting research and evaluation projects for private and public educational organizations and agencies. All students in this area of emphasis complete six core courses in research and evaluation methodology, additional electives, and are required to design and conduct at least one full program evaluation during the course of their studies.

Child Development and Family Studies. The Child Development and Family Studies (CDFS) area of emphasis provides students with opportunities for conducting research and working with families and children in educational, applied, or other clinical settings. Courses in child development, family studies, parenting strategies, and interpersonal communication skills are supplemented with field experiences in a variety of settings. Individuals studying Child Development and Family Studies may select a professional focus from a wide variety of areas including child care specialist, early childhood teacher, developmental specialist, child life educator, parent educator, extension specialist, and family life specialist.

DOCTORAL PROGRAM IN EDUCATIONAL PSYCHOLOGY (NOT CURRENTLY ADMITTING NEW STUDENTS AS NEW PHD IN LEARNING SCIENCES AND HUMAN DEVELOPMENT IS BEING DEVELOPED)
The Educational Psychology program in the College of Education and Human Services offers opportunities for graduate study and research leading to the Doctor of Education. The Learning Goals for the Ed.D. in Educational Psychology seek to educate and train professionals who will focus on teaching and learning environments as they carry out their missions in instruction, service, and research. The principal goal of the program is the education and training of professionals who will focus on teaching and learning environments as they carry out their missions associated with instruction, service, and research. Professional preparation centers on (a) learning and development; (b) instructional development; and (c) measurement, research, and statistics. Accordingly, students are expected to achieve competencies in these areas. The student, the student's adviser, and the student's committee jointly plan programs to meet particular career needs. Minor fields of study are also planned for each student as appropriate. In addition to the general requirements of the University and the College of Education and Human Services, there is a core of courses supporting the development of competencies required of all graduate students in the program.

FACULTY
CHAIR & PROFESSOR
• Reagan P. Curtis - Ph.D. (University of California at Santa Barbara)
  Cognition, Development, Research, Program Evaluation and Statistics, Educational Psychology (Coordinator); Evaluation and Research (Coordinator)
ASSISTANT CHAIR

• Amy Root - Ph.D. (University Maryland, College Park)
  Child Development and Family Studies (Coordinator); Parenting and the Development of Emotional Competence, Individual Differences, Development of Shy/Wary Behavior

PROFESSORS

• Barbara Warash - Ed.D. (West Virginia University)
  Director of the WVU Nursery School, Early Childhood Education, Reggio Emilia
• William Beasley - Ed.D. (University of Georgia)
  Instructor presence in online environments, integration of external technologies with learning management systems, elearning in cross-cultural contexts

ASSOCIATE PROFESSORS

• Kristin Moilanen - Ph.D. (University of Nebraska)
  Adolescent Development, Self Regulation, Risk Behavior, Family Relationships
• Jessica Troilo - Ph.D. (University of Missouri)
  Cultural Conceptions of Fathers, Divorced Fatherhood, the Influence of Social Media on Relationships

ASSISTANT PROFESSORS

• Sara Anderson - Ph.D. (Tufts University)
  Long term pre-K effects, Pre-K quality among diverse populations, Neighborhood effects, Residential mobility
• Paul R. Hernandez - Ph.D (University of Connecticut)
  Measurement, Statistics, Research Methods, Program Evaluation, Applied Social and Educational Psychology
• Melissa Patchan - Ph.D (University of Pittsburgh)
  Mechanisms of Peer Assessment of Writing, Effectiveness and Validity of Peer Feedback, Issues of Measurement, Multiple Sources, and Validity of Peer Ratings
• Karen Rambo-Hernandez - Ph.D (University of Connecticut)
  Educational Psychology, Multilevel Statistical Modeling, Longitudinal analysis, Assessment of Academic Growth and Diversity in STEM
• Abhik Roy - Ph.D. (Western Michigan University)
  Program Evaluation, Unification of Evaluation Practice and Theory (Grand Theory), Research on Evaluation (ROE), Evaluation of Non Academic Units within Academia
• Suzanne Walraff-Hartman - Ph.D. (George Mason University)
  Three to Five-Year Child Development and Learning, Childcare Preschool Environmental Factors, At-risk Child Populations

CLINICAL ASSISTANT PROFESSOR

• Gregory D. Epps - Ed.D. (West Virginia University)

TEACHING ASSOCIATE PROFESSOR

• Patricia Haught - Ed.D. (West Virginia University)
  Cognitive Development, Learning Strategies

TEACHING ASSISTANT PROFESSOR

• Nancy Taylor - Ph.D. (West Virginia University)
  Parenting Education, Conflict and Crisis Management, Family Therapeutic Interventions

CLINICAL INSTRUCTOR

• Nancy Wolfe-Diligard - M.A. (West Virginia University)
  Communication in Families, Adolescent Drug and Alcohol, Gambling and Families; Parenting Infants, Toddlers, and Adolescents

EARLY CHILDHOOD TEACHERS

• Keri Law - M.A. (West Virginia University)
  Early Childhood Education, Early Childhood Teacher
• Melissa Workman - M.S., M.A. (West Virginia University)
  Early Childhood Education, Early Childhood Teacher, Associate Director of the WVU Nursery School

PROFESSOR EMERITUS

• Carol Markstrom - Ph.D. (Utah State University)
• Richard T. Walls - Ph.D (Pennsylvania State University)
• Anne H. Nardi - Ph.D (West Virginia University)
ASSOCIATE PROFESSOR EMERITUS

- Floyd L. Stead - Ed.D
  (West Virginia University)

Admissions for Graduate Certificate in Health Professions Education

Students can apply to the program online at http://graduateadmissions.wvu.edu/how-to-apply as a non-degree student (CEHS 4597 – Non-Degree Certificate). Students enrolled in a WVU degree program may also apply for the certificate program, but should be aware that no more than 6 credits earned toward the certificate may be applied to another degree (and vice versa). To be admitted as a non-degree student, a student must present evidence of a baccalaureate degree. The student must also maintain a 3.00 grade point average for the 12 credit hours of course work, a CEHS requirement. This average must be maintained as long as the student is enrolled.

Admissions for Educational Psychology Master of Arts

All Educational Psychology masters require the same admissions materials and follow similar processes to make admissions decisions. All faculty members affiliated with the program evaluate the credentials submitted for all completed applications. A majority must indicate acceptance and at least one faculty member must be willing to serve as the student’s advisor. Final approval for admission rests with the relevant Program Coordinator.

In line with best practices for evaluation and assessment, set cutoff scores for tests and GPA are not used to make unidimensional admissions decisions. Instead, applicant materials are reviewed as a total package and admissions decisions are based on multidimensional factors. That said, successful applicants tend to be at or above the 50th percentile on the GRE or MAT, have undergraduate GPAs at or above 3.0, and graduate GPAs (if any) at or above 3.25.

Applicants interested in being considered for admission to the Educational Psychology MA graduate program should indicate that interest on the educational psychology graduate program application form provided by the West Virginia University Office of Admissions and Records, which can be found here: http://graduateadmissions.wvu.edu/how-to-apply

In addition to the completed online application form, the following items must be sent to the appropriate Administrative Assistant (see below) before the admission process can be initiated:

1. A completed WVU online graduate application: http://graduateadmissions.wvu.edu/how-to-apply
2. The applicant's undergraduate and graduate (if any) transcript(s)
3. An official copy of the results of either the Graduate Record Examination or the Miller Analogies Test (GRE/MAT may be waived for General Educational Psychology and Evaluation and Research majors, but is required for Child Development and Family Studies majors) and for non-native English speakers an official copy the TOEFL showing a score of 79 or above (no conditional admissions will be considered)
4. Three (3) letters of recommendation
5. A personal vita (resume)
6. A written statement of approximately 500 words, indicating the applicant's fit for the specific major they wish to be admitted to and goals relative to receiving a graduate degree in Educational Psychology. This statement should indicate which faculty members in the program have research or teaching interests that align with the student's own interests and therefore might appropriately mentor the student if admitted to the program.

Review of applicants for admission will not begin until after all items 1-6 listed above have been received by the relevant administrative assistant.

Admission materials should be uploaded to the WVU online graduate application. For answers to questions regarding application materials please contact the appropriate administrative assistant:

General Educational Psychology area of emphasis or Evaluation and Research area of emphasis contact: Dana Musick (dmusick2@mail.wvu.edu) c/o The Department of Learning Sciences and Human Development, West Virginia University, PO Box 6122, Morgantown, West Virginia 26506-6122

Child Development and Family Studies area of emphasis contact: Judy Martin (Judy.Martin@mail.wvu.edu) c/o The Department of Learning Sciences and Human Development, West Virginia University, PO Box 6122, Morgantown, West Virginia 26506-6122

Graduate Certificate in Health Professions Education

“Orientation to HPE” Module - To be completed before or during first semester

Professional Development Plan - To be posted on the Health Sciences program portfolio site during the first course

HPE Core Content

Must maintain a 3.0 GPA for all coursework

**PROGRAM FEATURES FOR GRADUATE CERTIFICATE IN HEALTH PROFESSIONS EDUCATION.**

The Certificate in Health Professions Education consists of the following major features: (1) Required online orientation module: This online “Orientation to HPE” module provides an overview of the Certificate program, opportunities in the HPE field, and educational/medical education terminology. This module, housed on Health Science’s SOLE platform, must be completed before or during the semester in which the first course is taken. (2) Professional Development Plan: This written document helps to identify a student’s HPE career interests and goals, learning products developed through each course, and how each product meets the student’s career goals. (3) 4 three-credit hour courses from CEHS: Educational Psychology (see table above). (4) Capstone experience: An educational plan and program evaluation plan to address a health care need is developed in EDP 617, Program Evaluation.

Total credit hours: 33

**Doctor of Education**

A program of study consists of a minimum of seventy-two hours of graduate credit beyond a bachelor's degree or forty-two hours beyond a master's degree (not including dissertation credits). In addition, successful completion of the competency requirements in the areas of (a) learning and development, (b) instruction, and (c) research are mandatory before a student submits a dissertation prospectus and is admitted as a doctoral candidate.

If a student enters the program with a master's degree, a maximum of thirty hours (of the seventy-two) of relevant course credit from the student's master's degree program may be included in the doctoral program of studies.

**Major Requirements**

A student must have an average grade of B for all courses in the program and make satisfactory progress toward the completion of the program competencies to remain in good standing.

Select one of the following course groups:

<table>
<thead>
<tr>
<th>Course</th>

</thead>
</table>

**DOCTORAL COMMITTEE**

Each student's doctoral committee shall be composed of a minimum of five members, the majority of whom are regular graduate faculty members. At least two members of the committee (including the permanent advisor), but no more than three must be members of the Educational Psychology Faculty. At least one member of the doctoral committee must be from the student's minor area of study. No more than one person may be a non-member of the Graduate Faculty of WVU. One member of the committee, who has professional relevance to the program of study, must be from outside the program area. The Doctoral Program Coordinator, the Chair of the Department, and the Dean of the College must approve the composition of the doctoral committee.

The duties of the doctoral committee are to: (1) discuss and review the program of study, (2) monitor progress in the program of study, (3) review changes to the approved program of study, (4) evaluate the competency products, (5) approve the dissertation prospectus and admit the student to candidacy, and (6) supervise and approve the dissertation.

The student with the approval of the student's permanent advisor may initiate changes in committee membership. Such a change must be agreed to by the member being replaced (if still available to serve), the student, the major advisor, the new committee member, and the Dean. After approval of any committee membership change, a record of the new committee composition shall be filed in the CEHS Office of Student Advising and Records and in the Educational Psychology Program student file.

**COMPETENCY REQUIREMENTS**

As an integral part of the Doctoral Program in Educational Psychology, students are required to demonstrate mastery of competencies by producing written products that require them to make use of the work in their formal program of study. The student's committee in collaboration will describe the specific nature of how these competencies will be demonstrated with the student. The competencies are met through satisfactory completion of projects, activities, and/or other experiences.

Competency outcomes will be assessed through three competency products developed by students in the program. These products are in the areas of (a) learning and development, (b) instruction, and (c) research. These products will be developed and assessed according to specifications created by
a subcommittee organized by the student's adviser. The student and his/her adviser will select two members for each subcommittee from the members of the student's doctoral committee. The third member of each subcommittee will be appointed by the full doctoral committee (in consultation with the student and his/her adviser) and must have expertise in the area being assessed. Recommendations for the third member from the student and his/her adviser are welcomed.

ADMISSION TO CANDIDACY

Admission to candidacy for the doctoral degree shall be granted only to persons holding a master's degree. Students may enter the doctoral program without a master's degree but must earn a master's degree within the program before advancing to candidacy for the doctoral program. This master's program shall require a thesis.

Admission to candidacy occurs after:

1. Successfully completing an acceptable Master's Degree.
2. Filing an approved program of study.
3. Successfully completing competency requirements for the Major (in the areas of Learning and Development, Instruction, and Research) and the requirements for the Minor.
4. Satisfactory completion of College requirements (i.e., a student is officially admitted to candidacy for the Ed.D. after obtaining unanimous approval of the written dissertation prospectus from the doctoral committee).
5. A signed copy of the approved prospectus and the form for "Admission to Candidacy for Ed.D." is filed in the CEHS Office of Student Advising and Records. (This constitutes a contract for the dissertation research that the student may begin to conduct.)

DISSERTATION

Students are to meet the competency requirements before submitting a dissertation prospectus to the doctoral committee. The prospectus must be prepared, in consultation with the doctoral committee chairperson, on a topic in the major field, showing a potential for contribution to existing knowledge. Once the doctoral committee chairperson approves the prospectus, the student will schedule a meeting of the full doctoral committee to have the prospectus examined. The committee may accept, reject, or require modification of the prospectus. Each committee member will sign an approved prospectus, including all modifications specified by the committee. The approved prospectus will be filed in the Office of Student Advising and Records and in the Educational Psychology Program student file.

A final oral defense of the completed dissertation shall be held. All doctoral committee members (or approved substitutes) shall be present for the dissertation defense. A committee member other than the student's advisor may serve as dissertation chairperson if the person is a regular member of the graduate faculty and if the student and all members concur in writing. Meetings of the doctoral committee are open to the public, except when in executive session.

Major Learning Goals

EDUCATIONAL PSYCHOLOGY

The principal goal of the Educational Psychology program is the education and training of professionals who will focus on teaching and learning environments as they carry out their missions associated with instruction, service, and research. Professional preparation centers on the following three content areas: a) Learning and development, b) Instructional development, and c) Measurement, research, and statistics. Additional learning goals associated with specialized majors are provided below.

Graduate Certificate in Health Professions Education

• Use a systematic process to conduct a needs assessment of learners in healthcare education, design educational interventions and materials, integrate emerging technologies.
• Design face-to-face, blended, and online learning environments incorporating research-based learning principles that address teaching and assessment decisions.
• Evaluate the efficiency, effectiveness, and appeal of healthcare learning environments.
• Design studies and disseminate impacts of designed learning environments to prepare healthcare professionals to translate skills and knowledge for benefit of patient care and healthcare systems.
• Develop an educational intervention plan for a healthcare environment.

Master of Arts: Program Evaluation and Research area of emphasis

• Demonstrate understanding of the philosophical and historical foundations of inquiry.
• Apply appropriate quantitative, qualitative, and mixed-methods research tools to answer practical educational, programmatic, and other social research questions.
• Apply appropriate program evaluation tools to conduct formative and summative evaluations of existing and prospective educational programs.
• Demonstrate understanding of ethical issues in research and evaluation.
• Create informative reports of research and evaluation studies tailored appropriately for multiple stakeholders and decision-makers.

Master of Arts: Child Development and Family Studies area of emphasis

• To understand and apply theories and current research on child development and family studies.
• To recognize and understand the complexities of diversity (e.g., SES, gender, sexual orientation, ethnicity) in families according to relationship dynamics, gender roles, parent-child relationships, and other dimensions of family life.
• To foster critical thinking relative to the scholarly literature in the field and the applications of knowledge to work with children, adolescents, and families.
• To develop the knowledge and skills for interpreting research as well as other scholarly-derived literature.
• To conduct original research through the application of critical thinking and research skills and content-based scholarly-derived knowledge.
• To build professional development skills that may include preparation for an applied career working with children, adolescents, and/or families or doctoral studies to pursue an academic career.
• To advance and foster students’ intellectual interests and their career goals.

Instructional Design and Technology

Degrees Offered

• Master of Arts in Instructional Design and Technology (IDT)
• Doctor of Education in Instructional Design and Technology (IDT)

The online Master of Arts in Instructional Design and Technology Program is designed for the individual who wants to apply cutting edge instructional technologies and design strategies in business, education, and other educational settings. The Learning Goals for the program are to advance knowledge and critical thinking relative to instructional design and instructional technologies. Features of the program include courses in educational psychology, instructional design and technology, and program evaluation.

The Instructional Design and Technology Doctor of Education (Ed.D.) Program is designed to allow a graduate to immediately apply knowledge and skills to pragmatic needs in any educational setting, particularly for those interested in teaching and conducting research in a university environment. The Learning Goals for the program are to enhance knowledge and skill-building that are designed into the courses and address three areas of competency, including inter-connectivity, instructional design, and software-multimedia design. Students are encouraged to address research toward the pragmatic needs of students, programs, and institutions. IDT knowledge and skills are developed within courses, practicums, and independent studies as jointly determined by student and advisor. Student interests and career plans are discussed upon enrollment in the program and students are advised to be prepared to identify these in their application and throughout the program.

Students are encouraged to identify topics of interest and to develop an appropriate topic for inquiry as they take courses. Research in instructional technology is addressed throughout the courses and supplements the college research core requirements. The program features seminar courses that provide opportunities to conduct research and develop instructional interventions, including technological integration of tools. Teaching opportunities may be found working with faculty members, the college’s Teaching and Learning Technologies Center (TLTC), and internships in corporate settings in the Morgantown / Fairmont area.

FACULTY

PROFESSORS

• William Beasley - Ed.D. (University of Georgia)
  Instructor presence in online environments, integration of external technologies with learning management systems, elearning in cross-cultural contexts
• R. Neal Shambaugh - Ph.D. (Virginia Polytechnic Institute and State University)
  Professor, Instructional Design, Instructional Technology Integration, Cognition, Visual Literacy

ASSOCIATE PROFESSORS

• Terence C. Ahern - Ph.D (Pennsylvania State University)
  IDT Program (Coordinator); Instructional Systems Design, Social Media Design, Game Development, Information Technologies, Instructional Design, Network Architecture
• Ugur Kale - Ph.D. (Indiana University Bloomington)
  Instructional Technologies, Instructional Design, Professional Development, Online Communication, Teacher Education, Content Analysis, Social Network Analysis

ASSISTANT PROFESSOR

• Jiangmei (May) Yuan - Ph.D. (University of Georgia)
Learning, Design, and Technology; Formative Assessment, Feedback Design, and Learner Engagement in Online Learning Environments; Robotics in STEM Teacher Education

PROFESSORS EMERITI

• Paul W. DeVore
• David L. McCrory - Ph.D. (Case Western Reserve University)
• Edward C. Pytlik - Ph.D. (Iowa State University)

Admissions Requirements - Master’s

• IDT MA Admission requirement

• A cumulative GPA of 3.0 or higher
• An undergraduate degree from an accredited university
• Cover letter describing past work experience and goals for graduate study
• Transcript(s) of completed undergraduate program
• Resume or Vitae
• GRE or GMAT scores OR a narrative describing two years of professional work experience (individuals with 2+ years work experience can ask to have the testing requirement waived)
• Three letters of reference commenting on professional background and plans for graduate study
• International students: submit scores from either TOEFL or IELTS

Admissions Requirements - Doctorate- Ed.D

• Undergraduate GPA of at least 3.0
• Master's Degree
• Total GRE scores of 302 (on the verbal and quantitative combined) or MAT score of 418-423
• International students: TOEFL score of at least 79-80 Internet Based/213 Computer Based/550 Paper Based and a combined total score of at least 214 on the GRE verbal and the TOEFL Internet Based scores
• Letter of application explaining purpose, motivation, and research interests for an IDT Ed.D. degree
• Three letters of references
• Scholarly writing sample
• Curriculum Vita

Please note that the Instructional Design and Technology program does not grant conditional or provisional admissions into the degree. Further the program faculty will not review incomplete or missing admissions material.

Admissions materials for the Instructional Design and Technology master and doctoral program should be uploaded to the online application. For answers to questions about the application materials contact:

Dana Musick (dmusick2@mail.wvu.edu) c/o The Department of Learning Sciences and Human Development, West Virginia University, PO Box 6122, Morgantown, West Virginia 26506-6122

Major Learning Goals
INSTRUCTIONAL DESIGN AND TECHNOLOGY

Major features of the Instructional Design and Technology (IDT) program include course preparation in educational psychology, instructional design, multimedia, and research methods. Three areas of competencies are featured: networks, instructional design and development, and use of software and multimedia.

The IDT program is designed to address the following learning goals:

- Understand the context for technology use, history of the field, theoretical foundations, trends and issues, and ethical uses of technology in educational settings.
- Develop an awareness of current IT tools and practices.
- Apply learning principles to instruction.
- Design, implement, and evaluate the use of technology and media in instruction and to support learning.
- Conduct research on the design, use, and evaluation of technology, teaching, and educational programs.
Degrees Offered

- Master of Science, Aerospace Engineering (M.S.A.E.)
- Master of Science, Chemical Engineering (M.S.Ch.E.)
- Master of Science, Civil Engineering (M.S.C.E.)
- Master of Science, Computer Science (M.S.C.S.)
- Master of Science, Electrical Engineering (M.S.E.E.)
- Master of Science, Energy Systems Engineering (M.S.E.S.E.)
- Master of Science, Engineering (M.S.E.)
- Master of Science, Industrial Engineering (M.S.I.E.)
- Master of Science, Industrial Hygiene (M.S.)
- Master of Science, Material Science and Engineering (M.S.M.S.E)
- Master of Science, Mechanical Engineering (M.S.M.E.)
- Master of Science, Mining Engineering (M.S.Min.E.)
- Master of Science, Petroleum and Natural Gas Engineering (M.S.P.N.G.E.)
- Master of Science, Safety Management (M.S.)
- Master of Science, Software Engineering (M.S.S.E)
- Doctor of Philosophy, Aerospace Engineering (Ph.D.)
- Doctor of Philosophy, Chemical Engineering (Ph.D.)
- Doctor of Philosophy, Civil Engineering (Ph.D.)
- Doctor of Philosophy, Computer Science (Ph.D.)
- Doctor of Philosophy, Computer Engineering (Ph.D.)
- Doctor of Philosophy, Electrical Engineering (Ph.D.)
- Doctor of Philosophy, Industrial Engineering (Ph.D.)
- Doctor of Philosophy, Material Science and Engineering (Ph.D.)
- Doctor of Philosophy, Mechanical Engineering (Ph.D.)
- Doctor of Philosophy, Mining Engineering (Ph.D.)
- Doctor of Philosophy, Occupational Safety and Health (Ph.D.)
- Doctor of Philosophy, Petroleum and Natural Gas Engineering (Ph.D.)

Degree Programs

The Benjamin M. Statler College of Engineering and Mineral Resources (Statler College) graduate programs are administered through seven academic departments:

- Chemical and Biomedical Engineering
- Civil and Environmental Engineering
- Lane Department of Computer Science and Electrical Engineering
- Industrial and Management Systems Engineering
- Mechanical and Aerospace Engineering
- Mining Engineering
- Petroleum and Natural Gas Engineering

The M.S. degree in Energy Systems Engineering, the M.S. in Engineering and the M.S. and the Ph.D. in Material Science and Engineering are degrees administered by the Statler College and available to students from of its academic units participating in those degree programs. Statler College facilities are primarily housed on the Evansdale campus in the Engineering Sciences Building, the Mineral Resources Building, the Engineering
Research Building, and the Advanced Engineering Research Building. These buildings house state-of-the-art research facilities, well-equipped teaching laboratories, computer classrooms and offices for the faculty and administration of the graduate programs.

The Ph.D. program prepares graduates for leadership in industrial, government or academic fields. The college offers a doctor of philosophy with areas of specialization in aerospace, chemical, civil, computer, electrical, industrial, mining, and petroleum and natural engineering, as well as computer science, material science and engineering and occupational safety and health.

Designated master's degree programs in engineering are offered in aerospace, chemical, civil, electrical, industrial, mechanical, mining, petroleum and natural gas, and software engineering, as well as computer science, energy systems engineering, and material science and engineering. The college offers two accredited master of science degrees in industrial hygiene and safety management. The MSIH and MSSM programs are accredited by the Applied Science Accreditation Commission (ASAC) of ABET, http://abet.org. A master of science in engineering (M.S.E.) degree is offered to qualified students as determined at the departmental level.

Currently, the college offers graduate certificate programs in computer forensics, information assurance and biometrics, interactive technologies and serious gaming, and software engineering. For specific information about a program, students should review research and graduate studies information on the specific department section.

---

**ADMINISTRATION**

**DEAN**  
- Eugene V. Cilento - Ph.D. (University of Cincinnati)  
  Glen H. Hiner Dean

**ASSOCIATE DEAN FOR ACADEMIC AFFAIRS**  
- David A. Wyrick - Ph.D. (University of Missouri-Rolla)

**ASSOCIATE DEAN FOR RESEARCH**  
- Pradeep P. Fulay - Ph.D. (University of Arizona)

**ASSISTANT DEAN FOR ADMINISTRATION**  
- R. Jason Dean - M.A. (West Virginia University)

---

**Degree Designation Learning Goals**

**MASTER OF SCIENCE (MS)**

**Industrial Hygiene**

The M.S. in Industrial Hygiene is accredited by the Applied Science Accreditation Commission of ABET. Upon graduation, with a Masters of Science degree in Industrial Hygiene, students will have:

- Ability to use the techniques, skills, and modern scientific and technical tools necessary for professional practice such as:
  - Principles and methods of industrial hygiene
  - Principles and methods of ergonomics
  - Principles and methods of safety
  - Principles of environmental sciences (environmental elective)
  - Principles of epidemiology and biostatistics
  - Principles and methods of control of physical and chemical hazards

- Ability to apply knowledge of math, science, and industrial hygiene
- Ability to design and conduct experiments, analyze and interpret data, develop implementation strategies, and shape recommendations so that results will be achieved and findings will be communicated effectively
- Ability to work individually, in teams, and/or in multi-disciplinary teams to identify, formulate, and solve problems using industrial hygiene, safety, and ergonomics knowledge, skills, and tools
- Ability to formulate or design a system, process, or program to meet desired needs
- Understanding of professional and ethical responsibility and the broad education and knowledge of contemporary issues necessary to understand the impact of solutions in a global and societal context
- Recognition of the need for and an ability to engage in life-long learning

**Safety Management**

Graduates of the Safety Management program must be able to meet the following outcomes at the time of their graduation:

- Demonstrate knowledge and skills to build a comprehensive Safety and Health program based on loss control and regulations
• Demonstrate knowledge and skills to use analytical techniques in the Safety and Health function
• Demonstrate knowledge and skills with federal, state, and non-governmental Safety and Health program standards and best practices
• Demonstrate skills in written and oral communications at the level of professionals in safety and health positions
• Demonstrate knowledge and skills in writing and evaluating safety and health research proposals
• Demonstrate knowledge and skills in using management tools to implement and evaluate Safety and Health programs

MASTER OF SCIENCE IN AEROSPACE ENGINEERING (MSAE)
Upon graduation with a Masters of Science degree in Aerospace Engineering, students will have:

• Expert-level understanding of the advanced principles of aerospace engineering, which include aerospace systems design, aircraft or spacecraft dynamics, stability and control, flight mechanics and simulation, advanced materials, vehicle propulsion, aerodynamics, aeroelasticity, and computational mechanics.
• Ability to complete on time specific research tasks
• Strong oral and written communication skills
• Ability to work independently in a collaborative environment
• Understanding for holding the highest standards of ethical and professional responsibility in the practice of their profession to contribute to the well-being of society and to the advancement of the aerospace engineering profession.

MASTER OF SCIENCE IN CHEMICAL ENGINEERING (MSCHE)
Upon graduation, with a Masters of Science degree in Chemical Engineering, students will have:

• Understanding of advanced principles of chemical engineering, which include reaction engineering, transport phenomena, and thermodynamics
• Expert-level understanding of the background and theory/principles of their research topics.
• Ability to plan research projects, to perform the tasks, and to draw conclusions based on sound scientific and engineering principles.
• Ability to write technical articles for publication in refereed journals and to make oral and poster presentations at technical meetings.
• Demonstrated initiative in research planning and management, including safety and environmental issues.
• Been technically prepared for a lifetime of continuing education.
• Understanding of professional and ethical responsibilities.

MASTER OF SCIENCE IN CIVIL ENGINEERING (MSCE)
Upon graduation, with a Masters of Science degree in Civil Engineering, students will have:

• Ability to function on teams involving multiple civil engineering specialties.
• Ability to apply advanced methodologies in their specialty area.
• Ability to effectively communicate technical information.
• Ability to design and conduct experiments, analyze and interpret data, and develop recommendations.
• An understanding of professional and ethical responsibility.
• An ability to understand the impact of engineering solutions in global and societal context.
• Recognition of the need to engage in life-long learning.
• Ability to use contemporary techniques, skills, and tools necessary for engineering practice in education, industry, and/or government.

MASTER OF SCIENCE IN COMPUTER SCIENCE (MSCS)
Upon graduation, with a Masters of Science degree in Computer Science, students will:

• Have obtained knowledge, skills, and attitudes that will ensure success in professional positions in business, industry, research, government service, or in further graduate or professional study
• Achieve a depth of proficiency in a specific field of Computer Science by completing major courses in one of three areas: computer systems, software and knowledge engineering, or the theory of computation.
• Achieve a breadth of understanding of Computer Science by completing minor coursework requirements in other areas, and by participation in graduate seminar requirements.
• Demonstrate professionalism and communication skills through completion of coursework, project, or thesis defense.

MASTER OF SCIENCE IN ELECTRICAL ENGINEERING (MSEE)
Upon graduation, with a Masters of Science degree in Electrical Engineering, students will:

• Have obtained knowledge, skills, and attitudes that will ensure success in professional positions in business, industry, research, government service, or in further graduate or professional study
• Achieve a depth of proficiency in a specific field of electrical engineering by completing major courses in one of four areas: electronics and photonics; systems and signals; computer systems; or software and knowledge engineering.
• Achieve a breadth of understanding of electrical engineering by completing minor coursework requirements in another area, and by participation in graduate seminar requirements.
• Demonstrate professionalism and communication skills through completion of coursework, project or thesis defense.

**MASTER OF SCIENCE IN ENERGY SYSTEMS ENGINEERING (MSESE)**

Upon graduation, with a Masters of Science degree in Energy Systems Engineering, students will have:

• Understanding of the supply chain for carbon based and “green” energy, for production, conversion or processing, transmission, and point of utilization;
• Advanced training in specialized areas of energy systems engineering;
• Ability to function at the highest levels of expertise in their chosen sub-discipline of energy, and who are well versed in the overall concepts of getting energy to consumers;
• Ability to complete on time specific professional-paper tasks
• Strong oral and written communication skills
• Ability to work independently in a collaborative environment
• Understanding of professional and ethical responsibility
• Ability to understand the impact of engineering solutions in global and societal context
• Recognition of the need to engage in life-long learning

**MASTER OF SCIENCE IN ENGINEERING (MSE)**

Upon graduation, with a Masters of Science degree in Engineering, students will have:

• An expert level understanding of the advanced principles of their engineering specialty
• Ability to apply advanced methodologies in their specialty area
• Ability to design and conduct original experiments, analyze and interpret data, and develop recommendations with a high degree of independence
• Advanced ability to use contemporary techniques, skills, and tools necessary for engineering practice in education, industry, and/or government
• Ability to effectively communicate technical information in the form of a thesis, scientific publication or presentation
• Understanding of professional and ethical responsibility
• Ability to understand the impact of engineering solutions in global and societal context
• Recognition of the need to engage in life-long learning
• Foundational preparation to pursue doctoral studies

**MASTER OF SCIENCE IN INDUSTRIAL ENGINEERING (MSIE)**

Upon graduation, with a Masters of Science degree in Industrial Engineering, students will have:

• Ability to use and master modern and classical industrial engineering methodologies in their area of concentration
• Ability to apply knowledge of math, science, and engineering
• Ability to do research, and to design and conduct experiments, analyze and interpret data, develop implementation strategies, and shape recommendations so that results will be achieved and findings will be communicated effectively
• Ability to work individually, on teams, and/or on multi-disciplinary teams to identify, formulate, and solve problems using industrial engineering knowledge, skills, and tools
• Ability to design and implement or improve integrated systems that include people, materials, information, equipment, and energy using appropriate analytical, computational, and experimental practices
• Understanding of professional and ethical responsibility and the broad education and knowledge of contemporary issues necessary to understand the impact of solutions in a global and societal context
• Recognition of the need for and an ability to engage in life-long learning
• Professional characteristics expected of a successful industrial engineer

**MASTER OF SCIENCE IN MATERIAL SCIENCE AND ENGINEERING (MSMSE)**

Upon graduation, with a Masters of Science degree in Material Science and Engineering, students will have:

• An expert level understanding of the advanced principles of their engineering specialty
• Ability to apply advanced methodologies in their specialty area
• Ability to design and conduct original experiments, analyze and interpret data, and develop recommendations with a high degree of independence
• Advanced ability to use contemporary techniques, skills, and tools necessary for engineering practice in education, industry, and/or government
• Ability to effectively communicate technical information in the form of a thesis, scientific publication or presentation
• Understanding of professional and ethical responsibility
• Ability to understand the impact of engineering solutions in global and societal context
• Recognition of the need to engage in life-long learning
• Foundational preparation to pursue doctoral studies

MASTER OF SCIENCE IN MECHANICAL ENGINEERING (MSME)
Upon graduation, with a Masters of Science degree in Mechanical Engineering, students will have:

• Expert-level understanding of the advanced principles of mechanical engineering, which include mechanical systems design, system dynamics, solid mechanics, energy systems, engineering materials, automatic controls, mechatronics, and computational mechanics
• Ability to complete on time specific research tasks
• Strong oral and written communication skills
• Ability to work independently in a collaborative environment
• Understanding for holding the highest standards of ethical and professional responsibility in the practice of their profession to contribute to the well-being of society and to the advancement of the aerospace engineering profession.

MASTER OF SCIENCE IN MINING ENGINEERING (MSMINE)
Upon graduation, with a Masters of Science degree in Mining Engineering, students will have:

• Ability to investigate and develop solutions to advanced mining engineering problems
• Advanced technical knowledge and research experience needed to address the most challenging contemporary issues within a specialized area of study

MASTER OF SCIENCE IN PETROLEUM AND NATURAL GAS ENGINEERING (MSPNGE)
Upon graduation, with a Masters of Science degree in Petroleum and Natural Gas Engineering, students will have:

• Advanced technical knowledge and engineering skills needed by the oil and gas industry in the state, the nation, and the world
• In-depth knowledge of petroleum and natural gas engineering principles and applications to function effectively in their profession or continue their education
• Ability to perform independent research to solve engineering and scientific problems encountered in their profession
• In-depth petroleum and natural gas scientific and engineering knowledge to provide high quality education in petroleum and natural gas engineering

MASTER OF SCIENCE IN SOFTWARE ENGINEERING (MSSE)
Upon graduation, with a Masters of Science degree in Software Engineering, students will have:

• Knowledge, skills, and attitudes that will ensure success in professional positions in business, industry, research, or governmental service
• Achieved proficiency in the area of Software Project Management.
• Achieved proficiency in Software Analysis and Design.
• Understanding of the process of software Validation and Verification.
• Understanding of the process of Software Evolution.
• Achieved proficiency in Object-Oriented Design of software.

DOCTOR OF PHILOSOPHY (PHD)
Upon graduation with a Ph.D. degree from the Statler College of Engineering and Mineral Resources students will have:

• Ability to initiate research ideas in order to solve specific problems and to write research proposals on these ideas
• Have an expert-level understanding of the advanced principles of their fields of study
• Furthered a novel research idea which has contributed to the state of the art in their specific areas of expertise
• Ability to plan original research projects, to perform laboratory or field based experimental tasks, generate data from those tasks, and draw conclusions based on sound scientific and engineering principles
• Ability to develop innovative research in order to advance the frontiers of knowledge and secure sponsored research
• Ability to write technical articles for dissemination through peer-reviewed, refereed journals or other venues
• Ability to make oral and poster presentations at technical meetings
• Understanding of professional and ethical responsibilities in the practice of their profession to contribute to the well-being of society and to the advancement of their profession
• Demonstrated initiative in research planning and management, including safety and environmental issues
• Technical preparation for and an awareness of the need for life-long learning and continuing education

A student desiring to take courses for graduate credit in the college must comply with the appropriate university regulations for graduate study. To become enrolled in a Statler College graduate program, a prospective student must apply for admission through the Office of Admissions to the department housing the student’s choice of major. Acceptance will depend upon review of the student’s academic background and available facilities in the major program’s department.

An applicant with a baccalaureate degree, or its equivalent, from a program accredited by ABET or an internationally recognized program in engineering or computer science will be admitted on the same basis as engineering or computer science graduates of WVU. Lacking these qualifications, an applicant must first fulfill any special requirements of the department in which the student is seeking an advanced degree.

**Admission**

To enter any of the degree programs, a prospective student must first submit to the WVU Office of Admissions a completed online application, and include:

• Original, official transcripts of all college work attempted
• English proficiency test scores, for international applicants, as required by WVU
• Graduate Record Exam (GRE) scores, if required by the program; the GRE is highly encouraged for all applicants

Depending on the requirements of specific programs, prospective students may also have to submit additional material, such as:

• A resume
• Statement of purpose (typically one page), providing any additional information that would help the Admissions Committee in determining the applicant’s suitability
• Letters of reference, as specified by the program

**Masters Program**

There are three types of degrees granted within the Statler College of Engineering and Mineral Resources:

1. **Master of Science in an engineering discipline** – The Master of Science degree in an engineering discipline requires an undergraduate degree in the same discipline, or closely allied discipline with appropriate remedial course work determined by the department.
2. **Master of Science in engineering** – The Master of Science in engineering degree is intended for students who wish to earn an engineering master's degree but do not have an undergraduate degree in the same field or a closely aligned field. The MSE may be appropriate for students seeking a unique master's program.
3. **Master of Science in an Applied Science area** – The applied science master's programs are intended for students wishing to obtain a master’s degree in one of these non-engineering disciplines (Industrial Hygiene, Safety Management, Software Engineering, and Computer Science).

For these degree programs, students will normally be required to obtain a baccalaureate level of proficiency in subjects directly related to their area of graduate study by taking undergraduate prerequisite courses, either prior to starting or as an integral part of their degree program. The degree designation and additional course requirements will be determined by the department admitting the student. The two types of engineering degrees both require a calculus-based undergraduate education in an accredited program or an internationally recognized program. The applied science areas do not.

Students who do not hold a correspondingly named bachelor’s degree may be admitted into either a discipline-designated program or the undesignated Master of Science in engineering degree program, depending on their credentials.

**Doctoral Program**

Additionally, there are three types of doctoral degrees granted in the Statler College of Engineering and Mineral Resources:

1. **Doctor of Philosophy in an Engineering discipline** – To be eligible for admission into an engineering Doctorate of Philosophy program, a candidate is expected to hold or expect to have received, by the time of enrollment, a B.S. or an M.S. degree in:
   • Some discipline of Engineering from an institution which has an ABET-accredited program in that discipline, or which has an internationally recognized program in Engineering or Mineral Resources
   • Mathematics/Physical Sciences (as specified by individual programs)
2. **Doctor of Philosophy in Computer Science** – To be eligible for admission into the Computer Sciences Doctorate of Philosophy program, a candidate is expected to hold a B.S. or an M.S. degree in:
   • Computer Science, Engineering, or
   • Mathematics/Physical Sciences (as specified by the program
3. Doctor of Philosophy in Occupational Safety and Health – To be eligible for admission into the Occupational Safety and Health Doctorate of
Philosophy program, a candidate is expected to hold a B.S. or an M.S. degree in:
- Industrial Hygiene, Safety Management, Engineering, or
- Mathematics/Physical/Life Sciences (as specified by the program)

For potential doctoral students, although a bachelor's degree is the minimum requirement, applicants are normally encouraged to hold a master’s degree in a relevant discipline.

**ENTRANCE AND CLASSIFICATION**

Not all students who meet minimum college and program requirements will necessarily be accepted. Faculty members in a given graduate program have the right to set standards and conditions more restrictive than those set forth in these guidelines and the right to limit enrollment. For example, a program may choose to reject an applicant because his or her goals are not perceived to match the current needs and resources of the program. Similarly, although a student may be admitted solely for the purpose of enrolling in advanced coursework (e.g., non-degree students); program faculty may decline to allow that student to continue toward a degree even though the student has completed all required coursework successfully.

Students admitted to a graduate program will be classified in one of three categories:

1. **Regular** – To be admitted as a regular graduate student, an applicant must have an equivalent grade point average (GPA) of 3.0/4.0 or better in all previous college work, and must meet all other requirements set by the department or program, including minimum GRE scores. Any exceptions to the stated requirements must be approved by the dean.

2. **Provisional** – An applicant not qualifying for the regular graduate student admission status, either due to insufficient GPA, insufficient GRE scores, incomplete credentials or inadequate academic background, may be admitted as a provisional student.
   a. Any applicant with a GPA below 2.75 in any previous college work cannot be admitted without special approval from the dean. Applications will be returned to the program coordinator if the application shows a GPA less than 2.75 unless it is accompanied by a signed approval from the dean. Students are notified of their provisional status by WVU’s Office of Admissions.
   b. The admitting program is responsible for communicating to the student the requirements they must meet before attaining regular status. The Provisional Student Notification of Requirements Form must be used for this purpose. One copy of the notification should be given to the student, another kept in the student's files and a third given to the dean's office.

3. **Non-degree** – A student who is not deemed qualified for admission to regular or provisional status, or who does not desire to pursue a degree, may be admitted as a non-degree student. Each department determines the minimum qualification requirements for admission as non-degree students. Such students are allowed to take graduate courses but are not allowed to pursue a graduate degree. A non-degree student seeking admission to a graduate program must apply to the specific program.

Admission to a Ph.D. program does not confer or guarantee candidacy for the Ph.D., which requires a separate decision.

The Benjamin M. Statler College of Engineering and Mineral Resources (Statler College) at West Virginia University (WVU) is authorized to admit qualified students to graduate programs that lead to successful completion of the degrees of master’s of science (M.S.) and doctor of philosophy (Ph.D.). The guidelines presented here and departmental guidelines, describe in detail the minimum College requirements for the above mentioned degrees. Each department and program within a department may impose stricter requirements than those required by the College. These requirements are listed in the department guidelines and procedures, and are available on the department website/catalog to prospective and current students.

**Roles of the Faculty, College, and University**

The research and course work requirements of students are administered through research advisors, Advisory and Examining Committees, academic advisors, and graduate program coordinators in the various departments.

- The academic advisor is the faculty member that approves the student's course selections each semester, approves registration and add/drop forms, and maintains the student's files.
- The Advisory and Examining Committee (AEC) advises the student in the selection of courses and in the conduct of the student's research program. The AEC also evaluates the technical quality of the student's research, decides whether to admit the student to candidacy (Ph.D. only), and evaluates the final thesis or dissertation. Normally, the chairman of the AEC is also the director of the student's research (Research Advisor).
- The graduate program coordinator is the person designated by the department chair to assure that the regulations governing the student's graduate program have been fulfilled.

The roles of the research advisor, academic advisor, AEC chair, and graduate program coordinator may be vested in one to four individuals, depending on the policies of the individual department. The administration and oversight of the departments and programs are guided through the department chair, college dean, Office of Student Services, Office of the University Registrar, and Office of Admissions.

- The Department Chair and the College Dean are responsible for ensuring that the guidelines are followed by all parties. The Dean may delegate certain tasks to the Associate Dean for Academic Affairs or to a specified faculty member if there is a special need.
- The Statler College Office of Student Services is the unit the College dean delegate’s responsibility to ensuring that the guidelines are followed by student and faculty.
• The Office of the University Registrar (OUR) oversees graduation/degree audits, registration, grading, and all academic record-keeping for the University.
• The University’s Office of Admissions manages all applications for the University. Applications, transcripts, and standardized test scores will be submitted to WVU Admissions.

Course Load
A full-time graduate student must register for at least nine, but no more than fifteen, credit hours during each regular semester, or at least six, but no more than twelve, credit hours in the summer session. A student wishing to carry more than the maximum course load must file a Course Overload Request.

Student Petition to Resolve Controversies
Attempts to resolve controversies regarding a graduate student's academic progress should first be between the student and the chairperson of the AEC, followed by the graduate program coordinator, the department chair, and the Dean, in that order. If no satisfactory solution of problems can be achieved by the above procedure, the student may then follow the formal University Policies and Procedures for appeals.

The Student Conduct Code addresses both academic and non-academic rights and responsibilities, sanctions, and procedural due process, and includes procedures for undergraduate, graduate, and professional students. The code outlines the procedures to be followed in handling graduate student grievances and appeals.

Degree Options and Hours
For master's students, the College faculty believes that the desirable characteristics of graduate education are the experience gained in advanced coursework and performing and reporting on a research endeavor. Consistent with that philosophy, the College is authorized to grant master's degrees under each of the following three options:

1. Thesis Option – This option requires a minimum of 24 credit hours of course work and at least 6 credit hours of research leading to the thesis.
2. Problem Report Option – This option requires a minimum of 30 credit hours of course work and at least 3 credit hours of a research or design project leading to a formal written report.
3. Course Work Option – This option requires a minimum of 33 credit hours of course work. In addition, the department must require successful completion of a written or oral comprehensive examination. The department or program can choose to offer students within a designated program the course work only option, where courses are determined by the program or the AEC.

For Ph.D. students, the College, consistent with its philosophy, believes that one of the required characteristics of doctoral education are the experiences gained in performing and reporting in an original research endeavor. For this reason, all doctoral programs require a research track culminating in an original research project.

Course Requirements
Specific course requirements are determined by the student's program and AEC. For master's students, no more than 40 percent of course work at the 400 level can count toward meeting degree requirements.

The College requires Ph.D. programs to have a minimum of 18 semester hours of course work, beyond the course credit required for a master's degree, at the 500 and higher levels with an average of 3.0 or better.

Only courses with grades of “A”, “B” or “C” (not “S”) can be used to meet the minimum coursework requirements. Grades of “S” or “U” will only be recorded for research credits and select seminar courses. The college normally will not issue a grade of “I” (incomplete) for research courses.

Departments may establish more stringent requirements than those adopted for the college as a whole.

Research Requirements
The faculty of the college believes that the experience gained in performing and reporting a research endeavor should be over a prolonged period. Therefore, a significant portion of doctoral credit is research based.

• Ph.D. in engineering and the Ph.D. in occupational safety and health degrees require a minimum of 24 credit hours of research at the Ph.D. level (797) leading to a dissertation.
• Ph.D. in computer science degree requires a minimum of 18 credit hours of research at the Ph.D. level (797) leading to a dissertation.

Additionally, master's students (except coursework only students) are also required by their AEC to perform basic research.

• Master's students under the thesis option are required to complete a minimum of 6 credit hours of research at the M.S. level (697).
• Master's students under the problem report options are required to complete a minimum of 3 credit hours of research at the M.S. level (697).
Plan of Study

A Plan of Study must be prepared by the student and the Advisory and Examining Committee (AEC, see below), which outlines the coursework the student must finish and its timeline, the research topic (if applicable for Master’s students and required for Ph.D. students), and the composition of the AEC. This plan must be approved by the student, all members of the AEC, the graduate program coordinator, the department chair, and the college dean by the end of the second semester of the student’s attendance or by the completion of the 12th credit hour applicable to the degree requirements, whichever is later. Otherwise the student may be refused permission to register for the following semester. All students:

1. The AEC may add course requirements to the Plan of Study.
2. The plan of study for a student admitted to a Ph.D. program with only a B.S. degree normally will require sufficient coursework to attain the competencies expected of graduates of that master’s program as well as the competencies expected for the Ph.D. program.
3. The plan of study must include courses to remove deficiencies as well as courses required by the program curriculum. Deficiency courses requirements are determined by the graduate program coordinator at the time of enrollment.
4. The Plan should schedule deficiency courses in a timely manner such that a decision regarding qualification for change of status to regular status can be made at the end of the semester in which the 18th credit hour is completed.

The college provides templates for M.S. Plan of Study and Ph.D. Plan of Study. Any revisions to a plan of study necessitate submission of a complete, revised plan which incorporates all approval signatures.

Advisory and Examining Committee

Each graduate student will form an Advisory and Examining Committee (AEC), with:

- M.S. committees consisting of a minimum of three members.
- Ph.D. committees consisting of a minimum of five members.
- For Ph.D. students, at least one of the five members of the committee must be from outside the degree-granting department.
- The majority of the members of the AEC must be regular members of the graduate faculty.
- A minimum of two members for M.S. and four member for Ph.D. committees must be members of the College Graduate Faculty

Additionally, each department can impose stricter rules on the AEC selection process.

The AEC Chair should be selected by the student in consultation with the Graduate Program Coordinator or the Department Chair. Normally, the AEC Chair should be a member of the degree-granting program. The Chair must be a regular member of the College Graduate Faculty. Non-tenure track faculty may serve as Chair if they are a regular member of the College Graduate Faculty.

Members should be selected by the student in consultation with the AEC Chair. All members should be selected based on their perceived ability to contribute to the progress and evaluation of the student’s research and their ability to work cooperatively with other members and the student. The College Dean and the Department Chair each has the right to appoint one member to this committee.

Members, including the Chair, may resign from the committee after providing a written explanation to the graduate program coordinator and to the chair of the department. Any changes to the AEC must be signed by the previous and new members of the committee, to the extent that a previous committee member is available on campus. The resigning member must complete an AEC Membership Modification Form.

Transfer Credit

A student wishing to apply graduate course credit earned at another institution to a master’s or Ph.D. degree at WVU must complete an Application for Transfer of Graduate Credit to WVU. This form requires the signature of the appropriate department chair or graduate program coordinator. An official transcript from the institution where the course credit was taken must be on file with the WVU Office of Admissions.

For M.S. students, a maximum of 12 semester (vs. quarter) credit hours from other institutions may be transferred for credit at WVU in master’s programs in the college. Individual graduate programs can choose to accept fewer transfer credit hours. Only courses with grades of “A” or “B” may be considered for transfer. For Ph.D. students, appropriateness of accepting transfer credit is left to the discretion of the student’s AEC and department with the restrictions that only courses with grades of “A” or “B” may be considered for transfer and no more than one-third of the minimum semester course credit hours required by the program may be transferred.

After the student completes the appropriate section of the Application for Transfer of Graduate Credit form, the department chair or graduate program coordinator will perform the following tasks:

- Verify that courses from other institutions qualify as valid graduate level work.
- Verify that the request is within the maximum number of allowable credit hours.
- Verify that the credit has been earned within the acceptable time limit.
When the completed application form is returned to the Statler College Office of Student Services, it will then be forwarded to the WVU Office of the University Registrar; they will match forms with transcripts and enter the credit on the student’s permanent record.

**Requirements for Ph.D. Candidacy**

Programs that admit students with only a B.S. degree are encouraged to require such students to demonstrate the competencies expected of a master’s graduate in addition to the competencies required by the doctoral program before achieving candidacy.

Each major under the doctoral program will specify in writing its own requirements and standards for a student to be admitted to candidacy. At a minimum, these requirements will include one written examination, completion of all course requirements and an oral defense of a written research proposal. The AEC may approve the research proposal conditioned upon stipulated changes to the proposal. In such cases, the AEC Chair should ensure that the required changes to the proposal are made by the student before signing the Approval of Candidacy. The AEC Chair must provide a copy of the revised research proposal to all members of the AEC before signing his or her approval.

At the completion of the candidacy requirements, the results must be reported to the dean by the student’s AEC using the Admission to Candidacy for the Ph.D. form. For a positive recommendation for admission to candidacy, no more than one negative vote may be cast. A minimum of one opportunity for reexamination must be available for each student. Students who fail to receive a positive recommendation on re-examination for admission to candidacy are terminated at the end of that semester and may not re-enter the program.

**Maximum Time For Completion**

All requirements for master’s degrees must be completed within eight years preceding the student’s graduation. This is a WVU requirement. Courses taken more than eight years previously must be revalidated for master’s degree credit and procedures to revalidate are outlined in the policy on Revalidation of MS Course Work.

All requirements for Ph.D. degrees must be completed within five years after the student has been admitted to candidacy.

**Second Degree Masters Students**

A student desiring to obtain more than one master’s degree, either enrolled concurrently or returning after earning a master’s degree at WVU, may use up to 25 percent of previous graduate level coursework toward the second degree. The approval for second/concurrent WVU master degree form must be completed for this coursework and needs to be approved by the degree-granting unit. The student must successfully complete additional credit hours so as to constitute the remaining 75 percent of the credit hours required by the additional master’s degree. Individual departments or programs may require higher percentages of original coursework to be earned for a second degree.

**Academic Status**

There are two categories of status: regular/non-degree and provisional.

**REQUIREMENTS FOR EACH STATUS**

The minimum academic standards for students are as follows:

- Regular and non-degree – To be in good standing, a regular or non-degree student must maintain at least cumulative GPA of 3.0/4.0 grade point average throughout the time enrolled in graduate work. A student failing to achieve this standard will be placed on probation.
- Provisional – A student not admitted as a regular or non-degree will be admitted as provisional. A provisional student must obtain and maintain a minimum cumulative GPA of 3.0/4.0 after the completion of the first 9 credit hours of graduate study or he/she will become eligible for suspension.

**CHANGE OF STATUS**

Change of status from provisional to regular may be made for a student with a cumulative GPA of 3.0/4.0 or higher for graduate courses when the student has met the conditions outlined in his/her conditions for acceptance as a provisional student.

For provisional students, by the end of the semester in which the 18th credit hour is completed, the student must be elevated to regular student status, and then the regulations governing good standing for regular students will apply. Failure to meet the provisions of admission, or failure to achieve the required grade point average, will result in suspension.

A non-degree student seeking admission to a graduate program must apply to the specific program. A maximum of 12 credit hours of coursework can be applied toward fulfilling a degree requirement if approved by the graduate program coordinator for that program.

**INTRA-UNIVERSITY TRANSFER**

A student may initiate a transfer to another department within the college or another program within the University by contacting the graduate program coordinator in the department in which the student is currently enrolled and the Dean’s Office. The department’s graduate program coordinator will then send the student’s departmental file, along with an Academic Status Update form to the program that the student is interested in transferring to.
After a decision is made by the new department to accept the transfer, the Academic Status Update form is returned to the Statler College Office of Student Services and the departmental file is transferred to the new academic unit. If not, the departmental file is returned to the department originating the request, and the student may remain in that department.

Probation and Suspension

Graduate students are placed on probation the semester after their cumulative GPA falls below 3.0/4.0. Additionally, a grade of unsatisfactory (“U”) in graduate-level research (697 or 797) makes the student eligible for probation. Two consecutive grades of “U” in research make the student eligible for suspension. Otherwise, college policies regarding probation and suspension mirror those set by the University.

Graduation

THESIS, PROBLEM REPORT AND DISSERTATION APPROVAL PROCEDURES

The AEC must approve the thesis/problem report or dissertation, with no more than one member not signing the approval sheet, before this requirement for degree completion can be considered completed. The thesis/problem report or dissertation must be produced according to the University’s regulations governing the preparation of theses and dissertations. An electronic version of the approved thesis/problem report or dissertation must be submitted to the University library along with the ETD packet. Approval must be obtained from the library.

The student shall furnish each member of the AEC and the department with a copy of the thesis/problem report or dissertation. The copy may be bound, electronic or both, at the discretion of the department.

GRADE POINT AVERAGES REQUIRED FOR GRADUATION

The college requires an overall GPA of at least 3.0/4.0 GPA for (1) all courses taken as a graduate student (graduate or undergraduate level) at WVU; and (2) all courses taken as required for a degree by the Plan of Study. Individual programs and departments may set higher minimum requirements in their written guidelines.

FINAL EXAMINATION FOR THESIS/PROBLEM REPORT OR DISSERTATION

A student should schedule the final oral and/or written examination upon completion of a draft of the thesis/problem report or dissertation, and/or completed coursework, and after fulfilling all requirements set by the AEC. The student will initiate the formal request by the department for the final examination using the Request for Examination form.

The examination is conducted by the AEC. The AEC chair must indicate in advance the time and place of the final examination on the Request for Final Examination form sent to the dean before the examination can be scheduled. Final examinations are open to the public. The final examination must be given:

- No sooner than three weeks after the form is submitted and no later than three weeks before commencement for Ph.D. candidates. This lead time is required for public notice to the University community.
- No sooner than one week after the form is submitted and no later than three weeks before commencement for master’s students.

The AEC may vote to:

1. Pass unconditionally
2. Pass conditionally with minor modifications to the problem report, thesis or dissertation
3. Defer with recommendations for additional work to satisfactorily complete the research and/or the problem report, thesis or dissertation.
4. Fail

If the vote is to pass with minor modifications, the chair should withhold his or her approval until the student has made all stipulated modifications. A vote to defer is not counted as a “fail,” but only one deferral is allowed. More than one negative vote of the committee members will constitute a failure of this examination. The department or program will report the results of the final examination to the Dean’s Office. The student must be given at least one opportunity for re-examination. The department or program may establish guidelines to determine how many opportunities are given for re-examination and whether the student is re-examined on the portions failed. Students who fail the additional opportunities for re-examination are terminated at the end of that semester and may not re-enter the program.

All students must pass a final oral and/or written examination to be certified for graduation. The department or program will report the results of the final examination to the Dean’s Office.

GRADUATION REQUEST

After successful completion of the final examination, students must complete the Final Approval for Graduation form and submit it to the Statler College Office of Student Services, along with other college and departmental requirements.

Students must be active and enrolled at WVU in the semester they plan to graduate. Students in their final semester, who have no course work or research to complete, can register for 1 credit hour, usually research, to satisfy the University enrollment requirement.
Students must apply for graduation in the semester in which they plan to graduate. Students failing to graduate in the semester that they applied will be required to enroll again and apply for graduation in the following semester.

QUALITY

The quality control of each program will be the joint responsibility of the AEC, graduate program coordinator, department chair, and the college dean.

DEADLINES

The graduation date for each semester can be obtained from the Statler College Office of Student Services. It is the student’s responsibility to see that all deadlines are met. Failure to meet the specified deadlines may result in delay of graduation to the following semester.

- Application for Graduation and Diploma - An application for graduation and diploma must be submitted online through the student’s MIX/STAR account.
- Request for Final Examination - Requests to the dean’s office using the Request for Final Exam No examination is to be given until the approval is received. A new form must be filed each time the examination is re-scheduled or repeated. Early scheduling of the final examination is recommended. Timelines (one week for M.S. and three weeks for Ph.D.) will be strictly adhered.
- Final Examination for Thesis/Problem Report or Dissertation – Final examinations, or oral defense, must be given according to the suggested deadlines set by the University Library for a given semester. Final examination material will be given to the AEC chair after the Request for Final Examination has been made. The results, through the return of the signed shuttle sheet, must be delivered to the Statler College Office of Student Services within 24 hours of the defense.
- Thesis, Problem Report or Dissertation Submission - The student must submit to the University Library an electronic copy of the approved problem report, thesis or dissertation with the ETD packet, according to the deadline set by the library. The library will notify the Statler College Office of Student Services upon the initial submission and again when approval has been given.
- Final Deadlines - The Alumni Data Form must be completed and delivered to the departmental graduate program coordinator at least one week before the graduation date. The Final Approval for Graduation form for must be completed and delivered to the dean’s office at least one week before the graduation date. If this form is not submitted, the student will not graduate.

Department of Chemical and Biomedical Engineering

Degrees Offered

- Masters of Science, Chemical Engineering (M.S.Ch.E.)
- Doctor of Philosophy, Chemical Engineering (Ph.D.)

The Department of Chemical and Biomedical Engineering, with fourteen active tenure-track faculty members, approximately 130 undergraduates, and thirty-four graduate students, has one of the oldest doctoral-granting programs in the university. From the initial doctoral degree in 1932, the graduate course program has been based on advanced chemical engineering fundamentals, while the research program has reflected a balance of fundamental research areas and their application to relevant technological areas such as biomedical, bioengineering, catalysis, coal conversion, energy, fuels, materials, polymer processing, systems control, and dynamic simulation.

Degree Programs

The department is authorized to admit students to the following degree programs: master’s of science in chemical engineering (M.S. Ch.E.), master’s of science in engineering (M.S.E.), and doctor of philosophy (Ph.D.). A problem report option is also available as an alternative to the traditional research based master’s degree. Students in these programs must comply with the rules and regulations as presented in the general requirements for graduate work in the college and in the Department of Chemical and Biomedical Engineering. Students interested in pursuing work for a master’s or doctoral degree in chemical engineering should contact the department for copies of the required guidelines and application information.

Program Outcomes

Holders of graduate degrees will understand the advanced principles of chemical engineering, which include reaction engineering, transport phenomena, and thermodynamics.

- Holders of graduate degrees will have an expert-level understanding of the background and theory/principles of their research topics.
- Holders of Ph.D. degrees will be able to initiate research ideas in order to solve specific problems and to write research proposals on these ideas.
- Holders of Ph.D. degrees will have furthered a novel research idea.
- Holders of graduate degrees will be able to plan research projects, to perform the tasks, and to draw conclusions based on sound scientific and engineering principles.
- Holders of graduate degrees will be able to write technical articles for publication in refereed journals and to make oral and poster presentations at technical meetings.
- Holders of graduate degrees will demonstrate initiative in research planning and management, including safety and environmental issues.
- Holders of graduate degrees will be technically prepared for a lifetime of continuing education.
Holders of graduate degrees will understand professional and ethical responsibilities.

Areas of Research

The Chemical and Biomedical Engineering faculty are presently involved in a broad spectrum of research areas which include biomedical and biochemical engineering, systems biology, cancer, bionanotechnology, biomaterials, stem cell technology, dynamic simulation, control systems, molecular dynamics, polymers and biopolymers, catalysis, energy, hydrates, fuels, fuel cells, low-dimensional and high-temperature electronic materials, and reaction engineering. These research activities impact economic development, national security, the stability and sustainability of the energy supply, and many quality-of-life issues.

Faculty members possess a wide variety of industrial experience and are routinely in contact with their counterparts in industry. This contact with real engineering problems enables them to convey a practical experience to students while keeping in perspective many of the fundamental concepts involved in graduate study. The faculty is nationally and internationally recognized through the publication of text books, monograph series, and technical papers. They routinely participate in national and international conferences and advisory meetings. In addition, faculty members have taught short courses throughout the United States and abroad.

FACULTY

CHAIR

• Rakesh Gupta - Ph.D. (University of Delaware)
  Berry Professor and Chair, Polymer Processing, Rheology, Composite Materials

PROFESSORS

• Brian J. Anderson - Ph.D. (Massachusetts Institute of Technology)
  Director, Energy Institute; GE Materials Professor. Natural gas hydrates, Sustainable energy development, Molecular dynamics, Quantum chemical calculations

• Eugene V. Cilento - Ph.D. (University of Cincinnati)
  Dean, Physiological Transport Phenomena, Biomedical Engineering, Image Analysis, Mathematical Modeling

• Pradeep Fulay - Ph.D. (University of Arizona)
  Associate Dean for Research, Advanced Electronics, Magnetic Materials and Devices, Flexible Electronics, Synthesis and Processing of Nanomaterials

• John (Jianli) Hu - Ph.D. (Tsinghua University)
  Statler Energy Chair. Shale Gas Utilization, Catalysis in Refining Processes, Coal and Biomass Conversion

• Richard Turton - Ph.D. P.E. (Oregon State University)
  Bolton Professor, Fluidization, Chemical Process Design, Particle Processing, Powder Processing

• John W. Zondlo - Ph.D. (Carnegie Mellon University)
  Coal Enhancement and Utilization, Carbon Science, Fuel Cells

ASSOCIATE PROFESSOR

• Debangsu Bhattacharya - Ph.D. (Clarkson University)

• Zoica Cerasela Dinu - Ph.D. (Max Planck Inst of Molecular Cell Biology & Genetics & Dresden University of Technology)
  Associate Chair, BMEG. Nanomaterials, Bionanotechnology, Biomimetics

• David J. Klinke - Ph.D. (Northwestern University)
  Systems Biology, Kinetics, Cellular Signal Transduction Pathways, Immunology, Mathematical Modeling, Bioengineering

• Charter D. Stinespring - Ph.D. (West Virginia University)
  Semiconductor Growth and Etching, Surface Kinetics, Thin Films, Electronic Materials

ASSISTANT PROFESSOR

• Ahmed E. Ismail - Ph.D. (Massachusetts Institute of Technology)
  Biomass and biopolymers, Interfacial phenomena, Multi-scale modeling, Algorithm development

• Fernando V. Lima - Ph.D. (Tufts University)

• Jeevan Maddala - Ph.D. (Texas Tech University)
  Microfluidics, cell screening, nanomaterial synthesis

• Hanjing Tian - Ph.D. (Lehigh University)
  Chemical looping combustion, CO2 capture, Shale gas utilization, Biomass gasification and refinery
• Yong Yang - Ph.D. (Ohio State University)
  Stem Cell Technology, Polymer Micro/Nanotechnology, Biomaterials

RESEARCH ASSOCIATE
• Sushant Agarwal - Ph.D. (West Virginia University)
  Polymer Processing, Rheology, Nano-composites, Dispersions

TEACHING ASSISTANT PROFESSOR
• Robin S. Hissam - Ph.D. (University of Delaware)
  Biomaterials, Polypeptides, Drug delivery, Bioengineering and materials science

ADJUNCT PROFESSORS
• Deepak Doraiswamy - Ph.D. (University of Delaware)
  Energy Management, Science and Technology Policy
• Joseph D. Henry - Ph.D. (University of Michigan)
  Polymer Processing, Rheology, Nano-composites, Dispersions
• Charles M. Jaffe - Ph.D. (University of Colorado)
  Theoretical Chemistry, Molecular and Atomic Physics, Nonlinear Dynamics, Astrodynamics, Forensics
• George E. Keller, II - Ph.D. (Pennsylvania State University)
  Separations, Commercial Practice
• Mahesh Padmanabhan - Ph.D. (University of Minnesota)
  Foods, Polymer Science, Rheology
• David L. Walker - Ph.D. (West Virginia University)
  Signal Analysis, Neural Nets, Forensics
• Robert H. Wildi - B.Ch.E. (Cleveland State University)
  Polymer Extrusion
• Stephen Zitney - Ph.D. (University of Illinois at Urbana-Champaign)
  Dynamics, Control and optimization of energy systems; Computational fluid dynamics (CFD) and Process Co-simulation; Pulverized coal combustion; Integrated gasification combined cycle (IGCC); Chemical looping; Supercritical CO2 power cycles; CO2 capture

ADJUNCT ASSOCIATE PROFESSOR
• Bingyun Li - Ph.D., (Chinese Academy of Sciences)
  Associate Professor of Orthopedics, Bioengineering and Advanced Biomedical Devices, Nanotechnology Sorbents, Coatings and Capsules

PROFESSORS EMERITUS
• Eung H. Cho - Ph.D. (University of Utah)
  Mineral Processing, Leaching, Solvent Extraction, Environmental Science
• Dady B. Dadyburjor - Ph.D. (Delaware)
  Catalysis, Reaction Engineering
• Edwin L. Kugler - Ph.D. (Johns Hopkins)
  Catalysis, Adsorption, Coal Liquefaction
• Joseph A. Shaevitz - Ph.D. (Carnegie-Mellon University)
  Design, Design Education, Outcomes Assessment
• Alfred H. Stiller - Ph.D. (University of Cincinnati)
  Physical/Inorganic/Solution Chemistry, Coal Liquefaction, Carbon Science
• Ray Y.K. Yang - Ph.D. (Princeton)
  Biochemical and Chemical Engineering, Nonlinear Dynamics

RESEARCH ASSISTANT PROFESSOR
• Nasagree Garapati - Ph.D. (West Virginia University)
  Carbon dioxide capture and storage (CCS) in various geologic media, utilizing carbon dioxide in gas hydrate reservoirs, petroleum reservoirs and geothermal reservoirs for enhanced gas, oil and heat recovery
• Hualli Wang - Ph.D. (Wayne State University)
  Shale gas, renewable energy, clean energy, energy catalysis, and reaction engineering

Chemical Engineering Masters and Doctoral Admissions Requirements
All applicants for Chemical Engineering Masters and Doctoral Programs must satisfy the following criteria to qualify for admission.

• A minimum cumulative grade point average of 3.0, or equivalent, (on a 4.0 scale) in all previous college work.
• Three letters of reference.

• International students must demonstrate proficiency in communicating in English (a minimum TOEFL score of 550, or iBT score of 79, or IELTS score of 6.5).

• International students must provide Graduate Record Examination scores. (This is recommended for all students and may be required of some students to assist in judging their chances for success in the program.)

• A baccalaureate degrees in chemical engineering, other engineering fields, mathematics, or basic sciences.

Chemical Engineering Masters and Doctoral Degree Programs

Students holding a baccalaureate degree in chemical engineering are eligible for the Master of Science in Chemical Engineering (M.S.Ch.E.) Program.

• Students not holding a baccalaureate degree in chemical engineering are eligible for the Masters of Science in Engineering (M.S.E.) Program. These students must take an additional nine hours of junior level course work in the first two semesters. Alternatively, students taking a total of 18 hours at junior level in the first two semesters are eligible for the M.S.Ch.E. Program. Admitted students will receive a letter specifying the course work required in the first two semesters.

• Admission to the Ph.D. Program is open to all qualified students. Generally, students without a B.S. or M.S. in chemical engineering are not admitted directly to the Ph.D. Program.

• A maximum of twelve semester hours from other institutions may be accepted at WVU for credit toward either the masters or doctoral degrees.

• To remain in good standing, a regular student must achieve and maintain a minimum overall 3.0 GPA in all graduate level courses as well as in all junior level courses.

Curriculum in Master of Science in Chemical Engineering

A candidate for the M.S. degree in chemical engineering must comply with the rules and regulations as outlined in the WVU Graduate Catalog and the specific requirements of the Statler College and the Chemical Engineering Department.

Program Requirements

All M.S. degree candidates are required to perform research and follow a planned program of study. The student’s research advisor, in conjunction with the student’s Advising and Examining Committee (AEC) will be responsible for determining the plan of study appropriate to the student’s needs. The underlying principle of the planned program is to provide the students with the necessary support to complete their degree and prepare them for their career.

Curriculum Requirements

A minimum GPA of 3.0 is required in all courses

Course Requirements

A minimum of 60% of courses must be from 500 level or above
A grade of C or higher must be earned in all required courses
CHE 615 Transport Phenomena 3
CHE 620 Thermodynamics 3
CHE 625 Chemical Reaction Engineering 3
Full-time Students are required to take a Seminar course each semester 4-10
CHE 796 Graduate Seminar
Select courses from the following based on degree path: 15
Any BIOM, CE, CHE, CHEM, CPE, CS, EE, IENG, IH&S, MAE, MATH, MINE, PHGE, PHYS, SAFM, SENG, or STAT courses 400-799
Complete 1 of the following options: 6-9

Thesis Option - 6 hours
CHE 697 Research (6 hours)
Written Proposal/Oral Presentation
Oral Defense
Thesis
Final Oral or Written Examination

Problem Report Option - 9 hours
Complete 6 additional hours of coursework
Students who do not hold a baccalaureate degree in chemical engineering are required to take a set of undergraduate chemical engineering courses above and beyond the minimum coursework requirements.

For students without a B.S.Ch.E., the junior level courses may include: CHE 310, CHE 311, CHE 312, CHE 315, CHE 320, and CHE 325. M.S.E. students take only CHE 315, CHE 320, and CHE 325.

EXAMINATION

M.S. students following the thesis or problem report option must prepare a written research proposal and oral presentation. The proposal must be approved by the student's AEC at least one semester prior to the final oral examination. This oral defense is administered by the student’s AEC and must be completed by the end of the second semester after the student begins his/her research.

All students, regardless of option, are required to pass a final oral or written examination, administered by their AEC, covering the thesis or problem report and/or related course material.

Suggested Plan of Study

The plan below illustrates the Thesis Option. For students with a B.S.Ch.E., twenty-four months are typically required to complete the M.S.Ch.E. degree work. For students without a B.S.Ch.E., the time to complete the M.S.Ch.E. is typically thirty-six months, while the time to complete the M.S.E. is typically thirty months.

It is important for students to take courses in the order specified as much as possible; all prerequisites and concurrent requirements must be observed. A typical M.S.Ch.E degree program that completes degree requirements in two years is as follows.

Curriculum in Doctor of Philosophy – Chemical Engineering

A candidate for the Ph.D. degree with a major in chemical engineering must comply with the rules and regulations as outlined in the WVU Graduate Catalog and the specific requirements of the Statler College and the Chemical Engineering Department.

Program Requirements

The doctor of philosophy degree with a major in chemical engineering is administered through the college’s interdisciplinary Ph.D. program. The research work for the doctoral dissertation must show a high degree of originality on the part of the student and must constitute an original contribution to the art and science of chemical engineering.

All Ph.D. degree candidates are required to perform research and follow a planned program of study. The student’s research advisor, in conjunction with the student’s Advising and Examining Committee (AEC) will be responsible for determining the plan of study appropriate to the student’s needs. The
underlying principle of the planned program is to provide the students with the necessary support to complete their degree and prepare them for their career.

**Curriculum Requirements**

A minimum GPA of 3.0 is required in all courses exclusive of research credits.

A minimum GPA of 3.0 is required in all CHE courses exclusive of research credits.

A grade of C or higher must be earned in all required courses.

**Course Requirements**

**CHE 615** Transport Phenomena 3

**CHE 620** Thermodynamics 3

**CHE 625** Chemical Reaction Engineering 3

Select from the following based on degree path:

- Any BIOM, CE, CHEM, CPE, CS, EE, IENG, IH&S, MAE, MATH, MINE, PNGE, PHYS, SAFM, SENG, or STAT courses 500-799 excluding courses numbered 785, 796, or 797 9

**Full-time Students are required to take one Seminar course each semester**

- CHE 796 Graduate Seminar 4-10

- CHE 797 Research 24

**Examinations**

**Qualifying Exam**

All Ph.D. students must pass a Ph.D. qualifying examination given in their first year at WVU. This examination is designed to assess the basic competency of students in the chemical engineering field to determine whether or not they have sufficient knowledge to undertake independent research.

**Candidacy Examination**

In order to be admitted to candidacy, the student must pass a candidacy exam, which is designed to evaluate the student’s overall ability to engage in high-level research.

Within a maximum of one semester after passing the PhD qualifying examination or entering the Ph.D. program, whichever is later, a student must successfully defend his/her dissertation research proposal. This proposal is a written document which must be reviewed and accepted by their AEC and subsequently defended in an oral presentation. The research work for the doctoral dissertation should show a high order of originality on the part of the student and must offer an original contribution to the field of engineering science.

A student who has successfully completed all coursework, passed the qualifying examination, and successfully defended the research proposal is defined as one who is a candidate for the Ph.D. degree.

**Final Examination**

At the completion of the dissertation research, candidates must prepare a dissertation and pass the final oral examination (defense) administered by their AEC.

In order to complete the Ph.D. requirements, a student must pass a final oral examination on the results embodied in the dissertation. This examination is open to the public and, in order to evaluate critically the student’s competency, may include testing on material in related fields, as deemed necessary...
by the AEC. In addition, since the Ph.D. degree is primarily a research degree that embodies the results of an original research proposal and represents a significant contribution to scientific literature, the student must submit a manuscript on this research to the AEC.

**Suggested Plan of Study**

It is important for students to take courses in the order specified as much as possible; all prerequisites and concurrent requirements must be observed. A typical doctoral degree program that completes degree requirements in three years is as follows.

**First Year**

**Major Learning Goals**

**CHEMICAL ENGINEERING**

Upon graduation, Chemical Engineering students will have:

- Understanding of advanced principles of chemical engineering, which include reaction engineering, transport phenomena, and thermodynamics
- Expert-level understanding of the background and theory/principles of their research topics.
- Ability to plan research projects, to perform the tasks, and to draw conclusions based on sound scientific and engineering principles.
- Ability to write technical articles for publication in refereed journals and to make oral and poster presentations at technical meetings.
- Demonstrated initiative in research planning and management, including safety and environmental issues.
- Been technically prepared for a lifetime of continuing education.
- Understanding of professional and ethical responsibilities.

**Department of Civil and Environmental Engineering**

**Degrees Offered**

- Master of Science, Civil Engineering (M.S.C.E.)
- Doctor of Philosophy, Civil Engineering (Ph.D.)

The Department of Civil and Environmental Engineering offers the degree of master's of science in civil engineering (M.S.C.E.). In conjunction with the Benjamin M. Statler College of Engineering and Mineral Resources, the master's of science in engineering (M.S.E.) and the doctor of philosophy degrees are available with emphases in civil engineering.

**Program Objectives**

- Have the ability to work on multidisciplinary teams, have high technical competence, and have the ability to meet present and future challenges in a specialty area of civil and environmental engineering
- Have the ability to effectively plan and execute scientific research or other high-level investigations using the most current methods and techniques in the civil and environmental engineering fields
• Have the ability to effectively communicate the results of their research or investigations through writing and oral presentations
• Have the ability to contribute to the body of engineering knowledge and/or to economic growth by developing the science, the materials, and the technology necessary to deliver vital infrastructure services in the most cost effective manner while protecting the health, safety, and welfare of human society

Program Outcomes

• Graduates will have an ability to function on teams involving multiple civil engineering specialties.
• Graduates will have an ability to apply advanced methodologies in their specialty area.
• Graduates will have an ability to effectively communicate technical information.
• Graduates will have an ability to design and conduct experiments, analyze and interpret data, and develop recommendations.
• Graduates will have an understanding of professional and ethical responsibility.
• Graduates will have an ability to understand the impact of engineering solutions in global and societal context.
• Graduates will have a recognition of the need to engage in life-long learning.
• Graduates will have an ability to use contemporary techniques, skills, and tools necessary for engineering practice in education, industry, and/or government.

Student Learning Outcomes

• Graduates will meet the academic standards required by WVU for those in graduate school while completing courses pertinent to their specialty area and as specified in their plan of study.
• Graduates will conduct experimental or investigatory work necessary to satisfy the requirements of either the thesis option or report option for graduation.
• Graduates will write and orally defend a thesis, a report, or a dissertation.
• Graduates will serve in primary roles as graduate research assistants on research projects or on problem investigations sponsored by companies, associations, or government agencies looking for new methodology or science to resolve problems associated with the planning, design, construction, operation, and maintenance of the infrastructure or for related needs.

Areas of Concentration

There are five major areas of interest of the faculty and graduate studies:

• Construction engineering and management, which includes construction project planning and cost control; construction operations; construction safety and health; sensing, analytics, simulation, and visualization for construction and infrastructure practices; integrated and automated construction; building information modeling; infrastructure planning; construction profitability; asset management and risk control
• Environmental and water resources, which includes wetland and natural stream restoration; water, waste water, and industrial waste treatment; site remediation; groundwater hydraulics, hydrology, sediment transport, fluid mechanics, water and health, and satellite remote sensing of hydrological processes
• Geotechnical engineering, which includes soil mechanics, foundations engineering, soil-structure interaction, geomechanics, geoenvironmental, groundwater and seepage, geosynthetics, contaminant transport, earthwork design, and waste by-product utilization
• Transportation engineering, which includes planning, design, construction, operations, and maintenance of transportation facilities/systems (roadways, railroads, airports, and public transportation) as well as related areas of infrastructure management and expert systems
• Structural engineering, which includes advanced structural mechanics, structural dynamics, bridge engineering, building design for static and dynamic loads, advanced materials for civil infrastructure, and nondestructive testing and evaluation

Faculty

The Department of Civil and Environmental Engineering has a full-time faculty of twenty-three who are active in teaching, research, and professional commitments. Many of the faculty members are licensed professional engineers registered in one or more states and are involved in state, regional, and national professional organizations, serving on numerous technical committees. They are successful researchers and have published extensively in technical journals. The Civil and Environmental Engineering faculty produces graduates who can assume the problem solving, decision-making, and technical leadership roles of a professional engineer and who have the sound educational background for the continuing professional development the field requires.

Students tailor their program of study to pursue individual topics of interests with guidance from a faculty advisor. Opportunities abound within the master’s and doctoral tracks for a research experience in which the student tackles an engineering problem individually with guidance from a faculty advisor. The graduate program in civil engineering was established with the aim of developing its students’ abilities to use today’s contemporary methods of engineering analysis and design to solve tomorrow’s engineering problems.
FACULTY

CHAIR

• Hema J. Siriwardane - Ph.D., P.E. (Virginia Polytechnic Institute and State University)
  Geomechanics/Geotechnical Engineering, Finite Element Method, Computer Applications

PROFESSORS

• Hung-Liang (Roger) Chen - Ph.D. (Northwestern University)
  Structural Dynamics, Structural Experimentation, Dynamic Soil-Structure Interaction, Damage in Reinforced Concrete Structures, Nondestructive Evaluation, Concrete

• Hota Gangarao - Ph.D., P.E. (North Carolina State University)
  Maurice A. and Jo Ann Wadsworth Distinguished Professor, Director of the Constructed Facilities Center, Director of the NSF Center for Integration of Composites into Infrastructure, Mathematical Modeling of Engineering Systems, Bridge Engineering, Composite Material Characterization and Implementation

• Udaya B. Halabe - Ph.D., P.E. (Massachusetts Institute of Technology)

• Lian-Shin Lin - Ph.D., P.E. (Purdue University)
  Physiochemical and Biological Treatment, Innovative Wastewater Technologies, Emerging Coaminants, Sustainable Development, Watershed Pollution

• David R. Martinelli - Ph.D. (University of Maryland)
  Transportation Engineering, Traffic Operations, Systems Analysis, Infrastructure Management

• Radhey Sharma - Ph.D. (University of Oxford)
  Sustainable Infrastructure, Geotechnical Engineering and Geoenvironmental, Energy Engineering

• Hema J. Siriwardane - Ph.D., P.E. (Virginia Polytechnic Institute and State University)
  Geomechanics/Geotechnical Engineering, Finite Element Method, Computer Applications

• John P. Zaniewski - Ph.D., (University of Texas)
  Asphalt Technology Professor, Pavement Materials, Design, Construction, Maintenance, Infrastructure Management

ASSOCIATE PROFESSOR

• Karl Barth - Ph.D. (Purdue University)
  Jack H. Samples Distinguished Professor of Structures, Steel Structures, Bridge Design and Rehabilitation, Connections, Stability Analysis, Experimental Mechanics

• Leslie Clark Hopkinson - Ph.D. (Virginia Polytechnic Institute and State University)
  Surface Hydrology, Environmental Hydraulics, Ecological Engineering, River Mechanics

• John D. Quaranta - Ph.D., P.E. (West Virginia University)

ASSISTANT PROFESSORS

• Omar I. Abdul-Aziz - Ph.D. (University of Minnesota, Twin Cities)
  Ecological-Water Resources Engineering; Scaling of Hydro-Ecological and Biochemical Variables; Modeling of Stream Water Quality and Ecosystem Carbon; Fluid Mechanics; Hydrology

• Fei Dai - Ph.D. (Hong Kong Polytechnic University)
  Construction Engineering, Construction Management, Construction Information Technologies

• Kakan Day - Ph.D. (Clemson University)
  Intelligent Transportation Infrastructure Design and Analysis; Connected and Automated Vehicle Technology; Traffic Operations; Big Data Analytics for Transportation Data Management; Artificial Intelligence in Transportation.

• Seung Hong - Ph.D. (Georgia Institute of Technology)
  Hydraulic engineering, Sediment transport, Erosion control

• Antarpreet Jutla - Ph.D. (Tufts University)

• P.V. Vijay - Ph.D. (West Virginia University)
  Concrete Structures, P Composite Structures for Bridges, Buildings, and Pavements; Aging of Structures and Rehabilitation, Recycled Polymers for Infrastructure, Analytical Modeling

• Yoojung Yoon - Ph.D. (Purdue University)
  Infrastructure Asset Management, Risk Management in Construction, Project Management and Control, Construction Equipment Management

• Dimitra Pyrialakou - Ph.D. (Purdue University)
Transportation Engineering, Transportation Planning and Evaluation, Public and Rail Transportation, Airport Operations, Transportation Econometrics, and Transportation Engineering Education.

RESEARCH ASSISTANT PROFESSORS
- Ruifeng (Ray) Liang - Ph.D. (Institute of Chemistry, Chinese Academy of Sciences)

PROFESSORS EMERITUS
- Ronald W. Eck - Ph.D. (Clemson University)
- Donald Gray - Ph.D. (Purdue University)
- W. Joseph Head - Ph.D. (Purdue University)
- Charles R. Jenkins - Ph.D. (Oklahoma State University)
- Larry D. Luttrell - Ph.D. (Cornell University)
- William A. Sack - Ph.D. (Michigan State University)

ASSOCIATE PROFESSORS EMERITUS
- Robert N. Eli - Ph.D. (University of Iowa)
- Darrell R. Dean, Jr. - Ph.D. (Purdue University)

ADJUNCT ASSOCIATE PROFESSOR
- Avinash Unnikrishnan - Ph.D. (University of Texas, Austin)
  Transportation Network Analysis and Planning, Freight Network Analysis and Logistics, Intelligent Transportation Systems

LECTURER
- LiYaning (Maggie) Tang - Ph.D. (The Hong Kong Polytechnic University)
  Public-Private Partnership (PPP), Environmental impact assessment (EIA), Construction sustainability, Carbon emission footprint

Admission
To be eligible for admission into the M.S.C.E. degree program, a candidate must fulfill either of the following:
- Hold or expect to receive a B.S.C.E. degree from either an accredited ABET curriculum or an internationally recognized program
- Have a superior academic record and a baccalaureate degree in another engineering field, mathematics, or science

Candidates with a baccalaureate degree in another field of engineering, mathematics, or science are also eligible for admission into the M.S.E. degree. Candidates are normally required to attain a baccalaureate level of proficiency in areas of emphasis of the department. An engineering technology (non-calculus based) degree is not sufficient qualification for admission into any of the graduate programs offered by the department.

To be eligible for admission into a doctorate of engineering program, a candidate is expected to hold or expect to receive a B.S. or an M.S. degree or equivalent in the following:
- A discipline of engineering from an institution which has an ABET accredited program in that discipline which has an internationally recognized program in engineering, or mathematics and sciences (as specified by individual programs).

The other requirements for admission into the graduate programs of the department are summarized as follows:
- Grade point average of 3.0 or better (out of a possible 4.0) in all previous college work and must meet all other requirements below.
- Three reference letters; at least two of the three references should be from the institution the applicant last attended.
- International students must demonstrate proficiency in communicating in English (a minimum TOFEL score of 550, or iBT score of 79, or IELTS score of 6.5) (Students who have completed a recent four-year bachelor's degree in the USA need not submit these scores.)
- All applicants are encouraged to submit GRE scores for fellowship and funding options. Applicants who have not received their undergraduate degree in the United States are required to submit GRE General Test scores with the Engineering Subject Test score being optional.

Provisional Admission
An applicant who is not qualified for regular graduate student admission status, due either to insufficient grade-point average, incomplete credentials, or inadequate academic background, can be admitted as a provisional student. Requirements for attaining regular student status must be stated in the letter of admission. Provisional students must sign a contract, which lists these requirements in detail, no later than their first registration.

Curriculum in Masters of Science in Civil Engineering
A candidate for the M.S. degree in civil engineering must comply with the rules and regulations as outlined in the WVU Graduate Catalog and the specific requirements of the Statler College and the Civil and Environmental Engineering Department.
Program Requirements

All M.S. degree candidates are required to perform research and follow a planned program of study. The student’s research advisor, in conjunction with the student’s Advising and Examining Committee (AEC) will be responsible for determining the plan of study appropriate to the student’s needs. The underlying principle of the planned program is to provide the students with the necessary support to complete their degree and prepare them for their career.

Curriculum Requirements

A minimum cumulative GPA of 3.0 is required in all courses

Course Requirements *

A minimum of 60% of courses must be from 500 level or above
A minimum cumulative GPA of 3.0 is required in all coursework used for degree requirements

Any CE courses 500-799 15
Select the following based on degree path: 9
Any AEM, AGBI, BIOC, BIOL, BIOS, CE, CHEM, CPE, CS, EE, ENVP, GEOL, IENG, IH&S, MAE, MATH, MINE, PNGE, PHYS, SAFM, SENG, STAT, or WMAN courses 400-799

Complete 1 of the following options: 6-12

Thesis Option - 6 hours

CE 697 Research (6 hours)
Written Research Proposal
Thesis
Final Oral or Written Examination

Problem Report Option - 9 hours

Complete 6 additional hours of coursework
CE 697 Research (3 hours)
Written Research Proposal
Formal written report or professional report/paper
Final Oral or Written Examination

Coursework Option - 12 hours **

Complete 12 additional hours of coursework
Final Oral or Written Examination

Total Hours 30-36

* Students who do not hold a baccalaureate degree in civil engineering are required to take a set of undergraduate civil engineering courses above and beyond the minimum coursework requirements.

** Although rarely permitted, this option is open to students with practical engineering experience or those who have demonstrated an ability to organize and develop a project and write a technical report. Approval to pursue this option must be obtained from the student’s AEC, the graduate program coordinator, and the department chairperson.

Final Examination

M.S. students following the thesis or problem report option must prepare a written research proposal. The proposal must be approved by the student’s AEC at least one semester prior to the final oral examination.

All students, regardless of option, are required to pass a final oral or written examination, administered by their AEC, covering the thesis or problem report and/or related course material.

Suggested Plan of Study

The plan below illustrates the Thesis Option. It is important for students to take courses in the order specified as much as possible; all prerequisites and concurrent requirements must be observed. A typical M.S.C.E degree program that completes degree requirements in two years is as follows.

**Curriculum in Doctor of Philosophy – Civil Engineering**

A candidate for the Ph.D. degree with a major in civil engineering must comply with the rules and regulations as outlined in the WVU Graduate Catalog and the specific requirements of the Statler College and the Civil and Environmental Engineering Department.

**Program Requirements**

The doctor of philosophy degree with a major in civil engineering is administered through the college's interdisciplinary Ph.D. program. The research work for the doctoral dissertation must show a high degree of originality on the part of the student and must constitute an original contribution to the art and science of civil engineering.

All Ph.D. degree candidates are required to perform research and follow a planned program of study. The student’s research advisor, in conjunction with the student’s Advising and Examining Committee (AEC) will be responsible for determining the plan of study appropriate to the student’s needs. The underlying principle of the planned program is to provide the students with the necessary support to complete their degree and prepare them for their career.

**Curriculum Requirements**

A minimum cumulative GPA of 3.0 is required in all courses

A minimum cumulative GPA of 3.0 is required in all coursework used for degree requirements

* Students who do not hold a baccalaureate degree in civil engineering are required to take a set of undergraduate civil engineering courses above and beyond the minimum coursework requirements.

A minimum of forty-two hours of coursework and thirty hours of independent research beyond a bachelor’s degree, or eighteen hours of coursework and twenty-four hours of independent research beyond an M.S. degree are required.

**Graduate Committee**

For the Ph.D. program, the student, research advisor, academic advisor, and department chairperson appoint the student’s AEC. Each committee must consist of at least five members, with at least three members from CEE, and at least one from outside the department. By the end of the Ph.D. student’s second semester, the student, with the advice and consent of the academic advisor, graduate coordinator, and members of the student’s AEC, submits a plan of study, initiated in CEE, to the dean.

**Examinations**

**QUALIFYING EXAM**

All students must take and pass a written qualifying examination. Normally, the qualifying examination is given no later than one semester after completion of eighteen credit hours toward the doctoral degree. This examination is designed to assess the basic competency of students in the civil engineering field to determine whether or not they have sufficient knowledge to undertake independent research.
CANDIDACY EXAMINATION

In order to be admitted to candidacy, the student must pass a candidacy exam, which is designed to evaluate the student's overall ability to engage in high-level research. After passing the qualifying examination, the student must submit to the AEC a written research proposal of his/her planned dissertation work and successfully defend it in an oral examination. The research proposal must be approved by the student's AEC. A student who has successfully completed all coursework, passed the qualifying examination, and successfully defended the research proposal, and receives the college's approval becomes a candidate for a Ph.D. degree in CE. Thereafter, the student will officially be engaged in dissertation research. At the completion of the dissertation research, the candidate must prepare a dissertation and defend it orally at the final defense conducted by the AEC.

A student who has successfully completed all coursework, passed the qualifying examination, and successfully defended the research proposal is defined as one who is a candidate for the Ph.D. degree.

FINAL EXAMINATION

At the completion of the dissertation research, candidates must prepare a dissertation and pass the final oral examination (defense) administered by their AEC.

In order to complete the Ph.D. requirements, a student must pass a final oral examination on the results embodied in the dissertation. This examination is open to the public and, in order to evaluate critically the student's competency, may include testing on material in related fields, as deemed necessary by the AEC. In addition, since the Ph.D. degree is primarily a research degree that embodies the results of an original research proposal and represents a significant contribution to scientific literature, the student must submit a manuscript on this research to the AEC.

Suggested Plan of Study

It is important for students to take courses in the order specified as much as possible; all prerequisites and concurrent requirements must be observed. A typical doctoral degree program that completes degree requirements in three years beyond an M.S. degree is as follows.

Major Learning Goals

CIVIL ENGINEERING

Program Objectives

- Have the ability to work on multidisciplinary teams, have high technical competence, and have the ability to meet present and future challenges in a specialty area of civil and environmental engineering
- Have the ability to effectively plan and execute scientific research or other high-level investigations using the most current methods and techniques in the civil and environmental engineering fields
- Have the ability to effectively communicate the results of their research or investigations through writing and oral presentations
- Have the ability to contribute to the body of engineering knowledge and/or to economic growth by developing the science, the materials, and the technology necessary to deliver vital infrastructure services in the most cost effective manner while protecting the health, safety, and welfare of human society

Program Outcomes

- Graduates will have an ability to function on teams involving multiple civil engineering specialties.
• Graduates will have an ability to apply advanced methodologies in their specialty area.
• Graduates will have an ability to effectively communicate technical information.
• Graduates will have an ability to design and conduct experiments, analyze and interpret data, and develop recommendations.
• Graduates will have an understanding of professional and ethical responsibility.
• Graduates will have an ability to understand the impact of engineering solutions in global and societal context.
• Graduates will have a recognition of the need to engage in life-long learning.
• Graduates will have an ability to use contemporary techniques, skills, and tools necessary for engineering practice in education, industry, and/or government.

Student Learning Outcomes

• Graduates will meet the academic standards required by WVU for those in graduate school while completing courses pertinent to their specialty area and as specified in their plan of study.
• Graduates will conduct experimental or investigatory work necessary to satisfy the requirements of either the thesis option or report option for graduation.
• Graduates will write and orally defend a thesis, a report, or a dissertation.
• Graduates will serve in primary roles as graduate research assistants on research projects or on problem investigations sponsored by companies, associations, or government agencies looking for new methodology or science to resolve problems associated with the planning, design, construction, operation, and maintenance of the infrastructure or for related needs.

Lane Department of Computer Science and Electrical Engineering

Degrees Offered

• Masters of Science, Computer Science (M.S.C.S.)
• Masters of Science, Electrical Engineering (M.S.E.E.)
• Masters of Science, Software Engineering (M.S.S.E.)
• Doctor of Philosophy, Computer Engineering (Ph.D.)
• Doctor of Philosophy, Electrical Engineering (Ph.D.)
• Doctor of Philosophy, Computer Science (Ph.D.)

Graduate Certificates Offered

• Graduate certificate in software engineering
• Graduate certificate in computer forensics
• Graduate certificate in biometrics & information assurance
• Graduate certificate in interactive technologies & serious gaming

Overview of Programs

The Lane Department of Computer Science and Electrical Engineering offers master's programs leading to a master's of science in computer science (M.S.C.S.), a master's of science in electrical engineering (M.S.E.E.), and a master's of science in software engineering (M.S.S.E.). It also participates in the College of Engineering and Mineral Resources interdisciplinary program offering the master's of science in engineering (M.S.E.). Master of science students must comply with the rules for master's degrees as set forth by the college in the Guidelines for Masters Degree Programs Offered in the College of Engineering and Mineral Resources and by the Department in the Masters of Science Program Guidelines.

The department also offers programs leading to the doctor of philosophy (Ph.D.) in computer science and the doctor of philosophy (Ph.D.) in engineering with specialization in electrical engineering or computer engineering. Ph.D. in electrical or computer engineering students must comply with the rules set forth by both the College's Doctor of Philosophy Program Guidelines and by the Department in the Doctor of Philosophy Program Guidelines. Ph.D. students in computer and information sciences must comply with the rules set forth in the Handbook for Computer Science Graduate Students.

The department also offers four graduate certificates which may be completed as part of a degree program or as a certificate only.

Program Educational Objectives and Outcomes

The common educational objectives of all the graduate programs in the Lane Department is to produce graduates who have the knowledge, skills, and attitudes that will ensure success in professional positions in business, industry, research, government service, or in further graduate or professional study. The requirements and outcomes of specific degree and certificate programs are described in the catalog pages specific to those programs.
Facilities and Centers

The Lane Department of CSEE has its main office, instructional lab, and research lab space on the Evansdale campus occupying four floors of the Engineering Sciences Building and one floor of the Engineering Research Building. The department also has facilities located in Armstrong Halls on the downtown campus.

The department is home to two university research centers: the Center for Identification Technology Research (CITeR), which is designated an Industry/University Cooperative Research Center by the National Science Foundation; and the Center for Advanced Power & Energy Research (APERC). The university is also designated as a Center of Excellence in Information Assurance Research by the National Security Agency and Department of Homeland Security. The department and college host a modern 4,000 square foot clean room facility for device and sensor fabrication, under the management of the university's Shared Research Facilities. The university is also home to an outstanding set of faculty-led laboratory facilities, in areas that include electronic and photonic material, biometrics, communications, digital and analog signal processing, power electronics, robotics, high reliability software, computer security, computer forensics, artificial intelligence, virtual environments, theoretical computer science, and electric vehicles.

All graduate students have access to a broad variety of computing platforms for both classwork and research. The department operates and maintains a variety of dedicated computer systems, clusters, and networks supporting both the instructional and research activities of the department. These systems include numerous Windows workstations and a cluster of Linux Servers. An additional laboratory by Hewlett-Packard supports large databases and medical informatics. Students have access to a rich set of software packages and tool suites available either on department systems or the College of Engineering and Mineral Resources systems. All department, college, and university computing resources are fully networked via Ethernet and FDDI with a campus-wide ATM backbone enabling interface to the statewide ATM network. All computing systems have internet access enabling worldwide connectivity and access to several additional computing services via the Pittsburgh Supercomputing Center. The university is also a member of Internet2, of which faculty in the department are active participants.

Areas of Research

The department is enthusiastically and vigorously involved in research, technical publication, and graduate instruction at the forefront of the field. Academic and research activity is organized into five areas:

- Electronics and photonics
- Systems and signals
- Computer systems
- Software and knowledge engineering
- Theory of computation

FACULTY

CHAIR

- Brian Woerner - Ph.D. (Purdue University)
  Wireless Communications and Networking

PROFESSORS

- Donald Adjeroh - Ph.D. (Chinese University of Hong Kong)
  Graduate Coordinator for Computer Science, Multimedia Information Systems (Image, Video, and Audio), Distributed Multimedia Systems
- Hany Ammar - Ph.D. (University of Notre Dame)
  Risk Assessment, Software Engineering, Biometrics, Performance and Dependability Analysis, Modeling and Evaluation of Parallel and Distributed Systems
- Muhammad Choudhry - Ph.D. (Purdue University)
  Graduate Coordinator for CpE & EE, Power System Control, DC Transmission, Stability, Power Electronics
- Parviz Famouri - Ph.D. (University of Kentucky)
  Analysis and Control of Electrical Machines, Motor Drives, Power Electronics, Electric Vehicles
- Ali Feliachi - Ph.D. (Georgia Institute of Technology)
  Power Systems, Large-Scale Systems, Control
- Powsiri Klinkhachorn - Ph.D. (West Virginia University)
  Microprocessor Applications, Computer Architecture, Binary and Non-Binary Logic
- Dimitris Korakakis - Ph.D. (Boston University)
  Semiconductor Growth, Nanotechnology, Photonic Devices, Biosensors
- Afzel Noore - Ph.D. (West Virginia University)
  VLSI Design and Testing, Software Engineering, Information Assurance and Biometrics
- Roy Nutter Jr. - Ph.D., P.E. (West Virginia University)
  Neural Networks, Microprocessor Systems, Computer Architecture, Computer Forensics
• Y. Ramana Reddy - Ph.D. (West Virginia University)
  Artificial Intelligence, Knowledge-based Simulation, Computer Graphics
• Krishnamurthy Subramani - Ph.D. (University of Maryland)
  Scheduling, Computational Biology, Computational Complexity, Polyhedral Combinatorics
• Matthew Valenti - Ph.D. (Virginia Polytechnic Institute and State University)
  Communication Theory, Wireless Systems, Error Control Coding

ASSOCIATE PROFESSORS
• Xian-An Cao - Ph.D. (University of Florida)
  Nanofabrication, Opto-electronic Devices
• Elaine Eschen - Ph.D. (Vanderbilt University)
  Graduate Coordinator for CS Ph.D. CCDM Program, Design and Analysis of Algorithms, Graph Theory, Combinatorics
• Katerina Goseva-Popstojanova - Ph.D. (University Sv. Kiril i Metodij)
  Software Reliability Engineering, Distributed Systems, Computer Security, Dependability, Performance and Performability Assessment
• David Graham - Ph.D. (Georgia Institute of Technology)
  Analog Signal Processing
• Guodong Guo - Ph.D. (University of Wisconsin, Madison)
  Computer Vision, Biometrics, Human Computer Interaction
• Mark Jerabek - Ph.D., P.E. (Purdue University)
  Solid State Devices and Sensors, Electromagnetics
• Dimitris Korakakis - Ph.D. (Boston University)
  Semiconductor Growth, Nanotechnology, Photonic Devices, Biosensors
• Vinodkiran Kulathumani - Ph.D. (The Ohio State University)
  Wireless Sensor Actuator Networks, Scalable and Fault Tolerant Distributed Systems
• Xin Li - Ph.D. (Princeton University)
  Image Processing, Computer Vision, Pattern Recognition
• James Mooney - Ph.D. (Ohio State University)
  Associate Chair, Operating Systems, Computer Architecture, Software Portability and Standards, Computer Security and Forensics
• Daryl Reynolds - Ph.D. (Texas A&M)
  Statistical Signal Processing for Communications, Iterative (Turbo) Processing, Transmitter Pre-coding, Space-time Coding and Processing
• Natalia Schmid - Ph.D. (Washington University)
  Estimation and Detection, Biometrics, Information Theory, Statistical Signal and Image Processing
• Sarika Khushalani Solanki - Ph.D. (Mississippi State University)
  Power/Energy Conversion, Power Systems; Controls, Signals, and Systems
• Krishnamurthy Subramani - Ph.D. (University of Maryland)
  Scheduling, Computational Biology, Computational Complexity, Polyhedral Combinatorics
• Frances VanScoy - Ph.D. (University of Virginia)
  Programming Languages and Compilers, Multisensory Computing, High Performance Computing

ASSISTANT PROFESSORS
• Thirimachos Bourlai - Ph.D. (University of Surrey)
  Biomedical Image Processing, Pattern Recognition
• Yuxin Liu - Ph.D. (Louisiana Tech University)
  Biotechnology/Bioengineering, BioMEMS and Microfluidics, Cellular Sensor, Tissue Engineering
• Yanfang Ye - Ph.D. (Xiamen University)
  Cybersecurity, Machine Learning

RESEARCH ASSOCIATE PROFESSORS
• Alan Barnes - Ph.D. (California Institute of Technology)
  Ion Surface Interactions, Materials Growth and Automated Document Analysis
• Sumitra Reddy - Ph.D. (West Virginia University)
  Healthcare Informatics, Componentware, Intelligent Systems, Information Technology Evolution

RESEARCH ASSISTANT PROFESSORS
• Jeremy Dawson - Ph.D. (West Virginia University)
  Nanotechnology
• Jignesh Solanki - Ph.D. (Pennsylvania State University)
Tissue Engineering, Spinal Cord Injury Repair, Stem Cells, Molecular Neurobiology

VISITING AND ADJUNCT PROFESSORS

• Gyungsu Byun - Ph.D. (University of California, Los Angeles)
  Digital Electronic Devices
• Bojan Cukic - Ph.D. (University of Houston)
  Software Engineering, High-Assurance Systems, Computational Intelligence, Fault-Tolerant Systems, Biometrics
• Nancy Lan Guo - Ph.D. (West Virginia University)
  Medical Information Systems
• Lawrence Hornak - Ph.D. (Rutgers University)
  Optics, Integrated Optics, Micro/Nano Structures and Devices, Biosensors, Biometrics
• V. Jagannathan - Ph.D. (Vanderbilt University)
  Distributed Intelligent Systems, Internet and Security Technologies
• Tim Menzies - Ph.D. (University of New South Wales)
  Software Engineering, Data Mining
• Arun Ross - Ph.D. (Michigan State University)
  Statistical Pattern Recognition, Biometrics
• Stephanie Schuckers - Ph.D. (University of Michigan)
  Signal Processing, Biometrics

LECTURERS

• Camille Hayhurst - M.S.C.S. (West Virginia University)
  Programming Languages
• Raymond Morehead - M.S.C.S. (West Virginia University), M.D. (Northwestern University)
  Biomedical Systems, Databases
• Cynthia Tanner - M.S.C.S. (West Virginia University)
  Graduate Coordinator for Software Engineering

PROFESSORS EMERITI

• John Atkins - Ph.D. (University of Pittsburgh)
• Wils Cooley - Ph.D., P.E. (Carnegie Mellon University)
• William Dodrill
• Ron Klein - Ph.D. (University of Illinois)
  power systems, control, maglev technology
• Robert McConnell - Ph.D. (University of Kentucky)

Admission Requirements for All Programs

All Masters and Ph.D. programs require applicants to provide the items below to be considered for admission. Specific programs may have additional requirements. Exception: These requirements do not apply to nontraditional students in the Certificate of Software Engineering program and M.S.S.E. program (see certificate program and M.S.S.E. program for more information):

• A minimum cumulative grade point average of 3.0 or equivalent, based on a 4.0 system.
• Three letters of reference.
• International students must demonstrate proficiency in communicating in English (a minimum TOEFL Score of 550, or iBT Score of 79, or IELTS Score of 6.5). (Students who have completed a recent four-year bachelor's degree in the USA need not submit these scores.)
• All graduate degree programs require the GRE general test, with a suggested score of either the 80th percentile on the quantitative part or 80th percentile total (verbal + quantitative + analytical).
• All graduate degree programs require an appropriate bachelor's or master's degree for entry. 
  Students lacking some foundation courses appropriate to a particular degree program may be assigned some remedial coursework as a condition of admission.
• See: Certificate in Software Engineering; Master of Science in Software Engineering for alternative admission requirements to those programs for working professionals.

Regular, Provisional, and Non-Degree Admission

Students admitted into a program are designated as regular status or provisional. The department also admits students to non-degree status in the College of Engineering and Mineral Resources, but these students are not admitted to any specific program. Regular status is given to students who are qualified for unconditional admission to a specific program. Provisional status is given to students who have deficiencies to make up such as incomplete
credentials or other reasons as identified by the graduate coordinator. In all cases, the student’s letter of admission will state what must be done to attain regular status.

Provisional students must complete the requirements for transfer to regular status by the end of the semester in which they complete eighteen credit hours. Usually provisional students are not considered for graduate assistantships or tuition waivers.

Non-degree status is granted upon request to students meeting the minimum admission requirements. A non-degree student is one who wishes to take courses without seeking a formal degree. Non-degree students require permission of the instructor to take courses that are restricted to specific majors. There is no guarantee of eventual acceptance into a degree program, and in no case may more than twelve hours be transferred to a degree program.

Non-degree students may not be offered graduate assistantships or tuition waivers.

The Lane Department of Computer Science & Electrical Engineering offers four graduate certificates, which are typically completed as part of a graduate degree program but can be completed as a separate credential. Brief descriptions of the certificate programs are given here. More detailed information on procedures for the certificate programs may be found on the main department web page.

**Graduate Certificate in Software Engineering**

Details for the Graduate Certificate in Software Engineering are found on the graduate catalog section devoted to the Master of Science in Software Engineering degree program.

**Graduate Certificate in Computer Forensics**

**CERTIFICATE CODE - CG08**

The Lane Department of Computer Science and Electrical Engineering (LDCSEE) offers a Graduate Certificate in Computer Forensics (CF). By providing systematic graduate courses in this field, our graduates and others should be better prepared to assist business, industry, government, and academia in attaining a new level of protection from cyber-criminals.

The graduate certificate program consists of fifteen credit hours of required courses. Admission to the graduate certificate program in Computer Forensics requires admission to the M.S. Computer Science or M.S. Electrical Engineering (with Computer Engineering major). One wishing to complete only the Certificate must still be admitted to the M.S.C.S. or M.S.E.E. programs.

The purpose of the certificate program is to:

1. Provide further education to computer professionals with technical undergraduate degrees to enable them to track and protect institutional computer and cyber crime. This knowledge in corporate settings should lead to better protection of company computer assets, company intellectual property, and company data and financial assets. These professionals should be able to support law enforcement in detection and prosecution of cyber-crime when needed.
2. Provide further education for those technical individuals who work in law-enforcement. It is expected that these would be highly technical people with bachelor's degrees in either computer science, computer engineering, or software engineering.

Many (if not most) of the students expected will be full time and pursuing a Masters of Science degrees in Computer Science or Computer Engineering. Other students may come from industry and law enforcement. These students will achieve the Certificate as another resume item that will improve employability while supplying a demand for computer people with such backgrounds. Some students may choose to pursue the Certificate with no intent of completing a Masters degree but will have achieved significant competence in this field.

The Certificate requires fifteen credit hours through required core curriculum courses. In addition to the fifteen credit hours upon course completion, the student will be required to complete a capstone project. The following are the fifteen credits hours:

**Required Courses**

</tbody>
</table>

**Total Hours** 15

These five courses cover the major areas of study. The first is an overview of the entire area; two will be taught with an emphasis throughout on vulnerabilities and counter-measures. One course emphasizes management practices and oversight required to maintain the best defense against attacks in organizations and how to respond to them. The final course deals with the law and cases governing the area of computer crime, its detection and prosecution, keeping in mind the constraints placed on security by the rights of citizens.
Graduate Certificate in Biometrics & Information Assurance

CERTIFICATE CODE - CG09

The graduate level Information Assurance and Biometrics Certificate Program at West Virginia University (WVU) provides a student-centered learning environment to educate and train professionals to meet the changing needs of the industry, government, and academia in West Virginia and the nation. This program is offered to WVU students, government personnel (military and civilian), and contractor personnel who meet the program acceptance requirements. Potential career options for students completing this certificate program are in security related fields, most likely in the military, banking industry, or within various law enforcement agencies.

The graduate level Information Assurance and Biometrics Certificate Program offered at WVU provides a broad overview of the information assurance and biometrics field and addresses relative and recent advances and current research issues. It is interdisciplinary in nature and covers many educational materials. Included are the elements of biometrics technology, system security engineering, and principles of trusted systems. The course content of this program emphasizes ethical, economic, social, and legal impacts of biometrics technologies and information assurance techniques.

The goal of the graduate level fifteen Credit Hour Information Assurance and Biometrics Certificate Program is to provide students with the following:

- A solid understanding of biometrics technology, system security principles, and their scientific foundations, and
- An awareness of the social, psychological, ethical, and legal policies and requirements in the field of information assurance and biometrics (IAB), and
- The ability to communicate with professionals in the wide range of public services, including law enforcement, military, science, and those who employ the principles and techniques of IAB.

The coursework includes fifteen credit hours of classes. As part of the certificate coursework, students will be expected to take four required classes and choose the fifth class between two approved electives.

</tbody>
</table>

**Total Hours** 15

A capstone project will be required as part of the Advanced Biometrics course. Advanced Biometrics is a required capstone course taken after BIOM 426, CS 465, and STAT 516. This course includes a once-a-week advanced topics seminar series and a three-hour laboratory. The laboratory will have both formal laboratory exercises and time devoted to the project. The project will provide the students with an opportunity to integrate the knowledge gained from the core courses to the program.

Graduate Certificate in Interactive Technologies and Serious Gaming

CERTIFICATE CODE - CG27

A graduate certificate in Interactive Technologies and Serious Gaming recognizes that interactive computer software such as games are both a programmed artifact and a cultural object, and careers in computer gaming - whether in academia or in industry - require a broad range of skills. The purpose of this program is to:

1. Give graduate students the skills required to conduct advanced research in gaming and interactive technologies.
2. Prepare students for careers in the gaming industry.
3. Foster a local gaming and interactive technologies program in West Virginia.

Admissions requirements for this certificate program are the same as the admission requirements for the M.S.C.S. degree program.

The Interactive Technologies and Serious Gaming Certificate Program will normally be completed over two years. Requirements for completion of the degree are eighteen credit hours of coursework and completion of a final project. The eighteen credit hours of coursework will include:

**Required Courses**

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Hours</th>
</tr>
</thead>

Prior to completion of the Certificate, students will complete a significant project, suitable for inclusion in their portfolio. The aim of the project is to synthesize and combine the student’s prior study into an innovative product.

**Computer Engineering**

**Degree Offered**

- Doctor of Philosophy, Computer Engineering (Ph.D.)

**Program Description**

The Doctor of Philosophy program should be considered by those with superior academic achievement and who desire to pursue a career of research or teaching. Students interested in the Ph.D. program in computer engineering should see our web page at http://www.csee.wvu.edu for information. If additional information is needed, contact the graduate coordinator of electrical and computer engineering.

**Program Educational Objectives & Outcomes**

The educational objective of the Ph.D. program in Computer Engineering is to produce graduates who have the knowledge, skills, and attitudes that will ensure success in professional positions in business, industry, research, government service, or in further graduate or professional study.

Specific outcomes of the program are:

1. Achieve a depth of knowledge in core computer engineering subjects, as demonstrated by completion of core Ph.D. courses and examination on those subjects through the Qualifying Examination process.
2. Achieve a breadth of advanced knowledge to support research, as demonstrated by completion of doctoral level coursework and graduate seminar participation.
3. Achieve an ability to carry out independent research, as demonstrated by successful completion and defense of a dissertation.

**Admissions**

As a first step, students must satisfy provisions under the “Admission Requirements for All Programs” of the main catalog entry for the Lane Department of Computer Science and Electrical Engineering and must submit a statement of purpose.

Students who hold a M.S. degree in Electrical Engineering or Computer Engineering (or equivalent degree) will be considered for admission with regular status into the Ph.D. program. Students who hold a Masters degree in the sciences or engineering, excluding M.S.E.E. or M.S.E., will be considered for admission with provisional status and will likely have coursework deficiencies to remove. All other students must apply for admission into a master’s program as the first stage in attaining the Ph.D.
FOUNDATION ASSESSMENT

Prior to the first week of classes, new Ph.D. students must meet with the graduate coordinator to select classes. This interview determines if the student needs remedial work in order to pursue a graduate degree. Students with deficiencies may be required to take courses as prerequisites for graduate courses. Deficiencies are usually noted as a condition for admission. However, they may also be specified during the interview or later.

During the second semester, students must form their Advisory and Examining Committee (AEC) and write a plan of study. The AEC may also identify additional deficiencies to be removed, but this is rare since deficiencies should have been identified earlier in the student’s career.

Curriculum in Doctor of Philosophy –Computer Engineering

A candidate for the Ph.D. degree with a major in computer engineering must comply with the rules and regulations as outlined in the WVU Graduate Catalog and the specific requirements of the Statler College and the Lane Department of Computer Science and Electrical Engineering.

Program Requirements

The doctor of philosophy degree with a major in computer engineering is administered through the college’s interdisciplinary Ph.D. program. The research work for the doctoral dissertation must show a high degree of originality on the part of the student and must constitute an original contribution to the art and science of computer engineering.

All Ph.D. degree candidates are required to perform research and follow a planned program of study. The student’s research advisor, in conjunction with the student’s Advising and Examining Committee (AEC) will be responsible for determining the plan of study appropriate to the student’s needs. The underlying principle of the planned program is to provide the students with the necessary support to complete their degree and prepare them for their career.

Research work for the doctoral dissertation must represent a significant contribution to engineering or computer science. It may entail a fundamental investigation into a specialized area.

Curriculum Requirements

A minimum cumulative GPA of 3.0 is required

Research

- CPE 797 Research 24

Examinations

| Qualifying Exam |
| Candidacy Exam |
| Final Exam |

Total Hours 42

* Students who do not hold a baccalaureate degree in computer engineering are required to take a set of undergraduate computer engineering courses above and beyond the minimum coursework requirements.

Doctoral students who do not have an M.S.C.S. or M.S.E.E. degree must either earn this degree, or complete coursework as required for the master’s degree with thesis option. It is not necessary to actually write a thesis. A minimum of twenty-four hours of coursework is required. Up to twelve hours may be transferred from work done at another institution.

A minimum of forty-two hours of coursework and thirty hours of independent research beyond a bachelor’s degree, or eighteen hours of coursework and twenty-four hours of independent research beyond an M.S. degree are required.

Examinations

QUALIFYING EXAM

All students must take and pass a written qualifying examination. Normally, the qualifying examination is given no later than one semester after completion of eighteen credit hours toward the doctoral degree. This examination is designed to assess the basic competency of students in the computer engineering field to determine whether or not they have sufficient knowledge to undertake independent research.

The Lane Department of Computer Science and Electrical Engineering is organized in the following five Areas of Concentration. All Ph.D. degree programs use these Areas to provide organizational structure to the educational process as delineated under specific Ph.D. requirements. The
significance of these Areas will be of particular importance in preparation for the Qualifying Exam as each area has designated Ph.D. Qualifier Core Courses as follows:

1. **Electronics and Photonics Area**
   - EE 550: Advanced Semiconductor Electronics
   - EE 551: Linear Integrated Circuits
   - EE 650: Optoelectronics

2. **Signals and Systems Area**
   - EE 513: Stochastic Systems Theory
   - EE 515: Linear Control Systems
   - EE 533: Computer Applications in Power System Analysis

3. **Computer Systems**
   - CPE 670: Switching Circuit Theory 1
   - CS 550: Theory of Operating Systems

4. **Software/Knowledge Engineering**
   - CPE 684: Advanced Real-Time Systems
   - CS 573: Advanced Data Mining
   - CS 591Q: Pattern Recognition

5. **Theory of Computing**
   - CS 510: Formal Specification of Language
   - CS 520: Advanced Analysis of Algorithms
   - CS 525: Computational Complexity

Ph.D. students must make the first attempt to pass the qualifying exam within fourteen months of their enrollment if they already have a M.S. degree from the Lane Department of CSEE or within twenty-six months otherwise. The Ph.D. qualifying process consists of completion of a research project and oral examination. The project is intended to demonstrate the student's ability to assemble and analyze the relevant literature for a given research problem and to make preliminary steps towards his/her own contribution.

The oral exam will include:

1. Presentation by the student of his/her research project
2. Questions about the work, its context, and relevant literature
3. Questions about course work, focusing specifically on the three core courses for which the student has earned credit

The possible outcomes of the first year exam are: "Pass" which means the student is qualified to begin work towards the candidacy exam; "Pass with Recommended Coursework" which means the student is qualified to begin work towards a candidacy exam but certain courses must be taken; or "Fail". Any student failing the qualifying exam on the initial attempt will have one additional attempt within six months. Failure of the exam on the second attempt will disqualify the student from further doctoral studies in the LCSEE program.

**CANDIDACY EXAMINATION**

In order to be admitted to candidacy, the student must pass a candidacy exam, which is designed to evaluate the student's overall ability to engage in high-level research.

When all requirements are completed, the qualifying and candidacy examinations are passed, and the research proposal is successfully defended, the student is formally admitted to candidacy for the Ph.D. degree. For full-time students, admission to candidacy must normally occur within three years of entering the Ph.D. program.

**FINAL EXAMINATION**

At the completion of the dissertation research, candidates must prepare a dissertation and pass the final oral examination (defense) administered by their AEC.

In order to complete the Ph.D. requirements, a student must pass a final oral examination on the results embodied in the dissertation. This examination is open to the public and, in order to evaluate critically the student's competency, may include testing on material in related fields, as deemed necessary by the AEC. All requirements for the degree must be completed within five years after the student has been admitted to candidacy.
Suggested Plan of Study

It is important for students to take courses in the order specified as much as possible; all prerequisites and concurrent requirements must be observed. A typical doctoral degree program that completes degree requirements in three years is as follows. A typical Ph.D. program requires four to five years beyond the baccalaureate degree, although scholarly achievements are more important than length of program.

Major Learning Goals

COMPUTER ENGINEERING

It is our goal that in the first five years after graduation our students will:

1. Achieve success and proficiency in the Computer Engineering profession.
2. Be recognized as leaders.
3. Contribute to the well-being of society.

Computer Science

Degrees Offered

- Master of Science in Computer Science (M.S.C.S).
- Doctor of Philosophy in Computer Science (Ph.D.)

Program Description

The Masters of Science in Computer Science (M.S.C.S.) degree program qualifies a student to assume a professional role in industry or government, teach in a junior or senior college, or undertake advanced training toward a doctorate in computer science. The following sections describe the general procedures to be followed in completing the M.S.C.S. degree. Note that steps are intended to be carried out in a specific order.

Program Educational Objectives & Outcomes

The objective of the Masters of Science in Computer Science (M.S.C.S.) degree program is to produce graduates who have the knowledge, skills, and attitudes that will ensure success in professional positions in business, industry, research, government service, or in further graduate or professional study.

Specific outcomes that will be achieved by graduates of the program are:

- Achieve a depth of proficiency in a specific field of Computer Science by completing major courses in one of three areas: computer systems, software and knowledge engineering, or the theory of computation.
- Achieve a breadth of understanding of Computer Science by completing minor coursework requirements in other areas, and by participation in graduate seminar requirements.
- Demonstrate professionalism and communication skills through completion of coursework, project, or thesis defense.
Admissions

Students who satisfy the departmental graduate admission requirements given on the main departmental section will be considered for admission. Additional criteria may be considered in making a final decision. All applicants must submit three letters of reference and complete an Applicant Information Form.

FOUNDATION ASSESSMENT

The minimum background expected of any student entering the M.S.C.S. program is coursework equivalent to the following:

- One year of calculus (MATH 155 and MATH 156).
- One course in probability and statistics (STAT 215).
- Knowledge of introductory programming in a high-level programming language (STAT 215).

Students not meeting these minimum requirements will be required to take the equivalent coursework before applying to the M.S.C.S. program.

Students entering without a four-year Bachelors degree in Computer Science may have additional deficiencies in their coursework which must be addressed before beginning the regular M.S.C.S. program. These students will be initially admitted with provisional status and required to remove these deficiencies during their first eighteen hours of coursework.

Possible deficiency areas for students having a Bachelors degree in other disciplines represent the following core areas required of all undergraduate CS students:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CS 111</td>
<td>Introduction to Data Structures</td>
<td>4</td>
</tr>
<tr>
<td>CS 220</td>
<td>Discrete Mathematics</td>
<td>3</td>
</tr>
<tr>
<td>CS 221</td>
<td>Analysis of Algorithms</td>
<td>3</td>
</tr>
<tr>
<td>CS 230</td>

<td>4</td>
</tr>
<tr>
<td>CS 310</td>
<td>Principles of Programming Languages</td>
<td>3</td>
</tr>
<tr>
<td>CS 350</td>
<td>Computer System Concepts</td>
<td>3</td>
</tr>
</tbody>
</table>

As demand justifies and resources permit, the department will offer accelerated courses to assist graduate students in satisfying deficiencies.

Curriculum in Masters of Science in Computer Science

A candidate for the M.S. degree in computer science must comply with the rules and regulations as outlined in the WVU Graduate Catalog and the specific requirements of the Statler College and the Lane Department of Computer Science and Electrical Engineering.

Program Requirements

All M.S. degree candidates are required to perform research and follow a planned program of study. The student’s research advisor, in conjunction with the student’s Advising and Examining Committee (AEC) will be responsible for determining the plan of study appropriate to the student’s needs. The underlying principle of the planned program is to provide the students with the necessary support to complete their degree and prepare them for their career.

Curriculum Requirements

A minimum cumulative GPA of 3.0 is required

Course Requirements

**Final Examination**

M.S. students following the thesis or problem report option must prepare a written research proposal. The proposal must be approved by the student's AEC at least one semester prior to the final oral examination.

All students, regardless of option, are required to pass a final oral or written examination, administered by their AEC, covering the thesis or problem report and/or related course material. All master's students must defend their thesis or problem report at an oral exam, attended by all members of the committee. A student who fails the research defense may repeat the defense at most once, at a time determined by the AEC but not necessarily during the same semester.

**Suggested Plan of Study**

The plan below illustrates the Thesis Option. It is important for students to take courses in the order specified as much as possible; all prerequisites and concurrent requirements must be observed. A typical M.S.C.S degree program that completes degree requirements in one and half years is as follows. Those students who lack course prerequisites may require more than three semesters of full-time study to complete the degree. Students with research assistantships may also require more than three semesters to complete the degree.

Curriculum in Doctor of Philosophy –Computer Science Requirements

A candidate for the Ph.D. degree with a major in computer science must comply with the rules and regulations as outlined in the WVU Graduate Catalog and the specific requirements of the Statler College and the Lane Department of Computer Science and Electrical Engineering.

Program Requirements

The doctor of philosophy degree with a major in computer science is administered through the college’s interdisciplinary Ph.D. program. The research work for the doctoral dissertation must show a high degree of originality on the part of the student and must constitute an original contribution to the art and science of computer science.

All Ph.D. degree candidates are required to perform research and follow a planned program of study. The student’s research advisor, in conjunction with the student’s Advising and Examining Committee (AEC) will be responsible for determining the plan of study appropriate to the student’s needs. The underlying principle of the planned program is to provide the students with the necessary support to complete their degree and prepare them for their career.

Research work for the doctoral dissertation must represent a significant contribution to engineering or computer science. It may entail a fundamental investigation into a specialized area.

Curriculum Requirements

A minimum cumulative GPA of 3.0 is required

Total Hours 42

* Students who do not hold a baccalaureate degree in computer science are required to take a set of undergraduate computer science courses above and beyond the minimum coursework requirements.

Doctoral students who do not have an M.S.C.S. degree must either earn this degree or complete coursework as required for the M.S.C.S. with thesis option. It is not necessary to actually write a thesis. A minimum of twenty-four hours of coursework is required. Up to twelve hours may be transferred from work done at another institution.

A minimum of forty-two hours of coursework and thirty hours of independent research beyond a bachelor’s degree, or eighteen hours of coursework and twenty-four hours of independent research beyond an M.S. degree are required.

Examinations

QUALIFYING EXAM

All students must take and pass a written qualifying examination. Normally, the qualifying examination is given no later than one semester after completion of eighteen credit hours toward the doctoral degree. This examination is designed to assess the basic competency of students in the computer science field to determine whether or not they have sufficient knowledge to undertake independent research.

The Lane Department of Computer Science and Electrical Engineering is organized in the following five Areas of Concentration. All Ph.D. degree programs use these Areas to provide organizational structure to the educational process as delineated under specific Ph.D. requirements. The significance of these Areas will be of particular importance in preparation for the Qualifying Exam as each area has designated Ph.D. Qualifier Core Courses as follows:
1. Electronics and Photonics Area
   EE 550  Advanced Semiconductor Electronics
   EE 551  Linear Integrated Circuits
   EE 650  Optoelectronics

2. Signals and Systems Area
   EE 513  Stochastic Systems Theory
   EE 515  Linear Control Systems
   EE 533  Computer Applications in Power System Analysis

3. Computer Systems
   CPE 670  Switching Circuit Theory 1
   CS 550  Theory of Operating Systems

4. Software/Knowledge Engineering
   CPE 684  Advanced Real-Time Systems
   CS 573  Advanced Data Mining
   CS 591Q  Pattern Recognition

5. Theory of Computing
   CS 510  Formal Specification of Language
   CS 520  Advanced Analysis of Algorithms
   CS 525  Computational Complexity

Ph.D. students must make the first attempt to pass the qualifying exam within fourteen months of their enrollment if they already have a M.S. degree from the Lane Department of CSEE or within twenty-six months otherwise. The Ph.D. qualifying process consists of completion of a research project and oral examination. The project is intended to demonstrate the student's ability to assemble and analyze the relevant literature for a given research problem and to make preliminary steps towards his/her own contribution.

The oral exam will include:

1. Presentation by the student of his/her research project
2. Questions about the work, its context, and relevant literature
3. Questions about course work, focusing specifically on the three core courses for which the student has earned credit

The possible outcomes of the first year exam are: "Pass" which means the student is qualified to begin work towards the candidacy exam; "Pass with Recommended Coursework" which means the student is qualified to begin work towards a candidacy exam but certain courses must be taken; or "Fail". Any student failing the qualifying exam on the initial attempt will have one additional attempt within six months. Failure of the exam on the second attempt will disqualify the student from further doctoral studies in the LCSEE program.

CANDIDACY EXAMINATION

In order to be admitted to candidacy, the student must pass a candidacy exam, which is designed to evaluate the student's overall ability to engage in high-level research.

When all requirements are completed, the qualifying and candidacy examinations are passed, and the research proposal is successfully defended, the student is formally admitted to candidacy for the Ph.D. degree. For full-time students, admission to candidacy must normally occur within three years of entering the Ph.D. program.

FINAL EXAMINATION

At the completion of the dissertation research, candidates must prepare a dissertation and pass the final oral examination (defense) administered by their AEC.

In order to complete the Ph.D. requirements, a student must pass a final oral examination on the results embodied in the dissertation. This examination is open to the public and, in order to evaluate critically the student's competency, may include testing on material in related fields, as deemed necessary by the AEC. All requirements for the degree must be completed within five years after the student has been admitted to candidacy.

Suggested Plan of Study

It is important for students to take courses in the order specified as much as possible; all prerequisites and concurrent requirements must be observed. A typical doctoral degree program that completes degree requirements in three years is as follows. A typical Ph.D. program requires four to five years beyond the Baccalaureate degree, although scholarly achievements are more important than length of program.

#### Major Learning Goals

**COMPUTER SCIENCE**

It is our goal that in the first five years after graduation our students will:

1. Achieve success and proficiency in the Computer Science profession.
2. Be recognized as leaders.
3. Contribute to the well-being of society.

### Electrical Engineering

#### Degrees Offered

- Masters of Science, Electrical Engineering (M.S.E.E.)
- Doctor of Philosophy, Electrical Engineering (Ph.D.)

#### Program Description

The Masters of Science in Electrical Engineering (M.S.E.E.) degree program is intended for students who have an undergraduate degree in Electrical Engineering, Computer Engineering, or a closely related discipline, and wish to broaden their depth of understanding in one or more areas of the field. Program graduates will be qualified to pursue careers in industry, government, or further academic study. The Doctor of Philosophy program should be considered by those with superior academic achievement and who desire to pursue a career of research or teaching.

#### Masters Program Educational Objectives & Outcomes

The objective of the Master of Science in Electrical Engineering (M.S.E.E.) degree program is to produce graduates who have the knowledge, skills, and attitudes that will ensure success in professional positions in business, industry, research, government service, or in further graduate or professional study.

Specific outcomes that will be achieved by graduates of the program are:

1. Achieve a depth of proficiency in a specific field of Electrical Engineering by completing major courses in one of four areas: electronics and photonics; systems and signals; computer systems; or software and knowledge engineering.
2. Achieve a breadth of understanding of Electrical Engineering by completing minor coursework requirements in another area, and by participation in graduate seminar requirements.
3. Demonstrate professionalism and communication skills through completion of coursework, project or thesis defense.

#### Doctoral Program Educational Objectives & Outcomes

The objective of the Ph.D. Program in Electrical Engineering degree program is to produce graduates who have the knowledge, skills, and attitudes that will ensure success in professional positions in business, industry, research, government service, or in further graduate or professional study.
Specific outcomes that will be achieved by graduates of the program are:

1. Achieve a depth of understanding in Electrical Engineering, as demonstrated by completion of core Ph.D. courses and examination on that material through the Qualifying Examination process.
2. Achieve a breadth of understanding of the Electrical Engineering discipline, as demonstrated by completion of remaining doctoral coursework and participation in graduate seminar.
3. Demonstrate the ability to conduct independent research by completion and defense of a dissertation.

Masters Admissions

Students admitted into a program are designated as regular, provisional, or non-degree status. Regular status is given to students who are granted unconditional admissions. Provisional status is given to students who have deficiencies to make up such as incomplete credentials or other reasons as identified by the graduate coordinator. In all cases, the student’s letter of admission will state what must be done to attain regular status, and students must sign and date this letter no later than the first registration. Non-degree status is granted case-by-case by the graduate coordinator. Basically, a non-degree student is one who may take courses but sometimes with no plan of study or any guarantee for attaining provisional status.

Doctoral Admissions

As a first step, students must satisfy provisions under the “Admission Requirements for All Programs” and must submit a statement of purpose. Students who hold an M.S.E.E. or M.S.E. (or equivalent) degree will be considered for admission with regular status into the Ph.D. program. Students who hold a master’s degree in the sciences or engineering, excluding M.S.E.E. or M.S.E., will be considered for admission with provisional status and will likely have coursework deficiencies to remove. All other students must apply for admission into a master’s program as the first stage in attaining the Ph.D.

REMOVING DEFICIENCIES

Prior to the first week of classes, new Ph.D. students must meet with the graduate coordinator to select classes. This interview determines if the student needs remedial work in order to pursue a graduate degree. Students with deficiencies may be required to take courses as prerequisites for graduate courses. Deficiencies are usually noted as a condition for admission. However, they may also be specified during the interview or later.

During the second semester, students must form their Advisory and Examining Committee (AEC) and write a plan of study. The AEC may also identify additional deficiencies to be removed, but this is rare since deficiencies should have been identified earlier in the student’s career.

Curriculum in Master of Science in Electrical Engineering Masters

A candidate for the M.S. degree in electrical engineering must comply with the rules and regulations as outlined in the WVU Graduate Catalog and the specific requirements of the Statler College and the Lane Department of Computer Science and Electrical Engineering.

Program Requirements

All M.S. degree candidates are required to perform research and follow a planned program of study. The student’s research advisor, in conjunction with the student’s Advising and Examining Committee (AEC) will be responsible for determining the plan of study appropriate to the student’s needs. The underlying principle of the planned program is to provide the students with the necessary support to complete their degree and prepare them for their career.

Curriculum Requirements

A minimum cumulative GPA of 3.0 is required

Course Requirements

A minimum of 60% of courses must be from 500 level or above

Final Examination

M.S. students following the thesis or problem report option must prepare a written research proposal. The proposal must be approved by the student's AEC at least one semester prior to the final oral examination.

All students, regardless of option, are required to pass a final oral or written examination, administered by their AEC, covering the thesis or problem report and/or related course material.

All master's students must defend their thesis or problem report at an oral exam, attended by all members of the committee.

A student who fails the research defense may repeat the defense at most once, at a time determined by the AEC but not necessarily during the same semester.

Suggested Plan of Study

The plan below illustrates the Thesis Option. It is important for students to take courses in the order specified as much as possible; all prerequisites and concurrent requirements must be observed. A typical M.S.E.E degree program that completes degree requirements in one and half years is as follows. Those students who lack course prerequisites may require more than three semesters of full-time study to complete the degree. Students with research assistantships may also require more than three semesters to complete the degree.

Curriculum in Doctor of Philosophy – Electrical Engineering Requirements

A candidate for the Ph.D. degree with a major in electrical engineering must comply with the rules and regulations as outlined in the WVU Graduate Catalog and the specific requirements of the Statler College and the Lane Department of Computer Science and Electrical Engineering.

Program Requirements

The doctor of philosophy degree with a major in electrical engineering is administered through the college’s interdisciplinary Ph.D. program. The research work for the doctoral dissertation must show a high degree of originality on the part of the student and must constitute an original contribution to the art and science of electrical engineering.

All Ph.D. degree candidates are required to perform research and follow a planned program of study. The student’s research advisor, in conjunction with the student’s Advising and Examining Committee (AEC) will be responsible for determining the plan of study appropriate to the student’s needs. The underlying principle of the planned program is to provide the students with the necessary support to complete their degree and prepare them for their career.

Research work for the doctoral dissertation must represent a significant contribution to engineering or computer science. It may entail a fundamental investigation into a specialized area. A minimum of twenty-four credit hours of research (EE 797) is required.

Curriculum Requirements

A minimum cumulative GPA of 3.0 is required.

Course Requirements

- A minimum of six credit hours of 600 or higher level courses
- A maximum of six credit hours may be in directed study (EE 795)
- Research (EE 797): 24 credit hours
- Select from the following based on degree path: 18 credit hours
  - Any BIOM, CE, CHEM, CPE, CS, EE, IENG, IH&S, MAE, MATH, MINE, PNGE, PHYS, SAFM, SENG, or STAT courses 500-799

Examinations

- Qualifying Exam
- Candidacy Exam
- Final Exam

Total Hours: 42 credit hours

* Students who do not hold a baccalaureate degree in electrical engineering are required to take a set of undergraduate electrical engineering courses above and beyond the minimum coursework requirements.

Doctoral students who do not have an M.S.E.E. degree must either earn this degree, or complete coursework as required for the Master’s degree with thesis option. It is not necessary to actually write a thesis. A minimum of twenty-four hours of coursework is required. Up to twelve hours may be transferred from work done at another institution.

A minimum of forty-two hours of coursework and thirty hours of independent research beyond a bachelor’s degree, or eighteen hours of coursework and twenty-four hours of independent research beyond an M.S. degree are required.

Examinations

QUALIFYING EXAM

All students must take and pass a written qualifying examination. Normally, the qualifying examination is given no later than one semester after completion of eighteen credit hours toward the doctoral degree. This examination is designed to assess the basic competency of students in the electrical engineering field to determine whether or not they have sufficient knowledge to undertake independent research.

The Lane Department of Computer Science and Electrical Engineering is organized in the following five Areas of Concentration. All Ph.D. degree programs use these Areas to provide organizational structure to the educational process as delineated under specific Ph.D. requirements. The significance of these Areas will be of particular importance in preparation for the Qualifying Exam as each area has designated Ph.D. Qualifier Core Courses as follows:

1. Electronics and Photonics Area
EE 550  Advanced Semiconductor Electronics
EE 551  Linear Integrated Circuits
EE 650  Optoelectronics

2. Signals and Systems Area
EE 513  Stochastic Systems Theory
EE 515  Linear Control Systems
EE 533  Computer Applications in Power System Analysis

3. Computer Systems
CPE 670  Switching Circuit Theory 1
CS 550  Theory of Operating Systems

4. Software/Knowledge Engineering
CPE 684  Advanced Real-Time Systems
CS 573  Advanced Data Mining
CS 591Q  Pattern Recognition

5. Theory of Computing
CS 510  Formal Specification of Language
CS 520  Advanced Analysis of Algorithms
CS 525  Computational Complexity

Ph.D. students must make the first attempt to pass the qualifying exam within fourteen months of their enrollment if they already have a M.S. degree from the Lane Department of CSEE or within twenty-six months otherwise. The Ph.D. qualifying process consists of completion of a research project and oral examination. The project is intended to demonstrate the student’s ability to assemble and analyze the relevant literature for a given research problem and to make preliminary steps towards his/her own contribution.

The oral exam will include:

1. Presentation by the student of his/her research project
2. Questions about the work, its context, and relevant literature
3. Questions about course work, focusing specifically on the three core courses for which the student has earned credit

The possible outcomes of the first year exam are: “Pass” which means the student is qualified to begin work towards the candidacy exam; “Pass with Recommended Coursework” which means the student is qualified to begin work towards a candidacy exam but certain courses must be taken; or “Fail”. Any student failing the qualifying exam on the initial attempt will have one additional attempt within six months. Failure of the exam on the second attempt will disqualify the student from further doctoral studies in the LCSEE program.

CANDIDACY EXAMINATION
In order to be admitted to candidacy, the student must pass a candidacy exam, which is designed to evaluate the student’s overall ability to engage in high-level research.

When all requirements are completed, the qualifying and candidacy examinations are passed, and the research proposal is successfully defended, the student is formally admitted to candidacy for the Ph.D. degree. For full-time students, admission to candidacy must occur within three years of entering the Ph.D. program.

FINAL EXAMINATION
At the completion of the dissertation research, candidates must prepare a dissertation and pass the final oral examination (defense) administered by their AEC.

In order to complete the Ph.D. requirements, a student must pass a final oral examination on the results embodied in the dissertation. This examination is open to the public and, in order to evaluate critically the student’s competency, may include testing on material in related fields, as deemed necessary by the AEC. All requirements for the degree must be completed within five years after the student has been admitted to candidacy.

Suggested Plan of Study
It is important for students to take courses in the order specified as much as possible; all prerequisites and concurrent requirements must be observed. A typical doctoral degree program that completes degree requirements in three years is as follows. A typical Ph.D. program requires four to five years beyond the baccalaureate degree, although scholarly achievements are more important than length of program.
Major Learning Goals

ELECTRICAL ENGINEERING

It is our goal that in the first five years after graduation our students will:

2. Be recognized as leaders.
3. Contribute to the well-being of society.

Software Engineering

Degrees Offered

• Masters of Science, Software Engineering (M.S.S.E.)

Program Description

The Lane Department of Computer Science and Electrical Engineering offers the professionally oriented Masters of Science in Software Engineering (M.S.S.E.) degree program, as well as a graduate Certificate in Software Engineering. The M.S.S.E. provides graduate educational opportunities to working professionals. The M.S.S.E. degree is a unique fully-online program which provides graduate level software engineering expertise to individuals who are currently working in the software engineering and information technology industry. The program aspires to serve both the full-time software engineer from any industry and the computer science or similar graduate seeking an applied masters program with the flexibility of taking courses online from where they are located. Typical M.S.S.E. students are full time software engineering professionals who wish to augment their work experience with additional academic background.

Program Educational Objectives & Outcomes

The objective of the program is to produce graduates who have the knowledge, skills, and attitudes that will ensure success in professional positions in business, industry, research, or governmental service.

More specifically, after completing five core courses, students will achieve the following outcomes:

• Achieve proficiency in the area of Software Project Management.
• Achieve proficiency in Software Analysis and Design.
• Understand the process of software Validation and Verification.
• Understand the process of Software Evolution.
• Achieve proficiency in Object-Oriented Design of software.

Students will complete their degree requirements with six advanced elective courses with the course work only option that will deepen their understanding of aspects of software engineering relevant to their careers. Problem Report and Thesis Options are also available.
Admissions

Students seeking admission to the M.S.S.E. program must fall into one of two categories to be considered for admission. The categories are:

TRADITIONAL STUDENTS WITH RELATED UNDERGRADUATE DEGREE

Students who have recently completed a Bachelor's degree in Computer Science, Computer Engineering, Software Engineering, or a closely related field will be considered for admission with regular status if they satisfy the following requirements:

- Cumulative GPA of 3.0 (on a 4-point scale) or better within the major. Official transcripts showing completion of the Bachelor's degree must be provided in all cases.
- Submission of satisfactory scores in quantitative reasoning for the GRE General Test or Revised General Test. Official scores must be submitted prior to acceptance.

NONTRADITIONAL STUDENTS

Students who do not meet the above requirements but have work experience related to software development will be considered for admission if they meet the following requirements:

- Hold a four-year Bachelor's degree in any field from an accredited University, with a GPA of at least 2.75. Official transcripts showing degree completion must be provided in all cases.
- Submit a resume documenting at least one year of software development experience.
- The GRE is not required for this option.

Nontraditional students are initially admitted as Provisional Graduate students. Students desiring to initially earn the Certificate in Software Engineering are initially admitted as non-degree students. They may enroll in core courses in the M.S.S.E. program. Upon meeting this requirement, these students may apply for transfer to the regular M.S.S.E. program. At the time of transfer, they must meet the following additional requirements:

- Earn a grade of at least B in each of the first four courses taken (any of the five core)
- Submit a resume documenting at least three years of software development experience.
- Submit three letters of reference from persons familiar with the student's professional software development work.
- Request a transfer to Regular Status from the program coordinator upon completion of above and prior to completing 18 credit hours in the M.S.S.E. program.

Curriculum in Master of Science in Software Engineering

A candidate for the M.S. degree in software engineering must comply with the rules and regulations as outlined in the WVU Graduate Catalog and the specific requirements of the Statler College and the Lane Department of Computer Science and Electrical Engineering.

Program Requirements

All M.S. degree candidates are required to perform research (thesis or problem report option) and follow a planned program of study. The student's faculty advisor, in conjunction with the student's Advising and Examining Committee (AEC) will be responsible for determining the plan of study appropriate to the student's needs. The underlying principle of the planned program is to provide the student with the necessary support to complete their degree and prepare them for their career.

Curriculum Requirements

A minimum cumulative GPA of 3.0 is required in all courses

Certificate in Software Engineering

CERTIFICATE CODE - CG10

The certificate in software engineering program provides further education to individuals who are currently working in the computer and information technology industry. This program is offered online at evening times convenient for the working professional.

Students may apply for admission as non-degree students to complete the certificate requirements. These students may then optionally apply for transfer to the M.S.S.E. program. In addition, students already admitted to the M.S.S.E. may elect to receive the certificate after completing the necessary requirements.

ADMISSION REQUIREMENTS

Applicants for the certificate in software engineering must meet the following requirements:

• Hold a bachelor’s degree in any field from an accredited University.
• Submit a resume documenting at least one year of software development experience.
• By the semester in which the certificate is to be awarded, students must meet the following additional requirements:
a. Submit a resume documenting at least three years of software development experience.
b. Submit three letters of reference from persons familiar with the student's professional work.

Students working toward the certificate in software engineering are not degree candidates and are admitted as non-degree students. However, they may apply for admission to the M.S.S.E. program (see below) after satisfactory completion of most of the certificate requirements.

Students initially admitted to the M.S.S.E. program may elect to receive the certificate after satisfactory completion of the five core courses and the certificate paper (see below). In this case the resume and letters of reference are not required.

PROGRAM REQUIREMENTS
The certificate program consists of completing five approved courses and a certificate term paper. Students who achieve a B- or higher in each of the first four courses of the certificate program may qualify to enter the M.S.S.E. program, as described below.

Major Learning Goals
SOFTWARE ENGINEERING
It is our goal that in the first five years after graduation our students will:

1. Achieve success and proficiency in the Software Engineering profession.
2. Be recognized as leaders.
3. Contribute to the well-being of society.

Department of Industrial and Management Systems Engineering
Degrees Offered

- Masters of Science, Industrial Engineering (M.S.I.E.)
- Masters of Science, Industrial Hygiene (M.S.)
- Masters of Science, Safety Management (M.S.)
- Doctor of Philosophy, Industrial Engineering (Ph.D.)
- Doctor of Philosophy, Occupational Safety and Health (Ph.D.)

One of the defining attributes in the success of the department is the dedication and talent of its fifteen faculty and three staff members. The aggregate careers of our faculty and staff represent over 250 years of service to students at WVU. In these 250 years of service is embodied the wisdom and experience to successfully prepare industrial engineers and occupational health and safety professionals to address ever-changing societal needs. The faculty and staff typically educate nearly 300 undergraduate, 100 to 120 M.S., and fifteen to twenty-five Ph.D. students. The department is in the unique position in the United States of having two complimentary graduate programs in industrial hygiene and safety accredited by the Applied Science Accreditation Commission (ASAC) of ABET. The combined resources and faculty talents of these two programs create synergies that provide our students with outstanding academic and research experiences in the field of occupational safety and health. Excellent academic and research opportunities are also available for students in the areas of healthcare systems, supply chain optimization, energy systems, smart manufacturing, occupational safety/health, and ergonomics.

Faculty Research
The department has quality research laboratories in smart manufacturing, operations research, production planning and control, data analytics and visualization, ergonomics, industrial hygiene, and safety. Graduate students are encouraged to utilize these resources to explore and develop their capabilities.

FACULTY
CHAIR
- Kenneth R. Currie - Ph.D. P.E., (West Virginia University)
  Manufacturing systems design, Optimization, Automation & Controls, Healthcare Systems Engineering

PROFESSORS
- Rashpal Ahluwalia - Ph.D., P.E. (Western Ontario University)
  Manufacturing Systems, Quality and Reliability Engineering, Robotics and Automation
- Jack Byrd Jr. - Ph.D., P.E. (West Virginia University)
- Bhaskaran Gopalakrishnan - Ph.D., P.E., CEM. (Virginia Polytechnic Institute and State University)

- Steven Guffey - Ph.D., C.I.H. (North Carolina State University)
  Ventilation Systems Theory and Design, Noise Measurement and Control, Exposure Assessment
- Majid Jaridi - Ph.D. (University of Michigan)
  Statistics, Quality Control, Forecasting and Transportation Research
- Gary Winn - Ph.D. (Ohio State University)
  Construction Safety, Transportation Safety and Program Evaluation, Total Quality Management, Theory of Paradigm Shifts
- David A. Wyrick - Ph.D., P.E., P.E.M. (University of Missouri-Rolla)
  Engineering Management, Engineering Education, Appropriate Management of Technology in SMEs

ASSOCIATE PROFESSORS

- Elyce Biddle - Ph.D. (West Virginia University)
  Business economics; Behavioral economics; Healthcare safety; Data Surveillance: classification systems, data and system quality
- Alan McKendall, Jr. - Ph.D. (University of Missouri, Columbia)
  Operations Research, Meta-heuristics, Facilities Layout and Materials Handling, Project Scheduling, Integrated Production Systems
- Ashish Nimbarte - Ph.D. (Louisiana State University)
  Work Related Musculoskeletal Disorders, Occupational Biomechanics and Biomechanical Modeling
- Feng Yang - Ph.D. (Northwestern University)
  Simulation, Applied Statistics, Stochastic Processes

ASSISTANT PROFESSORS

- Leily Farrokhvar - Ph.D. (Virginia Tech)
  Supply Chain Optimization, Large Scale Optimization, Transportation & Logistics
- Xinjian "Kevin" He - Ph.D. (University of Cincinnati)
  Respiratory protection, air purification and filtration, aerosol measurement, characterization of particles in indoor and outdoor air, occupational exposure assessment
- Xiaopeng Ning - Ph.D. (Iowa State University)
  Safety Engineering, Biomechanics, Ergonomics, Human Factors Engineering
- Thorsten Wuest - Ph.D. (University of Bremen)
  Smart Manufacturing, Machine Learning/Artificial Intelligence, Conceptual Design, Process and Information/Data Management

PROFESSORS EMERITI

- Robert C. Creese - Ph.D., P.E. (Pennsylvania State University)
  Manufacturing processes/systems, Foundry engineering, Cost engineering, Engineering economics
- Daniel E. Della-Giustina - Ph.D. (Michigan State University)
  Playground and recreation safety, Sport safety, Highway and traffic management, Safety, fire, and emergency response
- Wafik H. Iskander - Ph.D., P.E. (Texas Tech University)
  Operations research and optimization, Simulation modeling and analysis, Production planning and control, Applied statistics, Energy efficiency
- Warren Myers - Ph.D. (West Virginia University)
  Exposure Assessment and Modeling, Aerosol Filtration, Occupational Respiratory Protection Design and Testing
- Ralph Plummer - Ph.D., P.E. (West Virginia University)
  Systems Safety Engineering, Energy Conservation, Human Factors, Ergonomics

ASSOCIATE PROFESSOR EMERITUS

- Andrew J. Sorine - Ed.D. (West Virginia University)
  Benchmarking, Safety and Health Programs, Safety Management Information Systems

VISITING AND ADJUNCT PROFESSORS

- Christopher Coffey - Ph.D. (West Virginia University)
  Occupational Safety and Health, Assessment, Evaluation of Respiratory Protective Equipment
- John R. Etherton - Ph.D. (West Virginia University)
  Safety Engineering, Human Factors
- Martin Harper - Ph.D. (London School of Hygiene and Tropical Medicine)
  Industrial Hygiene, Exposure Assessment
- James R. Harris - Ph.D., P.E. (West Virginia University)
  Safety Research, Human Factors
- Hongwei Hsiao - Ph.D. (University of Michigan)
Safety Engineering, Human Factors

• Kevin Michael - Ph.D. (Pennsylvania State University)
  Acoustics, Hearing Protection, Industrial Hygiene

• Christopher Pan - Ph.D. (University of Cincinnati)
  Industrial Hygiene, Exposure Assessment

• Ju-Hyeong Park - Sc.D. M.P.H., C.I.H. (Harvard University)
  Industrial Hygiene, Exposure Assessment

• Ziqing Zhuang - Ph.D. (West Virginia University)
  Exposure Assessment, Assessment and Evaluation of Respiratory Protective Equipment

LECTURER

• Shanti Hamburg - M.S. (Aerospace Engineering)
  Design/Build/Fly UAV Design and Construction; Prototyping; Digital Manufacturing

Admission

To qualify as a regular graduate student, applicants must have as a minimum the equivalent of a 3.0 GPA. Applicants with a minimum 2.75 GPA (or the equivalent) may be admitted on a provisional basis. Applicants with GPA below 2.75 would need approval of the dean or his designee. International students must demonstrate proficiency in communicating in English (a minimum TOEFL Score of 550, or IBT Score of 79, or IELTS Score of 6.5). Students must comply with the rules and regulations as outlined in this catalog for graduate work in the College of Engineering and Mineral Resources and meet individual major and degree admission standards.

Applicants to graduate programs in the IMSE department are required to provide the following.

• A completed application submitted to the WVU Admissions Office
• Official transcripts of all previous college course work
• TOEFL scores for international students as stated above
• GRE General Test scores (not required for the M.S. in Safety Management Program)
• Three letters of recommendation (required for the Ph.D. programs only).

Industrial Hygiene

Degree Offered:

• Masters of Science, Industrial Hygiene (M.S.)

The Master’s of Science with a major in Industrial Hygiene is accredited by the Applied Science Accreditation Commission of ABET, http://www.abet.org.

PROGRAM EDUCATIONAL OBJECTIVES

Drawing from the university’s mission, the program mission, the needs of our constituents, and the Applied Science Accreditation Commission Criteria of ABET, the following educational objectives were developed for the Masters of Science program in Industrial Hygiene:

1. Practice Industrial Hygiene and to initiate and develop leadership roles in business, industry, and/or government.
2. Continue professional development and life-long learning.
3. Interact in society and business in a professional, ethical manner to promote occupational and environmental health.
4. Be proficient in written and oral communication and to utilize people-oriented skills in individual and team environments.
5. Apply the skills from Industrial Hygiene to be proficient in his or her chosen field or doctoral studies.

STUDENT OUTCOMES

In order to meet the Program Educational Objectives of the Industrial Hygiene program, students must be able to meet the following educational outcomes at the time of their graduation:

1. An ability to use the techniques, skills, and modern scientific and technical tools necessary for professional practice such as:
   • Principles and methods of industrial hygiene
   • Principles and methods of ergonomics
   • Principles and methods of safety
   • Principles of environmental sciences
   • Principles of epidemiology and biostatistics
   • Principles and methods of control of physical and chemical hazards
2. The ability to apply knowledge of math, science, and Industrial Hygiene;
3. The ability to design and conduct experiments, analyze and interpret data, develop implementation strategies, and shape recommendations so that results will be achieved and findings will be communicated effectively;
4. The ability to work individually, in teams, and/or in multi-disciplinary teams to identify, formulate, and solve problems using Industrial Hygiene, safety, and ergonomics knowledge, skills, and tools;
5. An ability to formulate or design a system, process, or program to meet desired needs;
6. An understanding of professional and ethical responsibility and the broad education and a knowledge of contemporary issues necessary to understand the impact of solutions in a global and societal context; and
7. A recognition of the need for and an ability to engage in life-long learning.
8. The professional characteristics expected of a successful Industrial Hygienist.

For admission into the M.S. Industrial Hygiene Program, applicants must meet department admission standards and ABET/ASAC prerequisite course requirements which are currently a minimum of sixty-three credit hours of approved science, mathematics, and other technical courses. Of these, at least fifteen credit hours must be junior or senior level. Specific pre/corequisite course requirements include two semesters of general/inorganic chemistry and two semesters of physics. On an individual basis, the faculty may identify additional pre/corequisite coursework, often including organic chemistry and biology. Applicants will be advised about their specific requirements at the time of admission. Applicants not meeting all of the listed requirements may be considered for admission as provisional students.

### Curriculum in Masters of Science – Industrial Hygiene

A candidate for the M.S. degree with a major in industrial hygiene must comply with the rules and regulations as outlined in the WVU Graduate Catalog and the specific requirements of the Statler College and the Industrial and Management Systems Engineering Department.

#### Program Requirements

All M.S. degree candidates follow a planned program of study. The student’s research advisor, in conjunction with the student’s Advising and Examining Committee (AEC) will be responsible for determining the plan of study appropriate to the student’s needs. Students must select a track (thesis or coursework only) by the end of their second semester in the program. Changes in track may be made later as needed. The underlying principle of the planned program is to provide the students with the necessary support to complete their degree and prepare them for their career.

#### Curriculum Requirements

A minimum cumulative GPA of 3.0 is required in all courses
A minimum of 60% of courses must be from 500 level or above

Students who do not hold a baccalaureate degree in industrial hygiene may be required to take a set of undergraduate courses above and beyond the minimum coursework requirements. Students must complete those courses and earn at least a “C” in each before completing the 18th credit hour in the industrial hygiene curriculum.

**All courses contributing to Environmental or Safety Elective are three hours.**

### Final Examination

M.S. students following the thesis option must prepare a written research proposal. The proposal must be approved by the student's AEC at least one semester prior to the final oral examination.

All students, regardless of option, are required to pass a final oral or written examination, administered by their AEC, covering the thesis and/or related course material.

### Suggested Plan of Study

The plan below illustrates the Thesis Option. It is important for students to take courses in the order specified as much as possible; all prerequisites and concurrent requirements must be observed. A typical M.S.I.H. degree program that completes degree requirements in two years is as follows.

### Major Learning Goals

#### INDUSTRIAL HYGIENE

- An ability to use the techniques, skills, and modern scientific and technical tools necessary for professional practice such as:
  1. Principles and methods of industrial hygiene
  2. Principles and methods of ergonomics
  3. Principles and methods of safety
  4. Principles of environmental sciences
  5. Principles of epidemiology and biostatistics
  6. Principles and methods of control of physical and chemical hazards

- The ability to apply knowledge of math, science, and Industrial Hygiene;
- The ability to design and conduct experiments, analyze and interpret data, develop implementation strategies, and shape recommendations so that results will be achieved and findings will be communicated effectively;
- The ability to work individually, in teams, and/or in multi-disciplinary teams to identify, formulate, and solve problems using Industrial Hygiene, safety, and ergonomics knowledge, skills and tools;
- An ability to formulate or design a system, process, or program to meet desired needs;
• An understanding of professional and ethical responsibility and the broad education and a knowledge of contemporary issues necessary to understand the impact of solutions in a global and societal context;
• A recognition of the need for an ability to engage in life-long learning;
• The professional characteristics expected of a successful Industrial Hygienist.

Industrial Engineering

Degrees Offered:

• Masters of Science, Industrial Engineering (M.S.I.E.)
• Doctor of Philosophy, Industrial Engineering (Ph.D.)

MASTERS OF SCIENCE IN INDUSTRIAL ENGINEERING

A graduate of this master’s program will be prepared to accomplish the following:

1. Practice industrial engineering and to initiate and develop leadership roles in business, industry and/or government
2. Continue professional development and life-long learning
3. Interact in society and business in a professional and ethical manner
4. Be proficient in written and oral communication and to utilize people-oriented skills in individual and team environments
5. Apply the skills from industrial engineering to be proficient in his/her chosen field or further advanced studies

In order to meet the educational objectives, students of this master’s program must be able to meet the following educational outcomes at the time of their graduation. Students will have acquired:

1. The ability to use and master modern and classical industrial engineering methodologies in their area of concentration
2. The ability to apply knowledge of math, science, and engineering
3. The ability to do research, and to design and conduct experiments, analyze and interpret data, develop implementation strategies, and shape recommendations so that results will be achieved and findings will be communicated effectively
4. The ability to work individually, on teams, and/or on multi-disciplinary teams to identify, formulate, and solve problems using industrial engineering knowledge, skills, and tools
5. The ability to design and implement or improve integrated systems that include people, materials, information, equipment, and energy using appropriate analytical, computational, and experimental practices
6. An understanding of professional and ethical responsibility and the broad education and knowledge of contemporary issues necessary to understand the impact of solutions in a global and societal context
7. A recognition of the need for and an ability to engage in life-long learning
8. The professional characteristics expected of a successful industrial engineer

DOCTOR OF PHILOSOPHY WITH A MAJOR IN INDUSTRIAL ENGINEERING

A graduate of the Industrial Engineering doctoral program will be prepared to:

1. Practice/teach Industrial Engineering and to initiate and develop leadership roles in education, business, industry and/or government.
2. Continue professional development and life-long learning.
3. Interact in society and business in a professional and ethical manner.
4. Be proficient in written and oral communication and to utilize people-oriented skills in individual and team environments.
5. Apply the skills from Industrial Engineering to be proficient in his/her chosen field.

In order to meet the educational objectives, students of the Industrial Engineering Doctoral program must be able to meet the following educational outcomes at the time of their graduation. Students will have acquired:

1. The ability to use, master, and teach modern and classical Industrial Engineering methodologies in their area of concentration.
2. The ability to apply knowledge of math, science, and engineering.
3. The ability to do research, and to design and conduct experiments, analyze and interpret data, develop implementation strategies, and shape recommendations so that results will be achieved and findings will be communicated effectively.
4. The ability to work individually, on teams, and/or on multi-disciplinary teams to identify, formulate, and solve problems using industrial engineering knowledge, skills, and tools.
5. The ability to design and implement or improve integrated systems that include people, materials, information, equipment, and energy using appropriate analytical, computational, and experimental practices.
6. A thorough understanding of professional and ethical responsibility and the broad education and knowledge of contemporary issues necessary to fully evaluate the impact of solutions in a global and societal context.
7. A recognition of the need for and an ability to engage in life-long learning.
8. The professional characteristics expected of a successful Industrial Engineer.

For admission into the M.S. Industrial Engineering programs, applicants must meet department admission standards and have a bachelor of science degree from an engineering department, or from physics, chemistry, computer sciences, mathematics, or a similar technical or science program. In general, a degree in one of the “hard” science programs is required with at least two years of calculus or equivalent mathematics.

For admission into the Ph.D. program, typically, a Masters degree is required. However, applicants with B.S. degree with exceptional academic record can also be considered for direct admission into the Ph.D. program. Applicants with a M.S. degree should have, at a minimum, a 3.4 GPA (or equivalent) in their graduate coursework. Applicants with a B.S. degree should have, at a minimum, a 3.5 GPA (or equivalent) in their undergraduate coursework. Ph.D. applicants with a M.S. degree, must also meet all the entrance requirements stated above for the Master's program.

**Curriculum in Masters of Science in Industrial Engineering**

A candidate for the M.S. degree in industrial engineering must comply with the rules and regulations as outlined in the WVU Graduate Catalog and the specific requirements of the Statler College and the Industrial and Management Systems Engineering Department.

**Program Requirements**

All M.S. degree candidates are required to perform research and follow a planned program of study. The student’s research advisor, in conjunction with the student’s Advising and Examining Committee (AEC) will be responsible for determining the plan of study appropriate to the student’s needs. The underlying principle of the planned program is to provide the students with the necessary support to complete their degree and prepare them for their career.

**Curriculum Requirements**

A minimum cumulative GPA of 3.0 is required in all courses

**Course Requirements**

A minimum of 60% of courses must be from 500 level or above

Areas of Concentration

MANUFACTURING SYSTEM

Core Courses
- IENG 514 Design of Industrial Experiments 3
- IENG 542 Advanced Production Control 3
- IENG 551 Quality and Reliability Engineering 3
- IENG 577 Advanced Engineering Economy 3

Elective Courses
- IENG 505 Computer Integrated Manufacturing 3
- IENG 506 Computer Aided Process Planning 3
- IENG 507 Robotics and Flexible Automation 3
- IENG 518 Technology Forecasting 3
- IENG 554 Applied Integer/Heuristic Programs 3
- IENG 556 Supply Chain Management 3

ERGONOMICS

Core Courses
- IENG 514 Design of Industrial Experiments 3
- IENG 564 Industrial Ergonomics 3
- IENG 577 Advanced Engineering Economy 3
- IENG 660 Human Factors System Design 3

Elective Courses
- IENG 461 System Safety Engineering 3
- IENG 518 Technology Forecasting 3
- IENG 561 Industrial Hygiene Engineering 3
- IENG 662 Systems Safety Engineering 3

DECISION SCIENCES & PRODUCTION SYSTEMS

Core Courses
- IENG 455 Simulation by Digital Methods 3
- IENG 514 Design of Industrial Experiments 3
- IENG 553 Applied Linear Programming 3
- IENG 577 Advanced Engineering Economy 3

Elective Courses
- IENG 518 Technology Forecasting 3
- IENG 554 Applied Integer/Heuristic Programs 3
- IENG 556 Supply Chain Management 3
- IENG 754 Inventory Theory 3
- IENG 756 Applied Stochastic Processes 3

* Students who do not hold a baccalaureate degree in industrial engineering are required to take a set of undergraduate industrial engineering courses above and beyond the minimum coursework requirements.

Final Examination

M.S. students following the thesis or problem report option must prepare a written research proposal. The proposal must be approved by the student’s AEC at least one semester prior to the final oral examination.

All students, regardless of option, are required to pass a final oral or written examination, administered by their AEC, covering the thesis or problem report and/or related course material.

Suggested Plan of Study

The plan below illustrates the Thesis Option. It is important for students to take courses in the order specified as much as possible; all prerequisites and concurrent requirements must be observed. A typical M.S.I.E degree program that completes degree requirements in two years is as follows.
Curriculum in Doctor of Philosophy – Industrial Engineering

A candidate for the Ph.D. degree with a major in industrial engineering must comply with the rules and regulations as outlined in the WVU Graduate Catalog and the specific requirements of the Statler College and the Industrial and Management Systems Engineering Department.

Program Requirements

The doctor of philosophy degree with a major in industrial engineering is administered through the college’s interdisciplinary Ph.D. program. The research work for the doctoral dissertation must show a high degree of originality on the part of the student and must constitute an original contribution to the art and science of industrial engineering.

All Ph.D. degree candidates are required to perform research and follow a planned program of study. The student’s research advisor, in conjunction with the student’s Advising and Examining Committee (AEC) will be responsible for determining the plan of study appropriate to the student’s needs. The underlying principle of the planned program is to provide the students with the necessary support to complete their degree and prepare them for their career.

Required core courses for the Ph.D. program are determined by the student’s area of emphasis. In general, Ph.D. students take approximately fifty-four hours of coursework beyond their baccalaureate degree, with a minimum of thirty hours in industrial engineering.

Curriculum Requirements

A minimum cumulative GPA of 3.4 is required in all courses

| Candidacy Exam |
| Final Exam |

Total Hours 54

* Students who do not hold a baccalaureate degree in industrial engineering are required to take a set of undergraduate industrial engineering courses above and beyond the minimum coursework requirements. Required core courses for the Ph.D. program are determined by the student’s area of emphasis. In general, Ph.D. students take approximately fifty-four hours of coursework beyond their baccalaureate degree, with a minimum of thirty hours in industrial engineering.
Examinations

QUALIFYING EXAM
All students must take and pass a written qualifying examination. Normally, the qualifying examination is given no later than one semester after completion of eighteen credit hours toward the doctoral degree. This examination is designed to assess the basic competency of students in the industrial engineering field to determine whether or not they have sufficient knowledge to undertake independent research.

CANDIDACY EXAMINATION
In order to be admitted to candidacy, the student must pass a candidacy exam, which is designed to evaluate the student's overall ability to engage in high-level research.

A student who has successfully completed all coursework, passed the qualifying examination, and successfully defended the research proposal is defined as one who is a candidate for the Ph.D. degree.

FINAL EXAMINATION
At the completion of the dissertation research, candidates must prepare a dissertation and pass the final oral examination (defense) administered by their AEC.

In order to complete the Ph.D. requirements, a student must pass a final oral examination on the results embodied in the dissertation. This examination is open to the public and, in order to evaluate critically the student's competency, may include testing on material in related fields, as deemed necessary by the AEC. In addition, since the Ph.D. degree is primarily a research degree that embodies the results of an original research proposal and represents a significant contribution to scientific literature, the student must submit a manuscript on this research to the AEC.

Suggested Plan of Study
It is important for students to take courses in the order specified as much as possible; all prerequisites and concurrent requirements must be observed. A typical doctoral degree program that completes degree requirements in three years is as follows

Major Learning Goals
INDUSTRIAL ENGINEERING

MSIE
1. Practice industrial engineering and to initiate and develop leadership roles in business, industry and/or government.
2. Continue professional development and life-long learning.
3. Interact in society and business in a professional and ethical manner.
4. Be proficient in written and oral communication and to utilize people-oriented skills in individual and team environments.
5. Apply the skills from industrial engineering to be proficient in his/her chosen field or further advanced studies.
PhD

1. Practice/teach Industrial Engineering and to initiate and develop leadership roles in education, business, industry and/or government.
2. Continue professional development and life-long learning.
3. Interact in society and business in a professional and ethical manner.
4. Be proficient in written and oral communication and to utilize people-oriented skills in individual and team environments.
5. Apply the skills from Industrial Engineering to be proficient in his/her chosen field.

Occupational Safety and Health

Degree Offered:

• Doctor of Philosophy, Occupational Safety and Health (Ph.D.)

PROGRAM EDUCATIONAL OBJECTIVES

Drawing from the university’s mission, the program mission, and the needs of our constituents, the following educational objectives were developed for the Doctor of Philosophy degree in Occupational Safety and Health:

1. Anticipate and recognize hazards and environmental cases requiring the application of safety and health methods in occupational settings.
2. Identify social and epidemiological trends in occupational safety and health issues at the national and international levels.
3. Identify methods of management in application of effective control techniques.
4. To demonstrate understanding of federal, state, and local regulatory agencies as they impact the practice of occupational safety and health.
5. Conduct, disseminate, and publish original research in occupational safety and health.
6. Be qualified to enter the profession as a professor, practitioner, or researcher in occupational safety and health.

STUDENT OUTCOMES

In order to meet the Program Educational Objectives, students of the Occupational Safety and Health Doctoral program must be able to meet the following educational outcomes at the time of their graduation. Students will have acquired the ability:

1. To construct, manage, and evaluate a comprehensive safety and health program for large industry or government agencies.
2. To participate in the safety and health regulatory process as an individual or part of a corporation or university.
3. To critically evaluate research conducted by other individuals or corporations in occupational safety and health.
4. To provide excellent teaching at the University or corporate levels.
5. To participate in activities such as conferences or seminars for continued professional improvement.
6. To actively participate as a leader in the professional organizations that serve the occupational safety and health fields.
7. To demonstrate the highest possible ethical standards in the field of occupational safety and health.

For admission into the Ph.D. program, applicants must meet department admission standards and should have, at a minimum, a 3.4 GPA (or equivalent) in their graduate work. They must also meet all the entrance requirements stated above for the Master's programs. Typically, a Master's degree is required for admission into the Ph.D. program.

Curriculum in Doctor of Philosophy – Occupational Safety and Health

A candidate for the Ph.D. degree with a major in occupational safety and health must comply with the rules and regulations as outlined in the WVU Graduate Catalog and the specific requirements of the Statler College and the Industrial and Management Systems Engineering Department.

Program Requirements

The doctor of philosophy degree with a major in occupational safety and health is administered through the college’s interdisciplinary Ph.D. program. The research work for the doctoral dissertation must show a high degree of originality on the part of the student and must constitute an original contribution to the art and science of occupational safety and health.

All Ph.D. degree candidates are required to perform research and follow a planned program of study. The student’s research advisor, in conjunction with the student’s Advising and Examining Committee (AEC) will be responsible for determining the plan of study appropriate to the student’s needs. The underlying principle of the planned program is to provide the students with the necessary support to complete their degree and prepare them for their career.

Required core courses for the Ph.D. program are determined by the student’s area of emphasis. The research work for the doctoral dissertation may entail a fundamental investigation or a broad and comprehensive investigation into an area of specialization.
Curriculum Requirements

A minimum cumulative GPA of 3.0 is required in all courses.

7. To demonstrate the highest possible ethical standards in the field of occupational safety and health.

Safety Management

Degree Offered:

- Masters of Science, Safety Management (M.S.)

MASTERS OF SCIENCE, SAFETY MANAGEMENT

The mission of the safety management program is to prepare program graduates to meet the safety mission of any enterprise. This is stated simply as: The safety mission of an organization is to protect, conserve, and improve the resources—people, property, and efficacy—of the organization. The Master's of Science with a major in Safety Management is accredited by the Applied Science Accreditation Commission of ABET, http://www.abet.org.

PROGRAM EDUCATIONAL OBJECTIVES

Drawing from the university's mission, the program mission, the needs of our constituents, and the Applied Science Accreditation Commission Criteria of ABET, the following educational objectives were developed for the Masters of Science program in Safety Management:

A graduate of the Safety Management program will be able to:

1. Communicate effectively, orally and in writing, including the transmission of safety data to management and employees.
2. Demonstrate knowledge and skills in the area of safety management.
3. Demonstrate knowledge of ethical and professional responsibilities and knowledge of applicable legislation and regulations.
4. Demonstrate the ability to apply various research activities through the decision-making process used in safety management.

STUDENT OUTCOMES

In order to meet Program Educational Objectives of the Safety Management program, students must be able to meet the following outcomes at the time of their graduation:

1. Demonstrate knowledge and skills to build a comprehensive Safety and Health program based on loss control and regulations
2. Demonstrate knowledge and skills to use analytical techniques in the Safety and Health function
3. Demonstrate knowledge and skills with federal, state, and non-governmental Safety and Health program standards and best practices
4. Demonstrate skills in written and oral communications at the level of professionals in safety and health positions
5. Demonstrate knowledge and skills in writing and evaluating safety and health research proposals
6. Demonstrate knowledge and skills in using management tools to implement and evaluate Safety and Health programs

For admission into the M.S. Safety Management Program, applicants must meet department admission standards and ABET/ASAC prerequisite course requirements, which are currently a minimum of sixty-three credit hours of approved science, mathematics, and other technical courses. Of these, at least fifteen credit hours must be junior or senior level. In addition, students must have a minimum of twenty-one hours of social sciences, humanities, and/or communications. On an individual basis, the faculty may identify additional prerequisite coursework. Applicants will be advised about their specific requirements at the time of admission. Applicants not meeting all of the listed requirements may be considered for admission as provisional students.
Curriculum in Masters of Science – Safety Management

A candidate for the M.S. degree with a major in safety management must comply with the rules and regulations as outlined in the WVU Graduate Catalog and the specific requirements of the Statler College and the Industrial and Management Systems Engineering Department.

Program Requirements

All M.S. degree candidates are required to perform research (thesis or problem report option) and follow a planned program of study. The student’s faculty advisor, in conjunction with the student’s Advising and Examining Committee (AEC) will be responsible for determining the plan of study appropriate to the student’s needs. The underlying principle of the planned program is to provide the students with the necessary support to complete their degree and prepare them for their career.

Students who do not hold a baccalaureate degree in safety management may be required to take a set of undergraduate courses above and beyond the minimum coursework requirements.

Curriculum Requirements

A minimum cumulative GPA of 3.0 is required in all courses

Course Requirements

A minimum of 60% of courses must be from 500 level or above

Total credit hours: 36

**Major Learning Goals**

**SAFETY MANAGEMENT**

1. Demonstrate knowledge and skills to build a comprehensive Safety and Health program based on loss control and regulations
2. Demonstrate knowledge and skills to use analytical techniques in the Safety and Health function
3. Demonstrate knowledge and skills with federal, state, and non-governmental Safety and Health program standards and best practices
4. Demonstrate skills in written and oral communications at the level of professionals in safety and health positions
5. Demonstrate knowledge and skills in writing and evaluating safety and health research proposals
6. Demonstrate knowledge and skills in using management tools to implement and evaluate Safety and Health programs

Department of Mechanical and Aerospace Engineering

Degrees Offered

• Masters of Science, Aerospace Engineering (M.S.A.E.)
• Masters of Science, Mechanical Engineering (M.S.M.E.)
• Doctor of Philosophy, Aerospace Engineering (Ph.D.)
• Doctor of Philosophy, Mechanical Engineering (Ph.D.)

Faculty

Faculty members in the department have extensive research, industrial, and teaching experience and have published widely. Their combined experience helps them assist students in selecting relevant courses and research topics to meet their educational goals. The Department has excellent laboratory facilities in the Engineering Sciences Building, the Engineering Research Building, and the new Engineering Sciences Building Annex to provide support for both instructional and research activities. The Department has several special purpose laboratories located nearby, which include the Engine Research Center, the wind tunnel laboratory, and the aircraft test hangar at the Morgantown Municipal Airport (Hart Field). Funded research allows the Department to maintain up-to-date facilities that include modern instrumentation and computing and lab equipment, including simulation and computer-controlled data acquisition systems.

Educational Objectives of Graduate Programs

The objectives of the departmental graduate-level programs are as follows:

1. To provide high quality advanced master-level and Ph.D. level education to graduate engineering students to enable successful careers in technology development, innovation and research, with depth and breadth in one or several areas of the engineering discipline.
2. To develop the capacity of graduates to conduct independent research and/or technology development and innovation, through original contributions to the engineering discipline and to disseminate the results of their scholarly work.
3. To instill in graduates the drive for leadership in technology development, innovation and research and to contribute to the advancement of the profession in a societal and economic context.

Courses

Only courses with grades of C- or higher are acceptable for graduate credit, although all coursework taken will be counted in establishing the student’s grade point average. No more than nine hours of 400-level credit can be counted toward meeting the coursework requirements for the M.S. degree. Only 400-level courses that are approved for math credit (see the following section) and only 400-level courses approved as technical electives for the B.S. degree in an engineering discipline are acceptable for course credit towards the M.S. degree. The technical elective(s) must not have been used to satisfy the B.S. degree. The absolute minimum requirement set by the department for coursework credit towards a Ph.D. degree is eighteen hours beyond the master’s degree at the 500-level or higher taken at WVU. However, the actual minimum number of coursework credits is set by the student’s advisory and examining committee and is based on the student’s background and the area of his/her Ph.D. dissertation. No more than twenty percent of the coursework beyond the minimum of eighteen credit hours required by the college for a doctoral degree can be at the 400-level. A minimum of twenty-four semester hours of research credit at the Ph.D.-level is required to meet dissertation requirements. Two consecutive semesters of full-time attendance at the WVU campus in Morgantown are necessary to meet the residency requirements of the Ph.D. program.

Math Requirements

The Department requires that the graduate coursework include six hours of advanced mathematics for the M.S. programs of study and a minimum of six additional hours of mathematics for the Ph.D. programs. A list of mathematics courses approved for graduate credit for M.S. students and a list for Ph.D. students can be obtained from the graduate program director of the Department.

Time Limitations

All the requirements for thesis based master’s degrees (M.S.A.E., M.S.M.E. and M.S.M.S.&E.) in the MAE Department must be completed within eight years preceding the student’s graduation. All students in these programs are required to engage in research, and complete and defend successfully
a master's thesis. They must identify a subject for their thesis research, form a three-member advisory and examining committee (AEC), and file a plan of study by the end of their second semester of enrollment in the graduate program. A minimum of twenty-four credit hours of coursework with a minimum overall GPA of 3.0/4.0 and six credit hours of M.S. thesis research are required for the thesis based master's degrees. Students must pass a final examination administered by their advisory and examining committee before being certified for the degree.

A course-only master's degree option is available in which students are required to complete thirty-three credit hours of coursework with a minimum overall GPA of 3.0/4.0 and pass a comprehensive examination administered by an advisory and examining committee. Students pursuing a course-only master's degree option are not eligible to receive financial support from WVU. All the requirements for this degree option must also be completed within eight years preceding the student's graduation.

All requirements for the Ph.D. program must be completed within eight years preceding the student’s graduation. All students pursuing the Ph.D. program must take and pass the Ph.D. Qualifier Examination within the first two semesters in the program. A second and final attempt to pass the Ph.D. qualifier can be offered no later than the third semester. Students should identify a subject for their Ph.D. dissertation research, form a five-member advisory and examining committee, and file a plan of study by the end of their third semester of enrollment in the program. A minimum of eighteen credit hours of coursework with a minimum GPA of 3.3/4.0 and twenty-four credit hours of dissertation research is required for the Ph.D. degree. All Ph.D. students beginning their Ph.D. program on May 2016 or after, must document that they have submitted a journal paper manuscript to an archival journal or submitted a patent disclosure, prior to scheduling their dissertation defense. After the Ph.D. qualifying examination requirement and publication requirement are satisfied, students are required to produce and successfully defend a Research Proposal before the advisory and examining committee to attain Ph.D. candidacy. After at least one full semester of the Ph.D. proposal defense, candidates must produce and successfully defend a Ph.D. dissertation.

**Academic Areas**

Graduate courses in the MAE department are organized under six academic areas: fluids and aerodynamics, solid mechanics and structures, design and controls, thermal sciences, bioengineering, and materials science and engineering. Students who are pursuing an advanced degree in either mechanical or aerospace engineering and in materials science and engineering may perform their thesis or dissertation research and specialize in any one of these areas.

**FLUIDS MECHANICS AND AERODYNAMICS**

A variety of courses and facilities support graduate research in aerodynamics and fluid mechanics. Laboratories are located in college buildings and remote sites. Flow facilities include instrumented subsonic and supersonic wind tunnels, and several flow loops mainly used for research in gas-solid and density stratified flows. Available instrumentation includes eight channels of hot wire/film anemometry, two single-component and one three-component, laser Doppler velocimeter (LDV) systems, and a particle image velocimeter (PIV) system. The department owns two flight simulation facilities, one that simulates translational and rotational motion in six degrees of freedom, and the other that relies on D-six software to provide “joystick only” flight simulation. Furthermore, the department built and operates different types of Unmanned Airborne Vehicles (UAV’s), as well as experimental aircraft and airborne systems that are housed in a hangar owned by the department at the Hart Field municipal airport in Morgantown. A significant portion of the current activity involves numerical solutions to flow problems and is supported by a computing facility dedicated to graduate research.

Although the faculty background and interests in the areas of aerodynamics and fluid mechanics are broad, recent research has been concentrated on applications of computational fluid dynamics (CFD) to investigate a wide variety of problems in fuel cell technology, fixed wing and rotorcraft aerodynamics, bioengineering, and combustion. The department’s faculty have accumulated extensive research experience in multiphase and density-stratified flows, low-speed aerodynamics, shock phenomena in two-phase systems, flow in microgravity, boundary layer control, and high-speed aerodynamics. Previous and current research areas include topics such as fluidized bed combustion, aerosol sampling, flow metering, flow distribution systems, numerical solutions to gas-solid flows, and fluid-particle turbulence interactions, including deposition on solid surfaces. The low-speed aerodynamics work is related to the design of vertical axis wind turbines and STOL airfoils.

**SOLID MECHANICS AND DESIGN**

The solid mechanics and design area encompasses the theoretical, numerical, and experimental study of solid bodies, from concentration on local behavior of deformable bodies to the global response of structural elements. Hence, students may explore the mechanical behavior of materials in the neighborhood of micro-scale defects such as cracks, or investigate the behavior of large-scale bodies such as aerospace structures.

The faculty members specialized in this area carry out basic and applied research using state-of-the-art computational and experimental techniques. The areas of research include advanced metal alloys and composite materials, lightweight structures, safety and durability enhancements, real time monitoring and diagnosis of structural systems, aero elasticity, fracture mechanics, nonlinear dynamics and vibrations, biomechanics; and computational methods and experimental techniques, including optical and ultrasound methods. Furthermore, in cooperation with the Department of Civil and Environmental Engineering, MAE graduate students may pursue studies related to civil engineering. A large array of research facilities includes laboratories (materials, structures, vibrations, photo mechanics, biomechanics, fracture mechanics), computers (work stations, personal computers, computer-aided engineering), and mechanical and electronic shops.

**DYNAMICS AND CONTROLS**

The dynamics and controls area offers instructional and research opportunities for students who seek to attain the expertise required to control the behavior of an engineering system in a dynamic environment. Instructional offerings equip the students with a foundation for developing prototype
systems and for improving the performance of existing systems. Selected examples of research areas include flight simulation and controls, automatic controls, advanced instrumentation, microprocessor applications and non-destructive testing; elastodynamic analysis, computer-aided design (CAD); and modeling, design, and analysis of energy management systems.

THERMAL SCIENCES AND SYSTEMS
The thermal sciences and systems area encompasses the fields of thermodynamics, combustion, heat transfer, and power and energy systems. Graduate course offerings cover a wide range of topics in this area with applications to both aerospace and mechanical engineering problems. Recent research efforts include topics such as alternative fuels testing, internal combustion engine performance and emissions, fuel cell technology, heat transfer, numerical analysis of thermal systems, the analysis of fluidized bed combustion, energy analysis of buildings, oscillating jet combustion, deposition on turbine blades, and reactor design.

Research facilities include a state-of-the-art engine research laboratory, three transportable emissions research laboratories, thermal analyzers, recording thermocouple data-acquisition systems, high-altitude simulation chamber for ablation and wear studies, a fluidized bed combustion laboratory, an electrically-heated, natural convection water facility, Schlieren systems for flows with varying density, and a water reservoir for thermal stratification studies.

BIOENGINEERING
Areas of research specialization related to bioengineering include ultrasound technology for imaging of body tissues and organs, respiratory and diseased tissue mechanics, orthopedic mechanics, bone growth and fracture, and the application to rehabilitation of computer-aided design and microprocessor-based instrumentation. Research facilities include a state-of-the-art ultrasound imaging laboratory, an aerosol inhalation exposure system, laser-based holographic and moire interferometric equipment, a lung acoustic impedance measurement system; and modern orthopedic, rehabilitation, and computer research laboratories.

MATERIAL SCIENCE AND ENGINEERING
The material science and engineering area allows for the study of processing, structure, and properties of materials for structural, functional, and device applications. Areas of research emphasized within this area include advanced microscopy, composite materials, materials for fuel cells, smart materials, super alloys, facilities incorporating electron microscopy, scanning probe microscopy, electro-chemical characterization, thermal analysis, and mechanical testing facilities.

FACULTY

CHAIR
- Jacky Prucz - Ph.D. (Georgia Institute of Technology)
  Structural Design, Composite Materials, Solid Mechanics

PROFESSORS
- Richard A. Bajura - Ph.D. (University of Notre Dame)
  Director NRCCE, Energy Sciences
- Ever J. Barbero - Ph.D. (Virginia Polytechnic Institute and State University)
  Materials, Experimental and Computational Mechanics
- Ismail Celik - Ph.D. (University of Iowa)
  Fluids Engineering, Fuel Cell Technology
- Nigel N. Clark - Ph.D. (University of Natal, South Africa)
  Provost WVU-IT, Multiphase Flows, I.C. Engines and Emissions
- Russel K. Dean - Ph.D. (West Virginia University)
  Vice Provost, Engineering Mechanics, Eng. Education
- Bruce S. Kang - Ph.D. (University of Washington)
  Experimental Mechanics, Advanced Materials
- John M. Kuhlman - Ph.D. (Case Western Reserve University)
  Fluid Mechanics
- Xingbo Liu - Ph.D. (University of Science and Technology of China, Beijing)
  Materials Science
- Kenneth H. Means - Ph.D., P.E. (West Virginia University)
  Kinematics, Dynamics and Stability, Friction and Wear
- Gary J. Morris - Ph.D. (West Virginia University)
  Fluid Mechanics, Combustion, Aerodynamics
- Victor H. Muino - Dr.Eng., P.E. (University of Wisconsin-Milwaukee)
  Mechanical Engineering Design, CAD, Finite Element Analysis
• Marcello R. Napolitano - Ph.D. (Oklahoma State University)
  Aircraft Stability and Control, Feedback Control, Unmanned Airborne Vehicles (UAVs)
• Samir N. Shoukry - Ph.D. (Aston University, Birmingham, U.K.)
  Pavement Modeling, Non-destructive Evaluation, Structural Dynamics, Neural nets, Instrumentation
• Nithi T. Sivaneri - Ph.D. (Stanford University)
  Structural Mechanics, Composite Materials, FEM, Numerical Methods
• James E. Smith - Ph.D. (West Virginia University)
  Mechanical and Aeronautical Design
• Nianqiang Wu - Ph.D. (Zhejiang University, China)
  Materials Science and Engineering

ASSOCIATE PROFESSORS
• Wade W. Huebsch - Ph.D. (Iowa State University)
  Fluid Mechanics, CFD, Numerical Methods
• Hailin Li - Ph.D. (University of Calgary, Canada)
  Combustion, Emissions, Fuel Efficiency of Vehicles and IC Engines
• Osama Mukdadi - Ph.D. (University of Colorado)
  Bioengineering, Acoustics, Solid Mechanics and Materials
• Mario G. Perhinschi - Ph.D. (Politehnica University of Bucharest, Romania)
  Aircraft Stability and Control, Flight Simulation
• Edward M. Sabolsky - Ph.D. (Pennsylvania State University)
  Materials, Ceramic Science
• Xueyan Song - Ph.D. (Zhejiang University, China)
  Materials Science, Electron Microscopy
• Gregory J. Thompson - Ph.D. (West Virginia University)
  Thermodynamics, Machine Design
• W. Scott Wayne - Ph.D. (West Virginia University)
  Machine Design, Alternative Fuels

ASSISTANT PROFESSORS
• Vyacheslav Akkerman - Ph.D. (Umea University, Sweden)
  Turbulent Combustion, Flame Turbulization, Propulsion Instabilities in Rocket Engines
• Patrick H. Browning - Ph.D. (West Virginia University)
  Aerodynamics, Aircraft Design
• Marvin H. Cheng - Ph.D. (Purdue University)
  Instrumentation, Mechatronics, Dynamic Systems and Control
• John A. Christian - Ph.D. (University of Texas, Austin)
  Spacecraft Design, Navigation, Estimation Theory
• Cosmin E. Dumitrescu - Ph.D. (University of Alabama)
  Combustion, Alternate Fuels, IC Engines
• Jason N. Gross - Ph.D. (West Virginia University)
  Unmanned Aerial Vehicles, Avionic Systems, Flight Testing
• Yu Gu - Ph.D. (West Virginia University)
  Robotic Systems, Sensor Fusion
• Alfred E. Lynam - Ph.D. (Purdue University)
  Space Mission Design, Orbital Perturbations
• David S. Mebane - Ph.D. (Georgia Institute of Technology)
  Fuel Cells, Multi-Scale Simulation of Chemical and Electrochemical Systems
• Terrance D. Musho - Ph.D. (Vanderbilt University)
  Nanoscale Thermal and Electrical Transport, Direct Energy Conversion
• Andrew C. Nix - Ph.D. (Virginia Polytechnic Institute and State University)
  Turbines, Engines and Emissions
• Konstantinos Sierros - Ph.D. (University of Birmingham, U.K.)
  Flexible Optoelectronic Devices, Tribology, Materials for Renewable Energy
• Arvind Thiruvengadam - Ph.D. (West Virginia University)
  Emissions of Heavy-Duty Internal Combustion Engines
TEACHING ASSISTANT PROFESSORS

• Pete Gall - Ph.D. (West Virginia University)
  Aerospace Systems Design

RESEARCH ASSOCIATE PROFESSORS

• David C. Lewellen - Ph.D. (Cornell University)
  Fluid Dynamics, Turbulence

RESEARCH ASSISTANT PROFESSORS

• Yun Chen - Ph.D. (Universidade Tecnica de Lisboa)
  Material Science, Metal Hydrides, Cathode Material Development
• Thomas Evans - Ph.D. (West Virginia University)
  Solid Mechanics, Structures
• Derek Johnson - Ph.D. (West Virginia University)
  Alternative Fuels Engines and Emissions
• Eduardo Sosa - Ph.D. (University of Puerto Rico)
  Thin Wall Structures

VISITING AND ADJUNCT PROFESSORS

• Alberto Ayala - Ph.D. (University of California, Davis)
  Energy, Engine Emissions
• Dureid Azzouz - Ph.D. (University of Southampton, U.K.)
  Fluid Mechanics
• Albert Boretti - Ph.D. (University of Florence, Italy)
  Innovative Combustion Engines
• Mark Bright - Ph.D. (West Virginia University)
  Materials Engineering, Pyrotech Inc.
• Darran Cairns - Ph.D. (University of Birmingham, U.K.)
  Materials Science
• Weigiang Ding - Ph.D. (Northwestern University)
  Nanostructures
• Renguang Dong - Ph.D. (Concordia University)
  Biomechanics, Human Vibrations, NIOSH
• Mridul Gautam - Ph.D. (West Virginia University)
  Alternate Fuels, Engine and Emissions, VP for Research UNR
• Luis A. Godoy - Ph.D. (University of London, U.K.)
  Structural Stability
• Frank E. Goodwin - Sc.D. (Massachusetts Institute of Technology)
  Materials Engineering, ILZRO
• Valeriya Gritsenko - Ph.D. (University of Alberta, Canada)
  Neuroscience
• Huang Guo - Ph.D. (West Virginia University)
  Electro-Chemistry, Materials Science, Mechanical Engineering
• Srinkath Gururajan - Ph.D. (West Virginia University)
  Small Unmanned Aerial Vehicle Systems
• Nabil S. Hakim - Ph.D. (Wayne State University)
  Alternative Fuels Engines and Emissions
• Yiqun Huang - Ph.D. (University of Texas, Austin)
  Engine Emissions Control
• Paul E. King - Ph.D. (Oregon State University)
  Materials Engineering, NETL
• George Kirilakidis - Ph.D. (Salford University, U.K.)
  Physics, Mechanics
• Stephen Kukureka - Ph.D. (University of Birmingham, U.K.)
  Materials Science
• Andrew D. Lowery - Ph.D. (West Virginia University)
Control Systems
• Alejandro Lozano-Guzman - Ph.D. (University of New Castle Upon Tyne, U.K.)
  Dynamic Systems (CICATA-IPN Mexico)
• Ayyakkanu Manivannan - Ph.D. (The University of Tokyo, Japan)
  Materials Chemistry Characterization
• Eugene A. McKenzie - Ph.D. (West Virginia University)
  Mechanical Engineering Design, NIOSH
• Chris Menchini - Ph.D. (West Virginia University)
  Computational Fluid Dynamics, Fire Modeling
• Vincenzo Mulone - Ph.D. (University of Rome, Tor Vergata)
  Engine Emissions, Fluid Mechanics
• John Nuzkowski - Ph.D. (West Virginia University)
  Alternative Fuels and Engine Emissions, UNF
• Ming Pei - M.D., Ph.D. (Beijing Medical University, China)
  Tissue Engineering, HSC-WVU
• Alber Alfonse Sadek - Ph.D. (Osaka University, Japan)
  Alloys
• Brad Senor - Ph.D. (West Virginia University)
  Control Systems
• Benjamin Shade - Ph.D. (West Virginia University)
  Engine Emissions, IAV Automotive
• Alberto Traverso - Ph.D. (University of Genoa, Italy)
  Energy Systems and Control, DIMSET - Italy
• Nathan Weiland - Ph.D. (Georgia Institute of Technology)
  Energy Systems, Experimental, Computational, Theoretical Methods
• Jay Wilhelm - Ph.D. (West Virginia University)
  unmanned Aerial Vehicles, Wind Turbine Modeling
• Gergis William - Ph.D. (West Virginia University)
  Structural Engineering
• Steven Woodruff - Ph.D. (University of Michigan)
  Combustion Optical Phenomena
• Sergiy Yakovenko - Ph.D. (University of Alberta, Canada)
  Neuroscience
• Kirk Yerkes - Ph.D. (University of Dayton)
  Energy Optimized Aircraft

PROFESSORS EMERITI
• Larry Banta - Ph.D. (Georgia Institute of Technology)
• Eric Johnson - Ph.D. (University of Wisconsin-Madison)
• John Loth - Ph.D. (University of Toronto, Canada)
• Michael G. Palmer - Ph.D. (West Virginia University)
• John E. Sneckenberger - Ph.D. (West Virginia University)
• Wallace S. Venable - Ed.D. (West Virginia University)
• Richard E. Walters - Ph.D. (West Virginia University)

Admission
The applicant must first submit a completed an on-line application, application fee, and transcripts of all college work (directly from the institution) to the
WVU Office of Admissions. Each applicant is required to complete an applicant information form and have three recent reference letters (using standard
forms available from the department) sent directly to the department; at least two of the three references should be from the institution last attended.

Regular Admission Requirements
Minimum requirements for admission as a regular student into the graduate programs of the department are summarized as follows:

• An applicant for admission into the M.S. or the Ph.D. degree program must have earned a grade point average (GPA) of 3.0 or better (out of a
  possible 4.0) in all previous college work if he/she holds a B.S. or M.S. degree, respectively, from an accredited or internationally recognized
  program, as stated above.
• Applicants for admission into the B.S.M.S. degree track must have a grade point average of 3.5 or higher at the end of the first semester in the junior year of the curriculum. Applicants for admission into the direct-track from B.S. to Ph.D. degree option must have a grade point average of 3.5 or higher if they commence their graduate studies in the department as Ph.D. students or must have a cumulative grade point average of 4.0 if they transfer from the M.S. degree program by the end of their first year of graduate studies in the department.

• International students must demonstrate proficiency in communicating in English (a minimum TOFEL Score of 550, or IBT Score of 79, or IELTS Score of 6.5). (This requirement will be waived for applicants who have completed a recent four-year bachelor’s degree in the USA.)

• All international applicants who have not received their undergraduate degree in the USA are required to submit GRE general test scores with the engineering subject test score being optional. The GRE scores required for admission as a regular graduate student in the department need to be seventy-fourth percentile or higher in the Quantitative section (strictly enforced). The GRE scores for the verbal and analytical sections will be taken into consideration in the admission process.

Provisional Admission
An applicant not qualifying for the admission status of regular graduate student, either due to marginally insufficient grade point average or GRE performance, incomplete credentials, or inadequate academic background, may be admitted as a provisional student at the discretion of the Admissions Committee of the department. Requirements for attaining regular student status must be stated in a letter of admission. Provisional students must sign a contract, which lists in detail all requirements that have to be met for attaining regular student status, typically no later than the end of the first semester at WVU.

All of the graduate degree programs offered by the department require the student to attain an overall grade point average of 3.0 or higher both in all the courses required for the degree program and in all the courses taken at WVU in order to meet graduation requirements. The cumulative grade point average (GPA) is calculated on the basis of courses only, and excludes credit for research, for which the received grade can be either S (satisfactory), or U (unsatisfactory). Note: A grade of U in research is equivalent to a grade of F in a regular course and it can decrease drastically the GPA of a graduate student.

Doctoral Admission

ADMISSION TO DOCTOR OF PHILOSOPHY PROGRAM
To be eligible for admission into the doctor of philosophy degree program with a major in aerospace or mechanical engineering, a candidate must hold or expect to receive (by the enrollment date) a M.S. degree in an engineering discipline from an institution which has an ABET accredited undergraduate program in engineering or an internationally recognized program in engineering (except for students qualified for the direct track to Ph.D. degree option, described below). Qualified candidates holding a M.S. degree in applied sciences can also be considered for admission into the Ph.D. program.

ADMISSION TO THE DIRECT-TRACK TO PH.D. DEGREE OPTION
The Department of Mechanical and Aerospace Engineering (MAE) offers a direct track option from the bachelor of science (B.S.) to the doctor of philosophy (Ph.D.) degree for prospective qualified students holding a B.S. degree in an engineering discipline, materials science, mathematics, or applied sciences from an accredited undergraduate program or an internationally recognized program. This is an accelerated track that provides outstanding candidates the option of earning a Ph.D. degree in less than five years after graduating from an undergraduate program by engaging early in their Ph.D. dissertation research without having to complete a research thesis for a master of science (M.S.) degree. To qualify for the direct track degree option, a candidate must have earned a cumulative grade point average (GPA) of 3.5/4.0 or higher in his/her undergraduate studies and attain a minimum of seventy-fourth percentile in the quantitative section of the standardized Graduate Record Examination (GRE). Students who are pursuing an M.S. degree in the MAE department have also the possibility of transferring into the direct track option in their third semester in the program, provided that they earn a GPA of at least 3.75/4.0 and attain a minimum of seventy-fourth percentile in the quantitative section of the GRE by the end of their first two semesters of graduate studies at WVU. Students admitted into the direct track option are considered to be Ph.D. students in the MAE department.

Aerospace Engineering

Degrees Offered
• Masters of Science, Aerospace Engineering (M.S.A.E.)
• Doctor of Philosophy, Aerospace Engineering (Ph.D.)

Educational objectives of the departmental graduate-level programs:
1. To provide high quality advanced master-level and Ph.D. level education to graduate engineering students to enable successful careers in technology development, innovation and research, with depth and breadth in one or several areas of the aerospace engineering discipline.
2. To develop the capacity of graduates to conduct independent research and/or technology development and innovation, through original contributions to the aerospace engineering discipline and to disseminate the results of their scholarly work.
3. To instill in graduates the drive for leadership in technology development, innovation and research and to contribute to the advancement of the profession in a societal and economic context.
The outcomes of the graduate programs in Aerospace Engineering are as follows:

- Holders of graduate degrees will have an expert-level understanding of the advanced principles of aerospace engineering, which include aerospace systems design, aircraft or spacecraft dynamics, stability and control, flight mechanics and simulation, advanced materials, vehicle propulsion, aerodynamics, aeroelasticity, and computational mechanics.
- Holders of graduate degrees will hold paramount the highest standards of ethical and professional responsibility in the practice of their profession to contribute to the well-being of society and to the advancement of the aerospace engineering profession.
- Holders of Ph.D. degrees will have furthered original research contributions to the state of the art in their specific areas of expertise and will be able to develop innovative research in order to advance the frontiers of knowledge, secure sponsored research, and disseminate its findings through scholarly publications.

Curriculum in Master of Science in Aerospace Engineering

A candidate for the M.S. degree in aerospace engineering must comply with the rules and regulations as outlined in the WVU Graduate Catalog and the specific requirements of the Statler College and the Mechanical and Aerospace Engineering Department.

Program Requirements

All M.S. degree candidates are required to perform research (except those pursuing the coursework-only degree option) and follow a planned program of study. The student’s research advisor, in conjunction with the student’s Advising and Examining Committee (AEC) will be responsible for determining the plan of study appropriate to the student’s needs. The underlying principle of the planned program is to provide the students with the necessary support to complete their degree and prepare them for their career.

Curriculum Requirements

A minimum cumulative GPA of 3.0 is required in all courses.
A minimum of 60% of courses must be from 500 level or above.

**TECHNICAL AREA COURSES FOR THESIS OR PROBLEM REPORT OPTIONS (6 CREDIT HOURS)**

Select two courses in a single core technical area from the following:

**Area A: Fluid Mechanics and Aerodynamics (FMA)**
- MAE 532  Dynamics of Viscous Fluids
- MAE 624  Convection Heat Transfer
- or MAE 636  Fundamentals of Turbulent Flow

**Area B: Thermal Sciences and Systems (TSS)**
- MAE 521  Advanced Thermodynamics 1
- MAE 532  Dynamics of Viscous Fluids
- MAE 624  Convection Heat Transfer

**Area C: Dynamics and Controls (D&C)**
- MAE 642  Intermediate Dynamics
- or MAE 653  Advanced Vibrations

* Students who do not hold a baccalaureate degree in aerospace engineering will be required to take a set of undergraduate aerospace engineering courses above and beyond the minimum coursework requirements in order to overcome deficiencies in the aerospace engineering area.

Final Examination

M.S. students following the thesis or problem report option must prepare a written research proposal. The proposal must be approved by the student’s AEC at least one semester prior to the final oral examination.

All students, regardless of option, are required to pass a final oral or written examination, administered by their AEC, covering the thesis or problem report and/or related course material.

The students request for the comprehensive exam for students in the Coursework Only degree option must be filed at least four weeks in advance of the desired date of the exam. The comprehensive exam for students in the Coursework Only degree option must be passed at least 3 weeks before graduation.

Suggested Plan of Study

The plan below illustrates the Thesis Option. It is important for students to take courses in the order specified as much as possible; all prerequisites and concurrent requirements must be observed. A typical M.S.A.E degree program that completes degree requirements in two years is as follows.

Curriculum in Doctor of Philosophy – Aerospace Engineering

A candidate for the Ph.D. degree with a major in aerospace engineering must comply with the rules and regulations as outlined in the WVU Graduate Catalog and the specific requirements of the Statler College and the Mechanical and Aerospace Engineering Department.

Program Requirements

The doctor of philosophy degree with a major in aerospace engineering is administered through the college’s interdisciplinary Ph.D. program. The research work for the doctoral dissertation must show a high degree of originality on the part of the student and must constitute an original contribution to the art and science of aerospace engineering.
All Ph.D. degree candidates are required to perform research and follow a planned program of study. The student’s research advisor, in conjunction with the student’s Advising and Examining Committee (AEC) will be responsible for determining the plan of study appropriate to the student’s needs. The underlying principle of the planned program is to provide the students with the necessary support to complete their degree and prepare them for their career.

The doctoral courses of study are selected to fit the particular interests and objectives of the student, with proper attention given to broadening related areas of study. The research work for the doctoral dissertation may entail a fundamental investigation into a specialized area or a broad and comprehensive study in a related subject.

All students pursuing a Ph.D. degree in the MAE department are expected to engage in research and complete and successfully defend a Ph.D. dissertation. They should identify a subject for their Ph.D. dissertation, form a five-member advisory and examining committee, and file a plan of study by the end of their second semester of enrollment in the graduate program. At least one member of the graduate faculty from outside the department is required to serve on the advisory and examining committee.

**Curriculum Requirements**

A minimum cumulative GPA of 3.0 is required in all courses.

JOURNAL PAPER PUBLICATION REQUIREMENT FOR ALL PHD STUDENTS:
Beginning with all PhD students admitted for the summer or fall of 2016 and thereafter, every Ph.D. student, prior to his/her dissertation defense, will be required to provide written documentation that they have received formal proof of submission of either:

a.) At least one manuscript, generally co-authored with their research supervisor and about some portion of their PhD dissertation research, to an archival journal for publication, or

b.) At least one patent disclosure, also generally about some portion of their PhD dissertation research.

This publication requirement will have to be satisfied prior to scheduling the defense of the Ph.D. Dissertation.

Major Learning Goals

AEROSPACE ENGINEERING
The MAE Department is committed to deliver high quality education and research experience to all graduate students in order to enable them to achieve success in their careers, though the following Learning Goals:

- Expertise, depth and breadth in a chosen field of aerospace engineering.
- Capacity to engage in original research, advanced technological discovery and innovation in order to advance the frontiers of knowledge in the science of the aerospace engineering discipline.
- Capacity of effective high level communication in order to document, disseminate and transfer knowledge of the science of the aerospace engineering discipline in educational, research or applied workplace settings.
- Appreciation and understanding of the role of the science of the aerospace engineering discipline in a global and societal context.

Thesis Based Master's Degrees

All the requirements for thesis based master's degrees (M.S.A.E., M.S.M.E. and M.S.M.S.&E.) in the MAE Department must be completed within eight years preceding the student's graduation. All students in these programs are required to engage in research, complete and successfully defend a master's thesis. They must identify a subject for their thesis research, form a three-member advisory and examining committee (AEC), and file a plan of study by the end of their second semester of enrollment in the graduate program. A minimum of twenty-four credit hours of coursework with a minimum overall GPA of 3.0/4.0 and six credit hours of M.S. thesis research are required for the thesis based master's degrees. Students have to comply with core requirements by selecting a "core area" and taking two of the courses listed in that area, and in addition they have to comply with the mathematics requirements by taking two courses from an approved list. Four additional courses can be selected from a list of technical electives, or from the core and mathematics lists to complete the coursework requirements, with no more than three courses at the 400 level.

Course Based Master's Degree

A course-only master's degree option is available (M.S.E.), in which students are required to complete thirty-three credit hours of coursework with a minimum overall GPA of 3.0/4.0 and pass a comprehensive examination administered by an advisory and examining committee. Students pursuing a course-only master's degree option are not eligible to receive financial support from the MAE Department. All the requirements for this degree option must also be completed within eight years preceding the student's graduation.

Ph.D. Degrees

The MAE Department offers Ph.D. Programs in Aerospace Engineering, in Mechanical Engineering and in Materials Science and Engineering. These programs require a minimum of eighteen credit hours of graduate level coursework plus a minimum of twenty-four credit hours of research. Students in the Ph.D. program must take and pass the Ph.D. Qualifier examination by the second semester of the program with a second attempt no later than the third semester in the program if necessary. After the qualifier examination, students are expected to produce a dissertation proposal and defend it before a five-member advising and examining committee (AEC). Subsequent the successful proposal defense, students must comply with the journal paper publication (or patent disclosure) requirement in order to attain Ph.D. Candidacy. Finally Ph.D. candidates must successfully defend a Ph.D. dissertation and submit it to WVU library through the ETD protocol to fulfill all the requirements for the degree.
Mechanical Engineering

Degrees Offered

- Masters of Science, Mechanical Engineering (M.S.M.E.)
- Doctor of Philosophy, Mechanical Engineering (Ph.D.)

Educational objectives of the departmental graduate-level programs:

1. To provide high quality advanced master-level and Ph.D. level education to graduate engineering students to enable successful careers in technology development, innovation and research, with depth and breadth in one or several areas of the mechanical engineering discipline.
2. To develop the capacity of graduates to conduct independent research and/or technology development and innovation, through original contributions to the mechanical engineering discipline and to disseminate the results of their scholarly work.
3. To instill in graduates the drive for leadership in technology development, innovation and research and to contribute to the advancement of the profession in a societal and economic context.

The outcomes of the graduate programs in Mechanical Engineering are as follows:

- Holders of graduate degrees will have an expert-level understanding of the advanced principles of mechanical engineering, which include mechanical systems design, system dynamics, solid mechanics, energy systems, engineering materials, automatic controls, mechatronics, and computational mechanics.
- Holders of graduate degrees will hold paramount the highest standards of ethical and professional responsibility in the practice of their profession to contribute to the well being of society and to the advancement of the mechanical engineering profession.
- Holders of Ph.D. degrees will have furthered original research contributions to the state of the art in their specific areas of expertise and will be able to develop innovative research in order to advance the frontiers of knowledge, secure sponsored research, and disseminate its findings through scholarly publications.

Thesis Based Master's Degrees

All the requirements for thesis based master's degrees (M.S.A.E., M.S.M.E. and M.S.M.S.&E.) in the MAE Department must be completed within eight years preceding the student's graduation. All students in these programs are required to engage in research, complete and successfully defend a master's thesis. They must identify a subject for their thesis research, form a three-member advisory and examining committee (AEC), and file a plan of study by the end of their second semester of enrollment in the graduate program. A minimum of twenty-four credit hours of coursework with a minimum overall GPA of 3.0/4.0 and six credit hours of M.S. thesis research are required for the thesis based master's degrees. Students must pass a final examination administered by their advisory and examining committee before being certified for the degree. All thesis based master's degree students have to comply with core requirements by selecting a "core area" taking two of the courses listed in that area, and in addition they have to comply with the mathematics requirements by taking two courses from an approved list. Four additional courses can be selected from a list of technical electives, or from the core and mathematics lists to complete the coursework requirements, with no more than three courses at the 400 level.

Ph.D. Degrees

The MAE Department offers Ph.D. Programs in Aerospace Engineering, in Mechanical Engineering and in Materials Science and Engineering. These programs require a minimum of eighteen credit hours of graduate level coursework plus a minimum of twenty-four credit hours of research. Students in the Ph.D. program must take and pass the Ph.D. Qualifier examination by the second semester of the program with a second attempt no later than the third semester in the program if necessary. After the qualifier examination, students are expected to produce a dissertation proposal and defend it before a five-member advising and examining committee (AEC). Subsequent the successful proposal defense, students must comply with the journal paper publication (or patent disclosure) requirement in order to attain Ph.D. Candidacy. Finally Ph.D. candidates must successfully defend a Ph.D. dissertation and submit it to WVU library through the ETD protocol to fulfill all the requirements for the degree.

Curriculum in Master of Science in Mechanical Engineering

A candidate for the M.S. degree in mechanical engineering must comply with the rules and regulations as outlined in the WVU Graduate Catalog and the specific requirements of the Statler College and the Mechanical and Aerospace Engineering Department.

Program Requirements

All M.S. degree candidates are required to perform research (except those pursuing the coursework-only degree option) and follow a planned program of study. The student's research advisor, in conjunction with the student's Advising and Examining Committee (AEC) will be responsible for determining the plan of study appropriate to the student's needs. The underlying principle of the planned program is to provide the students with the necessary support to complete their degree and prepare them for their career.

Curriculum Requirements

A minimum cumulative GPA of 3.0 is required in all courses.
**Course Requirements**

A minimum of 60% of courses must be from 500 level or above.

### Thesis Option (30 credit hours)

- Technical Electives (6 credit hours)
- Mathematics Requirements (6 credit hours)
- Additional Courses (12 credit hours) - Any BIOM, CE, CHEM, CPE, CS, EE, IE, MAE, MATH, MINE, PNGE, PHYS, SENG, or STAT courses 400-799, as approved by the student's AEC
- MAE 697 Research (6 credit hours)
- Written Research Proposal
- Thesis
- Final Oral or Written Examination

### Problem Report Option (33 credit hours)

- Technical Electives (6 credit hours)
- Mathematics Requirements (6 credit hours)
- Additional Courses (18 credit hours) - Any BIOM, CE, CHEM, CPE, CS, EE, IE, MAE, MATH, MINE, PNGE, PHYS, SENG, or STAT courses 400-799, as approved by the student's AEC
- MAE 697 Research (3 credit hours)
- Written Research Proposal
- Formal Written Report or Professional Report/Paper
- Final Oral or Written Examination

### Coursework Option (33 credit hours)

- Technical Electives (18 credit hours)
- Mathematics Requirements (6 credit hours)
- Additional Courses (9 credit hours) - Any BIOM, CE, CHEM, CPE, CS, EE, IE, MAE, MATH, MINE, PNGE, PHYS, SENG, or STAT courses 400-799, as approved by the student's AEC
- Comprehensive Exam (Written or Oral)

**Total Hours** 30-33

### MATHEMATICS REQUIREMENTS FOR ALL OPTIONS (6 CREDIT HOURS)

Select two of the following (at least one course with MATH prefix):

- MATH 420 Numerical Analysis 1
- MATH 441 Applied Linear Algebra
- MATH 456 Complex Variables
- MATH 521 Numerical Analysis
- MATH 522 Numerical Solution of PDE
- MATH 541 Modern Algebra
- MATH 543 Linear Algebra
- MATH 545 Number Theory 1
- MATH 551 Real Variables 1
- MATH 555 Complex Variables 1
- MATH 563 Mathematics Modeling
- MATH 564 Intermediate Differential Equations
- MATH 567 Advanced Calculus
- MATH 568 Advanced Calculus
- MATH 573 Graph Theory
- MATH 593 Special Topics (Applied Nonlinear Dynamics Chaos and Modeling)
- STAT 513 Design of Experiments
- STAT 545 Applied Regression Analysis
- STAT 561 Theory of Statistics 1
- STAT 562 Theory of Statistics 2
- MAE 515 Analytical Methods in Engineering
- MAE 623 Conduction Heat Transfer
- MAE 633 Computational Fluid Dynamics
### TECHNICAL AREA COURSES FOR THESIS OR PROBLEM REPORT OPTIONS (6 CREDIT HOURS)

Select two courses in a single core technical area from the following:

**Area A: Fluid Mechanics and Aerodynamics (FMA)**
- MAE 532: Dynamics of Viscous Fluids
- MAE 624: Convection Heat Transfer
  - or MAE 636: Fundamentals of Turbulent Flow

**Area B: Thermal Sciences and Systems (TSS)**
- MAE 521: Advanced Thermodynamics 1
- MAE 532: Dynamics of Viscous Fluids
- MAE 624: Convection Heat Transfer

**Area C: Dynamics and Controls (D&C)**
- MAE 642: Intermediate Dynamics
  - or MAE 653: Advanced Vibrations
- MAE 660: Feedback Control in Mechanical Engineering

**Area D: Solid Mechanics and Design (SMD)**
- MAE 543: Advanced Mechanics of Materials
- MAE 641: Theory of Elasticity 1
  - or MAE 653: Advanced Vibrations

**Area E: Materials Science (MS)**
- MAE 580: Crystallography and Crystals
- MAE 583: Thermodynamics and Kinetics of Materials
- MAE 649: Microscopy of Materials

### TECHNICAL AREA COURSES FOR COURSEWORK OPTION (18 CREDIT HOURS)

**Required Courses**
- MAE 521: Advanced Thermodynamics 1
- MAE 532: Dynamics of Viscous Fluids
- MAE 543: Advanced Mechanics of Materials
- MAE 580: Crystallography and Crystals
- MAE 653: Advanced Vibrations
- MAE 660: Feedback Control in Mechanical Engineering

* Students who do not hold a baccalaureate degree in mechanical engineering will be required to take a set of undergraduate mechanical engineering courses above and beyond the minimum coursework requirements in order to overcome deficiencies in the mechanical engineering area.

### Final Examination

M.S. students following the thesis or problem report option must prepare a written research proposal. The proposal must be approved by the student's AEC at least one semester prior to the final oral examination.
All students, regardless of option, are required to pass a final oral or written examination, administered by their AEC, covering the thesis or problem report and/or related course material.

The students request for the comprehensive exam for students in the Coursework Only degree option must be filed at least four weeks in advance of the desired date of the exam. The comprehensive exam for students in the Coursework Only degree option must be passed at least 3 weeks before graduation.

**Suggested Plan of Study**

The plan below illustrates the Thesis Option. It is important for students to take courses in the order specified as much as possible; all prerequisites and concurrent requirements must be observed. A typical M.S.M.E degree program that completes degree requirements in two years is as follows.

**Examinations**

**QUALIFYING EXAM**

All students must take and pass a written qualifying examination. Normally, the qualifying examination is given no later than one semester after completion of eighteen credit hours toward the doctoral degree. This examination is designed to assess the basic competency of students in the mechanical engineering field to determine whether or not they have sufficient knowledge to undertake independent research.

The Ph.D. qualifying examination is the method of assessing whether the student has attained sufficient knowledge of the discipline and supporting fields in order to undertake independent research or practice. Students are required to pass a qualifying examination administered by the department which tests for a minimum level of proficiency expected of all students in a given area. It is expected that students will take the qualifying exam during their first or second semester of enrollment in the Ph.D. program; however, it is required that full-time students pass the qualifying examination no later than the end of the third semester of enrollment in their Ph.D. program. Students admitted in the direct track from B.S. to Ph.D. degree option are expected to take the qualifying exam by the end of their fourth semester of enrollment in the MAE graduate program.

**CANDIDACY EXAMINATION**

In order to be admitted to candidacy, the student must pass a candidacy exam, which is designed to evaluate the student’s overall ability to engage in high-level research.

As the student progresses, his or her advisory and examining committee is charged with evaluating the student’s competency in the specific area of study through the assessment of a dissertation proposal for the research to be completed and the evaluation of the student’s plan of study and associated coursework. After these requirements are completed, the student is formally admitted to candidacy for the Ph.D. degree. Only at this point can a student be called a doctoral candidate; admission to the graduate program for the purpose of pursuing the Ph.D. degree is not equivalent to becoming a Ph.D. candidate. Doctoral candidates are allowed no more than five years to complete the remaining degree requirements after admission to candidacy. An extension of time can be obtained only by repeating the qualifying and candidacy examinations and meeting any other requirements specified by the student’s advisory and examining committee.

A student who has successfully completed all coursework, passed the qualifying examination, and successfully defended the research proposal is defined as one who is a candidate for the Ph.D. degree.

**FINAL EXAMINATION**

At the completion of the dissertation research, candidates must prepare a dissertation and pass the final oral examination (defense) administered by their AEC.

In order to complete the Ph.D. requirements, a student must pass a final oral examination on the results embodied in the dissertation. This examination is open to the public and, in order to evaluate critically the student’s competency, may include testing on material in related fields, as deemed necessary by the AEC. In addition, since the Ph.D. degree is primarily a research degree that embodies the results of an original research proposal and represents a significant contribution to scientific literature, the student must submit a manuscript on this research to the AEC.

**Suggested Plan of Study**

It is important for students to take courses in the order specified as much as possible; all prerequisites and concurrent requirements must be observed. A typical doctoral degree program that completes degree requirements in three years is as follows. The Ph.D. degree signifies that the holder has the competence to function independently at the highest level in the chosen field. Hence, the number of years involved in attaining or retaining competency cannot be readily specified, nor can an exact program of study be defined.

**JOURNAL PAPER PUBLICATION REQUIREMENT FOR ALL PHD STUDENTS:**

Beginning with all PhD students admitted for the summer or fall of 2016 and thereafter, every Ph.D. student, prior to his/her dissertation defense, will be required to provide written documentation that they have received formal proof of submission of either:

- a.) At least one manuscript, generally co-authored with their research supervisor and about some portion of their PhD dissertation research, to an archival journal for publication, or
- b.) At least one patent disclosure, also generally about some portion of their PhD dissertation research.

This publication requirement will have to be satisfied prior to scheduling the defense of the Ph.D. Dissertation.

**Major Learning Goals**

**MECHANICAL ENGINEERING**

The MAE Department is committed to deliver high quality education and research experience to all graduate students in order to enable them to achieve success in their careers, though the following Learning Goals:

- Expertise, depth and breadth in a chosen field of mechanical engineering.
- Capacity to engage in original research, advanced technological discovery and innovation in order to advance the frontiers of knowledge in the science of the mechanical engineering discipline.
- Capacity of effective high level communication in order to document, disseminate and transfer knowledge of the science of the mechanical engineering discipline in educational, research or applied workplace settings.
- Appreciation and understanding of the role of the science of mechanical engineering discipline in a global and societal context.

**Department of Mining Engineering**

**Degrees Offered**

- Masters of Science, Mining Engineering (M.S.Min.E.)
- Doctor of Philosophy, Mining Engineering (Ph.D.)

**Program Objectives**

The objective of the master’s of science in mining engineering (M.S.Min.E.) program is to equip students to investigate and develop solutions to advanced mining engineering problems. This program provides students the technical knowledge and research experience needed to address the most challenging contemporary issues within a specialized area of study.

Moreover, the objective of the Ph.D. program in mining engineering is to educate students to the highest level of technical and research performance within the minerals profession. Graduates of this program not only possess the requisite technical skills, but they also have the capability to actively contribute to the scholarly body of knowledge through independent research. These graduates pursue impactful careers in industry, government agencies, and academia.
Areas of Research

The expertise of the current faculty members broadly spans many traditional mining sub-disciplines. Active research areas include surface and underground mining, rock mechanics and ground control, mine health and safety, mineral/coal processing, mine pollution control, and mine ventilation.

FACULTY

CHAIR

• John A. Herbst - Ph.D. (University of California, Berkeley)
  Mineral Processing, Numerical modeling, Comminution

PROFESSORS

• Keith Heasley - Ph.D. (Colorado School of Mines)
  Numerical Modeling, Rock Mechanics
• Vladislav Kecojevic - Ph.D. (University of Belgrade)
  Surface Mining, Aggregates Production, Mine Materials Handling Systems

ASSOCIATE PROFESSOR

• Yi Luo - Ph.D. (West Virginia University)
  Surface Subsidence, Ventilation
• Brijes Mishra - Ph.D. (West Virginia University)
  Rock mechanics, Numerical modeling
• Felicia F. Peng - Ph.D. (West Virginia University)
  Coal Preparation, Coal Utilization, Process Control, Plant Design

ASSISTANT PROFESSOR

• Aaron Noble - Ph.D. (Virginia Tech)
  Mineral Processing, Flowsheet design, Froth Flotation

RESEARCH ASSISTANT PROFESSOR

• Mark Sindelar - Ph.D. (University of Pittsburgh)
  Mine power systems

Admission Requirements

The Masters of science in the mining engineering program admits students who have met the following requirements:

- A grade point average (GPA) of 3.0/4.0 or above from an ABET-accredited B.S.Min.E. program or its equivalent. Additionally, all Ph.D. applicants must have earned an M.S. degree in mining engineering with a GPA of 3.0 or higher. Transfer students must have at least a GPA of 3.0/4.0 for the graduate programs at similar institutions.
- International applicants must submit a GRE score and demonstrate proficiency in communicating English. For applicants whose native language is not English, this requirement may be fulfilled by a TOEFL-pBT test score of 550 or better, or an iBT score of 79, or an IELTS score of 6.5.
- At least three letters of recommendation, one of which must be from the applicant’s previous thesis advisor or an academic equivalent. All letters of recommendation should evaluate the student’s potential for performing independent, masters or doctoral-level research.

The same review process is used for M.S. and Ph.D. applications. In both cases, the completed application packets are circulated to the graduate faculty. Initial evaluations consider whether:

1. The applicant should or should not be accepted; and
2. The reviewing faculty member is or is not willing to provide support.

If multiple positive responses are produced, the assignment of the potential graduate student is resolved at a meeting of the faculty according to specific needs and interests.

Curriculum in Masters of Science in Mining Engineering

A candidate for the M.S. degree in mining engineering must comply with the rules and regulations as outlined in the WVU Graduate Catalog and the specific requirements of the Statler College and the Mining Engineering Department.

Program Requirements

All M.S. degree candidates are required to perform research and follow a planned program of study. The student’s research advisor, in conjunction with the student’s Advising and Examining Committee (AEC) will be responsible for determining the plan of study appropriate to the student’s needs. The
underlying principle of the planned program is to provide the students with the necessary support to complete their degree and prepare them for their career.

**Curriculum Requirements**

A minimum cumulative GPA of 3.0 is required in all courses

**Course Requirements**

A minimum of 60% of course must be from 500 level or above

**Curriculum in Doctor of Philosophy – Mining Engineering**

A candidate for the Ph.D. degree with a major in mining engineering must comply with the rules and regulations as outlined in the WVU Graduate Catalog and the specific requirements of the Statler College and the Mining Engineering Department.

**Program Requirements**

The doctor of philosophy degree with a major in mining engineering is administered through the college’s interdisciplinary Ph.D. program. The research work for the doctoral dissertation must show a high degree of originality on the part of the student and must constitute an original contribution to the art and science of mining engineering.

All Ph.D. degree candidates are required to perform research and follow a planned program of study. The student’s research advisor, in conjunction with the student’s Advising and Examining Committee (AEC) will be responsible for determining the plan of study appropriate to the student’s needs. The
underlying principle of the planned program is to provide the students with the necessary support to complete their degree and prepare them for their career.

**Curriculum Requirements**

A minimum cumulative GPA of 3.0 is required in all courses

| Candidacy Exam |  |
| Final Exam |  |

Total Hours: 42

* Students who do not hold a baccalaureate degree in mining engineering are required to take a set of undergraduate mining engineering courses above and beyond the minimum coursework requirements.

A minimum of eighteen hours of coursework and twenty-four hours of independent research beyond an M.S. degree are required.

**Examinations**

**QUALIFYING EXAM**

All students must take and pass a written qualifying examination. Normally, the qualifying examination is given no later than one semester after completion of eighteen credit hours toward the doctoral degree. All mining engineering students must pass the written qualifying examination within three semesters since registered in Mining Engineering graduate program. This examination is designed to assess the basic competency of students in the mining engineering field to determine whether or not they have sufficient knowledge to undertake independent research.

**CANDIDACY EXAMINATION**

In order to be admitted to candidacy, the student must pass a candidacy exam, which is designed to evaluate the student’s overall ability to engage in high-level research. The candidacy exam consists of a written qualifying examination and dissertation proposal defense. The proposal must be approved by the student’s AEC at least one semester prior to the final oral examination. The written qualifying exam includes material from the eight areas of specialization.

A student who has successfully completed all coursework, passed the qualifying examination, and successfully defended the research proposal is defined as one who is a candidate for the Ph.D. degree.

**FINAL EXAMINATION**

At the completion of the dissertation research, candidates must prepare a dissertation and pass the final oral examination (defense) administered by their AEC.

In order to complete the Ph.D. requirements, a student must pass a final oral examination on the results embodied in the dissertation. This examination is open to the public and, in order to evaluate critically the student’s competency, may include testing on material in related fields, as deemed necessary by the AEC. In addition, since the Ph.D. degree is primarily a research degree that embodies the results of an original research proposal and represents a significant contribution to scientific literature, the student must submit a manuscript on this research to the AEC.

Major Learning Goals

MASTER OF SCIENCE IN MINING ENGINEERING (MSMINE)

Upon graduation, with a Masters of Science degree in Mining Engineering, students will have:

• Ability to investigate and develop solutions to advanced mining engineering problems
• Advanced technical knowledge and research experience needed to address the most challenging contemporary issues within a specialized area of study

DOCTOR OF PHILOSOPHY (PHD)

Upon graduation with a Ph.D. degree from the Statler College of Engineering and Mineral Resources, students will have:

• Ability to initiate research ideas in order to solve specific problems and to write research proposals on these ideas
• Have an expert-level understanding of the advanced principles of their fields of study
• Furthered a novel research idea which has contributed to the state of the art in their specific areas of expertise
• Ability to plan original research projects, to perform laboratory or field based experimental tasks, generate data from those tasks, and draw conclusions based on sound scientific and engineering principles
• Ability to develop innovative research in order to advance the frontiers of knowledge and secure sponsored research
• Ability to write technical articles for dissemination through peer-reviewed, refereed journals or other venues
• Ability to make oral and poster presentations at technical meetings
• Understanding of professional and ethical responsibilities in the practice of their profession to contribute to the well-being of society and to the advancement of their profession
• Demonstrated initiative in research planning and management, including safety and environmental issues
• Technical preparation for and an awareness of the need for life-long learning and continuing education

Department of Petroleum and Natural Gas Engineering

Degrees Offered

• Masters of Science, Petroleum and Natural Gas Engineering (M.S.P.N.G.E.)
• Doctor of Philosophy, Petroleum and Natural Gas Engineering (Ph.D.)

The Petroleum and Natural Gas Engineering (PNGE) graduate programs are designed for students who have already completed a basic petroleum engineering curriculum.

Degree Programs

The Department of Petroleum and Natural Gas Engineering admits students to the following degree programs: master of science in petroleum and natural gas engineering (M.S.P.N.G.E.) and petroleum and natural gas engineering major under the Statler College of Engineering and Mineral Resources’ interdisciplinary doctor of philosophy (Ph.D.). Students in these programs must comply with the rules and regulations as presented in the general requirements for graduate work in the Statler College of Engineering and Mineral Resources.
Program Objectives

The objective of the Petroleum and Natural Gas Engineering (PNGE) graduate programs is to educate and train men and women who will be capable of performing at the highest levels of the petroleum and natural gas engineering profession. The programs provide students with the advanced technical knowledge and engineering skills needed by the oil and gas industry in the state, the nation, and the world. Moreover, the programs will make students competent to perform independent research and will prepare them to be the future providers of high quality education in petroleum and natural gas engineering. Graduates have the opportunity to enter all phases of the oil and natural gas industry, government agencies, and academia in meaningful and important jobs.

Student Learning Outcomes

• Graduates will have in-depth knowledge of petroleum and natural gas engineering principles and applications to function effectively in their profession or continue their education.
• Graduates will have the ability to perform independent research to solve engineering and scientific problems encountered in their profession.

Areas of Research

• Development of the Unconventional Oil and Gas Resources
• Drilling and Completion
• Stimulation
• Reservoir Characterization and Formation Evaluation
• CO₂ Sequestration and Enhanced Oil Recovery
• Reservoir Modeling and Simulation
• Application of Artificial Intelligence

FACULTY

CHAIR
• Samuel Ameri - M.S.Pet.E., P.E. (West Virginia University)  
  Formation Evaluation

PROFESSORS
• Kashy Aminian - Ph.D. (University of Michigan)  
  Natural Gas Engineering, Reservoir Engineering
• Shahab Mohaghegh - Ph.D. (Pennsylvania State University)  
  Intelligent Systems

ASSOCIATE PROFESSOR
• H. Ilkin Bilgesu - Ph.D., P.E. (Pennsylvania State University)  
  Drilling Engineering

ASSISTANT PROFESSOR
• Ebrahim Fathi - Ph.D. (University of Oklahoma)  
  Unconventional Gas Recovery
• Ali Takbiri Boroujeni - Ph.D. (Louisiana State University)  
  Enhanced Oil Recovery
• Ming Gu - Ph.D. (University of Texas)  
  Rock Mechanics

TEACHING ASSISTANT PROFESSOR
• Fatemeh Belyadi - Ph.D. (West Virginia University)  
  Reservoir Engineering
• Mehrdad Zamirian - Ph.D. (West Virginia University)  
  Reservoir Engineering

ADJUNCT PROFESSOR
• Alan Brannon - Ph.D. (West Virginia University)  
  Natural Gas Engineering
• Pramod Thakur - Ph.D. (Pennsylvania State University)
Masters Admission

A candidate for the M.S.P.N.G.E. program must meet the following requirements:

- B.S. degree in engineering from an ABET-accredited, or an internationally-recognized engineering program or equivalent with a grade point average (GPA) equal to, or greater than, 3.0 (on a 4.0 scale) (Applicants who cannot meet this condition may be considered for provisional admission.)
- International students must demonstrate proficiency in communicating in English (a minimum TOEFL score of 550, or IBT score of 79, or IELTS score of 6.5).
- At least three recommendation letters (One letter must be from the applicant's academic advisor or equivalent.)

Doctoral Admission

A candidate for the degree of Doctor of Philosophy (Ph.D.) must comply with the rules and regulations as outlined in the general requirements for graduate work in engineering and the specific requirements stated in the departmental guidelines.

A candidate for the degree of Doctor of Philosophy (Ph.D.) must meet the following requirements:

- B.S. or M.S. degree in petroleum engineering from an ABET-accredited, or an internationally-recognized petroleum engineering program or equivalent with a grade point average (GPA) equal to, or greater than, 3.0 and 3.2, respectively
- A score of at least seventy-fifth percentile for Graduate Record Examination (GRE) quantitative analysis
- International students must demonstrate proficiency in communicating in English (a minimum TOFEL Score of 550, or IBT Score of 79, or IELTS Score of 6.5).
- At least three recommendation letters (One letter must be from the applicant’s previous thesis advisor or an academic equivalent.)

Curriculum in Master of Science in Petroleum and Natural Gas Engineering

A candidate for the M.S. degree in petroleum and natural gas engineering must comply with the rules and regulations as outlined in the WVU Graduate Catalog and the specific requirements of the Statler College and the Petroleum and Natural Gas Engineering Department.

Program Requirements

All M.S. degree candidates are required to perform research and follow a planned program of study. The student’s research advisor, in conjunction with the student's Advising and Examining Committee (AEC) will be responsible for determining the plan of study appropriate to the student’s needs. The underlying principle of the planned program is to provide the students with the necessary support to complete their degree and prepare them for their career.

Curriculum Requirements

A minimum cumulative GPA of 3.0 is required in all courses

Course Requirements

- A minimum of 60% of courses must be from 500 level or above
- All students are required to take Graduate Seminar (PNGE 796) for each semester enrolled.
- A maximum of three credit hours each of Graduate Seminar (PNGE 796) and Independent Study (PNGE 695) can be counted towards meeting the coursework requirements.
- Any PNGE course 400-799
- Any BIOM, CE, CHEM, CPE, CS, EE, IENG, IH&S, GEOL, MAE, MATH, MINE, PNGE, PHYS, SAFM, SENG, or STAT courses 400-799
- Complete 1 of the following options:

Curriculum in Doctor of Philosophy - Petroleum and Natural Gas Engineering

A candidate for the Ph.D. degree with a major in petroleum and natural gas engineering must comply with the rules and regulations as outlined in the WVU Graduate Catalog and the specific requirements of the Statler College and the Petroleum and Natural Gas Engineering Department.

Program Requirements

The doctor of philosophy degree with a major in petroleum and natural gas engineering is administered through the college’s interdisciplinary Ph.D. program. The research work for the doctoral dissertation must show a high degree of originality on the part of the student and must constitute an original contribution to the art and science of petroleum and natural gas engineering.

All Ph.D. degree candidates are required to perform research and follow a planned program of study. The student's research advisor, in conjunction with the student’s Advising and Examining Committee (AEC) will be responsible for determining the plan of study appropriate to the student’s needs. The underlying principle of the planned program is to provide the students with the necessary support to complete their degree and prepare them for their career.

Curriculum Requirements

A minimum cumulative GPA of 3.0 is required in all courses

Course Requirements

All students are required to take Graduate Seminar (PNGE 796) for each semester enrolled.

A maximum of three credit hours each of Graduate Seminar (PNGE 796) and Independent Study (PNGE 795) can be counted towards meeting the coursework requirements.

**Examinations**

**QUALIFYING EXAM**

All students must take and pass a written qualifying examination. Normally, the qualifying examination is given no later than one semester after completion of eighteen credit hours toward the doctoral degree. This examination is designed to assess the basic competency of students in the petroleum and natural gas engineering field to determine whether or not they have sufficient knowledge to undertake independent research.

**CANDIDACY EXAMINATION**

In order to be admitted to candidacy, the student must pass a candidacy exam, which is designed to evaluate the student’s overall ability to engage in high-level research. A student must pass the qualifying examination prior to taking Candidacy Exam. The Candidacy Exam is administered by the student’s AEC and requires preparation and defense of the dissertation research proposal. The Candidacy Exam may also include testing on material in related fields, as deemed necessary by the AEC.

A student who has successfully completed all coursework, passed the qualifying and candidacy exam and successfully defended the research proposal is defined as one who is a candidate for the Ph.D. degree.

**FINAL EXAMINATION**

At the completion of the dissertation research, candidate must prepare a dissertation and pass the final oral examination (defense) administered by his/her AEC.

In order to complete the Ph.D. requirements, a student must pass a final oral examination on the results embodied in the dissertation. This examination is open to the public and, in order to evaluate critically the student’s competency, may include testing on material in related fields, as deemed necessary by the AEC. In addition, since the Ph.D. degree is primarily a research degree that embodies the results of an original research work and represents a significant contribution to scientific literature, the student must submit a manuscript on this research to the AEC.

**Suggested Plan of Study**

It is important for students to take courses in the order specified as much as possible; all prerequisites and concurrent requirements must be observed. A typical doctoral degree program that completes degree requirements in three years is as follows.

**First Year**

<table>
<thead>
<tr>

Major Learning Goals

PETROLEUM AND NATURAL GAS ENGINEERING

• Graduates will have in-depth knowledge of petroleum and natural gas engineering principles and applications to function effectively in their profession or continue their education.
• Graduates will have the ability to perform independent research to solve engineering and scientific problems encountered in their profession.
• Graduates will have in-depth petroleum and natural gas scientific and engineering knowledge to provide high quality education in petroleum and natural gas engineering.

College Wide Degrees

Degrees Offered

• Master of Science, Energy Systems Engineering (M.S.E.S.E.)
• Master of Science, Engineering (M.S.E.)
• Master of Science, Material Science and Engineering (M.S.M.S.E)
• Doctor of Philosophy, Material Science and Engineering (Ph.D.)

Engineering

The master of science in engineering (M.S.E) program is available to students holding a baccalaureate degree in a field of engineering different from the M.S. major they are seeking. It is also open to students holding a baccalaureate degree in the physical sciences wishing to pursue a broad interdisciplinary M.S. degree in an engineering program (for example, a student with a B.S. in chemistry can pursue an M.S.E. with an emphasis in chemical engineering). The M.S.E. is a college-wide undesignated program that compliments the designated master’s program in each of the eight individual engineering discipline majors, namely, aerospace engineering, chemical engineering, civil engineering, electrical engineering, industrial engineering, mechanical engineering, mining engineering or petroleum and natural gas engineering.

It is important to note that the M.S. in specific disciplines requires an equivalent bachelor's degree-level of knowledge to pursue; students may pursue the M.S.E. degree with a more basic level of knowledge in that field, the difference of which could be the equivalent of several semesters of undergraduate work. The M.S.E., therefore, is an important element in providing students with additional professional options, allowing for a broad and diverse masters experience and preparing students from the physical sciences with the basis to pursue doctoral work in engineering.

Due to the interdisciplinary nature of the degree program, the M.S.E. can also serve as an avenue to explore and develop potential future M.S. programs in a new engineering discipline on an experimental basis.

There are no specific faculty lines tied to the M.S.E. program. The faculty contributing to a student pursuing an M.S.E. program in a specific discipline area is the same faculty contributing in that M.S. discipline major program.

Curriculum in Master of Science in Engineering

The following programs participate in the Master of Science in Engineering Program:

• Chemical Engineering
• Civil Engineering
• Computer Science
• Electrical Engineering
• Industrial Engineering

A candidate for the M.S. degree in engineering must comply with the rules and regulations as outlined in the WVU Graduate Catalog and the specific requirements of the Statler College and the specific department in which the student’s concentration is in.

Program Requirements

All M.S. degree candidates are required to perform research and follow a planned program of study. The student’s research advisor, in conjunction with the student’s Advising and Examining Committee (AEC) will be responsible for determining the plan of study appropriate to the student’s needs. The underlying principle of the planned program is to provide the students with the necessary support to complete their degree and prepare them for their career.

Curriculum Requirements

A minimum cumulative GPA of 3.0 is required in all courses

Course Requirements
A minimum of 60% of courses must be from 500 level or above
Select from the following based on degree path:

Any BIOM, CE, CHEM, CPE, CS, EE, IENG, IH&S, MAE, MATH, MINE, PNGE, PHYS, SAFM, SENG, or STAT courses 400-799

Complete 1 of the following options:

**Thesis Option - 6 hours**
- Research - any 697 (6 hours)
- Written Research Proposal
- Thesis
- Final Oral or Written Examination

**Problem Report Option - 9 hours**
- Complete 6 additional hours of coursework
- Research - any 697 (3 hours)
- Written Research Proposal
- Formal written report or professional report/paper
- Final Oral or Written Examination

**Coursework Option - 9 hours**
- Complete 8 additional hours of coursework
- Final Oral or Written Examination

**Total Hours**

30-33

* Students who do not hold a baccalaureate degree in engineering may be required to take a set of undergraduate engineering courses above and beyond the minimum coursework requirements.

**Final Examination**

M.S. students following the thesis or problem report option must prepare a written research proposal. The proposal must be approved by the student's AEC at least one semester prior to the final oral examination.

All students, regardless of option, are required to pass a final oral or written examination, administered by their AEC, covering the thesis or problem report and/or related course material.

**Suggested Plan of Study**

The plan below illustrates the Thesis Option. It is important for students to take courses in the order specified as much as possible; all prerequisites and concurrent requirements must be observed. A typical M.S.E degree program that completes degree requirements in two years is as follows.

**Major Learning Goals**

Upon graduation, with a masters of science degree in engineering, students will have:

- An expert level understanding of the advanced principles of their engineering specialty
- Ability to apply advanced methodologies in their specialty area
- Ability to design and conduct original experiments, analyze and interpret data, and develop recommendations with a high degree of independence
• Advanced ability to use contemporary techniques, skills, and tools necessary for engineering practice in education, industry, and/or government
• Ability to effectively communicate technical information in the form of a thesis, scientific publication or presentation
• Understanding of professional and ethical responsibility
• Ability to understand the impact of engineering solutions in global and societal context
• Recognition of the need to engage in life-long learning
• Foundational preparation to pursue doctoral studies

Energy Systems Engineering

The master of science in energy systems engineering is designed for students with undergraduate degrees in engineering or a closely related STEM discipline. The program will provide students opportunities to expand and strengthen their scholastic background and skills relative to the production, conversion, transmission and utilization of energy; carbon-based and “green” energy; renewable or alternate energy sources; energy storage, modeling and simulation of energy systems; and critical materials for energy generation and utilization.

Students enrolled and graduating from this program will fulfill a need for specially trained professionals to satisfy growing needs of governmental agencies and industrial companies in West Virginia, the region and the country for technical personnel with advanced training in specialized areas of energy systems and energy supply-chain management. The program will produce master's-level students who are able to function at the highest levels of expertise in their chosen sub-discipline of energy, and who are well versed in the overall concepts of getting energy to consumers.

The degree can be used as a terminal degree or prepare students, with unique perspectives in the field of energy, for prospective study in existing Ph.D. programs at WVU and other universities nationally and internationally.

FACULTY

COMMITTEE
• Kashy Aminian
• Roger Chen
• Bhaskaran Gopalakrishnan
• Hailin Li
• Yi Luo
• Jignesh Solanki

To enter the Energy Systems Engineering program, students are required to have, as a minimum, a B.S. degree in engineering or a closely related STEM discipline, single- and multi-variable calculus, calculus based introductory probability and statistics and a course in thermodynamics.

All students must submit a completed application accompanied by three letters of reference/recommendation.

• Students not having sufficient mathematics or calculus-based probability and statistics on thermodynamics coursework will only be admitted as provisional students and will not be admitted to regular student status until they meet these minimum coursework requirements.
• Applicants having a grade point average (GPA) of 3.0 or better (out of a possible 4.0) in all previous college work, and who meet all other admissions requirements will be admitted as regular graduate students.
• Applicants having a GPA less than 3.0 but greater than 2.75 in previous college work and who meets all other admission requirements may be admitted as provisional students.
• Applicants having a GPA below 2.75 in previous college work cannot be admitted without approval from the dean or designate. If admission would be granted, it would be a provisional admission.

Students admitted to provisional status must maintain a 3.0 GPA or better in their first semester.

The Graduate Record Examination (GRE) is not required for admission; however, high scores on the GRE will provide additional evidence that the applicant is qualified for admission.

A minimum score of 213 (equivalent to 550 on the former scale) on the Test of English as a Foreign Language (TOEFL) is required for all applicants from countries where the native language is not English. This requirement will be waived for students who have completed a recent four-year bachelor's degree in the United States. In some cases, it may be possible to consider applications from students who lack the adequate TOEFL scores but who will enroll in WVU's Intensive English Program.

Curriculum in Master of Science in Energy Systems Engineering

A candidate for the M.S. degree in energy systems engineering must comply with the rules and regulations as outlined in the WVU Graduate Catalog and the specific requirements of the Statler College and the specific department in which the student’s concentration is in.

**Major Learning Goals**

Upon graduation, with a Masters of Science degree in Energy Systems Engineering, students will have:

- Understanding of the supply chain for carbon based and “green” energy, for production, conversion or processing, transmission, and point of utilization;
- Advanced training in specialized areas of energy systems engineering;
- Ability to function at the highest levels of expertise in their chosen sub-discipline of energy, and who are well versed in the overall concepts of getting energy to consumers;
• Ability to complete on time specific professional-paper tasks
• Strong oral and written communication skills
• Ability to work independently in a collaborative environment
• Understanding of professional and ethical responsibility
• Ability to understand the impact of engineering solutions in global and societal context
• Recognition of the need to engage in life-long learning

Material Science & Engineering

Material science and engineering is designed for students with undergraduate degrees in engineering or a closely related STEM discipline. MS&E research focuses on the study of metals, ceramics, glass, polymers, semiconductors, composites, nanomaterials and biomaterials to be implemented in a variety of applications including energy, civil, industrial and environmental. The area of study is diverse and multidisciplinary, since it incorporates aspects of chemistry, physics, electronics, mechanics, biology and medicine. The program will provide students with opportunities to investigate various aspects of materials science and engineering, which includes the processing, structure and properties of materials through computational modeling and/or experimental studies.

Students will be trained in core discipline areas using the most advanced materials processing, physical property testing and chemical/structure characterization equipment available. In addition to coursework in the core areas of materials science, students will choose a specialty area of focus to further his or her expertise. Specialty areas may be in either the chemical, mechanical or electrical engineering departments. The student’s home department will be determined by the student’s particular background, interests and research advisor.

The program is designed to be flexible, permitting students to acquire the knowledge and skills required to participate in cutting-edge technological areas, such as nanomaterials, ultra-high performance materials, smart materials, bio-inspired materials, environmental materials and energy materials. Students that complete the program will be prepared to perform at the highest levels within industry or within any research environment.

REGULAR ADMISSION REQUIREMENTS

Minimum requirements for admission as a regular student into the graduate programs of the department are summarized as follows:

• An applicant for admission into the M.S. or the Ph.D. degree program must have earned a grade point average (GPA) of 3.0 or better (out of a possible 4.0) in all previous college work if he/she holds a B.S. or M.S. degree, respectively, from an accredited or internationally recognized program.

• International students must demonstrate proficiency in communicating in English (a minimum TOFEL Score of 550, or IBT Score of 79, or IELTS Score of 6.5). (This requirement will be waived for applicants who have completed a recent four-year bachelor’s degree in the USA.)

• All applicants are required to submit GRE general test scores with the engineering subject test score being optional. The GRE scores required for admission as a regular graduate student should be seventy-fourth percentile or higher in the Quantitative section. The GRE scores for the verbal and analytical sections will be taken into consideration in the admission process.

PROVISIONAL ADMISSION

An applicant not qualifying for the admission status of regular graduate student, either due to marginally insufficient grade point average or GRE performance, incomplete credentials, or inadequate academic background, may be admitted as a provisional student at the discretion of the Admissions Committee of the department. Requirements for attaining regular student status must be stated in a letter of admission. Provisional students must sign a contract, which lists in detail all requirements that have to be met for attaining regular student status, typically no later than the end of the first semester at WVU.

The graduate degree program requires the student to attain an overall grade point average of 3.0 or higher both in all the courses required for the degree program and in all the courses taken at WVU in order to meet graduation requirements. The cumulative grade point average (GPA) is calculated on the basis of courses only, and excludes credit for research, for which the received grade can be either S (satisfactory), or U (unsatisfactory). Note: A grade of U in research is equivalent to a grade of F in a regular course and it can decrease drastically the GPA of a graduate student.

ADMISSION TO THE DIRECT-TRACK TO PH.D. DEGREE OPTION

The Statler College of Engineering and Mineral Resources offers a material science and engineering (MS&E) direct-track option from the bachelor of science (B.S.) to the doctor of philosophy (Ph.D.) degree for prospective qualified students holding a B.S. degree in an engineering discipline, materials science, mathematics or applied sciences from an accredited undergraduate program or an internationally recognized program. This is an accelerated track that provides outstanding candidates the option of earning a Ph.D. degree after graduating from an undergraduate program by engaging early in their Ph.D. dissertation research without having to complete a research thesis for a master of science (M.S.) degree. To qualify for the direct-track degree option, a candidate must have earned a cumulative grade point average (GPA) of 3.5/4.0 or higher in his/her undergraduate studies, and attain a minimum of seventy-fourth percentile in the quantitative section of the standardized Graduate Record Examination (GRE). Students who are pursuing a M.S.M.S.E. (from any of the three participating departments -- Chemical and Biomedical Engineering, Mechanical and Aerospace Engineering, and Lane Department of Computer Science and Electrical Engineering -- also have the possibility of transferring into the direct-track option in their third semester in the program, provided that they earn a GPA of at least 3.75/4.0 and attain a minimum of seventy-fourth percentile in the quantitative section of the GRE by the end of their first two semesters of graduate studies at WVU. Students admitted into the direct-track option are considered to be Ph.D. students within the college.

Curriculum in Master of Science in Material Science and Engineering

A candidate for the M.S. degree in Material Science and Engineering must comply with the rules and regulations outlined in the WVU Graduate catalog and the specific requirements of the Statler College and the specific department in which the student's concentration is in.

Program Requirements

All M.S. degree candidates are required to perform research and follow a planned program of study. The student’s research advisor, in conjunction with the student’s Advising and Examining Committee (AEC) will be responsible for determining the plan of study appropriate to the student’s needs. The underlying principle of the planned program is to provide the students with the necessary support to complete their degree and prepare them for their career.

Curriculum Requirements

A minimum cumulative GPA of 3.0 is required in all courses.

Course Requirements

A minimum of 60% of courses must be from 500 level or above.

Curriculum in Doctor of Philosophy – Material Science and Engineering

A candidate for the Ph.D. degree with a major in material science and engineering must comply with the rules and regulations as outlined in the WVU Graduate Catalog and the specific requirements of the Statler College.

Program Requirements

The doctor of philosophy degree with a major in materials science and engineering is administered through the college’s interdisciplinary Ph.D. program. The research work for the doctoral dissertation must show a high degree of originality on the part of the student and must constitute an original contribution to the art and science of materials science and engineering.

All Ph.D. degree candidates are required to perform research and follow a planned program of study. The student’s research advisor, in conjunction with the student’s Advising and Examining Committee (AEC) will be responsible for determining the plan of study appropriate to the student’s needs. The underlying principle of the planned program is to provide the students with the necessary support to complete their degree and prepare them for their career.

Curriculum Requirements

A minimum GPA of 3.0 is required in all courses.

Total Hours: 44

* Students admitted to the Ph.D. program must have completed or will need to complete the following set of core courses or equivalent: MAE 583, MAE 580, MAE 649.

Examinations

QUALIFYING EXAM

All students must take and pass a written qualifying examination. Normally, the qualifying examination is given no later than the end of the third semester of enrollment in their Ph.D. program. This examination is designed to assess the basic competency of students to determine whether or not they have sufficient knowledge of the discipline to undertake independent research. The structure of the Ph.D. qualifying examination for all students pursuing the Ph.D. degree in Materials Science and Engineering will be comprised of two components: a written examination that will test on the student’s knowledge in the three core areas studied in MAE 583 Thermodynamics and Kinetics of Materials, MAE 580 Crystallography and Crystals, and MAE 649 Microscopy of Materials or their equivalent, and a second examination that will be administered by the MS&E Faculty in the home department of the student's Ph.D. advisor, and which should be consistent with the format used by that program/department for their qualifying exam. These two examinations will receive equal weighting in determining the student’s overall score on the qualifying examination. Students who do not pass either part or both parts of this exam on their initial attempt will be allowed a second attempt to pass either or both parts of the qualifying exam. If they are not successful on their second attempt, then they will be dismissed from the program.

CANDIDACY EXAMINATION

In order to be admitted to candidacy, the student must pass a candidacy exam, which is designed to evaluate the student’s overall ability to engage in high-level research. After passing the qualifying examination, the student must submit to the AEC a written research proposal of his/her planned dissertation work and successfully defend it in an oral examination. The research proposal must be approved by the student’s AEC. A student who has successfully completed all coursework, passed the qualifying examination, and successfully defended the research proposal, and receives the college’s approval becomes a candidate for a Ph.D. degree. Thereafter, the student will officially be engaged in dissertation research.

Final Examination

At the completion of the dissertation research, candidates must prepare a dissertation and pass the final oral examination (defense) administered by their AEC. This examination is open to the public and, in order to evaluate critically the student's competency, may include testing on material in related fields, as deemed necessary by the AEC.
Major Learning Goals

MASTER OF SCIENCE IN MATERIAL SCIENCE AND ENGINEERING (MSMSE)

Upon graduation, with a Masters of Science degree in Material Science and Engineering, students will have:

• An expert level understanding of the advanced principles of their engineering specialty
• Ability to apply advanced methodologies in their specialty area
• Ability to design and conduct original experiments, analyze and interpret data, and develop recommendations with a high degree of independence
• Advanced ability to use contemporary techniques, skills, and tools necessary for engineering practice in education, industry, and/or government
• Ability to effectively communicate technical information in the form of a thesis, scientific publication or presentation
• Understanding of professional and ethical responsibility
• Ability to understand the impact of engineering solutions in global and societal context
• Recognition of the need to engage in life-long learning
• Foundational preparation to pursue doctoral studies

DOCTOR OF PHILOSOPHY (PHD)

Upon graduation with a Ph.D. degree from the Statler College of Engineering and Mineral Resources students will have:

• Ability to initiate research ideas in order to solve specific problems and to write research proposals on these ideas
• Have an expert-level understanding of the advanced principles of their fields of study
• Furthered a novel research idea which has contributed to the state of the art in their specific areas of expertise
• Ability to plan original research projects, to perform laboratory or field based experimental tasks, generate data from those tasks, and draw conclusions based on sound scientific and engineering principles
• Ability to develop innovative research in order to advance the frontiers of knowledge and secure sponsored research
• Ability to write technical articles for dissemination through peer-reviewed, refereed journals or other venues
• Ability to make oral and poster presentations at technical meetings
• Understanding of professional and ethical responsibilities in the practice of their profession to contribute to the well-being of society and to the advancement of their profession
• Demonstrated initiative in research planning and management, including safety and environmental issues
• Technical preparation for and an awareness of the need for life-long learning and continuing education
WVU Law students have a passion for justice, an interest in how our legal system contributes to society, and a desire to learn a discipline that is both structured and creative.

West Virginia University College of Law provides students a unique opportunity to attend a small public law school within a nationally recognized research university. Here you can join diverse students from around the globe who come together in the beautiful mountains of West Virginia to experience public legal education with the intimacy of a fine private law school. Small class sizes and an excellent faculty-student ratio tell part of the story, but not all.

What makes the WVU Law experience exceptional is its culture of excellence. Our faculty, staff, and students are committed to creating a rigorous, inclusive, exciting, and supportive educational community in which individuals can pursue their personal vision of success in the legal profession.

Our faculty members are outstanding teachers, scholars, and leaders in legal education. What distinguishes our faculty from others, however, is the remarkable commitment they have in mentoring students to help them achieve individual goals. The faculty can be found supervising student articles for publication, assisting in obtaining prestigious federal judicial clerkships, or providing guidance for student-led symposia exploring cutting-edge and relevant topics. In addition, whether our faculty members teach corporate securities or civil disobedience, each one exemplifies the duty of a lawyer to serve the public interest.

To fulfill its commitment to individual student success and to improving the profession by producing the leaders of the future, the West Virginia University College of Law has a rapidly developing curriculum that combines the best of traditional legal education with new courses and opportunities necessary to practice law in the global society in the 21st century.

About the College of Law

Mission Statement: Preparing 21st century lawyers and leaders to serve the public, government, and business—both locally and globally—while focusing on justice, ethics, professionalism, and service in a diverse, vibrant, and respectful community.

Established: 1878

The West Virginia University College of Law was accredited by the AALS in 1914 and by the ABA in 1923.

The West Virginia University College of Law is fully approved by the American Bar Association Council of the Section of Legal Education and Admissions to the Bar.

Since 1952, the ABA Council of the Section of Legal Education and Admissions to the Bar has been approved by the U.S. Department of Education as the recognized national agency for the accreditation of professional schools of law.

Further information as to the Standards and Rules of Procedure for the Approval of Law Schools by the American Bar Association may be obtained from the Section of Legal Education and Admissions to the Bar, 321 N. Clark Street, 21st Floor, Chicago, IL 60654. Phone: (312) 988-6738, Fax: (312) 988-5681. Email: legaled@americanbar.org. Website: http://www.americanbar.org/groups/legal_education.html

ADMINISTRATION

DEAN

• Gregory W. Bowman - J.D. (Northwestern University)
  William J. Maier, Jr. Dean and Professor of Law

ASSOCIATE DEANS

• Gregory Elkins - Ed.D. (Texas Tech)
  Associate Dean for Administration and Finance
• Joshua P. Fershee - J.D. (Tulane Law School)
  Associate Dean for Faculty Research and Development, Professor of Law
• Kendra Huard Fershee - J.D. (Tulane Law School)
  Associate Dean for Academic Affairs, Professor of Law
• Jena Martin - J.D. (Howard University); L.L.M (University of Texas)
  Associate Dean for Innovation and Global Development, Professor of Law

ASSISTANT DEANS

• Amber Brugnoli - J.D. (West Virginia University)
  Continuing Legal Education
• Jennie James - M.B.A (University of Charleston); M.A. (Marshall University)
Development
- Tina Jernigan - M.A. (Marshall University)
- Beth Pierpont - J.D. (Western Michigan University Cooley Law School)
- Heather Spielmaker - J.D. (Western Michigan University Cooley Law School)

Student Life
- Beth Pierpont - J.D. (Western Michigan University Cooley Law School)

Admissions and Student Financial Support
- Heather Spielmaker - J.D. (Western Michigan University Cooley Law School)

Career Services
- James Jolly - B.A. (Radford University)

Marketing and Communications
- Jessica Haught - J.D. (Duquesne University)
- Stenja McVicker - M.P.A. (West Virginia University)
- Jennifer Powell - J.D. (West Virginia University); M.S.W. (West Virginia University)

Law Library (co-interim)
- Mark Podvia - J.D. (The Dickinson School of Law); M.A. (Penn State University); M.S. (Clarion University)
- Jennifer Powell - J.D. (West Virginia University); M.S.W. (West Virginia University)

Center for Law and Public Service
- Keith Walton - B.S. (West Virginia University)

Law School Technology
- Scott Fletcher - M.S. (West Virginia University)

ASSOCIATE DIRECTOR
- Alice Foley - J.D. (West Virginia University)

ASSISTANT DIRECTORS
- Rosalind Lister - M.S.Ed. (Purdue University)
- Elissa Momen - M.A. (West Virginia University)

ASSISTANT REGISTRAR
- Kristi Wright - M.S. (Fairmont State University)

FINANCIAL AID
- Wendy Ridenour - B.A. (West Virginia University)

FACULTY

PROFESSORS OF LAW
- Robert M. Bastress - J.D. (Vanderbilt University); LL.M. (Temple University)
  John W. Fisher, II Professor of Law
- Thomas C. Cady - LL.B. (University of Texas); LL.M. (Georgetown University)
- Vincent P. Cardi - J.D. (Ohio State University); LL.M. (Harvard University)
  Bowles Rice Professor of Law
- Charles R. DiSalvo - J.D. (University of Southern California)
  Woodrow A. Potesta Professor of Law
- James R. Elkins - J.D. (University of Kentucky); LL.M. (Yale University)
- Atiba R. Ellis - J.D. (Duke University)
- James J. Friedberg - J.D. (Harvard University)
  Hale J. and Roscoe P. Posten Professor of Law
- David C. Hardesty, Jr. - J.D. (Harvard University)
  President Emeritus, West Virginia University (1995-2007)
• David L. Krech - J.D. (Cornell University)
  Director of Legal Research and Writing; Director of Appellate Advocacy

• Anne M. Lofaso - J.D. (University of Pennsylvania); Ph.D. (University of Oxford)
  Arthur B. Hodges Professor of Law

• Joyce E. McConnell - J.D. (Antioch School of Law); LL.M. (Georgetown University Law Center)
  WVU Provost and Vice President for Academic Affairs; Thomas R. Goodwin Professor of Law

• Majorie A. McDiarmid - J.D. (Columbia University); LL.M. (Harvard University)
  Steptoe and Johnson Professor of Law and Technology; Director of the Clinical Law Program

• Patrick C. McGinley - J.D. (Duke University)
  Charles H. Haden II Professor of Law

• James A. McLaughlin - J.D. (Ohio State University)
  Robert L. Shuman Professor of Law

• Dale P. Olson - J.D. (University of Minnesota); LL.M. (Yale University)

• Alison Peck - J.D. (Yale Law School); LL.M. (University of Arkansas)

• William Rhee - J.D. (Northwestern University)

• John E. Taylor - J.D. (University of North Carolina); Ph.D. (Stanford University)
  Jackson Kelly Professor of Law

• Hollee S. Temple - J.D. (Duke University)

• Matthew Titolo - J.D. (University of California); Ph.D. (University of California)

• Shine (Sean) Tu - J.D. (University of Chicago); Ph.D. (Cornell University)

• James Van Nostrand - J.D. (University of Iowa); LL.M. (Pace University)

ASSOCIATE PROFESSORS OF LAW

• Valena Beety - J.D. (University of Chicago)
  Deputy Director of the Clinical Law Program; Chair of the West Virginia Innocence Project

• Valarie Blake - J.D. (University of Pittsburgh)

• Jessica A. Haught - J.D. (West Virginia University)

• Lynne Maxwell - J.D. (Duquesne University School of Law)

• Jesse Richardson - J.D. (University of Virginia)

• Camille M. Riley - J.D. (St. Louis University)

• Kirsha Trychta - J.D. (Duquesne University)
  Director of Academic Excellence

• Joshua Weishart - J.D. (University of California, Berkeley School of Law)

• Elaine W. Wilson - J.D. (Boston University)

LAND USE AND SUSTAINABLE DEVELOPMENT CLINICIANS

• Jared Anderson - J.D. (Catholic University of America)
  Supporting Land Use Attorney

• Christy Burnside DeMuth - M.S. (Indiana University of Pennsylvania)
  Land Use Planner

• Nathan Fetty - J.D. (West Virginia University)
  Managing Attorney

• Katherine Garvey - J.D. (University of Missouri-Kansas City); LL.M. (Vermont Law School)
  Director of the Land Use and Sustainable Development Clinic

• Jason Walls - J.D. (West Virginia University)
  Land Conservation Attorney

VISITING FACULTY

• Michael Blumenthal - J.D. (Cornell University)

• Barton Z. Cowan - J.D. (Harvard University)

• Larry Starcher - J.D. (West Virginia University)

• Suzanne M. Weise - J.D. (West Virginia University)
  Director of the Child and Family Law Clinic

PROFESSORS EMERITI

• Gerald G. Ashdown - J.D. (University of Iowa)
Degree Designation Learning Goals

DOCTOR OF JURISPRUDENCE (JD)
The J.D. program forms students' professional identities as lawyers and provides students with the core legal knowledge and practical skills to pass the bar exam and to serve their clients competently and ethically.

In developing professional identity and values, we seek to produce students committed to professional excellence, justice, leadership, public service, global engagement, and lifelong learning. Our graduates are trained to be legal problem solvers who possess a solid grasp of the substantive and procedural law of their chosen fields, understand their professional responsibilities and ethical obligations, and have the varied skills needed for successful practice, including: legal analysis, legal writing, legal research, factual investigation, client counseling, negotiation, drafting, and advocacy.

MASTER OF LAWS (LLM)
Our LL.M. programs offer post-J.D. students an opportunity to deepen their subject-matter expertise and skills in particular areas of the law.

Energy and Sustainable Development Law
The LL.M. in Energy & Sustainable Development Law provides lawyers with a deep and broad knowledge of law and policy in the critical areas of energy, environmental protection, and sustainable development. Students will master these areas through course work, writing projects, and a variety of experiential learning opportunities. LL.M. graduates will have the skills necessary to work as lawyers serving energy companies, investors, utilities, manufacturing companies, lawmakers, policymakers, regulators, land use professionals, and environmental organizations.

Forensic Justice
The LL.M. in Forensic Justice provides working lawyers with a solid grounding in the theory and practice of the forensic sciences and their application in the courts. LL.M. students will gain an understanding of scientific method and of critical areas of forensic science including biological and chemical evidence, impression and trace evidence, and statistics and probability. In addition, students will gain practical experience in working with this evidence in a courtroom setting. The degree will be especially valuable for prosecutors and criminal defense attorneys, enabling those on both sides of the criminal process to ensure that forensic science serves the ultimate goal of justice.

ADMISSIONS - DOCTOR OF JURISPRUDENCE

FIRST-TIME ADMISSIONS
The following are the essential requirements to apply to law school:

- A bachelor's degree from an accredited four-year institution
- Completion of the Law School Admissions Test (LSAT)
- Application for admission / Credential Assembly Service (CAS) report

For additional information, please visit the College of Law Admissions (http://www.law.wvu.edu/admissions) homepage.

TRANSFER ADMISSIONS
A transfer student is a student who has taken some or all of his or her first-year curriculum at another law school and is admitted to earn a J.D. degree at the West Virginia University College of Law. The College of Law accepts transfer students only from other law schools accredited by the American Bar Association. The College will not accept transfer applicants from law schools that do not award letter grades (or their numerical equivalent) during the
first year. All candidates who transfer to the College of Law from another ABA-accredited law school must satisfactorily complete courses aggregating at least forty-five credit hours at the College of Law. In addition, the last thirty credit hours for transfer students must be earned at the College of Law.

The College of Law will accept transfer credits only for courses where the student earned a grade of C or better. In exceptional circumstances, the Associate Dean for Academic Affairs may approve the transfer of a small number of pass/fail credits. The Associate Dean will determine the total number of credit hours that will transfer; only in exceptional cases will credit be given for more than thirty-two credit hours. The Associate Dean will also determine whether particular courses taken at another law school satisfy specific course requirements at the College of Law. Graded credits at other law schools that transfer to the College of Law will be entered on the student’s College of Law record as pass/fail credits and hence will not affect the student’s College of Law grade point average.

In order to graduate, all transfer students must obtain a cumulative grade point average of 2.30 or better on courses taken at the College of Law. Transfer students are not eligible for election to Order of the Coif at the West Virginia University College of Law.

The deadline for transfer applications is **July 1**. The West Virginia University College of Law has established the following guidelines for the Enrollment Management Committee to use in reviewing transfer applications.

- In reviewing applications for advanced standing, the Enrollment Management Committee will give preference to West Virginia residents.
- Applicants must have completed at least one academic year of studying or its equivalent at the institution from which transfer is being sought. For admission purposes, one year of study or its equivalent is equal to a minimum of twenty-eight credit hours of coursework. The twenty-eight credit hours should ideally include the following coursework, but we will consider transfer applicants who have a substantial number of the listed courses:
  1. Civil Procedure I & II
  2. Contracts I
  3. Torts I
  4. Constitutional Law
  5. Criminal Law
  6. Property I
- Applications from students seeking to transfer from schools that are not accredited by the ABA will not be accepted under any circumstances. (The applicant may apply as a first-year student.)
- Applications for transfer to the College of Law for the second year will be considered by the Committee on the basis of the following:
  1. The size of the returning second-year class.
  2. The applicant’s grades and/or class rank at her/his law school. Applicants from law schools who do not provide either a GPA or class rank for 1L students will not be considered for transfer.
  3. Whether the applicant would have been admitted to the College of Law in the first year had the applicant applied.
  4. The academic strength of the law school attended by the applying student, including whether it is accredited by the AALS. (ABA accreditation is required.)
  5. Recommendation(s) from a law professor in whose class the applicant was enrolled. (At least one is required.)
  6. Residency of the applicant.
  7. All of those facts, performance records, recommendations, and other matters that the Committee normally considers for applicants to the first-year class, including everything that might implicate the student’s fitness for the practice of law.
  8. Any other activities and experiences of the applicant occurring since the student began law school.
  9. Any other information regarding the applicant that may be considered relevant to success in law school.
- In addition to the aforementioned criteria, applicants must meet the requirements set forth below.
  1. Applicants must conform to all other relevant criteria relating to first-year entering students as found in the admission policy of the West Virginia University College of Law.
  2. Applicants must submit a certified official transcript of their first-year law school grades and class ranking. If class ranking from the law school is unavailable, the applicant must submit sufficient information about grades from the law school attended to make a reasonable estimation of class ranking. No one will be admitted for transfer without class rank (or its reasonable equivalent) based on a full year of law school attendance.
  3. Applicants must provide a letter of good standing from the Dean of the law school (or his or her designee) from which the student is transferring.
  4. Applicants must submit a copy of their most recent LSAC Credential Assembly Service (CAS) report including a certified transcript of undergraduate school grades and the LSAT writing sample.
  5. Applicants must fully explain any ethical or other problems with admission that may appear in the file.
  6. Applicants must submit the completed file to the Admission Office by July 1 in order to be considered for transfer.
In considering applications for admission from individuals with credits or degrees from foreign institutions, the Enrollment Management Committee shall have the authority to make any of the below stated decisions with regard to the applicant:

1. The Committee may admit the applicant as a first-year entering student.
2. The Committee may admit the applicant with advanced standing by granting credit for specific course work completed at another institution.
   (AALS executive Committee Regulations 2.8 and 2.9 prescribe limitations on the award of advanced standing.)
3. The Committee may admit the applicant as a special student for the purposes of auditing courses or transferring course work to another institution.
4. The Committee may deny admission to the applicant.

**TRANSIENT ADMISSIONS**

The West Virginia University College of Law accepts transient students only from other law schools accredited by the American Bar Association. A transient student is one who has taken or will take most of his or her work toward a J.D. at another ABA-approved law school and will earn a degree from that institution. Transient students are permitted to earn some credits toward that J.D. while in temporary residence at the West Virginia University College of Law, provided that they obtain permission from their school and the Associate Dean for Academic Affairs.

**ADMISSIONS - LL.M. (MASTER OF LAWS)**

**ENERGY AND SUSTAINABLE DEVELOPMENT**

WVU Law's LL.M. in Energy and Sustainable Development Law will be a source for a high-quality professional legal education and a home for thought leaders in the areas of energy and sustainable development.

Minimum admission requirements for the program are as follows:

- A J.D. from an ABA (American Bar Association) accredited school.
- A J.D. grade point average of at least a 3.0 (on a 4.0 scale) or other demonstrated indicia of likelihood of success.
- A demonstrated interest in or commitment to the fields of energy and/or sustainable development.

For additional information, please visit the LL.M. in Energy & Sustainable Development Law (http://law.wvu.edu/energy-llm) homepage.

WVU College of Law also offers students an opportunity for a dual J.D./LL.M in Energy and Sustainable Development Law. For more information about participating as a dual degree student, please visit the J.D./LL.M homepage. (http://www.law.wvu.edu/academics/academic-programs/dual-degree-programs/jd-llm)

**FORENSIC JUSTICE**

Minimum admission requirements for the LL.M. in Forensic Justice are as follows:

- A J.D. from an ABA (American Bar Association) accredited school or equivalent.
- A grade point average of at least a 3.0 (on a 4.0 scale) or other demonstrated indicia of likelihood of success.
- A demonstrated interest or commitment to the fields of science, forensic evidence, and law.

Applicants may include newly graduated J.D. students, professionals (prosecutors, defense attorneys, judges) returning for study after years of practice, or qualified international students.

For additional information, please visit the LL.M. in Forensic Justice (http://law.wvu.edu/forensic-llm) homepage.

**Student Catalog Policy**

All students at West Virginia University College of Law must abide by the content of the student catalog and the Student Code of Professional Responsibility. You are responsible for knowing and understanding the rules and policies contained in those documents. You are governed by the rules and policies of the catalog for the current academic year, including any addenda to the catalog published on the College of Law's website. The student catalog is revised each academic year. Students will be notified of any significant change in school policies during the academic year. You may consult the Assistant Registrar for the College of Law and/or the Associate Dean for Academic Affairs at any time for advice as to any policy contained in the student catalog.

**Frequently Asked Questions**

- **What academic honors can I earn while in law school?**
  See 'Academic Policies and Procedure - Honors' of the College of Law catalog for additional information.

- **What does it mean to be on academic probation?**

- **What student organizations can I join at the law school?**
  Many College of Law organizations welcome all students who are interested, while others require students to be elected or chosen. See ‘Student Organizations, Guidelines, and Services - College of Law Organizations - Recognized College of Law Student Organizations’ section of the College of Law catalog or visit the ‘Student Organizations (http://studentengagement.wvu.edu)’ homepage.

- **What is the law school's grade point average system?**
  See the ‘Academic Policies and Procedure - Grading Information and Procedures - Grades’ section of the College of Law catalog.

- **How can I change my address with WVU so I will receive my financial aid check?**
  Addresses are updated online via WVU Portal. Once there, click on the ‘Personal Information’ link. Also, visit the ‘Current Students (http://registrar.wvu.edu/current_students/#add)’ link on the OUR homepage (http://registrar.wvu.edu) for additional information.

- **What is DegreeWorks?**
  DegreeWorks (http://registrar.wvu.edu/dw) is an online check sheet (audit) for students to review and monitor their progress toward degree completion. It organizes academic coursework into blocks of requirements to help easily identify courses completed and what courses are still needed in order to complete your degree. For additional information, including how to log in to DegreeWorks, see the ‘Academic Policies and Procedures - Graduation’ section of the College of Law catalog.

- **Whom should I see if I have a question regarding academic matters at the College of Law?**
  For academic matters, please see the Assistant Registrar for the College of Law (http://www.law.wvu.edu/faculty-staff/administration) or the Associate Dean for Academic Affairs.

- **Whom should I see if I have a non-academic or personal matter that pertains to my law school experience?**
  For such matters, see the College of Law's Assistant Dean for Student Life.

- **What is my professor's phone number, e-mail address, etc.?**
  See the ‘Faculty (http://law.wvu.edu/faculty-staff)’ link on the College of Law (http://www.law.wvu.edu) homepage. Many professors also list their contact information on their class syllabi.

- **Whom do I call if I am sick and must miss class?**
  See the ‘Academic Policies and Procedures - Academic Policies - Missing Class Due to Illness’ section of the College of Law catalog. Also, for treatment information, see the ‘Student Organizations and Services - University Services - Health Services’ section of the College of Law catalog.

- **What are midterm and/or final exam numbers?**
  Midterm and final exam numbers are assigned to students each semester by the Assistant Registrar for the College of Law. In many classes, these numbers are used on papers and exams in place of student names so that the professors can grade anonymously. Students are routinely notified of information concerning midterm exam and final exam numbers each semester.

- **If I'm traveling for competitions with the College of Law, what do I do?**
  If the completion has been approved as part of the student organization's budget, then check with the Assistant Dean for Student Life. Student travel expenses must be approved in advance in order to be reimbursed.

- **How do I register for classes?**
  Registration for classes occurs in STAR. Students are routinely notified of information concerning registration each semester. For additional information, please review the Student Services Guide, located on the College of Law website on the ‘Course Schedule and Registration Information’ link under the ‘Academics’ tab.

- **Where can I find guidance about choosing courses?**
  The College of Law J.D. curriculum is separated into required courses and electives courses. For required courses, see ‘Academic Programs - Doctor of Jurisprudence - First-Year Curriculum & Required Courses after the First-Year Curriculum.’ For elective courses, the College of Law publishes a ‘Curriculum Opportunities and Options (http://www.law.wvu.edu/r/download/184421)’ guide. This guide organizes courses into specific career tracks.

- **When are classes canceled, and how do I find out?**
  It is rare that the College of Law will cancel classes or activities due to weather or other events. Decisions regarding class cancellations are made at the university level by the Provost's Office. In the event classes are canceled or delayed because of weather or other reasons, the university will issue a notice by morning. If you receive no notice, assume that there are no cancellations for that day. Sign up to receive these notices via phone by going to the 'WVU Alert' homepage (http://emergency.wvu.edu/alert).

- **Where can I find the Code of Professional Responsibility (Honor Code)?**
See the 'Professional Responsibility - WVU College of Law Student Code of Professional Responsibility' section of the College of Law catalog.

- **Where can I find out about careers, jobs, and summer internships?**
  See the 'Student Organizations and Services - College of Law Services - Meredith Career Services Center' section of the College of Law catalog or visit the College of Law's Meredith Career Services Center (http://law.wvu.edu/career-services) homepage.

- **What do I need to do in my 3L year to apply to take the bar exam the following summer?**
  In the fall of your 3L year, visit the bar examiners homepage in the state where you plan to practice. The application must be started and finished in a timely manner to be able to take the exam in the summer. Some applications are due in the fall of the 3L year. The application to practice includes a character and fitness review.

- **What do I need to do in my 3L year to prepare to take the bar exam?**
  1. Take the Multistate Professional Responsibility Exam (MPRE) in the spring of second year or fall of third year (after you have taken the class in Professional Responsibility),
  2. determine what is going to be on your state's July exam,
  3. explore early and summer prep programming that will prepare you for that exam (e.g. classes at the law school and state-specific commercial programming for the summer) and
  4. connect with the Academic Excellence Center.
  In short, choose a program of preparation, and realize that your program of preparation could begin as early as the 6th semester of law school if you choose to participate in the school's early-start bar preparation class.

- **Upon graduation, how do I assure that I pass the exam the first time I take it in July?**
  Focus on and complete the summer bar exam preparation program of your choosing. Do not work unless it is absolutely necessary because studying for the exam is a full-time job.

### Academic Programs

**A. DOCTOR OF JURISPRUDENCE**

1. Curriculum Requirements
2. First-Year Curriculum
3. Required Courses after the First-Year Curriculum
4. Upper-Level Electives
5. Areas of Emphasis
6. Part-Time Program

**B. DUAL-DEGREE PROGRAMS**

5. Areas of Emphasis (p. 512)
6. Part-Time Program (p. 516)

#### A.1 CURRICULUM REQUIREMENTS

Students at the West Virginia University College of Law must earn 91 credit hours with a cumulative grade point average (GPA) of at least 2.30 in order to graduate. Students must maintain a cumulative GPA of at least a 2.30 after the second semester to remain in good academic standing. The first-year
curriculum is a fixed set of courses taken by all students. Students are largely free to shape their own courses of study during the last two years of law school, subject to a small number of upper-level requirements.

Minimum GPA of 2.3 or higher required.

**First-Year Required Courses**

Total Hours 91

**A.2 FIRST-YEAR CURRICULUM**

The first-year curriculum is a required set of courses designed by the faculty to give new law students an introduction to the fundamentals of legal practice. You will be assigned to a section of each required course. The first-year curriculum covers three areas:

- **Private Law** governs the legal relationships and the resolution of disputes among private persons and entities. The Private Law courses you will take are Torts (civil wrongs), Contracts, and Property.

- **Public Law** concerns governmental regulation of private persons and entities. The Public Law courses you will take are Criminal Law, Legislation & Regulation, and Constitutional Law.

- **Practice** courses teach procedural law and the skills of legal research, reasoning, and writing. The Practice courses you will take are Civil Procedure (both Jurisdiction and Rules), two semesters of Legal Reasoning, Research, and Writing, and Introduction to Legal Research.

**Legal Reasoning, Research, and Writing** (four credits). First-year students must pass both LRRW I and LRRW II with an average grade of C (2.0) or better over the two semesters in order to satisfy the Legal Reasoning, Research, and Writing (LRRW) course requirement. The vast majority of students will satisfy the requirement by making grades of C or better in both semesters of LRRW. However, a student who makes a C- in one semester must make a C+ or better in the other semester to obtain a C average; a student who makes a D+ in one semester must make a B- or better in the other semester to obtain a C average; a student who makes a D in one semester must make a B or better in the other semester to obtain a C average. A student who fails one or both semesters of LRRW must repeat the course.

Students who fail to obtain an average of C or better in the first-year LRRW program have a second opportunity to satisfy the LRRW requirement in a second taking of the two-semester, first-year sequence of LRRW I and LRRW II. (In some years, an LRRW III class will be offered in the fall semester for such students to take in lieu of retaking LRRW I and II.) Students who fail to make a C or better in their second attempt to satisfy the LRRW requirement will be dismissed from the College of Law. For students who make a C or better on the second attempt, both grades will count in the student's law school GPA, but the student will receive only four total hours of credit toward law school graduation.

No student will be allowed to drop the required first-year LRRW course. Students needing to decelerate during the first year of law school must drop another required course. There is one possible exception to this policy: if a student receives an F in LRRW I, the student may drop LRRW II with the permission of the Associate Dean for Academic Affairs. Part-time students must take LRRW during their first year of law school.

Successful completion (an average grade of C or better) of the first-year LRRW program is a prerequisite for taking Appellate Advocacy, any seminar, or any clinic. This prerequisite may not be waived. Students will receive a detailed policy handbook at the beginning of the LRRW course; all policies will be in effect for the duration of the course.
A.3 REQUIRED COURSES AFTER THE FIRST-YEAR CURRICULUM

Appellate Advocacy: Students must take Appellate Advocacy and receive a C or higher in the course to graduate.

Seminar Requirement (two-three credits, depending on length of class meetings and paper length) from a menu of seminars. Seminars are specifically noted by the letters “Sem” in the course title and are numbered as “LAW 688, 689 or 794.” Seminars have a common structure: small-class discussions geared toward the production of a substantial (i.e. at least 8,000 words (~ twenty-five pages]) written product supported by extensive research. Typically, the research seminar aims at the production of a law-review style research paper of publishable quality. Seminars may aim at other written products, such as draft legislation or jury instructions, so long as these products are accompanied by papers urging their adoption by the appropriate lawmakers. Enrollment is limited to fifteen students in each seminar. Two-hour seminar courses must meet as a group for no less than 10 weeks and no less than 110 minutes per week. Three-hour seminar courses must meet as a group for no less than 10 weeks and no less than 165 minutes per week. Students must obtain a grade of C or better to satisfy the seminar requirement. Independent studies and externships do not satisfy the seminar requirement.

Perspective Requirement. The perspective requirement reflects the College of Law’s conviction that legal education should expand students’ horizons by connecting their studies to the traditions of the liberal arts (i.e., the humanities, social sciences, and natural sciences). Perspective courses, therefore, examine law and lawyers primarily from points of view that are significantly different from the doctrinal and policy analysis taught in standard upper-level courses on various areas of practice. Perspective courses look across doctrinal boundaries and engage students in conversations about the relationships between law and other disciplines; explore the nature of the American legal system by contrasting it with other legal systems; and discuss the ways in which law and lawyers both shape and are shaped by the liberal arts and wider culture.

Students must take one perspective course in order to graduate. Some seminars satisfy the perspective requirement, but students cannot count one perspective seminar as simultaneously satisfying both the perspective and seminar requirements. (In other words, there is no “double-dipping” on the perspective and seminar requirements.) This means that a student can satisfy the perspective and seminar requirements by

(a) taking one perspective class and one research seminar (which may or may not be a perspective), or

(b) taking two research seminars, at least one of which is also a perspective.

In addition, students who complete either the joint M.B.A. or joint M.P.A. program at the time of earning the J.D. are deemed to have satisfied the perspective requirement.

The following courses satisfy the perspective requirement:

A.4 UPPER-LEVEL ELECTIVES

Apart from the small number of upper-level requirements already described, students choose from a wide variety of upper-level electives to create their courses of study over the final two years of law school. A list of all the permanent law school courses with their descriptions can be found elsewhere in this academic catalog. (See “Courses.”) The law school also offers additional courses on a temporary basis that are not included in this catalog.

With so many choices, students may wish for guidance about how to choose the courses best suited to their goals and interests. Toward that end, each spring the Associate Dean for Academic Affairs meets with rising 2L students and publishes on the law school website a booklet entitled Curriculum Opportunities and Options: An Informal Guide to Planning Your Last Two Years of Law School. For the latest version, go to the "Course Schedules and Student Resources (http://www.law.wvu.edu/academics/course-schedule-and-student-resources)" link on the College of Law homepage. This booklet includes, among other things, advice about curricular planning, lists of key courses for various areas of practice and when they are typically offered, and information about subjects tested on the bar exam. Students with questions about choosing courses that are not addressed in the booklet should consult faculty in their areas of interest and/or the Associate Dean for Academic Affairs.

In addition, the College of Law website contains a "Course Classifieds (http://www.law.wvu.edu/academics/course-schedule-and-student-resources/course-classifieds-fall-2014)" page where professors may post information about courses to be offered in the next semester. Typically, "course classifieds" listings for a given semester begin to appear a few weeks before registration for that semester.
A.5 AREAS OF EMPHASIS

An Area of Emphasis (also informally called a "Concentration") is a course of study that enables students to develop skills and competency in a particular area of the law. A student who satisfies the requirement of an Area of Emphasis will have that Area of Emphasis listed on the official transcript. The College of Law has four Areas of Emphasis: (1) Energy and Sustainable Development Law, (2) International Law, (3) Labor and Employment Law, and (4) Public Interest Law.

ENERGY AND SUSTAINABLE DEVELOPMENT LAW AREA OF EMPHASIS

The Energy and Sustainable Development Law Area of Emphasis is intended to educate the next generation of lawyers who will work in and shape the fields of energy, environmental, and sustainable development law, by providing an opportunity to learn the applicable laws and regulations in this area, consider policy issues through written work, and obtain practical skills applicable in this area through an experiential learning requirement.

Course Requirements. In order to satisfy the requirements of this Area of Emphasis, a student must have (1) all required first-year courses; (2) all required core courses; and (3) seventeen (17) total credit hours from a combination of the required courses, designated elective courses, and the experiential learning course (see below). Note: No more than five credits of the 17 credits can come from clinic or an externship.

Writing Requirement

Experiential Learning

Extra/Co-Curricular Activities

Total Hours

17

Writing Requirement. Students must produce a written paper or court document of no less than 25 pages on a topic related to energy, environmental, and/or sustainable development law. A student may fulfill this requirement through any of the following methods:

1. Law Review Note, with approval of the Area of Emphasis administrator and with a faculty member as advisor.
2. A Court Document, e.g. Amicus Brief or Memorandum of Law (real or moot), with the approval of the Area of Emphasis administrator and with a faculty member as advisor.
3. Independent study overseen by an Area of Emphasis faculty member.
4. Qualifying paper in any elective course listed above.
• The writing requirement requires input and approval from a faculty member and the Area of Emphasis administrator, even if the writing was completed outside a formal class or independent study arrangement. A student may fulfill the writing requirement through an alternative method with the consent of the Area of Emphasis administrator.

Experiential Learning. Students must meet the following experiential learning requirement of no less than 3 credits (no more than 5 credits from participation in a clinic count toward the 17 credit requirement). A student may fulfill this requirement through any of the following methods:

1. Land Use and Sustainable Development Clinic
2. Externship approved per catalog, with approval of the Area of Emphasis administrator
3. Other clinic or simulation course, with approval of the Area of Emphasis administrator

• A student may fulfill the experiential learning requirement through an alternative method with the consent of the Area of Emphasis administrator.

Extra Curricular or Co-Curricular Activity Requirement. Students must also meet the following requirement:

1. Ten hours of related extracurricular or co-curricular activities, such as active participation in the Energy Law Society or Environmental Law Society, attending relevant meetings, hearings or speakers, administrative or other active participation in related events (e.g., moot court, symposia).

INTERNATIONAL LAW AREA OF EMPHASIS

The International Law Area of Emphasis is intended to educate the next generation of lawyers who will work in careers related to international law and its many subspecialties (in both public international law and its many subspecialties (in both public international law and private international law). The Area of Emphasis will provide students with robust and varied opportunities to learn and develop skills in international law-related practice areas.

Course Requirements. In order to satisfy the requirements of this Area of Emphasis, a student must have (1) all mandatory first-year requirements; (2) all required core courses; and (3) seventeen (17) total credit hours from a combination of the required courses, designated elective courses, and the experiential learning course (see below). Note: No more than five (5) credits of the seventeen (17) credits can come from clinic or an externship.

Writing Experiential Learning Extra/Co-Curricular Activities Total Hours

17 Additional courses may be added with the consent of the Area of Emphasis administrator.

Under exceptional circumstances, a student may fulfill the study abroad requirement through an alternative method with the consent of the Area of Emphasis administrator.
Writing Requirement. Students must engage in research and produce a written paper or court document of no less than 25 pages on a topic related to international law. This requirement can be satisfied by satisfactory completion and submission of a written document that falls within any of the following categories:

1. Qualifying paper in any designated elective course or seminar.
2. Independent Study approved per WVU College of Law catalog and overseen by an Area of Emphasis faculty member.
3. Law Review Note, with approval of the Area of Emphasis administrator and with a faculty member as advisor.
4. A Court Document, e.g. Amicus Brief or Memorandum of Law (real or moot) with the approval of the Area of Emphasis administrator and with a faculty member as advisor.

The writing requirement requires input and approval from a faculty member and the Area of Emphasis administrator, even if the writing was completed outside a formal class or independent study arrangement. A student may fulfill the writing requirement through an alternative method with the consent of the Area of Emphasis administrator.

Experiential Learning Requirement. Student must meet the following experiential learning requirement of no less than two (2) credits, with no more than five (5) credits from a clinic counting towards the seventeen (17) credit requirement. A student may fulfill this requirement through any of the following methods:

- Participation in at least one year of the College of Law's Jessup International Moot Court team (LAW 652)
- International Organization Externship (full- or part-time)
- Government Agency Externship (full- or part-time - must be related to an area of international, comparative, or transnational law)
- Immigration Clinic

Note: Any externship placements for the International Law and Practice Area of Emphasis must comply with the general rules of the externship program.

A student may fulfill this Area of Emphasis requirement through an alternative method with the consent of the Area of Emphasis administrator.

Extra Curricular or Co-Curricular Activity Requirement. Students must also meet the following requirements:

Ten hours of related extracurricular or co-curricular activities, such as active participation in the International Law Students Association, by attending relevant meetings, hearings or speakers, administrative or other active participation in the international law-related events (e.g., symposia).

Foreign Language

Students are strongly encouraged to gain competency in a foreign language in conjunction with pursuing this Area of Emphasis.

LABOR AND EMPLOYMENT LAW AREA OF EMPHASIS

The Labor and Employment Law Area of Emphasis is intended to educate the next generation of lawyers in West Virginia and beyond who will work in and shape the fields of labor and employment law by providing an opportunity to learn the applicable laws and regulations in the area, consider policy issues through a written work, and obtain practical skills applicable in the area through an experiential learning requirement.

Course Requirements. In order to satisfy the requirements of this Area of Emphasis, a student must have (1) all required first-year courses; (2) all mandatory core courses; and (3) seventeen (17) total credit hours from mandatory core courses, designated elective courses, and an experiential learning course (described below). Note: No more than five (5) credits of the seventeen (17) credits can come from clinic or an externship.

Writing Requirement. Students must produce a written paper or court document of no less than 25 pages on a topic related to labor law, employment law, employment discrimination law, benefits law, and/or comparative/international work law. A student may fulfill this requirement through any of the following methods:

1. Qualifying paper in any designated elective course.
2. Independent Study approved per WVU College of Law catalog and overseen by an Area of Emphasis faculty member.
3. Law Review Note, with approval of the Area of Emphasis administrator and with a faculty member as advisor.
4. A Court Document, e.g. Amicus Brief or Memorandum of Law (real or moot) with the approval of the Area of Emphasis administrator and with a faculty member as advisor. For example, a student may fulfill this requirement by participating in New York Law School’s Wagner Moot Court Competition as part of the Moot Court Team.

Experiential Learning Requirement. Student must meet the following experiential learning requirement of no less than three (3) credits (no more than 5 credits from participation in a clinic count toward the seventeen (17) credit requirement.) A student may fulfill this requirement through any of the following methods:

1. Externship in a labor/employment practice setting approved by the Area of Emphasis administrator and complying with the general rules and policies governing externships
2. Entrepreneurship Clinic (LAW 650 & LAW 651)
3. Other clinic or simulation course, with approval of the Area of Emphasis administrator

Area of Emphasis students in the Entrepreneurship Clinic or any other clinic approved by the Area of Emphasis administrator shall make every effort to work on labor and employment matters within these clinic placements.

A student may fulfill the experiential learning requirement through an alternative method with the consent of the Area of Emphasis administrator.

Extra Curricular or Co-Curricular Activity Requirement. Student must also meet the following requirements:

1. Ten hours of related extracurricular or co-curricular activities, such as active participation in the Labor Law Society or ADR Society, attending relevant meetings, hearings or speakers, administrative or other active participation in the work-law related events (e.g., moot court, symposia).

PUBLIC INTEREST LAW AREA OF EMPHASIS

The objective of the Area of Emphasis in Public Interest Law is to prepare students to work to advance the common good of the general public using the legal process through the representation of individuals and organizations who might otherwise be unrepresented.

Course Requirements. In order to satisfy the requirements of this Area of Emphasis, a student must have (1) one required course; and (2) seventeen (17) total credit hours from one required course, designated elective courses, and the credits allowed for the experiential learning course (see below).

Writing Requirement. Students must produce a written paper of no less than 25 pages on a topic related to public interest law. A student may fulfill this requirement through any of the following methods:

1. Law Review Note, with approval of the Area of Emphasis administrator and with a faculty member as advisor.
2. Qualifying paper in any elective course listed above.
3. Qualifying paper in a non-designated elective course if the topic involves matters of public interest, with the advance approval of the Area of Emphasis administrator.
4. Independent study approved per the catalog and with the advanced approval of the AOE administrator.
5. Qualifying alternative approved by AOE administrator.

Experiential Learning. Students must meet the following experiential learning requirement of no less than 3 credits. No more than 7 credits from participation in a clinic shall count toward the 17 credit hour requirement for the concentration. A student may fulfill this requirement through any of the following methods:

1. Any West Virginia University College of Law clinic; provided, however, that any student in clinic shall make every effort to work on matters that further the common good using the legal process through the representation of individuals and organizations who might otherwise be unrepresented.
2. Externship approved per the catalog and approved by the Area of Emphasis administrator.

Pro-Bono Requirement. Students must also meet the following requirement:

1. Twenty-five pro-bono hours over the student’s three years at the College of Law (which may include, but is not limited to, participation in Public Interest Advocates).

A.6 PART-TIME PROGRAM

Full-time students average just over fifteen hours per semester in order to amass ninety-one credits in six semesters. Students taking significantly fewer hours per semester will take longer to finish their degrees and are considered part-time students at the College of Law. (Note, however, that in the eyes of the university, graduate or professional students taking nine hours or more are charged full tuition and fees. Thus, some “part-time” students will still pay the same tuition and fees each semester as their full-time colleagues.)

Part-time students are subject to the same graduation requirements in terms of total credit hours (ninety-one credits), cumulative grade point average (2.30), and specific required courses. Per ABA requirements, part-time students have to complete all graduation requirements within seven years from the date of initial enrollment.

Students Who Wish to Begin Law School as Part-Time Students. The Enrollment Management Committee selects first-year part-time students from students already admitted to the Law School. The total size of the entering class is not increased. Written requests for part-time status are required, and selection is based on objective indicators of the need to attend on a part-time basis. Students who wish to become part-time students after starting law school but before completing the first-year curriculum must consult with the Associate Dean for Academic Affairs as indicated in this catalog’s section on Academic Policies and Procedures. Students who have completed the first-year curriculum (see “First-Year Curriculum (p. 509)” above) may become part-time students by advising the Associate Dean for Academic Affairs of that intention at the beginning of the semester.

First-Year Curriculum. Part-time students must take both semesters of LRRW and the fall Introduction to Legal Research course in their first year of law school. Typically, part-time students take two courses in addition to LRRW/Legal Research in each semester of the first year, then take the rest
of the first-year curriculum in their second year of studies. As a general rule, part-time students may not enroll in upper-level courses until they have completed the entire first-year curriculum. Exceptions to this rule may be granted for good cause by the Associate Dean for Academic Affairs.

Scheduling of Classes. Part-time students must consult the Associate Dean for Academic Affairs in scheduling.

Probation and Dismissal. Students entering the part-time program during the first-year curriculum are subject to the probation and dismissal rules applicable to full-time students who have completed the first-year curriculum only when the part-time students have completed the entire first-year curriculum. Part-time students do not receive a class rank until they have completed the entire first-year curriculum. In all other respects, part-time students and full-time students attending more than six semesters are subject to probation and dismissal rules substantially equivalent to those applicable to full-time students.

B. DUAL-DEGREE PROGRAMS

1. Masters of Business Administration (p. 517)
2. Masters of Public Administration (p. 517)
3. J.D./LL.M in Energy and Sustainable Development Law (p. 518)

Students may enroll in an approved joint degree program with another College of the University. At present, there are two such programs: a joint J.D./M.B.A. (Masters of Business Administration) and a joint J.D./M.P.A. (Master of Public Administration).

B.1 MASTERS OF BUSINESS ADMINISTRATION (M.B.A.)

A J.D./M.B.A. student may earn law school credit pursuant to the dual degree requirements approved by the faculties of the College of Law and the College of Business and Economics and published to students admitted to that program. (See below for program requirements.) J.D./M.B.A. students receive twelve credits toward the J.D. degree if the M.B.A. degree is awarded concurrently with the J.D. degree, which means that at least 79 J.D. credit hours are required. Grades earned in business school classes do not affect the cumulative law school GPA. Professor Jena Martin is the College of Law contact person for the J.D./M.B.A. program.

Required M.B.A. Courses (BADM 600-level coursework)

| Required M.B.A. Courses (BADM 600-level coursework) | 12 |

*The College of Law’s perspective requirement is met by completing the dual-degree. Also, the capstone requirement is met by completing Business Transactions Drafting, which is required in the J.D./M.B.A. program.

**Students may substitute up to two (2) of the courses marked with a double-asterisk with approval from the J.D./M.B.A. advisor.

***Students are strongly advised (but not required) to take the Entrepreneurship Clinic (4-8 hours) as part of their J.D./M.B.A. electives.

B.2 MASTERS OF PUBLIC ADMINISTRATION (M.P.A.)

A J.D./M.P.A. student may earn law school credit for one M.P.A. course (up to four hours) if that course is taken after the student has entered the College of Law. In addition, if the M.P.A. degree is awarded before or concurrently with the J.D. degree, an M.P.A. student may receive an additional two hours of law school credit for courses included in the M.P.A. degree that the student takes while enrolled in the College of Law. Grades earned
in Public Administration do not affect the cumulative law school GPA. Professor John Taylor is the College of Law contact person for the J.D./M.P.A. program.

**B.3 J.D./LL. M. IN ENERGY AND SUSTAINABLE DEVELOPMENT LAW**

WVU Law students can apply for the program at the end of their 2L year (approximately May 1). Applications must be received by June 15.

J.D./LL.M. students are required to complete their J.D. with an emphasis on Energy and Sustainable Development Law (http://www.law.wvu.edu/academics/academic-programs/energy-sustainable-development-law-concentration). Following completion and conferral of the J.D. degree and after completing the requirements for the Energy and Sustainable Development emphasis, students must complete an additional 14 credits of coursework that qualify for the LL.M. in Energy and Sustainable Development Law (http://www.law.wvu.edu/energy-llm), including the LL.M. Seminar and LL.M. Capstone. Students seeking this J.D./LL.M. shall endeavor to obtain a clinical opportunity in an appropriate clinic or a relevant externship opportunity, and if unable to do so, shall enroll in such other experiential learning opportunity (including Business Transactions Drafting and Trial Advocacy), which is necessary to fulfill the requirements of the Energy and Sustainable Development Area of Emphasis.

Students from other law schools can apply for the program starting on February 1 each year. Applications to the J.D./LL.M program must be received by June 15.

Students who are admitted to the J.D./LL.M. program will apply to attend WVU Law as visiting students for their entire 3L year. Visiting student from other law schools should state the intent to pursue the J.D./LL.M. in Energy and Sustainable Development Law as the primary reason for seeking admission as a visiting student. An application to attend WVU Law as a visiting student will not be considered without a letter from the applicant's Dean (or equivalent) authorizing the student’s attendance at WVU Law and stating that the home school will agree to transfer credits earned at WVU Law.

Visiting students must complete the coursework for the Energy and Sustainable Development Law Area of Emphasis in their 3L year while attending WVU Law. Some courses taken at a student's home institution may be approved to satisfy some area of emphasis requirements. Visiting students must take a minimum of nine credit hours in qualifying courses (related to the area of emphasis) while visiting at WVU Law, in addition to the required LL.M. courses. In addition to the coursework required, students will be required to complete all their LL.M. Degree requirements, including the research paper or field work requirement and the portfolio of work. Associate Dean Joshua Fershee is the College of Law advisor and contact person for the J.D./LL.M. program.

**C. LL.M. - MASTER OF LAWS**

1. Energy and Sustainable Development Law (p. 518)
2. Forensic Justice (p. 521)

**C.1 ENERGY AND SUSTAINABLE DEVELOPMENT LAW**

WVU College of Law is committed to playing a prominent role in shaping the energy, environmental, and sustainable development policies of the future for the state, the nation, and the world.

Energy is the foundation of our nation’s future, both economically and environmentally. West Virginia is at the center of energy production for the country. There is no better place to learn about the intersecting laws and policies governing all of the country’s energy resources than at WVU College of Law.

Although many law schools provide opportunities to learn energy or environmental law, WVU College of Law is committed to providing students opportunities to learn the full range of energy, environmental, and sustainable development law through its Center for Energy and Sustainable Development Law (http://energy.law.wvu.edu) and through its other resources in the area.

The College of Law provides a broad and deep offering of courses, experiential learning opportunities, and practical training for every part of the energy sector. Our broad spectrum of courses allows our students to prepare to be lawyers and leaders serving energy companies, investors, utilities, manufacturing companies, lawmakers, policymakers, regulators, land use professionals, and environmental organizations.

**PROGRAM OBJECTIVES**

The College of Law's objectives in establishing an LL.M. in Energy and Sustainable Development Law are as follows:

- To educate the next generation of lawyers in the state and beyond who will work in and shape the field of energy and sustainable development;
- To utilize WVU’s expertise and reputation in the areas of natural resources, energy, and sustainable development and further establish the College of Law as a leader in law and public policy in those fields; and
- To build upon the WVU 2020 Strategic Plan for the Future, which emphasizes the unique role and expertise of West Virginia and the university in the areas of natural resources, energy, and sustainable development.
ADMISSION REQUIREMENTS

WVU Law’s LL.M. in Energy and Sustainable Development Law will be a source for a high-quality professional legal education and a home for thought leaders in the areas of energy and sustainable development.

Minimum admission requirements for the program are as follows:

- A J.D. from an ABA-accredited school (or foreign equivalent, as determined by the College of Law in accordance with ABA guidelines).
- A J.D. (or equivalent) grade point average of at least a 3.0 (on a 4.0 scale) or other demonstrated indicia of likelihood of success.
- A demonstrated interest in or commitment to the fields of energy and/or sustainable development.

CURRICULUM

The College of Law intends that its graduates excel academically. Our goal is for our graduates to function on a high level as professionals in the field and to add to the national conversation on energy and sustainable development policy on a thoughtful and practical level.

This goal is reflected in our rigorous curriculum for the LL.M. in Energy and Sustainable Development Law.

</table>
The graduation requirements for the LL.M. in Energy and Sustainable Development Law are as follows:

**GRADUATION REQUIREMENTS**

- Significant legal motions, briefs or memoranda, substantial transactions documents, policy analyses, or draft legislation or regulations.

- Portfolio of Work: All LL.M. students will be required to develop a portfolio of work, consisting of at least four written pieces that are representative of the student's experiences in the course of the program. These pieces could include, but are not limited to, scholarly papers, industry white papers, or via significant industry contacts, a student will be able to see energy and sustainability law in actual practice. Each project will require approval of the program director before it is started and upon completion.

- Thesis option: Those students intending to enter private practice or work in industry may prefer to experience real world problems with real world clients. Whether through existing experiential learning opportunities available through the College of Law or through specific projects developed through student interest or via significant industry contacts, a student will be able to see energy and sustainability law in actual practice. Each project will require approval of the program director before it is started and upon completion.

- Capstone (Research Paper or Fieldwork Project): The 4-credit Capstone (Research Paper or Fieldwork Project) requirement lays the groundwork for that expectation. For those students looking to focus on influencing energy and sustainable development policy, the option to write a research paper on a significant issue in law and energy or sustainable development policy would form the basis for further work in the field. The paper can be related to an existing course (e.g., a 3-credit course with an additional credit granted for additional required research) or a student-specific study/thesis option with the approval of the program director.

- Specializations: Given the nature of the degree, students will earn their LL.M. in Energy and Sustainable Development Law without further formal specialization. Beyond the course requirements, however, students will have the flexibility in elective courses to focus their studies more specifically on courses in energy law, land use planning, and environmental law, among other options.

- Portfolio of Work: All LL.M. students will be required to develop a portfolio of work, consisting of at least four written pieces that are representative of the student’s experiences in the course of the program. These pieces could include, but are not limited to, scholarly papers, industry white papers, significant legal motions, briefs or memoranda, substantial transactions documents, policy analyses, or draft legislation or regulations.

**GRADUATION REQUIREMENTS**

The graduation requirements for the LL.M. in Energy and Sustainable Development Law are as follows:

- A minimum GPA of 2.5 (on a 4.0 scale).
- No less than the equivalent of a “C” (2.0) in any class counted toward the degree.
- Successful completion of the required 26 credits (including the LL.M. Seminar and the LL.M. Capstone).
- Completion of the 3-credit LL.M. Seminar, which must be completed in residence at the College of Law’s Morgantown campus unless otherwise approved by the program director.
- Successful completion of the 4-credit-hour Capstone (writing or field-work project) requirement.
- Development of a portfolio of work (consisting of at least four written pieces) that is representative of the student’s experiences in the course of the program.

---

**Class Work.** One-year course of study requiring 26 credit hours, including a final paper or fieldwork project. Students will have the added benefit of seeking approval to include up to 6 credits in their course of study from relevant WVU graduate-level programs, such as course offerings in business, ecology, engineering, public policy, economics, and natural resources.

**Energy Law Survey.** This introductory energy law course provides an overview of the law and regulatory policies that govern and affect the energy industry. The course includes a review of the various traditional and renewable energy sources, mineral rights, economic regulation of the energy industry, and climate change and environmental concerns.

**Environmental Protection Law.** This survey course introduces students to energy, environment, and sustainability law and policy issues. Students will examine the development of environmental law from its common law tort roots through the birth of the “environmental movement” and the enactment of federal environmental regulatory laws such as the Clean Water Act, the Clean Air Act, and the Surface Coal Mining and Reclamation Act. The overarching goals of the course are to expose students to “real world” environmental issues they may face in practice and the principles, doctrine, and process lawyers use while representing clients in environmental and natural resource matters.

**Administrative Law.** A basic understanding of administrative law is nearly essential for all attorneys. This is especially true for those practicing in the areas of energy, environmental, and sustainable development law. This course covers the creation and operation of administrative agencies, common procedural practices and requirements of administrative procedure acts, judicial control of administrative agencies, and constitutional issues related to the area.

**LL.M. Seminar.** The program will require a 3-credit LL.M. Seminar that covers a wide range of energy and sustainable development law and policy and explores diverse advanced topics and perspectives. The seminar will feature guest speakers who will present their scholarship and other works. Guests will include, for example, WVU Law faculty, local and national scholars and practitioners, government officials, regulators, and other leaders in the fields. Students will be required to engage in rigorous preparation for each seminar discussion and will be expected to develop a writing project that will be presented at the end of the course.

**LL.M. Capstone (Research Paper or Fieldwork Project).** The College of Law expects LL.M. graduates to bring their in-depth knowledge in the areas of energy and sustainable development into the world in a tangible way. The 4-credit Capstone (Research Paper or Fieldwork Project) requirement lays the groundwork for that expectation. For those students looking to focus on influencing energy and sustainable development policy, the option to write a research paper on a significant issue in law and energy or sustainable development policy would form the basis for further work in the field. The paper can be related to an existing course (e.g., a 3-credit course with an additional credit granted for additional required research) or a student-specific study/thesis option with the approval of the program director.

Those students intending to enter private practice or work in industry may prefer to experience real world problems with real world clients. Whether through existing experiential learning opportunities available through the College of Law or through specific projects developed through student interest or via significant industry contacts, a student will be able to see energy and sustainability law in actual practice. Each project will require approval of the program director before it is started and upon completion.

**Specializations.** Given the nature of the degree, students will earn their LL.M. in Energy and Sustainable Development Law without further formal specialization. Beyond the course requirements, however, students will have the flexibility in elective courses to focus their studies more specifically on courses in energy law, land use planning, and environmental law, among other options.

**Portfolio of Work.** All LL.M. students will be required to develop a portfolio of work, consisting of at least four written pieces that are representative of the student’s experiences in the course of the program. These pieces could include, but are not limited to, scholarly papers, industry white papers, significant legal motions, briefs or memoranda, substantial transactions documents, policy analyses, or draft legislation or regulations.

**GRADUATION REQUIREMENTS**

The graduation requirements for the LL.M. in Energy and Sustainable Development Law are as follows:

- A minimum GPA of 2.5 (on a 4.0 scale).
- No less than the equivalent of a “C” (2.0) in any class counted toward the degree.
- Successful completion of the required 26 credits (including the LL.M. Seminar and the LL.M. Capstone).
- Completion of the 3-credit LL.M. Seminar, which must be completed in residence at the College of Law’s Morgantown campus unless otherwise approved by the program director.
- Successful completion of the 4-credit-hour Capstone (writing or field-work project) requirement.
- Development of a portfolio of work (consisting of at least four written pieces) that is representative of the student’s experiences in the course of the program.
C.2 FORENSIC JUSTICE

Recent developments have demonstrated that a solid grounding in the scientific method and forensic evidence is critical for any attorney, especially for those practicing criminal law. These developments include more than 300 DNA-based exonerations that have taken place since the early 1990’s, the uncovering of numerous scandals in forensic laboratories across the country, and the recommendations put forth by the National Academy of Sciences in a 2009 report.

The WVU College of Law, in partnership with the WVU Department of Forensic and Investigative Science, is a pioneer in the criminal justice field by offering the country’s only graduate law degree program in Forensic Justice.

Many American law schools offer upper-level courses in areas such as expert testimony and forensic evidence, but LL.M. programs in law and forensic science remain virtually nonexistent. Currently, no other ABA-approved U.S. law school offers such a degree.

Because WVU has long been a leader in the field of forensic sciences and is also home to the highly regarded Department of Forensic and Investigative Sciences, WVU Law is a natural location for the country’s first LL.M. in Forensic Justice.

The LL.M. curriculum makes use of the expertise present at the University and allow LL.M. candidates the opportunity to combine breadth—that is, exposure to a wide range of forensic methods—with depth—the opportunity to conduct original, independent research in a narrower area of interest.

PROGRAM OBJECTIVES

The Forensic Justice LL.M. is flexible enough to allow experienced practitioners to improve and expand their skills, allowing them to better serve their clients and communities, while also offering new attorneys an opportunity to develop skills that will make them more marketable in their chosen profession, whether that be, for example, as a state or federal prosecutor, a public defender, or an attorney in private practice focusing on criminal defense.

The objectives of the LL.M. in Forensic Justice are to:

- Educate current and future West Virginia attorneys, and those of our region and nation, whose work will help shape the field of criminal law, particularly the areas of prosecution and criminal defense;
- Build on WVU’s reputation as a leader in forensic and investigative sciences; and
- Pioneer a much-needed area of advanced academic training.

ADMISSION REQUIREMENTS

Minimum admission requirements for the LL.M. in Forensic Justice are as follows:

- A J.D. from an ABA (American Bar Association) accredited school (or foreign equivalent, as determined by WVU Law in accordance with ABA guidelines).
- A grade point average of at least a 3.0 (on a 4.0 scale) or other demonstrated indicia of likelihood of success.
- A demonstrated interest in or commitment to the fields of science, forensic evidence, and law.

Applicants may include newly graduated J.D. students, professionals (prosecutors, defense attorneys, judges) returning for study after years of practice, or qualified international students.

CURRICULUM

The program shall consist of a one-year course of study requiring 30 credit hours, which will be evenly split between courses offered by the COL and courses offered by the Department of Forensic and Investigative Sciences (“FIS”). Candidates will also be required to complete a substantial piece of written work, final paper, or field-work project. Students in the program may also have the option to include up to 4 credits in their course of study from relevant WVU graduate-level programs, such as statistics, biology, chemistry, physics, and mathematics, provided that these students meet the prerequisite course requirements.

Required Courses

Minimum GPA of 2.5 is required.

LL.M. Seminar. The program will require a 3-credit LL.M. Seminar that covers a wide range of topics relating to the role that forensic evidence plays in the criminal justice system, the strengths and weaknesses of various forensic disciplines and other relevant topics. The seminar may feature guest speakers who will present their scholarship or will lecture on current issues in forensic science. Students will be required to engage in rigorous preparation for each seminar discussion and will be expected to develop a writing project that will be presented at the end of the course.

LL.M. Capstone (Research paper or field-work project). The College of Law intends its LL.M. graduates to bring their in-depth understanding of the areas of law and forensic science into their practice in a tangible way. To that end, the 4-credit research paper or field-work project is meant to lay the groundwork for future professional work. For students hoping to contribute to the growing body of legal scholarship focusing on the intersection (and sometimes tension) between law and forensics, the option to write a research paper on an important issue in the field might form the basis for a later journal article. If the paper option is chosen, the paper can be related to an existing course (e.g., a 3-credit course with an additional credit granted for additional required research) or a student-created independent study option. That is, in addition to other program requirements, students must engage in an intensive 4-credit research experience that is coordinated with the approval of the Program Director.

Alternatively, those students wishing to enter private practice or the public sector may wish to work on real world problems. In this instance, the written work product might take the form of an appellate brief, a reply brief, a pre-trial motion relating to expert witness testimony, or other similar pleading. Opportunities to complete such projects may be available through existing experiential learning placements available at the COL or through specific projects developed through student interest. Each project will require approval of the Program Director before it is started and upon completion.

Specializations. Given the nature of the degree, students will earn their LL.M. in Forensic Justice without further formal specialization.

Prerequisites. It is expected that the majority of LL.M. candidates will already have taken both Evidence and Criminal Procedure as J.D. students. In the case of practitioners, prerequisite will be waived if not met. Prerequisites may also be waived at the discretion of the Program Director after an individual consultation with the student.

Continuing WVU Students. The College of Law anticipates that some of the students in the program may be recent graduates of, or visitors at, the WVU College of Law, and therefore may have already taken some of the classes offered by the program. If such a student has already taken a significant number of the courses listed in the program curriculum as part of the J.D. course of study at the College of Law such that the student will have difficulty taking 30 credits of course work without repetition, then the program director may authorize such student to take other related courses that are not on the initial program curriculum listing. In all events, however, a student shall be required to meet the 30-credit hour requirement.

International Programs. The College of Law already offers a number of international programs for credit, including trips to Geneva, Mexico, and Brazil. The College of Law could approve participation in any of these international programs for the LL.M. credit, with approval of the program director, as long as there is a demonstrable link between participation in the international program and the student’s course of study.

Portfolio of Work. All LL.M. students will be required to develop a portfolio of work, consisting of at least four written pieces that are representative of the student’s experiences in the course of the program. These pieces may include, but are not limited to, scholarly articles, legal motions, briefs, or memoranda, policy analyses, or draft legislation.

GRADUATION REQUIREMENTS

The graduation requirements for the LL.M. in Forensic Justice are as follows:

- A minimum grade point average of 2.5 (on a 4.0 scale) upon graduation
- No less than the equivalent of a C (2.0) in any class counted toward the degree,
- Successful completion of the required 30 credits (including the LL.M. Seminar and the writing or field-work project),
- Completion of the 3-credit LL.M. Seminar, which must be completed in residence at the COL’s Morgantown campus unless otherwise approved by the Program Director,
- Successful completion of the 4-credit hour writing or field-work project requirement, and,
- Development of a portfolio of work (consisting of at least four written pieces) that is representative of the student’s experience in the course of the Program.

A. ACADEMIC POLICIES

1. Academic Calendar (p. 524)
2. Scheduling (p. 524)
3. Maximum Credits Per Semester (p. 524)
4. Summer School (p. 524)
A.1 ACADEMIC CALENDAR
The College of Law has its own academic calendar, which differs from the general West Virginia University academic calendar. For example, the College of Law's examination period extends over a two-week period, instead of the standard one week. Law students should refer only to the College of Law Academic Calendar, which can be accessed from the College of Law website (http://www.law.wvu.edu).

A.2 SCHEDULING
The Associate Dean for Academic Affairs and the Assistant Registrar for the College of Law complete the master course schedule. The Assistant Registrar for the College of Law assigns first-year students to specific sections of their required courses. The students then register for these courses on the STAR system. Second- and third-year students make their own schedules through WVU's STAR System via the Internet.

A.3 MAXIMUM CREDITS PER SEMESTER
As noted below, ABA Accreditation Standard 311(c) states that law schools may not permit a student to be enrolled at one time in courses totaling more than twenty percent of the total hours required for graduation. This means that the maximum number of law school credit hours a student may take during a semester at the WVU College of Law is eighteen (i.e., 20% of ninety-one is 18.2). There is only one exception to the eighteen-hour per semester cap, students who are in joint-degree programs.

A.4 SUMMER SCHOOL
Summer credits may be earned only at the West Virginia University College of Law, other ABA-accredited law schools, or their ABA-approved programs abroad. Students who are on academic probation may earn summer school credits only with the permission of the Academic Standards Committee. The College of Law will accept transfer credits only for courses where the student earned a grade of C or better. Students may transfer credits for pass/fail courses only with the advance approval of the Associate Dean.

A.5 AUDITING
A law student may audit a College of Law course (without receiving academic credit) with the permission of the professor teaching the course. The student and professor should reach an agreement about what the student must do to successfully audit the course. (Typically, professors require class attendance, preparation, and participation, but individual professors are free to ask auditors to do more if they wish.) Once a student has obtained a professor's permission to audit a course, the student should register the course in STAR and then notify the Assistant Registrar for the College of Law, who will update the 'Audit' status in STAR. An email from the professor giving permission to register for the course as an audit is required. A class may not be audited if it has reached its enrollment capacity.

A.6 WITHDRAWAL FROM THE PROGRAM
There are three types of withdrawals that are governed by this rule: (a) partial withdrawal from some part of a student's course work; (b) in-semester withdrawal from all College of Law courses in which a student is registered; and (c) between-semester withdrawal after the completion of one semester and before the start of the next semester. Any student considering withdrawing from school must see the Associate Dean for Academic Affairs. The faculty and staff of the College of Law are available and willing to help resolve any difficulties that may be hindering a student's legal studies. Any student wishing to withdraw must also see the Assistant Registrar for the College of Law and withdraw according to guidelines set by the College of Law and by the University. Please note that the deadlines described below are for fall and spring courses. Summer courses are often shorter in length, and may have very short deadlines (i.e., a couple of days) for dropping without the withdrawal being recorded on the student's official transcript.
Partial Withdrawal (a.k.a. dropping some, but not all, courses for a semester):

Reduction in the First Year. Because the first-year curriculum must be completed before the student may take upper-division courses, full-time students are not permitted to reduce the course load in the first year by dropping courses except with the permission of the Associate Dean for Academic Affairs. By faculty resolution, no student shall be allowed to drop the required first-year course in Legal Reasoning, Research, and Writing.

Dropping Courses After the First Year -- During First Week of Class. During the first week of the semester, upper-level students may drop any course without having a W ("withdrew") placed on their transcripts. (See the College of Law Academic Calendar for the specific date each semester.) If the dropped course brings a student's course load below nine hours, the student may be eligible for a reduction in tuition and fees.

Courses Dropped Before the "Last Day to Drop" Deadline. Until the "last day to drop a course" on the law school's academic calendar, students are free to drop most courses by simply logging into STAR and dropping. The exceptions to this policy are clinical courses and Practical Legal Writing II. Slots in such courses are limited, and the student who drops them after the first week has wasted an opportunity sought by others. Students may drop these courses only with the permission of the instructor and the Associate Dean for Academic Affairs, and such permission shall be given only for very strong reasons. The grade for a course dropped during this period shall be a "W." Please note that under university policy (http://studentaccounts.wvu.edu/refunds/reduction_schedule), students who drop some but not all of their courses during this period receive no refund of tuition and fees.

Courses Dropped after the University Deadline. After the University's last date for withdrawal from a course (see the Academic Calendar), no student may withdraw from a course for any reason. Students who do not complete course requirements will receive an F for the course. Specifically, students denied permission to sit for a final because of excessive absences will receive an F if the last date for withdrawal has passed. This is a university rule, and no exceptions can be made.

In-Semester Withdrawal from All Classes:

Withdrawal during First Twelve Weeks. During the first twelve weeks of any semester, a student may withdraw totally from the West Virginia University College of Law by obtaining permission from the Associate Dean for Academic Affairs, and any student withdrawing from the West Virginia University College of Law during this period receives a grade of "W" in all courses dropped pursuant to this withdrawal. Students who withdraw completely within the first six weeks of class may be eligible for a partial refund of tuition and fees according to the University Refund Schedule. See website (http://studentaccounts.wvu.edu/refunds/reduction_schedule).

Withdrawal after First Twelve Weeks. After the first twelve weeks of a semester, a student may be permitted to withdraw totally from the West Virginia University College of Law only with the permission of the Academic Standards Committee. The Committee shall grant permission upon a showing by the student that continuation in school will create a severe hardship on the student because of some substantial physical, emotional, or family problem. If permission is granted, the student receives a grade of "W" in all courses dropped; if permission is denied, then the student remains responsible for his or her performance in all courses and will be graded accordingly. The last day to withdraw from all classes is the final day of class, as marked on the College of Law Academic Calendar.

Between-Semester Withdrawal. After the end of a semester and prior to the start of the next semester, a student may withdraw from the West Virginia University College of Law. In all such cases, the West Virginia University College of Law shall advise the student of its requirement that studies must be completed within seven years from the date on which the studies began.

Resumption of Studies:

First Semester, First Year. A student who withdraws from the West Virginia University College of Law before completing the first semester of the first year must, except as herein provided, be readmitted by making application for an initial admission to the West Virginia University College of Law. A student who withdraws during the first semester may petition the Dean at the time of such withdrawal for permission to be readmitted at the next regular fall semester of the West Virginia University College of Law. If the Dean determines that such withdrawal is for causes beyond the control of the student, the Dean will verify this fact in writing at the time of withdrawal and grant such permission. Permission to be readmitted to the West Virginia University College of Law applies only for admission for the beginning of the next academic year. An adverse decision by the Dean on granting this privilege may be appealed to the Faculty.

Other Students. Any student who withdraws voluntarily after the first semester of study and wishes to resume his or her studies must petition the Academic Standards Committee to be readmitted to the West Virginia University College of Law. The Committee may readmit the petitioning student subject to conditions of the Committee's choosing, or it may deny the petition for readmission, thus leaving the petitioner with the option of seeking admission to the College of Law through the regular admissions process. (Students who withdraw from law school and then successfully reapply through the regular admissions process start their legal educations "from scratch" alongside other members of their entering class; i.e., they begin with no credit hours and no law school GPA. Students who are readmitted through petition to the Academic Standards Committee retain credit hours and grades earned prior to their voluntary withdrawal from the College of Law.) In deciding whether to grant a petition for readmission, the Committee considers the length of the interruption of studies, the causes for the interruption of studies, the intervening activities of the student and how they relate to the intellectual activities of a law student, changes in curriculum and the teaching program of the West Virginia University College of Law, and any other factors deemed relevant. A readmitted student may be required to repeat, without credit, work previously done, or may be required to audit certain courses. Any student who is readmitted may have the student's overall academic program adjusted to
meet the requirements at the time of readmission. Resumption of studies is permitted only at the beginning of a semester. A first-year student whose last complete semester was a fall semester is normally permitted to return only at the beginning of a spring semester.

A.7 INDEPENDENT STUDY
A student may earn up to two hours of credit for a suitable research project completed under the supervision of a full-time faculty member. An independent study must produce an academic research paper that would be acceptable in a research seminar, and it must involve an amount of research and writing commensurate with the credit hours awarded. For example, a student seeking two hours of independent study credit would be expected to produce a research paper at least twenty-five pages in length, i.e., the same length required for a two-credit research seminar. Students wishing to pursue an independent study should draft a plan for the independent study that would specify the proposed subject for the study, a research and reading agenda, and a paper topic. This plan should be presented to the faculty supervisor and to the Chair of the Academic Standards Committee, who must approve the project. A second faculty reviewer must approve the grade given for an independent study. The Associate Dean for Academic Affairs has the forms to be submitted to the Chair of the Committee. Independent study does not satisfy the seminar requirement. As stated in the rule on “Deficiencies After Three Years” (1.4.5), independent study courses are offered only during the fall and spring semesters and are not available during the summer.

A.8 EARNING LAW SCHOOL CREDIT OUTSIDE THE LAW SCHOOL

Individual Courses in Other WVU Colleges. Students who do not receive credit toward the J.D. for completion of a joint degree program may receive law school credit for one graduate level course in another discipline at WVU. No student may receive more than four credits under this rule. The student must obtain prior approval from the Associate Dean for Academic Affairs. Grades earned in other WVU colleges do not affect the student’s law school GPA. When possible, students should choose the pass/fail option when registering to take courses in other WVU colleges so that grades for these courses are not included in the cumulative GPA on the student’s professional school transcript.

Law students may also register for courses in other WVU colleges (e.g., physical education courses) that would not qualify for law school credit. Students do not need permission to take non-law courses for personal enrichment, but should notify the Assistant Registrar for the College of Law that they are doing so.

Study at Another School - Visiting. A student in good academic standing may take up to thirty credits toward graduation at another ABA-accredited law school. Upon completion at that law school of all the requirements necessary for the J.D. from West Virginia University College of Law, the West Virginia University College of Law J.D. will be awarded. Such students require advance approval of their curriculum by the Associate Dean for Academic Affairs. Only grades of C or better will be transferred to the West Virginia University College of Law. Students may transfer credits for pass/fail courses only with the advance approval of the Associate Dean. Grades earned at other law schools will not be included in the calculation of the student’s cumulative law school GPA. Students who take required courses (as listed on pages 1-4 of this Handbook) for credit at other law schools are not eligible for election to Order of the Coif at the West Virginia University College of Law.

Study at a Foreign Law School - Visiting. The College of Law, in cooperation with the WVU Office of International Programs, permits individual students to take courses toward their law degree at foreign law schools. Applications are reviewed by the Associate Dean for Academic Affairs and must comply with the “Criteria for Student Study at a Foreign Institution” promulgated by the American Bar Association. Their application must also be approved by the Office of International Programs. Students seeking such credit must establish an educational purpose that both is consistent with the aims of the College of Law and can be met only through the proposed foreign study. Examples could include students seeking proficiency in the legal vocabulary of a foreign country, students seeking international credentials to support their practice of law, or students interested in the study of comparative legal systems. Students must have completed their first year in law school prior to application and can take only one semester under such a foreign program.

A.9 MISSING CLASS DUE TO ILLNESS
If you are ill and you must miss class, call or e-mail the professor whose class you will miss, unless the professor has another specific policy about absenteeism. If the illness is extended, contact the Associate Dean for Academic Affairs.

If you are struggling with physical or stress-related problems, please see someone right away! Students can go to the Student Health Service center for a $10-per-visit co-payment for in-office treatments (such as flu shots, cold treatments, etc.). Student Health Services is located in the basement of the Robert C. Byrd Health Sciences Center. For more information, see the “Health Services” subsection under the University Services section in this handbook, see the Student Health Service website (http://well.wvu.edu), or call 304-293-9355.

If you are experiencing family or school stress, the Assistant Dean for Student Affairs is always available to help you find the best solution.
A.10 STUDY OUTSIDE THE CLASSROOM

The American Bar Association prohibits a student from taking more than a total of twenty-six course hours in the following types of classes: externships, co-curricular activities (such as Law Review, Moot Court, and Lugar Trial Association), independent study, courses in other graduate departments, summer abroad programs, and distance education programs that rely on teaching outside the classroom setting.

A.11 DISTANCE EDUCATION

Standard 306(a) states that a distance education course is: "a course...in which students are separated from the faculty member or each other for more than one-third of the instruction and the instruction involves the use of technology to support regular and substantive interaction among students and between the students and the faculty member, either synchronously or asynchronously."

No student may take more than 15 credits during his/her law school career in classes taught through distance education as defined by Standard 306. No student may take any distance education course until that student has completed at least twenty-eight credits in law school. Students should be aware that under ABA standards, the status of “asynchronous” courses (i.e., “online” or “web” courses) is uncertain. The College of Law sometimes offers a small number of web-based courses during the summer, but constantly monitors such courses to maintain educational quality and does not guarantee that any will be offered in the future. Students should also be aware that the New York Bar ruled in 2012 that it will not count asynchronous distance education hours toward the eighty-three law school credit hours students must earn to become members of the New York Bar. (Because WVU requires ninety-one hours for graduation, students who have taken a web course during law school can still become members of the New York bar because they have, in the eyes of the New York Bar, eight “surplus hours.”) Students should check the bar requirements in states where they plan to practice to see whether similar rules have been adopted there.

A.12 ABA REQUIREMENT

The American Bar Association accredits U.S. law schools. A Juris Doctorate (J.D.) degree from an ABA-accredited law school entitles you to take the bar examination in any state (other individual state requirements, such as character, being met). The WVU College of Law has been fully accredited by the ABA since 1923. The ABA standards for Approval of Law Schools are published annually and can be accessed at www.abanet.org. Of these standards, there are three particular ABA requirements worth noting here:

* Standard 308(a): “A law school shall adopt, publish, and adhere to sound academic standards, including those for regular class attendance, good standing, academic integrity, graduation, and dismissal.”
* Standard 311(b): The J.D. degree must be “completed no earlier than 24 months, except in extraordinary circumstances no later than eighty-four months after a student has commenced law study.”

Policy ensuring WVU College of Law compliance with ABA Standard 310:

ABA Standard 310(b)(1) defines a “credit hour” as an amount of work that reasonably approximates: "(1) not less than one hour of classroom time or direct faculty instruction and two hours of out-of-class student work per week for fifteen weeks, or the equivalent amount of work over a different amount of time." Interpretation 310-1 states that "[f]or the purposes of this Standard, fifty minutes suffices for one hour of classroom or direct faculty instruction. An 'hour' for out-of-class students work is sixty minutes. The fifteen-week period may include one week for a final examination."

The following policies and procedures are in place to ensure that the West Virginia University College of Law meets the requirements of Standard 310:

(1) for classroom and simulation (including clinic and externship) courses, classes must meet at least fifty minutes per week over fourteen weeks per credit, including, in many cases, an examination of three to four hours.

   (a) Faculty in doctrinal courses are required to evaluate their syllabi to ensure that assigned reading and writing exercises required in preparation for class are a reasonable approximation of the out-of-class student work standard of two hours per week per credit hour. The College of Law Registrar and the Associate Dean for Academic Affairs will set a schedule that ensures enough class days and minutes to meet such requirements and collect course syllabi (consistent with existing policies).

   (b) For out-of-class clinical work, students must work for at least three hours (based on a sixty-minute hour) each week over fourteen weeks per credit hour. Supervising faculty will ensure this amount of work is completed and are certifying successful completion of this work when submitting grades.

   (c) For externship placements, students must work three and a half hours (based on sixty-minute hour) in the placement each week over fourteen weeks per credit. Supervising faculty will ensure this amount of work is completed and are certifying successful completion of this work when submitting grades.

(2) for co-curricular activities, students must work for at least three hours (based on a sixty-minute hour) each week over fourteen weeks per credit. The advisor of a co-curricular activity will certify the awarding credit by confirming that a student has met all minimal work-related expectations associated with the competition or journal needs (e.g., engaging in research, editing scholarship, writing a brief, preparing exhibits, prepping witnesses, participating
in practice rounds, participating in the competition, etc.). Faculty advisors are aware they are certifying successful completion of this work when they approve credit.

A.13 DEFIENCIES AFTER THREE YEARS

Full-time students who are deficient in semester hours at the end of their third year of study must make up their deficiencies in regular law school courses. No credit is awarded for summer independent study or summer research. However, credit is awarded for summer school courses here or elsewhere or in the following fall semester. Independent study and research courses are offered only during the regular academic year, not during the summer.

A.14 EMPLOYMENT DURING LAW SCHOOL

First Year. Full-time first-year law students at WVU take a fixed curriculum consisting of 32 hours of demanding course work, and they must master materials, modes of analysis, and skills that will be unfamiliar to nearly all entering students. Succeeding in the first year is critically important in preparing students for their upper-level classes, the bar exam, and their future careers. For these reasons, the College of Law strongly discourages full-time first-year students from working during the fall and spring semesters. Law school, especially in the first year, should be treated as a demanding full-time job, and adding work on top of that job is likely to prevent students from performing to their academic potential and may also compromise students’ physical and mental health. Nevertheless, the College of Law recognizes that some students’ financial needs may require them to seek employment even during the first year. Full-time first-year students who intend to work for more than ten hours per week must disclose their employment plans to the Assistant Dean for Student Affairs and must schedule a meeting with the Assistant Dean to discuss their plans for balancing school and work. This must be done before beginning work or as soon as possible thereafter. Students who plan to retain a part-time job begun prior to law school should speak with the Assistant Dean for Student Affairs no later than the end of the first week of classes.

Second and Third Years. Many upper-level students are able to successfully combine law school with moderate levels of paid employment. Historically, ABA rules prohibited students from working more than 20 hours per week, but this limitation was repealed effective for the fall semester of 2014. Although no longer a firm prohibition, the ABA’s traditional limit of 20 hours per week remains a good guideline for the amount of work most students can manage in addition to the demands of law school. While the College of Law has no formal mechanism for monitoring or limiting hours of employment during the second and third years, students who contemplate working more than this should think seriously about whether their contemplated schedule will jeopardize their studies and/or their general well-being. The Assistant Dean for Student Affairs and the faculty are happy to counsel upper-level students who plan to work more than twenty hours per week.

A.15 FULL-TIME STATUS AND TUITION/FEES

West Virginia University treats nine hours per semester as full-time status for graduate and professional students. That means you will be charged full tuition and fees for taking nine hours or more in a given semester. Students taking fewer than nine hours will receive a proportionate reduction of their tuition and fees. (e.g., students taking eight hours will be charged roughly 8/9 of their full-time tuition and fees.)

A.16 WVU GRADUATE AND POST-GRADUATE STUDENTS

Graduate and post-graduate students from other colleges, schools, and divisions within the university may enroll in WVU College of Law courses with the permission of the Associate Dean for Academic Affairs; the appropriate officer of the college, school, or division within the university to which they are attached; and the faculty member teaching the course. The Associate Dean shall not permit a student to enroll in a course under this provision if the student (1) would have taken more than twenty-one credit hours under this provision upon completion of the course or (2) has been excluded from the College of Law for any reason. The student’s college, school, or university division will determine to what extent courses taken under this provision will be credited toward completion of the requirements for the student’s graduate degree.

A student admitted to the College of Law after completing one or more courses under this provision (1) shall not receive any credit toward the J.D. degree for those previously completed courses, (2) must retake for credit, on a pass/fail basis, any course required for law school graduation that was previously taken, and (3) may not retake any elective course that was previously taken.

A.17 TRANSCRIPTS

Official transcripts can be obtained only by contacting the University Registrar’s office. Information on requesting transcripts can be found on the University Registrar’s website (http://registrar.wvu.edu/transcripts). Please note that it generally takes three to five working days for the University Registrar to produce a transcript, so it is important to plan accordingly.

B. GRADING INFORMATION AND PROCEDURES
B.1 EXAMINATIONS

Attendance and Exam Eligibility. The faculty subscribes to the principle that class attendance is important and necessary to the successful study of law. Therefore, a faculty member may deny permission to sit for an examination to a student because of poor class attendance. Furthermore, a student who is absent from as many as twenty-five percent of the scheduled class hours for any given course shall not be permitted to take an examination in the course except by special permission of the faculty member. Prior to the last day to drop a course (as indicated on the College of Law Academic Calendar), a student who is denied permission to sit for an examination may withdraw from the course. After the last day to drop has passed, denial of permission to sit for the final examination automatically results in a grade of F for the course.

No Exams During Final Week of Classes. In-class final exams may not be scheduled during the last week of classes. In addition, the due date for take-home exams cannot be during the last week of classes.

Exam Numbers. The West Virginia University College of Law Assistant Registrar randomly selects and assigns official student examination numbers for students' anonymity in the grading process. The Assistant Registrar for the College of Law notifies students when their numbers are available. The Assistant Registrar protects the anonymity of student examination numbers throughout the examination and grading period.

Exam Accommodation Requests. During the final examination period, any student who has three or more finals on consecutive days may request to move the third final to the next day (excluding Sunday or other religious holiday) on which he or she does not have a final scheduled. The purpose of this rule is to prevent a student from having more than two consecutive days of law school finals. To obtain relief under this rule, a student must notify the Assistant Registrar for the College of Law before the specified deadline so that the exam can be rescheduled and the appropriate faculty member notified.

Deferment of Exams or Assignment Deadlines. A student with a substantial physical, emotional, or family problem that would make it impractical or grossly unfair to take a scheduled examination or meet another class-wide or general deadline may submit in advance a written request to be excused from taking the examination as scheduled or complying with the deadline as fixed. All such requests must be in writing, must be directed to the faculty member teaching the course in question, and must be substantiated by a physician’s statement or some other written evidence of the emergency. A faculty member acting alone or in consultation with the Associate Dean for Academic Affairs shall either deny the request or grant the request and require the student to take the examination at a later date or comply with a new deadline.

When Request Is Denied or Extended Deferment Sought. If any request for deferment (as described above) is denied, or if a student requests a deferment for reasons or to a time that would not comply with the above policy, the student may obtain the requested deferment only by approval of the Academic Standards Committee. Appeal from a denied request or an original request for an extended deferment may be made by giving the Associate Dean for Academic Affairs a copy of the request as described above together with any appropriate supporting documents.

Completion of Examinations or Other Class-Wide Assignments. A student granted a deferment has a reasonable time after the emergency is dissipated to complete the examination or other assignment. A reasonable time is established by agreement of the Associate Dean for Academic Affairs and the faculty member.

Failure to Take Examination or Comply with Deadline. A student who fails to take an examination or comply with a deadline and who does not receive a deferment under this rule shall be penalized in whatever fashion the faculty member teaching the course deems appropriate. There is no responsibility on the part of any faculty member to accept or evaluate any work that is not done in a timely fashion unless relief has been granted pursuant to this rule.

Faculty Presence During Exams. It is the policy of the faculty of the College of Law that each faculty member either be in the law school building during his or her classroom examination or find a substitute.

Grade Recording Error. In the unlikely event that a computer or data entry error results in the reporting of an incorrect grade, the error will be corrected so that the student's grade is the one the professor intended to award for that student's work in the course, unless the student has already graduated from the College of Law.

B.2 GRADES

Grading Scale. The College of Law grading scale is as follows:
<table>
<thead>
<tr>
<th>Grade</th>
<th>Description</th>
<th>Quality Points</th>
</tr>
</thead>
<tbody>
<tr>
<td>A+</td>
<td>4.3 quality points</td>
<td></td>
</tr>
<tr>
<td>A</td>
<td>4.0 quality points</td>
<td></td>
</tr>
<tr>
<td>A-</td>
<td>3.7 quality points</td>
<td></td>
</tr>
<tr>
<td>B+</td>
<td>3.3 quality points</td>
<td></td>
</tr>
<tr>
<td>B</td>
<td>3.0 quality points</td>
<td></td>
</tr>
<tr>
<td>B-</td>
<td>2.7 quality points</td>
<td></td>
</tr>
<tr>
<td>C+</td>
<td>2.3 quality points</td>
<td></td>
</tr>
<tr>
<td>C</td>
<td>2.0 quality points</td>
<td></td>
</tr>
<tr>
<td>C-</td>
<td>1.7 quality points</td>
<td></td>
</tr>
<tr>
<td>D+</td>
<td>1.3 quality points</td>
<td></td>
</tr>
<tr>
<td>D</td>
<td>1.0 quality points</td>
<td></td>
</tr>
<tr>
<td>F</td>
<td>0.0 quality points</td>
<td></td>

</tbody>
</table>

Semester Grade Point Average or Semester GPA. Semester grade point average is the average of all grades earned by a student in a given semester. All semester grade point averages are calculated using the grading scale of the West Virginia University College of Law.

Cumulative Grade Point Average (GPA or Cum.). The cumulative grade point average is the average of all grades earned by a student while enrolled in the West Virginia University College of Law. All cumulative grade point averages are calculated using the College of Law’s grading scale. Only grades earned at the College of Law affect the law school cumulative GPA. Grades for courses taken in other WVU colleges or at other law schools are not included in the student’s cumulative law school GPA.

B.3 COLLEGE OF LAW GRADING POLICY

Adopted by the College of Law Faculty – May 8, 2014
Amended (added Section F) – Sept. 24, 2014

I. FIRST YEAR CURVE

A. Curve for First-Year Doctrinal Classes

Mandatory Mean Grade: 2.95 to 3.05

Mandatory Distribution Requirements:
  • 5 – 10% of the grades must be A (including A+, which should be rare)
  • 5 – 15% of the grades must be A-
  • 15 – 25% of the grades must be C+ or below

B. Curve for LRRW I and II

Mandatory Mean Grade: 2.95 to 3.05

Expected Distribution Requirements:
  • 5 – 10% of the grades should be A (including A+, which should be rare)
  • 5 – 15% of the grades should be A-
  • 15 – 25% of the grades should be C+ or below

C. Intro to Legal Research

The 1-credit “Intro to Legal Research” course will not be subject to any curve.

II. UPPER CLASS CURVE

A. Curve for Classes of 30 or more students
(This curve does not apply to clinics, Trial Advocacy and other capstone courses, seminars, or graded study abroad classes. Section II.D below governs these classes.)

Mandatory Mean Grade: 3.15 to 3.25

Expected Distribution Requirements:
• 5 – 15% of the grades should be A (including A+, which should be rare)
• 10 – 15% of the grades should be A-
• 5 – 15% of the grades should be C+ or below

B. Curve for Classes of 11 to 29 students
(This curve does not apply to clinics, Trial Advocacy and other capstone courses, seminars, or graded study abroad classes. Section II.D below governs these classes.)

Mandatory Mean Grade: 3.10 to 3.30

Expected Distribution Requirements:
• 5 – 20% of the grades should be A (including A+, which should be rare)
• 10 – 20% of the grades should be A-
• 5 – 20% of the grades should be C+ or below

C. Curve for Classes with 10 or Fewer Students
(This curve does not apply to clinics, Trial Advocacy and other capstone courses, seminars, or graded study abroad classes. Section II.D below governs these classes.)

For classes this small, mean and distribution requirements are recommended rather than mandatory.

Recommended Mean Grade: 3.10 to 3.30

Recommended Distribution Requirements:
• 5 – 20% of the grades should be A (including A+, which should be rare)
• 10 – 20% of the grades should be A-
• 5 – 20% of the grades should be C+ or below

D. Curve for Clinics, Trial Advocacy and other Capstone Courses, Seminars, and Graded Study Abroad Classes
(This curve governs the class types listed in the heading. If a class falling into one of these categories has 10 or fewer students, the mandatory mean grade range is recommended, but not required.)

Classes with 11 or More Students
Mandatory Mean Grade: 3.10 to 3.50

Expected Distribution Requirements:
• 5 – 20% of the grades should be A (including A+, which should be rare)
• 10 – 20% of the grades should be A-

Classes with 10 or Fewer Students
Recommended Mean Grade: 3.10 to 3.50

Recommended Distribution Requirements:
• 5 – 20% of the grades should be A (including A+, which should be rare)
• 10 – 20% of the grades should be A-

E. Determination of Class Enrollment for Purposes of the Upper Class Curve
As slightly different curves apply to upper level classes depending on enrollment, there needs to be a set day on which a class’s official enrollment is determined for purposes of the grading policy. The official enrollment for a class will be the enrollment at midnight on the final day of classes for the term.

F. LL.M. Students
In classes with only LL.M. students, the relevant section of the Upper-Class Curve (II.A-D) will apply. For example, grading in an LL.M. seminar will be governed by Section II.D.

For upper-level classes containing both LL.M. students and J.D. students, each set of students will be treated as a separate cohort for purposes of the grading policy. J.D. class enrollment will be determined by the number of J.D. students in the class, and the relevant section of the upper-class curve will apply to the J.D. students considered as a group. LL.M. enrollment will be determined by the number of LL.M. students in the class, and the relevant section of the upper-class curve will apply to the LL.M. students considered as a group.
Example 1
Energy Law has an enrollment of 32 J.D. students and 12 LL.M. students. The grades for J.D. students must conform to Section II.A; the grades for LL.M. students must conform to section II.B.

Example 2
Energy Law has an enrollment of 25 J.D. students and 8 LL.M. students. The grades for J.D. students must conform to Section II.B; the grades for LL.M. students must conform to section II.C.

G. Default F Grades: No Effect on Curve
This policy is intended to apply only to grades that a professor has given as the result of assessed work in the course and not to “F” grades that have been given as a result of a failure of a student to complete the requirements of the course.

B.4 PASSING GRADES AND GRADUATION CREDIT
To satisfactorily complete most courses and to earn credit toward graduation, a student must receive a grade of D or better. However, in the following courses, a student must receive a grade of C (2.0) or better to earn credit toward graduation: Legal Reasoning, Research, and Writing; Appellate Advocacy; a required seminar; and Trial Advocacy.

Students must earn a grade of C or better in at least one seminar to satisfy the seminar requirement for graduation. Students may choose to take more than one seminar. As long as the student has satisfied the seminar requirement with a C or better in at least one seminar, the student will receive graduation credit for additional seminars so long as the student attains a passing grade of D or better in the additional seminars.

Students who use Trial Advocacy to satisfy the capstone requirement must obtain at least a C to do so; students who take Trial Advocacy as an elective (i.e., they have taken and passed another capstone course) need only a passing grade for the Trial Advocacy credits to count toward graduation.

B.5 GRADES OF “INCOMPLETE”

Incomplete Grades
A grade of I (Incomplete) is a temporary grade assignment used when unforeseen, non-academic circumstances arise that prohibits students from completing the last course assignments at the end of the semester. The grade of Incomplete is typically assigned because of an excused absence from assignments that are unavoidably incomplete, as determined by the instructor. Students who are failing a course (exclusive of the incomplete work) may not request an Incomplete.

Students who want to be considered for an Incomplete must apply to their instructor prior to the end of the term. If the instructor agrees, the instructor and the student must negotiate the conditions under which the grade of I will be changed to a letter grade and sign a contract. The date to submit incomplete work cannot be set beyond the last day of class of the following semester. If the student does not complete the terms of the contract then the instructor should submit a grade of F. All contracts for Incomplete grades must be filed with the Associate Dean for Academic Affairs.

To remove the grade of I, a student does not register for the course again. If the Incomplete grade is not changed no later than the end of the next term (excluding summer), the I grade will be replaced with an F, which is worth 0 quality points.

Shortening Time Limit
A faculty member who assigns an "Incomplete" to a student may shorten the completion deadline to an earlier date than the last day of class of the following semester, but may not extend the deadline beyond the limit.

Semester Awarded
When the student completes the course requirements, the credits are assigned to that semester in which the student originally enrolled in the course.

Shortened Time Limit for Students on Probation
Students who are academic probation and who receive an "Incomplete" on work undertaken during the student's probationary term shall complete requirements for the course and procure the faculty member's removal of the "Incomplete" within eight weeks following the last examination date in the semester in which the student was registered for the course. Except for this reduced time limitation, all other provisions in the subsection and the "Deferment of Exams or Assignment Deadlines" subsection apply in the case of such a student on probation.

B.6 GRADE APPEAL
A student may initiate a formal grade appeal prior to the end of the seventh week of classes of the semester following the one in which the grade was awarded pursuant to the West Virginia University College of Law Grade Appeal Policy and Procedure. Students with questions about the grade appeal policy or procedure should consult the Administrative Assistant to the Associate Dean for Academic Affairs. Students who fail to begin the grade appeal process by meeting with the instructor prior to the end of the seventh week of classes of the succeeding regular (i.e., fall or spring) term have waived all
rights to a grade appeal. (E.g., a student appealing a grade from a fall class would need to meet with the instructor prior to the end of the seventh week of the spring semester in order to preserve his or her right to appeal a grade.)

B.7 GRADE APPEAL PROCEDURE

Step I. The student shall discuss the complaint with the instructor involved prior to the end of the seventh week of classes of the regular (i.e., fall or spring) semester following, whether the student is enrolled or not. If the two parties are unable to resolve the matter satisfactorily or if the instructor is not available, or if the nature of the complaint makes discussion with the instructor inappropriate, the student shall notify the Associate Dean. The Associate Dean shall assume the role of an informal facilitator and assist in resolution attempts. If the problem is not resolved within fifteen calendar days from when the complaint is first lodged, the student may proceed directly to Step II. To mount a successful appeal of a grade under Steps II or III below, a student must demonstrate that the professor's actions in assigning that grade were arbitrary and capricious.

Step II. The student must prepare and sign a document that states the facts constituting the basis for the appeal within thirty calendar days from when the original complaint was lodged. Copies of this document shall be given to the instructor and to the Associate Dean. If, within fifteen calendar days of receipt of the student's signed document, the Associate Dean does not resolve the problem to the satisfaction of the student, the student will forward the complaint to the instructor's Dean. (See Step III.)

Step III. Within fifteen calendar days of receipt of the complaint, the Dean shall make a determination regarding the grade, making any recommendations for a grade change to the instructor involved. If the instructor involved does not act on the Dean's recommendation, or if the student is in disagreement with the decision of the Dean, the Dean will refer the case to a representative committee appointed by the Dean for final resolution. This committee shall consist of three or more faculty members, including at least one person outside the instructor's discipline.

1. Upon receiving an appeal, the committee will provide the grade challenge by written notification to the faculty member involved, which shall include a statement of the facts and evidence to be presented to the student.
2. The committee shall provide the faculty member involved and the student making the appeal written notification of the student's right to appear at a hearing to be held before the department, college, or school representative committee, together with notice of the date, time, and place of the hearing.
3. The administrative procedure is not adversarial in nature; the formal rules of evidence do not apply.
4. The final decision of this committee shall be forwarded to the instructor and to the Dean involved. If the decision requires a change of grade, the instructor shall take action in accordance with the committee's decision.
5. If the instructor does not act within five days, the Dean shall make any necessary grade adjustment.
6. In the case of grade appeals, the Dean functions as the President's designee; therefore, implementation of this decision shall end the appeal procedure.

C. ACADEMIC STANDING

1. Academic Difficulty (p. 533)
2. Academic Probation & Dismissal (p. 534)

C.1 ACADEMIC DIFFICULTY

Good Academic Standing. A student is in good academic standing if that student has not been dismissed and is not on academic probation as those terms are defined in this catalog.

Repeating Courses. Receiving an F in a course does not generally require retaking the course. The F simply is added to one's GPA, and no credit hours toward graduation are given. However, if a student receives a failing grade in a course required for graduation, the student must repeat that course and receive a passing grade. If a student does not pass a required seminar or capstone course, that student may retake that seminar or capstone or take any other. When a course is repeated, both grades appear on the student's transcript, and both grades are calculated into the student's GPA, but credit toward the graduation requirement is awarded for only one enrollment.

Receiving Credit for Less Than an Entire Course. No credit is given for less than an entire course.

Grade Changes. A student may request a grade review anytime during the academic month following the student's receipt of the grade. A faculty member may not change a grade following the last day of classes in the semester following that in which a grade was awarded. Any proposed grade change must be submitted in writing by the faculty member to the Associate Dean for Academic Affairs with stated reasons for the change. Grade changes proposed because of arithmetic errors will be approved by the Associate Dean. Grade changes proposed because of changes in evaluation must be approved by the full faculty.
C.2 ACADEMIC PROBATION & DISMISSAL

Notification. The Associate Dean for Academic Affairs notifies in writing any student who is not in good academic standing. The notice sets forth the student’s academic situation and advises the student of actions available to the student under this section. The notice is sent as soon as possible after the student’s academic standing is determined. Students who do not receive notice are nevertheless responsible for knowledge of their academic situation and for taking actions necessary under this section. A student is in good academic standing if that student has not been dismissed and is not on academic probation as those terms are defined in this catalog.

Summary of Probation and Dismissal Rules. For all rules regarding academic probation and dismissal, the relevant GPA figures are semester and cumulative law school GPAs. Law school GPA does not include grades earned in other WVU colleges or at other law schools. The following is a summary of the probation and automatic dismissal rules:

- **End of First Semester.** Students whose first semester grades fall below 2.30 receive a letter from the Associate Dean’s Office to that effect, offering consultation and referral to the Academic Excellence Program. Such students must participate in the Academic Excellence Program in the second semester.

- **End of Second Semester Only.** Any student whose cumulative average is below 1.85 at any time after his or her second semester in law school is automatically dismissed. If a student dismissed at the end of the second semester has a GPA in any semester during the first year of less than 1.5, that student may be readmitted to the West Virginia University College of Law only by making an initial application through the admissions process. This application is only made in accordance with the regular admissions cycle, so most applicants will be required to wait a year before their application is processed. If readmitted, the applicant begins law school as if she or he were a first-time student. If a student dismissed at the end of the second semester has no GPA in any semester of the first-year curriculum of less than 1.5, that student may apply for readmission by following the procedures set forth in this handbook under “Readmission.” A student is placed on academic probation when that student’s cumulative grade point average falls below 2.30 but is above 1.85 after the conclusion of his or her first-year curriculum. A student on academic probation has one semester in which to raise his or her cumulative grade point average to 2.30. Failure to meet this requirement results in dismissal.

- **End of Third through Sixth Semesters:**

  1. **Cumulative Grade Point Average.** Any student whose cumulative grade point average is below 1.85 at any time after his or her third semester in law school is automatically dismissed. A student whose cumulative grade point average falls between 1.85 and 2.30 any time after his or her third semester in law school is placed on academic probation. A student on academic probation has one semester in which to raise his or her cumulative grade point average to 2.30. Failure to meet this requirement will result in dismissal. Under no circumstances will a student be allowed to graduate unless his or her cumulative grade point average is 2.30 or better.

  2. **Semester Grade Point Average.**

     * **General Rule.** Any student who fails to attain a grade point average of 2.30 in any individual semester of his or her second or third year in law school is placed on academic probation, regardless of his or her cumulative grade point average. This rule shall apply only to students who complete at least eleven semester credit hours of work for which they receive a letter grade (i.e., A, B etc., but not P). For purposes of this rule, first and second summer sessions count as a single semester. Accordingly, a student who took eleven or more graded hours across two summer sessions and whose GPA in those courses fell below 2.30 would be placed on academic probation under this rule.

     * **Part-Time Students.** A student who earns a semester grade point average lower than 2.30 over fewer than eleven letter-graded credit hours per semester for two consecutive semesters after the first year of law school is placed on academic probation, regardless of his or her cumulative grade point average. For purposes of this rule, first and second summer sessions count as a single semester. Students with a semester grade point average lower than 2.30 over fewer than eleven letter-graded credit hours for one semester must meet with the Associate Dean for Academic Affairs.

        A student placed on academic probation under “General Rule” or “Part-Time Students” will be dismissed for failure to meet academic requirements, regardless of his or her cumulative grade point average, if he or she fails to attain a semester grade point average of 2.30 or better in the next regular (i.e., fall or spring) semester. This rule applies regardless of the number of graded credit hours taken in the probationary fall or spring semester, so students who choose to take a low number of graded credit hours do so at their own risk.

- **Failing a Majority of Credit Hours.** Any student who, after completing the first-year curriculum in the West Virginia University College of Law, receives failing grades in courses aggregating one-half or more of the student’s credit hour load for a given semester is dismissed. For the purposes of this rule, it does not matter what the student’s grade point average is for the semester in question, nor does it matter what the student’s cumulative grade point average might be. However, this rule does not apply to students taking two or fewer courses in a semester.

- **Transfer Students with a West Virginia University College of Law Grade Point Average below 2.30.** A transfer student cannot graduate from the West Virginia University College of Law if the cumulative grade point average of the grades that the student earned at the West Virginia University College of Law is less than 2.30.

- **Readmission.** Students seeking readmission should file petitions with the Chair of the Academic Standards Committee, and the petitions should demonstrate that the reasons for the student’s academic deficiencies no longer exist. The Committee shall review each petition based upon this standard. The Academic Standards Committee will favorably consider a student’s participation in the Academic Excellence Program in deciding on any petition for readmission following an academic dismissal. The committee will also view a student’s failure to participate in the Academic Excellence Program, despite an invitation or direction to do so, as a negative factor in deciding on a petition for readmission following an academic dismissal.
dismissal. If the Committee denies readmission, the student may appeal to the Dean, who may remand, affirm, or reverse the Committee’s decision. The Dean has the discretion to seek the advice and counsel of the full faculty. A student may petition for readmission for the semester immediately following the semester he or she is dismissed. To do so, the student must deliver a petition for readmission to the Chair of the Academic Standards Committee within ten days of his or her receipt of notification of dismissal from the Registrar. If the tenth day is a weekend or holiday, then the student must deliver the petition on the next business day. A student also may petition for readmission after two academic semesters have passed following the student’s dismissal (even if the student has already petitioned immediately after his or her dismissal). For purposes of this rule, summer sessions shall not count as academic semesters.

• **Permanent Dismissal.** The West Virginia University College of Law shall not readmit any student who has been dismissed twice under these rules for failure to meet academic requirements. In addition, students readmitted through petition to the Academic Standards Committee have two semesters within which to bring their cumulative grade point average up to 2.30, as follows: (1) if the readmitted student fails to earn a 2.30 or better grade point average for the first semester following readmission, the student is permanently dismissed and is not eligible for readmission and (2) if that semester’s grade point average is 2.30 or better but the cumulative grade point average remains below 2.30, the student has one additional semester in which to bring the cumulative grade point average up to 2.30. If, after that second semester following readmission by petition to the Academic Standards Committee a 2.30 cumulative grade point average has not been attained, the student is permanently dismissed and is not eligible for readmission.

**D. HONORS**

1. Class Rank (p. 535)
2. Order of the Coif (p. 535)
3. Order of the Barristers (p. 535)
4. Patrick Duffy Koontz Award (p. 535)

**D.1 CLASS RANK**

The following rules apply to class rank:

Class Ranks. Class ranks are calculated at the completion of each semester, except for 1L students, whose first ranking will not be established until the completion of their first year.

Top 50%. At the completion of each semester, students in the top 50% of the class are individually informed of their class rank in Degree Works. Students outside the top 50% of the class are not ranked. These rankings are not publicly announced. Students who graduate in the top 25% of their class have their class ranks noted on their university transcripts.

Grade Point Averages. The grade point averages that demarcate the top 25%, 33%, and 50% are publicly announced at the end of each semester.

**D.2 ORDER OF THE COIF**

Order of the Coif is an academic honor conferred by the faculty upon its graduates from among the top 10% of the graduating class. Coif graduates have this honor noted on their university transcripts. To be eligible for election, students must complete all of their required courses (see above “Courses Required to Graduate,” pp.1-4) at the WVU College of Law. A student may transfer up to nine credit hours of a law school’s regular curriculum taken at an Association of American Law Schools (AALS) approved law school during that school’s academic year, summer terms on campus, or summer abroad programs approved by the ABA. For purposes of Coif, the grade(s) earned for these hours will not be averaged into the student’s GPA but shall be treated as pass/fail credit. The effect of this rule is that the grade point average used for selection to the Order of the Coif is based solely on the grades earned at the West Virginia University College of Law.

**D.3 ORDER OF BARRISTERS**

A national honorary organization, the Order of Barristers, encourages oral advocacy and brief writing skills through effective law school moot court programs. Members of the Marlyn E. Lugar Trial Association, the Moot Court Board, and students who have outstanding oral advocacy achievements are eligible for the award. See the Associate Dean’s assistant for applications in March.

**D.4 PATRICK DUFFY KOONTZ AWARD**

The Patrick Duffy Koontz Award is a monetary prize whose recipients are selected by the College of Law scholarship committee. The award is announced at graduation and is given to students from West Virginia who demonstrate excellence in scholarship, character, and leadership potential.
E. GRADUATION

1. Degree Works (p. 536)
2. Hours to Graduate (p. 536)
3. College of Law Graduation/Hooding Website (p. 536)

E.1 DEGREE WORKS

Degree Works is an online check sheet (audit) for students to review and monitor progress toward degree completion. It organizes academic coursework into blocks of requirements to help easily identify courses completed and what courses you still need in order to complete the degree. To access Degree Works,

- Log on to your MIX account using your MyID username and password.
- Click on the STAR tab.
- Scroll down to the ‘Resources’ heading and click the ‘Degree Works’ link.

The Degree Works audit provides a review of past, current, and planned coursework as well as information about completed and outstanding requirements. The audit is organized by ‘blocks.’ These blocks show what requirements are needed to graduate and show what is needed to do in order to fulfill the requirements within each block. The following ‘blocks’ may appear on the audit:

- Degree in Doctor of Jurisprudence: This block verifies that all requirements, including required courses, the minimum GPA requirement, and the ninety-one-hour credit requirement, have been met.
- Major in Law - J.D.: This block verifies that all required courses (i.e., first-year courses, Appellate Advocacy, seminar, perspective course, capstone requirement) have been completed and that any applicable grade requirements for those courses (e.g., a grade of C or better in Appellate Advocacy) have been satisfied.
- Law Courses: This block is a summation of all law courses that are being used to meet the ninety-one-hour course requirement.
- Failthrough: The Failthrough block is a block for courses that are not being used to satisfy any other requirements in your audit (i.e., ninety-one-hour requirement, first-year requirements). These courses count towards the total number of degree hours and GPA.
- In-Progress: This block reflects all courses currently in-progress or registered for a future semester.
- Insufficient/Withdrawn/Repeated: This block shows courses that you have withdrawn from or failed, courses that were taken more than once (but were not repeatable for credit), and audited courses.

If you are a joint-degree student (J.D./M.B.A. or J.D./M.P.A.), your Degree Works audit will reflect only work completed in the J.D. program. Because Degree Works cannot be programmed to take into account the credit hours earned for work on the other half of your joint degree, it will not accurately reflect your progress toward your J.D. If you have questions about whether you are on track, please contact the Assistant Registrar for the College of Law and/or the Associate Dean for Academic Affairs. When you have completed your joint-degree program, an annotation will appear on your transcript recording the credit hours you received for completing your joint degree program.

If you believe there is an error in your Degree Works audit, please contact the Assistant Registrar for the College of Law and/or the Associate Dean for Academic Affairs. For additional information on Degree Works, please visit the website (http://registrar.wvu.edu/dw) of the University Registrar.

E.2 HOURS TO GRADUATE

Every student must satisfactorily complete (see the “Passing Grades and Graduation Credit” subsection) ninety-one credit hours and must be in good academic standing to graduate. Except in circumstances described in the section “Earning Law School Credit Outside the Law School,” all these credits must be earned at the College of Law. In any event, only College of Law courses will count as part of the student’s grade point average. All students must have a cumulative grade point average of 2.30 or above (for students admitted as of Fall 2015) in order to graduate from the College of Law.

E.3 COLLEGE OF LAW GRADUATION/HOODING WEBSITE

The Graduation/Hooding website for the College of Law goes live each year in the spring. This contains all forms and information for College of Law graduates.

Externships & Pro-Bono

EXTERNSHIPS/PRO-BONO
1. EXTERNSHIP PROGRAM GUIDELINES

I. GOALS & OVERVIEW

The Externship Program is designed to provide students with an opportunity to gain practical legal experience as part of their legal education. Two general types of externships are available at the College of Law: Public Service Externships (part-time) and Federal Judicial/Federal Agency Externships (full-time). The overarching goals of the Externship program are consistent with and are designed to serve the goals articulated in the mission statement of the College of Law: “Preparing 21st century lawyers and leaders to serve the public, [and] government, . . . —both locally and globally—while focusing on justice, ethics, professionalism, and service in a diverse, vibrant and respectful community.”

To that end, the Externship Program offers the opportunity to incorporate practice experience with discussion, critical thinking, reflection, and analysis. The purpose of the program is to help students in the following ways:

1. to develop the art of lawyering, including research, writing, analysis, interviewing, and communication of facts and information;
2. to identify professional goals and reflect on individual professional development;
3. to develop sensitivity to issues of professional responsibility, ethical problem solving, and the role of the lawyer in providing access to justice in society; and
4. to develop awareness of meaningful career opportunities in public interest and governmental settings and to establish relationships in chosen fields of law.

II. POLICIES & REQUIREMENTS

The Public Service and Federal Judicial/Federal Agency Externships require students to perform substantive legal work to receive academic credit. All externships must be unpaid. Additionally, student externs must be supervised at their placement by a lawyer. In addition to supervision at their placement, students are also supervised by a faculty member and are required to enroll in a one-hour course component. The course component includes class meetings, time-keeping assignments, reflective journals, and other assignments to further the experiential learning. The policies and requirements outlined below are designed to ensure a high-quality experience for students as they work toward their educational goals during their externship.

For academic planning purposes, only one externship can be counted toward your total graduation requirement. Further, students may receive no more than 26 total “out of classroom” credits toward graduation. This includes an externship, moot court, law review, independent study, and foreign study. This credit maximum does not include credits earned in the law school clinic. (More complete information is available in the Student Handbook.)

Students interested in any externship opportunity should meet with the Director of the Center for Law and Public Service to discuss the available placement options and eligibility requirements outlined below.

A. Externship Placements

Two general types of placements are available for students. First, students can pursue part-time externship opportunities in various Public Service Externships during the summer, fall, or spring terms. Second, students can pursue full-time externship opportunities in either a Federal Judicial or Federal Agency Externship during the fall or spring terms. A brief summary of the placement options is outlined below.

Part-time Public Service Externships may be performed with government offices or agencies, the judiciary, legal aid offices, or other non-profit or public interest organizations performing legal work. Examples of approved part-time Public Service Externships have included placements with public defenders, prosecutors, judges, legal aid offices, general counsel of universities, general counsel of non-profit hospitals, state environmental protection agencies, colleges, legislatures and legislative committees, and other non-profit or public service organizations.

Full-time Federal Judicial Externships may be performed with any federal judge at the district or circuit court level. Full-time Federal Agency Externships may be performed at any approved federal agency. Full-time federal agency sites have included the National Labor Relations Board, the Securities and Exchange Commission, and the Mine Safety and Health Administration. Please see the Director of the Center for Law and Public Service for a list of approved local sites.

If there is another externship opportunity that a student wants to pursue that is not on the list of approved sites, then the student should contact the Director of the Center for Law and Public Service for approval first, then apply to the office or organization. If students have questions about placements or need advice about finding a site that best fits with their educational goals, then they should contact the Director of the Center for Law and Public Service at (304) 293-8555.

The Externship Program does not include work in the private sector, and no externships in private sector settings will be approved. All placements must be approved by the Director of the Center for Law and Public Service or the Teaching Professor for the course.

B. Field Placement Work and Credit Requirements
Work performed at the field placement for academic credit must be unpaid. Students must have adequate supervision, guidance, and training by a dedicated field supervisor at the site. The field supervisor must be a lawyer. Students may choose from three different externship types:

1. **Full-time Federal Agency Externship during the fall or spring semesters.** Externs must work full time (as defined by the site) over the course of the semester to earn 13 credits. Of those 13 credits, 6 are graded and 7 are pass/fail. The graded portion of the course is earned through enrollment in the full-time agency externship course. The pass/fail credits are earned through completing work assignments at the externship site. To qualify for this externship, students must have completed at least one year of law school, submit a letter of recommendation from a law school faculty member recommending the student for the externship, and be in the top 40% of their law school class.

2. **Full-time Federal Judicial Externship during the fall or spring semesters.** Full-time judicial externs also earn 13 credits over the course of the semester. Of those 13 credits, 6 are graded and 7 are pass/fail. The graded portion of the course is earned through enrollment in the full-time judicial externship course. The pass/fail credits are earned through completing work assignments at the judicial externship site. To qualify for this externship, students must have completed at least one year of law school, submit a letter of recommendation from a law school faculty member recommending the student for the externship, and be in the top 25% of their law school class.

3. **Part-time Public Service Externship during the summer, fall, or spring terms.** Part-time Public Service Externship opportunities are available with a federal agency or a state agency, federal or state judiciary, legal services office, or other non-profit organization. Students may earn a minimum of 3 to a maximum of 6 credits. Of those, 1 is graded and the rest are pass/fail. Students can choose to earn a variable number of pass/fail credits -- between two (2) and five (5) site placement/field work credits during the summer session or during a fall or spring semester. Students will receive one (1) academic credit for every fifty (50) hours of work performed during the chosen academic term. Students are advised to consult with the field placement supervisor to create a suitable work schedule. To be eligible, students must have completed one year of law school and be in good academic standing. Sites may require a higher standard, however.

**C. Externship Class Requirements**

Students who are selected for a full-time Federal Agency externship will enroll in Law 655 (the graded course) and in Law 656 for the field-work portion of the externship. Students who are selected for the full-time Federal Judicial externship will enroll in Law 780 (the graded portion of the course) and in Law 780A for the field work portion of the course. Students who enroll in the part-time Public Service Externship course will register for Law 653, which is the one-hour graded course, and Law 654 for the variable number of placement/field work credits.

The externship courses will meet periodically on campus during the semester and, depending on the placement site, other course meetings will be arranged online or through distance-learning technology. During the field placement for each of the externship courses, students will be required to submit the following assignments to successfully complete the course requirements:

- reflective essays or journals related to field work;
- a class presentation on a topic that draws upon the externship experience;
- discussion topics online via TWEN to facilitate student communication and foster experiential learning;
- bi-weekly time sheets documenting hours and work performed;
- supervisor evaluations (including a mid-semester and final evaluation); and
- full-time federal judicial and federal agency externs must write a substantive law-review style paper based upon an issue related to the externship placement and field work.

These assignments are designed to enhance the students’ field experiences and are more fully described in the course syllabi.

**III. STEPS FOR REGISTRATION AND ENROLLMENT**

**A. Registration**

Students must attend the externship information/registration session when announced. If students cannot attend this meeting, they must set up an individual meeting with the Director of the Center for Law and Public Service or the Teaching Professor for the course. Students interested in the Externship Program must submit a resume, unofficial transcript, cover letter, letter of recommendation (for full-time Federal Judicial or Federal Agency Externships), and a letter stating the name and contact information for the placement (or potential placement if awaiting confirmation.) Please submit a hard copy of these materials to the Director of the Center for Law and Public Service before the deadline announced each semester.

Upon approval, students will register for the appropriate externship course.

**B. Receiving credit**
Students will submit weekly timesheets, attend any scheduled class meetings or participate in on-line discussions, and complete all course assignments.

Students must submit the signed Externship Supervisor Agreement available on the class TWEN site.

Students must complete all field placement work in a competent and professional manner in accordance with the relevant Rules of Professional Conduct.

Students must submit a Final Evaluation from their supervisors (unless you are working with the Federal Judiciary).

**IV. FIELD PLACEMENT SUPERVISION**

Field placements are asked to identify one person, who must be a lawyer, who will be the student’s primary supervisor and contact person for the externship. The field supervisor at the chosen placement must agree to support the student’s educational goals. While a student will often perform assignments for multiple lawyers at an organization, the externship requires that one person is designated as the field supervisor and mentor for the student. The supervisor and student should meet at least once per week to review assignments and discuss questions. The supervisor will complete a final letter of evaluation to be submitted by the end of the semester.

Students are asked to coordinate with their field placement supervisors to complete the following tasks:

- meet with the field placement supervisor at the beginning of the placement to discuss the student’s learning goals during the placement;
- meet with the supervisor weekly to review and evaluate assignments, overall performance, and general issues; and
- set up a final evaluation exit meeting to obtain a final evaluation form from the field supervisor and submit it to the Teaching Professor for the course. The final evaluation form must also include a certification of hours from the Field Placement Supervisor.

**2. PRO-BONO**

The Center for Law and Public Service promotes public service opportunities for law students, including opportunities for pro bono work. The term “pro bono” means “for the public good.” In the legal profession, pro bono work refers to work that is performed voluntarily and free of charge. Pro bono service is the responsibility of all members of the legal profession. WVU’s pro bono program allows law students to begin pro bono service now and encourages students to develop a lifelong commitment to pro bono work.

The WVU College of Law pro bono program partners with legal services organizations and community agencies to provide opportunities for law students to serve those in need. Pro bono projects will be designed to aid individuals or families of limited means; charitable, community and governmental organizations who provide assistance to those of limited means; and activities for improving the law, the legal system, or the legal profession. Pro bono work may not be for credit and will not include work done for a clinic or externship. All pro bono work must be supervised by a licensed attorney and will be tracked by the Center for Law and Public Service.

For more information about pro bono opportunities and guidelines, see the Pro Bono Handbook. If you have questions about or suggestions for a pro bono project, please see Jennifer Powell, Director of the Center for Law and Public Service.

1. About the Student Code of Professional Responsibility (p. 540)
2. Dismissal for Misconduct (p. 540)
3. Academic Rights and Responsibilities (WVU) (p. 540)

A.1 ABOUT THE STUDENT CODE OF PROFESSIONAL RESPONSIBILITY

The students and faculty of the College of Law have adopted a Code of Professional Responsibility to prevent and punish academic misconduct by students in the College. A copy of that Code is included in this Student Handbook and is binding on all students. Enforcement of the Code rests principally in the hands of the student body with oversight by the faculty and the designee of the President of the University. Infractions are investigated and adjudicated by the Student Ethics Council.

A.2 DISMISSAL FOR MISCONDUCT

In view of its public and professional responsibilities with respect to admission of candidates to the practice of law, the West Virginia University College of Law reserves the right to drop any student from the rolls whenever, by formal decision reduced to writing, the faculty finds that the student is unfit to meet the qualifications and responsibilities of the legal profession. Dismissal is considered whenever a student is involved in serious criminal conduct or conduct that would justify professional disciplinary action if the person were a lawyer. Students remain subject to all general rules and regulations of the University and the West Virginia Board of Governors and to the Student Code of Professional Responsibility.

A.3 ACADEMIC RIGHTS AND RESPONSIBILITIES (WVU)

The Office of Student Conduct, located in Boreman North, is staffed by a member of the Office of Student Life and is available to assist any student, student organization, staff member, faculty member, or administrator in understanding and applying the West Virginia University Campus Student Code (http://studentconduct.wvu.edu). Should you have any questions or concerns, please contact LiDell Evans or the Office of Student Conduct at 304-293-8111. In case of conflicts, the Law Student Code of Professional Responsibility controls.

B. WVU COLLEGE OF LAW STUDENT CODE OF PROFESSIONAL RESPONSIBILITY

1. The Ethics Council (p. 541)
2. Academic Responsibility and Duties (p. 542)
3. Adjudicatory Procedures (p. 543)
4. Faculty Review (p. 544)
5. Sanctions (p. 545)
6. Appeal (p. 545)
7. Complaints Against Graduating Students (p. 545)
8. Miscellaneous Procedures (p. 546)
9. Amendment or Repeal Procedure (p. 546)
10. Adoption Procedure (p. 546)

Preamble. The cornerstone of our legal system is the integrity of the individual lawyer. As future lawyers, our conduct is governed by the highest standards of ethics. As students enrolled in the West Virginia University College of Law, we recognize and accept the following standards, obligations, and responsibilities as governing our actions and conduct. This Student Code of Professional Responsibility (the “Student Code”) is intended to supplant Article III, B.1., governing acts of academic dishonesty, of the West Virginia University Student Conduct Code for students enrolled in the College of Law.
THE ETHICS COUNCIL

A. Composition

1. There is hereby created an Ethics Council composed of three members from each class.

2. The members of the Council shall be elected at the end of the spring semester in conjunction with the election of class officers. Any student, full or part time, who is in good academic standing, shall be eligible to run for a seat on the Ethics Council. An elected member of the Ethics Council must relinquish the office if he/she fails to remain a student in good academic standing. First-year members shall be elected in the fall of their entering year. Such elections shall be conducted by the Student Bar Association. The terms of office for the members of the Ethics Council shall run from their election to the election of their successors, with the following qualifications:

   a) The terms of graduating members shall expire on graduation;

   b) The terms of members who are in the process of hearing a case when their successors are elected shall be extended to allow the members to complete the proceeding;

   c) The elected representatives of the second-year class to the Ethics Council not re-elected in the spring election and, if necessary, the elected representatives of the first-year class not re-elected in the spring election, shall continue to serve until the election of the first-year class members of the Ethics Council. Upon the election of the first-year representatives to the Ethics Council, the holdover members’ term shall end.

3. A vacancy on the Ethics Council shall be filled by appointment by the remaining members of the Ethics Council. The individual selected to fill the vacancy shall be a member of the class in which the vacancy occurs. The appointee shall serve for the remainder of the unexpired term.

4. The Chairperson shall be elected from among the third-year class representatives to the Ethics Council within two weeks of the election of the first-year class representative. From the time of the election of the representatives of the Ethics Council in the spring semester until the selection of the Chairperson after the first-year election in the fall semester, the rising third-year student to receive the greatest number of votes in the most recent election shall serve as Chairperson.

B. Investigative Panel and Hearing Panel

1. Composition: Following the elections in the spring semester, after the election of the Chairperson in the fall semester and at the beginning of the second semester, the Chairperson shall appoint from the members of the Ethics Council an Investigative Panel of three persons, no more than two of whom shall be from the same class in law school. The Chairperson of the Ethics Council shall designate one member of the Investigative Panel to serve as its Chairperson.

2. Duties: The Investigative Panel shall investigate and collect evidence and information concerning any complaints involving an alleged violation of this Student Code. Upon completion of the investigation, the Investigative Panel shall take action as set forth in Section III (A)(1).

3. Hearing Panel: The remaining members of the Ethics Council will serve as the Hearing Panel for the purpose set forth in Section III (C).

C. Quorum and Margin of Decision:

1. Two members shall constitute a quorum for the Investigative Panel, and the decision to charge a violation of the Student Code must be concurred upon by two members of the Investigative Panel.

2. Four members shall constitute a quorum of the Ethics Council Hearing Panel, and the vote of sixty percent of those in attendance shall be necessary to find a violation of the Student Code. For all other purposes, a simple majority shall decide issues which may arise, including votes on recommended sanctions.

D. Duties of the Ethics Council:

1. The Ethics Council shall promulgate, consistent with the provisions of this Student Code, such rules and regulations and prescribe such procedures as shall be necessary and proper to fairly and impartially fulfill its obligations under this Student Code. Upon the approval of the faculty, the rules and regulations shall become final unless subsequently amended as provided for in this paragraph.

2. Before each examination period, the Ethics Council shall take appropriate action to remind the student body of its obligation and responsibilities under the Student Code.

3. At the beginning of each school year, the Ethics Council will make a presentation on the Student Code as part of the orientation of incoming students.

4. The Ethics Council shall be responsible for the investigation and adjudication of alleged violations of this Student Code as set forth herein.
ACADEMIC RESPONSIBILITY AND DUTIES

A. Academic Responsibility. The West Virginia University College of Law expects every member of its academic community to share the historic and traditional commitment to honesty, integrity, and the search for truth. In keeping with this spirit, it shall be a violation of this Student Code for any student or applicant for admission to commit any act of academic dishonesty, which is defined to include, but is not limited to, the following:

1. Plagiarism: Plagiarism is defined in terms of proscribed acts: Students are expected to understand that such practices constitute academic dishonesty regardless of motive. Those who deny deceitful intent, claim not to have known that the act constituted plagiarism, or maintain that what they did was inadvertent are nevertheless subject to penalties when plagiarism has been confirmed. Plagiarism includes, but is not limited to, the following:
   a. Submitting as one’s own work the product of someone else’s research, writing, artistic conception, invention, or design; that is, submitting as one’s own work any report, notebook, speech, outline, theme, thesis, dissertation, commercially prepared paper, musical piece or other written, visual, oral or electronic/computerized material that has been copied in whole or in part from the work of others whether such source is published or unpublished;
   b. Incorporating in one’s subm ission, without appropriate acknowledgment and attribution, portions of the work of others; that is, failing to use the conventional marks and symbols to acknowledge the use of verbatim and near-verbatim passages of someone else’s work or failing to name the source of words, pictures, graphs, etc., other than one’s own, that are incorporated into any work submitted as one’s own.
   c. A student has a duty to report any other student(s) that he/she sees violating this rule against plagiarism in any way.

Every professor is allowed to establish a collaboration policy for his/her own course. Please refer to the course syllabus to learn what is permissible. However, one should always assume that collaboration is not permitted, unless the syllabus or professor specifically allows it.

2. Cheating and dishonest practice in connection with examinations, papers and projects, including but not limited to:
   a. Obtaining help from another student during examinations;
   b. Knowingly giving help to another student during examinations, taking an examination or doing academic work for another student, or providing one’s own work for another student to copy and submit as his/her own;
   c. The unauthorized use of notes, books, or other sources of information during examinations;
   d. Obtaining without authorization an examination or any part thereof;
   e. Obtaining without authorization any help from another student.

f. Forgery, misrepresentation, or fraud: Forging or altering, or causing to be altered, the record of any grade in a grade book or other educational record; Use of university documents or instruments of identification with intent to defraud; Presenting false data or intentionally misrepresenting one’s records for admission, registration, or withdrawal from the university or from a university course; Knowingly presenting false data or intentionally misrepresenting one’s records for personal gain; Knowingly furnishing the results of research projects or experiments for the inclusion in another’s work without proper citation; Knowingly furnishing false statements in any university academic proceeding. It is a violation of the Code for any student who witnesses a Student Code violation or who has credible information that a violation was committed to fail to report the violation to the Ethics Council, a faculty member, or a dean.

It is a violation of the Student Code for any student or applicant for admission at anytime to intentionally lie, give false information, make material misrepresentations, or omit material facts to the faculty, administration, or any student organization in the course of the academic, extracurricular, co-curricular, admissions, or placement programs of the College of Law. It is a violation of the Student Code for an officer or member of a student organization to (a) discourage observing members from reporting questionable conduct to the Ethics Council, or (b) sanction an organization member for reporting possible violations of the Student Code to the Ethics Council.

It is a violation of the Student Code for any student to refuse to cooperate with the Ethics Council in its conduct of an investigation or hearing.

B. Duties

1. Faculty members have a responsibility to support and enforce the Student Code and should report suspected violations to the Ethics Council.

2. If a faculty member reduces a student’s grade because of a suspected violation of the Student Code, the faculty member must give the student written notice of the fact and size of the penalty. If the faculty member learns of the suspected violation after grades were submitted, the faculty member may reduce the student’s grade upon notice to the student and without faculty approval.

3. If the student elects not to contest the grade reduction, that reduction shall become final and no further action, pursuant to this Code, shall be taken. If the student whose grade has been reduced because of a suspected violation elects to contest the grade, he or she may do so by invoking the procedures described in Part III, below. The faculty member’s notice to the student shall then serve as a complaint to the Ethics Council, and the Council shall process the charge as it would any other. Both the Ethics Council and, if review is sought, the faculty, retain the discretion to overrule, decrease, or increase the penalty imposed by the faculty member and to assess any other sanction in addition to or instead of the original
penalty. In all cases in which a student challenged a grade that was reduced because of a suspected violation of the Student Code, the procedures in Part III shall supersede the normal grade appeal procedures as to all issues relating to academic dishonesty.

III. ADJUDICATORY PROCEDURES

A. Complaint

1. Initial Inquiry: Upon receipt of a complaint alleging a violation of the provisions of this Student Code, the Chairperson of the Investigative Panel of the Ethics Council will convene a meeting of the Investigative Panel. The Investigative Panel will convene within seven calendar days from receipt of the complaint when classes are in regular session; or within four days after classes resume if the complaint is received during a period in which classes are not scheduled to meet including examination periods. It shall be the duty of the Investigative Panel to conduct such investigations as necessary, being as discrete as possible, into the allegations. When the initial inquiry is completed, the Investigative Panel shall either (1) close the case by recording its findings of fact and conclusion that no violation occurred and providing the charged student(s) with a copy (with the name of any complaining student deleted); or (2) upon a finding concurred in by two or more of its members that there is reason to believe a violation of the Student Code exists, institute a formal investigation of the charges.

2. Formal Investigation: If the Investigative Panel determines there is reason to believe a violation of the Student Code has occurred, it shall select one or more of its members or some other student enrolled within the College of Law to serve as Presenter of the alleged violation. In deciding who should serve as Presenter, the Investigative Panel shall consider:
   a) The student's ability to perform the duties of Presenter with discretion and without prejudice;
   b) Whether personal relations with the accused or known witnesses would inhibit or unduly influence the performance of his or her duties;
   c) Whether the reported violation occurred during a course of activity in which he or she has an interest; and
   d) any other conflict.

3. When the Investigative Panel reports to the Hearing Panel that probable cause for a violation exists, the Ethics Council Hearing Panel will contact the accused in writing and inform him or her:
   a) of the alleged violation and course of conduct to be investigated as a violation of the Student Code; and
   b) that he or she is entitled to be assisted by an advisor of his or her choice, provided, however, the advisor may not be a member of the College of Law faculty. The advisor may fully represent the student in all capacities as the accused finds necessary.

B. Procedure

1. Within twenty regularly scheduled class meeting days after his or her appointment, the Presenter will complete the investigation of the charges and will prepare a written account of the relevant facts.

2. Upon completion of the investigation, the Presenter will meet with the Ethics Council Investigative Panel and present a detailed summary of the result of the investigation. If it is reaffirmed that probable cause for a violation exists, the Investigative Panel shall advise the Chairperson of the Ethics Council Hearing Panel of the formal charges and request a date for a hearing. At least twenty regularly scheduled class days before the hearing date, the Chairperson of the Hearing Panel will notify the accused, in writing:
   a) of the date, time, and place of the hearing;
   b) of the specific charges and course of conduct alleged to constitute a violation of the Student Code; and
   c) that he or she is entitled to the assistance of an advisor of his or her choice, provided, however, the advisor is not a member of the College of Law faculty. The advisor may fully represent the student in all capacities as the accused finds necessary or appropriate.

3. If upon hearing the report of the Presenter, the Ethics Council Investigative Panel concludes probable cause for a violation does not exist, it shall dismiss the charges.

4. If the matter is dismissed, the Ethics Council Investigative Panel will notify the accused, in writing, of the final disposition of the complaint. Once a matter is finally disposed of at this stage, it shall not be re-opened by the Ethics Council, but the decision to dismiss may be appealed to the faculty pursuant to III(C)(6).

5. Should a violation occur at the end of a semester, the Ethics Council shall delay the proceedings until the next semester unless the accused makes a written request to expedite the matter and the Ethics Council concludes that the matter may be fairly adjudicated. The accused's ability to prepare and present his or her defense shall be a persuasive factor. If the violation involves a “graduating senior,” see sections V and VII.

6. Upon a showing of good cause, the time periods set forth in this section may be altered by the Ethics Council Hearing Panel.

C. Hearing
1. The Chairperson will preside over the hearing which may be attended by all members of the Ethics Council, the accused, the accused's advisor, and testifying witnesses. Members of the Hearing Panel shall have the duty to disqualified themselves from the Hearing Panel if they believe that they cannot reach an impartial decision, if there is a conflict of interest, or if he or she has a personal involvement in the matter. Once a member has disqualified him or herself, he or she shall not participate any further in the proceedings against the accused. In addition, the student accused of a violation of the Student Code shall have the right to challenge a member of the Hearing Panel for good cause shown. Upon such a challenge, the remaining unchallenged members of the Hearing Panel shall decide the merits of the challenge. Except for witnesses, who shall be sequestered, the hearing will be open to the public unless the accused requests a closed hearing. A request for a closed hearing must be made in writing to the Chairperson at least forty-eight hours before the scheduled time of the hearing. It shall be within the discretion of the Hearing Panel to grant the accused's request for a closed hearing.

2. At the hearing, it will be the duty of the Presenter to seek the truth. The accused may rebut any testimony presented and present his or her defense or proof of such mitigating circumstances as the accused deems necessary or appropriate, or both.

3. The hearing will be conducted under the following rules of procedure:
   a) the Ethics Council Hearing Panel may admit and give probative effect to evidence, including hearsay which possesses probative value. It may exclude incompetent, irrelevant, immaterial, and unduly repetitious evidence;
   b) documentary evidence may be received in the form of copies, excerpts, or incorporated by reference;
   c) the accused and the Presenter will have the right on every issue:
      i) to call witnesses and present evidence;
      ii) to cross-examine all witnesses called to present evidence at the hearing;
      iii) to examine and rebut all documents;
      iv) to submit rebuttal evidence; and
      v) to present summation and argument.
   d) The Hearing Panel shall decide the issue of guilt solely upon the evidence presented at the hearing. The burden of proof required to sustain any violation of the Student Code lies with the Presenter. The standard of proof is by a preponderance of the evidence.

4. At the conclusion of the hearing, the Ethics Council Hearing Panel will resolve the issue of guilt of the accused.
   a) Within two regularly scheduled class days, but in no event more than seven days, of the conclusion of the hearing, the Ethics Council Hearing Panel will inform the accused, in writing, of its decision, and if guilty, the sanctions it will recommend.
   b) If the accused is found to be not guilty, the Ethics Council shall set forth its findings in writing and dismiss the charges with prejudice and any and all records except the academic records, examination, or seminar papers of the College of Law, will be sealed and, after the expiration of any appeal time, may be destroyed with the written consent of all parties. A decision of not guilty may be appealed to the faculty by the Presenter or by the faculty member whose course is involved, if any, or the advisor of the co-curricular or extracurricular activity, if one is involved.
   c) If the accused is found guilty of a violation of the Student Code, the Ethics Council Hearing Panel will prepare a complete report of findings of fact, together with a recommendation of sanction, and submit the report, in writing, to the Associate Dean for Academic Affairs (hereinafter the Associate Dean) for faculty action. Notice of such submission and a copy of such shall be given promptly to the accused. The accused may also submit his or her written recommendations of sanctions or explain mitigating circumstances. The accused shall have the right to appeal to the faculty.
   d) An appeal to the faculty of the College of Law of a decision by the Ethics Council Hearing Panel shall be made in writing, within thirty calendar days from the date of written decision of the Ethics Council Hearing Panel.

IV. FACULTY REVIEW

A. Scope of Review. It is expressly provided that all findings of guilty or not guilty, dismissal, or the recommended sanctions may be appealed to the College of Law faculty. Upon appeal, the faculty shall have the discretion (1) to review the records from the Ethics Council Hearing Panel, (2) to permit appellate argument on the record of the proceedings before the Ethics Council Hearing Panel, or (3) to hear the case de novo. The faculty may review the legal standards applied by the Ethics Council and procedures it employed.

B. Procedure:

1. The Associate Dean or the Associate Dean's designee shall preside at the faculty hearing.
2. For the purposes of an appeal under the Student Code, the faculty shall consist of those individuals entitled to attend executive sessions of the faculty.

3. Any faculty member who has a conflict of interest or personal involvement in the matter shall excuse himself or herself from hearing the case on appeal. The accused shall have the right to challenge a faculty member for good cause shown. Upon such challenge, the remaining unchallenged members of the faculty shall decide the merits of the challenge.

4. A majority of the faculty entitled to hear the case shall constitute a quorum.

5. A vote of sixty percent of the faculty hearing an appeal shall be necessary to find a student accused of violating the Student Code guilty. All other matters, including a recommendation of sanctions if the student is found guilty, shall be resolved by majority vote.

6. The accused shall have the right to be assisted by an advisor at all proceedings before the faculty on appeal, provided, however, the advisor shall not be a member of the College of Law faculty.

7. If the proceeding before the faculty is a de novo hearing, the rules set forth in III (C) shall apply, including the standard of proof.

8. If the proceeding before the faculty is a review of the record or a review of the record with arguments, the Ethics Council’s Hearing Panel shall be affirmed if its decision is supported by substantial evidence.

9. If the appeal from the Ethics Council concerns only the recommended sanction, then all arguments to the faculty shall be submitted in writing and without oral arguments.

10. In the event of an appeal of a decision of the Ethics Council, the Associate Dean for the College of Law shall designate the Presenter, provided, however, the Presenter shall not be a member of the College of Law faculty.

11. The Associate Dean shall establish such additional procedures as necessary and as are consistent with the Student Code for conducting appeals from the Ethics Council Hearing Panel.

C. Faculty Decision. Consistent with the ABA Standards and its Interpretations (Standard 205), the decision of the faculty shall be final subject only to an appeal as set forth in Section VI. If the decision of the faculty is guilty, the faculty shall recommend appropriate sanctions to the Associate Dean.

V. SANCTIONS

A. Overview. The following sanctions are not intended to constitute the exclusive list of sanctions which may be recommended to the Associate Dean of the College of Law by the Hearing Panel or the faculty.

1. Reconsideration by the professor of the grade or credit to the violator of the specific course involved;

2. Written reprimand to be placed in a student’s College of Law academic file;

3. Ineligibility to participate in any co-curricular activity, or to receive a scholarship, loan, grant in aid, or employment, any of which are administered by the College of Law;

4. Suspension for one or two semesters, the first being the semester during which the offense occurred; or

5. Dismissal from the College of Law.

B. Imposed Sanctions. The sanctions imposed shall be commensurate with the nature of the violation. Failure to report a violation shall constitute grounds for the sanction of public censure, written reprimand placed in a student’s academic file, or ineligibility to participate in any co-curricular activities.

VI. APPEAL

An appeal of the faculty’s decision or the sanctions imposed by the Associate Dean may be made to the Dean of the College of Law who, pursuant to the provision of Section 6.3.4 of the West Virginia University Board of Governors Policy 15, Student Academic Rights, has been designated by the President of West Virginia University as the President’s designee to hear such appeals. Before reaching a decision on the Appeal, the Dean, as the designee of the President, shall consult with University Counsel to assure that all applicable procedural policies and rules have been followed. Following this consultation with University Counsel, the Dean shall render his or her decision within thirty calendar days after the receipt of written notice of the appeal. The decision of the Dean, as designee of the President, shall be final.

VII. COMPLAINTS AGAINST GRADUATING STUDENTS

If a complaint is received by the Ethics Council within the fourteen calendar days preceding the date of graduation of the accused student, the Ethics Council has authority to expedite the procedure outlined so long as the Ethics Council believes that the matter may be fairly adjudicated. If the Council concludes the matter cannot be fairly adjudicated before graduation, the student’s diploma will be withheld pending resolution of the charge. If the
accused is found guilty of a violation of the Student Code, the Ethics Council may recommend that he or she not be allowed to graduate from the College of Law or that graduation be delayed until prescribed conditions are met.

VIII. MISCELLANEOUS PROCEDURES

All hearings described in Section III will be documented and a record maintained. A permanent record of all documents will be kept for all findings of guilt by the Ethics Council. For findings of not guilty, all such documents, except records the College of Law maintains for all students as a normal part of the records, will be sealed, and, with the written consent of all parties, destroyed after expiration of the appeal period. An audiotape or written transcript of the hearing delineated in Section III (C) shall be made and provided for use on appeal. Thereafter, it may be destroyed.

IX. AMENDMENT OR REPEAL PROCEDURE

A. Student-Initiated Amendment or Repeal. This Student Code may be amended or repealed at any time. In order to initiate such amendment or repeal, a petition which sets forth the proposed amendment or calls for the repeal of this Student Code that contains the signatures of fifteen percent of the entire student body of the College of Law shall be presented to the Ethics Council. The proposed amendment or petition to repeal shall be posted for two weeks upon the appropriate bulletin boards within the College of Law. Approval of sixty percent of the student body shall be required for adoption of the amendment or repeal of the Student Code. The election shall be by secret ballot.

B. Ethics Council or Faculty-Initiated Amendment or Repeal. Amendment or repeal may also be proposed by a resolution approved by either a majority of all the members of the Ethics Council or a majority vote of the faculty. An amendment or repeal of this Code shall be effective upon ratification by the College of Law faculty.

C. Invalidation. Invalidation of any part of this Student Code for any reason shall not affect the validity of the rest of the Student Code.

X. ADOPTION PROCEDURE

This Student Code must be ratified by the faculty of the College of Law followed by approval of sixty percent of the students. The students shall vote in a referendum by secret ballot. The election shall be conducted by the Student Bar Association.

Adopted: April 4, 1991

Last Revised: July 1999

C. BAR ADMISSION

1. Admission to Practice (p. 546)
2. The Bar Exam (p. 547)
3. Action Checklists for Law Students (p. 547)
4. Bar Preparation Courses (p. 548)

An ex-president of West Virginia University, who now teaches at the College of Law, likes to remind incoming law students that they are not going TO law school, but rather THROUGH law school. He is right. New law students should realize that the first day of law school is actually the first day of a career as a lawyer. The first thousand days of that career (approximately) will be spent in studying how to be a lawyer and making strategic choices that help assure successful completion of a state bar exam and successful admission to practice.

1 Professor David Hardesty.

C.1 ADMISSION TO PRACTICE

A lawyer may not practice without a license. Because each state establishes its own licensing procedures, the process of admission to practice varies from state to state. Although the application is typically submitted to the state in the spring semester of the third year of law school, some states require early notice of an intent to practice within the state’s borders. Some even permit a law student to begin the application process early in the law school career at a significantly reduced price. Obviously, every first-year law student should review the application rules in the states where the student plans to practice.

The National Conference of Bar Examiners (NCBE) maintains a website that includes state-by-state bar admission information that is regularly updated with contact addresses, phone numbers, and web sites where application procedures can be reviewed. Access the NCBE website at this address: www.ncbex.org.

Each state’s admission process includes a character and fitness review that takes place after graduation. The character and fitness review is essentially a background check to assure that the applicant will practice law competently and ethically. The review is comprehensive but particularly scrutinizes the applicant’s record during the three years of law school. Hence, it is particularly important that incoming law students adopt a professional persona
that evolves positively during the law school career. For example, a law student who blemishes his or her reputation with substance abuse offenses may be delayed in the admission process until the state’s character and fitness committee is assured that the applicant has resolved all issues that might negatively impact the applicant’s ability to practice law competently and ethically. On the other hand, if an applicant has a past history of substance abuse, but has faced and solved that problem, past events are unlikely to prevent the applicant from being admitted to practice.

C.2 THE BAR EXAM

Because each state decides how to structure its bar exam, every first-year law student should research the specifics of the exams in the states where the student will practice. The NCBE creates a national bar admission exam that consists of four parts: the Multistate Bar Exam (MBE) (200 multiple-choice questions); the Multistate Professional Responsibility Exam (MPRE) (50 multiple-choice questions); the Multistate Essay Exam (MEE) (six essay questions); and the Multistate Performance Test (MPT) (two ninety-minute questions that focus on a practical lawyering task). Almost every state has adopted one or more of these national tests as part of the state-specific exam.

Some states also have a state-created component. Thus, a state’s bar exam can consist of NCBE components and state-specific components, and a law student who wishes to be prepared for the exam must research the exam format as well as the subjects tested by the exam.

Careful planning of coursework during law school can help assure that the student is well prepared for the exam. Although a student need not take every course tested by the bar exam, the summer bar exam prep period is too short to self-teach all the subjects that are tested. Hence, a law student should plan law school coursework with an eye toward being prepared.

West Virginia’s bar exam consists of all four tests created by the NCBE. Most students take the Multistate Professional Responsibility Exam after finishing the second year of law school. The post-graduation bar exam given in February for December graduates, and in July for May graduates consists of the Multistate Bar Exam, Multistate Essay Exam, and Multistate Performance Test. The following subjects are tested:

 Subjects tested by the MBE:
  • Constitutional Law
  • Contracts/Sales
  • Criminal Law
  • Criminal Procedure
  • Evidence
  • Federal Civil Procedure
  • Real Property
  • Torts

 Subjects tested by the MEE:
  • Business Associations (Agency and Partnership; Corporations and Limited Liability Companies)
  • Conflict of Laws
  • Constitutional Law
  • Contracts
  • Criminal Law
  • Criminal Procedure
  • Evidence
  • Family Law
  • Federal Civil Procedure
  • Real Property
  • Torts
  • Trusts and Estates (Decedents’ Estates; Trusts and Future Interests)
  • Uniform Commercial Code (Secured Transactions)

C.3 ACTION CHECKLISTS FOR LAW STUDENTS

The following checklists can help a law student stay on-track for successful completion of the bar exam and the admission to practice process.

1L YEAR:
  • Check the state’s website for licensing requirements and bar exam information.
  • Make a note of the subject matter covered by the state exam and use this information in planning coursework during the three years of law school.
  • If your state permits early application, consider applying now to save money.
• If you have character and fitness review concerns because of past or present events, start resolving those issues now. The same advice applies to financial issues that affect your credit history.
• Note whether your state requires the applicant to complete service hours while in law school (some states now require applicants to have completed a certain number of hours in an experiential learning environment prior to application).
• Start saving for the 3L expenses of graduation, admission to practice, and a bar exam prep course. Plan on having at least $8,000 to cover these costs and summer expenses.

2L YEAR:
• Review the 1L Year checklist and update.
• Complete the Professional Responsibility course and take the MPRE during the summer.
• Revisit the state’s website to note any possible changes.
• Plan your coursework strategically.

3L YEAR:
• Do a transcript check in the fall. Will you graduate as planned?
• Visit the website of the West Virginia Board of Law Examiners (or the website in the state where you will take the bar).
  1. Print and read the bar application materials.
     A. What are the state’s licensing requirements?
     B. What is the deadline for the application?
     C. What fees are applicable? Do I need financial help?
     D. Where will I complete the character review?
     E. What can I do now to start the process?
     F. Are there other deadlines?
  2. Understand the Bar Exam.
     A. What are the dates/location of the bar exam?
     B. What kinds of tests are on the bar?
     C. What subjects will be tested?
     D. How are the tests scored?
     E. What is the “passing” score?
• Visit the website of the National Conference of Bar Examiners (http://www.ncbex.org) at the end of the first semester and begin the application for admission no later than January 1. (The application can take weeks to complete with all the required information.)
• Learn as much as you can about the review programs for the bar exam, e.g., Kaplan, Barbri, and Themis. Choose one comprehensive program, pay for it, and get the books early for an early start!
• Assess the degree to which you are at risk for not passing the bar exam. Then make a plan to build on your strengths and minimize those risks.
• Make a realistic plan for your summer that includes at least 600 hours of on-task study time prior to the exam (the number of hours that most students say it takes to be ready for the exam).

NOTE: If any change to your student record occurs at any point (DUI, arrests, etc.), you must notify the Assistant Dean for Student Affairs and produce the information in written form for your student file. The Board of Bar Examiners will expect the information they review regarding your record to match what the College has on record in your student file.

C.4 BAR PREPARATION COURSES
The College of Law currently offers several for-credit bar exam preparation courses.

Multistate Performance Test Workshop: This one-credit course, which encourages students to learn how to apply substantive law in the context of a Performance Test examination, is open to select (by invitation only) upper-level students. The class provides in-depth training in legal reasoning for law school exams, the bar exam, and legal practice. Students receive guidance and feedback on all written work from the professor about ways to improve their legal reasoning skills.
**Essay Writing Workshop I:** This one-credit course is open to all third-year students. The course provides an overview of the bar exam, assists students with completing their character and fitness application, addresses how to study and spot issues in essay questions, and teaches students how to write essay questions.

**Essay Writing Workshop II:** This one-credit course is occasionally offered in conjunction with Essay Writing Workshop 1 to provide an additional hour of credit for select students who would benefit from supplemental instruction.

**Social Justice Policies**

A. NON-DISCRIMINATION AND EQUAL OPPORTUNITY

B. STUDENTS WITH DISABILITIES

C. SEXUAL HARRASSMENT

A. NON-DISCRIMINATION AND EQUAL OPPORTUNITY

The West Virginia University College of Law is an affirmative action/equal opportunity institution. The College does not discriminate on the basis of age, color, disability, national origin, race, religion, sex, sexual orientation, or veteran status in the administration of any of its education programs or activities or with respect to admission and employment.

The College neither affiliates knowingly with nor grants recognition to any individual, group, or organization having policies that discriminate on the basis of age, color, disability, national origin, race, religion, sex, sexual orientation, or veteran status as defined by the applicable laws and regulations.

Implementation of this policy is spelled out in the West Virginia University Student Handbook and in other pertinent University documents.

B. STUDENTS WITH DISABILITIES

Students with disabilities receive appropriate accommodation on a case-by-case basis. Any student seeking an accommodation must submit proof of disability to the University Office of Accessibility Services (http://accessibilityservices.wvu.edu) (304-293-6700) and obtain from that office a letter setting forth recommended accommodations. That student shall present that letter to the Assistant Registrar for the College of Law, who shall arrange appropriate accommodation. If the disability arises from an emergency illness or injury, the student shall notify the Assistant Dean for Student Life as soon as the emergency occurs and shall complete the process under the direction of the Assistant Dean. No student may receive retroactive accommodation for any disability.

C. SEXUAL HARRASSMENT

The College of Law liaison for sexual harassment for faculty, staff, and students is the Assistant Dean for Student Life (304-293-7320). Discussions are in complete confidence, and most problems can be resolved without the involvement of anyone other than the liaison and the persons directly involved. Services are also available to students, staff, and faculty through the liaison’s access to educational materials.

**Student Organizations, Guidelines, and Services**

A. COLLEGE OF LAW ORGANIZATIONS

1. Co-Curricular Organizations
2. Recognized College of Law Student Organizations
3. Directory of Administrative Personnel for Student Organizations
4. Rules and Policies for Student Organizations

B. CONSTITUTION OF THE SBA

C. COLLEGE OF LAW SERVICES

1. Academic Excellence Program
2. Professional Writing Center
3. Meredith Career Services Center
4. College of Law Bookstore and Café
5. Financial Aid
6. Scholarships
Student organizations are a vital part of the College of Law culture. Involvement promotes contact with other students who share your interests and provides opportunities to develop skills outside the classroom setting.

For any question regarding Student Affairs Services, please contact the Assistant Dean for Student Affairs or the Assistant Dean for Academic Affairs.

Assistant Dean for Student Life
Tina Jernigan
Phone: 304-293-6253
Email: tina.jernigan@mail.wvu.edu

Associate Dean for Academic Affairs
Kendra H. Fershee
Phone: 304-293-6667
Email: kendra.fershee@mail.wvu.edu

A.1 CO-CURRICULAR ORGANIZATIONS

1. Law Review

The West Virginia Law Review is a professional, student-governed legal journal that publishes articles of interest to legal scholars, students, legislators, and members of the practicing bar. Founded in 1894, the West Virginia Law Review is the fourth oldest law review in the United States and publishes three issues each year. Student members of the Law Review write, solicit, select, and edit articles and are involved in all stages of preparing issues for publication.

Membership on the Law Review is available only to second- and third-year students. To be eligible for membership, students must obtain a minimum GPA of 2.5 in first-year courses. Law Review participants who complete membership requirements receive up to four hours of credit.

Invitations for membership are based on a summer writing competition where students must write a short student article on a predetermined issue of law. After the write-on competition, there are two ways in which students are extended membership: 1) academic performance combined with writing score or 2) writing score alone. For students ranking in the top fifteen percent of their class at the end of the first year, the student article accounts for thirty-five percent of the total score, and first-year grades account for sixty-five percent of the total score. For all other students, the student article accounts for 100 percent of the total score. The number of invitations extended in this competition is dependent upon the quality of papers submitted. The maximum Law Review membership is forty-two students.

2. M.E. Lugar Trial Association

The Lugar Trial Association is a co-curricular course designed to assist students in developing litigation skills through a mock trial program. Teams of students compete in a minimum of four mock trials per year, as well as participate in various other trial competitions. Each trial is presided over by a practicing attorney or judge, and following the trial, each advocate is critiqued by the judge. Membership is available to second- and third-year students who have completed the Trial Advocacy course with a grade of B or better. If more than thirty students wish to participate, members will be selected by lottery. Students who successfully complete the requirements receive up to three hours of credit.

3. Moot Court Board
Moot Court Board is a co-curricular organization designed to recognize and reward students for their oral and written appellate advocacy skills, as well as strengthen and further refine those skills. Board members compete in and manage the George C. Baker Cup intramural appellate moot court competition; participate in various intercollegiate, national, and international moot court competitions; and conduct monthly meetings. Each member is required to compete in an “outside” interscholastic competition.

Early each spring semester, the Moot Court Board invites second-year students to be members of Moot Court Board based upon their work in Appellate Advocacy, a required upper-level course. To be eligible for Moot Court Board, students must have completed Appellate Advocacy during the previous fall semester or in the summer session immediately preceding fall semester. In evaluating Appellate Advocacy student work, the Moot Court Board bases its decisions on appellate brief writing scores and oral advocacy scores earned in the Appellate Advocacy course. A maximum of eighteen members are chosen at that time.

The remaining second-year justices are selected through the Baker Cup Competition, which is held annually each spring semester. The Baker Cup competition is open to all second-year students who have passed Appellate Advocacy in the fall or are currently taking Appellate Advocacy in the spring. Newly selected members must participate in the competition. The Baker Cup competition ranks all competitors, uses that ranking to determine the National Moot Court Team (top six members), awards other prizes such as Best Brief and Best Oralist, and sets priorities for other outside competitions.

Moot Court Board Justices are required to maintain a 2.0 GPA and participate in at least one interscholastic appellate advocacy competition in their third year. Part-time justices must find a competition that does not require full-time status. Justices are awarded up to three hours of credit.

Students who successfully complete all the requirements for Moot Court Board membership receive up to three hours of credit.

4. Jessup International Moot Court

Jessup International Moot Court is a co-curricular class in which up to five students prepare for and compete in the Jessup International Moot Court Competition. Participation in Jessup is open to second- and third-year students. Preparing for and participating in the competition begins early in the fall semester and continues until mid-spring. Students participating in Jessup sign up for a one-credit, graded class in the fall and spring semester of that year. (Members who participate in Jessup for two years thus can obtain a total of four hours credit.) Jessup students must have successfully completed or be currently enrolled in International Law.

5. Family Law Quarterly

The purpose of the Family Law Quarterly (“FLQ”) is, first, to make a significant contribution to the legal community by publishing material of practical and theoretical importance, and second, to give students an opportunity to work on important legal scholarship. The Board of Editors consists of law professors, judges, and lawyers who specialize in family law. The Board of Editors is responsible for soliciting, choosing topics for publication and finding authors to write articles on those topics. The Editor in Chief serves as the Chair of the Board of Editors. Second and third year students are eligible to be members of FLQ. New members to the FLQ will be considered Junior Members (JM); members who have spent one year as a Junior Member will be considered Senior Members (SM). There will be one position available to an SM to become the students Editor in Chief, and there will be one or two positions available to an SM to become an Executive Research Editor. The student Editor in Chief and the student Executive Research Editor(s) may be eligible for scholarship money that is awarded by the ABA each year.

A.2 RECOGNIZED COLLEGE OF LAW STUDENT ORGANIZATIONS

The following is a list of organizations that are currently active at the College of Law, subject to official recognition each school year as described below. Full descriptions of the organizations and their purpose can be found on the College of Law website (http://law.wvu.edu/student-life/student-organizations).

2017-2018

- ACLU - American Civil Liberties Union
- ADR - Alternative Dispute Resolution Society
- Alliance for Social Justice
- American Bar Association
- Animal Law Society (WVU College Chapter of SALDF)
- Asian-Pacific American Law Students Assoc. (APALSA)
- BLSA - Black Law Students Association
- Business Law Society
- Christian Legal Society
- Class of 2018
- Class of 2019
- Class of 2020
- Community Service Council
- Defense Trial Council of West Virginia
• Democratic Law Caucus
• Energy Law Association
• Environmental Law Society
• Family Law Quarterly
• Federalist Society
• Food and Agricultural Law Society
• International Law Students Association (ILSA)
• Labor Law Society
• Marilyn E. Lugar Trial Association
• Moot Court Board
• OutLaw
• Phi Alpha Delta, Willey Chapter
• Public Interest Advocates (PIA)
• Republican Law Caucus
• Sports and Entertainment Law Society
• Student Bar Association
• Tax Law Society
• Veteran’s Law Caucus
• WV Association for Justice
• WV Intellectual Property
• WV Law Review
• Women’s Leadership Council (formerly Women’s Law Caucus)

A.3 DIRECTORY OF ADMINISTRATIVE PERSONNEL FOR STUDENT ORGANIZATIONS

Assistant Dean for Student Life
Tina Jernigan
Phone: 304-293-6253
Email: tina.jernigan@mail.wvu.edu

The Assistant Dean is the administrative liaison for student organizations. See the Assistant Dean for official recognition and about elections, student organization files, budget, and other issues. The Assistant Dean is the cosigner on checking accounts.

Associate Dean for Academic Affairs
Kendra H. Fershee
Phone: 304-293-6667
Email: kendra.fershee@mail.wvu.edu

Lisa Berry
Payroll Representative
Phone: 304-293-7250
Email: lisa.berry@mail.wvu.edu

Ms. Berry is responsible for ordering office supplies. Copier maintenance issues may also be discussed with Lisa.

Renee Sulipeck
Administrative Assistant
Phone: 304-3293-6502
Email: renee.sulipeck@mail.wvu.edu

Ms. Sulipeck is responsible for distributing keys. Building maintenance issues may also be discussed with her.

Stenja McVicker
Business Planning Officer
Phone: 304-293-7357
Email: stenja.mcvicker@mail.wvu.edu

Ms. McVicker serves as the Dean's Budget Officer and monitors all Student Organization expenditures.

Diane Bragg
Accounting Assistant II
Phone: 304-293-7691
Email: diane.bragg@mail.wvu.edu
Ms. Bragg serves as the Procurement Card Coordinator and Travel Coordinator for the College of Law and the Law Library.

Receptionist
Phone: 304-293-5301
The master building key sign-out log is also maintained at the front desk.

A.4 RULES AND POLICIES FOR STUDENT ORGANIZATIONS

Responsibilities

1. Approval. All student organizations must petition the University for official recognition. All student organizations must also get annual approval from the University to be a recognized College of Law student organization. To obtain approval, the organization must submit an “Officer Update Form” online. The Petition and Officer Update Form, as well as additional information, is also available at the University Student Engagement and Leadership website.

2. Recordkeeping. The College of Law’s Assistant Dean for Student Life maintains a file for each student organization. This file must contain copies of all materials pertaining to the student organization, a list of officers, the constitution, and recognition form for filing. Student organizations also may store their checkbooks and financial records in this file over the summer.

3. Checking Accounts. For those organizations that have a checking account, monthly statements from the financial institution must be kept and passed on to the succeeding officers. The Assistant Dean for Student Life or the student organization’s faculty advisor must be a signatory on all checks. A FEIN number for the account may be applied for online (http://www.irs.gov/Businesses/Small-Businesses-&-Self-Employed/Apply-for-an-Employer-Identification-Number-%28EIN%29-Online).

4. Elections. Elections for new class officers must be held before March 15 each year. Election results must be delivered to the Assistant Dean for Student Life within two days of the election. The third-year class president runs the ballot box for the selection of Professor and Staff Member of the year. This election must be held three weeks before Honors Weekend.

5. Class Presidents. During a law school class’s second academic year, the class President is responsible for scheduling the class composite picture for display in the College of Law with the Director of Marketing and Communications.

6. Websites. All student organizations are required to keep their websites current and to name a Webmaster each academic year. The Webmaster is responsible for maintaining on that student organization’s website a current list of officers, the constitution, a descriptive paragraph of the purpose of the organization, news items, and any other updates or corrections on the Student Organizations portion of the College of Law website. For assistance, please contact Keith Walton, Director of Law School Technology, at 304-293-8556 or by email at keith.walton@mail.wvu.edu. For other web assistance, contact James Jolly at 304-293-7439 or by e-mail at james.jolly@mail.wvu.edu.

7. Other. The new SBA president is responsible for recruiting students for appointment to faculty committees and working with the Assistant Dean for Student Life to accomplish this. The SBA also is responsible for providing the Assistant Dean for Student Life with information for the College of Law’s summer newsletter.

Rooms/Equipment

1. Room Reservations. To reserve a room, you must contact the Assistant Dean for Student Life. Additionally, if it is a major event with outside attendance, you may also request that no parking tickets be issued during the event. Do not schedule an event opposite a major event in the courtroom.

2. Audio-Visual. Audio-visual equipment requests should be made at least one week in advance. Contact Ken Price by phone at 304-293-4657. You may also email him at kenneth.price@mail.wvu.edu. (http://catalog.wvu.edu/graduate/law/studentorgs/kenneth.price@mail.wvu.edu) Any audio-visual problems should be reported to Ken. Available equipment includes TVs, VCRs, camcorders, computers, LCD projectors for presentations, etc. Questions concerning information technology may be addressed to Keith Walton.

3. Furniture/Equipment Needs. Tables and chairs are normally set up in the main lobby for student use. If you need more tables and chairs, please request them from Renee Sulipeck at least one week in advance. The Law School has a limited number of tables and chairs and must request additional equipment from the University Physical Plant.

College of Law Building Policies

1. Building Hours. The College of Law building hours are the same as the Law Library hours, which are available online (http://law.wvu.edu/library). After hours, students may use their WVU ID to swipe into the building and Library. Custodial staff and WVU Public Safety Officers have authority to ask you to leave if you are in the building after hours. If you have planned a weekend activity and need to be in the building prior to the library opening, please see Renee Sulipeck one week in advance, and she will make arrangements to have the building unlocked.
2. Bulletin Boards / Posting Notices. Please post items on designated bulletin boards. Each board will have a label which indicates the appropriate posting for that board. DO NOT post materials on the doors, walls, or windows of the Law School. There are University regulations prohibiting this. NOTICES POSTED ON GLASS AND DOORS WILL BE REMOVED.

General Supplies and Operating Expenses

Stenja McVicker is the designated budget officer for the College of Law under West Virginia University rules and regulations. Basic office supplies are available from Diane Bragg. If your organization has need to make long distance calls or use the mail services, see Stenja McVicker. The items mentioned above are provided to the student organizations for reasonable usage. However, if you are planning an activity that requires the use of supplies, phone, or postage services beyond a reasonable amount, you should include those costs in the expenditure section of your event proposal.

B. CONSTITUTION OF THE STUDENT BAR ASSOCIATION OF WEST VIRGINIA UNIVERSITY COLLEGE OF LAW

PREAMBLE. In order to represent the law school student body individually and organizationally; to further organizational communication and cooperation; and to maximize student involvement in academic and administrative processes; we, the students of West Virginia University College of Law, do hereby ordain and ratify this Constitution.

ARTICLE I: NAME OF ORGANIZATION

This organization shall be known as the Student Bar Association (hereinafter, “the S.B.A.”) of the West Virginia University College of Law (hereinafter, “the Law School” or “the College of Law”).

ARTICLE II: PURPOSE, DUTIES, STRUCTURE, AND MEMBERSHIP

Section One: Organization and Purpose. The S.B.A. is the student government of the Law School. The S.B.A. Executive Board (hereinafter, “the Executive Board”) is comprised of the elected officers, representatives, and appointed persons. Its purpose is to:

1. Promote a community among the Members of the Law School (students, faculty, staff, and the administration);
2. Formally advocate for and represent the student body of the Law School to the faculty, staff, alumni, and administration of the Law School and West Virginia University, as well as the public;
3. Promulgate rules and exercises rulemaking authority over groups, organizations, offices, property, and effects under its jurisdiction; and
4. Sponsor and host events for the Law School community.

Section Two: Duties and Responsibilities. The S.B.A. has the authority and responsibility to:

1. Oversee every student organization within the Law School, including each organization’s budget;
   • Specific rules and regulations governing definition, formation, conduct, and expectations of student organizations are subject to the WVU College of Law Student Handbook.
2. Allocate S.B.A. funds;
3. Execute and regulate all Law School student government elections, including (but not limited to), class officer elections and Ethics Council elections;
4. Execute and oversee the biannual Visiting Committee student round table;
5. Host the Annual Barrister’s Ball; and
6. Assume all other duties not detailed by this Constitution as may be delegated to the S.B.A. by the Students, Faculty or Administration of the Law School.

Section Three: Membership. All students enrolled in the Law School are Members of the S.B.A. and shall be represented by the S.B.A. Executive Board. All students enrolled in the Law School are permitted to vote in S.B.A. elections. There is to be no Membership fee.

Section Four: Committees

1. Standing Committees. The S.B.A. shall maintain three standing committees; (1) The Social Committee; (2) The Fundraising Committee; and (3) The Community Service Committee. These Committees are to be chaired by elected Members of the Executive Board. The Standing Committees may only be dissolved through Constitutional Amendment.
2. Working Committees. The President has the authority to create working committees, with the advice and consent of the majority of the Executive Board. Once the Executive Board approves a working committee, the President may select a chairperson and Members of the working committee from the student body. Chairpersons and members of working committees serve at the pleasure of the President. A working committee may be dissolved at any time by a simple majority vote of the Executive Board.

ARTICLE III: THE EXECUTIVE BOARD
Section One: Membership

1. The Executive Board shall consist of eleven board Members:
   • President
   • Vice-President
   • Secretary
   • Treasurer
   • Social Committee Chairperson
   • Fundraising Committee Chairperson
   • Community Service Chairperson
   • 3L Class Senator
   • 2L Class Senator
   • 1L Class Senator
   • Bar Association Liaison

2. The S.B.A. Executive Officers (herein after “Executive Officers”) are:
   • President
   • Vice-President
   • Secretary
   • Treasurer

Section Two: President. The President is the director of the S.B.A.. The President shall convene and preside over all meetings of the S.B.A. and shall supervise and direct all S.B.A. activities. In addition, the President shall represent the concerns of the student body and S.B.A. to the Law School administration and deans.

1. Duties and Responsibilities. The President shall:
   • Call and preside at all scheduled and emergency meetings of the S.B.A. and Executive Board;
   • Attend all faculty meetings and representation of the S.B.A. thereto;
   • Liaise to the Student Administration of West Virginia University;
   • Create a budget to properly allocate all available funds for the academic year;
   • Appoint student Members to law school student-faculty committees, with the advice of and consent by the majority of the Executive Board;
   • Appoint officers to any vacancy on the Executive Board, with the advice of and consent by the majority of the Executive Board;
   • Appoint S.B.A. committees as the need arises, with the advice of and consent by the majority of the Executive Board; and
   • To call matters before the Executive Board to vote;
   • To be a registered signer on the S.B.A. bank account and, when called upon by the Executive Board to do so, provide account details, statements, etc;
   • When called upon to do so by the Treasurer, make deposits into the S.B.A. bank account within two business days of receiving funds; and
   • Carry out all other ceremonial and administrative functions ordinarily assumed by the President

2. Election. The President shall be elected by a simple majority of all ballots cast by the student body. Any student currently enrolled at the Law School shall be eligible to vote for the President.

3. Term of Office. The President shall be elected to a one-year term of office. The President’s term shall begin at the end of the Law School’s Spring Commencement Ceremony that follows the President’s election and shall end at the conclusion of the following academic year’s Law School Spring Commencement Ceremony.

4. Eligibility. To be eligible to hold office, the President must be a student at the Law School, enrolled fulltime and in good academic standing, as defined by WVU College of Law Student Handbook.

Section Three: Vice-President. The Vice-President is the deputy director of the S.B.A.. The Vice President shall support the President, convening and presiding over the S.B.A. and meetings when the President is not able or present.

1. Duties and Responsibilities. The Vice-President shall:
   • Ascend to the Presidency in the event of the President’s death, removal, or withdrawal during the President’s term of office;
   • Preside at S.B.A. meetings in the event of absence of the President; and
   • Represent the President at any ceremonial or administrative functions at the President’s request.

2. Election and Appointment. The Vice-President shall be elected by a simple majority of all ballots cast by the student body. Any student currently enrolled at the Law School shall be eligible to vote for the Vice-President. In the case of a vacancy, the President, with the advice and consent of the majority of the Executive Board, may appoint a student to this position.
3. **Term of Office.** The Vice-President shall be elected to a one-year term of office. The Vice-President’s term shall begin at the end of the Law School’s Spring Commencement Ceremony that follows the Vice-President’s election and shall end at the conclusion of the following academic year’s Law School Spring Commencement Ceremony.

4. **Eligibility.** To be eligible to hold office, the Vice-President must be a student at the Law School, enrolled fulltime and in good academic standing, as defined by WVU College of Law Student Handbook.

**Section Four: Secretary.** The Secretary is the chief administrative officer of the S.B.A.

1. **Duties and Responsibilities.** The Secretary shall:
   - Attend, record, and disseminate the minutes of all S.B.A. meetings;
   - Maintain copies of minutes of all S.B.A. meetings until the conclusion of his or her term, at which point copies of the minutes shall be turned over to the incoming secretary and stored in the President’s office;
   - Assist the President in formulation of meeting agendas and advance notice to the Executive Board thereof;
   - Provide personal notice to all Executive Board Members of the scheduling of emergency Executive Board meetings;
   - Keep record of all S.B.A. resolutions and bylaws;
   - Conduct official correspondence of the S.B.A.; and
   - Maintain a student event calendar and S.B.A. website.

2. **Election and Appointment.** The Secretary shall be elected by a simple majority of all ballots cast by the student body. Any student currently enrolled at the Law School shall be eligible to vote for the Secretary. In the case of a vacancy, the President, with the advice and consent of the majority of the Executive Board, may appoint a student to this position.

3. **Term of Office.** The Secretary shall be elected to a one-year term of office. The Secretary’s term shall begin at the end of the Law School’s Spring Commencement Ceremony that follows the Secretary’s election and shall end at the conclusion of the following academic year’s Law School Spring Commencement Ceremony.

4. **Eligibility.** To be eligible to hold office, the Secretary must be a student at the Law School, enrolled fulltime and in good academic standing, as defined by WVU College of Law Student Handbook.

**Section Five: Treasurer.** The Treasurer is the chief financial officer of the S.B.A.

1. **Duties and Responsibilities.** The Treasurer shall:
   - Maintain the S.B.A. Treasury;
   - Manage the S.B.A. bank account;
   - Record all receipts and disbursements;
   - Provide the Executive Board with a bank account summary (including detailed account statements) no less than once a month, or upon request by the President or Vice-President;
   - Deposit funds into S.B.A. bank account within two business days of receiving funds;
   - Maintain record of and provide oversight of the S.B.A.’s petty cash account; and
   - Ensure that no more than $100 is kept in petty cash at any given time (unless otherwise approved by Executive Board resolution).

2. **Election and Appointment.** The Treasurer shall be elected by a simple majority of all ballots cast by the student body. Any student currently enrolled at the Law School shall be eligible to vote for the Treasurer. In the case of a vacancy, the President, with the advice and consent of the majority of the Executive Board, may appoint a student to this position.

3. **Term of Office.** The Treasurer shall be elected to a one-year term of office. The Treasurer’s term shall begin at the end of the Law School’s Spring Commencement Ceremony that follows the Treasurer’s election and shall end at the conclusion of the following academic year’s Law School Spring Commencement Ceremony.

4. **Eligibility.** To be eligible to hold office, the Treasurer must be a student at the Law School, enrolled fulltime and in good academic standing, as defined by WVU College of Law Student Handbook.

**Section Six: Social Committee Chairperson.** The Social Committee Chairperson is the Chair of the S.B.A.’s Social Committee.

1. **Duties and Responsibilities.** The Social Committee Chairperson shall:
   - Appoint Members to the S.B.A. Social Committee, with the advice and consent of the President;
   - Manage and supervise the Social Committee in planning and organizing various social events to be hosted by the S.B.A.;
   - Manage and supervise the Social Committee in planning and organizing the annual Barrister’s Ball;
   - Collect, distribute and manage all money used in furtherance of or raised through social events until such a time that the money can be turned over to the President or Treasurer; and
   - Give the money raised by social events or the remainder of the money used in planning the event to the President or Treasurer for deposit within two business days of the event.
2. **Election and Appointment.** The Social Committee Chairperson shall be elected by a simple majority of all ballots cast by the student body. Any student currently enrolled at the Law School shall be eligible to vote for the Social Committee Chairperson. In the case of a vacancy, the President, with the advice and consent of the majority of the Executive Board, may appoint a student to this position.

3. **Term of Office.** The Social Committee Chairperson shall be elected to a one-year term of office. The Social Committee Chairperson’s term shall begin at the end of the Law School’s Spring Commencement Ceremony that follows the Social Committee Chairperson’s election and shall end at the conclusion of the following academic year’s Law School Spring Commencement Ceremony.

4. **Eligibility.** To be eligible to hold office, the Social Committee Chairperson must be a student at the Law School, enrolled fulltime and in good academic standing, as defined by WVU College of Law Student Handbook.

Section Seven: **Fundraising Committee Chairperson.** The Fundraising Committee Chairperson is the Chair of the S.B.A.’s Fundraising Committee.

1. **Duties and Responsibilities.** The Fundraising Committee Chairperson shall:
   - Appoint Members to the S.B.A. Fundraising Committee, with the advice and consent of the President;
   - Manage and supervise the Fundraising Committee in planning and organizing fundraisers for the S.B.A.;
   - Collect, distribute and manage all money used in furtherance of or raised through fundraising events until such a time that the money can be turned over to the President or Treasurer; and
   - Give the money raised by fundraisers or the remainder of the money used in planning the fundraiser to the President or Treasurer for deposit within two business days of the fundraiser.

2. **Election and Appointment.** The Fundraising Committee Chairperson shall be elected by a simple majority of all ballots cast by the student body. Any student currently enrolled at the Law School shall be eligible to vote for the Fundraising Committee Chairperson. In the case of a vacancy, the President, with the advice and consent of the majority of the Executive Board, may appoint a student to this position.

3. **Term of Office.** The Fundraising Committee Chairperson shall be elected to a one-year term of office. The Fundraising Committee Chairperson’s term shall begin at the end of the Law School’s Spring Commencement Ceremony that follows the Fundraising Committee Chairperson’s election and shall end at the conclusion of the following academic year’s Law School Spring Commencement Ceremony.

4. **Eligibility.** To be eligible to hold office, the Fundraising Committee Chairperson must be a student at the Law School, enrolled fulltime and in good academic standing, as defined by WVU College of Law Student Handbook.

Section Eight: **Community Service Committee Chairperson.** The Community Service Committee Chairperson is the Chair of the S.B.A.’s Community Service Committee.

1. **Duties and Responsibilities.** The Community Service Committee Chairperson shall:
   - Appoint Members to the S.B.A. Community Service Committee, with the advice and consent of the President;
   - Manage and supervise the Community Service Committee in planning and organizing volunteer opportunities for the S.B.A. and student body;
   - Collect, distribute, and manage all money used in furtherance of or raised through community service events until such a time that the money can be turned over to the President or Treasurer;
   - Give the money raised by community service events or the remainder of the money used in planning the event to the President or Treasurer for deposit within two business days of the event;
   - Ensure that any money raised as a charitable contribution is given to the charity for which it is raised, in the form of a check or money order, by the President or Treasurer, within five business days of the fundraiser;
   - Report failures to comply with Article III, Section Eight, Subsection A(v) to the President and Assistant Dean of Student Affairs of the College of Law (hereinafter “the Assistant Dean of Student Affairs”) within two business days of noticing the compliance failure;
   - Keep detailed records of all spending and earnings raised for charitable contributions including (but not limited to) ledger, carbon copies of checks and receipts; and
   - Present the aforementioned records to the Executive Board upon request of the President or Vice-President at the meeting immediately following the request.

2. **Election and Appointment.** The Community Service Committee Chairperson shall be elected by a simple majority of all ballots cast by the student body. Any student currently enrolled at the Law School shall be eligible to vote for the Community Service Committee Chairperson. In the case of a vacancy, the President, with the advice and consent of the majority of the Executive Board, may appoint a student to this position.

3. **Term of Office.** The Community Service Committee Chairperson shall be elected to a one-year term of office. The Community Service Committee Chairperson’s term shall begin at the end of the Law School’s Spring Commencement Ceremony that follows the Community Service Committee Chairperson’s election and shall end at the conclusion of the following academic year’s Law School Spring Commencement Ceremony.

4. **Eligibility.** To be eligible to hold office, the Community Service Committee Chairperson must be a student at the Law School, enrolled fulltime and in good academic standing, as defined by WVU College of Law Student Handbook.

Section Nine: **Class Senators.** Class Senators are voting Members of the Executive Board who are tasked with representing their Law School class in the S.B.A.:

1. **Duties and Responsibilities.** Class Senators shall:
   - Attend all S.B.A. meetings on behalf of their class;
• Represent the interests of each individual class at S.B.A. meetings;
• Vote on behalf of their class regarding S.B.A. matters;
• Liaise to individual classes on behalf of the S.B.A.;
• Liaise between the S.B.A. and their respective class officers; and
• Serve as Vice-Chairperson of an S.B.A. Standing Committee, in this role the Senator will assist and serve at the pleasure of the Chairperson.

The President, with the advice and consent of the Chairpersons, shall make appointment of Senators to committees.

2. Election and Appointment. Class Senators shall be elected by a simple majority of all ballots cast by the candidate's respective Law School class. Any student currently enrolled at the Law School shall be eligible to vote for their class's Senator but may not vote for the Senator of another class. In the case of a vacancy, the President, with the advice and consent of the majority of the Executive Board, may appoint a student to this position. The President must seek out the advice of the class's president in appointing this position and allow the class president to vote alongside the Executive Board regarding the appointment. The class president's vote shall carry no greater or lesser weight than any other Member of the Executive Board.

3. Term of Office. The Class Senators shall be elected to a one-year term of office. A Senator's term shall begin at the end of the Law School's Spring Commencement Ceremony that follows the Senator's election and shall end at the conclusion of the following academic year's Law School Spring Commencement Ceremony.

4. Eligibility. To be eligible to hold office, the Senators must be students at the Law School, enrolled fulltime and in good academic standing, as defined by WVU College of Law Student Handbook.

Section Ten: Bar Association Liaison. The Bar Association Liaison serves as a pipeline between the Law School and federal, state, and local bar associations.

1. Duties and Responsibilities. The Bar Association Liaison shall:
• Serve as liaison between the S.B.A. and the A.B.A. as well as state, and local bar associations;
• Promote and help to organize events held by bar associations at the Law School;
• Serve as a resource for students seeking information about future recruitment into the bar;
• Attend all S.B.A. meetings and vote on S.B.A. matters; and
• Carry out any functions or duties assigned by the President.

2. Appointment. At the beginning of his or her term, the President, with the advice and consent of the majority of the Executive Board, may appoint a student to this position.

3. Term of Office. The President shall appoint the Bar Association Liaison to a one-year term of office. The Bar Association Liaison's term shall begin immediately upon confirmation by the Executive Board and shall end at the conclusion of the academic year's Law School Spring Commencement Ceremony.

4. Eligibility. To be eligible to hold office, the Senators must be students at the Law School, enrolled fulltime and in good academic standing, as defined by WVU College of Law Student Handbook.

Section Eleven: Removal of S.B.A. Officers. This section shall apply to S.B.A. Executive Board Members. Removal from office consists of two steps; impeachment and removal from office.

1. Impeachment. An Executive Board Member may be impeached through one of two methods:
• Voting Method:< >With cause, an Executive Officer may call for a special meeting in order to request impeachment against a Member of the Executive Board. All Executive Board Members, including the subject of impeachment, must be given 72 hours notice prior to the meeting. Quorum for the impeachment meeting is 8 of 11 Executive Board Members. The President shall preside over the meeting. However, neither the accuser nor the accused shall preside. If the President is subject to impeachment or the accuser, the Vice-President shall preside. If the Vice-President is the accuser against the President or subject to impeachment and being accused by the President, the Secretary shall preside. At the meeting, the Executive Officer calling for impeachment may make his or her case to the Executive Board; the subject of the impeachment hearing may then present a rebuttal case. The presider in the interest of justice may determine methods of presenting evidence. After the cases are presented the Executive Board may sequester the accused and the accuser in order to deliberate. After deliberations, the Executive Board may vote on impeachment; the accuser and the accused do not vote. Executive Board Members must be present to vote. An Absolute majority (75%) of the voting Executive Board is required to impeach an Executive Board Member. This vote is subject to veto by the Assistant Dean of Student Affairs: this veto may be overridden by a unanimous vote of the Executive Board (excluding the vote of the person or persons subject to impeachment). Cause for which an Executive Officer may call for impeachment is limited to: Violation of this Constitution; Violation of the terms of the WVU College of Law Student Handbook or the Student Code of Professional Responsibility; Stealing or misallocating S.B.A. funds; Substantial nonperformance of duties; Failure to attend at least 75% of S.B.A. meetings without cause (i.e. death in family, exam following day, illness, etc); Failure to meet eligibility requirements; and/or Committing an offense that would be a violation of the West Virginia University Campus Student Code. Such a violation need not be proven in accordance with the procedures set forth by the West Virginia University Campus Student Code, but rather in accordance with the procedures set forth by this Constitution. Petitioning Method:
  i With or without cause, an S.B.A. Executive Board Member may be impeached if the S.B.A. President or Vice-President is presented with a petition for impeachment including the signature of two-thirds of all Law School Students
2. **Removal from Office.** Once impeached, an Executive Board Member is subject to a public hearing to determine removal from office.

3. The hearing is to be presided over by the Chairperson of the College of Law Ethics Council.

4. Quorum for the hearing is the entirety of the Executive Board.

5. The Executive Officer who initiated impeachment or the proponent of the petition for impeachment shall be permitted to make a case to the Executive Board in support of removal.

6. The accused shall be permitted to make a rebuttal case.

7. The presider shall admit evidence and testimony as is required in the interest of justice.

8. During the hearing, the proponent of removal must show cause for impeachment beyond a reasonable doubt.

9. Once cases are made, the Executive Board (excluding the accused and accuser) is to vote as to whether the proponent has proven cause beyond a reasonable doubt.

10. Cause for removal is limited to: Violation of this Constitution; Violation of the terms of the WVU College of Law Student Handbook or the Student Code of Professional Responsibility; Stealing or misallocating S.B.A. funds; Substantial nonperformance of duties; Failure to attend at least 75% of S.B.A. meetings in one semester without cause; Three consecutive absences from regularly scheduled meetings without cause; Failure to meet eligibility requirements as defined by this Constitution; and/or Committing an offense that would be a violation of the West Virginia University Campus Student Code such a violation need not be proven in accordance with the procedures set forth by the West Virginia University Campus Student Code, but rather in accordance with the procedures set forth by this Constitution.

11. A unanimous vote is needed to remove a Board Member from office.

12. If a unanimous verdict for removal is reached, the removal is immediate and not subject to appeal and the Board Member shall be replaced subject to the provisions of this Constitution.

**ARTICLE IV: MEETINGS**

**Section One: Regularly Scheduled Meetings.** A regularly scheduled meeting of the Executive Board may be called to discuss any matters before the S.B.A.

1. **Quantity.** The Executive Board shall meet not less than once monthly for a minimum of eight meetings during the academic year. Regularly scheduled meetings of the Executive Board may occur more commonly as needed.

2. **Scheduling.** The President may call a regularly scheduled meeting by providing notice of the time and location of the meeting to members of the Executive Board at least three days in advance.

3. **Precedence.** The President shall preside over all regularly scheduled meetings. The Vice-President shall preside in the President’s absence. Meetings shall not proceed without the presence of either the President or Vice-President.

4. **Structure.** The presider of the meeting may determine the structure of each meeting.

5. **Quorum.** Fifty percent plus one Member of the Executive Board shall constitute a quorum.

6. **Voting.** Matters before the Executive Board at regularly scheduled meetings may be decided through a simple majority vote pursuant to Article VI and other Articles of this Constitution.

7. **Attendance.** All Members of the Executive Board shall attend all regularly scheduled meetings unless circumstances beyond his or her control prevent attendance. Failure to attend 75% of the regularly scheduled meetings in a single semester or three consecutive regularly scheduled meetings, without cause, shall be subject to removal from office.

**Section Two: Emergency Meetings.** Emergency meetings of the Executive Board may be called to discuss matters that require the immediate attention of the S.B.A.

1. **Scheduling.** The President or Vice-President may call an emergency meeting by providing 24 hours notice of time, location and purpose of the meeting to members of the Executive Board.

2. **Precedence.** The President shall preside over emergency meetings. The Vice-President shall preside in the President’s absence. Emergency meetings shall not proceed without the presence of either the President or Vice-President.

3. **Structure.** The presider of an emergency meeting may determine the structure of an emergency meeting. No more than two matters may be considered at an emergency meeting.

4. **Quorum.** Fifty percent plus one Member of the Executive Board shall constitute a quorum.

5. **Voting.** Matters before the Executive Board at any Emergency Meeting may be decided through a simple majority vote pursuant to Article VI and other Articles of this Constitution.

6. **Attendance.** There will be no sanctions for failure to attend an emergency meeting.

**ARTICLE V: RESOLUTIONS AND BYLAWS**

**Section One: Definitions**

1. **Resolutions.** An S.B.A. Resolution is a formal decision or determination as to an official and binding course of action of the S.B.A. or a formal statement that shall serve as S.B.A. policy.
2. **Bylaws.** S.B.A. bylaws are rules created by members of the S.B.A. that bind the Student Bar Association and its members.

**Section Two: Creation and Enactment.** The Executive Board may create S.B.A. resolutions and bylaws that are in accordance with this Constitution through a simple majority vote. Bylaws may be proposed by any Executive Officer at a regularly scheduled meeting and shall be enacted following a majority vote of the Executive Board. Resolutions may be proposed by any executive board member at any meeting and shall be enacted following a majority vote of the Executive Board.

**Section Three: Modification, Repeal, and Expiration.** Resolutions and bylaws may be modified or repealed by a simple majority vote of the Executive Board, following proposed modification or repeal by any Executive Officer at any meeting. Resolutions and bylaws expire at the end of each academic year but may be renewed by a majority vote of the incoming Executive Board.

**Section Four: Recording Resolutions and Bylaws.** The S.B.A. Secretary is responsible for keeping records of all resolutions and bylaws and presenting the records to the S.B.A. President-Elect upon election.

**Section Five: Quorum.** Quorum for enactment, modification or repeal of a resolution or bylaw is 50% plus one member of the Executive Board.

**Section Six: Voting.** Voting on enactment, modification, repeal, and renewal of resolutions and bylaws, unless otherwise provided by this section, shall be conducted pursuant to Article VI of this Constitution.

**ARTICLE VI: VOTING.** Matters before the S.B.A. are to be resolved through a democratic vote of the Executive Board.

**Section One: Voting rights.** All Executive Board Members shall be entitled to one vote on any matter before the S.B.A. with the exception of the President.

**Section Two: Quorum.** Unless otherwise provided by this Constitution or an S.B.A. bylaw, quorum for voting on all matters shall be 50% plus one member of the Executive Board.

**Section Three: Initiating Voting.** A vote on a matter before the S.B.A. may be added to the agenda of any regular scheduled meeting or emergency meeting by the President or Vice-President.

**Section Four: Debate and Discussion.** The presider of the meeting may allocate time for debate and discussion of the matter prior to a vote.

**Section Five: Voting Process.** When a vote is initiated the presider of the meeting shall call roll in the following order:

1. Vice-President
2. Secretary
3. Treasurer
4. Social Committee Chairperson
5. Fundraising Committee Chairperson
6. Community Service Committee Chairperson
7. 3L Class Senator
8. 2L Class Senator
9. 1L Class Senator
10. Bar Association Liaison

Upon being called, each Member shall cast a spoken public vote. The secretary shall record each member’s vote in the minutes of the proceeding. At the conclusion of voting, the Secretary shall read the results of the vote.

**Section Six: Voting Results.** A matter before the S.B.A. for vote shall be passed or voted down by a simple majority, unless otherwise provided by this Constitution.

**Section Seven: Ties.** In the case of a tie, the President shall cast a single tiebreaking vote.

**Section Eight: Finality.** Upon the reading of the results of a vote or the casting of a tiebreaking vote, the vote shall be final and the result shall go into effect immediately.

**ARTICLE VII: ELECTIONS**

**Section One: Jurisdiction.** The provisions of Article VII shall govern all S.B.A. and class officer elections. Class officer constitutions may not displace, supersede or modify this Article.

**Section Two: Time of Elections**

- **Upperclassmen Elections.** S.B.A. Executive Board Elections and 2L and 3L class officer elections shall be held in the second half of the spring semester of an academic year.
• 1L Elections. 1L Class Officers and the 1L S.B.A. Senator shall be elected within the first month of the fall semester of an academic year.

Section Three: Eligible Voters. All currently enrolled Law School students may vote in S.B.A. Elections. All currently enrolled Law School students may vote in their individual class’s elections for class officers and Senators. No student may vote for class officers or Senators of another class.

Section Four: Eligible Candidates. All candidates are subject to the eligibility requirements of this Constitution. In addition, class officer candidates must be members of their respective class. All candidates must be a currently enrolled, fulltime student at the College of Law. All candidates must have a grade point average of 2.2 or higher at the time of his or her nomination.

Section Five: Elections Commissioner. An Elections Commissioner shall be selected from the student body of the Law School to facilitate all elections for an academic year, under the direction of the President (provided that the President is not a candidate). At the beginning of his or her term, the President shall appoint the Elections Commissioner, with the advice and consent of the Assistant Dean of Student Affairs. In the event that the President is a 2L and subject to re-election, the President shall not appoint an Elections Commissioner: in this case, the Assistant Dean of Student Affairs shall appoint an Elections Commissioner. The Elections Commissioner shall serve a one academic year term and may be appointed to no more than two consecutive terms. The Elections Commissioner may be relieved of his or her duties with cause by a combined resolution of the President and Assistant Dean of Student Affairs. In the event of a vacancy, the President may reappoint, subject to the provisions of this Constitution. An elected S.B.A. Executive Board Member, class officer, or candidate shall not serve as Elections Commissioner. In the event of a sudden vacancy or inability to find a willing and able Elections Commissioner, the President may serve in this role, on an interim basis, until an appropriate candidate can be found, provided that the President is not on the ballot.

Section Six: Election Process

• Nominations. Election proceedings shall begin with the opening of nominations, which shall be announced at least one week in advance through e-mail announcements and posters throughout the Law School. The email shall include dates of the; nomination period, campaigning period, forum, election, and run-off. The nomination period shall last three business days, opening at 8 A.M. and closing at 4:30 P.M. each day. During this time, a nomination book shall be put in the Law School Reception Office. A candidate may be nominated by writing his or her name in the nomination book on the page of the position for which he or she is being nominated. A candidate may only be nominated for one position.

• Campaigning. At the end of nominations campaigning may begin. The campaign period shall last for one week following the close of nominations. Each candidate will be permitted to display in the Law School two posters of no greater size than 12x18 inches. Hand billing is to be encouraged through the use of the student mailboxes. Campaigning may also be conducted through face-to-face petitioning, social media, text messages, and e-mail. Neither candidates nor their surrogates may exchange money, alcohol, or sexual favors for votes. Neither candidates nor their surrogates may coerce votes or unduly pressure voters during the campaigning period or polling hours. Further campaign rules may be created through S.B.A. resolutions or bylaws. Violation of campaign rules is grounds for disqualification.

• Candidate Forum. During the campaign period, at a time and place determined by the Elections Commissioner and approved by the President, all candidates must attend a candidate forum and give a speech in support of his or her candidacy. Speeches shall not exceed three minutes. Failure to give a speech during the specified time results in automatic disqualification.

• General Elections. The General election will be held within one week following the close of nominations. Polling hours will be held in the Law School lobby. Suggested polling hours are 9 A.M. to 2 P.M. Polling hours may not be fewer than four hours and may not exceed eight hours. Notice of polling hours must be given to the student body. Each currently enrolled College of Law student may fill out no more than one complete ballot. While the polls are open campaigning may continue, however candidates may not solicit votes within 30 feet of the polling table. The Elections Commissioner may impose further prohibitions on campaigning during polling hours as is needed to preserve the integrity of the election. Upon receiving notice of the prohibition, failure to abide by the Elections Commissioner’s ruling shall be grounds for disqualification. Rulings of the Elections Commissioner may be appealed to the Assistant Dean of Student Affairs, however deference should be given to the Elections Commissioner’s ruling, provided it is not arbitrary and capricious.

• Ballot Tallying. Within 12 hours of the close of polling hours, votes are to be counted by the Elections Commissioner, the President (provided that he or she is not on the ballot), and a 3L Ethics Council member or an Ethics Council member who is not on the ballot. The Bar Association Liaison and any Executive Board Member who is not on the ballot may also assist in ballot tallying, at the discretion of the Elections Commissioner. Prior to tallying, the ballots must be securely locked in the President’s office.

• Election Results. The winner of the general election will be the candidate with a simple majority of the votes (50 % plus one vote) on the first ballot. In the event that no candidate obtains a simple majority on the first ballot, a run-off election will be held.

• Run-Off Elections. The run-off election will be held in the Law School lobby at a time determined by the Elections Commissioner, with the advice and consent of the President and Assistant Dean of Student Affairs, in the interest of facilitating a fair election that affords all College of Law Students the opportunity to vote. The two candidates who received the most votes in the general election shall be placed on the run-off ballot. In the event of a tie or a percentage difference of 3 % or less, a candidate with the third highest number of votes may be placed on the run-off ballot. The Elections Commissioner, with the advice and consent of the President and Assistant Dean of Student Affairs, may extend the campaign period to correlate with a run-off election. The candidate with the highest number of votes is to be declared the winner of the run-off election, even if a simple majority is not reached. Unless otherwise provided by this subsection, all other rules of this Constitution and Article apply to run-off elections.

• Certification of Elections. Upon completion of vote tallying, election results must be certified as accurate and true by the signature of the President, Elections Commissioner, and the Ethics Council member who supervised the tallying process. The results, the certification and the ballots are to be presented to the Assistant Dean of Student Affairs. If the election results are not challenged in a timely manner, as defined by this Constitution, the certification is finalized and the results of the election become official.
• **Results Announcement.** It is the President’s duty to announce the results to the Law School student body in a timely manner.

• **Challenges and Recounts.** Election process or results may be challenged within two business days of certification.
  
  a. **Challenges.**
  
  Any student of the College of Law may make challenges in writing to the Elections Commissioner, Assistant Dean of Academic Affairs and/or President. A challenge can be made to the process of the election or levying that a candidate’s conduct warrants disqualification (on grounds defined by Article VII, Section Five(K)(ii) of this Constitution). Once a challenge is made, certification may not occur until an investigation is completed.

  Upon receiving a challenge the Elections Commissioner shall consider the merits of the challenge and make a decision within 24 hours of receiving the challenge. If meritorious, so that a reasonable panel of four could possibly find misconduct, the investigation phase shall be initiated. If no merit is found, the Elections Commissioner shall dismiss the challenge. The decision to dismiss may be appealed by the challenger to the President and Assistant Dean of Academic Affairs, however deference should be given to the Elections Commissioner’s ruling, provided it is not arbitrary and capricious.

  Within 24 hours of the investigation phase being initiated, the challenge shall be presented to the Chairperson of the Ethics Council and a single member Ethics Council’s investigative panel. The Investigative Panel member shall conduct the investigation, during which all relevant parties shall be notified and interviewed. The Investigative Panel member shall present his or her findings to the President, Assistant Dean of Academic Affairs, Elections Commissioner, and Ethics Council Chairperson within one week of receiving the challenge. At this time, the President, Assistant Dean of Academic Affairs, Ethics Council Chairperson, and Elections Commissioner shall discuss and vote on the merits of the challenge. All facts in question shall be viewed in the light most favorable to the nonmoving party. 3 of 4 votes are required to uphold a challenge and overturn the results of an election. The result of this vote shall be final and is not subject to appeal. If an election is overturned, the candidate whose misconduct resulted in the challenge shall be disqualified and a new election shall be held. The disqualified candidate may not be present on the ballot of the second election.

  b. **Recounts.** Any candidate may request that the Elections Commissioner, President, and a member of the Ethics Council conduct a recount. The recount shall be conducted in the presence of the candidate who has requested the recount. The candidate who has won the election shall be invited to observe the recount as well.

  • **Disqualification.** A candidate may be disqualified from the ballot prior to the election. Any student of the College of Law may request to the President or Elections Commissioner that a candidate be disqualified. However, the President or Elections Commissioner must initiate a formal disqualification investigation at his or her discretion, based on the merits of the claim. If an objectively reasonable panel of four could possibly find in favor of disqualification, a formal investigation shall be initiated.  

  **Disqualification Investigation.** Upon initiating a disqualification investigation, the President or Elections Commissioner must notify the candidate being challenged, the Ethics Council Chairman, the Assistant Dean of Student Affairs and a single member of the Ethics Council Investigative Panel. The Investigative Panel Member shall investigate the claim and present the evidence to a panel consisting of the President, the Ethics Council Chairman, the Assistant Dean of Student Affairs and the Elections Commissioner. This panel shall consider the evidence in the light most favorable to the accused. Following discussion the panel shall vote. 3 of 4 votes are required to disqualify a candidate from the ballot. This vote shall be final and is not subject to appeal. **Grounds for Disqualification.** The following shall be grounds for disqualification from the ballot, as well as grounds for post-election disqualification through the challenge process laid out by Article VII, Section Five(J)(i);Violation of this Constitution;

  • Lack of eligibility as defined by this Constitution;
  
  • Violation of campaign rules;
  
  • Violation of the terms of the WVU College of Law Student Handbook or the Student Code of Professional Responsibility; and/or
  
  • Committing an offense that would be a violation of the West Virginia University Campus Student Code

  a. Such a violation need not be proven in accordance with the procedures set forth by the West Virginia University Campus Student Code, but rather in accordance with the procedures set forth by this Constitution.

• **Write-In Votes.** Write-in candidates are prohibited and all write-in votes shall be discarded.

**ARTICLE VIII: AMENDMENTS**

**Section One: Proposal of Amendments.** Amendments may be proposed through one of two methods:

1. **Petitioning.** Any student currently enrolled at the College of Law may present the S.B.A. a petition bearing the proposed amendment and the signature of at least fifty percent of the student body; or

2. **Resolution.** The Executive Board may pass an amendment resolution. Such a resolution must receive approval of at least two-thirds of the Executive Board.

**Section Two: Ratification.** This Constitution shall be amended upon the approval of the proposed amendment described in the preceding paragraph and the support of a simple majority (50 % plus one vote) of currently enrolled students who vote in an election to be held at least one week after its approval in Section One. The vote must be open to all currently enrolled students at the College of Law. However, a majority of all students is not required for the Amendment to pass, rather only a majority of those who vote.
ARTICLE IX: AUTONOMY. All student organizations shall enjoy political, physical, and administrative autonomy. The S.B.A. is not empowered to control the member organizations’ internal affairs in any way, aside from those specifically defined by this Constitution.

ARTICLE X: STUDENT CODE OF PROFESSIONAL RESPONSIBILITY. The S.B.A., as an organization, its officers, and members agree to abide by the Student Code of Professional Responsibility.

ARTICLE XI: NON-DISCRIMINATION. The S.B.A. shall not discriminate against any person on any basis prohibited by the United States Constitution or the Constitution of the State of West Virginia.

Ratified: September 17, 2014

C. COLLEGE OF LAW SERVICES

1. Academic Excellence Program (p. 563)
2. Professional Writing Center (p. 564)
3. Meredith Career Services Center (p. 564)
4. College of Law Bookstore and Cafe (p. 565)
5. Financial Aid and Scholarships (p. 565)
6. Technology Services (p. 566)
7. Communications (p. 567)
8. Web Information (p. 567)

C.1 ACADEMIC EXCELLENCE PROGRAM

Kirsha Trychta, Director of Academic Excellence
Academic Excellence Center
Phone: 304-293-3882
Email: kirsha.trychta@mail.wvu.edu

The Academic Excellence Program (AEP) seeks to enhance the academic performance of all students in their first year of law school. Because new law students must rapidly adjust to the heightened expectations of a professional school, the Academic Excellence Center provides an array of services designed to empower first-year students to quickly integrate “how to learn” with “what to learn.” The Center’s ultimate goal is to help students thrive in their first year of law school, not merely survive. To this end, the Center provides (1) weekly workshops on critical skills such as notetaking, outlining, time management, and test taking; (2) helpful handouts with tips for success and other important information about resources available to law students; and (3) individual counseling to address the needs of students who could benefit from personalized assistance.

Open by invitation only: An early orientation and fall small group program is conducted for incoming students who would benefit from additional support activities. Enrollment in the fall small group program is limited and participation is by invitation only. Several factors are considered in choosing students to participate, e.g., whether the student has been out of school for a significant time, has a nontraditional background for law, has learning disabilities, speaks English as a second language, or has a GPA or LSAT score below the average of the incoming class. The goal of small group is to assist students in achieving maximum performance in legal writing assignments and casebook examinations.

Open to all students: The Academic Excellence Center also offers Dean’s Fellow review sessions for all first-year courses and select upper-level courses. Dean’s Fellows are specially trained student teaching assistants, who volunteer to lead small study sessions. The Deans Fellows work closely with the course professor to lead the study group through review materials and practice tests.
C.2 PROFESSIONAL WRITING CENTER

Writing Specialist  
Melanie Stimeling  
Phone: 304-293-2008  
Email: wvulawwriting@mail.wvu.edu  
Website: law.wvu.edu/writingcenter

Part of the College of Law Academic Excellence Center, the Writing Center helps students become better writers and offers an encouraging environment to discuss, develop, and experiment with writing techniques. The Writing Center is staffed by a full-time Writing Specialist as well as upper-level students who serve as Peer Writing Consultants. Individual writing consultations and group workshops are available to assist students in developing stronger writing skills or to improve a specific piece of writing. Students can seek assistance at any point in the writing process on all legal writing assignments and projects, unless an instructor explicitly prohibits it. Writing Center staff members are also available to help students with other kinds of professional writing, such as scholarship and job application materials.

C.3 MEREDITH CAREER SERVICES CENTER

Meredith Career Services Center's website (http://law.wvu.edu/career-services)

Assistant Dean  
Heather Spielmaker, J.D.  
Phone: 304-293-5301  
Email: heather.spielmaker@mail.wvu.edu

Assistant Director  
Rosalind Lister, M.S.Ed.  
Phone: 304-293-7750  
Email: rosalind.lister@mail.wvu.edu

The Meredith Career Services Center is open year round. Office hours are Monday through Friday from 8:15 a.m. until 4:45 p.m (appointments are recommended).

Students must register with the Career Services Center to use its services and participate in on-campus interviews. As part of the registration process, students must provide Career Services with current contact information and give permission to release resume and other employment information to prospective employers.

Students should schedule an appointment with the staff member of their choice, either via email or Symplicity, the Center's online career management system. The Assistant Dean and Assistant Director will work individually with each student to assist with career development, to write or revise a resume or cover letter, to discuss interviewing skills, or to implement job search strategies.

1. Career Center Workshops. There are a series of workshops held for students each semester. Frequently offered topics include

   * Resume writing/editing and cover letter writing/editing
   * Interview preparation and interview skills workshops; mock interview program
   * Job search strategies beyond on-campus interviews
   * Using Web-based resources in the job search
   * Working in public interest law
   * Alternative careers for lawyers
   * Working as a judicial clerk
   * How to have a successful summer work experience
   * Employer information talks

Many of these workshops are co-sponsored and given by the hiring partners of local law firms, public interest organizations, and corporations. Additionally, Career Services is responsible for conducting the Professional Development Institute, a series of targeted programs to help students hone their "soft" professional skills. Presently, the PDI is sponsored by the law firm of Steptoe and Johnson, PLLC.

A mandatory “Orientation to Career Services” workshop is held in mid-October, and all first-year students are required to attend. First-year students will register to use the Career Services Center at this time, and the Career Services Center will provide handouts on writing a resume,
writing effective cover letters, preparing for spring interview season, and organizing a job search. The Assistant Dean for Career Services and the Assistant Director conduct this workshop each year.

2. On-Campus Interviewing. The Career Services Center invites law firms, public interest organizations, government agencies, businesses, and corporations to interview WVU law students for summer and full-time positions. On-campus interview season occurs in the fall semester for second- and third-year students, and generally runs from the last of August through October. The spring on-campus interview season generally features employers seeking first-year students and runs from February through April. Many employers come to campus to interview students; others ask to review student credentials through a resume mailing service.

A master schedule of interviews is posted on the WVU Career Services Symplicity website (https://law-wvu-csm.symplicity.com/students). The schedule is updated frequently each semester. Students should register for the Symplicity site.

Students should participate in on-campus interviewing but should also consider alternative methods of finding a job as well. Between 20-25% of students find their permanent jobs through on-campus interviewing each year; most students find work through a self-directed job search. Career Services is here to help with either.

Additionally, dozens of jobs are posted on Symplicity each semester and follow traditional application/hiring procedures.

3. Job Research. The Career Services Center has many Web-based and print resources for student use. Handouts and books are available for students both in career services and the library. Students may use Martindale Hubbell, the National Association for Law Placement Directory of Employers, and many other job-related texts and websites to find a job. See Career Services for updated passwords.

C.4 COLLEGE OF LAW BOOKSTORE AND CAFÉ

Manager
Mary Jo Fugera
Phone: 304-293-2492
Email: bkswvulaw@bncollege.com

The WVU Law Center Bookstore and Café is located off the main lobby of the Law Center. Regular operating hours are 8:00 a.m. to 4:30 p.m., Monday through Thursday and 8:00 a.m.-4:00 p.m. on Friday. Summer hours are 8:00 a.m.-3:00 p.m. Monday through Thursday and 8:00 a.m.-1:00 p.m. on Friday.

The Bookstore is also open the Saturday prior to the first day of class. The WVU Law Center Bookstore offers new and used textbooks, reference books, school supplies, and imprinted clothing and giftware. Software can be ordered online (http://thinkedu.com/bn). Special order service is available at no extra charge. To order textbooks online, visit the Bookstore homepage (http://wvulaw.bncollege.com/webapp/wcs/stores/servlet/BNCBHomePage?storeId=15066&catalogId=10001&langId=-1). Textbook Rentals and price matching are also available, offering great savings on selected titles. Contact the Store Manager for details.

C.5 FINANCIAL AID AND SCHOLARSHIPS

Financial Aid Counselor
Wendy Ridenour
Phone: 304-293-5302
Email: wendy.ridenour@mail.wvu.edu

The College of Law Financial Aid Office hours are as follows:

- Tuesday and Thursday: 8:15-4:45
- Wednesday: 8:15-11:45

To be eligible for all types of financial aid, a student must complete the Free Application for Federal Student Aid (FAFSA). This form can be completed online (http://www.fafsa.ed.gov) each year. Because West Virginia University is a direct lending institution, no loan applications will be accepted from lenders or banks. After all necessary forms have been completed by the student, the Financial Aid Office will determine a student’s eligibility for student loans and federal work study. Financial aid awards are to be viewed, accepted, declined, or reduced online through the WVU STAR System. Each student will receive a letter when his or her financial aid award has been processed. First-time loan borrowers are required to complete a master promissory note and entrance counseling. Both are to be completed online at www.studentloans.gov (http://www.studentloans.gov).

Deadlines for financial aid are as follows:

1. Federal Work Study: March 1

A written request must be submitted to the Law School Financial Aid Office.
2. Scholarships: March 1

FAFSA results must be received by WVU by March 1 for first-round scholarship consideration.

3. Student Loans: No deadline

The necessary documentation must be completed in a timely manner in order for the funds to be available for disbursement in August and January. WVU must receive your FAFSA results by June 1 to insure timely processing. Information regarding additional loans, such as private loans, is available on the Financial Aid website at http://financialaid.wvu.edu/aid-and-scholarships. Graduating students must complete a Loan Exit Counseling if they borrowed from the William D. Ford Federal Direct Loan program.

Financial Aid Processing is a detail-oriented process. Please keep the following eight steps in mind when applying for and receiving financial aid:

1. Make sure all your applications are complete, correct, and submitted on time.

2. Read completely and respond quickly to all financial aid requests.

3. The following steps must be taken to have your financial aid completely processed:
   a. Submit all required documents so that your file is complete, which generally consists of a current FAFSA. If you are selected by the Department of Education for verification, you also must submit the WVU Verification Form and a signed copy of your most recent Federal Income Tax Return. The WVU financial aid office will send you a verification form if you are selected.
   b. View, accept, decline, or reduce your financial aid award online through the WVU STAR system. There is a separate application for the Grad Plus Loan, which is completed online (https://studentloans.gov).
   c. If you are a first-time borrower, you must sign your master promissory note and complete entrance counseling. Both can be done online at studentloans.gov.

4. Mail all correspondence for financial aid to: WVU College of Law, Financial Aid Office, P.O. Box 6130, Morgantown, WV 26506-6130

NOTE: Any correspondence sent to other financial aid offices at West Virginia University will delay the processing.

5. The Financial Aid Office may be contacted at the email, and phone numbers listed above.

6. Be sure to notify the Registrar’s Office of all address changes. This is particularly important during the summer months when financial aid correspondence is being sent (i.e., award letters and any notifications). Students can make address changes through their MIX account and the WVU Star System. Refund checks are sent to the local address on file with the Registrar’s Office. Make sure the office has the correct address so your check will get to you in a timely manner. You can sign up for direct deposit using Tuition Management Systems (TMS) at studentaccounts.wvu.edu/refunds. Call 888-425-1138 with questions.

7. Keep records of your loans. You are responsible for knowing how much you borrowed, and you will need that information if you decide to consolidate your loans once you have graduated. This information is available at www.nslds.ed.gov (http://www.nslds.ed.gov).

8. Notify the financial aid office if you are awarded a late scholarship, tuition waiver, or some other benefit, such as VA benefits. This could affect your financial aid package, and you may have to repay some of the money you received.

A list of scholarships offered at the College of Law is available online (http://law.wvu.edu/admissions/financial-aid). Scholarships available from outside sources can be found at www.fastweb.com and other helpful sites.

C.6 TECHNOLOGY SERVICES

Director, Law School Technology
Keith Walton
Phone: 304-293-8556
Email: keith.walton@mail.wvu.edu

Professional Technologist I
Kenneth Price
Phone: 304-293-4657
Email: kenneth.price@mail.wvu.edu

The College of Law's Director of Technology Services manages all computer and networking operations for the law school and law library. Duties include maintaining the law school network, wireless access, office computers, library computers, and printers. The College of Law's Professional Technologist manages all audio-visual equipment and classroom technology at the College of Law. The consultant's duties include maintaining the law school distance learning classroom, AV equipment scheduling, event taping, and AV equipment maintenance.
C.7 COMMUNICATIONS

Director of Marketing and Communications
James Jolly
Phone: 304-293-7439
Email: james.jolly@mail.wvu.edu

Web/Media Designer
Tatsu Johnson
Phone: 304-293-7220
Email: tatsu.johnson@mail.wvu.edu

Communication Specialist
Chelsi Baker
Phone: 304-293-0457
Email: chelsi.baker@mail.wvu.edu

The Director of Communications for the College of Law works with the administration, faculty, staff, and students in strategic communication activities via the internet, and the media to enhance the prestige and goodwill of the institution and to ensure that its needs and reputation are optimized.

C.8 WEB INFORMATION

The College of Law website (http://www.law.wvu.edu) offers a wide range of current information on the law school, its curriculum, programs, news, events, and people. Helpful content is organized primarily in the following categories: Academics, Admission, Career Services, Clinical Law, Faculty and Staff, Student Life and the Law Library.

D. UNIVERSITY SERVICES

1. General Information (p. 567)
2. Health Services (p. 567)
3. Student Activities and Organizations (p. 567)

D.1 GENERAL INFORMATION

Information regarding University services such as ID cards (Mountaineer Card), parking, Health Services, and Disability Services, as well as University student life and affairs, can be found at the WVU Division of Student Affairs website (http://studentaffairs.wvu.edu).

D.2 HEALTH SERVICES

Illness. Student Health Service offers medical assessment, treatment, referrals, family planning services, and educational programs for tuition and fee-paying WVU students. Students make a co-payment for each visit. Student Health is located on the ground floor of the Robert C. Byrd Health Sciences Center, next to Ruby Memorial Hospital and near the Law School. Students should enter through the Mary Babb Randolph Cancer Center and follow the blue signs that say “Student Health Service.” To make an appointment, call 304-293-2311. For more information, see the Student Health Service website (http://www.well.wvu.edu). This is an extremely helpful website.

Mental Health and Counseling Services. Students who seek personal counseling may call the Carruth Center on the main campus at 304-293-4431 for appointments. Counseling services are also available at Student Health Psychiatry in the basement of the Health Science Center. To make a psychiatric appointment, call 304-293-6972.

Please contact the College of Law’s Assistant Dean for Student Affairs at 304-293-7320 if you need assistance in making an appointment.

Insurance. For information on University insurance programs, call 304-293-2315 or visit the web (http://studentinsurance.wvu.edu).

Alcoholism, Drug Prevention, Rape and Domestic Violence. For specialized help in any of these areas, call 304-293-6972.

D.3 STUDENT ACTIVITIES AND ORGANIZATIONS

A complete list of all student activities and organizations sponsored by the University is available at the WVU website (http://studentengagement.wvu.edu/?utm_source=admissions-website&utm_medium=web&utm_content=life&utm_campaign=Admissions%2520Website
Library Guide

A. LAW LIBRARY GUIDE

1. Schedule (p. 568)
2. Location of Materials (p. 568)
3. Law Library Policy/Regulations (p. 568)
4. Borrowing Law Library Materials (p. 568)
5. Services (p. 569)

A.1 SCHEDULE

FALL AND SPRING SEMESTER HOURS
Monday – Friday, 8:00 a.m. – 8:00 p.m.
Saturday/Sunday, 12:00 p.m. – 5:00 p.m.
*Twenty-four hour swipe access is available to law students with limited exceptions

*The Law Library will be closed on all home football game Saturdays. Due to parking restrictions at the College of Law on these weekends, the Law Library will be closed from 9:00 p.m. on Friday evenings until 9:00 a.m. on Sunday morning.

SUMMER HOURS
Monday—Friday 9:00 a.m. – 5:00 p.m.
Saturday —12:00 p.m. – 5:00 p.m.
Sunday Closed

HOLIDAY AND INTERSESSION HOURS
Generally, 9:00 a.m. to 5:00 p.m.
*The Law Library is closed on New Year’s Day, Memorial Day, Independence Day, Labor Day, Thanksgiving Day, and Christmas Day. It also may be closed additional days throughout the year in accordance with the University holiday schedule.

A.2 LOCATION OF MATERIALS
First Floor. Reserve Collection, Reference Collection, United States Core Collection, West Virginia Core Collection, Legal Journals, Rare Book Collection
Second Floor. General Books on American Law and Other Subjects: (AKF), Legal Loose Leaf Collection, Legal Forms Collection, Anglo-American Collection, Foreign and International Collection

A.3 LAW LIBRARY POLICY/REGULATIONS
Food and tobacco products are not allowed in the Library. Drinks are permitted in containers with lids.

A.4 BORROWING LAW LIBRARY MATERIALS
Circulation Policy. Many items in the Law Library collection, including bound journals, do not circulate. Please inquire at the Circulation Desk for circulation information regarding the particular materials you wish to use.

Law students may check out circulating books for the full semester. Books may be renewed three times. Renewals should be made online using WorldCat.
It is the responsibility of the borrower to know when Library materials are due and to return or renew them on or before the due date. If material is lost or damaged, the amount of the fine will be equal to the replacement price plus a $10.00 processing fee.

**Law Library Student ID Number.** To borrow Library materials, all students must have a current WVU student ID card (Mountaineer Card). The Mountaineer Card allows students to check out materials at all of the Libraries on campus and to print off materials at Library Pharos stations.

### A.5 SERVICES

**Contact Information.** Visit the Circulation Desk on the first floor of the Library, call the Circulation Desk at 304-293-5300, or email the Circulation Desk at wvulawbooks@mail.wvu.edu.

**Reserve.** The Reserve Collection contains commercial study aids, course reserve materials, AV materials, and frequently used titles.

**WVU College of Law Examinations.** Copies of some exams that are administered in the College of Law courses are compiled and placed on reserve, at the discretion of individual professors. The exams, which may be used by students as study aids, are available for photocopying.

**WorldCat.** WorldCat is the WVU Library’s online catalog and information network. The holdings of all WVU campus Libraries and worldwide libraries are included in WorldCat. Library materials are accessible by author, title, keyword, and Library of Congress subject heading. WorldCat is available anywhere you have Internet access.

**InterLibrary Loan.** You can borrow materials not found in our collection from other Libraries through EZBorrow, PALsci, and ILLiad. These requests should be made online via WorldCat. Books normally arrive within two weeks and articles within several days. Inquiries concerning this service can be made at the Circulation Desk.

**Computers.** The Law Library provides 15 networked computers. Each computer is connected to the Internet, networked to a printer, and contains the latest versions of commonly used software. Wireless access is also available throughout the College of Law.

**Printing and Photocopies.** Two printer/copiers are available on the floor of the Library and one printer/copier is available on the second floor of the Library. These printers will accept your WVU ID card via Pharos stations.

**Online Legal Databases.** Bloomberg Law, Lexis Advance, and Westlaw are available to all law students. Documents accessed on Lexis Advance may be printed free of charge on the Lexis printer available on the first floor of the Library.

**For Children.** If it is necessary to bring children to the Law School, there are a number of books and toys available for quiet play that can be requested at the Circulation Desk.
Media - Reed College of

Degrees Offered

- Master of Science in Journalism
- Master of Science

Majors

- Data Marketing Communications (M.S.)
- Integrated Marketing Communications (M.S)
- Journalism (M.S.J)
- Media Solutions and Innovation (M.S.J)

The College of Media has two prime locations on campus: its "home" is located on the downtown campus in Martin Hall, WVU's oldest building (constructed in 1870), and its new 10,000 square-foot Media Innovation Lab is located on the nearby Evandsdale campus, close to programs focusing on the arts, engineering and health care.

Established in 1939, the College of Media is among the oldest journalism programs in the United States. The college has nearly 4,600 graduates, the majority of whom have careers in newspaper journalism, broadcasting, advertising, public relations, or related fields. A significant number of master's graduates have gone on to obtain Ph.D.s and teach at the college level. Graduate faculty have educational and professional backgrounds in mass communications and are highly qualified to teach at both the undergraduate and graduate levels.

The master of science in journalism program has granted more than 250 degrees since its first graduate in 1962. The online master of science in integrated marketing communications program has granted more than 700 degrees since its start in 2003. The new online master of science in data marketing communications, launched in fall 2017, is one of the first of its kind in the U.S. It focuses on the analysis of "big data" to make effective strategic marketing communications decisions.

Master of Science in Journalism Program

The master's program offers students the choice of two tracks: the teaching research track for persons who wish to pursue a doctoral degree, and the professional track for those who wish to enhance their professional opportunities in some area of mass communications.

This program, designed to help each student reach his/her potential as a practitioner, teacher, or scholar in mass communications, prepares a graduate not only for a first job but also for long-term productive career development through the study of mass communications and related fields. Skills acquired allow the student to excel in his/her chosen profession.

Master of Science in Integrated Marketing Communications Program

The Integrated Marketing Communications (IMC) graduate program--http://imc.wvu.edu/~ was the first online graduate program in integrated marketing communications in the world. Established in 2003 by the Reed College of Media (formerly P. I. Reed School of Journalism), the program celebrated its 10th anniversary in 2013. There are more than 400 active students in the program and more than 600 program graduates. Students take an introductory course, four core courses, two specialty courses (chosen from 3 options), three electives (chosen from around 20 options) and complete the degree with a capstone experience.

Master of Science in Data Marketing Communications Program

The Data Marketing Communications (DMC) graduate program (http://dmc.wvu.edu) is offered exclusively online with no on-campus classroom attendance required. The DMC curriculum currently consists of 11 courses and is always evolving and changing to stay current with the industry. Students move through the program in 16 months as a cohort, taking the prerequisite course and the related Quantitative Assessment Exam, followed by eight core courses taken in thematically paired blocks, one elective and one capstone course.

Assistantships

Assistantships available in and through the college each year pay stipends, health insurance, and tuition remission. Graduate assistants assist professors with teaching courses, service learning, and research projects, and supervise broadcast and computer laboratories. Some graduate students work in media-related positions programs in units across WVU.

ADMINISTRATION

DEAN

- Maryanne Reed - M.S. (Northwestern University)
ASSOCIATE DEAN

• Diana Martinelli - Ph.D. (University of North Carolina at Chapel Hill)
  Associate Professor

ASSISTANT DEANS

• Chad Mezera - M.S. (West Virginia University)
  Online Programs

• Tricia Petty - M.Ed. (University of Georgia)
  Student and Enrollment Services

DIRECTOR OF GRADUATE STUDIES

• Steve Urbanski - Ph.D. (Duquesne University)
  Associate Professor

Degree Designation Learning Goals

MASTER OF SCIENCE IN DATA MARKETING COMMUNICATIONS (MS)

Upon completion of this program students will be able to:

1. Understand the basic principles of data marketing communications, media and web analytics.
2. Understand the differences between reporting and analysis.
3. Recognize how metrics and analysis inform marketing communications decision making.
4. Explain how marketing communicators use current analytic methods such as segmentation, profiling, and recency, frequency and monetary (RFM) analysis to deliver return on investment (ROI) for their clients.
5. Communicate key insights gleaned from data to marketing communications decision makers.
6. Make marketing communications decisions informed by data.

MASTER OF SCIENCE IN INTEGRATED MARKETING COMMUNICATIONS (MS)

Upon successful completion of the IMC curriculum, students will be able to:

1. Illustrate critical thinking, creativity and innovation in collaboration with colleagues and in the completion of written assignments.
2. Demonstrate a global and multicultural awareness in the development and implementation of marketing communications strategies.
3. Compare and contrast the benefits and limitations of various qualitative and quantitative research methods relevant to marketing communications.
4. Recognize the roles and implications of law and ethics in marketing communications.
5. Design and organize marketing communications materials in a professional manner consistent with contemporary industry-specific standards.

MASTER OF SCIENCE IN JOURNALISM (MSJ)

Upon successful completion of the MSJ curriculum, students will be able to:

1. Understands economic, ethical, historical, legal, political, social, and technological forces that shape the roles and structures of the media.
2. Has mastered sufficient writing, researching, and editing skills to be a professional in the student’s chosen field.
3. Has an ability to articulate journalistic concepts and skills.
4. Understands methodology used in areas such as historical, legal, intercultural, qualitative and quantitative research.
5. Has an ability to conduct original research that contributes to knowledge in the field.
6. Has an ability to communicate, orally and in writing, research methodology and results.
7. Has an ability to place research results in perspective.

MASTER OF SCIENCE IN MEDIA SOLUTIONS AND INNOVATION (MS)

Upon completion of this program students will be able to:

1. Understand the basic principles of innovation theories as applied to media practice.
2. Understand current and emerging technology and digital platforms and their implications for media practice.
3. Understand problems in law and ethics in media practice related to new technology.
4. Solve problems in content acquisition and creation in media production using new technology.
5. Solve problems in audience development, monetization and distribution using new technology.
6. Practice advanced project management across diverse teams in media organizations.
7. Produce innovative media products using advanced digital storytelling techniques such as Virtual Reality, Augmented Reality, Artificial Intelligence, and other interactive media.
8. Design and conduct research to solve current and emerging industry problems.
9. Communicate key insights and forecasting data regarding adoption of new technology and new digital practice to decision makers.
10. Explain how media organizations use current methods such as social media, mobile-first content, algorithms, AI and ‘bots’, and a range of industry-standard analytics tools to conduct audience-building.

Admission

Those interested in learning about and applying to the master of science in journalism program should contact the Director of Graduate Studies via e-mail (steve.urbanski@mail.wvu.edu). Prospective graduate students specifically seeking information about the master of science in integrated marketing communications or master of science in data marketing communications should contact imcprogram@mail.wvu.edu. The WVU Admissions online catalog is available at http://admissions.wvu.edu/graduate. Written requests for answers may also go to WVU, Reed College of Media, 112 Martin Hall, P.O. Box 6010, Morgantown, WV 26506-6010. The College of Media telephone number is (304) 293-3505. The IMC program's office number is (304) 293-6783.

Master of Science in Data Marketing Communications

Degree Offered

The Data Marketing Communications (DMC) graduate program (http://dmc.wvu.edu) is offered exclusively online with no on-campus classroom attendance required. The DMC curriculum currently consists of 11 courses and is always evolving and changing to stay current with the industry. Students move through the program in 16 months as a cohort, taking the prerequisite course and the related Quantitative Assessment Exam, followed by eight core courses taken in thematically paired blocks, one elective and one capstone course.

In the WVU DMC program communications professionals learn how to integrate data and quantitative processes into their organizations to support key decision-making about communications initiatives. Students will earn a practical and in-demand degree to bridge the gap between data scientists and communicators and help their organizations reach their key audiences and stakeholders to reach their goals. Graduates of the DMC program will be able to meet employer needs by being literate in the many ways data can be utilized to support marketing communication decision-making.

The program is taught by a diverse faculty who are recognized leaders in their fields.

Graduate Assistantships

Students in the DMC program who secure a graduate assistant position at any academic or non-academic unit on campus will be eligible to receive a waiver of University tuition for DMC courses, as well as any stipend/compensation offered by the unit hosting the position. For complete information on graduate assistant options at WVU, please visit the Graduate Education Assistantships webpage (http://graduateeducation.wvu.edu/funding-and-cost/graduate-assistantships).

Program Format

The program’s academic year consists of five accelerated terms: Early Fall (August–October), Late Fall (October–December), Early Spring (January–March), Late Spring (March–May) and Summer (May–July).

Admission

Like all premier academic programs, admission to the Data Marketing Communications online graduate program at West Virginia University is highly competitive and the total number of available seats for each entry term is limited. Admission to the program is based on a holistic, case-by-case analysis of the applicant’s WVU Graduate Application for Admission, academic record (undergraduate transcript), GRE or GMAT scores, years of relevant professional experience (resume), and writing ability and intent (personal statement).

Students are currently admitted to the DMC program once per year, in the Early Fall (August) admission term. All applications received by the application priority deadline of June 15 will be considered, and accepted students will be notified by the corresponding priority acceptance notification date of July 15.

Visit the DMC website (http://dmc.wvu.edu) for comprehensive information about the online graduate program, including faculty biographies, curriculum and course information, details on the application and admissions process, and to register for a free online information session.

Completion of DMC 660 and related Quantitative Assessment Exam is required before DMC students can proceed to the rest of the core courses.

Degree Requirements

Minimum cumulative GPA of 2.75 required.
Minimum grade of C- required in all courses provided that a cumulative 2.75 GPA is maintained.
### Introductory Course

**DMC 660**
Introduction to Data Marketing Communications

### Core Courses

**DMC 661**
Audience Segmentation

**DMC 662**
Message Customization

**DMC 663**
Brand Data Collection & Visualization

**DMC 664**
Social Media Optimization

**DMC 671**
User Experience Platforms

**DMC 672**
Campaign Planning & Programmatic Media Buying

**DMC 673**
Campaign Metrics and Assessment

**DMC 674**
Messaging for Customer Relationship Management

### DMC Elective Courses
Select one DMC or IMC course at the 600-level or above from the list below

**DMC 681**
B2B Programmatic Marketing Communications

**DMC 682**
Creativity and Data

**DMC 683**
Data Communication and Visualization for the Client

**DMC 684**
Digital Marketing Communication Channels

**IMC 617**
Consumer Sales Promotion

**IMC 626**
Business-to-Business Direct Marketing

**IMC 628**
Applied Public Relations

**IMC 629**
Mobile Marketing

**IMC 635**
Visual Information Design

**IMC 641**
Social Media and Marketing

**IMC 642**
Web Metrics and Search Engine Optimization

### Capstone Course

**DMC 680**
Data Marketing Communications Campaigns

### Total Hours

33

* Students complete the DMC 660 course and quantitative post-test in their first term in the program. Following successful completion of DMC 660, students will proceed through the courses in ordered blocks of DMC 661 & 662, 663 & 664, 671 & 672, and 673 & 674. Introductory course, elective course and campaigns course are all taken as stand-alone courses in the applicable semesters.

Upon successful completion of DMC 680 in the student's final term, the student will graduate from the program.

It should be noted that the plan of study listed below relies on condensed parts of term where two parts of term can be completed within the traditional fall and spring semesters.

**Degree Requirements**

**Major Learning Goals**

**DATA MARKETING COMMUNICATIONS**

Marketing communications professionals have been relying on data in various forms since the early days of media. However, new technologies are having a dramatic effect on how marketing communications campaigns are planned and assessed. With unprecedented access to individual transaction-level data, marketing communicators can now use available information to customize a target consumer’s exposure to advertisements and other promotional communications. While much of the data processing is automated, marketing communicators increasingly must be adept at managing vast amounts of information to glean key insights and give their organizations a competitive advantage.

Upon completion of this program students will be able to:

- Understand the basic principles of data marketing communications, media and web analytics.
- Understand the differences between reporting and analysis.
- Recognize how metrics and analysis inform marketing communications decision making.
- Explain how marketing communicators use current analytic methods such as segmentation, profiling, and recency, frequency and monetary (RFM) analysis to deliver return on investment (ROI) for their clients.
- Communicate key insights gleaned from data to marketing communications decision makers.
- Make marketing communications decisions informed by data.

**Master of Science in Integrated Marketing Communications**

Rooted in the tradition of academic excellence of WVU, the Reed College of Media's Integrated Marketing Communications (IMC) graduate program (http://imc.wvu.edu) has developed a national reputation for hands-on, industry relevant education.

The program is offered exclusively online with no on-campus classroom attendance required. The award-winning IMC curriculum currently has more than thirty online courses and is always evolving based on industry innovations and best practices. At the center of the curriculum are four core courses, which provide all students with a solid marketing communications foundation. The core is enhanced by a wide variety of specialty courses and more than twenty elective options that allow students to focus on individual areas of interest.

The WVU Reed College of Media online faculty are recognized leaders in their fields. These scholar-practitioners provide a carefully balanced blend of academic theory and practical skills. They teach our “learn-it-today, use-it-tomorrow” curriculum, which provides you with valuable, practical knowledge that can be immediately applied to your current career.

The IMC program is recognized nationally for its quality of instruction, flexible model and relevance to the industries it serves and was awarded the Online Learning Consortium’s Program of the Year distinction in 2015. Most IMC students work full-time while earning their degree. All IMC courses are asynchronous, allowing students to participate at any time, from anywhere in the world. While no on-campus residency is required to complete the degree, the program hosts its annual INTEGRATE conference to provide students and faculty an opportunity to network and explore the latest innovations in the ever-changing IMC landscape. Information on the conference can be found on the IMC program's INTEGRATE webpage (http://imc.wvu.edu/integrate).

**Graduate Assistantships**

Students in the IMC program who secure a graduate assistant position at any academic or non-academic unit on campus will be eligible to receive a waiver of University tuition for IMC courses, as well as any stipend/compensation offered by the unit hosting the position. For complete information on graduate assistant options at WVU, please visit the Graduate Education Assistantships webpage (http://graduateeducation.wvu.edu/funding-and-cost/graduate-assistantships).

**Program Format**

The program’s academic year consists of five accelerated terms: Early Fall (August–October), Late Fall (October–December), Early Spring (January–March), Late Spring (March–May) and Summer (May–July).

Due to the rigor of IMC program courses, students should register for no more than two courses in any IMC term. Most students who work full-time indicated that one to two course(s) per term is manageable. Students are encouraged to work with their advisor to select a course schedule that fits their life. Most students complete the master's degree in approximately two years. However, University policy allows students up to eight years to complete.
a master's degree, and the IMC program model supports students in taking terms off as needed to balance their graduate studies with personal and professional obligations.

Those who wish to complete IMC coursework but either already have a master's degree or are not planning to pursue a full master's degree are invited to apply to the five-course IMC certificate program (http://imc.wvu.edu/curriculum/imc_certificate).

**Admissions**

Like all premier academic programs, admission to the IMC online graduate program at West Virginia University is highly competitive and the total number of available seats for each entry term is limited. Admission to the program is based on a holistic, case-by-case analysis of the applicant’s WVU Graduate Application for Admission, academic record (undergraduate transcript), GRE or GMAT scores*, years of relevant professional experience (resume), writing ability and intent (personal statement) and references (letters of recommendation).

*The GRE/GMAT admission requirement may be waived for interested applicants who meet certain professional or educational conditions. Please submit your information to the IMC Review Dropbox to have your credentials evaluated for the GRE/GMAT waiver and to receive more information about the program.

Students are admitted to the IMC program three times per year, in the Early Fall (August), Early Spring (January), and Summer (May) admission terms. All applications received by the application priority deadline will be considered, and accepted students will be notified by the corresponding priority acceptance notification date. However, the IMC program operates on a rolling admissions basis and qualified applicants may be accepted earlier than the priority acceptance notification date.

Total Hours 33

* Students complete the IMC 610 course in their first term in the program. Following successful completion of IMC 610, students are able to take courses in virtually any order, ensuring a fully customized path of study.

** IMC students are often admitted to the program with substantial work experience and are able to opt out of the core course that is most reflective of their professional experience. Specifically, PR practitioners are encouraged to opt out of IMC 618, direct marketers are encouraged to opt out of IMC 616, and creative/graphic designers are encouraged to opt out of IMC 615. All students must complete at least two of these three courses.
IMC students are able to take more than 33 credit hours if their personal and/or professional interests require (including additional elective courses or opting to complete all the core courses to ensure a comprehensive graduate experience). However, all additional courses taken must be completed before the student registers for the capstone course (IMC 636).

Upon successful completion of IMC 636 in the student's final term, the student will graduate from the program.

## Management Area of Emphasis Requirements

The Area of Emphasis in Management is intended to prepare IMC students to apply their skills in a traditional business administrative setting. Students will be exposed to course work in leadership, ethic, negotiations and management information systems.

**Course Requirements.** In order to satisfy the requirements of the Area of Emphasis, a student must complete the required courses below. Note, that a cumulative GPA of 2.75 is required for graduation from the IMC program. The courses and grades from the Area of Emphasis will be counted towards a student's cumulative GPA (a C- or better is required in courses, with an overall cumulative GPA of 2.75) in the IMC program.

Minimum grade of C- is required.

Major Learning Goals

INTEGRATED MARKETING COMMUNICATIONS

In the WVU IMC program, communications professionals learn to re-align their marketing activities to ensure a constant flow of information to consumers from a variety of media. Upon successful completion of the IMC curriculum, students will be able to:

1. Illustrate critical thinking, creativity and innovation in collaboration with colleagues and in the completion of written assignments.
2. Demonstrate a global and multicultural awareness in the development and implementation of marketing communications strategies.
3. Compare and contrast the benefits and limitations of various qualitative and quantitative research methods relevant to marketing communications.
4. Recognize the roles and implications of law and ethics in marketing communications.
5. Design and organize marketing communications materials in a professional manner consistent with contemporary industry-specific standards.

Graduate Certificate in Integrated Marketing Communications (IMC)

The 15-credit IMC graduate certificate provides students with a broad overview of IMC, focusing on several integral aspects of the discipline.

The program’s academic year consists of five eight-week terms:

- Early Fall (Aug. – Oct.)
- Late Fall (Oct. – Dec.)
- Early Spring (Jan. – March)
- Late Spring (March – May)
- Summer (May – July)

Students working toward their IMC certificate take one course per term for one calendar year (five sessions). Certificate-seeking students can begin coursework in either the Early Fall, Early Spring or summer sessions.

* Elective options are based on availability; other electives may be substituted based on current course offerings.

Admission requirements to the IMC certificate track are the same as for the master’s degree track. For certificate students who may be interested in applying courses to the full master’s degree: University Policy states that a maximum of 6 credits obtained by a non-degree student can be applied toward any degree. The IMC and DMC graduate certificate programs are 5 classes/15 credits and our master’s degree in IMC is 11 classes/33 credits. If you complete the IMC or DMC graduate certificate, only 6 of the 15 credits would apply toward our IMC master’s degree. If you start in either of the certificate programs and complete 6 hours or less before changing over to the full master’s degree, this policy will not affect you. (Note: currently there is an eight year maximum time frame for graduate work completion.)

**Master of Science in Journalism**

The master of science in journalism (M.S.J.) program in the Reed College of Media is designed to help persons involved in various aspects of mass communication to better understand and to cope not only with the increased complexity of their own majors but also with fields outside mass communications.

The program, created to assist each student in reaching his/her potential as a worker, teacher, or scholar in mass communications, prepares a master’s candidate not only for a first job but also for long-term and productive career development through the study of mass communications and related fields. Students who obtain the M.S.J. degree should excel in professional skills.

The M.S.J. program is intended to afford liberal arts graduates an opportunity to concentrate on advanced study in mass communications; to provide intensive study for persons who have undergraduate journalism training and who wish to pool their journalistic skills with extensive knowledge in another substantive area or areas (e.g., political science, economics, science); and to give persons who have had considerable professional experience an opportunity to broaden their academic bases through carefully selected advanced studies.

**Assistantships and Tuition Waivers**

Approximately five assistantships are available in the College of Media each academic term. Graduate assistants teach laboratories and assist professors with their courses and research. Interns work in mass communications-related jobs on campus to obtain solid professional experience.

Students may receive stipends for the academic term and may apply for tuition remission for the entire year. Although sometimes renewed for a second or third term, assistantships and internships are granted for one academic term. Graduate assistants and interns work an average of twenty hours per week during the academic year.

Persons who wish to be considered for assistantships or internships should have their applications on file with the Director of Graduate Studies before March 1 of the same year.

**Tracks**

The College of Media offers two tracks—the teaching/research track and the professional track—within the M.S.J. program.

**Teaching/Research**

The teaching/research track is generally a program for persons who wish to pursue a Ph.D., to teach at the college/university level, and to conduct research in areas of mass communications. Persons in this track normally take research and theory courses both inside and outside the College of Media, statistics, and social science courses. The program culminates in a thesis, which is a scholarly theoretical study of an important aspect of mass communications.

**Professional**

The professional track is designed primarily for persons who wish to become excellent practitioners in some field of mass communications and who have less desire to teach or to become mass communications researchers. Persons in the professional track normally take communication and outside area
courses that will help them to become better practitioners. The program culminates in a professional project, which helps a student to extend his/her practical and theoretical knowledge about a given aspect of mass communications and should be a non-routine project on which the student could work as a professional.

**Time Limitation**

Students must complete all graduate degree requirements, including either a thesis or a professional project, within eight years of beginning the initial coursework of the program. After this period, courses must be revalidated according to the procedures set forth in the WVU Graduate Catalog.

**Maintenance of Scholarship**

A journalism graduate student must maintain satisfactory progress toward his/her M.S.J. The candidate’s graduate record begins with the first course credited toward the master’s and includes all subsequent courses. Every graduate student must maintain at least a 3.0 grade point average and complete all requirements within eight years. Anyone who fails to meet this standard will be subject to academic probation and possible dismissal from the program.

Each person working toward the M.S.J. should register for at least one hour during every regular (fall and spring) term. This enrollment may be in coursework or in research.

**International Students**

Believing that mutual benefit is derived when scholars from other countries study in the Reed College of Media, the faculty welcomes international students. At the same time the faculty recognizes that journalism, more than any other field, requires language skills. To profit from journalism study, international students must have a ready understanding of English. International students, for whom English is not their official language, must include TOEFL scores. The minimum TOEFL scores needed for consideration at WVU are 550 (paper test), 213 (computer test), and 79 (internet test).

**Admission**

Admission to the M.S.J. program is limited to recipients of baccalaureate or equivalent degrees from institutions of higher learning. Applicants should have combined verbal and quantitative Graduate Record Examination (GRE) Aptitude Test scores of 153 Verbal and 144 Quantitative and should have earned at least a 3.0 cumulative grade point average (GPA) on a 4.0 scale. Each applicant should submit to the College of Media Director of Graduate Studies a detailed statement of purpose explaining why the student wishes to undertake graduate study in journalism, what the student hopes to glean from the graduate journalism program, what his/her long-term goals are, and how graduate education in journalism can help achieve those goals.

An applicant who does not meet the minimum GRE and/or GPA requirement(s) may be accepted only if the low GPA or GRE scores are offset by extraordinary factors. Excellent recommendations, unusual grading patterns (e.g., a steady rise of grades), an outstanding statement of purpose, or examples of professional accomplishment sometimes can offset low GRE scores or a low GPA.

Students applying for admission to the M.S.J. program are encouraged to send nonreturnable supporting material to the College of Media Director of Graduate Studies. A list of these materials can be found at: http://journalism.wvu.edu/graduate/master-of-science-journalism.

All other materials (e.g., transcripts, GRE scores, application forms) should be sent to the Office of Admissions.

Students may also apply online at: https://app.applyyourself.com/AYApplicantLogin/ApplicantConnectLogin.asp?id=wvugrad.

**Degree Requirements**

A minimum GPA of 3.0 is required in all courses

</tbody>
</table>

Total credit hours: 37

* Various electives. In both programs, sixty percent of the graduate credits submitted for the degree (eighteen credits) must be in courses numbered 500–799

** Students who choose to write a thesis must register for at least 3 credits of Research (JRL 697) and 3 credits of Thesis or Dissertation (JRL 698). Students who write a professional project must register for at least 6 credits of Research (JRL 697).

Students should note that the majority of credits submitted for the degree must be in courses numbered 500 or above.

The thesis or professional project will be graded as an S or U (satisfactory or unsatisfactory).

Except for thesis, professional project, and internship courses, no student may take a course on a P/F or S/U grade basis without prior approval of the Director of graduate studies.

## THESIS/PROFESSIONAL PROJECT

Each student must complete a thesis or a professional project involving original work in his/her area of interest. The master's candidate should have a thesis or professional project proposal written by the end of the academic term in which the first twelve hours of coursework are completed.

Each student is responsible for developing ideas for the thesis or professional project. Through consultations with journalism faculty, the student can determine faculty interests and areas of expertise; he/she then refines a preliminary idea to a significant, feasible thesis/project topic.

Normally students will enroll for six credit hours of theses/research courses. The Director of Graduate Studies must approve any deviations from this norm.

In addition to this six-hour limit, no graduate student will be permitted to enroll in more than six hours of research and/or colloquium courses without approval from the director of graduate studies.

## ADVISORY COMMITTEE

The student, with approval of the director of graduate studies, selects a journalism graduate faculty member who would be best able to chair his/her Advisory Committee, subject to the agreement of the faculty member. If questions arise about a faculty member’s interest or knowledge, the student should consult the director of graduate studies. With the chairperson, the student further refines the topic to a “preliminary proposal” stage, in which concepts and appropriate methodology are on paper but not necessarily in formal proposal form.

After the student has written a preliminary proposal and selected a faculty chairperson, the student should select other members of his/her committee, subject to their willingness to serve. The committee must consist of no fewer than four members and at least two persons must be members of the WVU faculty; others may be from other departments at WVU. Committee chairs must be members of the College of Media graduate faculty. The fourth member of all theses committees must be affiliated with the graduate program at an accredited university (or another department at WVU). The fourth member of professional project committees may be from the professional realm.

## PROPOSALS

At this point, students in the thesis/professional track must submit proposals to their committee, which must approve all topics (but not research methods, specific research questions, or hypotheses, etc.). Students may attend the meetings at which their proposals are discussed. After securing committee approval, students schedule a proposal defense date. Proposal defenses are required of all students.

Working under the committee’s guidance, each student revises the thesis or project proposal, extended from the preliminary proposal. Guidance for designing a proposal is available from the Director of Graduate Studies.
Once the committee agrees that the proposal is ready, a proposal defense is scheduled.

**FINAL THESIS/PROJECT APPROVAL**

After the thesis/project proposal defense, the committee votes to accept or to reject a proposal. The student whose proposal is approved works closely with a committee to complete his/her final thesis or project. A master’s candidate must inform his/her committee and consult its members for advice (as needed and as desired by them) as the thesis or project develops.

After each advisory committee member is satisfied with the thesis or project, a final defense is scheduled. Announcements of the defense should be posted in Martin Hall. Students also should make certain that they file their thesis/project signature form with the director of graduate studies (and the University Libraries) two weeks before their defense date.

Only committee members may vote on acceptance or rejection of a thesis. Although someone may cast a recorded dissenting vote, a majority vote is sufficient to approve a thesis/project. Furthermore, at least three signatures (two of which must belong to College of Media faculty members) must appear on the approval sheet.

Master’s candidates should follow APA or another approved stylebook during preparation of a thesis or professional project.

Each committee chairperson will ultimately decide whether the candidate has properly made the requested corrections (after the final defense); that chairperson also will check the style and form of the final version. Every graduate student is responsible for delivering a copy of a final thesis or professional project to the director of graduate studies; he/she also must file a thesis or professional project electronically (to the University Library) before the academic term’s deadline.

**Major Learning Goals**

**JOURNALISM**

Whether students in the M.S.J. program are interested in teaching and research or strictly professional pursuits, upon completing the program, they will be able to:

1. Understand economic, ethical, historical, legal, political, social and technological forces that shape the roles and structures of the media.
2. Employ writing, researching and editing skills to be a professional in the graduate’s chosen field.
3. Articulate journalistic concepts, values and skills.
4. Understand methodology used in historical, legal, cultural and other types of qualitative and quantitative research.
5. Conduct original research that contributes to knowledge in the field.
6. Effectively communicate orally, through writing, and through various media.
7. Understand and critically evaluate public opinion polls and other types of quantitative and qualitative research.

**Media Solutions and Innovation**

The Media Solutions graduate program is a 12-month degree program offered in a hybrid online/on-campus format, with one semester in the field for the Capstone practicum experience.

This program is designed to produce practical, research-driven collaborations between the Reed College of Media, master’s degree candidates and industry partners. Students in this program will learn about the disruptions in the media industry and will partner with industry to assist in research and development, discovery, and creating targeted solution pathways to address some of the industry’s most challenging problems. In addition to producing applied research and hands-on, practical solutions for current and anticipated industry problems, this curriculum explicitly prepares students to become media strategists and futurists who can function as change agents and adaptive leaders within the industry. Graduates will master these qualities and know how to use them in a variety of media contexts, whether small or large, new or legacy outlets.

The program is taught by a diverse faculty who are recognized leaders in their fields.

**GRADUATE ASSISTANTSHIPS**

Students in the Media Solutions program who secure a graduate assistant position at any academic or non-academic unit on campus will be eligible to receive a waiver of University tuition for Media Solutions courses, as well as any stipend/compensation offered by the unit hosting the position. For complete information on graduate assistant options at WVU, please visit the Graduate Education Assistantships webpage.

**PROGRAM FORMAT**

The program’s academic year consists of three terms corresponding to the University’s existing parts of term: Fall (August–December), Spring (January–May) and Summer (May–August).
Admission

Like all premier academic programs, admission to the Media Solutions graduate program at West Virginia University is highly competitive, and the total number of available seats for each entry term is limited. Admission to the program is based on a holistic, case-by-case analysis of applicants’ WVU Graduate Application for Admission, academic record (undergraduate transcript), GRE or GMAT scores, years of relevant professional experience (resume), writing ability and intent (personal statement), professional and/or academic references (letters of recommendation) and their demonstrated proficiency in media tools through a portfolio or from completed coursework.

Students are admitted to the Media Solutions program once per year, in the Fall (August) admission term. All applications received by the application priority deadline will be considered, and accepted students will be notified by the corresponding priority acceptance notification date.

Visit the Media Solutions website for comprehensive information about the graduate program, including faculty biographies, curriculum and course information, details on the application and admissions process, and to register for a free online information session.

Degree Requirements

Minimum cumulative GPA of 3.0 is required for graduation.

A grade of C# or better is required in all courses.

Major Learning Goals

MEDIA SOLUTIONS AND INNOVATION

Upon completion of this program students will be able to:

1. Understand the basic principles of innovation theories as applied to media practice.
2. Understand current and emerging technology and digital platforms and their implications for media practice.
3. Understand problems in law and ethics in media practice related to new technology.
4. Solve problems in content acquisition and creation in media production using new technology.
5. Solve problems in audience development, monetization and distribution using new technology.
6. Practice advanced project management across diverse teams in media organizations.
7. Produce innovative media products using advanced digital storytelling techniques such as Virtual Reality, Augmented Reality, Artificial Intelligence, and other interactive media.
8. Design and conduct research to solve current and emerging industry problems.
9. Communicate key insights and forecasting data regarding adoption of new technology and new digital practice to decision makers.
10. Explain how media organizations use current methods such as social media, mobile-first content, algorithms, AI and ‘bots’, and a range of industry-standard analytics tools to conduct audience-building.
Education

- M.D., Doctor of Medicine
- M.D./Ph.D., Dual Doctor of Medicine and Doctor of Philosophy
- Ph.D., in Biochemistry and Molecular Biology
- Ph.D. in Cancer Cell Biology
- Ph.D. in Cellular and Integrative Physiology
- M.S., Ph.D. in Clinical and Translational Science
- Ph.D. in Immunology and Microbial Pathogenesis
- Ph.D. in Neuroscience
- M.H.S. in Pathologists’ Assistant
- M.S., Ph.D., Exercise Physiology
- M.S. in School Health Education
- M.O.T., Master of Occupational Therapy
- D.P.T., Doctor of Physical Therapy
- Ph.D., Pharmaceutical and Pharmacological Sciences
- M.D./M.P.H., Doctor of Medicine and Master of Public Health
- M.S., Biomedical Sciences
- M.S., Health Sciences

Introduction

The West Virginia University School of Medicine is a part of the Robert C. Byrd Health Sciences Center, a comprehensive academic health system with three campuses in the state, a network of affiliated hospitals and practice plans, and a mission of education, research, clinical care, and service to the state. On the main Morgantown campus, students have access to a full range of research and clinical facilities, including a relatively new, four-story laboratory building and a wide range of advanced research centers. West Virginia University hospitals feature sophisticated medical technology, including magnetic resonance imagery, lithotripsy, and laser surgery; the campus includes a large and busy tertiary hospital, a trauma center, children’s hospital, cancer center, a psychiatric hospital, primary care and specialty clinics, a rehabilitation hospital, and many other patient care facilities.

Graduate study in the biomedical sciences is in seven Ph.D. graduate programs: biochemistry and molecular biology; cancer cell biology; cellular and integrative physiology; exercise physiology; immunology and microbial pathogenesis; neuroscience; and pharmaceutical and pharmacological sciences (a collaboration with the School of Pharmacy). Biomedical sciences graduate students take a common core curriculum the first semester and match with a faculty mentor and select one of the seven Ph.D. training programs after the first semester or by the end of year one. There is also a M.S. degree in the Biomedical Sciences. Core coursework for this M.S. degree is similar to that of the first semester of Ph.D. training in the biomedical sciences.

Students in professional programs, such as the M.D. degree program in the School of Medicine, may obtain a master's of public health degree through several options available in collaboration with the School of Public Health. There is also a combined M.D./Ph.D. dual degree option for students interested in pairing medical and basic science education at the doctoral level.

The Department of Human Performance and Applied Exercise Sciences offers graduate degrees in the clinical areas of exercise physiology, physical therapy, and occupational therapy. There is also a master's of health sciences degree (M.H.S.) for the pathologist’s assistant available through the Department of Pathology. All graduate and professional programs in the School of Medicine complement other existing programs in health professions offered through other schools (dentistry, nursing, and pharmacy and public health) that are part of the Health Sciences Center.

The M.S. and Ph.D. programs in Clinical and Translational Science, housed within the West Virginia Clinical and Translational Science Institute, foster the training and career development in clinical and translational research.

The M.S. in Health Sciences is a 12-month, non-thesis master's program that targets students who desire to enhance their competitiveness for entry into advanced professional or graduate programs or who are interested in more in-depth study in biomedical or public health disciplines.

ADMINISTRATION

DEAN
- Clay Marsh - M.D. (West Virginia University)

VICE DEAN FOR CLINICAL SERVICES & CMO WVU HEALTHCARE
- Judie Charlton - M.D. (West Virginia University School of Medicine)
MASTER OF SCIENCE (MS) IN THE BIOMEDICAL SCIENCES

This program is designed to assist in the selection of a career path, albeit industry, teaching, or a professional program, and/or for the transition to a biomedical Ph.D. program. The first-year curriculum imparts a fundamental understanding of the functional components of a cell and the basis for regulation of cellular processes and organ systems. After selecting a mentor, students take additional courses that align with their research interests.

Students will:

- Integrate molecular, cellular, and integrative systems concepts
- Critically interpret the current scientific literature
- Develop critical thinking and problem-solving skills
- Design and interpret experiments to test molecular, cellular, and integrative systems mechanisms
• Demonstrate technical skills in conducting scientific experimentation
• Articulate, verbally and in writing, their understanding of concepts during scientific discussions
• Discuss relevant scientific ethical issues presented as case studies
• Engage with fellow students and faculty and demonstrate teamwork

**MASTER OF SCIENCE (MS) IN CLINICAL AND TRANSLATIONAL SCIENCE**

This program is designed to foster the training and career development of health professionals in clinical and translational research. The target group for this program is junior faculty, fellows, residents, and PhDs. Trainees acquire a well-rounded education in the areas of biostatistics, epidemiology, translational science, clinical trials, scientific ethics, and scientific writing (grant and manuscript) and obtain research training in a mentored environment.

Students will:

• Differentiate between parametric and nonparametric methodologies
• Test hypotheses, using statistical software (SAS, R) to perform basic biostatistical analyses
• Examine mortality and morbidity trends
• Measure frequency and association
• Design research studies and interpret data
• Screen from an epidemiological perspective
• Translate research discoveries into policies and practices that promote health
• Critically evaluate the clinical trial literature
• Design an original clinical trial
• Write a grant proposal and manuscript
• Discuss relevant scientific ethical issues presented as case studies

**MASTER OF SCIENCE (MS) IN EXERCISE PHYSIOLOGY**

This program is designed with a clinical and a thesis track. The clinical track specializes in working with persons with diseases such as obesity, cardiovascular disease, and diabetes and aging. The thesis track provides opportunities for students to study mechanisms leading to and contributing to health diseases and disparities and to understand the impact of exercise on these health issues. The graduates of the masters program will become leaders who will supervise Exercise Physiologists in hospitals, rehabilitation, aquatic therapy programs, fitness, or academic settings.

Students will:

• Critically apply theories, methodologies, and knowledge to address fundamental questions in health specific issues related to exercise physiology
• Demonstrate skills in written and oral communication and critical thinking by critically analyzing research that is significant and novel in exercise physiology and within the sub-discipline associated with it
• Plan and conduct this research or implement this project under the guidance and approval of their research mentors while developing the intellectual independence that typifies true scholarship (thesis track students)
• Critically evaluate published research data and demonstrate clinical skills in working with patients and evaluating health and exercise-stress test data for appropriate exercise treatment (clinical track students)
• Follow the principles of ethics associated with appropriate research conduct (thesis track students) or clinical treatment of patients (clinical track students)
• Interact productively with people from diverse backgrounds including mentors and team members/peers with integrity and professionalism

**MASTER OF SCIENCE (MS) IN THE HEALTH SCIENCES**

This is a terminal degree program targeting students interested in developing their skills toward a career requiring knowledge in the biomedical sciences. The objectives of this program are to:

• Provide integrative scientific education in the biomedical and public health sciences to graduates from an accredited undergraduate institution
• Develop integrative and critical thinking skills to allow application of scientific knowledge to traditionally non-scientific fields
• Train students in the rudiments of research on a basic science, public health, or clinical topic, including hypothesis testing, data collection, and manuscript preparation
• Enhance students’ competitiveness for admission to a health professional and/or Ph.D. program
• Provide the opportunity to explore career options in various health professional disciplines
• Enhance skills for job placement including resume and cover letter evaluation, and interviewing preparation

Students will:

• Demonstrate mastery of basic science information in at least two basic science courses
• Demonstrate mastery of core public health knowledge
• Be able to learn new information via reading the scientific literature and attending seminars
• Demonstrate mastery of public speaking and written communication skills
• Be able to develop novel hypotheses, collect data to test this hypothesis, and report their findings

**MASTER OF OCCUPATIONAL THERAPY (MOT)**

This program is designed to meet the needs of rapidly changing and dynamic health and human services delivery systems that require the occupational therapist to possess basic skills as a direct care provider, consultant, educator, manager, researcher, and advocate for the profession and the consumer.

Students will:

• Successfully complete the coursework and fieldwork components of the program; completing the program with a grade point average of 3.0 or higher and a passing grade on all fieldwork
• Graduate within a time frame of three years following acceptance to the program; completing all academic work, clinical fieldwork, and community service within that time frame
• Demonstrate professional behaviors, attitudes, and values that are in agreement with and as outlined in the West Virginia Student Occupational Therapy Program Handbook and the American Occupational Therapy Association (AOTA) Occupational Therapy Code of Ethics and Ethics Standards
• Demonstrate an appreciation for the attitudes, values, and behaviors of peoples of various cultures and backgrounds
• Utilize an occupation and evidence-based approach as components of occupational therapy practice.
• Successfully complete all elements of a master degree level research project including an oral presentation.
• Demonstrate the ability to adapt to appropriate, varying, and novel situations and circumstances within their educational and clinical environments.
• Demonstrate the ability to frame issues and problems of human occupation that are consistent with and reflective of current frames of reference and theoretical models and approaches within the profession of Occupational Therapy.
• Demonstrate an appreciation for and understanding of the value of professional advocacy and promotion of the profession of Occupational Therapy
• Demonstrate entry-level competence in areas of evaluation, treatment, communication, critical reasoning, and leadership upon graduation
• Develop the skills necessary, as well as an appreciation, for becoming a life-long learner

All graduates must:

• Have acquired, as a foundation for professional study, a breadth and depth of knowledge in the liberal arts and sciences and an understanding of issues related to diversity
• Be educated as a generalist with a broad exposure to the delivery models and systems used in settings where occupational therapy is currently practiced and where it is emerging as a service
• Have achieved entry-level competence through a combination of academic and fieldwork education
• Be prepared to articulate and apply occupational therapy theory and evidence-based evaluations and interventions to achieve expected outcomes as related to occupation
• Be prepared to articulate and apply therapeutic use of occupations with individuals or groups for the purpose of participation in roles and situations in home, school, workplace, community, and other settings
• Be able to plan and apply occupational therapy interventions to address the physical, cognitive, psychosocial, sensory, and other aspects of performance in a variety of contexts and environments to support engagement in everyday life activities that affect health, well-being, and quality of life
• Be prepared to be a lifelong learner and keep current with evidence-based professional practice
• Uphold the ethical standards, values, and attitudes of the occupational therapy profession
• Understand the distinct roles and responsibilities of the occupational therapist and occupational therapy assistant in the supervisory process
• Be prepared to effectively communicate and work inter-professionally with those who provide care for individuals and/or populations in order to clarify each member’s responsibility in executing components of an intervention plan
• Be prepared to advocate as a professional for the occupational therapy services offered and for the recipients of those services

Be prepared to be an effective consumer of the latest research and knowledge bases that support practice and contribute to the growth and dissemination of research and knowledge

**DOCTOR OF PHYSICAL THERAPY (DPT)**

This program is designed to educate individuals with the knowledge, skills, and behaviors consistent with professional excellence. Working as part of a community of professionals, the program strives to advance practice characterized by independence, professional judgment, and involvement.

Graduates will:
• Demonstrate basic and applied knowledge necessary to practice PT as a member of the health care team in diverse settings
• Demonstrate the ability to make sound clinical decisions using information literacy skills, critical thinking, and scientific evidence
• Find employment with special emphasis on recruitment and retention of graduates in WV
• Adhere to core professional values
• Demonstrate the ability to practice independently
• Adhere to legal and ethical standards
• Demonstrate a life-long commitment to the profession by activity in professional organizations, scholarship, education, and advocacy
• Deliver high quality physical therapy services to individuals and communities across a continuum of care, including rural settings.
• Demonstrate sound, independent clinical decisions utilizing information literacy, critical thinking skills, and scientific evidence
• Function as a unique member of the health care team, including receiving and providing appropriate referrals
• Provide culturally sensitive care distinguished by advocacy, trust, respect, and an appreciation for individual differences
• Demonstrate a commitment to the health of the community through participation in primary and secondary prevention programs
• Actively engage in local and professional advocacy in a changing health care environment

DOCTOR OF MEDICINE (MD)

This program is designed for students to develop knowledge, skills, and attitudes across six (6) competency areas: Patient Care, Medical Knowledge, Practice-Based Learning and Improvement, Interpersonal and Communication Skills, Professionalism, and Systems-Based Practice.

Students will:

Provide patient care that is compassionate, appropriate, and effective and promote life-styles that promote improved health:

• Gather essential and accurate patient information, including a complete and appropriately organized medical history and physical examination
• Evaluate patient information in order to formulate complete and accurate differential diagnoses and apply appropriate diagnostic tests to confirm diagnoses
• Develop patient management plans that are evidenced-based and considerate of cultural and ethnic preferences
• Counsel and educate patients and their families about prevention strategies, diagnostic tests, treatment options/plans, and patient orders/prescriptions
• Perform medical procedures appropriately and professionally
• Partner with patients to prevent health problems and improve health status

Demonstrate knowledge of established and evolving biomedical, clinical, epidemiological, and social-behavioral sciences and apply this knowledge to patient care:

• Describe normal structure and function of the human body and each organ system over the lifespan
• Describe molecular, cellular, and biochemical mechanisms of homeostasis
• Describe and apply normal cognitive and social growth and development of humans to diagnose abnormal cognitive and social development
• Describe causes of altered structure and function of organ systems and tissues that result in disease (genetic, developmental, nutritional, toxic, infectious, inflammatory, neoplastic, degenerative, traumatic, and behavioral)
• Describe foundations of diagnostic methods, therapeutic interventions, outcomes, and prevention with respect to specific disease processes in individuals and populations
• Describe genetic and physiologic basis of individual patient response to drugs
• Describe and apply foundational principles of epidemiology, statistics, and ethics to diagnosis and treatment of disease
• Explain the effect of social determinants, health behaviors, and preventative measures on health status and disease of individuals and populations
• Demonstrate use of scientific method and critical evaluation of scientific literature in establishing causation, diagnosis, and therapy of disease

Demonstrate the ability to investigate and evaluate their role in the care of patients, to appraise and assimilate scientific evidence, and to continuously improve their role in patient care based on constant self-evaluation and learning:

• Locate, appraise and assimilate evidence from scientific studies including basic, clinical, translational, and community (population) based research
• Apply knowledge of study designs and statistical methods to appraise studies
• Use information technology to manage information and support patient care decisions
• Develop the skills necessary for lifelong learning, as evidence by demonstrating independent and self-directed study
• Utilize strategies to identify and analyze strengths, deficiencies, and limits in one’s knowledge, collaboration skills, and professionalism

Demonstrate interpersonal and communication skills that result in the effective exchange of information and collaboration with patients, their families, peers, and health professionals:
• Communicate effectively and demonstrate caring and respectful behaviors with patients and families across a broad range of socioeconomic and cultural backgrounds
• Collaborate with a team of health care professionals to provide patient-focused, preventive, acute, chronic, continuing, rehabilitative, and end-of-life care
• Provide an accurate and complete oral presentation of a patient encounter
• Demonstrate effective communication and collaboration with all members of a health care team
• Write timely, legible, accurate and complete documentation of a clinical encounter in written or electronic format

Demonstrate a commitment to carrying out professional responsibilities and an adherence to ethical principles:
• Demonstrate respect, compassion, integrity, responsiveness to needs of patients, society, and profession that supersedes self-interest
• Demonstrate a commitment to ethical principles, including provision or withholding of care, confidentiality, informed consent, and respect for patient privacy and autonomy
• Demonstrate sensitivity and responsiveness to a diverse patient population, including but not limited to diversity in culture, age, gender, race, religion, disabilities, sexual orientation, and health
• Create and sustain a therapeutic and ethically sound relationship with patients
• Demonstrate timeliness and punctuality in the execution of learning and clinical duties

Demonstrate an awareness of and responsiveness to the larger context and system of health care, as well as the ability to learn about other resources in the system to promote optimal health care:
• Define the roles of health care professionals and demonstrate how inter-professional collaboration improves patient safety, patient-centered outcomes, and system performance
• Describe and distinguish effective methods of organizing, financing, and providing health care
• Describe how the prevention and treatment of healthcare disparities may affect individual patients, populations, and the healthcare system
• Advocate for quality patient care, as evidenced by recognizing system limitations and failures and contributing to healthcare safety and improvement

DOCTOR OF PHILOSOPHY (PHD)

PhD in the Biomedical Sciences

Students in the first semester of year one in the Biomedical Sciences Graduate Programs take a common core curriculum that covers topics important to all biomedical sciences graduate programs. In addition, they begin training in the responsible conduct of research, and they conduct three short lab experiences to assist in the selection of a faculty mentor for dissertation research. The intended outcomes the first year in graduate school are to match with a faculty investigator who will guide the student to completion of dissertation research, and to successfully transfer into one of the Ph.D. degree-granting biomedical sciences programs.

Students will:
• Integrate molecular, cellular, and integrative systems concepts
• Critically interpret the current scientific literature
• Develop critical thinking and problem-solving skills

Demonstrate technical skills in conducting scientific experimentation
• Articulate, verbally and in writing, the understanding of concepts during scientific discussions
• Discuss relevant scientific ethical issues presented as case studies
• Apply responsible research practices to the conduct of their experiments
• Engage with fellow students and faculty and demonstrate teamwork

PhD in Biochemistry & Molecular Biology

Students will:
• Demonstrate a general knowledge of physics, chemistry, biology and cell biology, biochemistry and molecular biology, and a detailed knowledge of his or her area of research
• Be familiar with the research literature in biochemistry and in their specific field of study and should have the ability to keep abreast of major developments and to acquire a working background in any area
• Demonstrate skill in the recognition of meaningful problems and questions for research in Biochemistry and Molecular Biology
• Possess technical skill in laboratory manipulation
• Demonstrate that oral, written, and visual communication skills have been acquired
• Demonstrate skill in designing experimental protocols and in conducting productive self-directed research

PhD in Cancer Cell Biology

Students will:

• Stimulate critical thinking and communication of content related to cancer research to expert and non-expert audiences
• Understand the fundamental aspects of cancer origin, progression, and treatment
• Develop a basic understanding of the cancer types recognized as national health disparities to state residents
• Acquire in-depth knowledge about specific molecular and cellular aspects of cancer biology germane to the specific studied cancer type
• Become skilled in writing, publishing, and presenting cancer-based research findings to respected peer-reviewed journals, as well as at institutional, regional, and national meetings
• Understand the additional impact of student-based cancer research related to community outreach and health outcomes in the West Virginia, national, and international populations
• Understand how basic science advances in cancer research correspond and potentially impact changes in clinical patient management (bench to bedside)
• Be able to interact with and comprehend fundamental aspects of clinical cancer care in a cancer-specific manner and how it pertains to basic cancer research (bedside to bench)
• Remain current with recent advances in the cancer literature and with major advances in the field during and after graduation from the program
• Be competitive in securing and conducting post-doctoral research in academic, industrial, or government settings
• Be prepared to pursue alternative non-research careers related to cancer in fields of their choosing

PhD in Cellular & Integrative Physiology

Students will:

• Develop a vocabulary of appropriate terminology to effectively communicate information related to physiology
• Recognize anatomical structures and explain physiological functions of body systems
• Recognize and explain the principle of homeostasis and the use of feedback loops to control physiological systems
• Use anatomical knowledge to predict physiological consequences, and use knowledge of function to predict the features of anatomical structures
• Recognize and explain the interrelationships within and between anatomical and physiological systems of the human body
• Synthesize ideas to make a connection between knowledge of anatomy and physiology and real-world situations, including healthy lifestyle decisions and homeostatic imbalances
• Interpret graphs of anatomical and physiological data
• Demonstrate information literacy skills to access, evaluate, and use resources to stay current in the field of physiology
• Approach and examine issues related to physiology from an evidence-based perspective
• Communicate clearly and in a way that reflects knowledge and understanding of physiology and demonstrates the ability to adapt information to different audiences and applications

PhD in Exercise Physiology

Students will:

• Attain a comprehensive understanding of the important cellular and system processes that are regulated by exercise, lack of exercise, and clinically relevant diseases
• Develop a vocabulary of appropriate terminology to effectively communicate information related to exercise physiology
• Acquire a foundation for critically applying theories, methodologies, and knowledge to address fundamental questions in health-specific issues related to exercise physiology
• Obtain independent and critical thinking skills requisite for designing, conducting, and interpreting research data in an effort to advance knowledge related to health and disease through creative and innovative research
• Effectively communicate knowledge through oral and written means by disseminating research findings that have the potential to improve the health and livelihood of citizens of the state, nation, and world
• Demonstrate principles of ethics associated with appropriate research conduct

PhD in Immunology and Microbial Pathogenesis

Students will:

• Attain a comprehensive understanding of how the immune systems of humans and other animals function, and integrate this with an understanding of the diversity of microorganisms that cause disease in humans and other mammals
• Acquire a comprehensive knowledge of the life cycle and functioning of microorganisms and how they cause disease in mammals
• Develop novel hypotheses, test these experimentally, and interpret, evaluate and report the results
• Demonstrate excellent skills in written and oral communication
• Demonstrate the ability to understand the relationship between science and society and discuss ethical issues in immunology and microbial pathogenesis

PhD in Neuroscience

Students will:

• Have a basic knowledge in the principles of neuroscience including cellular and molecular biology of neurons, developmental neurobiology, systems neuroscience (motor systems, somatosensory systems, behavior, cognition, neural diseases) and neuroscience methods
• Demonstrate current knowledge of topics in neuroscience
• Formulate hypotheses and conduct cutting edge research

PhD in Pharmaceutical & Pharmacological Sciences

Students will:

• Be able to pursue independent research in specialized fields in interdisciplinary teams and to function and contribute as members of research teams
• Be competent scientists able to contribute to health-related research, industrial research and development, pharmaceutical education, and scholarship
• Learn basic and applied principles in specific disciplines and related fields in order to develop a broad background of knowledge
• Develop research skills including scientific communication and critical thinking/problem solving ability by participating in seminars and designated research skill courses
• Gain hands-on experience in conducting original research, including acquisition of background information (e.g., literature research), experimental design, and experimentation
• Develop research communication skills by writing abstracts for research presentations, manuscripts for publication, research grant proposals, and a thesis or dissertation
• Gain additional insight into research and scholarship by participating in scholarly exchanges with faculty and students in the WVU School of Pharmacy, the Health Sciences Center (HSC), and the West Virginia University community

Doctoral Degrees

The policies for the Doctor of Philosophy degree in the School of Medicine include program specific requirements, School of Medicine specific requirements and University wide requirements. Students should become familiar with the WVU graduate catalog and the handbooks provided to them by their graduate program and upon entry into graduate school.

Required Research Participation

Because the Doctor of Philosophy is a research degree, students will be expected to be involved in research from the beginning of their programs. Doctoral students participate in research rotations with faculty during the first, and if necessary, the second semester of enrollment. Students may choose a dissertation advisor in the first semester of study or by the end of year one. With the aid of the student's advisor a dissertation committee is chosen in the second year of enrollment. Students should work with their dissertation advisor to design appropriate pilot studies and with the data identify a dissertation project and appropriate research questions/hypothesis to be tested by the proposed research. All approved research projects must be hypothesis-based, and whenever possible, the research questions should address mechanistic questions that explain biological phenomenon relevant to the field of study.

Research is conducted throughout the doctoral program with the requirement that one manuscript, based on the student's dissertation research, is accepted for publication in a peer-reviewed scientific journal before defense of Ph.D. dissertation research. Students should strive to present their research findings at a minimum of one national/international meeting annually beginning in the second year of enrollment in the doctoral program.

Directed Research

All preliminary research must be collected under the supervision and approval of the dissertation chair, which is most graduate programs is the student's advisor. The student is expected to engage in directed research under the supervision of the dissertation advisor to learn techniques and collect pilot data that will be the basis of a future dissertation project. Studies to obtain pilot data should be presented to the dissertation committee to demonstrate the student's competency in research skills and that his/her research ideas and hypotheses are appropriate and justified. This process facilitates progression through the program in a timely and efficient manner. Nevertheless, the dissertation committee may require the student to obtain additional pilot data or research skills prior to approving the research proposal as a dissertation topic. The student's directed research efforts should be progressing towards approval of a dissertation topic from the members of the dissertation committee, once they have been identified (before the end
of the first semester of year two). This research training will provide the student background data/information from which to base a pre-doctoral grant proposal and dissertation topic as part of the requirements for completing the defense of the Dissertation Proposal.

Comprehensive/Qualifying Examination

The comprehensive (qualifying/candidacy) examination is usually given after most formal coursework has been completed and, in general, will test the scientific knowledge pertinent to the student's chosen Ph.D. training program. The individual graduate programs conduct these examinations at different times and use different formats. Depending on the graduate program, the qualifying exam is scheduled either at the end of year one or year two or in association with the proposal defense.

Requirements of the Dissertation Proposal/Candidacy Examination

Graduate students are admitted to Ph.D. candidacy after successfully defending the Dissertation Proposal. The candidacy examination consists of writing a grant proposal, formatted similar to a National Institutes of Health pre-doctoral grant, and orally defending the dissertation proposal to the student's dissertation committee. Advancement to candidacy means that in the judgment of the faculty, the doctoral student has an adequate knowledge of their research area, knows how to use academic resources, and has potential to do original independent research. In other words, the student is qualified to complete the doctoral dissertation. No student with a grade point average of less than 3.0 will be eligible to take this examination.

Failure to successfully complete the Comprehensive Examination or the Dissertation Proposal by the end of the third year in graduate school is grounds for dismissal. A student has two attempts to pass the exam. Failure on the first attempt requires the student petition and receive approval from the dissertation committee to retake either exam a second time.

General Dissertation Requirements

The student must complete a dissertation in which they have obtained original data that makes a novel and important contribution to knowledge in the field of study and submit all manuscripts containing these data to peer-reviewed journals. At least one manuscript with the student as first author must be accepted for publication prior to defense of the dissertation. The dissertation must be constructed in a format suitable to the graduate school and the advisor. Preferable formats will include writing the data chapters as if they have been submitted to peer-reviewed journals (including abstract, introduction, methods and materials, results, discussion, and literature cited in each chapter). In addition, the final one to two chapters of the dissertation should include an integrative discussion concerning the total research project and evaluation of hypotheses that were tested.

Completion of the Ph.D. degree requires a written dissertation that is presented orally in front of a public forum and defended in private to the student's dissertation committee. To pass, the student must receive the approval of 4 of the 5 members on the dissertation committee.

Student Evaluations

Students are formerly evaluated annually by the dissertation committee and the program faculty with respect to courses, research, teaching, professional development, and progress through the program. The student also annually completes an Individual Development Plan that is reviewed by the student's advisor.

Biochemistry and Molecular Biology

Degrees Offered

• Doctor of Philosophy
• Joint Doctor of Medicine and Doctor of Philosophy

The disciplines of biochemistry and molecular biology seek to understand biology by exploring the functions of the molecular components of cells. A major goal of this program is to foster ability for independent thought. To this end, our faculty cultivates an open, collegial relationship with one another and with our students. Close collaboration between scientists, the sharing of ideas, and open inquiry are critical components of our training plan. Our goal is to develop independence as a scientist.

The hallmarks of graduate training in biochemistry and molecular biology are the emphasis placed on the use of the scientific literature in advanced coursework and on protecting time for laboratory research. In addition, students will have time for professional development through seminar presentation, attendance at national meetings, teaching opportunities, and seminar programs both within the department and throughout the Health Sciences Center.

The doctoral program in Biochemistry and Molecular Biology focuses on the understanding of biology by exploring the functions of the molecular components of cells. The goal of the program is to foster the student's ability for independent thought, in preparation for a career as an independent scientist. During the second year, specialized courses in biochemistry are offered as students continue their research projects. During subsequent years, students emphasize independent dissertation research, and a few formal courses may be taken. Completion of the Ph.D. degree is realized when the
student successfully presents the research results to faculty of the graduate dissertation committee and program/department. Typically, four to five years are required to realize this goal.

Faculty research in the program can provide the student with training in multiple basic sciences areas:

- Regulation of gene expression
- Chromatin silencing
- RNA processing
- Cell survival mechanisms
- Regulation of metabolism
- Regulation of signal transduction by nutrients and metabolites
- Proteosome function
- Cell proliferation and cell cycle regulation
- Cell adhesion
- Kinases and phosphatases in signal transduction mechanisms involved in cancer cell metabolism
- Spirochete biology
- Oxidant-induced cellular stress
- Structure/function relationships of proteins
- Molecular genetics of visual and auditory development
- G protein-mediated signaling in retina photoreceptors
- Molecular basis of age-related blindness
- Development and application of new magnetic resonance approaches to biomedicine

These research areas provide fundamental knowledge toward both the normal health-state and the amelioration of multiple diseases: atherosclerosis, blindness, cancer, deafness, diabetes, and metabolic disorders.

**FACULTY**

**GRADUATE PROGRAM DIRECTOR**

- Brad Hillgartner, Professor - Ph.D. (Michigan State University)

**ASSOCIATE PROFESSORS**

- Yehenew Agazie - Ph.D. (University of Saskatchewan)
- Michael Gunther - Ph.D. (Colorado State University)
- Pete Mathers - Ph.D. (California Institute of Technology)
- Visvanathan Ramamurthy - Ph.D. (Weslyan University)
- Andrew Shiemke - Ph.D. (Oregon Graduate Institute)
- Maxim Sokolov - Ph.D. (Weizmann Institute of Science)

**PROFESSORS**

- Steven Frisch - Ph.D. (University of California-Berkeley)
- Valery Khramtsov - Ph.D. (Institute of Chemical Kinetics and Combustion)
- Qiang Ma - Ph.D. (Rutgers University)
- Vazhaikkurichi Rajendran - Ph.D. (University of Madras)
- Mike Ruppert - Ph.D. (Johns Hopkins University)
- Lisa Salati - Ph.D. (University of Minnesota)
- Michael Schaller - Ph.D. (McMaster University)
- George Spirou - Ph.D. (University of Florida)

**ASSISTANT PROFESSORS**

- Roberta Leonardi - Ph.D. (University of Southampton)
- Elena Pugacheva - Ph.D. (Russian Academy of Science)
- Aaron Robart - Ph.D. (University of Calgary)
- David Smith - Ph.D. (University of South Florida)
- Peter Stoilov - Ph.D. (Friedrich Alexander University)
• Mark Tseytlin - Ph.D.  
  (Russian Academy of Sciences)  
• Eric Tucker - Ph.D. (University of Arizona)  
• Andrey Bobko - Ph.D.  
  (Institute of Chemical Kinetics and Combustion)  
• Alexey Ivanov - Ph.D. (Russian Academy of Sciences)  

**RESEARCH ASSISTANT PROFESSOR**

• Andrey Bobko - Ph.D.  
  (Institute of Chemical Kinetics and Combustion)  
• Alexey Ivanov - Ph.D. (Russian Academy of Sciences)  

**Doctor of Philosophy**

**MAJOR REQUIREMENTS**

A minimum GPA of 3.0 is required.

**Seminars and Research Forum**

Students will present three seminars during their graduate study. The first seminar is on a topic outside of the student’s research area. The second seminar is the public presentation of the dissertation proposal, which is the background and proposed research for the dissertation project. The third seminar is the public presentation of the dissertation defense.

**Journal Club**

Students are required to enroll in Journal Club each semester. The course involves the presentation and discussion of current research papers and will help acquaint students with the variety of methods used in scientific research.

**Doctoral Research**
Students will conduct research with a dissertation mentor during time in the program. Students register for research credits each semester, and their performance is graded by their dissertation mentor.

**Qualifying and Dissertation Proposal/Ph.D. Candidacy**

The written qualifying exam is given at the end of the first year of study. The candidacy is completed in the second year of study. Admission to Ph.D. candidacy occurs following the successful defense of the dissertation proposal.

**Dissertation Defense and First-Author Paper Requirement**

Students are allowed to defend their dissertation when a minimum of one manuscript with the student as first author, based on dissertation research, is accepted in a peer-reviewed journal. The final examination for the Ph.D. degree consists of orally defending a written dissertation in a public seminar and then in private to the dissertation committee. Satisfactory performance in the oral defense will result in recommendation for granting of the PhD.

Total credit hours: 87

NOTE: The graduate curriculum is finalized with a plan of study once the mentor and laboratory have been selected in the first year. The plan of study is developed by the graduate committee in consultation with the student. The courses listed above include the required and elective coursework necessary for the student to finalize his/her plan of study. When the student enters the laboratory of his/her doctoral dissertation mentor repetitive enrollments in research, seminars, and colloquia are typical and will determine total hours necessary for degree completion.

*This is a suggested plan of study. Course sequences and length of time in program may vary depending on student and altered total credit hours.

### Major Learning Goals

**BIOCHEMISTRY AND MOLECULAR BIOLOGY**

Students will:

- Demonstrate a general knowledge of physics, chemistry, biology and cell biology, biochemistry and molecular biology, and a detailed knowledge of his or her area of research
• Be familiar with the research literature in biochemistry and in their specific field of study and should have the ability to keep abreast of major developments and to acquire a working background in any area
• Demonstrate skill in the recognition of meaningful problems and questions for research in Biochemistry and Molecular Biology
• Possess technical skill in laboratory manipulation
• Demonstrate that oral, written, and visual communication skills have been acquired
• Demonstrate skill in designing experimental protocols and in conducting productive self-directed research

Biomedical Sciences

Degrees Offered

• Master of Science
• Doctor of Philosophy

Lisa M. Salati, Ph.D., Program Director and Assistant Vice President for Graduate Education at the WVU Health Sciences Center; lsalati@hsc.wvu.edu

The Masters of Science (M.S.) in the Biomedical Sciences is designed to assist in the selection of a career path, albeit industry, teaching, or a professional program, and/or for the transition to a biomedical Doctor of Philosophy (Ph.D.) program. The M.S. degree has a thesis and non-thesis option, the latter with additional elective coursework that should align with career goals. Completion of the M.S. degree is realized when the student successfully presents the research results to faculty of the student’s graduate thesis committee. Typically, two to three years are required to realize this goal.

A Ph.D. in the Biomedical Sciences at West Virginia University offers you the unique opportunity to explore multiple disciplines and areas of research in the biomedical sciences but to also fast track into a dissertation laboratory and a graduate program within one semester. Earning the Ph.D. will be through one of the 7 degree granting programs in the Biomedical Sciences: Biochemistry and Molecular Biology, Cancer Cell Biology, Cellular and Integrative Physiology, Exercise Physiology, Immunology and Microbial Pathogenesis, Neuroscience, and Pharmaceutical and Pharmacological Sciences. They share a common admission’s process and a common core curriculum in the first semester. You will rotate through 3 laboratories during the fall semester with the potential to select a dissertation adviser by the end of the semester.

Doctoral study in these graduate programs allows the development of research and critical thinking skills as well as preparation in career development to prepare you for entry into a myriad of careers in research, teaching, industry, government, and other positions that require specialized training at the graduate level.

As an incoming student, you will:

• start your graduate studies with an orientation that will prepare you to successfully transition into graduate studies, and allow you to interact with an orientation adviser, faculty investigators, and current students;
• have the opportunity to match with a faculty mentor, or thesis or dissertation adviser through laboratory rotations during the first semester;
• take a course in scientific writing during the summer of Year 2;
• have the opportunity to participate in seminar series, workshops, and career-development sessions.

FACULTY

ASSISTANT VP FOR GRADUATE EDUCATION
• Lisa M. Salati - Ph.D.

DIRECTOR M.D./PH.D. PROGRAM
• David P. Siderovski - Ph.D.

STAFF ASSISTANT
• Penny Phillips
  M.D./Ph.D. Scholars Program

All applications are accepted electronically and must be submitted electronically via the official WVU Graduate Education application: https://app.applyyourself.com/AYApplicantLogin/fl_ApplicantConnectLogin.asp?id=wvugrad.

Applications are reviewed from November through March by a Common Admissions Committee comprised of the graduate directors or faculty representatives of our seven Ph.D. graduate training programs and a senior graduate student representing the Graduate Student Organization. The Assistant Vice President for Graduate Education and the Assistant Director of HSC Graduate Education are ex officio members.

All students interested in one of the 7 Biomedical Ph.D. programs must apply through a common admissions portal. Choice of a specific graduate program occurs during the first year of graduate study after selection of an adviser for your dissertation research and choosing one of the degree
granting programs. Applications to both the Ph.D. and M.S. programs include a Personal Statement, transcripts from all Colleges or Universities attended, GRE scores, and 3 letters of recommendation. Applicants must arrange to have official copies of transcripts and tests scores sent directly to the WVU Office of Graduate Admissions and Recruitment, PO Box 6510, Morgantown, WV 26506-6510.

Additional Information:

To review the programs and application process, please visit:

For Ph.D. applicants:  http://www.hsc.wvu.edu/resoff/graduate-education/phd-programs/biomedical-sciences/prospective-students/

For M.S. applicants:  http://www.hsc.wvu.edu/resoff/graduate-education/ms-programs/biomedical-sciences/

Qualified M.S. applicants are invited, along with Ph.D. applicants, to an all-expense paid, 2.5 day visit/interview to the campus. Students with excellent credentials and who can clearly describe their past research and demonstrate passion for research at the interview are seriously considered for acceptance. Decisions of acceptance are made on a rolling basis, and all decisions made by the Admissions Committee are final. For maximum admissions consideration, we recommend that you apply as early as possible.

Total Hours 42

Seminars and Research Forum

It is recommended that students attend a weekly seminar in their chosen research area during each semester enrolled in the program.

Journal Club

Students are required to enroll in three Journal Clubs during their M.S. studies. The course involves the presentation and discussion of current research papers and will help acquaint students with the variety of methods used in scientific research.

Masters Research

Students will conduct research with a thesis mentor during time in the program. Students register for research credits each semester, and their performance is graded by their thesis mentor.

Thesis Proposal

The thesis proposal is completed in the beginning of the second year of study.
Thesis Defense

The final examination for the M.S. degree consists of orally defending a written thesis in private to the thesis committee – a prior public presentation is encouraged. Satisfactory performance in the oral defense will result in recommendation for granting of the M.S. degree.

NOTE: The graduate curriculum is finalized with a plan of study once the mentor and laboratory have been selected in the first year. The plan of study is developed by the graduate committee in consultation with the student. The courses listed above include the required and elective coursework necessary for the student to finalize his/her plan of study.

Major Learning Goals

Master of Science (M.S.) in the Biomedical Sciences
This program is designed to assist in the selection of a career path, albeit industry, teaching, or a professional program, and/or for the transition to a biomedical Ph.D. program. The first-year curriculum imparts a fundamental understanding of the functional components of a cell and the basis for regulation of cellular processes and organ systems. After selecting a mentor, students take additional courses that align with their research interests.

Students will:

- Integrate molecular, cellular, and integrative systems concepts
- Critically interpret the current scientific literature
- Develop critical thinking and problem-solving skills
- Design and interpret experiments to test molecular, cellular, and integrative systems mechanisms
- Demonstrate technical skills in conducting scientific experimentation
- Articulate, verbally and in writing, their understanding of concepts during scientific discussions
- Discuss relevant scientific ethical issues presented as case studies
- Engage with fellow students and faculty and demonstrate teamwork

**Doctor of Philosophy (Ph.D.) in one of the 7 biomedical Ph.D. programs**

Students in the first semester of year one in the Biomedical Sciences Graduate Programs take a common core curriculum that covers topics important to all biomedical sciences graduate programs. In addition, they begin training in the responsible conduct of research, and they conduct three short lab experiences to assist in the selection of a faculty mentor for dissertation research. The intended outcomes the first year in graduate school are to match with a faculty investigator who will guide the student to completion of dissertation research, and to successfully transfer into one of the Ph.D. degree-granting biomedical sciences programs.

Students will:

- Integrate molecular, cellular, and integrative systems concepts
- Critically interpret the current scientific literature
- Develop critical thinking and problem-solving skills
- Demonstrate technical skills in conducting scientific experimentation
- Articulate, verbally and in writing, the understanding of concepts during scientific discussions
- Discuss relevant scientific ethical issues presented as case studies
- Engage with fellow students and faculty and demonstrate teamwork

**Cancer Cell Biology**

sweed@hsc.wvu.edu

**Degrees Offered**

- Doctor of Philosophy
- Joint Doctor of Medicine and Doctor of Philosophy

Students in the doctoral program in Cancer Cell Biology receive comprehensive in-depth training in modern areas of cancer biology, with a strong emphasis on cellular and molecular aspects of cancer origin, progression and treatment and a focus on cancer types and issues relevant to international, national and West Virginia populations. The program is designed to produce scholarly researchers with aptitude in public speaking, community service, clinical engagement, and critical thinking. Completion of the Ph.D. degree is realized when the student successfully presents the research results to faculty of the graduate dissertation committee and program. Typically, four to five years are required to realize this goal.

Research interests include biochemical, molecular, and cellular basis of cancer origin and progression. Current research areas include the following:

- **Tumor Microenvironment**: Tumor cell resistance to anoikis, effects of chemotherapy on the bone marrow microenvironment, stem cell regulation, leukemia/stromal interactions, effects of the extracellular matrix on angiogenesis and tumor cell invasion.
- **Mechanisms of Metastasis**: Role of proteases in cell motility, regulation of the actin cytoskeleton in invadopodia formation and migration, signaling pathways in invasion and metastasis, imaging of metastasis in animal models.
- **Genetic Regulation of Cancer**: Tumor suppressor genes and transcriptional regulation, post-translational modifications in transcriptional regulation.
- **Heavy Metals and Cancer**: Effects of heavy metals on signal transduction pathways governing angiogenesis and tumor cell motility.
- **Signal Transduction in Cancer**: Receptor tyrosine kinase signaling in cancer growth and metastasis, non-receptor tyrosine kinases in cell adhesion and proliferation, ROS in tumor progression, lipid kinase signaling in angiogenesis.
Cancer cell biology investigators working in these research areas routinely incorporate biochemical, molecular, cellular, animal, and computational-based techniques that are currently utilized at the forefront of leading basic cancer research laboratories around the world. The main tumor types that are the current focus of cancer cell biology investigators are based on cancers with disproportionate incidences in West Virginia, including breast, leukemia, ovarian, cervical, lung, and head and neck cancers.

The doctor of philosophy program in cancer cell biology is designed to expose Ph.D. and M.D./Ph.D. level graduate students to a wide spectrum of opportunities available in basic and translational cancer research. In addition to mechanistic and therapeutic approaches to studying problems in cancer at the bench, students have the opportunity for exposure to more clinical elements of cancer practice, including participation in tumor boards, shadowing clinicians, and participation in the design and approval of clinical trials. The cancer cell biology program at WVU is a member of the Cancer Biology Training Consortium (CABTRAC), a national organization of similar cancer-specific Ph.D. programs that interact through annual regional and national meetings to improve and refine Ph.D. cancer training. Graduates of the cancer cell biology program are therefore well-equipped to enter into a number of different career paths. These include postdoctoral research, biotechnology, industry, government, science writing, core facilities management, and legal counsel as examples.

**Seminars and Research Forum**

Students attend seminar each semester. These seminars are either given by invited faculty or students.

**Journal Club**

Students are required to enroll in Journal Club each semester. The course involves the presentation and discussion of current research papers and will help acquaint students with the variety of methods used in scientific research.
Doctoral Research

Students will conduct research with a dissertation mentor during time in the program. Students register for research credits each semester, and their performance is graded by their dissertation mentor.

Qualifying and Dissertation Proposal/Ph.D. Candidacy

The written qualifying exam is given at the end of the first year of study. The candidacy exam is completed in the third year of study. Admission to Ph.D. candidacy occurs following the successful defense of the candidacy exam.

Dissertation Defense and First-Author Paper Requirement

Students are allowed to defend their dissertation when a minimum of one manuscript with the student as first author, based on dissertation research, is accepted in a peer-reviewed journal. The final examination for the Ph.D. degree consists of orally defending a written dissertation in a public seminar and then in private to the dissertation committee. Satisfactory performance in the oral defense will result in recommendation for granting of the Ph.D. degree.

Total credit hours: 90

NOTE: The graduate curriculum is finalized with a plan of study once the mentor and laboratory have been selected in the first year. The plan of study is developed by the graduate committee in consultation with the student. The courses listed above include the required and elective coursework necessary for the student to finalize his/her plan of study. When the student enters the laboratory of his/her doctoral dissertation mentor repetitive enrollments in research, seminars, and colloquia are typical and will determine total hours necessary for degree completion.

*This is a suggested plan of study. Course sequences and length of time in program may vary depending on student and altered total credit hours.
Major Learning Goals

CANCER CELL BIOLOGY

- Stimulate critical thinking and communication of content related to cancer research to expert and non-expert audiences
- Understand the fundamental aspects of cancer origin, progression, and treatment
- Develop a basic understanding of the cancer types recognized as national health disparities to state residents
- Acquire in-depth knowledge about specific molecular and cellular aspects of cancer biology germane to the specific studied cancer type
- Become skilled in writing, publishing, and presenting cancer-based research findings to respected peer-reviewed journals, as well as at institutional, regional, and national meetings
- Understand the additional impact of student-based cancer research related to community outreach and health outcomes in the West Virginia, national, and international populations
- Understand how basic science advances in cancer research correspond and potentially impact changes in clinical patient management (bench to bedside)
- Be able to interact with and comprehend fundamental aspects of clinical cancer care in a cancer-specific manner and how it pertains to basic cancer research (bedside to bench)
- Remain current with recent advances in the cancer literature and with major advances in the field during and after graduation from the program
- Be competitive in securing and conducting post-doctoral research in academic, industrial, or government settings
- Be prepared to pursue alternative non-research careers related to cancer in fields of their choosing

Cellular and Integrative Physiology

rwbrock@hsc.wvu.edu (rbrock@hsc.wvu.edu)

Degrees Offered

- Doctor of Philosophy
- Joint Doctor of Medicine and Doctor of Philosophy

Physiology is a dynamic life science that focuses on the study of biological systems at many levels of complexity, ranging from genes and molecules to cells and organisms. Thus, training in physiology has the ultimate goal of linking molecular and cellular information to functional outcomes. Currently, groundbreaking research and discovery in the life sciences are more interdisciplinary than ever, and students studying within the realm of physiology can expect to work with a wide range of scientists.

The goal of the doctoral program in Cellular and Integrative Physiology is to engage students in creating a new approach to the life sciences, with the aim of explaining how the higher-level properties of complex systems appear from the interactions amongst their parts. Our program provides a multidisciplinary approach to modern life sciences, drawing on faculty expertise from several departments and centers in the Schools of Medicine and Pharmacy.

Completion of the Ph.D. degree is realized when the student successfully presents the research results to faculty of the graduate dissertation committee and the program/department. Typically, four to five years are required to realize this goal.

The program’s participating research faculty consists of scientists from the Center for Cardiovascular and Respiratory Sciences, NIOSH/CDC, Center for Neuroscience, and the Blanchette Rockefeller Neurosciences Institute. As a result, this multidimensional program includes activities in the following:

- Integrative and systems physiology
- Pathophysiology
- Pharmacology
- Translational research
- Small animal physiology, biomedical engineering
- Biophysics

It also integrates information from genetics, functional genomics, and proteomics into whole animal and human physiology.

This interactive and cross-disciplinary environment, together with an atmosphere filled with enthusiasm and passion for scientific discovery, makes our program a uniquely exciting place for doing research and the training of students. Specific topics of research emphasis include the following:

- Hemodynamics and Cardiovascular Control in Health and Disease
- Microcirculation and Cellular Biophysics
- Respiratory Function and Control in Health and Disease
- Neuroendocrine Control of Reproduction
Students will leave our program better able to identify important unsolved scientific problems and with an appreciation of how to select problems for which quantitative and theoretical approaches will be most productive.

Qualifying Exam

Candidacy Exam

Dissertation Defense

Total Hours 89

Seminars and Research Forum

Students register for one credit of seminar each academic year while in residence.

Journal Club

Students are required to enroll in Journal Club each semester. The course involves the presentation and discussion of current research papers and will help acquaint students with the variety of methods used in scientific research.

Doctoral Research

Students will conduct research with a dissertation mentor during time in the program. Students register for research credits each semester, and their performance is graded by their dissertation mentor.

Qualifying and Dissertation Proposal/Ph.D. Candidacy

The oral qualifying exam is given at the end of the second year of study. The candidacy exam is completed in the third year of study. Admission to Ph.D. candidacy occurs following the successful defense of the dissertation proposal.

Dissertation Defense and First- Author Paper Requirement

Students are allowed to defend their dissertation when a minimum of one manuscript with student as the first author, based on dissertation research, is accepted in a peer-reviewed journal. The final examination for the Ph.D. degree consists of orally defending a written dissertation in a public seminar and then in private to the dissertation committee. An external examiner, a distinguished scientist external to WVU, is required to participate at the dissertation defense. Satisfactory performance in the oral defense will result in recommendation for granting of the Ph.D. degree.

### Major Learning Goals

**CELLULAR AND INTEGRATIVE PHYSIOLOGY**

The student learning and programmatic outcomes of the Cellular and Integrative Physiology Graduate Program are similar to those put forth by the Human Anatomy & Physiology Society (HAPS) and the American Physiological Society (APS). They are as follows:

**Fundamental Content & Process Goals**

1. Recognize the anatomy and explain physiological functions of body systems.
2. Recognize and explain the principle of homeostasis and the use of feedback loops to control physiological systems.
3. Use anatomical knowledge to predict physiological consequences, and use knowledge of function to predict the features of anatomical structures.
4. Recognize and explain the interrelationships within and between anatomical and physiological systems of the body.
5. Synthesize ideas to make a connection between knowledge of anatomy and physiology and real-world situations, including healthy lifestyle decisions and homeostatic imbalances.

**Broader Process Goals**

6. Demonstrate information literacy skills to access, evaluate, and use resources to stay current in the field of physiology.
7. Examine issues related to physiology from an evidence-based perspective.

**Total credit hours: 89**

NOTE: The graduate curriculum is finalized with a plan of study once the mentor and laboratory have been selected in the first year. The plan of study is developed by the graduate committee in consultation with the student. The courses listed above include the required and elective coursework necessary for the student to finalize his/her plan of study. When the student enters the laboratory of his/her doctoral dissertation mentor repetitive enrollments in research, seminars, and colloquia are typical and will determine total hours necessary for degree completion.

*This is a suggested plan of study. Course sequences and length of time in program may vary depending on student and altered total credit hours.*
Communicate clearly and in a way that reflects knowledge and understanding of physiology and demonstrates the ability to adapt information to different audiences and applications.

Clinical and Translational Science

Degrees Offered

- Certificate
- Master of Science
- Doctor of Philosophy
- Joint Doctor of Medicine and Doctor of Philosophy

Clinical and Translational Science is a high priority for the National Institute of Health (NIH). Clinical research encompasses the following research areas: 1) Research with human subjects that attempts to determine disease mechanisms, therapies, clinical trials and new techniques; 2) Epidemiology & Behavioral research and 3) Outcomes research. Translational research, sometimes referred to as "bench to bedside to community," is a concept beginning in the laboratory developing and testing interventions impacting human health, taking that information into trial studies on human subjects and finally, determining best practices for community health. West Virginia University has a Clinical and Translational Science Institute (WVCTSI) which is funded in part from the NIH Institutional Development Award Program for Clinical & Translational Research (IDeA-CTR). The WVCTSI, in partnership with other institutions, has a mission to focus on research that will address the health issues of individuals and communities specifically as they affect West Virginia and the Appalachian region. The mission of this institute is in alignment with the land grant mission of West Virginia University (WVU) and the strategic plan of the WVU Health Sciences Center. An overview of recent projects undertaken by the WVCTSI is available at the following web site: http://wvctsi.org/.

As part of the WVCTSI, educational programs at the graduate level prepare trainees to participate in clinical and translational research. WVU offers a Doctor of Philosophy (Ph.D.), Masters of Science (M.S.), and Certificate in Clinical and Translational Science which is designed to develop the next generation of clinical and translational scientists through education and mentored research training.

PH.D. IN CLINICAL AND TRANSLATIONAL SCIENCE

The goal of the Ph.D. program is to develop biomedical researchers who can integrate findings, information, and observations across basic, population, and clinical sciences, to accelerate and transform how we improve the health of individuals and populations. By the completion of this degree, students will be able to:

1. Design, implement, conduct, analyze and interpret research projects using the techniques unique to basic science, clinical research, and population science research
2. Demonstrate mastery of research in a focused area as evidenced by academic and scientific presentations and publications
3. Read, understand and critique the scientific literature of the basic, clinical, and population sciences
4. Work effectively with and create collaborative, productive research partnerships with clinicians, population scientists, and basic / laboratory scientists
5. Be able to communicate with and understand the research challenges and perspectives of each of the three branches of clinical and translational science (basic, clinical, and population sciences)
6. Work with communities to translate scientific findings into programs and policies that improve the health of individuals and populations.

The Ph.D. program is suitable for students with:

- An undergraduate degree
- Already completed graduate work (at the master or doctoral level)
- Medical students in the MD/PhD program
- Practicing clinicians
- Other biomedical professionals seeking expertise in and preparation for careers in clinical and translational research.

Information on the Ph.D. degree may be found at the program web http://wvctsi.org/programs/education-mentoring-career-development/phd-in-clinical-translational-science/

MASTERS OF SCIENCE IN CLINICAL AND TRANSLATIONAL SCIENCE

Typically, M.S. trainees have an undergraduate degree in a health care discipline or a field of study complementary to research in health. The master's degree may also be considered as part of a dual degree program, such as MD/MS. The M.S. degree expands upon Certificate coursework in biostatistics and epidemiology to provide mentored, research training with required and elective courses, the latter to complement research needs and interests. The degree emphasizes a research project(s) that can be clinical (study of medications, devices, diagnostic products, and treatments; may include clinical trials) and/or translational research (defined as research with human subjects or with populations or with direct application to human health). Completion of the M.S. degree requires a written grant proposal or thesis defended orally to three graduate faculty members. The degree can be
completed in three semesters, although typically clinical trainees are part-time and complete the program in two to three years. Information on the M.S. degree may be found at the program website: http://wvctsi.org/programs/education-mentoring-career-development/ms-in-clinical-translational-science/

**FACULTY**

**MASTERS AND CERTIFICATE GRADUATE PROGRAM DIRECTOR**
- Thomas C. Hulsey - Sc.D.

**PH.D. GRADUATE PROGRAM DIRECTOR**
- I. Mark Olfert - PhD, FAHA
- Paul Chantler - PhD
- Thomas C. Hulsey - ScD

**Application and Admission**

**PH.D. IN CLINICAL AND TRANSLATIONAL SCIENCE**

For the Ph.D. in Clinical and Translational Science, the minimum requirements for admission consideration are as follows:

- Completed undergraduate degree with a cumulative GPA of 3.0 or higher
- GRE score of 300 (total; minimum of 150 verbal and 150 quantitative) or MCAT of 28 (total). In the instances where the applicant is a clinician, successful completion of the USMLE Step 1 and Step 2 board exams may be accepted *in lieu* of the GRE or MCAT scores.
- TOEFL score where applicable (minimum score requirement depends upon the test taken; standards established by the WVU Office of Admissions, International Graduate Students)

**Significant undergraduate coursework in the physical or biological sciences is strongly recommended (1 year of biology, 1 year of math, 1 year of chemistry, and 1 year of social sciences) as is research experience**

Students must submit an application that includes:

- A personal statement that addresses their desire to complete a doctoral program in clinical and translational science, a career in biomedical research, and how their background, including their research experiences, have prepared them for this doctoral program
- A résumé or CV that indicates relevant experience and the years and location (institution) of completion of undergraduate degrees and any graduate or professional coursework or degrees
- Three letters of recommendation from professional and / or academic referees, in which the referees clarify how long and in what capacity they have known the applicant and their assessment of the student’s likelihood of success in doctoral-level work.

Applications to this program will be reviewed by a program-specific admissions committee comprised of representatives from the WVU HSC Interdisciplinary Research Centers (Center for Cancer Cell Biology, Center for Cardiovascular and Respiratory Sciences, Center for Neuroscience, and the WV Stroke Center), the WV-CTSI, and the WVU HSC Office of Research and Graduate Education. A senior student in the program will be a representative on the committee.

It is anticipated that admission to this program will be competitive; meeting the minimum admission requirements will not assure acceptance to this program.

**MASTERS OF SCIENCE IN CLINICAL AND TRANSLATIONAL SCIENCE**

The M.S. in Clinical and Translational Science is targeted to clinician and scientists with health-related professional degrees, those seeking a dual degree (such as MD/MS), or health professional students.

Students must submit an application that includes:

- A personal statement outlining past accomplishments (with an emphasis on research, future research interests, and a clear career vision of how becoming a clinical/translational researcher is part of a long-term career plan)
- Three letters of recommendation that evaluate potential as a clinician scientist
- A list of potential research mentors
- A Curriculum Vitae or resume

For faculty applicants, a support letter from the Department Chairperson is required stating how research activities integrate with other responsibilities.

For clinicians, support letters from the department Chair and fellowship or residency director (if applicable) are required.

Student applicants must be in good academic and professional standing.
Any other interested applicants should follow the WVU requirements for application to graduate programs as described below.

Prospective graduate trainees interested in one of the above programs are urged to initiate application for admission as early as possible. The first step of a student interested in a degree program should be to ask for information from the department, division, school, or college offering the program desired; the reply to such an inquiry will include instructions for applying to the particular program.

Application for admission to graduate study must be made online or on standard forms provided online at http://grad.wvu.edu/admissions. If using a paper application, the completed form may be returned to the Office of Admissions, PO Box 6009, West Virginia University, Morgantown, WV 26506, and must be accompanied by payment of a nonrefundable special service fee of $60. Applicants who have attended another institution, other than WVU, must request that the registrar or records office of the college(s) attended send an official transcript directly to the Office of Admissions. No one is admitted to graduate study that does not hold a baccalaureate degree from an accredited college or university.

If the applicant meets the minimum admission requirements of WVU, a copy of the application is forwarded to the faculty of the program of interest. Any graduate degree program is permitted to set admission requirements which go beyond the minimum admission standards of the University. No one can pursue an advanced degree at WVU unless admitted to the appropriate degree program.

Dissertation Research

Complete 6 full-time semesters of dissertation research. 38

Total Hours 99

Program Description

For matriculating students who have successfully completed graduate-level coursework at the master, doctoral, or professional (clinical) level; these students will be evaluated on a case-by-case basis and some of the Core Courses, and / or Specializations Courses may be waived with demonstrable evidence that students have successfully completed equivalent coursework and that waiving that curriculum component will not jeopardize the student’s ability to successfully complete the remainder of the program (comprehensive and candidacy examinations, dissertation).

Coursework is organized around the three main branches of clinical and translational science: Basic/Laboratory Science, Population Science, and Clinical Science. Research experiences are organized around the three translational (T) research domains:

- **T1 research** expedites the movement between basic research and patient-oriented research that leads to new or improved scientific understanding or standards of care
- **T2 research** facilitates the movement between patient-oriented research and population-based research that leads to better patient outcomes, the implementation of best practices, and improved health status in communities
- **T3 research** promotes interaction between laboratory-based research and population-based research to stimulate a robust scientific understanding of human health and disease

Journal Club

Students are required to enroll in Journal Club each semester. The course involves the presentation and discussion of current research papers and will help acquaint students with the variety of methods used in scientific research.

Doctoral Research

Students will conduct research with a dissertation mentor during time in the program. Students register for research credits each semester, and their performance is graded by their dissertation mentor.

Qualifying and Dissertation Proposal/Ph.D. Candidacy
The written qualifying exam is given typically at the end of the second year of study. The dissertation proposal is completed in the third year of study. Admission to Ph.D. candidacy occurs following the successful defense of the dissertation proposal.

**Dissertation Defense and First-Author Paper Requirement**

Students are allowed to defend their dissertation when a minimum of one manuscript with the student as first author, based on dissertation research, is accepted in a peer-reviewed journal. The final examination for the Ph.D. degree consists of orally defending a written dissertation in a public seminar and then in private to the dissertation committee. Satisfactory performance in the oral defense will result in recommendation for granting of the PhD.

**Peer-Reviewed Publication**

Consistent with existing standards at the Health Sciences Center, all students in this program must have one first-authored, peer-reviewed, original research publication relevant to their dissertation research accepted for publication (“in press”) before they may defend their dissertation. This manuscript must represent original research; a review article, even a systematic review, will not fulfill this requirement.

**Major Learning Goals**

**DOCTOR OF PHILOSOPHY (PH.D.) IN CLINICAL AND TRANSLATIONAL SCIENCE**

The goal of the Ph.D. program is to develop biomedical researchers who can integrate findings, information, and observations across basic, population, and clinical sciences, to accelerate and transform how we improve the health of individuals and populations.

By the completion of this degree, students will be able to:

- Design, implement, conduct, analyze and interpret research projects using the techniques unique to basic science, clinical research, and population science research
- Demonstrate mastery of research in a focused area as evidenced by academic and scientific presentations and publications
- Read, understand and critique the scientific literature of the basic, clinical, and population sciences
- Work effectively with and create collaborative, productive research partnerships with clinicians, population scientists, and basic / laboratory scientists
- Be able to communicate with and understand the research challenges and perspectives of each of the three branches of clinical and translational science (basic, clinical, and population sciences)
- Work with communities to translate scientific findings into programs and policies that improve the health of individuals and populations.

**MASTER OF SCIENCE (M.S.) IN CLINICAL AND TRANSLATIONAL SCIENCE**

This program is designed to develop the next generation of clinical and translational scientists through education and mentored research training. The degree emphasizes a research project(s) that can be clinical (study of medications, devices, diagnostic products and treatments; may include clinical trials) and/or translational research (defined as research with human subjects or with populations or with direct application to human health). The degree culminates with a written grant proposal or thesis defended orally to three graduate faculty members.

Students will:

- Apply theories, methodologies, and knowledge to address questions in specific clinical and/or translational science
- Design and conduct research in clinical and/or translational science
- Engage with other students, faculty, and mentors to demonstrate teamwork
- Develop scientific writing skills and knowledge to develop a grant proposal

**Certificate in Clinical and Translational Science**

**CERTIFICATE CODE - CG28**

Mentored research opportunities exist with faculty in the Health Sciences schools of Dentistry, Medicine, Nursing, Pharmacy, and Public Health. The WVCTSI facilitates the recruitment and support of physician-scientists, who may serve as faculty mentors to students.

**Exercise Physiology**

**DEGREES OFFERED**

- Master of Science
- Doctor of Philosophy
- Joint Doctor of Medicine and Doctor of Philosophy

Stephen E. Alway, Ph.D., Professor and Chair of Exercise Physiology, Executive Chairperson, Dept. of Human Performance & Applied Exercise Science, Senior Assistant Dean for Research and Graduate Studies, Director of Graduate Studies Master’s Program, salway@hsc.wvu.edu; (salway@hsc.wvu.edu) https://medicine.hsc.wvu.edu/ep/students/master-of-science/

Randall W. Bryner, Ed.D, Associate Professor, Vice Chair, and Director of Undergraduate Education, rbryner@hsc.wvu.edu; (rbryner@hsc.wvu.edu) https://medicine.hsc.wvu.edu/ep/students/bachelor-of-science/

John M. Hollander, Ph.D., Associate Professor and Director of Doctoral Graduate Studies, jhollander@hsc.wvu.edu; (johollander@hsc.wvu.edu) https://medicine.hsc.wvu.edu/ep/students/phd-program/

**INTRODUCTION**

The overall goal of the M.S., and Ph.D. training programs is to provide students the skills that will allow them to promote health and quality of life of the citizens of West Virginia and the nation through the use of appropriate research, physical activity and lifestyle behavioral tools. The two-year program leading to a masters of science (clinical or thesis track), and a doctoral program leading to a Ph.D. in exercise physiology is offered through the Division of Exercise Physiology.

**WHAT IS AN EXERCISE PHYSIOLOGIST?**

Exercise physiology is the study of the biological and biochemical processes associated with exercise and overload that affects the underlying function of cells and organ systems in the human body. Exercise physiology is a rapidly evolving field that is becoming increasingly important in the delivery of healthcare. Exercise physiologists work to prevent or delay the onset of chronic disease in healthy participants or to provide therapeutic or functional benefits to patients with known disease. Services may be offered in a variety of medical settings such as hospitals, rehabilitation centers, and out-patient clinics; in community, corporate, commercial, and university fitness and wellness centers; in nursing homes and senior citizens centers; as well as in research and academic settings.

Research by scientists trained in exercise physiology have greatly expanded our understanding of the ways in which exercise affects cell function. Advances in research in exercise physiology have provided a foundation for many types of medical treatment in areas that include but are not limited to cardiovascular diseases, diabetes, aging, obesity, and disuse atrophy. Employment opportunities are expanding and increase with experience and level of education.

Exercise physiologists are trained to evaluate people in the areas of cardiovascular fitness, muscular strength and endurance, flexibility, neuromuscular integration, and body composition. They are also trained to provide exercise programs based on the results of these evaluations that are designed to increase the functional capacity of the participants.

Exercise physiologists work with athletes, patients, and healthy participants in the areas of disease prevention in wellness programs or rehabilitation in hospital settings. The bachelor of science program is a preparatory program for graduate school. Graduates of this program continue their studies in exercise physiology, physical therapy, medicine, or other health-related careers. Graduates of the master of science or doctoral program find employment in corporate wellness, hospital rehabilitation, higher education, or other research settings. Graduates of our Ph.D. program have obtained postdoctoral positions in prestigious universities and medical schools. Additionally, they may be employed in a wide variety of private, community, state, and national agencies. Exercise physiology is an evolving field that is becoming increasingly important with the integration of preventive medicine into the healthcare system. Employment opportunities are expanding and increasing with experience and level of education.

**Master of Science Program**

This is a two-year program. We have a clinical track and thesis track. Clinical track students take course work, obtain experience in various medical settings (e.g., heart cath lab etc.), and work with populations with varied health problems (heart disease, diabetes, metabolic syndrome, arthritis etc.). The thesis track is also a two-year program and it is designed for students who wish to engage in an intensive research training experience, in preparation for further training in a Ph.D., or MD or similar postgraduate program.

The faculty who will act as primary mentors in exercise physiology have research and/or clinical expertise in:

- Aging and sarcopenia in skeletal muscle
• Heart disease
• Arthritis control and exercise
• Aquatic Therapy applications to health and disease
• Cancer cachexia and muscle wasting diseases
• Diabetes and body composition
• Biomechanical and motor control for gait in stroke or spinal cord injury
• Muscle injury and repair
• Microvascular dysfunction with the metabolic syndrome
• Cardiac and skeletal muscle growth and function
• Physiologic basis of lung disease
• Exercise-induced angiogenesis
• Stem cell biology and mechanical signal and tissue regeneration
• Motor unit recruitment in stroke and disability

MS STUDENTS ARE EXPECTED TO:

• Take an array of courses in exercise physiology, physiology, biochemistry, and molecular biology (both non-thesis and thesis tracks)
• Some students will take courses specializing in clinical science approaches (clinical track MS and clinical thesis tracks)
• Conduct independent research, analyze and interpret the data, and defend the finding's conclusions (thesis track)
• Demonstrate clinical care competency (clinical non-thesis track)
• Learn the process of writing and submitting grants (both non-thesis and thesis tracks)
• Present and discuss their research findings at national and international scientific meetings (both non-thesis and thesis tracks)
• Develop and improve teaching skills; communication with scientific and lay populations (both non-thesis and thesis tracks)
• Submit their thesis research for publication prior to graduation (MS thesis)

Doctoral Program

The graduate program in exercise physiology fosters a high degree of collaboration among faculty with interests in clinical medicine and basic research.

The faculty in exercise physiology have research expertise in exercise-induced adaptations and pathological tissue remodeling associated with aging, diabetes, and cardiovascular disease. Current areas of inquiry include the following:

• Aging and sarcopenia in skeletal muscle
• Cancer cachexia and muscle wasting diseases
• Muscle stem cells
• Mitochondria dysfunction and pathophysiological mechanisms of diabetic cardiomyopathy
• The Metabolic Syndrome and right-left heart function
• Immunology/cytokine/myokine responses of muscle to exercise and disease
• Reactive oxygen species development in cardiac and skeletal muscles with aging and diabetes
• Biomechanical and motor control for gait in stroke or spinal cord injury
• Microvascular dysfunction with the metabolic syndrome
• Cardiac and skeletal muscle growth and function
• Physiologic basis of lung disease
• Exercise-induced angiogenesis
• Extracellular matrix regulation and gene expression
• Stem cell biology and mechanical signal and tissue regeneration
• Motor unit recruitment in stroke and disability

Our Ph.D. program is intended to give exceptional students knowledge in basic medical and scientific areas to prepare them for careers as effective and knowledgeable researchers and teachers in the broad field of exercise physiology/kinesiology. In the Division of Exercise Physiology, these goals are achieved by several means. Formal coursework in the sub-disciplines of exercise physiology, physiology, biochemistry, molecular biology, pharmacology and neuroscience provides the student with the opportunity to develop a solid foundation in basic subject matter of medical sciences that can be applied to aspects of exercise and disease. The student’s knowledge base will be further strengthened by participation in elective courses offered within the division, selected courses offered by other departments within the School of Medicine, and by departments in other colleges of West Virginia University.

PH.D. STUDENTS ARE EXPECTED TO:

• Take an array of courses in exercise physiology, physiology, biochemistry, and molecular biology
• Some students will take courses specializing in clinical science approaches (clinical research projects)
• Conduct independent research, analyze and interpret the data, and defend the finding's conclusions
• Learn the process of writing and submitting grants
• Present and discuss their research findings at national and international scientific meetings
• Develop and improve teaching skills; communication with scientific and lay populations
• Submit their dissertation or thesis research for publication prior to graduation

The Division of Exercise Physiology actively engages in both basic science and clinically-based research, with an emphasis on cardiovascular disease, aging, obesity, and diabetes.

Required Research Participation

Because the thesis track masters degree has an intensive research training experience, and the doctorate is a research degree, students will be expected to be involved in research from the beginning of their programs. Doctoral students will participate in three research rotations with faculty in exercise physiology during the first two semesters of enrollment. Students are expected to choose a dissertation chair and a dissertation committee by the end of the first year of enrollment. Students should work with their dissertation advisor to design appropriate pilot studies and with that data identify a dissertation project and appropriate research questions/hypothesis to be tested by the proposed research. All approved research projects must be hypothesis-based, and whenever possible, the research questions should address mechanistic questions that explain biological phenomenon relevant to exercise physiology.

Research is conducted throughout the doctoral and masters thesis program with a goal of having at least three manuscripts published or submitted to a journal for peer review before graduation. Students should strive to present their research findings at a minimum of one national/international meeting annually beginning no later than the second year of enrollment in the doctoral program. A minimum of one peer-reviewed manuscript that is derived from the student’s dissertation research must be published before graduation.

FACULTY

PROFESSOR
• Stephen E. Alway - Ph.D. (McMaster University)
  Sarcopenia, Muscle Wasting, Molecular regulation of Muscle Regeneration, Diabetes and Muscle Injury

ASSOCIATE PROFESSORS
• Daniel E. Bonner - MS (West Virginia University)
  Clinical Exercise Physiology
• Randall W. Bryner - Ed.D. (West Virginia University)
  Diabetes, Exercise, and Cancer
• David Donley - MS (West Virginia University)
  Exercise and Metabolic Syndrome
• Diana Gilleland - MS (West Virginia University)
  Clinical Exercise Physiology
• John M. Hollander - Ph.D. (University of Wisconsin)
  Cardiovascular Research in Diabetes, Mitochondria Dysfunction, Molecular Regulation of Heart Disease
• Guyton W. Hornsby Jr. - Ph.D. (Louisiana State University)
  Diabetes and Depression
• Jean McCrory - Ph.D. (Penn State University)
  Biomechanics, gait, foot injuries
• I Mark Olfert - Ph.D. (Loma Linda)
  Angiogenesis, respiratory physiology, toxicology
• Lori Sherlock - Ed.D. (West Virginia University)
  Aquatic Therapy in Obesity

ASSISTANT PROFESSORS
• Paul D. Chantler - Ph.D. (Liverpool John Moores University)
  Metabolic Syndrome, Vascular Biology, the Effects of Aging and CV Diseases on Arterial and Ventricular Structure and Function, Stroke and Vascular Dysfunction
• Juniath S. Mohamed - Ph.D. (Tamil Nadu, India)
  Muscle fatigue, genetics of aging, muscle regeneration
• Emidio Pistilli - Ph.D. (West Virginia University)
  Muscular Dystrophy, Muscle Injury, Cytokines
Master of Science

Doctor of Philosophy

Degree Requirements

Minimum overall GPA of 3.0 required.

Minimum GPA of 3.0 in all EXPH courses required.

A grade of B- must be earned in all required courses.

Scientific Integrity
- BMS 700 Scientific Integrity
- BMS 702 Biomedical Lab Experience
- BMS 706 Cellular Methods
- BMS 707 Experiential Learning for Biomedical Trainees
- BMS 720 Scientific Writing
- BMS 747 Foundations for Contemporary Biomedical Research 1
- BMS 777 Foundations for Contemporary Biomedical Research 2
- EXPH 786 Musculoskeletal Biology
- EXPH 787 Cardiopulmonary Physiology
- Graduate Seminar
Students will complete the BMS course sequence including the laboratory rotations before beginning to work with a dissertation research mentor and starting the specialized doctoral courses in the Exercise Physiology program.

**Seminars and Research Forum**

Students will present three seminars during their graduate study. The first seminar is on a topic outside of the student’s research area. The second seminar is the public presentation of the dissertation proposal, which is the background and proposed research for the dissertation project. The third seminar is the public presentation of the dissertation defense.

**Journal Club**

Students are required to enroll in Journal Club each semester. The course involves the presentation and discussion of current research papers and will help acquaint students with the variety of methods used in scientific research.

**Doctoral Research**

Students will conduct research with a dissertation mentor during time in the program. Students register for research credits each semester, and their performance is graded by their dissertation mentor.

**Qualifying and Dissertation Proposal/Ph.D. Candidacy**

The written qualifying exam is given at the end of the second year of study. The candidacy exam is completed in the third year of study. Admission to Ph.D. candidacy occurs following the successful defense of the dissertation proposal.

**Dissertation Defense and First-Author Paper Requirement**

Students are allowed to defend their dissertation when a minimum of one manuscript with the student as first author, based on dissertation research, is accepted in a peer-reviewed journal. The final examination for the Ph.D. degree consists of orally defending a written dissertation in a public seminar and then in private to the dissertation committee. Satisfactory performance in the oral defense will result in recommendation for granting of the PhD.

Total credit hours: 87

NOTE: The graduate curriculum is finalized with a plan of study once the mentor and laboratory have been selected in the first year. The plan of study is developed by the graduate committee in consultation with the student. The courses listed above include the required and elective coursework necessary for the student to finalize his/her plan of study. When the student enters the laboratory of his/her doctoral dissertation mentor repetitive enrollments in research, seminars, and colloquia are typical and will determine total hours necessary for degree completion.

*This is a suggested plan of study. Course sequences and length of time in program may vary depending on student and altered total credit hours.

**Major Learning Goals**

**MASTER OF SCIENCE (MS) IN EXERCISE PHYSIOLOGY**

This program is designed with a clinical and a thesis track. The clinical track specializes in working with persons with diseases such as obesity, cardiovascular disease, and diabetes and aging. The thesis track provides opportunities for students to study mechanisms leading to and contributing to health diseases and disparities and to understand the impact of exercise on these health issues. The graduates of the masters program clinical track will become leaders who will supervise Exercise Physiologists in hospitals, rehabilitation, aquatic therapy programs, fitness, or academic settings. Some will use the clinical training in this degree to strengthen their application to medical school or another professional program. The MS clinical track will provide students the research basis from which to launch additional training in a research intensive doctoral or professional program.

Students will:

- Critically apply theories, methodologies, and knowledge to address fundamental questions in health specific issues related to exercise physiology
- Demonstrate skills in written and oral communication and critical thinking by critically analyzing research that is significant and novel in exercise physiology and within the sub-discipline associated with it
- Plan and conduct this research or implement this project under the guidance and approval of their research mentors while developing the intellectual independence that typifies true scholarship (thesis track students)
- Critically evaluate published research data and demonstrate clinical skills in working with patients and evaluating health and exercise-stress test data for appropriate exercise treatment (clinical track students)
- Follow the principles of ethics associated with appropriate research conduct (thesis track students) or clinical treatment of patients (clinical track students)
- Interact productively with people from diverse backgrounds including mentors and team members/peers with integrity and professionalism

**DOCTOR OF PHILOSOPHY (PHD) IN EXERCISE PHYSIOLOGY**

Students will:

- Attain a comprehensive understanding of the important cellular and system processes that are regulated by exercise, lack of exercise, and clinically relevant diseases
- Develop a vocabulary of appropriate terminology to effectively communicate information related to exercise physiology
- Acquire a foundation for critically applying theories, methodologies, and knowledge to address fundamental questions in health-specific issues related to exercise physiology
- Obtain independent and critical thinking skills requisite for designing, conducting, and interpreting research data in an effort to advance knowledge related to health and disease through creative and innovative research
- Effectively communicate knowledge through oral and written means by disseminating research findings that have the potential to improve the health and livelihood of citizens of the state, nation, and world
• Demonstrate principles of ethics associated with appropriate research conduct

Health Sciences
lvdavis@hsc.wvu.edu

Degree Offered

• Master of Science

The Master of Science (M.S.) program in the Health Sciences emphasizes enhancing knowledge in the biomedical and public health disciplines to increase the student’s competitiveness for admission to professional or graduate programs and/or to augment the student’s career potential. The program is a one-year, non-thesis masters. Completion of the M.S. degree is realized when the student has fulfilled all course requirements and the independent study project. Students can enter the program in either the Fall semester or the Summer Session. The Master of Science (M.S.) in the Health Sciences is a terminal degree program targeting students interested in developing their skills toward a career requiring basic science knowledge. The objectives of this program are to

1. provide integrative scientific education in the biomedical and public health sciences to graduates from an accredited undergraduate institution
2. provide the opportunity to explore career options in various health professional disciplines
3. develop integrative and critical thinking skills to allow application of scientific knowledge to traditionally non-scientific fields
4. train students in the rudiments of research on a basic science, public health or clinical topic; these include hypothesis testing, data collection, manuscript preparation
5. enhance competitiveness for admission to a health professional and/or Ph.D. program
6. enhance skills for job placement including resume and cover letter evaluation, and interviewing preparation.

To achieve these objectives, the program has two areas of emphasis: (1) advancement of basic science and public health knowledge for career enhancement and (2) partnering basic science with other disciplines. In the first area of emphasis, the student will augment his/her scientific skills with advanced coursework emphasizing critical thinking and application of that knowledge to problems facing human health. This area targets students interested in pursuing professional or advanced academic degrees. In the second area of emphasis, the student can expand their knowledge to allow them to direct a non-scientific career toward one that relies on a scientific skill set. Students in this area of emphasis may be teachers wishing to teach science in secondary schools, individuals interested in eventually achieving other professional degrees such as a J.D. or M.B.A. to pursue patent law or a position in a biotech/pharmaceutical company, or positions as a scientific liaison translating scientific knowledge to the general public in a community organization or a for profit company, a position sometimes called a knowledge broker.

Proposed coursework is designed to build the foundation knowledge common to first-year curricula in medical and dental schools and biomedical and public health Ph.D. programs. The common core curriculum will include coursework in the basic and public health sciences, biostatistics, epidemiology, and social and behavioral theory. The director of the M.S. in the Health Sciences works with each student to tailor electives to fit the student’s career goals. In addition to coursework, the student will participate in a series of activities:

- Preparation of an independent development plan and evaluation/aid in implementation of this plan
- Training in reading and evaluation of the scientific literature
- Enrichment activities to enhance career development skills, such as preparation to take entrance exams, preparation of resumes and cover letters, seminar presentation skills, and interviewing skills
- Participation in seminars to learn cutting edge advancements in science
- Cross-disciplinary approach to the acquiring and application of scientific knowledge

FACULTY

PROGRAM DIRECTOR
• Linda Vona-Davis - PhD
lvdavis@hsc.wvu.edu

PROGRAM STAFF
• Penny Phillips
pphillips@hsc.wvu.edu

All applications to the M.S. in the Health Sciences program are accepted electronically and must be submitted electronically via the official WVU Graduate Education application:

https://app.applyyourself.com/AYApplicantLogin/fl_ApplicantConnectLogin.asp?id=wvugrad.
M.S. in the Health Sciences applications are reviewed beginning in January by a Common Admissions Committee comprised of the Director of the M.S. in Health Sciences, the School of Medicine Associate Dean for Student Services and Curriculum, the School of Public Health Senior Associate Dean for Academic Affairs and Educational Effectiveness, the School of Dentistry Associate Dean for Admissions, Recruitment and Access, and the Director of HCOP or their designee. The Assistant VP for Graduate Education and the Assistant Director of HSC Graduate Education are *ex officio* members.

Students may apply for admission beginning in either the summer session or the fall semester of that year. Decisions of acceptance are made on a rolling basis until all slots are filled. All decisions made by the Admissions Committee are final. For maximum admissions consideration, we recommend that you apply as early as possible.

Please visit http://www.hsc.wvu.edu/ResOff/Health-Sciences/How-to-Apply to review the application process.

**Independent Study**

Students are required to register for independent study each semester and during summer session. The student will conduct an independent project under the guidance of a faculty advisor. The project can involve data collection, retrospective analysis of patient data, a comprehensive literature review, or other activity approved by the graduate director that is consistent with the student’s career goals. During the final semester in residence, the student presents a short talk of the results or culmination of his/her project.

**Seminar: Journal Club**

Students are required to register for seminar: journal club at least once during the course of the degree. Regardless of registration in this course, students still participate in the sessions. The fall semester emphasizes learning to read the scientific literature and gain new knowledge by attending seminars. The spring semester emphasizes learning how to present a seminar.

**Additional Enrichment Activities**

To enhance the attainment of his/her career goal, the student may take a preparative course for the MCAT, DAT or GRE exams. Students may shadow professional in their field of interest. Additional activities can include: preparation for interviewing, resume preparation, writing the personal statement, and taking undergraduate prerequisites. These activities can occur throughout the degree program.

Major Learning Goals

HEALTH SCIENCES

The Master of Science (M.S.) in the Health Sciences is a terminal degree program targeting students interested in developing their skills toward a career requiring basic science knowledge. The objectives of this program are to:

- provide integrative scientific education in the biomedical and public health sciences to graduates from an accredited undergraduate institution
- provide the opportunity to explore career options in various health professional disciplines
- develop integrative and critical thinking skills to allow application of scientific knowledge to traditionally non-scientific fields
- train students in the rudiments of research on a basic science, public health or clinical topic; these include hypothesis testing, data collection, manuscript preparation
- enhance competitiveness for admission to a health professional program
- enhance skills for job placement including resume and cover letter evaluation, and interviewing preparation.

Immunology and Microbial Pathogenesis

jbarnett@hsc.wvu.edu

Degrees Offered

- Doctor of Philosophy
- Joint Doctor of Medicine and Doctor of Philosophy

Educational Objectives

The Doctor of Philosophy degree in Immunology and Microbial Pathogenesis will prepare students from diverse backgrounds to serve as professionals that are knowledgeable about the immune system of humans and other mammals, how the immune system functions, and the consequences of its malfunction on the health of the host. Knowledge of the immune system will be fully integrated with an excellent understanding of the diversity of microorganisms that cause disease in humans and other mammals and mechanisms of disease pathogenesis. Graduates will possess the laboratory skills and knowledge needed to assess the functional status of the immune system and to assess the mechanism used by microbial agents to cause disease in mammals. Graduates will be qualified to pursue several professional career paths in private industry, state and federal government, and academic institutions.

The doctoral program in Immunology and Microbial Pathogenesis emphasizes extensive laboratory research in microbiology, immunology, microbial pathogenesis, and/or cell biology, i.e. the major purpose of graduate education in the program is research training. The basic philosophy of the program is that students acquire a strong foundation in the basic concepts of immunology and microbial pathogenesis and have flexibility in choosing advanced coursework in their specific areas of interest. Each student will complete an original, in-depth research investigation. Its learner-centered curriculum integrates both classroom and hands-on research experiences to produce students capable of designing and doing independent research and teaching.

Completion of the Ph.D. degree is realized when the student successfully presents the research results to faculty of the graduate dissertation committee and program/department. Typically, four to five years are required to realize this goal.

Faculty members and students explore diverse areas of inquiry related to the medical implications of microbes and the human body’s response to them.

Current Research Areas

- Immunology
- Effects of man-made pesticides and herbicides on the immune system
- Effects of heavy metals on the immune system
- Biochemistry of inflammatory cytokines
- Immune response in bacterial and viral diseases
- Regulation of signal transduction in immune responses
- Molecular aspects of cell signaling as it relates to cancer chemotherapy and cell growth
- Peptide and DNA vaccines for contraception
- Microbiology
- Physiology of pathogenic microbes
• Microbial genetics
• Mechanisms of bacterial pathogenesis
• Chemotaxis and motility
• Interactions between microbes and their hosts
• Molecular mimicry and structure-function relationship of bacterial virulence factors
• Microbial biofilms

FACULTY

GRADUATE PROGRAM DIRECTOR

• John Barnett - Ph.D. (University of Louisville)

PROFESSORS

• Nyles Charon - Ph.D. (University of Minnesota)
• Christopher Cuff - Ph.D. (Temple University)
• Laura F. Gibson - Ph.D. (West Virginia University)
• Vazhaikkurichi Rajendran - Ph.D. (University of Madras)

ASSOCIATE PROFESSORS

• Tim Eubank - Ph.D. (The Ohio State University)
• Slawomir Lukomski - Ph.D. (University of Lodz, Poland)
• Karen Martin - Ph.D. (Duke University)
• Lisa Robinson - Ph.D. (Cornell University)
• Cory Robinson - Ph.D. (Miami University of Ohio)
• Rosana Schafer - Ph.D. (Temple University)
• James M. Sheil - Ph.D. (University of Kentucky)

ASSISTANT PROFESSORS

• Mariette Barbier - Ph.D. (Universitat de les Illes Balears)
• Kathy Brundage - Ph.D. (University of Pennsylvania)
• Duaa Dakhallah - Ph.D. (The Ohio State University)
• F. Heath Damron - Ph.D. (Marshall University)
• Meenal Elliott - Ph.D. (University of Alabama)
• Jennifer Franko - Ph.D. (Case Western Reserve University)
• Ivan Martinez - Ph.D. (University of Pittsburgh)
• Gordon Meares - Ph.D. (University of Alabama)
• Edwin Wan - Ph.D. (City University of Hong Kong)
• Valerie Watson - M.S. (West Virginia University)

ADJUNCT PROFESSORS

• Don Beezhold - Ph.D. (University of Illinois Medical Center)
• John Noti - Ph.D. (Purdue University)
• David Weissman - M.D. (Northwestern University)

ADJUNCT ASSISTANT PROFESSORS

• Stacey Anderson - Ph.D. (West Virginia University)
• Brett J. Green - Ph.D. (University of Sydney)
• David Klinke - Ph.D. (Northwestern University)
• Yong Qian - Ph.D. (West Virginia University)
• Jenny Roberts - Ph.D. (West Virginia University)

Doctor of Philosophy

MAJOR REQUIREMENTS

Scientific Integrity
Seminars and Research Forum

Students are required to register for MICB 796 each semester of residence and are required to present at least one seminar during each school calendar year (Fall – Spring semesters).

Journal Club

Students are required to enroll in Journal Club each semester. The course involves the presentation and discussion of current research papers and will help acquaint students with the variety of methods used in scientific research.

Doctoral Research

Students will conduct research with a dissertation mentor during time in the program. Students register for research credits each semester, and their performance is graded by their dissertation mentor.

Qualifying and Dissertation Proposal/Ph.D. Candidacy

The written qualifying exam is given at the end of the first year of study. The dissertation proposal is completed in the third year of study. Admission to Ph.D. candidacy occurs following the successful defense of the dissertation proposal.

Dissertation Defense and First-Author Paper Requirement

Students are allowed to defend their dissertation when a minimum of one manuscript with the student as first author, based on dissertation research, is accepted in a peer-reviewed journal. The final examination for the Ph.D. degree consists of orally defending a written dissertation in a public seminar and then in private to the dissertation committee. Satisfactory performance in the oral defense will result in recommendation for granting of the PhD.

Total credit hours: 86

**NOTE:** The graduate curriculum is finalized with a plan of study once the mentor and laboratory have been selected in the first year. The plan of study is developed by the graduate committee in consultation with the student. The courses listed above include the required and elective coursework necessary for the student to finalize his/her plan of study. When the student enters the laboratory of his/her doctoral dissertation mentor repetitive enrollments in research, seminars, and colloquia are typical and will determine total hours necessary for degree completion.

*This is a suggested plan of study. Course sequences and length of time in program may vary depending on student and altered total credit hours.

### Major Learning Goals

**IMMUNOLOGY AND MICROBIAL PATHOGENESIS**

Students will:

- Demonstrate a general knowledge of basic concepts of microbiology, microbial pathogenesis, and immunology, and a detailed knowledge of his or her area of research
- Be familiar with the research literature in microbiology and immunology and in their specific field of study and should have the ability to keep abreast of major developments and to acquire a working background in any area
- Demonstrate skill in the recognition of meaningful problems and questions for research in Microbiology and Immunology
- Possess technical skill in laboratory manipulation
- Demonstrate that oral, written, and visual communication skills have been acquired
- Demonstrate skill in designing experimental protocols and in conducting productive self-directed research

### Medicine

**Degrees Offered**

- Doctor of Medicine
- Joint Doctor of Medicine and Doctor of Philosophy
- Joint Doctor of Medicine and Master's in Public Health
- Joint Doctor of Medicine Jurisprudence Degree
- Joint Doctor of Medicine and MBA
The degree of doctor of medicine (M.D.) is granted to students who have completed the prescribed curriculum and who have been recommended for the degree by the faculty of the School of Medicine.

The M.D./PhD. program is available to students who show exceptional interest and scholarly promise. All admission requirements of the School of Medicine and the specific graduate program apply. An M.D./M.P.H. program is available for those interested in public health issues.

The following information applies only to students in the School of Medicine who are enrolled in the prescribed curriculum which culminates in the M.D. degree. All other students, undergraduates, or graduates enrolled in other programs in the School of Medicine are governed by the policies found elsewhere in this catalog.

**Accreditation**

The West Virginia University School of Medicine is accredited by the Liaison Committee on Medical Education (LCME).

**Promotion and Graduation Requirements**

**EVALUATION OF STUDENT PROGRESS**

Promotion of a student in the M.D. degree program is evaluated in four major areas: (1) successful completion of all required work, (2) successful completion of Step 1 and Step 2 of the United States Medical Licensure Examination (USMLE), (3) successful completion of the WVU School of Medicine Clinical Performance Exam, and (4) successful fulfillment of the professional standards of the School of Medicine, including 100 hours of community service.

The following information is only a brief outline of the School of Medicine policies and procedures. Detailed requirements and policies for evaluation of student progress and graduation may be found in the Policy on Academic and Professional Standards Governing the M.D. degree program at WVU School of Medicine on the Student Services website. The Committee on Academic and Professional Standards administers all promotion and dismissal rules.

**Academic Coursework Review**

The Committee on Academic and Professional Standards of the School of Medicine reviews the performance of each student in every course at the end of each academic period. If a student has been found to have an unsatisfactory performance in any of the required courses, the student will be required to remediate or be dismissed from the school. In selected circumstances, the committee may require remedial work of all or a portion of the curriculum.

The Committee on Academic and Professional Standards may require a student to complete remedial work or dismiss the student even though no failing (F) grade has been received in a required course. Such an event would occur only if, in the opinion of the committee, the student’s overall performance does not meet the academic/professional standards of the School of Medicine.

Readmission of a dismissed student is the prerogative of the Admissions Committee after careful review of the student’s performance, including but not limited to, actions taken by the Committee on Academic and Professional Standards.

**Grading Policy**

All courses required for the M.D. degree are graded as honors (H), pass (P), or fail (F) at the completion of the course in lieu of other letter grades. The H, P, and F designations are accompanied by a narrative report of the student’s progress, noting any factors requiring remedial work or counseling. The narrative is submitted by each course and filed in the student portfolio. A grade of F shall be regarded as a failing grade.

The grade of incomplete (I) is given when the instructor believes that the work is unavoidably incomplete or that a supplementary examination is justifiable. If a grade of I is not removed by satisfactory completion of the work before the end of the next semester in which the student is in residence, it becomes a failure unless special permission to postpone the work is obtained from the Committee on Academic and Professional Standards (University rule). All students who have a health problem which they feel may be causing difficulty with their academic progress are strongly advised to notify an associate dean for student services. It is the responsibility of the student to consult the instructor about the means and schedule for making up incomplete courses.

No student will be permitted to register for any work of the second or subsequent year until all courses for the year before have been completed successfully.

**United States Medical Licensure Examination (USMLE)**

All states require that physicians be licensed to practice medicine. Satisfactory completion of all portions of the United States Medical Licensure Examination (USMLE) is the only examination mechanism by which this license may be obtained. The School of Medicine requires a passing grade on Step I and Step II for promotion and graduation. A failing grade will delay progress and require remediation. Students are limited to three attempts on each step.

Step I is required upon successful completion of all basic science coursework. A passing grade in Step I is required for promotion into the clinical rotations. Step II (clinical knowledge and clinical skills) is required after successful completion of third-year clinical rotations. A passing score on Step
II is required before a recommendation can be made to grant the M.D. degree by the School of Medicine faculty and Committee on Academic and Professional Standards.

Licensure examinations are administered using a computer-based testing format.

Professional Standards Review

All non-disciplinary matters are governed by the concept of academic due process.

In view of public and professional responsibilities, the faculty of each of the professional schools of WVU has the authority to recommend to the president of the University the removal of any student from its rolls whenever, by formal decision reduced to writing, the faculty finds that the student is unfit to meet the qualifications and responsibilities of the profession. For further information the reader is referred to the Policy on Academic and Professional Standards Governing the M.D. Degree Program at West Virginia University School of Medicine, which is available at the School of Medicine Student Services website.

Departure from Scheduled Work

Medical students are registered for all prescribed courses for each semester except by special permission from the Committee on Academic Standards and an associate dean for student services of the School of Medicine. This permission is not valid until it has been reported to the assistant director of admissions and records, Health Sciences Center, and Student Services, School of Medicine.

Admission Requirements

The student preparing for any career in the health professions must have a keen interest in the sciences.

The following courses are required for consideration of an application to medical school:

- English: 6 credit hours (1 writing intensive course can be substituted)
- Biological sciences: 6 credit hours
- General Chemistry: 6 credit hours
- Organic chemistry (Substitute with 3 hours Organic Chemistry with 3 hours Biochemistry): 6 credit hours
- Physics: 6 credit hours
- Social or behavioral sciences (Anthropology, Archaeology, Communication, Cultural Studies, Demography, Economics, Geography, History, Linguistics, Social Work, Sociology, Political Science & Psychology): 9 credit hours
- Lab courses (Biology, Biochemistry, Physics, Inorganic or Organic Chemistry): 6 credit hours

Biochemistry and Cellular and Molecular Biology are strongly recommended. A total of ninety semester hours, exclusive of ROTC and general physical education, as well as 3 years of undergraduate education is required. Computer skills are required. All required courses must be successfully completed, ideally passed with a grade of a C or better. All but one required class must be completed prior to January 1 of the year of admission; applicants may complete one required course in the spring of the year they anticipate to matriculate. In this case, the applicant may be interviewed and presented, but any decision of acceptance to the fall class would be deferred until receipt of the official transcript confirming successful completion of the course with a grade of C or better.

Applicants who have been subject to suspension from WVU or other medical schools can be rarely admitted only in very exceptional cases and at the discretion of the Committee on Admissions (COA).

Pre-Admission Tests

The score of the Medical College Admissions Test (MCAT) is one of the factors used by the COA in considering an applicant for admission. It is recommended that students take the MCAT during the spring of their junior year in college. The MCAT must be taken by September of the year of application. MCATs taken in January of the year of admission will not be considered. The dates for beginning and closure of application acceptances are available through AMCAS and on our website.

Information concerning the time and place of the test can be obtained from your premedical adviser or the Office of Admissions at the Health Sciences Center.

Application Procedure

West Virginia University School of Medicine uses a Holistic Review for each application.
The admissions process is initiated by completing the online American Medical College Application Service (AMCAS) forms. They are online at http://www.aamc.org.

Application for admission in August should be made at the end of the previous school year. The last date for filing an application through AMCAS is November 1. The applicant should file as early as possible, making certain that recent MCAT scores, current transcripts, and letters of recommendation are available to the COA.

Admission preference is given to West Virginia residents and those non-resident applicants who have strong ties to and service in the state. In a holistic review of an applicant, not one specific factor is used to determine admission. The applicant must provide evidence of outstanding academic performance and a commitment to activities that would fulfill the mission of our school. Careful consideration is given to those personal qualifications which apply to the study and practice of medicine. The criteria for admission include outstanding academic performance, course load, letters of recommendation, MCAT scores, motivation, interpersonal skills, community service, health care experiences, physician shadowing and a personal interview. An early decision program is available for those residents and non-residents with strong grades and MCATs who wish only to apply and attend WVU and have participated in activities that reflect the mission of our school.

No applicant is admitted before an interview by the COA. Residency status is determined by the Board of Governors Policy Bulletin #36. Interviews and consideration of applicants begin in August or September. Acceptances are made on a rolling basis.

If an applicant is denied admission or does not enroll after acceptance, he or she must reapply in the regular manner for consideration in a subsequent year.

Advanced Standing

Advanced standing positions are considered only in very exceptional circumstances and only to students currently attending a medical school accredited by the Liaison Committee on Medical Education (LCME). A student can apply for a transfer if all parts of the Transfer Policy (http://medicine.hsc.wvu.edu/media/2862/transfer-student-policy.pdf) are fulfilled, and then the COA will make the final decision. The application must be received no later than April 1. The applicant must present certification of good academic and professional standing in the school from which he/she is transferring.

Conditions Following Acceptance

An applicant accepted into the first year or in advanced standing is expected to meet all entrance requirements and satisfactorily complete all undergraduate/medical school work in progress. Failure to do so may result in the withdrawal of the acceptance by the COA.

The student must be aware that furnishing, or causing to be furnished, false or incorrect information for the purpose of the School of Medicine application constitutes grounds for disciplinary actions, including, but not limited to, expulsion or revocation of the acceptance.

A criminal background check is required and must be successfully passed prior to matriculation. Certain convictions negate an offer to attend medical school at WVU.

Students in the School of Medicine agree to abide by the provision of an integrity code, which requires ethical and moral standards of conduct in all situations. Each student is required to return a signed statement to the Office of Student Services, indicating the student has read and understands the Student Professional and Academic Integrity Code of the West Virginia University School of Medicine. The code and copies of the statement are available on the Student Services website.

Prior to entering medical school, all students must complete certain prescribed immunization and diagnostic procedures. Personal health insurance is required.

</table>

**FIRST YEAR**

Medical students’ first year is a thirty-seven-week academic year divided into three blocks (sixteen weeks, fifteen weeks, and seven weeks). There are approximately twenty-two scheduled instructional contact hours per week. Each block contains three courses: a basic science multidisciplinary course, public health (epidemiology, biostatistics, and preventive medicine) in the fall, and physical diagnosis and clinical integration (large group alternating every other week with small groups). While physical diagnosis and clinical integration runs throughout the year, the basic science component changes each block. The first block (sixteen weeks) contains a multidisciplinary run course: human function (physiology, biochemistry, and genetics.). Second block (fifteen weeks) consists of human structure (gross anatomy, embryology, and microanatomy: large group and laboratory). Third block (seven weeks) consists of multidisciplinary neuroscience (ten hours large group, laboratory, and small group). A weekly problem-based learning group is maintained throughout the first year. Students also complete a summer selective experience for a total of 3 credit hours.

**SECOND YEAR**

Medical students’ second academic year is thirty-four weeks. The schedules of course material from Microbiology and Immunology, Pathology, Pharmacology, and Physical Diagnosis and Clinical Integration-two courses are integrated by organ system. Each course maintains its autonomy with respect to assessment of student performance. This integrated, yet independent, approach assists students in finding remediation courses if they experience academic difficulty in any one particular discipline. In addition to the integration of the schedule of these four courses, there is an additional course, Behavioral Science and Psychopathology, in the fall and Health Care Ethics in the spring. There are approximately nineteen scheduled instructional contact hours per week.

**CLINICAL YEARS**

The last two years of study take place in the clinics, hospitals, and community settings where students have the opportunity to help diagnose and treat patients under supervision of the faculty and staff. All students will serve a significant portion of the clinical years training at an off-campus or rural site.

**THIRD YEAR**

In the third year, the student must spend a designated period of time in each of the major clinical disciplines: internal medicine, surgery, pediatrics, obstetrics and gynecology, psychiatry and neurology, and family medicine for a total of 48 weeks. This gives the student a foundation in history-taking, examination, patient relations, laboratory aids, diagnosis, treatment, and use of the medical literature in the major clinical disciplines. One month is spent in rural primary care.

Approximately one-third of each class completes third and fourth year at the Charleston Division of the Robert C. Byrd Health Sciences Center of West Virginia University. A smaller number of students will also complete their third and fourth year at the Eastern Division Campus.
FOURTH YEAR

The fourth year is a partially structured and partially elective year. Each student works with an advisor to select the program best suited to the individual’s abilities and goals. Courses selected are subject to approval of an associate dean Student Services.

Three months of the senior year are committed to required clerkships at the home campus which include one month in internal medicine, family general medicine, surgery, or pediatric sub-internship; one month of acute care, and one month of rural community care. The remaining five months of the senior year are elective at approved teaching sites.

A catalog is available online that lists the approved electives and selection guidelines at http://medicine.hsc.wvu.edu/ms4catalog

Elective time must be spent in LCME (Liaison Committee on Medical Education) or JCAH (Joint Council of American Hospitals) accredited institutions. Foreign rotations, regardless of sponsorship, are limited to one month credit.

*This is a Suggested Plan of Study. Sequence may vary depending on student.
Major Learning Goals

MEDICINE

This program is designed for students to develop knowledge, skills, and attitudes across six (6) competency areas: Patient Care, Medical Knowledge, Practice-Based Learning and Improvement, Interpersonal and Communication Skills, Professionalism, and Systems-Based Practice.

Students will:

Provide patient care that is compassionate, appropriate, and effective and promote life-styles that promote improved health:

- Gather essential and accurate patient information, including a complete and appropriately organized medical history and physical examination
- Evaluate patient information in order to formulate complete and accurate differential diagnoses and apply appropriate diagnostic tests to confirm diagnoses
- Develop patient management plans that are evidenced-based and considerate of cultural and ethnic preferences
- Counsel and educate patients and their families about prevention strategies, diagnostic tests, treatment options/plans, and patient orders/prescriptions
- Perform medical procedures appropriately and professionally
- Partner with patients to prevent health problems and improve health status

Demonstrate knowledge of established and evolving biomedical, clinical, epidemiological, and social-behavioral sciences and apply this knowledge to patient care:

- Describe normal structure and function of the human body and each organ system over the lifespan
- Describe molecular, cellular, and biochemical mechanisms of homeostasis
- Describe and apply normal cognitive and social growth and development of humans to diagnose abnormal cognitive and social development
- Describe causes of altered structure and function of organ systems and tissues that result in disease (genetic, developmental, nutritional, toxic, infectious, inflammatory, neoplastic, degenerative, traumatic, and behavioral)
- Describe foundations of diagnostic methods, therapeutic interventions, outcomes, and prevention with respect to specific disease processes in individuals and populations
- Describe genetic and physiologic basis of individual patient response to drugs
- Describe and apply foundational principles of epidemiology, statistics, and ethics to diagnosis and treatment of disease
- Explain the effect of social determinants, health behaviors, and preventative measures on health status and disease of individuals and populations
- Demonstrate use of scientific method and critical evaluation of scientific literature in establishing causation, diagnosis, and therapy of disease

Demonstrate the ability to investigate and evaluate their role in the care of patients, to appraise and assimilate scientific evidence, and to continuously improve their role in patient care based on constant self-evaluation and learning:

- Locate, appraise and assimilate evidence from scientific studies including basic, clinical, translational, and community (population) based research
- Apply knowledge of study designs and statistical methods to appraise studies
- Use information technology to manage information and support patient care decisions
- Develop the skills necessary for lifelong learning, as evidence by demonstrating independent and self-directed study
- Utilize strategies to identify and analyze strengths, deficiencies, and limits in one’s knowledge, collaboration skills, and professionalism

Demonstrate interpersonal and communication skills that result in the effective exchange of information and collaboration with patients, their families, peers, and health professionals:

- Communicate effectively and demonstrate caring and respectful behaviors with patients and families across a broad range of socioeconomic and cultural backgrounds
- Collaborate with a team of health care professionals to provide patient-focused, preventive, acute, chronic, continuing, rehabilitative, and end-of-life care
- Provide an accurate and complete oral presentation of a patient encounter
- Demonstrate effective communication and collaboration with all members of a health care team
- Write timely, legible, accurate and complete documentation of a clinical encounter in written or electronic format

Demonstrate a commitment to carrying out professional responsibilities and an adherence to ethical principles:

- Demonstrate respect, compassion, integrity, responsiveness to needs of patients, society, and profession that supersedes self-interest
- Demonstrate a commitment to ethical principles, including provision or withholding of care, confidentiality, informed consent, and respect for patient privacy and autonomy
• Demonstrate sensitivity and responsiveness to a diverse patient population, including but not limited to diversity in culture, age, gender, race, religion, disabilities, sexual orientation, and health
• Create and sustain a therapeutic and ethically sound relationship with patients
• Demonstrate timeliness and punctuality in the execution of learning and clinical duties

Demonstrate an awareness of and responsiveness to the larger context and system of health care, as well as the ability to learn about other resources in the system to promote optimal health care:

• Define the roles of health care professionals and demonstrate how inter-professional collaboration improves patient safety, patient-centered outcomes, and system performance
• Describe and distinguish effective methods of organizing, financing, and providing health care
• Describe how the prevention and treatment of healthcare disparities may affect individual patients, populations, and the healthcare system
• Advocate for quality patient care, as evidenced by recognizing system limitations and failures and contributing to healthcare safety and improvement

Neuroscience

(aberreb@hsc.wvu.edu) dey@hsc.wvu.edu

Degrees Offered

• Doctor of Philosophy
• Joint Doctor of Medicine and Doctor of Philosophy

The doctoral program in Neuroscience is committed to training the next generation of researchers and educators. Successful completion of degree requirements is based on research and scholarly achievement. Students will have opportunities to experience and acquire the skills needed for successful careers as independent scientists, including critical thinking, problem solving, and leadership. After completion of core coursework, students conduct an original research project culminating in a doctoral dissertation. Research experiences include evaluating scientific literature, identifying critical scientific issues, experimental design, grant and manuscript writing, publication of scientific papers, and presentations at national meetings. Students with career interests in teaching will have the opportunity to gain experience in innovative teaching methods and techniques, including problem-based learning, computer-assisted learning, and integrated teaching approaches. Faculty members have appointments in basic and clinical departments with expertise that spans all neuroscience sub-disciplines, including structural, cellular, molecular, and developmental.

The neuroscience graduate program emphasizes research on the function and dysfunction of the brain and nervous system, providing students with innovative approaches to understanding neural mechanisms responsible for diseases such as Alzheimer’s disease, stroke, brain injury and repair, as well as fundamental understanding of cellular and molecular neurobiology, motor and sensory systems, neural processing, cognition, behavior, and neural development.

Completion of the Ph.D. degree is realized when the student successfully presents the research results to faculty of the graduate dissertation committee and program/department. Typically, four to five years are required to realize this goal.

CURRENT RESEARCH AREAS INCLUDE THE FOLLOWING:

Cognitive Neuroscience: sound recognition, spatial hearing and sensory integration using fMRI, use-dependent plasticity in motor cortex after stroke, neurogenic communication disorders.

Neural Injury: functional and structural integrity of the blood brain barrier in health and disease, role of neuroinflammation in CNS pathologies, stroke pathophysiology and neuroprotection.

Behavioral Neuroscience: airway innervation and asthma, structural and functional changes in the hypothalamus of seasonal breeders, neurobiological pathways controlling food intake and obesity, plasticity in the amygdala, development of new compounds to treat neurological and psychiatric disorders, developmental aspects of sleep and sleep disorders, molecular psychopharmacology; learning, memory, and synaptic plasticity; signal transduction pathways involved in neurodegenerative and neuropsychiatric disorders.

Interdisciplinary research projects include: structure and transcriptional mechanisms controlling neural gene expression, molecular biology, and molecular genetics of neural degeneration and regeneration in the central nervous system; developmental neurochemistry and environmental influences on brain development, especially nutrition; neuroanatomy and neurophysiology of somatosensory and auditory systems, structural plasticity of astrocytes and modulation of synaptic contacts in the central nervous system, developmental neurobiology of anxiety disorders, development of synaptic connections in the neocortex, developmental genetics of rodent behavioral mutants; neural basis of pulmonary diseases, especially asthma and occupational/environmental diseases; mechanisms regulating microcirculation under pathophysiological conditions.

Seminars and Research Forum

Students are required to register for seminar in each semester of residence.

Journal Club

Students are required to enroll in Journal Club each semester. The course involves the presentation and discussion of current research papers and will help acquaint students with the variety of methods used in scientific research.

Doctoral Research

Students will conduct research with a dissertation mentor during time in the program. Students register for research credits each semester, and their performance is graded by their dissertation mentor.

Qualifying and Dissertation Proposal/Ph.D. Candidacy

The oral qualifying exam is given at the end of the second year of study. The dissertation proposal is completed in the third year of study. Admission to Ph.D. candidacy occurs following the successful defense of the dissertation proposal.

Dissertation Defense and First-Author Paper Requirement

Students are allowed to defend their dissertation when a minimum of one manuscript with the student as first author, based on dissertation research, is accepted in a peer-reviewed journal. The final examination for the Ph.D. degree consists of orally defending a written dissertation in a public seminar and then in private to the graduate dissertation committee. Satisfactory performance in the oral defense will result in recommendation for granting of the Ph.D. degree.

Total credit hours: 92

NOTE: The graduate curriculum is finalized with a plan of study once the mentor and laboratory have been selected in the first year. The plan of study is developed by the graduate committee in consultation with the student. The courses listed above include the required and elective coursework necessary for the student to finalize his/her plan of study. When the student enters the laboratory of his/her doctoral dissertation mentor repetitive enrollments in research, seminars, and colloquia are typical and will determine total hours necessary for degree completion.

*This is a suggested plan of study. Course sequences and length of time in program may vary depending on student and altered total credit hours.

## Major Learning Goals

### NEUROSCIENCE

- Demonstrate skill in designing experimental protocols and in conducting productive self-directed research in Neuroscience
- Be able to pursue independent research in specialized fields of Neuroscience and to work with and contribute to interdisciplinary teams.
- Develop research skills including scientific communication and critical thinking/problem solving ability by participating in seminars and designated research skill courses
- Gain hands-on experience in conducting original research, including acquisition of background information (e.g., literature research), experimental design, data collection and interpretation and communicating the importance and relevance of research discoveries.
- Develop research communication skills by writing abstracts for research presentations, manuscripts for publication, research grant proposals, and a thesis or dissertation.
- Be competent scientists able to contribute to basic and health-related research in Neuroscience.
Occupational Therapy

Degree Offered

- Master of Occupational Therapy (MOT)

Introduction

In the fall of 1993, the West Virginia Board of Trustees approved the establishment of a new master’s degree program at WVU, leading to an entry-level master’s degree in occupational therapy. WVU accepted its first students into the professional program in the fall semester of 1996. The academic and fieldwork program requires three years to complete. Prior to application, students are required to complete approximately fifty to sixty hours of prerequisite courses, which in most instances will take two years to fulfill.

The Profession of Occupational Therapy

Occupational therapy is a health and rehabilitation profession which provides services to people of all ages, and addresses physical, cognitive, psychosocial, sensory, communication, and other areas of performance in various contexts and environments in every day life activities that affect health, well-being, and quality of life (AOTA, 2004). Occupational Therapy is a caring profession designed to help people regain and build skills that are important for health, well-being, security, and happiness. The purpose of occupational therapy is to help individuals achieve a maximum level of independence and function through engagement in occupation in order to lead independent, productive, and satisfying lives. The focus is on assisting and enabling individuals to develop the capacity to function in all activities (occupations) of daily life, including self-care, work, and leisure. Hence the name occupational therapy.

Occupational therapists work in schools, hospitals, rehabilitation centers, home health agencies, skilled nursing homes, and private practice.

Accreditation Status

WVU’s Division of Occupational Therapy has been granted accreditation status by the Accreditation Council for Occupational Therapy Education (ACOTE) of the American Occupational Therapy Association (AOTA) located at 4720 Montgomery Lane, Suite 200, Bethesda, M.D. 20814-3449. ACOTE’s phone number, c/o AOTA, is (301) 652-AOTA. The OT program at WVU was initially awarded accreditation in 1998 and awarded re-accreditation in 2013. The next scheduled onsite visit for accreditation will be in 2023-2024. ACOTE information may be accessed at www.acoteonline.org (http://www.acoteonline.org).

Graduates of the program are able to sit for the national certification examination for the occupational therapist administered by the National Board for Certification in Occupational Therapy Inc. (NBCOT). The address for NBCOT is: National Board for Certification in Occupational Therapy, Inc., 12 South Summit Avenue, Suite 100, Gaithersburg, MD 20877-4150. For more information, NBCOT can be contacted at (301) 990-7979 or at http://www.nbcol.org. After successful completion of this exam, the individual will be an occupational therapist, registered (OTR). Most states require licensure in order to practice; however, state licenses are usually based on the results of the NBCOT Certification Examination. Note: A felony conviction may impact a graduate’s ability to take the NBCOT examination and/or obtain a state license. For further information on NBCOT’s Character Review Program, interested parties can obtain information from the licensing board in that particular state.

Prospective students, applicants, and interested parties can review program data results for the National Board for Certification in Occupational Therapy (NBCOT) exam at: https://secure.nbcol.org/data/schoolstats.aspx

What to Expect

Like many professional programs, the curriculum in the entry-level master’s occupational therapy program is fairly fixed and intense. The first professional year, which begins in the summer, will include courses in basic sciences relevant to the profession and practice of occupational therapy along with introductory professional courses. The second and third professional years will deal more specifically with training in occupational therapy theory and practice as administered across a wide variety of settings. The professional curriculum includes two off-campus, full-time clinical experiences known as Level II Fieldwork. Students are financially responsible for transportation, housing, and meal expenses related to clinical assignments. Students in the program are required to participate in the School of Medicine’s laptop computer purchase lease-to-own program, which provides each student with a state-of-the-art computer that contains course and program-relevant software.

All OT coursework must be completed with a grade of "C" or higher. Further, OT students must maintain an OT coursework GPA of 3.0 or higher while in the OT Program.

Students in the OT Program must complete all didactic coursework and all fieldwork within a period of five years after commencing the occupational therapy program. Furthermore, all Level II Fieldwork must be completed within eighteen months following completion of academic coursework while remaining within the five-year time frame.
Admission Standards

Normally, students apply to the program during their second year of college. They must have a minimum of fifty to fifty-five hours of college credit which includes the prerequisites listed previously. Students who already have a degree in another field are also eligible to apply. All applicants must meet the following criteria:

- Minimum GPA of 3.0, including overall GPA and prerequisite GPA, is normally required (a higher GPA may be necessary given the competitive nature of the program).
- Minimum of sixty (60) hours of volunteer experience with at least two licensed occupational therapists (Students should contact the Division of Occupational Therapy to determine the type of experience required. Students should keep a record of dates/hours, locations, and names of supervising occupational therapists. Forms to record volunteer/shadowing experiences can be found online at http://medicine.hsc.wvu.edu/ot)
- Recommendations are required from two Occupational Therapists who supervised the volunteer/shadowing experience. These OTs must be from two different clinical facilities. Specific recommendation forms are available at the time of application within the on-line application packet.
- Completion of all prerequisite courses by the end of the semester of application (normally, second semester of sophomore year) is required. All OT prerequisite courses and WVU GEC courses must be completed by June 1st prior to starting the OT Program.
- *Note: Some OT prerequisite courses have their own course specific prerequisites. For example, physics courses at WVU require that students have completed college algebra and trigonometry. Students must check with those departments for specifics.

**IMPORTANT NOTE:** Applicants must have completed all but a maximum of 2 OT prerequisite courses by the end of their Fall semester prior to the close of the Spring application period. Those applying to the OT Program will not be considered in the application review process if they are taking more than two OT prerequisite courses in the Spring semester prior to their anticipated start of summer classes in the OT Program. In other words, for those applying to the WVU OT Program, all but a maximum of two OT prerequisite courses must be fully completed by end of the Fall semester. Thus, applicants who are taking three or more OT prerequisite courses in the Spring semester will not be considered for acceptance into the OT Program. Applicants must plan on taking no more than two OT prerequisite courses in the Spring semester prior to the summer start of the Program for which they are applying. This requirement does not apply to WVU non-OT prerequisite general education (GEC) course requirements. Note: Courses with a required lab, including those courses that have labs with a separate course number, may be considered one course for purposes of this requirement, i.e., a course plus its lab equal one course. Students are strongly urged to contact the Division of OT for clarification or if they have any questions on this requirement.

Application forms are available online on the program homepage at medicine.hsc.wvu.edu/ot Questions regarding application materials may be directed to The Division of OT at (304) 293-8828 or to the OT Program Academic Advisor at (304) 293-1690. Application materials are traditionally available November 15 through February 15. The deadline for submission of application materials is typically February 15. The official deadline will be posted on the occupational therapy website and printed in the admissions packet.
Course information for the master of occupational therapy degree can be found on the following website: http://medicine.hsc.wvu.edu/ot

**Degree Requirements**

Minimum grade of C required in all courses.

Minimum GPA of 3.0 required.

**PROGRAM TIME FRAME**

Students must complete all didactic coursework and Level II Fieldworks within a period of five years after commencing the occupational therapy program. Furthermore, all Level II Fieldwork must be completed within eighteen months following completion of academic coursework while remaining within the five-year time frame.

**Major Learning Goals**

**OCCUPATIONAL THERAPY**

The following learning goals that reflect the threads of WVU OT Program curriculum, which include rural healthcare, neuro-rehabilitation, evidence-based practice, professional advocacy, and occupation-based practice, have been established:

1. Students will demonstrate the ability to frame issues and problems of human occupation that are consistent with and reflective of current frames of reference, theoretical models, and approaches within the profession of Occupational Therapy.

2. Students will demonstrate an appreciation for and understanding of the value of professional advocacy and promotion of the profession of Occupational Therapy.

3. Students will demonstrate competence in addressing the distinctive issues associated with treatment of clients with acute and chronic neurological diseases or trauma.

4. Students will be able to identify and address unique issues related to providing OT services to individuals in a rural setting.

5. Students will demonstrate entry-level competence in areas of evaluation, treatment, communication, critical reasoning, and leadership upon graduation.

6. Students will complete all academic and fieldwork requirements within the required program time frame.

7. Students will ultimately pass the national certification exam which serves as the basis for licensure in most states.

**Pathologists Assistant**

pa-info@hsc.wvu.edu

Michelle Costas, MHS, PA (ASCP), Program Director

Justin Falcon, MHS, PA (ASCP), Clinical Coordinator

Beth Ann McCormick, Program Specialist

**Degree Offered**

- Master of Health Science
The Profession

A pathologists' assistant is a healthcare professional who is qualified through academic and practical training to provide services in anatomic pathology under the direction of a qualified pathologist. Pathologists' assistants serve as physician-extenders in the same manner as physicians' assistants. The addition of pathologists' assistants to the pathology team can reduce cost, increase revenue, and improve workflow in the anatomic pathology lab. In practice, pathologists' assistants (PAs) are responsible for the processing of the surgical pathology specimen from receipt to dissection and description to submission of tissue to histology. In autopsy practice, the PA is involved in reviewing the medical record of the decedent, eversion, dissection, and selection of tissue for submission to histology as well as formulation of a preliminary anatomic diagnosis and autopsy report under the direction of a pathologist. Many PAs are involved in laboratory management, teaching at the university-level, training of residents and medical students, forensic investigation, or research.

Nature of Program

The graduate program for pathologists' assistants began in January 2008 and is administered by the School of Medicine. Students are admitted into the Master of Health Science program after earning a baccalaureate degree from a regionally accredited college or university. Students with a cumulative grade point average of 3.25 or higher in the B.S. degree program in Medical Laboratory Science at West Virginia University may be provisionally admitted directly into the pathologists' assistant program at the end of their junior year.

This program is a twenty-four month master's-level program that prepares graduates as allied health professionals for careers as pathologists' assistants. During the second year, the student receives both didactic instruction and practical experience. Students receive practical experience at several of the program's affiliated medical laboratories including the following:

- West Virginia University Hospital - Ruby Memorial and Medical Examiner's Office, Morgantown, WV
- WVU-East, Martinsburg, WV
- Allegheny General Hospital, Pittsburgh, PA
- UPMC Health System including Presbyterian, Shadyside and Children's Hospitals, Pittsburgh, PA
- Thomas Memorial Hospital, Charleston, WV
- St. Clair Hospital, Pittsburgh, PA
- Conemaugh Memorial Medical Center, Johnstown, PA
- Butler Health System, Butler, PA

The WVU pathologists' assistant program is accredited by the National Accrediting Agency for Clinical Laboratory Sciences (NAACLS), 8410 W. Bryn Mawr Avenue, Suite 670, Chicago, IL 60631-3415, (773) 714-8880.

Graduates are eligible for certification by the Board of Certification of the American Society for Clinical Pathology (ASCP).

Pathologists' Assistant Program Essential Functions

In accordance with Section 304 of the 1973 Vocational Rehabilitation Act, the West Virginia University Pathologists' Assistant program has adopted minimum technical standards for assessment of all applicants.

Because the master's degree in health science/pathologists' assistant signifies that the holder has obtained minimum competencies in all areas of the anatomic pathology laboratories, it follows that graduates must have the knowledge and skills to function in a wide variety of laboratory situations and to perform a wide variety of procedures.

1. Candidates for the master's degree in health science/pathologists' assistant must have somatic sensation (sense of touch) and the functional use of the senses of vision and hearing.
2. Candidates' diagnostic skills will also be lessened without the functional use of the sense of equilibrium, smell, and taste.
3. Additionally, they must have sufficient motor function to permit them to carry out the activities described in the sections that follow.
4. They must be able to consistently, quickly, and accurately integrate all information received by whatever sense(s) employed, and they must have the intellectual ability to learn, integrate, analyze, and synthesize data.
5. A candidate for the master's degree in health science/pathologists' assistant must have abilities and skills which include observation, communication, motor, conceptual, integrative, quantitative, behavioral, and social. Technological compensation can be made for some disabilities in certain areas, but a candidate should be able to perform in a reasonably independent manner. The use of a trained intermediary means that a candidate's judgment must be mediated by someone else's power of selection and observation.
6. Observation: The candidate must be able to observe demonstrations, procedures, and instruments in the basic sciences and clinical courses. Observation necessitates the functional use of the sense of vision and somatic sensation. It is enhanced by the functional use of the sense of smell.
7. Communication: A candidate should be able to speak, hear, and observe people in order to elicit information and perceive nonverbal communications. A candidate must be able to communicate effectively and efficiently in oral and written form with members of the health care team.
8. Motor: Candidates should have sufficient motor function to perform laboratory procedures. This action requires the coordination of both gross and fine muscular movements, equilibrium, and functional use of the senses of touch and vision.
9. **Intellectual—conceptual, integrative, and quantitative abilities**: These abilities include measurement, calculation, reasoning, analysis, and synthesis. Problem-solving requires all of these intellectual abilities. In addition, the candidate should be able to comprehend three-dimensional relationships and to understand spatial relationships of structures.

10. **Behavioral and Social Attributes**: A candidate must possess the emotional health required for full utilization of his/her judgment, the prompt completion of all responsibilities, and the development of mature, sensitive relationships with patients and coworkers.

Candidates must be able to tolerate physically taxing workloads and to function effectively under stress. They must be able to adapt to changing environments, to display flexibility, and to learn to function in the face of uncertainties. Compassion, integrity, concern for others, interpersonal skills, interest, and motivation are all personal qualities that should be assessed during admissions and education process. In its evaluation of applicants to the West Virginia University Pathologists’ Assistant program, the Admissions Committee will approach each applicant with the following questions in mind.

When an applicant does not meet a non-academic standard as defined above, and when this would, in the professional judgment of the committee, not satisfy the pathologists’ assistant objectives for the student in performing laboratory procedures, education, and research, such opinion will be documented by the Admissions Committee.

The questions are not designed to disqualify an applicant but rather to give the Admissions Committee more complete information about an applicant’s ability to meet the following nonacademic standards:

1. Is the candidate able to observe demonstrations and perform procedures in the basic sciences and clinical courses?
2. Is the candidate able to analyze, synthesize, solve problems, and make judgments about results obtained on patient specimens?
3. Does the candidate have sufficient use of the senses of vision, hearing, and somatic sensation necessary to perform the indicated laboratory procedures?
4. Can the candidate reasonably be expected to communicate the results of laboratory tests to other members of the healthcare team with accuracy, clarity, and efficiency?
5. Can the candidate reasonably be expected to learn and perform laboratory tests and operate instruments?
6. Can the candidate reasonably be expected to display good judgment in the analysis of procedure results?
7. Can the candidate reasonably be expected to accept criticism and respond by appropriate modification of behavior?
8. Can the candidate reasonably be expected to possess the perseverance, diligence, and consistency to complete the pathologists’ assistant program and to become a practicing pathologists’ assistant?

---

**FACULTY**

**Admission to the Pathologists’ Assistant Program**

All students seeking admission to the Master of Health Science, Pathologists’ Assistant program must meet the following admissions requirements:

- Hold an earned baccalaureate degree from a regionally accredited institution of higher education
- Successfully complete the specific prerequisite coursework in mathematics and sciences
- A GPA (cumulative and pre-requisite courses) of at least 3.0 on a 4.0 scale is preferred
- Submit two letters of recommendation (electronic submission only as part of the application process)
- Complete a shadowing experience with a certified PA in Pathology or have equivalent work experience
• Complete an interview with the Admissions Committee
• Submit an electronic admissions packet including the application form, personal statement, essential functions form, shadowing statement, and official transcripts from all colleges and universities attended (Paper admissions application forms are not accepted, except for Direct Admit candidates from the WVU MLS programs.)

**Shadowing or Work Experience**

Applicants must complete a shadowing experience with a practicing pathologists’ assistant or have applicable work experience in surgical or autopsy pathology. A statement regarding this experience is required in the application packet. Please contact the program director for assistance if necessary.

**Admissions Classifications**

Students must have a baccalaureate degree prior to beginning the professional sequence. However, the program has established the following admissions classifications:

- Direct Admit: a limited number of students completing the bachelor of science program in medical laboratory science with an emphasis in either clinical laboratory science or histotechnology who have a cumulative GPA of 3.25 may apply to the Master of Health Science, Pathologists’ Assistant Program at the end of their junior year. These students will be admitted into the program after completing the B.S. in Medical Laboratory Science at West Virginia University.
- Regular Decision: a student applies in the admission cycle during their senior year.

Typically, applications will be submitted in the application period which extends from January 1 to May 31 of the senior year. Admission is contingent upon satisfactory completion of the baccalaureate degree.

**Performance Standards**

Students are required to maintain a semester GPA of 3.0 to progress in the first and second year of the professional program.

**Application Procedure**

Each year, the pathologists’ assistant program selects a limited number of students from the applications received for admission. Applications for admission to the program are available between January 1 and May 31 for the class beginning the following January. The application fee is sixty dollars. Each applicant must arrange for transcripts to be sent directly from all undergraduate institutions attended to the Office of Admissions. When the application is complete, the file is sent to the Pathologists’ Assistant Admissions Committee. A complete admissions packet contains the following: completed application form and personal statement, official transcripts, two references, and the essential functions form. Please note that the Office of Admissions does not handle reference letters. Each application requires two letters of reference (one from a professor and one from a laboratory professional with whom you have worked). An interview will be granted to qualified applicants after a review of the application packets.

GRADUATION REQUIREMENTS

Students are required to maintain an overall GPA of at least 3.0 as a graduate student while enrolled in the pathologists' assistant program. A minimum 3.0 GPA is required to graduate from the program.

Major Learning Goals

PATHOLOGIST'S ASSISTANT

The mission of the program for the Pathologists' Assistant at West Virginia University is to provide a high quality educational experience leading to a Master's Degree in Health Science as a Pathologists' Assistant. This degree prepares Pathologists' Assistants for their integral role as a member of a healthcare team.

Program Goals:

- Provide a program for Pathologists' Assistants which meets the academic standards of West Virginia University.
- Offer high quality, skilled graduates for a variety of health care settings in both surgical pathology and autopsy services.
- Provide an educational background which enables graduates to assume teaching and supervisory roles in pathology and medical laboratories.

Physical Therapy

Degree Offered

- Doctor of Physical Therapy (D.P.T.)

Nature of Program

The WVU Division of Physical Therapy was established in 1970 under the auspices of the School of Medicine to help meet the need for physical therapists in West Virginia. The program became an entry-level doctoral degree program in Fall 2005. The program is accredited by the Commission
on Accreditation in Physical Therapy Education, a specialized body recognized by the Council on Postsecondary Accreditation. The most recent accreditation was awarded in November of 2011 for ten years. Forty full-time students are admitted in a typical annual admissions cycle. Preference is given to West Virginia residents and non-residents who have attended a West Virginia college or university or who have ties to West Virginia. All other non-residents who meet program requirements will also be considered for admission.

Students admitted into the program complete three years of combined classroom, laboratory, and clinical education, and part-time and full-time supervised clinical practice in various clinics in West Virginia and other states. A doctor of physical therapy (D.P.T.) degree is awarded upon completion of the program which entitles the graduate to apply for examination for state licensure. A license to practice physical therapy is required by all states.

The Profession of Physical Therapy

Physical therapy is a hands-on health care profession that promotes optimal health and function through the application of scientific principles to prevent, identify, assess, correct, or alleviate acute or prolonged movement dysfunction. The goal of physical therapy is to help individuals fully participate in all societal roles according to their capabilities.

Demand for physical therapy services is expected to continue over the next ten years. The demand for physical therapists in all practice settings is affected by such factors as an aging population and increased emphasis on a healthy, active lifestyle. The professional organization represents therapists on healthcare issues and is working hard to assure that physical therapy will continue to be a favorable career choice.

Physical therapists are respected members of the healthcare team. They work with other healthcare providers such as physicians, occupational therapists, rehabilitation nurses, psychologists, social workers, dentists, podiatrists, speech pathologists and audiologists. Physical therapists work in hospitals, private physical therapy offices, community health centers, corporate or industrial health centers, sports facilities, research institutions, rehabilitation centers, nursing homes, home health agencies, schools, pediatric centers, and colleges and universities.

Some physical therapists work as employees in these settings, while others are self-employed as owners or partners in private practices. Settings, employment arrangements, career responsibilities, and career opportunities depend on the interests and skills of each practitioner.

• Corrie Mancinelli - PT, PhD, GCS (West Virginia University)
  orthopedics and geriatrics
• Anne Swisher - CCS, Ph.D. (West Virginia University)
  Director of Faculty Development & Scholarship
  Director of Clinical Education
• Ralph Utzman - PT, MPH, PhD (Virginia Commonwealth University)
  Director of Clinical Education

ASSISTANT PROFESSORS
• Megan Burkart - DPT (West Virginia University)
  oncology PT
• Yu-Jen Chang - PT, PhD (University of Southern California)
  musculoskeletal, research, prosthetics and orthotics
• Kimeran Evans - D.P.T. (Virginia Commonwealth University)
  Clinical Education, General Physical Therapy Practice
• Valeriya Gritsenko - Ph.D. (University of Alberta, Edmonton, AB, Canada)
  Neurosciences, Motor Control
• Kristin Phillips - DPT, WCS (University of Pittsburgh)
  women's health
• Teresa Rice - NCS, MPH. (West Virginia University)
  Neurorehabilitation
• Carol Waggy - CHT, Ph.D. (West Virginia University)
The Admissions Process

Courses recommended for high school students in preparation for the preparatory and professional physical therapy program include, but are not limited to, biological sciences (e.g. anatomy, advanced biology, physiology, etc.), chemistry, algebra/trigonometry and/or pre-calculus, physics, and social sciences. Computer literacy is highly recommended.

Because individualized instruction in laboratories and clinics is an essential component of the professional physical therapy program, enrollment must be limited. The physical therapy program selects forty students per year for entrance into the professional phase of the program. All students who wish to enter the program must apply for admission, must have a bachelor’s degree, and have completed or be enrolled in the prerequisite coursework detailed below. These courses are available at most colleges.

The following requirements must be met to apply to the WVU Division of Physical Therapy:

- Applicant must have a minimum cumulative GPA of 3.0. Applicant must have a minimum prerequisite GPA of 3.0 which includes two general biology courses, two chemistry courses, two physics courses, statistics, human anatomy, and human physiology.
- Applicants must have a minimum of sixty hours of clinical volunteer or work experience obtained from two different physical therapy settings. Though these hours may be obtained during high school and college, some volunteer hours obtained during the junior or senior college years is strongly recommended.
- Applicants must submit three letters of recommendation. Two letters must be from physical therapists with whom the student has worked or volunteered. These letters must be from licensed physical therapists; the Admissions Committee will not consider letters from non-physical therapists or relatives. The third letter must be from a professor in their undergraduate major.

The form for the letters of recommendation is available with the electronic application.

- Applicant must take the Graduate Record Examination (GRE). No minimum score is required. Please note the Institution Code for reporting is 7639, which is different from the code used for other programs at WVU. Using this code will result in your official scores being sent to PTCAS, who will verify your scores and send them to WVUPT.
- Applicant must have a minimum grade of C in each prerequisite course.
- Applicant must have completed or be enrolled in the required courses listed below:

<table>
<thead>
<tr>
<th>Pre-requisite Courses</th>
<th>WVU Course Number</th>
</tr>
</thead>
<tbody>
<tr>
<td>Biology with lab (8 hours)</td>
<td>BIOL101/103, 102/104</td>
</tr>
<tr>
<td>Chemistry with lab (8 hours)</td>
<td>CHEM 115, 116</td>
</tr>
<tr>
<td>Physics with lab (8 hours)</td>
<td>PHYS 101, 102</td>
</tr>
<tr>
<td>General psychology (3 hours)</td>
<td>PSYC 101</td>
</tr>
<tr>
<td>Developmental psychology (3 hours), should include development across the human lifespan</td>
<td>PSYC 241</td>
</tr>
<tr>
<td>Introductory statistics (3 hours), must include descriptive and inferential statistics</td>
<td>STAT 211 or ECON 225</td>
</tr>
<tr>
<td>Human anatomy (3 hours)*</td>
<td>ATTR 219 (recommended) or NBAN 205</td>
</tr>
<tr>
<td>Human physiology (3 hours)**</td>
<td>PSIO 241 or PSIO 441</td>
</tr>
</tbody>
</table>

* The anatomy courses included in the DPT curriculum are extremely rigorous. Students should seek out the highest level anatomy course(s) available. The minimum prerequisite is a three-credit-hour course in human anatomy, ideally with a laboratory. A two semester, eight-credit sequence of combined human anatomy and physiology may be accepted; however, comparative and animal anatomy does not count towards this pre-requisite.

** Human physiology course with laboratory is preferred. A two-semester, eight-credit sequence of combined human anatomy and physiology may be accepted; however, animal or biology will not count towards this pre-requisite.

It is recommended that prerequisite courses in human anatomy and human physiology be completed within two years prior to admission.

WVU maintains an online Course Equivalency System (CES) (http://admissions.wvu.edu/admissions/university-requirements/transfer_equivalency) that lists course equivalencies at many institutions in the state/region.

Applicants who complete any of their prerequisites outside of WVU should check the CES to see if each prerequisite course transfers directly to WVU as the required WVU course. If your undergraduate institution is not listed in the CES, or if you have taken prerequisite courses that transfer in as
open credit or not equivalent, you must submit a photocopy of the catalog description of the courses in question. Upon receiving your application, the Admissions Committee may request that you submit a copy of the course syllabus for further review.

Baccalaureate Preparation

Applicants must have earned a baccalaureate degree or plan on completing a baccalaureate degree by May of the year of entering the program. Students may apply with a number of different baccalaureate degrees; however, they must complete the prerequisites for the physical therapy program as described no later than the spring semester of the year of application.

Students who want careers in healthcare may find that physical therapy fulfills their goals. A recommended baccalaureate preparation is in the field of exercise physiology. At WVU, exercise physiology majors will be able to obtain all of the prerequisites listed above during their course of study. Another common baccalaureate major may be biology. As discussed above, these are merely suggestions and students can apply from any institution of higher education with any degree background as long as they meet the aforementioned prerequisites.

Additional Information and Updates

For updates, be sure to periodically check the WVU Division of Physical Therapy website at http://medicine.hsc.wvu.edu/pt. You may also contact the Program Manager for the Physical Therapy Program, Brenda Wolfe, at bwolfe@hsc.wvu.edu.

Applications

The physical therapy program participates in the national electronic physical therapy standard application system, known as PTCAS (Physical Therapist Centralized Application Service). The website for PTCAS is http://www.ptcas.org. Typically, PTCAS opens for applications in mid-July. Well qualified applicants who consider WVU their first choice professional DPT program can apply for early decision through PTCAS in late summer. They would be notified of acceptance in September and if they accept a place in the class the decision is binding and the student cannot consider offers from other programs. The deadline for all other applications is December 1st of the year before entry. Applicants should receive initial communication regarding their application within thirty-five days of the deadline. Please check the program website frequently for any updates on deadlines or the admissions process. These are often adjusted on an annual basis.

NOTE: The DPT Admissions Committee is considering interviewing students applying during the 2017-2018 admissions cycle. Applicants should consult the program website for more information.

Physical Therapy (PT)

Course information for the doctor of physical therapy degree can be found on the following website: http://medicine.hsc.wvu.edu/pt.

The professional curriculum begins in summer before first year. Students should plan for these courses to begin on or around June 1st.

**Major Learning Goals**

**PHYSICAL THERAPY**

This program is designed to educate individuals with the knowledge, skills, and behaviors consistent with professional excellence. Working as part of a community of professionals, the program strives to advance practice characterized by independence, professional judgment, and involvement.

Graduates will:

- Demonstrate basic and applied knowledge necessary to practice PT as a member of the health care team in diverse settings
- Demonstrate the ability to make sound clinical decisions using information literacy skills, critical thinking, and scientific evidence
- Find employment with special emphasis on recruitment and retention of graduates in WV
- Adhere to core professional values
- Demonstrate the ability to practice independently
- Adhere to legal and ethical standards
- Demonstrate a life-long commitment to the profession by activity in professional organizations, scholarship, education, and advocacy
- Deliver high quality physical therapy services to individuals and communities across a continuum of care, including rural settings.
- Demonstrate sound, independent clinical decisions utilizing information literacy, critical thinking skills, and scientific evidence
- Function as a unique member of the health care team, including receiving and providing appropriate referrals
- Provide culturally sensitive care distinguished by advocacy, trust, respect, and an appreciation for individual differences
- Demonstrate a commitment to the health of the community through participation in primary and secondary prevention programs
- Actively engage in local and professional advocacy in a changing health care environment
Nursing

Degrees Offered

- Bachelor of Science in Nursing
- Master of Science in Nursing Executive Focus/MBA
- Bachelor of Science in Nursing to Doctor of Nursing Practice
- Doctor of Nursing Practice
- Doctor of Philosophy in Nursing

Introduction

The mission of the WVU School of Nursing is to lead in improving health in West Virginia and the broader society through excellence in student-centered educational programs, research and scholarship, the compassionate practice of nursing, and service to the public and the profession. This mission is responsive to changing healthcare needs and emergent national and state changes in technology and healthcare delivery and is enhanced by a supportive and open environment. The faculty’s educational effort is directed at providing high quality, student-centered programs of instruction at all levels which prepare superb professional nurses to meet basic healthcare needs; advance practiced nurses to address complex health needs; and enable doctorally educated nurses to advance nursing knowledge through research, to assist in the formulation of policies to improve health care, and to serve as faculty in higher degree programs. Unique characteristics of the state mandate that the healthcare needs of rural populations and vulnerable groups be a major focus of education, research, and service, including faculty practice.

The School of Nursing offers undergraduate, graduate, and post graduate certificate programs of study. The baccalaureate program (BSN) is available for high school graduates who aspire to a career in nursing (basic students) and to registered nurses (RN) who are licensed graduates of associate degree or diploma nursing programs seeking to continue their career development. In addition, a BS/BA to BSN program is available for the college graduate seeking a BSN.

The WVU School of Nursing and the WVU College of Business & Economics offer a dual master's degree program to provide the skills and knowledge necessary to serve as a nurse leader. This blended degree program (totaling 67 credit hours) is done predominately online, and includes four 3-4 day residencies. Students take courses from both the MSN and MBA program concurrently. Graduates of the MSN (Executive Focus) and MBA program can work in a variety of settings, including hospitals, private practice, nonprofit organizations and public sectors.

The Bachelor of Science in Nursing to Doctor of Nursing Practice (BSN-DNP) prepares baccalaureate prepared nurses for advanced practice roles in primary care. These roles include family nurse practitioner and pediatric nurse practitioner specialties. Students are awarded the Master of Science in Nursing (MSN) degree and are eligible to sit for certification as an advanced practice nurse upon completing 48 hours of the program. At that time they may progress to the DNP or select to exit the program with the MSN degree.

Post-graduate nurse practitioner certificate programs for family nurse practitioner and pediatric nurse practitioner are available for those who already have an MSN.

The doctor of nursing practice (DNP) prepares advanced practice nurses who will practice at the highest level of professional nursing and will advance the application of nursing knowledge for the purpose of improving healthcare for diverse populations.

The doctor of philosophy in nursing (PhD) prepares nurse scholars/scientists for roles in research, teaching and service. The program prepares graduates who will contribute to the body of nursing knowledge, educate the next generation, and lead, ultimately impacting health policy, improving health, and reducing disparity.

Accreditation

Initial accreditation was received with graduation of the first class in 1964. The baccalaureate as well as advanced practice programs in nursing are fully accredited by the Commission on Collegiate Nursing Education, a national accrediting agency.

Fees, Expenses, Housing, Transportation, and Immunization

Students enrolling at the Morgantown campus pay fees which are detailed at http://admissions.wvu.edu/pay. Special fees and deposits are also required. Students enrolling at other sites pay the fees shown in the catalog for that site. Fees are subject to change without notice. Students’ expenses vary according to the course of study and individual needs. Information concerning financial assistance, application forms, and the Free Application for Federal Student Aid (FAFSA) form may be obtained from the financial aid website at http://financialaid.wvu.edu/home/hsc-office or by contacting the HSC Financial Aid Office, PO Box 9810, Morgantown, WV 26506-9810; telephone (304) 293-3706 (toll free) or 1-800-344-WVU1.

The University Housing and Residence Life Office, telephone (304) 293-4491, provides information concerning university-owned housing. The Student Life Office in E. Moore Hall, telephone (304) 293-5611, provides information concerning privately owned, off-campus housing.
Students are expected to provide their own transportation, equipment, and instruments for the clinical courses. Some clinical experiences require travel in a multi-county area.

Proof of specific immunizations is required for all health sciences students. Students in the BSN, BA/BS to BSN, BSN-DNP, and Post graduate certificate master of science in nursing program must undergo a criminal background check prior to clinical courses. Felony convictions and serious misdemeanors may preclude participation in the clinical courses. This could, in turn, prevent the completion of course requirements and completion of the nursing program.

Scholarships

The School of Nursing offers several scholarships. These scholarships are administered by the Health Science Center Financial Aid Office and require completion of the Free Application for Federal Student Aid (FAFSA) form in order to be considered for financial aid. Most School of Nursing scholarships are available only to students already admitted to the School of Nursing and are awarded each April for the following academic year. However, there are a limited number of scholarships for which students may apply before admission. Further information is provided on the School of Nursing website: http://nursing.hsc.wvu.edu/academics/current-students/.

Additional Information

Visit the School of Nursing website at http://nursing.hsc.wvu.edu/. Call the WVU school of Nursing Office of Student Services at 1-866-WVUNURS or (304) 293-1386. Write to WVU School of Nursing at PO Box 9600, Morgantown, WV 26506-9600

- Crystal Sheaves - PhD (West Virginia University)
- Melanie Whelan - PhD (West Virginia University)

CHARLESTON DIVISION-LECTURER

- Nancy Atkins - MSN (Bellarmine College)
- Tracie Boner - MSN (West Virginia University)
- Barbara Koster - MSN (West Virginia University)

WVU TECH DIVISION-ASSISTANT PROFESSOR

- Peggy Fink - PhD (West Virginia University)

WVU TECH DIVISION-SENIOR LECTURER

- Amy Bruce - MSN (Marshall University)
- Barbara Douglas - MSN (Wright State University)
- Mindy Harris - MSN (Marshall University)
• James Messer - MSN (University of Phoenix)
• Robin Spencer - MSN (Marshall University)
• Melinda Stoecklin - MSN (Marshall University)

WVU TECH DIVISION-LECTURER
• Kelly Morton - BSN (West Virginia Tech)
• Hillary Parcell - MSN (Marshall University)

DEAN EMERITUS
• Lorita Jenab - EdD (Columbia University)
• E. Jane Martin - PhD (University of Pittsburgh)

PROFESSOR EMERITUS
• Laurie Badzek - MSN,JD (DePaul University)
• Susan Coyle - PhD (West Virginia University)
• June Larrabee - PhD (University of Tennessee)
• Nan Leslie - Ph.D. (University of Utah)
• Gaynelle McKinney - MSN,ED (Indiana University)
• Georgia Narsavage - PhD (University of Pennsylvania)
• Barbara Nunley - PhD (University of Kentucky)

ASSOCIATE PROFESSOR EMERITUS
• Peggy Burkhardt - PhD (University of Miami)
  Charleston Division
• Imogene P. Foster - EdD (West Virginia University)
• Debra Harr - EdD (West Virginia University)
• Jean Hoff - MPH (University of Pittsburgh)
• Nancy A. Koontz - MSN (University of Maryland)
• Barbara Kupchak - PhD (University of Texas)
• Lois O’Kelley - MSN (Wayne State University)
• C. Lynn Ostrow - EdD (West Virginia University)
• Elisabeth Shelton - PhD (Widener University)
• Jane A. Shrewsbury - MN,ED (University of Pittsburgh)
• Patricia Simoni - EdD (West Virginia University)

ASSISTANT PROFESSOR EMERITUS
• Ann Cleveland - EdD (West Virginia University)
• Suzanne Gross - PhD (University of Texas)
• Dorothy Johnson - EdD (West Virginia University)
• Kathleen Marsland - MS (University of Colorado)

Degree Designation Learning Goals

MASTER OF SCIENCE IN NURSING EXECUTIVE FOCUS/MBA

Upon successful completion of the program, the graduate will:

• Synthesize theories, research findings, and broad-based perspectives for application in the advanced practice of nursing or nursing leadership:
  1. Integrate nursing and related sciences into the delivery of advanced nursing care to diverse populations.
  2. Synthesize evidence for practice to determine appropriate application of interventions across diverse populations.
  3. Utilize nursing and related science evidence to analyze, design, implement and evaluate nursing care delivery systems.

• Utilize systematic inquiry and refined analytical skills in the provision of health care services and leadership:
  1. Integrate organizational science and informatics to make changes in the care environment to improve health outcomes.
  2. Assume a leadership role in the management of human, fiscal, and physical healthcare resources.
  3. Critically appraise existing literature to identify best practices, apply knowledge to improve and facilitate systems of care in order to improve patient outcomes.
4. Disseminate results through translational scholarship.

- Demonstrate safe, effective assessment, planning, implementation and evaluation skills in managing the care of individuals and groups while working in interprofessional collaborative relationships.
  1. Create a relationship with clients and healthcare organizations that builds and maintains a supportive and caring partnership.
  2. Analyze best practice evidence to implement effective quality improvement initiatives with measurable results.
  3. Advocates for patients, families, caregivers, communities and members of the healthcare team.

- Articulate viewpoints and positions in order to improve the quality of health care delivery and outcomes of successful care.
  1. Assume a leadership role in effectively implementing patient safety and quality improvement initiatives within the context of the interprofessional team using effective communication skills.
  2. Examine the effect of legal and regulatory processes on nursing practice, healthcare delivery, and outcomes.
  3. Use ethical decision making to promote the well-being of individuals, families, and health care professionals in local, national & international communities.

- Consults and collaborates in interdisciplinary and interagency endeavors to advance culturally sensitive health care to clients, families, groups, and communities:
  1. Synthesize broad ecological, global and social determinants of health; principles of genetics and genomics; and epidemiologic data to design and deliver evidence-based, culturally relevant clinical preventions interventions and strategies.
  2. Integrates prior and current learning as a basis for growth and accountability in enacting the role of advanced practice nurse or nurse leader:
    1. Advocate for patients, families, caregivers, communities, and members of the healthcare team.
    2. Use information and communication technologies to advance patient education, enhance accessibility of care, analyze practice patterns, and improve health care outcomes, including nurse sensitive outcomes.
    3. Value life-long learning and continued professional development.

- Assume a leadership role in advocacy, ethical issues, and health care policy development:
  1. Apply leadership skills and decision making in the provision of culturally responsive, high-quality nursing care, healthcare team coordination, and the oversight and accountability for care delivery and outcomes.
  2. Function as a leader and change agent in nursing and in health care delivery systems particularly to insure quality care for vulnerable and underserved populations.
  3. Demonstrates organizational and systems leadership that continually improves health outcomes and ensures patient safety.

- Integrates all the functional areas of business into management decisions in a global environment.
  1. Evaluate factors that influence the competitive behavior of the firm.
  2. Predict and anticipate company and market responses to external factors.
  3. Identify the risks and opportunities in global markets.

- Identify problems, collect appropriate data and analyze the data to make informed management decisions.
  1. Evaluate business reports to make meaningful decisions for the organization.
  3. Take real world problems and express them in quantitative terms.

- Make management decisions in an ethically sensitive and socially responsible manner.
  1. Negotiate and control information ethically to meet organizational needs.
  2. Understand how to use and acquire information in an ethically sensitive manner.
  3. Synthesize various ethical theories and design a corporate code of ethics.

- Be effective team members in a virtual environment.
  1. Demonstrate the ability to work together in a supportive and effective manner.

- Be an effective leader who influences people towards the attainment of organizational goals.
  1. Recommend actions for leader effectiveness in a scenario case and apply a theory or framework to propose and defend their recommendations.
  2. Identify various leadership styles and their relative effectiveness, along with real-life examples.
  3. Evaluate, in a case setting, the processes through which goals are set and accomplished in organizations.
BACHELOR OF SCIENCE IN NURSING TO DOCTOR OF NURSING PRACTICE (BSN-DNP) AND DOCTOR OF NURSING PRACTICE (DNP)

At the completion of the program, the graduate will be able to:

- Use disciplined reasoning, science-based theories, and concepts from sciences and humanities to:
  1. Determine the nature and significance of health and health care delivery phenomena.
  2. Describe actions and advance strategies to improve healthcare delivery, to diverse populations.
  3. Develop, deliver, and evaluate theory-based health care.
  4. Analyze nursing history to expand thinking and provide a sense of professional heritage and identity

- Demonstrate organizational and systems leadership that:
  1. Emphasizes clinical practice.
  2. Continually improves health outcomes.
  3. Ensures patient safety.

- Use analytical methods, evidence, and nursing science to:
  1. Critically appraise existing literature to identify and evaluate best practices and practice guidelines.
  2. Facilitate the evaluation of systems of care in order to improve patient outcomes.
  3. Serve as a practice specialist/consultant in collaborative knowledge generating research.
  4. Disseminate results through translational scholarship.

- Demonstrate proficiency and provide leadership for the integration of information systems/technology to:
  1. Support, monitor, and improve patient care, healthcare systems, clinical decision-making, nurse-sensitive outcomes, and academic settings.
  2. Support quality improvement and patient safety.

- Assume a leadership role in advocacy and health care policy development.

- Establish, participate, and lead interprofessional collaborations for improving patient, population, and systems outcomes.

- Develop, implement, and evaluate practice and healthcare delivery models for the purpose of quality improvement and improved patient outcomes considering
  1. Safety and quality.
  2. Epidemiological, bio-statistical, environmental, and other appropriate scientific data.
  3. Culturally appropriate care.
  4. Values based professional practice and behaviors.
  5. Economies of care, business principles and health policy related to individual, aggregate, and population health.

- Ensure accountability for advanced practice based on refined assessment skills, advanced communication skills, biophysical, genetic, genomic, psychosocial, sociopolitical, economic, ethical, and cultural principles.

- Practice and provide services for populations with in the area of advanced nursing specialization.

DOCTOR OF PHILOSOPHY (PHD)

Upon successful completion of the PhD program, the PhD graduate will:

The purpose of the PhD program is to prepare nurse scholars/scientists for roles in research, teaching, and service. The program prepares graduates who will contribute to the body of nursing knowledge, educate the next generation, and assume collaborative leadership roles in shaping health policy, improving health, and reducing disparity.

The goals of the program are to prepare graduates who will:

1. Rigorously test, generate, and extend knowledge to inform nursing science, practice, and policy.
2. Contribute to the development of knowledge and interventions to address health disparity and promote or improve health.
3. Assume collaborative leadership roles in academia, health organizations, research teams, and scholarly networks.
4. Demonstrate expertise within an area of study that incorporates nursing and trans disciplinary perspectives.

School of Nursing Academic Progression Standards

BSN-DNP/DNP

1. An overall academic grade point average (GPA) of at least 3.0 in all work attempted in the DNP Program.
2. A student may earn only one C grade in a nursing course. A second C in a nursing course will result in dismissal from the program. A grade of D or F in any course results in dismissal from the program.

3. Maintain a 3.0 GPA. A student who falls below the 3.0 GPA on nine or more credit hours has one semester to bring up the GPA to the 3.0 requirement.

4. Only one nursing course may be repeated, and only one time.

5. All required courses must be taken for letter grades (A, B, C).

**PHD**

1. Nursing courses are taken in the sequence specified in the School of Nursing PhD Progression Plan. All prerequisites from preceding semesters must be completed prior to registration for new courses.

2. Students must maintain a 3.0 GPA to progress in the program and must achieve an overall academic GPA of 3.0 in all coursework applied to the PhD degree.

3. Students may carry forward one C grade in any course to be applied to the PhD degree. A second C will result in dismissal from the program.

4. Students with a grade of D or F in any course will be dismissed from the program.

5. The grade of "I" is given when the instructor believes that the coursework is unavoidably incomplete or that a supplementary examination is justifiable. Resolution of the grade of "I" will occur in the semester following its issuance and before any graduate degree can be awarded. If the "I" grade is not removed within the following semester, the grade of "I" is converted to an "F" (failure). When an "I" grade is replaced, the grade point average is recalculated on the basis of the new grade.

**BSN to DNP Online Program**

**Program Description**

The West Virginia University School of Nursing Post-Bachelor of Science to Doctor of Nursing Practice (DNP) Program prepares nurses to practice at the highest level of professional nursing. Graduates of the DNP program advance the application of nursing knowledge through the translation and implementation of evidence for practice to improve health outcomes for diverse populations.

All students will be awarded a Master’s Degree in Nursing and are able to sit for the advanced practice certification exam after successfully completing the required 48 hours of course work. Students may then continue on to acquire the DNP degree for an additional 14 credits, or may exit the program once receiving the MSN degree. The time to completion of the DNP program varies depending on the length of the capstone (final) project.

The student plan of study for the BSN-DNP degree requires 1000 post baccalaureate hours of clinical immersion, which can include previous precepted Master’s level clinical courses, with a minimum of 300 immersion hours to be earned at the DNP level.

The program includes a Final Project. According to the American Association of Colleges of Nursing (AACN), doctoral education is distinguished by the completion of a specific project that demonstrates synthesis of the student’s work and lays the groundwork for future clinical scholarly work directed at improving health or organizational outcomes in the area of focus. The Post-BSN-DNP curriculum primarily involves mastery of an advanced specialty within nursing practice and methods of practice improvement and change. The DNP Final Project is used to demonstrate mastery of the Post-BSN-DNP curriculum content. Guided by faculty, and with assistance of an expert in the area of interest, the DNP Final project demonstrates the student’s ability to identify a practice or system related problem through clinical immersion, to synthesize and critically appraise the evidence related to addressing that practice problem, to negotiate within the system to implement evidence based change within an organization, implement that change, and systematically measure the results of the practice or system related change initiative. The DNP Final Project documents outcomes of the student’s educational experiences, and summarizes the student’s growth in knowledge and expertise. The DNP Final Project experience serves as a foundation for leadership in future scholarly practice with the clinical setting.

The DNP prepared nurse is prepared to participate in healthcare in numerous roles including:

- clinical nurse specialist
- nurse practitioner
- nurse entrepreneur
- nurse administrator
- health care advocate

The areas of emphasis for study in advanced nursing in the curriculum are Family Nurse Practitioner (FNP) and Pediatric Nurse Practitioner (PNP). Advanced certification is a requirement for the DNP degree. Postgraduate applicants must have advanced certification. Students continuing on in the curriculum after obtaining the Master's degree must become certified by the end of the fall semester of that same year. Students continuing in the program will broaden their goals and learning objectives in the Clinical Immersion course. The immersion experience is not a repeat of the same types of experiences obtained in the Practicum 1 and 2 courses in which primary care is the focus. The immersion experience is intended to broaden clinical experience through the assessment of system level changes and the evaluation of such changes.
The program offers a curriculum that allows students to enroll on a part-time or full-time basis. Throughout the curriculum, students are guided in the process of self-development aimed at pursuing excellence in scholarly and professional endeavors. The school also offers a post-graduate certification program in these areas for those who already hold a graduate degree. Students are admitted to a specific track and progression plan. Admission to some tracks is dependent upon an adequate cohort. Changes to the track or progression plan are only allowed based on space available. If for any reason a student must leave the program, his or her ability to return to the program will be based on space available at the time of request and is not guaranteed.

The programs are offered by faculty located at the University main campus in Morgantown and at the Charleston Division. Courses are offered via web-based modalities. Students may be required to attend special on-campus sessions in Morgantown or Charleston for the Advanced Assessment workshops and proficiency exams. During semesters involving nursing practice hours, monthly meetings are held on-line. Dates of the special sessions are made available by faculty in charge of the course in advance so students can plan their schedules in order to attend. Special sessions for PNP students are held in Morgantown only. The DNP final project proposal and defense take place on either campus depending on the preference of the committee chair.

Graduate students are strongly recommended to limit their credit load if they are also involved in full-time work. It is University Policy that students employed in full-time work should enroll for no more than six hours of master's level course work in any one term.

Admissions Criteria

1. Satisfy WVU requirements for admission to graduate study
2. Degree of Bachelor of Science in Nursing from a nationally accredited nursing program
3. Have a minimum nursing grade-point average of 3.0 or higher on a 4.0 scale, and a cumulative GPA of at least 3.0 on a 4.0 scale on all college work attempted
4. Have a current, unrestricted RN license in at least one state
5. Completion of 3 credits of undergraduate statistics equivalent to WVU Stat 211 and 3 credits of health assessment with a grade of C or better

Note: Admission criteria are subject to change. Please see the School of Nursing website for the most up-to-date criteria at http://nursing.hsc.wvu.edu.

Application Process

The application process should be completed by February 1. The beginning sequence of courses in the BSN-DNP program starts in the summer semester only. Applicants to the BSN-DNP program need to complete the following steps in order to be considered for admission:

Complete two application forms as indicated below and return to the appropriate offices by the deadline.

1. Application for Admission to Graduate Studies (available at: https://app.applyyourself.com/AYApplicantLogin/fl_ApplicantConnectLogin.asp?id=wvugrad)
2. Supplemental Application for admission to BSN-DNP in the School of Nursing (available on the School of Nursing website at: http://www.nursing.hsc.wvu.edu/) submitted electronically
3. Request an official transcript of records from each college or university attended. Transcripts should be sent directly to WVU Office of Admissions, P.O. Box 6009, Morgantown, WV 26506-6009.
4. Three letters of reference should address the applicant’s expertise in the advanced practice of nursing and likelihood for success in doctoral work. One letter should be from a former professor of the applicant.
5. Submit a current curriculum vitae.
6. Submit a professional writing sample using the instructions provided on our website.

For more information, visit the website at http://nursing.hsc.wvu.edu, write to West Virginia University School of Nursing, P.O. Box 9600, Morgantown, WV 26506-9600; or call (304) 293-1386.

Note: Application criteria are subject to change. Please see the School of Nursing website for the most up-to-date criteria at http://nursing.hsc.wvu.edu.

**Progression Standards**

In order to progress in the MSN curriculum, a student must meet the following performance standards:

1. Carry forward only one C grade in a nursing course. A second C in a nursing course will result in dismissal from the program.
2. Maintain a 3.0 GPA. A student who falls below 3.0 on 9 or more credit hours will be placed on academic probation and has only one semester to bring up the GPA to the 3.0 requirement.
3. Repeat only one nursing course and only one time.
4. A grade of D or F in any course results in dismissal from the program.

**Major Learning Goals**

**Post Graduate Certificate Program**

The program prepares master’s prepared nurses to sit for the national certification examination in the selected area of focus. To be considered for admission, the applicant must have a master’s degree in nursing from a program accredited by NLNAC or CCNE with a minimum cumulative GPA of 3.0 or better and an unrestricted RN license in at least one state. Students in the post-master’s certificate program must maintain a 3.0 GPA and receive satisfactory clinical ratings to progress. Each student’s program will be individualized based on educational and experiential background. For those interested in a Nurse Practitioner Post-MSN certificate, prerequisites to registration for the required clinical courses in the program are evidence of competence in advanced pathophysiology, advanced pharmacotherapeutics, and advanced assessment.

Note: Admission criteria are subject to change. Please see the School of Nursing website for the most up-to-date criteria at http://nursing.hsc.wvu.edu.

The required courses for post-master’s certification are as follows:

Doctor of Nursing Practice Online Program

Program Description

The West Virginia University School of Nursing offers a post-master’s program of study leading to the Doctor of Nursing Practice (DNP) degree. Graduates of the DNP program advance the application of nursing knowledge through the translation and implementation of evidence for practice to improve health outcomes for diverse populations. This expert level practice builds on the past advanced practice education, experience, and certification.

This post-graduate program can be completed in as few as 33 credit hours. Additional clinical and capstone credits may be required to meet program objectives. The student plan of study for the DNP degree requires 1000 post baccalaureate hours of clinical immersion, which can include previous precepted Master's level clinical courses, with a minimum of 300 immersion hours to be earned at the DNP level.

The program includes a Final Project. According to the American Association of Colleges of Nursing (AACN), doctoral education is distinguished by the completion of a specific project that demonstrates synthesis of the student's work and lays the groundwork for future clinical scholarly work directed at improving health or organizational outcomes in the area of focus. The curriculum primarily involves mastery of an advanced specialty within nursing practice and methods of practice improvement and change. The DNP Final Project is used to demonstrate mastery of the DNP curriculum content. Guided by faculty, and with assistance of an expert in the area of interest, the DNP Final project demonstrates the student's ability to identify a practice or system related problem through clinical immersion, to synthesize and critically appraise the evidence related to addressing that practice problem, to negotiate within the system to implement evidence based change within an organization, implement that change, and systematically measure the results of the practice or system related change initiative. The DNP Final Project documents outcomes of the student’s educational experiences, and summarizes the student’s growth in knowledge and expertise. The DNP Final Project experience serves as a foundation for leadership in future scholarly practice with the clinical setting.

The DNP prepared nurse is prepared to participate in healthcare in numerous roles including:

- clinical nurse specialist
- nurse practitioner
- nurse entrepreneur
- nurse administrator
- health care advocate

Advanced certification is a requirement for the DNP degree. Postgraduate applicants must have advanced certification. The immersion experience is intended to broaden clinical experience through the assessment of system level changes and the evaluation of such changes.

The programs are offered by faculty located at the University main campus in Morgantown and at the Charleston Division. Courses are offered via web-based modalities. Enrollment in nursing courses is based upon readiness, availability of space and an adequate cohort of students. The DNP final project proposal and defense take place on either campus depending on the preference of the committee chair.
Graduate students are strongly recommended to limit their credit load if they are also involved in full-time work. **It is University Policy that students employed in full-time work should enroll for no more than six hours of master's level course work in any one term.**

**Admissions Criteria**

1. Satisfy WVU requirements for admission to graduate study
2. Have a master's degree with a major in nursing from a nationally accredited college or university. A master's degree in a health-related discipline will be considered on an individual basis.
3. Have a cumulative grade-point average of 3.0 or higher on a 4.0 scale on the MSN degree
4. Have a current, unrestricted RN license in at least one state
5. Hold advanced practice nursing certification from a recognized national accreditation body in a specialized area of healthcare.
6. Meet program pre-requisites including transcripted courses equivalent to WVU courses in:
   a. Advanced Pathophysiology
   b. Advanced Pharmacotherapeutics
   c. Advanced Health Assessment
   d. Research Process

Note: Admission criteria are subject to change. Please see the School of Nursing website for the most up-to-date criteria at [http://nursing.hsc.wvu.edu](http://nursing.hsc.wvu.edu).

**Application Process**

The application process should be completed by February 1. The beginning sequence of courses in the DNP program starts in the summer semester only. Applicants to the DNP program need to complete the following steps in order to be considered for admission:

Complete two application forms as indicated below and return to the appropriate offices by the deadline.

1. Application for Admission to Graduate Studies (available at: [https://app.applyyourself.com/AYApplicantLogin/fl_ApplicantConnectLogin.asp?id=wvugrad](https://app.applyyourself.com/AYApplicantLogin/fl_ApplicantConnectLogin.asp?id=wvugrad))
2. Supplemental Application for admission to DNP in the School of Nursing and DNP application checklist (available on the School of Nursing website at: [http://www.nursing.hsc.wvu.edu/](http://www.nursing.hsc.wvu.edu/)) submitted electronically
3. Request an official transcript of records from each college or university attended. Transcripts should be sent directly to WVU Office of Admissions, P.O. Box 6009, Morgantown, WV 26506-6009.
4. Three letters of reference should address the applicant's expertise in the advanced practice of nursing and likelihood for success in doctoral work. One letter should be from a former professor of the applicant.
5. Submit a current curriculum vitae.
6. Submit a professional writing sample using the instructions provided on our website.

For more information, visit the website at [http://nursing.hsc.wvu.edu](http://nursing.hsc.wvu.edu), write to West Virginia University School of Nursing, P.O. Box 9600, Morgantown, WV 26506-9600; or call (304) 293-1386.

Note: Application criteria are subject to change. Please see the School of Nursing website for the most up-to-date criteria at [http://nursing.hsc.wvu.edu](http://nursing.hsc.wvu.edu).

Total credit hours: 31

**Progression and Performance Standards**

In order to progress in the Doctor of Nursing Practice curriculum, a student must meet the following performance standards:

1. A student who falls below the 3.0 GPA on nine or more credit hours has one semester to bring up the GPA to the 3.0 requirement.
2. Only one nursing course may be repeated, and only one time.
3. A student may earn only one C grade in a nursing course. A second C in a nursing course will result in dismissal from the program. A grade of D or F in any course results in dismissal from the program.
4. All required courses must be taken for letter grades (A, B, C).

**Major Learning Goals**

**DOCTOR OF NURSING PRACTICE ONLINE PROGRAM**

- Use disciplined reasoning, science-based theories, and concepts from sciences and humanities to:
  1. Determine the nature and significance of health and health care delivery phenomena.
  2. Describe actions and advance strategies to improve healthcare delivery, to diverse populations.
  3. Develop, deliver, and evaluate theory-based health care.
  4. Analyze nursing history to expand thinking and provide a sense of professional heritage and identity.

- Demonstrate organizational and systems leadership that:
  1. Emphasizes clinical practice.
  2. Continually improves health outcomes.
3. Ensures patient safety.

- Use analytical methods, evidence, and nursing science to:
  1. Critically appraise existing literature to identify and evaluate best practices and practice guidelines.
  2. Facilitate the evaluation of systems of care in order to improve patient outcomes.
  3. Serve as a practice specialist/consultant in collaborative knowledge generating research.
  4. Disseminate results through translational scholarship.

- Demonstrate proficiency and provide leadership for the integration of information systems/technology to:
  1. Support, monitor, and improve patient care, healthcare systems, clinical decision-making, nurse-sensitive outcomes, and academic settings.
  2. Support quality improvement and patient safety.

- Assume a leadership role in advocacy and health care policy development.
- Establish, participate, and lead interprofessional collaborations for improving patient, population, and systems outcomes.
- Develop, implement, and evaluate practice and healthcare delivery models for the purpose of quality improvement and improved patient outcomes considering
  1. Safety and quality.
  2. Epidemiological, bio-statistical, environmental, and other appropriate scientific data.
  3. Culturally appropriate care.
  4. Values based professional practice and behaviors.
  5. Economies of care, business principles and health policy related to individual, aggregate, and population health.

- Ensure accountability for advanced practice based on refined assessment skills, advanced communication skills, biophysical, genetic, genomic, psychosocial, sociopolitical, economic, ethical, and cultural principles.
- Practice and provide services for populations with in the area of advanced nursing specialization.

**Doctor of Philosophy**

The purpose of the Ph.D. program is to prepare nurse scholars/scientists for roles in research, teaching, and service. The program prepares graduates who will contribute to the body of nursing knowledge, educate the next generation, and assume collaborative leadership roles in shaping health policy, improving health, and reducing disparity.

The goals of the program are to prepare graduates who will:

1. Rigorously test, generate, and extend knowledge to inform nursing science, practice, and policy.
2. Contribute to the development of knowledge and interventions to address health disparity and promote or improve health.
3. Assume collaborative leadership roles in academia, health organizations, research teams, and scholarly networks.
4. Demonstrate expertise within an area of study that incorporates nursing and trans disciplinary perspectives.

Visit the School of Nursing website at [http://nursing.hsc.wvu.edu/](http://nursing.hsc.wvu.edu/). Call the WVU school of Nursing Office of Student Services at 1-866-WVUNURS or (304) 293-1386. Write to WVU School of Nursing at PO Box 9600, Morgantown, WV 26506-9600

**Admission Criteria**

1. Transcript of a nursing degree at the baccalaureate level or higher from a nationally accredited nursing program or equivalent.
2. Evidence of current license to practice nursing in the United States or home country.
3. Transcript of master's coursework from an accredited program.
4. A grade of B or higher in graduate-level statistics and research courses.
5. Cumulative GPA of 3.25 in master's degree work.
6. Examples of scholarly work. This can be a paper from master's work, a submitted article, or some other professional writing.
7. Interview to determine congruence between the applicant's career goals and program objectives and between the applicant's research interests and those of the faculty.
8. Essay describing professional experience, research interests, professional goals, and time management skills.

**Note:** Admission criteria are subject to change. Please see the School of Nursing website for the most up-to-date criteria at [http://nursing.hsc.wvu.edu/](http://nursing.hsc.wvu.edu/).
Application Process

The application process is on a rolling basis. The beginning sequence of courses in the PhD in nursing program starts in the summer semester only. Class size and progression plans may be limited based on available faculty resources and space. Applicants to the PhD in nursing program need to complete the following steps in order to be considered for admission:

1. Complete two application forms as indicated below and return to the appropriate offices by the deadline
   - Application for Admission to Graduate Studies (available at http://apply.wvu.edu/)
   - Supplemental Application of Admission to PhD in the School of Nursing and PhD application checklist (available at http://nursing.hsc.wvu.edu/).
   Students should be certain that all materials are sent to the following:

   WVU School of Nursing, Student Services Office
   P.O. Box 9600
   Morgantown, WV 26506-9600

2. Request an official transcript of records from each college or university attended. Transcripts and records should be sent directly to the following:

   WVU Health Science Center Office of Admissions
   P.O. Box 9815
   Morgantown, WV 26506-981

3. Send three letters of recommendation directly to the following:

   WVU School of Nursing Student Services Office
   P.O. Box 9600
   Morgantown, WV 26506-9600

   Letters should address the applicant’s expertise in nursing, skills in research and scholarly writing, and likelihood for success in doctoral work. One letter should be from a former professor of the applicant.

4. Submit a current curriculum vitae.
5. Submit one scholarly essay, describing the applicant’s research interests and career goals.

### Suggested Plan of Study

Students are required to be on campus for the six-week Summer sessions, once in the Fall for two days, and once in the Spring for two days. During residency, students are provided with an opportunity to participate with nurse researchers and peers in the ongoing development of a scholarly community.

Total credit hours: 55
Major Learning Goals

DOCTOR OF PHILOSOPHY

The PhD in Nursing at WVU is a part-time blended program composed of on-campus classroom and distance learning components. Three years of coursework, delivered online during Fall and Spring and in a blended format with limited time on campus during Summer, are followed by a qualifying examination. Students then complete the research and dissertation phase, culminating in a written and oral dissertation defense. The purpose of the PhD program is to educate nurse scholar-scientists for roles in research, teaching, and service. The program prepares graduates who will contribute to the body of nursing knowledge; educate the next generation; and assume collaborative leadership roles in shaping health policy, improving health, and reducing disparity. The goals of the program are to:

- Rigorously test, generate, and extend knowledge to inform nursing science, practice, and policy.
- Contribute to the development of knowledge and interventions to address health disparity and promote or improve health.
- Assume collaborative leadership roles in academia, healthcare organizations, research teams, and scholarly networks.
- Demonstrate expertise within an area of study that incorporates nursing and transdisciplinary perspectives.

Academic Progression Standards

To progress in the PhD program, a student must:

1. Take nursing courses in the sequence stated in the WVU School of Nursing PhD Progression Plan (Appendix B). All prerequisites from preceding semesters must be completed prior to registration for new courses. Courses are only applicable for graduation credit if they have been taken within the last eight years.

2. Achieve an overall academic GPA of 3.0 in all course work. The following guidelines apply to grades in the PhD program:
   - Students may carry forward one C grade in any course. However, a second C will result in dismissal from the program.
   - Students with a grade of D or F in any course will be dismissed from the program.
   - The grade of I (incomplete) is given only when the instructor believes that the coursework is unavoidably incomplete or that a supplementary examination is justifiable. Resolution of the grade of I will occur in the semester following its issuance and before any graduate degree can be awarded. If the I grade is not removed within the following semester, the grade of I is treated as an IF (incomplete failure). A grade of IF will result in dismissal from the program. When the “I” grade is replaced, the grade point average is recalculated on the basis of the new grade.
   - Students can only have one “W” (class withdraw) while in the PhD program.
   - If students earn an unsatisfactory or “U” in N797 Research, the chair and student must devise a plan to rectify deficiencies in the next semester. If the student receives another “U,” they will be dismissed from the program.

3. Successfully complete the QE prior to beginning the dissertation. The QE may be repeated once as outlined in the QE section, pages 10-11. If the student passes the 5 year limit and has not successfully completed the QE, they will be removed from the PhD program and their status changed to non-degree at the university level.

4. Adhere to the residency and graduation requirements. This includes active participation in the journal club, attendance at scholarly events as part of residency, and publication of one peerreviewed paper.

5. Meet with his or her advisor at least once a year to review and submit documentation of progression. Following spring advisement, student will complete an online mentor evaluation survey.

6. Generate a syllabus each time an independent study course (N795) and/or a research course (N797) is taken. Working with the chair or instructor, the student will identify course objectives. Before the course is released for enrollment, the syllabus must be signed by both the student and chair and a copy provided to the PhD Program Director.

Master of Science in Nursing Online Program

MSN Advanced Practice

All students seeking the Advanced Practice MSN will be enrolled in the Doctor of Nursing Practice Online Program (BSN-DNP). All students will be awarded a Master's Degree in Nursing after completing the required 48 hours of coursework. At that time, students will have the ability to sit for the advanced practice certification in the focus areas of either FNP or PNP. Students may then continue on to acquire the DNP degree for an additional 15 credits, or may exit the program once receiving the MSN degree. Please review more information under the BSN to DNP Online Program.

MSN Executive Focus/MBA Dual Degree Program

The School of Nursing, together with the School of Business, offers a program of study leading to the dual degree of master of science in nursing MSN (Executive Focus), and master of business administration MBA. This program is predominantly online in both synchronous and asynchronous formats.
It includes three 3-4 day residencies to enhance experiential learning and understanding of the curriculum content. Students take courses from both the MSN and MBA program concurrently, allowing assimilation of advanced business management concepts into the nursing administration role.

The MSN Executive Focus major is offered only to students enrolled in the dual MSN/MBA degree. It is not offered as a “stand-alone” major. The combined MSN/MBA curriculum meets the Essentials of Master’s Education in Nursing, the American Organization of Nurse Executive Competencies, and the expectations of the Association to Advance Collegiate Schools of Business. Throughout the curriculum, students are guided in the process of self-development aimed at pursuing excellence in scholarly and professional endeavors.

The 67 credit hour program can be completed in eight semesters of full time study, including summer sessions. Graduates of the program will be eligible to sit for Nurse Executive, Advanced certification (ANCC) or the Certification in Executive Nursing Practice (AONE) exams after having held a nursing administration position for at least 2 years.

**Application Process for MSN Executive Focus/MBA Dual Degree Program**

This program is designed for nurses who already have a bachelor’s degree in nursing, two or more years professional, full-time work experience and have an interest in leadership. Students must apply to both the MSN Executive Focus nursing program and the online hybrid MBA program simultaneously. The application process should be completed by July 1 for the August start date, or by December 1 for the January start date. Applicants to the this program need to complete the following steps in order to be considered for admission:

**MBA Application**

1. **Online Application**- Be sure to indicate Business Administration (Online MBA) when responding to “Intended Major”. Please select “Off Campus” as the primary delivery method. The application along with the $60 application fee should be submitted prior to the application deadline. All material should be sent to: Office of Graduate Admissions, P.O. Box 6510, Morgantown, WV 26506-6510 or submitted electronically with your application.

2. Official transcripts from all prior academic work must be forwarded by your previous institution to West Virginia University, Office of Graduate Admissions, P.O. Box 6510, Morgantown, WV 26506-6510. Contact prior institutions as early as possible. If undergraduate work was completed at WVU, admissions will pull transcripts automatically.

3. Your current resume should include enough information for the admissions committee to trace your entire professional work history and should indicate any relevant affiliations.

4. Your statement of purpose should be a short essay in which you reflect on the contribution of the Online MBA degree to your future and the special characteristics that you would bring to the Online MBA program. We are interested in value-added experiences, both from the program to you and from you to the program.

5. We recommend that your one letter of reference provide some information that is not found in the other materials being submitted. Topics with regards to your ability to work with others, your discipline and ambition, leadership potential, etc. should be addressed. If applicable, an Employers Commitment letter would also be beneficial. In particular, we’d like to know that your manager is aware of the program residency requirements and is in support of your efforts to complete your degree.

6. GMAT/GRE score (or waiver): You should have test scores submitted from the Graduate Management Admissions Test® (GMAT) (WVU GMAT code: C2S-6D-13) or from the Graduate Record Examination (GRE) (WVU GRE code:5904.). Early test taking is encouraged. If you have 5+ years of continuous full-time professional work experience or a terminal degree, you may request a GMAT waiver. To do so, the completed GMAT waiver request form must be uploaded as “Supplemental Information” on your online application. Once all application materials are received, you will be contacted for a phone interview regarding the GMAT waiver request.

**MSN Application**

1. Completed online WVU application to the MSN program.

2. Completed supplemental application, found at: https://wvuhsc.wufoo.com/forms/msnpost-msnsupplemental-application/

For more information, visit the website at http://nursing.hsc.wvu.edu.

**Admission Criteria**

1. Satisfy WVU requirements for admission to graduate study
2. Have a cumulative GPA of 3.0 or higher on a 4.0 scale on all college work attempted
3. Have a current, unrestricted RN license in at least one state
4. Hold a bachelor of science degree from a nationally accredited nursing program (A bachelor of science degree in nursing is mandatory.)
5. Have completed 3 credits of undergraduate statistics equivalent to WVU Stats 211 AND 3 credits of undergraduate Health Assessment, both with a “C” or better.
6. Have completed two or more years of professional, full-time work experience
7. There are no pre-requisite courses for the MBA; however, online not-for-credit-classes in Financial Accounting, Economics, and Statistical Concepts through Ivy Software are recommended for those without a strong background in these disciplines.

Students must apply and be admitted to both programs concurrently in order to complete the MSN/MBA dual degree program.

Note: Admission criteria and applications are subject to change. Please see the School of Nursing website for the most up-to-date criteria at http://nursing.hsc.wvu.edu.

### Programs

- Master’s of Science in Nursing (p. 662)
- MSN/MBA Dual Degree (p. 664)

### Curriculum Requirements

In order to progress in the Master of Science in Nursing curriculum, a student must meet the following performance standards:

1. Achieve an overall academic Grade Point Average of at least 3.0 in all work attempted in the Master's Program.
2. Carry forward only one C grade in a nursing course. A second C in a nursing course will result in dismissal from the program.
3. Maintain a 3.0 GPA. A student who falls below 3.0 on 9 or more credit hours will be placed on academic probation and has one semester to bring up the GPA to the 3.0 requirement.
4. Repeat only one nursing course and only one time.
5. Earn a letter grade (A, B, C) on all required courses. A grade of D or F in any course results in dismissal from the program.

### Master's of Science in Nursing Requirements

A minimum cumulative GPA of 3.0 is required

A minimum grade of C- is required in all courses

Progression Standards

In order to progress in the MSN curriculum, a student must meet the following performance standards:

1. Carry forward only one C grade in a nursing course. A second C in a nursing course will result in dismissal from the program.
2. Maintain a 3.0 GPA. A student who falls below 3.0 on 9 or more credit hours will be placed on academic probation and has only one semester to bring up the GPA to the 3.0 requirement.
3. Repeat only one nursing course and only one time.
4. A grade of D or F in any course results in dismissal from the program.

Major Learning Goals

MASTER OF SCIENCE IN NURSING ONLINE PROGRAM

Upon successful completion of the program, the graduate will:

- Synthesize theories, research findings, and broad-based perspectives for application in the advanced practice of nursing or nursing leadership:
  1. Integrate nursing and related sciences into the delivery of advanced nursing care to diverse populations.
  2. Synthesize evidence for practice to determine appropriate application of interventions across diverse populations.
  3. Utilize nursing and related science evidence to analyze, design, implement and evaluate nursing care delivery systems.

- Utilize systematic inquiry and refined analytical skills in the provision of health care services and leadership:
  1. Integrate organizational science and informatics to make changes in the care environment to improve health outcomes.
  2. Assume a leadership role in the management of human, fiscal, and physical healthcare resources.
  3. Critically appraise existing literature to identify best practices, apply knowledge to improve and facilitate systems of care in order to improve patient outcomes.
  4. Disseminate results through translational scholarship.

- Demonstrate safe, effective assessment, planning, implementation and evaluation skills in managing the care of individuals and groups while working in interprofessional collaborative relationships:
  1. Create a relationship with clients and healthcare organizations that builds and maintains a supportive and caring partnership.
  2. Analyze best practice evidence to implement effective quality improvement initiatives with measurable results.
  3. Advocates for patients, families, caregivers, communities and members of the healthcare team.

- Articulate viewpoints and positions in order to improve the quality of health care delivery and outcomes of successful care:
  1. Assume a leadership role in effectively implementing patient safety and quality improvement initiatives within the context of the interprofessional team using effective communication skills.
  2. Examine the effect of legal and regulatory processes on nursing practice, healthcare delivery, and outcomes.
  3. Use ethical decision making to promote the well-being of individuals, families, and health care professionals in local, national & international communities.

- Consults and collaborates in interdisciplinary and interagency endeavors to advance culturally sensitive health care to clients, families, groups, and communities:
  1. Synthesize broad ecological, global and social determinants of health; principles of genetics and genomics; and epidemiologic data to design and deliver evidence-based, culturally relevant clinical prevention interventions and strategies.

- Integrates prior and current learning as a basis for growth and accountability in enacting the role of advanced practice nurse or nurse leader:
  1. Advocate for patients, families, caregivers, communities, and members of the healthcare team.
2. Use information and communication technologies to advance patient education, enhance accessibility of care, analyze practice patterns, and improve health care outcomes, including nurse sensitive outcomes.

3. Value life-long learning and continued professional development.

• Assume a leadership role in advocacy, ethical issues, and health care policy development:
  1. Apply leadership skills and decision making in the provision of culturally responsive, high-quality nursing care, healthcare team coordination, and the oversight and accountability for care delivery and outcomes.
  2. Function as a leader and change agent in nursing and in health care delivery systems particularly to insure quality care for vulnerable and underserved populations.
  3. Demonstrates organizational and systems leadership that continually improves health outcomes and ensures patient safety.

• Integrates all the functional areas of business into management decisions in a global environment:
  1. Evaluate factors that influence the competitive behavior of the firm.
  2. Predict and anticipate company and market responses to external factors.
  3. Identify the risks and opportunities in global markets.

• Identify problems, collect appropriate data and analyze the data to make informed management decisions:
  1. Evaluate business reports to make meaningful decisions for the organization.
  3. Take real world problems and express them in quantitative terms.

• Make management decisions in an ethically sensitive and socially responsible manner:
  1. Negotiate and control information ethically to meet organizational needs.
  2. Understand how to use and acquire information in an ethically sensitive manner.
  3. Synthesize various ethical theories and design a corporate code of ethics.

• Be effective team members in a virtual environment:
  1. Demonstrate the ability to work together in a supportive and effective manner.

• Be an effective leader who influences people towards the attainment of organizational goals:
  1. Recommend actions for leader effectiveness in a scenario case and apply a theory or framework to propose and defend their recommendations.
  2. Identify various leadership styles and their relative effectiveness, along with real-life examples.
  3. Evaluate, in a case setting, the processes through which goals are set and accomplished in organizations.
Pharmacy

Degrees Offered

- Doctor of Pharmacy (Pharm.D.)
- Doctor of Philosophy (Ph.D.)

Introduction

The mission of the West Virginia University (WVU) School of Pharmacy is to improve the health and well-being of West Virginians and society at large through pharmacy education, research, practice, and service.

Pharmacy was first offered at West Virginia University as a department in the School of Medicine in 1914. The College of Pharmacy emerged as a separate entity in 1936 and became the School of Pharmacy in 1958. In 1960, the School of Pharmacy changed from a four-year to a five-year program and in 1998 to a six-year program. The doctor of pharmacy (Pharm.D.) program comprises four years of professional study preceded by a minimum of two years of pre-pharmacy study in an accredited U.S. or Canadian college of arts and sciences.

Many pharmacy graduates enter practice in community or institutional pharmacies; postgraduate pharmacy residency programs offer the opportunity for additional training and experience in general pharmacy practice and in several areas of specialty practice. Positions are also available in various government agencies, the pharmaceutical industry, long-term care, nuclear pharmacy, home health-care organizations and many other areas. Pharmacists are eligible for commissions in the armed forces and the U.S. Public Health Service. Pharmacists also may prepare for careers in teaching and research.

The WVU School of Pharmacy also offers Ph.D. programs in health services and outcomes research and the pharmaceutical and pharmacological sciences.

Accreditation

The School of Pharmacy is fully accredited by the Accreditation Council for Pharmacy Education, the national agency for the accreditation of professional degree programs in pharmacy. The Council is composed of members from the American Pharmacists Association, the National Association of Boards of Pharmacy, the American Association of Colleges of Pharmacy, and the American Council on Education.

The School of Pharmacy holds membership in the American Association of Colleges of Pharmacy, whose mission is to lead and partner with member institutions in advancing pharmacy education, research, scholarship, practice, and service to improve societal health.

ADMINISTRATION

DEAN

- William P. Petros - Pharm.D. (Philadelphia College of Pharmacy and Science)

ASSOCIATE DEAN FOR ACADEMIC AFFAIRS AND EDUCATIONAL INNOVATION

- Mary K. Stamatakis - Pharm.D. (The Ohio State University)
  Professor, Department of Clinical Pharmacy

ASSOCIATE DEAN FOR STUDENT SERVICES

- Mary L. Euler - Pharm.D. (University of Missouri-Kansas City School of Pharmacy)
  Professor, Department of Clinical Pharmacy

ASSOCIATE DEAN FOR RESEARCH AND GRADUATE PROGRAMS (INTERIM)

- Paul R. Lockman - Ph.D. (Texas Tech University Health Sciences Center)
  Chair, Department of Pharmaceutical Sciences

FACULTY

PROFESSORS

- Marie A. Abate - Pharm.D. (University of Michigan)
  Department of Clinical Pharmacy, Director, West Virginia Center for Drug and Health Information
- Patrick S. Gallery - Ph.D. (University of California)
  Department of Pharmaceutical Sciences
- Vincent Castranova - Ph.D. (West Virginia University)
  Department of Pharmaceutical Sciences
- David P. Elliott - Pharm.D. (University of Texas)
Department of Clinical Pharmacy, Associate Chair for the Charleston Division

- Lori A. Hazlehurst - Ph.D. (University of Vermont)
  Department of Pharmaceutical Sciences
- Gerald M. Higa - Pharm.D. (University of the Pacific)
  Department of Clinical Pharmacy and Hematology/Oncology
- Jason D. Huber - Ph.D. (Florida A&M)
  Department of Pharmaceutical Sciences
- S. Suresh Madhavan - Ph.D. (Purdue University)
  Chair, Department of Pharmaceutical Systems and Policy
- William P. Petros - Pharm.D. (Philadelphia College of Pharmacy & Science)
  Department of Pharmaceutical Sciences
- Charles D. Ponte - Pharm.D. (University of Utah)
  Departments of Clinical Pharmacy and Family Medicine
- Yongyut Rojanasakul - Ph.D. (University of Wisconsin)
  Department of Pharmaceutical Sciences
- Usha Sambamoorthi - Ph.D. (University of Madras)
  Department of Pharmaceutical Systems and Policy
- Elizabeth J. Scharman - Pharm.D. (Virginia Commonwealth University/Medical College of Virginia)
  Department of Clinical Pharmacy, Charleston Division. Director, West Virginia Poison Center
- Terrence L. Schwinghamer - Pharm.D. (Purdue University)
  Chair, Department of Clinical Pharmacy
- Ginger Scott - Ph.D. (University of Minnesota)
  Department of Pharmaceutical Sciences, Associate Chair
- Douglas Slain - Pharm.D. (Duquesne University)
  Department of Clinical Pharmacy
- Mary K. Stamatakis - Pharm.D. (The Ohio State University)

ASSOCIATE PROFESSORS

- Robert K. Griffith - Ph.D. (The Ohio State University)
  Department of Pharmaceutical Sciences
- Werner J. Geldenhuys - Ph.D. (North-West University, South Africa)
  Department of Pharmaceutical Sciences, Associate Chair
- Allie Karshenas - Ph.D. (University of Southern Mississippi)
  Department of Pharmaceutical Systems and Policy
- Kimberly M. Kelly - Ph.D. (Rutgers University)
  Department of Pharmaceutical Systems and Policy
- Grazyna Szklarz - Ph.D. (Clarkson University)
  Department of Pharmaceutical Sciences
- Erin Winstanley - Ph.D. (The Johns Hopkins Bloomberg School of Public Health)
  Department of Pharmaceutical Systems and Policy

CLINICAL ASSOCIATE PROFESSORS

- Gina M. Baugh - Pharm.D. (University of Pittsburgh)
  Department of Clinical Pharmacy. Director, Introductory Pharmacy Practice Experiences
- Matthew Blommel - Pharm.D. (Mercer University)
  Department of Clinical Pharmacy
- Krista D. Capehart - Pharm.D. (University of Michigan)
  Department of Clinical Pharmacy. Director, Wigner Institute for Advanced Pharmacy Practice
- Betsy M. Elswick - Pharm.D. (West Virginia University)
  Department of Clinical Pharmacy
- Lena M. Maynor - Pharm.D. (West Virginia University)
  Department of Clinical Pharmacy. Director, Advanced Pharmacy Practice Experiences
- Christopher M. Terpening - Ph.D. (University of Colorado)
  Department of Clinical Pharmacy
- Tara R. Whetsel - Pharm.D. (West Virginia University)
  Department of Clinical Pharmacy
- Jon P. Wietholter - Pharm.D. (University of Pittsburgh)
CLINICAL ASSISTANT PROFESSORS

- Ashleigh L. Barrickman - Pharm.D. (West Virginia University)
  Department of Clinical Pharmacy, Director of Skills Development
- Jennifer Confer - Pharm.D. (University of Arizona)
  Department of Clinical Pharmacy
- Gretchen M. Garofoli - Pharm.D. (University of Pittsburgh)
  Department of Clinical Pharmacy
- Franklin Huggins - Pharm.D. (University of Utah)
  Department of Clinical Pharmacy
- John (Jay) Martello - Pharm.D. (Duquesne University)
  Department of Clinical Pharmacy
- Ashlee McMillan - Pharm.D. (West Virginia University)
  Department of Clinical Pharmacy
- Jeremy J. Prunty - Pharm.D. (West Virginia University)
  Department of Clinical Pharmacy
- Travis G. White - Pharm.D. (West Virginia University)
  Department of Clinical Pharmacy. Director, Health Education Center

ASSISTANT PROFESSORS

- Erik A. Bey - Ph.D. (Cleveland State University)
  Department of Pharmaceutical Sciences
- Wei Du - Ph.D. (Tohoku University School of Medicine, Japan)
  Department of Pharmaceutical Sciences
- Nilanjana Dwibedi - Ph.D. (University of Houston)
  Department of Pharmaceutical Systems and Policy
- Traci J. LeMasters - Ph.D. (West Virginia University)
  Department of Pharmaceutical Systems and Policy
- Mohammed A. Nayeem - Ph.D. (Osmania University, India)
  Department of Pharmaceutical Sciences
- Xi Tan - Ph.D. (University of Michigan)
  Department of Pharmaceutical Systems and Policy

TEACHING ASSISTANT PROFESSOR

- Marina Galvez Peralta - Ph.D. (University of Seville, Spain)
  Department of Pharmaceutical Sciences

Degree Designation Learning Goals

DOCTOR OF PHARMACY (PHARMD)

Upon successful completion of the West Virginia University Doctor of Pharmacy degree program, the graduate will be able to accomplish the following educational outcomes (EOs):

**EO 1  Foundational Knowledge and Skills (Learner)** - Develop, integrate, and apply foundational knowledge (e.g., concepts, facts, principles) from biological, pharmaceutical, social, behavioral, administrative, and clinical sciences to evaluate the scientific literature, explain drug actions, solve therapeutic problems, and advance individual and population health.

- Acquire and demonstrate depth and breadth of knowledge of foundational scientific, clinical, socioeconomic, and humanistic concepts and skills.
- Explain how knowledge in the foundational sciences is integral to pharmacy practice.
- Integrate knowledge from foundational sciences to explain how specific drugs or drug classes work and evaluate their potential value in individuals and populations.
- Apply foundational concepts and skills to practice.
- Use scientific reasoning and critical thinking skills in practice to address problems, issues, or concerns.
- Develop and apply creative and innovative approaches to effectively resolve problems and improve patient outcomes.
- Apply an evidence-based approach to practice by identifying appropriate questions to address, using databases and other resources to retrieve information, critically analyzing and interpreting relevant scientific information and other evidence, formulating sound conclusions, and integrating the best published evidence with expertise and individual patient values/needs.
• Analyze and use epidemiologic, pharmacoeconomic, medication utilization, and quality improvement data when developing evidence-based programs and protocols.
• Apply knowledge of research methodology to design or conduct basic research, practice-based studies, or clinical trials.
• Use information technology where appropriate to enhance individual knowledge and skills.

EO 2 Communication Skills (Communicator, Educator) – Effectively communicate verbally and nonverbally when interacting with an individual, group, or organization.

• Use appropriate verbal and nonverbal communication skills with individuals or groups, including patients, health professionals and others.
• Use effective written communication skills with patients, health professionals, and others, including the development of documents pertinent to professional or organizational needs (e.g., monographs, reports).
• Educate target audiences by using the most effective method to deliver information, in coordination with other health care professionals as appropriate.
• Use technology to facilitate or enhance professional communications and presentations.

EO 3 Professionalism, Advocacy, and Leadership (Professional, Leader, Advocate) - Exhibit behaviors and values consistent with the professional trust given by patients, healthcare providers, and society; assure that patients' best interests are represented; and demonstrate responsibility for achieving shared goals regardless of position.

• Conduct pharmacy practice duties and patient care responsibilities in accordance with applicable federal, state, and local laws, statutes, and regulations, as well as professional guidelines and standards.
• Serve as an advocate, leader, and change agent for pharmacy and pharmacists' professional roles and responsibilities by implementing or participating in new, evidence-based models for cost-effective pharmacist-delivered patient care.
• Serve as an advocate for community and patient health and medication therapy needs, including disadvantaged or underserved patients and those from diverse cultural and socioeconomic backgrounds, while honoring their autonomy and dignity.
• Serve as a positive role model in actions/communications for peers and other health care providers by maintaining a high standard for personal and professional demeanor and ethical conduct.
• Respect all points of view in professional interactions while placing patients' needs and desires at the forefront.
• Demonstrate compassion, empathy, honesty, integrity, ethical behavior and altruism in all actions and communications with patients, families, and care providers.
• Develop professional competence through ongoing, active and self-directed pursuit of new knowledge and skills.
• Identify and analyze emerging health care and pharmacy issues and incorporate new roles, products and services into practice that can improve patient outcomes.
• Accept accountability and responsibility for one’s words and actions.

EO 4 Self-Awareness (Insightful) – Examine and assess personal knowledge, skills, abilities, attitudes, beliefs, motivation, and emotions and strive for continual improvement.

• Conduct self-assessments on a regular basis and create, implement, evaluate, and modify as needed plans for personal improvement and continuing professional development.
• Recognize personal strengths and limitations and seek assistance when needed.
• Approach tasks and situations with flexibility and a desire to learn.
• Accept constructive criticism and display a willingness to correct and learn from errors.

EO 5 Interprofessional Collaboration (Collaborator) – Actively participate as a healthcare team member by demonstrating mutual respect, understanding, and values to meet patient care needs.

• Collaborate with health care professionals, patients, and/or caregivers to ensure that desired patient-specific or population-based health outcomes are achieved.
• Facilitate team building among health care professionals by developing and maintaining an atmosphere of mutual respect and shared values that place the patient at the forefront.
• Effectively utilize the knowledge, expertise, and unique roles of health care team providers and refer patients to others when indicated.
• Serve as the medication expert on a collaborative care team by managing the pharmacotherapy for patients' medical conditions and by proactively providing drug product and other medication related information to team members.
• Accept responsibility for medication-related outcomes on the care team.

EO 6 Patient Care (Provider) – Provide patient-centered care as the medication expert.

• Accurately interpret, prepare and/or compound, handle and dispense prescriptions for patients.
• Obtain necessary patient-specific data (e.g., consulting patient records, taking medication histories, performing basic physical assessments, ordering/interpreting lab tests), and evaluate and use these data when performing patient care related responsibilities.

• Evaluate pharmaceutical products, including information about the drug, dosage form, delivery system and cost/benefit, when conducting a medication review or preparing a care plan.

• Conduct comprehensive medication reviews and prepare individualized care plans to optimize patient outcomes, with emphasis on commonly encountered chronic or high risk conditions amenable to pharmacotherapy and patients at greater risk for adverse events.

• Work with patients, caregivers, and health care professionals to implement specific therapy plans.

• Educate and empower patients to take an active role in their health and incorporate recommendations for healthy living and self-care into care plans.

• Monitor and evaluate patients during therapy for drug product or pharmacotherapy problems, patient concerns, or adherence issues and recommend or implement solutions.

• Work with patients and other health care providers to ensure the continued success of individual care plans.

• Document patient-care services in charts/medical records and on forms needed for reimbursement.

• Counsel patients and/or caregivers about the following to help ensure a care plan’s success: i) medications, non-drug therapy, dietary supplements and natural products; ii) insurance and other options for obtaining necessary medications; iii) proper use of testing devices and medical goods and equipment; and iv) healthy lifestyle changes.

EO 7 Population-Based Care (Promoter, Provider) – Design and implement prevention, intervention, and educational strategies for communities to manage chronic disease and improve health and wellness.

• Develop, recommend, and provide preventive health services, such as administration of vaccines and screening tests.

• Develop and implement disease management programs based upon identified needs and priorities (e.g., cost, access, and patient satisfaction considerations; commonly encountered, chronic conditions managed by pharmacotherapy).

• Evaluate and adjust interventions as needed to maximize population health.

• Promote public awareness of health promotion and disease prevention strategies.

• Design, develop, and disseminate public health related educational materials or services in a culturally competent manner.

• Work with health care professionals and other personnel to identify and help resolve key public health issues and problems, and participate in policies or strategies to address them.

EO 8 Pharmacy and Medication Use Systems (Manager) – Manage patient healthcare needs using human, financial, technological, and physical resources to optimize the safety and efficacy of medication use systems.

• Demonstrate knowledge of pharmacy management including operations, human and fiscal resources, marketing, and leadership principles.

• Design, use, and manage systems to prepare, dispense, distribute and administer medications to optimally serve patient’s drug-related needs.

• Use knowledge of the organization and financing of the U.S. healthcare system to provide and effectively manage progressive pharmacy services.

• Develop a business plan for integrating clinical and distributive services that includes methods for supporting and obtaining reimbursement for clinical services provided to patients.

• Demonstrate and apply knowledge of national standards, guidelines, best practices, and established principles and processes for safe medication use to protect patient safety.

• Participate in quality improvement programs and employ performance indicators to enhance the quality of care and cost effectiveness of services provided and to optimize safe, appropriate medication use.

• Participate in developing and performing medication use evaluations to identify and resolve drug therapy problems or concerns.

• Reconcile a patient’s medications when transitioning from one care setting to another by communicating effectively with all involved health care professionals.

• Use current and emerging information and system technologies to enhance safe and effective medication use.

• Provide recommendations for developing and managing a formulary that incorporate pharmacoeconomic principles.

• Actively participate in, and contribute to the development of, strategies to minimize drug misuse/abuse.

DOCTOR OF PHILOSOPHY (PHD)
The overall goals of the PhD program in Health Services and Outcomes Research are:

• To educate and train highly qualified individuals to pursue independent research in health services and outcomes research (HSOR) within interdisciplinary teams, and to function and contribute as a member of a research team.

• To prepare competent scientists able to contribute to health-related research, industrial research and development, pharmaceutical education, and scholarship.

• To advance research in pharmaceutical and healthcare delivery.

• To provide leadership for the pharmacy profession in research, graduate education, and health policy making.
The program is designed to prepare students to become independent researchers. Students will develop competencies in the scientific research process through didactic studies and conceptualizing, designing, conducting, and reporting original research.

**Didactic Studies**

- To learn basic principles and apply these principles to specific disciplines and related fields to cultivate a broad background of knowledge.
- To develop research skills, including scientific communication and critical thinking/problem solving abilities by participating in seminars and designated research skill courses.

**Research Training**

- To acquire practical experience in conducting original research, including acquisition of background information (e.g., literature research), problem development, experimental design and experimentation, collecting primary data and using secondary data, and data analyses.
- To foster research communication skills by writing abstracts for research presentations, manuscripts for publication, research grant proposals, and a thesis or dissertation.
- To gain additional insight into research and scholarship by participating in scholarly exchanges with faculty and students in the WVU School of Pharmacy, the Health Sciences Center (HSC), as well as the national and international healthcare community.

**DOCTOR OF PHILOSOPHY (PHD)**

Student Learning Outcomes of the Pharmaceutical & Pharmacological Sciences graduate education program are focused on preparing students to become independent researchers. To be successful in our program, students will need to develop competencies in the scientific research process through didactic studies in an area of emphasis and then conceptualizing, designing, conducting, and reporting original research.

**Student Learning Outcomes**

- Learn basic and applied principles in specific disciplines and related fields in order to develop a broad background of knowledge.
- Develop research skills including scientific communication and critical thinking/problem solving ability by participating in seminars and designated research skill courses.
- Gain hands-on experience in conducting original research, including acquisition of background information (e.g., literature research), experimental design and experimentation.
- Develop research communication skills by writing abstracts for research presentations, manuscripts for publication, research grant proposals, and a thesis or dissertation.
- Gain additional insight into research and scholarship by participating in scholarly exchanges with faculty and students in the WVU School of Pharmacy, the Health Sciences Center (HSC), and the West Virginia University community.
- Be able to pursue independent research in specialized fields in interdisciplinary teams and to function and contribute as members of research teams.
- Be competent scientists that are able to contribute to health-related research, industrial research and development, pharmaceutical education, and scholarship.

**Health Services and Outcomes Research**

**Degree Offered**

- Doctor of Philosophy (Major Code 8980)

**What is Health Services and Outcomes Research?**

The Health Services and Outcomes Research program emphasizes population-based, health services delivery and outcomes, and policy research.

Health services research examines how people get access to healthcare, how much care costs, and what happens to patients as a result of this care. The main goals of health services research are to identify the most effective ways to organize, manage, finance, and deliver high quality care; reduce medical errors; and improve patient safety. (AHRQ, 2002)

Outcomes research refers to the scientific design, data collection, and analysis of the end results of medical care. It focuses on quality, cost-effectiveness and the effect of treatment on quality of life in patients. Outcomes research evaluates the effectiveness of health interventions through changes in outcomes such as improvements in patient functional status, satisfaction with care, and mortality. Apart from traditional experimental and quasi-experimental designs, outcomes research methodology embraces epidemiological research designs (such as retrospective or prospective, longitudinal or cross-sectional, case-control or cohort study designs), or econometric modeling (such as decision-tree analysis, cost-benefit analysis, cost-effectiveness analysis), and survey research methods (such as quality of life measurements, satisfaction with care).

**Why study Health Services and Outcomes Research?**

With health care costs increasing five folds in the last two decades, there has been increasingly greater accountability demanded of health care systems and providers. There has been growing recognition that resources are limited, and health care interventions have to be cost-effective, and not just...
efficacious in clinical trials. Three particular factors have contributed to growing interest in determining effectiveness of health care interventions: (1) unexplained differences in quality of care or effectiveness by region, population, and type of systems; (2) the desire to control rising health care costs and spread the availability of services to those who do not currently have access; and (3) concern that cost-containment strategies and improving quality of health care are two competing goals.

These factors also led to the passage of the Patient Protection and Affordable Care Act in March 2010. The Affordable Care Act’s main focus is on providing more Americans with access to affordable health insurance, improving the quality of health care and health insurance, regulating the health insurance industry, and reducing health care spending in the US. The shift from fee-for-service to fee-for-value necessitates that healthcare providers and institutions optimize their operations and align costs with clinical outcomes.

How is Outcomes Research Used?
Data collected from outcomes research provide patients, physicians, and providers information about what does and does not work in real life settings. It provides other measures of effectiveness such as what treatment provides the best return on investment, and from a patient perspective, what is the most preferred or satisfying treatment option. Overall, outcomes research will lead to better use of limited resources, informed decision-making by patients, providers, and payers, development of guidelines for better disease management - especially for chronic diseases, and better health policy decisions.

What are the goals of the graduate program in Health Services and Outcomes Research?
The focus of Health Services and Outcomes Research is to prepare highly qualified graduate students for careers in academia, industry, government, and institutional settings through training in health outcomes and policy research. Areas of specialization include: pharmacoeconomics, health services research, pharmacoepidemiology, health behavior and risk.

What are the job opportunities for graduates of the program?
Job opportunities for those with PhD’s in this field are excellent and will continue to be so in the near future. Our students are trained to take jobs in Universities, the pharmaceutical industry, government agencies, clinical research organizations, and the managed care industry. Please visit our Alumni – Where Are They Now? (http://pharmacy.hsc.wvu.edu/pharmaceutical-systems-and-policy/phd-program-in-health-services-and-outcomes-research/information-for-new-applicants/alumni-where-are-they-now) page to see where recent graduates of our program are employed.

Frequently Asked Questions

Does this program offer a Master’s degree?
This program does not at this time have a terminal Master's degree. Students are only admitted into the PhD Program. Students with a Bachelor or Doctor of Pharmacy degree who are admitted to the program are required to complete a MS on the way to a PhD. Students with a non-thesis Master’s degree (e.g. M.P.H.) are required to complete a research project and publish a manuscript by the end of the first year of their PhD studies. Students who already have a research (with thesis) Master’s degree are admitted with no such stipulations. All students have to complete the PhD graduation requirements (http://pharmacy.hsc.wvu.edu/pharmaceutical-systems-and-policy/phd-program-in-health-services-and-outcomes-research/information-for-new-applicants/phd-graduation-requirements) to be awarded a PhD.

How long does it take to finish a PhD degree in this field?
Typically, a student starting without a research Master’s degree could take anywhere from 4 to 5 years to complete all of the degree requirements. Students who already have a research Master’s degree take less time, about 3 to 4 years.

Is financial assistance available?
A limited number of teaching and research assistantships (with a stipend of $25,000 a year) and fellowships are available within the department. These include an annual stipend and full tuition waiver with the student required to perform 20 hours/week of assistantship duties. Students with assistantships have to pay approximately $625/semester towards the use of the recreation center, the public rapid transport system (PRT), and other such conveniences. The assistantships are available to students throughout the duration of their studies (typically 3 or 4 years) as long as they are performing well in their duties, and making satisfactory progress toward their degree objective. The stipends are sufficient for graduate students to live comfortably and devote sufficient time to their educational program and research training. These assistantships are awarded on a competitive basis each year with the highest ranked applicants given the first offer of available assistantships. Some qualified students may be also offered admission without an assistantship. These students are provided guidance to seeking other campus employment opportunities subject to Immigration and Naturalization Services’ regulations in case of foreign students.

Is BS in Pharmacy or Pharm.D. degree (or a pharmacy background) required for admission?
No. Generally, a professional degree in pharmacy, medicine, or a health-related discipline is preferred. Students with Masters Degrees in related fields such as epidemiology, economics, and public health are also encouraged to apply. Students with Master’s degree in marketing management, economics, psychology, or sociology with a demonstrated interest or experience in health care may also apply.

What is the entry date into the program?
Because of the sequence of core courses, students are admitted only in the Fall semester only, which typically begins in the middle or last week of August every year. In very rare instances, a student may be admitted in the Spring semester if they already have a research Master’s degree, and if the PSP faculty agree that the circumstances of his/her admission warrant special consideration.

What is the application deadline?
All application materials, transcripts, test scores, three letters of recommendation, curriculum vitae of educational qualifications and training and job experiences, and statement of purpose must be submitted to WVU Graduate Admissions (https://app.applyyourself.com/AYApplicantLogin/fI_ApplicantConncetLogin.asp?id=wvugrad) by February 1st of the year for consideration of admission in the Fall semester of that year. It is best to start the admission process by September of the year before the Fall semester that you want to be considered to give yourself sufficient time to complete the process and not be affected by unexpected delays. Reviews are completed by the middle or end of March, and applicants are notified of acceptance or rejection with a signed acceptance from those offered an admission required no later than April 15.

How many applications do you receive each year?
The number of applications we receive vary from year to year but has shown a dramatic increase in the last few years. In recent years the numbers have ranged from 25 to 40.

How many students are accepted each year?
The number of students accepted each year vary depending on the number of students who have graduated in the preceding year. Typically, 3-4 students have been admitted per year in the recent past. A total number of 13-16 students are maintained in the program to enable close mentoring and training relationships with faculty advisors.

How is an application to the graduate program evaluated?
An application to the graduate program along with all supporting materials is reviewed by all members of the department graduate faculty. Each application is holistically reviewed first in terms of meeting the minimum academic (a ‘B’ average or a 3.0 GPA on 4.0 scale) and TOEFL (550 on the paper-based exam and 213 on the computer-based exam) criteria. Applications not meeting these criteria are immediately rejected. The subsequent reviews take place in a committee meeting in which all applications are discussed and ranked through a consensus process. While individual faculty may weigh each criteria slightly different, sustained academic excellence, good to outstanding GRE scores, past work or research experience in areas of interest, well written statement of purpose, leadership and extracurricular activities are all considered important and considered in a holistic way. Telephone or personal interview are typically required by the graduate faculty. Students ranked according to merit are offered admission with an assistantship in the order of listing until no more assistantships are available. A few additional students may be offered admission without an assistantship. A verbal offer by telephone is made to students who are offered admission with assistantships, and upon verbal acceptance of the offer, are sent formal letters of acceptance.

How are grades, GRE/GMAT scores considered in the overall admissions evaluation?
While sustained academic excellence is considered to be among the best predictors of academic performance, GRE scores are also important to compare students from different domestic and international education systems. For students from English speaking parts of the world, quantitative and analytical scores are given more weight than the verbal scores. Faculty participating in application reviews typically look for overall educational achievements, competitive GRE scores, extracurricular and leadership activities, and demonstrated interest in research in the chosen area of study.

What role does TOEFL play in the admission process?
Since all of the education process and research training is in English, students from non-English speaking parts of the world are required to provide TOEFL scores by the University with a score of 500 on the paper-based exam, 173 on the computer-based exam, 61 for TOEFL internet-based, and 60 for IELTS considered to be minimum University requirement. Once admitted, and if awarded a Teaching Assistantship, students are also required to pass a test of spoken English before they are allowed to teach in classes or labs.

Can TOEFL be waived?
Students who have received a high school, bachelor’s or Master’s degree in the United States need not submit TOEFL scores. Please contact the Office of International Students and Scholars (http://oiss.wvu.edu/students) to request a waiver.

What are acceptable GRE (or GMAT) scores?
Scores on the GRE (or GMAT) are reported in terms of percentiles. So, for example, if a student scores at the 65th percentile, this means that he or she scored at or better than 65 percent of the students who took that test. We obviously want the best students who apply.

If my GRE (or GMAT) or TOEFL scores are not good, should I retake these exams?
These tests are standardized tests, and typically, student scores do not change much on retaking of these exams. Make sure that you are familiar with the format of these tests and the time constraints for their completion. Practice books are available to familiarize yourself with the exam. If you take these exams and are not satisfied with your scores, you should retake them only if you feel certain that retaking them will help you improve your test scores. If you do retake them, Educational Testing Service will report the results of all attempts within the previous three years.

Are applicants interviewed?
All applicants are interviewed either by video-chats (Skype, or Go-to Meeting) or in person in Morgantown. International students are interviewed by video-chats.

Can I transfer graduate coursework from my current institution if I have not completed a Masters degree?
Yes, on admission to the graduate program and upon forming a PhD committee with an advisor, the committee will take into consideration whatever recent graduate coursework you have completed that can contribute to your plan of study given your educational goals and program needs. WVU allows up to 18 credit hours of coursework to be transferred that are not part of a degree program. See Application for Transfer of Graduate Credit to WVU.

Are there examples of Master’s thesis and PhD dissertations completed by recent graduates to get a flavor of the type of research projects that graduate students do at WVU?
Yes, please visit Recent MS thesis and PhD dissertations (http://pharmacy.hsc.wvu.edu/pharmaceutical-systems-and-policy/phd-program-in-health-services-and-outcomes-research/information-for-new-applicants/recent-ms-thesis-and-phd-dissertations) for titles completed by recent graduates.

What is it like to study at West Virginia University (WVU) and live in Morgantown?
West Virginia University, founded in 1867, is located in Morgantown, West Virginia, is one of only 46 public universities that serve their state as research and land-grant institutions. Through 15 colleges and schools, WVU offers 193 bachelors, master’s, doctoral and professional degree programs.

WVU is a Doctoral/ Research University - Extensive as classified by the Carnegie Classification of Institutions of Higher Education -- based on the complexity and breadth of the institution’s mission. As West Virginia’s major research and development center and only comprehensive doctoral-granting institution, WVU faculty conducts over $150 million in sponsored contracts and grants per year.

The WVU System spans the state, including 518 buildings on 15,880 acres (main campus 430 buildings/1,456 acres). Eleven main campus buildings are on the National Register of Historic Places, and WVU operates eight experimental farms and four forests throughout the state. The University’s total operating budget is approximately $900 million. WVU’s student body is comprised of over 31,524 students with 28,776 on the Morgantown campus. These students hail from all West Virginia counties, nearly all 50 states, and close to 100 foreign nations. Chartered in 1873, the WVU Alumni Association is made up of more than 190,000 graduates worldwide in some 135 nations. For more information about West Virginia University and a virtual tour of the campus, visit: http://www.wvu.edu/.

Morgantown, W.Va., population 31,073 (US Census Bureau, 2014), was rated “No. 1 Small City in America” by BizJournals.com. Business Insider named Morgantown the ninth best college town in America. Within easy traveling distance of Washington, D.C., to the east, Pittsburgh, Pa., to the north, and Cleveland and Columbus, Ohio, to the northwest. Other recent rankings: Kiplinger included Morgantown in their 10 great places to live list; one of “Best Sports Cities” by Sporting News; 5th “Best Small Metro” by Forbes; 12th overall “Hottest Small City” by Inc.; one of “50 Smartest Places to Live” by Kiplinger’s; and the second-ranking “Best College Town for Jobs” by Forbes. WVU has divisional campuses in Charleston, Keyser, Martinsburg and Montgomery.

Monongalia County in which Morgantown is located is a community of about 80,000 people in the Appalachian Mountains on West Virginia’s northern border. While the state is rural and the community quiet, Morgantown is within easy traveling distance from Pittsburgh, which is 75 miles (115 kilometers) north, and Baltimore and Washington, both of which are 200 miles (325 kilometers) east. Two major four-lane highways, Interstate 79 and Interstate 68, pass through Morgantown. U.S. 19 and U.S. 119 also pass through Morgantown.

What if I have more questions or concerns?
If your question is not addressed anywhere in the list of frequently asked questions...

- For questions about other programs, life at WVU, and other information for prospective students please visit Graduate Education at http://graduate.wvu.edu/.
- For questions about University policies on graduate programs at West Virginia University, please visit: Undergraduate, Graduate, and Health Sciences Center Catalogs (http://catalog.wvu.edu).

For application related inquiries, status of application file, confirmation of materials, scores, received, admission status, etc., please contact:

Kimberly M. Kelly, Ph.D.
Associate Professor
HSOR Admissions Coordinator
Pharmaceutical Systems & Policy
Telephone: 304-293-1453
E-mail: kmkelly@hsc.wvu.edu

For specific Health Services and Outcomes Research graduate program related inquiries, please contact:

Usha Sambamoorthi, Ph.D.
Professor
HSOR Graduate Program Director
Pharmaceutical Systems & Policy
Telephone: 304-293-1451
Email: usambamoorthi@hsc.wvu.edu

For more details about the PhD program in HSOR go to: http://pharmacy.hsc.wvu.edu/department-of-pharmaceutical-systems-and-policy/phd-program-in-health-services-and-outcomes-research/

Admission Requirements

Applicants considered for admission to the doctoral program must meet the following minimum requirements.

- A professional degree in Pharmacy (Pharm.D.), Medicine (M.D.), or a Master's degree in pharmacy administration. Students with a Master's degree in related fields such as epidemiology, public health, health care administration, are also encouraged to apply. Students with a Master's degree in related fields such as marketing, management, economics, psychology, or sociology with a demonstrated interest or experience in health care may also apply.
- Outstanding students with a B.S. in pharmacy or pharmaceutical sciences may be considered for direct admission into the Doctoral program.
- College transcript with a minimum of a B average (3.0 on a 4.0 scale).
- GRE or GMAT scores (International applicants must also take the TOEFL examination and score at least 550 on the paper exam, 213 on the computer-based exam, or 79-80 on the internet exam) evaluating potential for graduate studies.
- Supportive letters of recommendation (at least three).
- Satisfactory personal or telephone interview (whenever possible).
- Statement (one page) of personal goals describing background, academic/research interests and career objectives.
- A resume or curriculum vitae listing educational and employment history.

Application deadline is February 1st of each year.

International Applicants

International students should also be aware of the following:

- International applicants must present the Test of English as a Foreign Language or TOEFL (minimum of 550 on the paper-based exam, 79-80 on the internet exam, or 213 on the computer-based exam) if they are from a non-English speaking country or the official language of the country is not English. Applicants are urged to arrange for one of these tests well in advance of the desired enrollment period.
- International students who have completed a M.S. degree or any degree in the U.S. may request a waiver for submitting TOEFL results. They should contact the Office of International Students and Scholars (https://oiss.wvu.edu) for approval.
- International students should not plan to leave their country without a formal notification of admission from the Office of Admissions at WVU. International students admitted without an assistantship must submit a statement of financial status in order to be registered at WVU.
- International students admitted to the program must report to the Office of International Students and Scholars upon arrival at WVU. Students are responsible for making sure that they are in compliance with immigration requirements.

Application Process (Major Code 8980)

Deadline: February 1

Application to the Health Services and Outcomes Research PhD program is completed electronically at https://app.applyyourself.com/AYApplicantLogin/fl_ApplicantConnectLogin.asp?id=wvugrad

Please choose Major Code: 8980.

West Virginia University requires the following information for application through the WVU online application portal. Please note that all materials are submitted through the portal. Do not send materials to the School of Pharmacy unless instructed to do so by the Office of Student Services.

1. One copy of official transcripts (original or certified; minimum of a B average or a 3.0 GPA on a 4.0 scale) in a sealed envelope from each college you have attended.
2. Original or certified copies of all degrees/diplomas/certificates received in the original language.
3. Translation of an applicant’s foreign transcripts and diplomas/certificates may be sent directly to a foreign transcript service for evaluation. If using a foreign transcript service, please have the evaluated documents submitted the WVU Office of Graduate Admissions.
4. Official GRE Scores and TOEFL or IELTS scores.
5. Statement of personal goals describing your background, academic interests, and career objectives.
6. A resume or curriculum vitae listing educational and employment history.
7. Three letters of recommendation from persons who are in a position to evaluate your potential for graduate school. At least one recommendation must be from a person at the last school you attended for full-time study, unless you have been out of school for five years or longer.

Direct admission related inquiries to:
Kimberly M. Kelly, Ph.D.
Students considered for admission will participate in an interview and will be notified of their candidacy in the spring prior to admission.

- See more at:  http://pharmacy.hsc.wvu.edu/department-of-pharmaceutical-systems-and-policy/phd-program-in-health-services-and-outcomes-research/

**Major Learning Goals**

The overall goals of the PhD program in Health Services and Outcomes Research are:

1. To educate and train highly qualified individuals to pursue independent research in health services and outcomes research (HSOR) within interdisciplinary teams, and to function and contribute as a member of a research team.
2. To prepare competent scientists able to contribute to health-related research, industrial research and development, pharmaceutical education, and scholarship.
3. To advance research in pharmaceutical and healthcare delivery.
4. To provide leadership for the pharmacy profession in research, graduate education, and health policy making.

The program is designed to prepare students to become independent researchers. Students will develop competencies in the scientific research process through didactic studies and conceptualizing, designing, conducting, and reporting original research.

**Didactic Studies**

1. To learn basic principles and apply these principles to specific disciplines and related fields to cultivate a broad background of knowledge.
2. To develop research skills, including scientific communication and critical thinking/problem solving abilities by participating in seminars and designated research skill courses.

**Research Training**

1. To acquire practical experience in conducting original research, including acquisition of background information (e.g. literature research), problem development, experimental design and experimentation, collecting primary data and using secondary data, and data analyses.
2. To foster research communication skills by writing abstracts for research presentations, manuscripts for publication, research grant proposals, and a thesis or dissertation.

3. To gain additional insight into research and scholarship by participating in scholarly exchanges with faculty and students in the WVU School of Pharmacy, the Health Sciences Center (HSC), as well as the national and international healthcare community.

Pharmaceutical and Pharmacological Sciences

Degree Offered

- Doctor of Philosophy

Introduction

The WVU School of Pharmacy offers graduate programs in the pharmaceutical and pharmacological sciences for the Ph.D. degree. The school is advantageously located in the Health Sciences Center complex which also houses all departments of the Schools of Medicine, Nursing, and Dentistry, as well as a comprehensive medical library, audio-visual and computer-based learning center, research core facilities, and laboratory animal quarters. State-of-the-art research laboratories are located throughout the Health Sciences Center complex to facilitate interactions with the Mary Babb Randolph Cancer Center, Center for Neuroscience, and Center for Cardiovascular and Respiratory Sciences. In addition, the Health Sciences Center has easy access to the Evansdale and Downtown campuses of WVU through a personal rapid transit (PRT) system. The scientific community, which is especially well-developed, draws on area scientists throughout WVU, the Centers of Disease Control/National Institute on Occupational Safety and Health (CDC/NIOSH), Federal Bureau of Investigation (FBI), and a variety of research centers supported by the National Institutes of Health (NIH), National Science Foundation (NSF), and the Department of Energy (DOE). A CDC/NIOSH research facility is two blocks away, and Mylan Pharmaceuticals, a leading generic drug producer in the world, is located across the street from the Health Sciences Center. In addition, the school has long-standing collaborations with several state agencies and multinational pharmaceutical companies.

Degree Offered

- Doctor of Philosophy

Research interests are complementary to the focus of pharmaceutical and pharmacological sciences. Key areas of research interest and expertise in pharmaceutical and pharmacological sciences include: pharmaceutical sciences, pharmacology, cancer, neuroscience, nanoscience, and toxicology.

Graduate Program Pharmaceutical and Pharmacological Sciences

The School of Pharmacy offers a doctor of philosophy (Ph.D.) degree in pharmaceutical and pharmacological sciences. The graduate program provides interdisciplinary, research-oriented curricula designed to develop the interests, capabilities, and potential of the individual student. Specialty areas of study include: pharmacology, drug metabolism, cancer cell biology, nanotechnology.

Upon completion of the second year of study, students must submit a formal plan of study and a research plan that is approved by their Ph.D. committee. Progress is expected to continue with guidance from the student’s research committee. Final admission to candidacy requires satisfactory performance on written and oral qualifying examinations as well as a dissertation proposal defense. Subsequent to admission to candidacy, a substantial part of the program is devoted to an original research project which culminates in a first-authored publication and dissertation. To be recommended for a Ph.D., the dissertation must be satisfactorily completed and defended at an oral examination.

Academic Standards

No credits are acceptable toward a graduate degree with a grade lower than a C. A graduate student is expected to have a cumulative grade point average of at least 3.0 in all graduate courses to continue in the program and to qualify for a Ph.D. degree.

Admission Requirements

Applicants for admission into the graduate program must satisfy the WVU and Health Sciences Center general requirements for admission as a graduate student. The applicant must possess a baccalaureate degree, background in a suitable area of study, an overall grade point average of at least 3.0, and the aptitude and interest for graduate work in pharmaceutical and pharmacological sciences or health outcomes research to be admitted. Graduate Record Examination (GRE) scores in the verbal, quantitative, and analytic essay portions are required from all students planning on entering the graduate program. TOEFL scores are required of international students from countries where English is not the primary language.

To obtain specific information related to the school’s graduate programs, graduate faculty research interests, and availability of graduate assistantships or fellowships, applicants may contact:

Grazyna D. Szklarz, Ph.D.
Graduate Director,
Pharmaceutical and Pharmacological Sciences Program
Associate Professor,
Department of Pharmaceutical Sciences
WVU School of Pharmacy
Doctor of Philosophy

The School of Pharmacy offers a doctor of philosophy (Ph.D.) degree in pharmaceutical and pharmacological sciences aimed at training competent researchers and educators.

DOCTOR OF PHILOSOPHY (PHD)

Student Learning Outcomes of the Pharmaceutical & Pharmacological Sciences graduate education program are focused on preparing students to become independent researchers. To be successful in our program pathways, students will need to develop competencies in the scientific research process through didactic studies in an area of emphasis and then conceptualizing, designing, conducting, and reporting original research.

Student Learning Outcomes

- Learn basic and applied principles in specific disciplines and related fields in order to develop a broad background of knowledge.
- Develop research skills including scientific communication and critical thinking/problem solving ability by participating in seminars and designated research skill courses.
- Gain hands-on experience in conducting original research, including acquisition of background information (e.g. literature research), experimental design and experimentation.
- Develop research communication skills by writing abstracts for research presentations, manuscripts for publication, research grant proposals, and a thesis or dissertation.
- Gain additional insight into research and scholarship by participating in scholarly exchanges with faculty and students in the WVU School of Pharmacy, the Health Sciences Center (HSC), and the West Virginia University community.
- Be able to pursue independent research in specialized fields in interdisciplinary teams and to function and contribute as members of research teams
- Be competent scientists that are able to contribute to health-related research, industrial research and development, pharmaceutical education, and scholarship

Doctor of Pharmacy (Pharm. D.)

Interprofessional Education Opportunities

A wide array of health care learners at West Virginia University enables pharmacy students to learn with, from and about other health care professionals and students to prepare them to improve patient outcomes through interprofessional collaboration. Along with students from medicine, dentistry, public health, nursing, physical/occupational therapy, and others, students work collaboratively in interprofessional learning experiences. At WVU, interprofessional education is a longitudinal thread that is progressive and reinforced throughout all four years. These experiences are supplemented by co-curricular activities such as community service projects outside of the classroom and other extracurricular activities. Experiences include:

- First Year Experience: First year longitudinal experience with students from a variety of health professions discussing and working through hands-on activities related to professional roles, teamwork, communication, and quality and safety.
- Second Year Service Learning Practice Experience: Yearlong project devoted to advancing the objectives of the US Department of Health and Human Services’ Healthy People 2020 initiatives. Students work collaboratively with students from another health professions discipline to develop and implement a project with a variety of community partners.
- Third Year Ambulatory Care Pharmacy Practice Experience: Third year students work in conjunction with medical, dental, and nursing students to evaluate the health of first year health sciences students and help create a major health goal to achieve over the course of the first year of the professional programs.
- Third Year Acute Care Pharmacy Practice Experience: Third year students work with nursing and medical students for a simulated patient care rounds experience in the West Virginia Simulation Training and Education for Patient Safety (WV STEPS) Center.
- Fourth Year Advanced Pharmacy Practice Experiences: Students work with a variety of students from other health professions providing direct patient care during five-week rotations in a variety of health care settings.

Program Information

AREAS OF EMPHASIS IN ADVANCED CLINICAL PRACTICE

The Advanced Clinical Practice Area of Emphasis (AoE) is designed to enhance the preparation and competitiveness of Doctor of Pharmacy students applying for a PGY-1 residency. The AoE focuses on providing didactic and experiential education, as well as one-on-one mentorship, to allow students to understand and appreciate the nuances of clinical pharmacy practice. This track will offer a road map for students to be successful in critical areas including scholarship experience, organizational involvement, experiential education, and additional basic tools for navigating the application and interview process. The experiences provided in the AoE will provide students with a strong core foundation upon which further training in a residency
program can expand upon. More information can be found on the School's web page at http://pharmacy.hsc.wvu.edu/student-services/description-of-the-professional-program/areas-of-emphasis-certificate-program/.

AREA OF EMPHASIS IN COLLEGE TEACHING IN PHARMACY

This area of emphasis program helps to prepare student pharmacists for teaching at the college level. The program combines courses and expertise at the university level with those at the School of Pharmacy to provide a broad range of knowledge and experience in pedagogy training, diversity issues in higher education, current issues in academic pharmacy education, and mentored teaching experience. Together, the program components will develop students’ ability to design and teach their own courses while implementing effective classroom techniques and assessment. By completing the area of emphasis, students will be more competitive for residency and fellowship programs with an emphasis in teaching and will also be prepared to participate in college teaching as an adjunct pharmacy instructor or preceptor. More information can be found on the School's web page at http://pharmacy.hsc.wvu.edu/student-services/description-of-the-professional-program/areas-of-emphasis-certificate-program/.

AREA OF EMPHASIS IN GERIATRIC PHARMACY

This area of emphasis program offers students pursuing the Doctor of Pharmacy degree the opportunity to explore the basic biological, psychological, sociological and medical processes of aging, the needs and experiences of older people, and the impact of social policies related to human aging. An understanding of the unique experiences and needs of older adults in Appalachia and other rural areas is emphasized. More information can be found on the School's web page at http://pharmacy.hsc.wvu.edu/student-services/description-of-the-professional-program/areas-of-emphasis-certificate-program/.

AREA OF EMPHASIS IN GLOBAL HEALTH (FOR PHARMACY)

The area of emphasis program in global health trains students to be able to provide patient-centered care at home and abroad. Its focus is on providing both didactic and experiential education that will allow students to have an understanding and an appreciation for the global nature of healthcare and how pharmacy practice can impact individuals worldwide. More information can be found on the School's web page at http://pharmacy.hsc.wvu.edu/student-services/description-of-the-professional-program/areas-of-emphasis-certificate-program/.

AREA OF EMPHASIS IN TRANSLATIONAL PHARMACY RESEARCH

The Area of Emphasis (AoE) in Translational Pharmacy Research will allow students to understand and recognize the importance of and participate in translational research (e.g., how basic sciences contributions are applied in improving the quality of patients’ health, how observations in the clinic direct new scientific hypotheses, and how health services and outcomes research impacts access, cost, quality and outcomes of health care). Participants conduct original research under the mentorship of a faculty member. More information can be found at http://pharmacy.hsc.wvu.edu/student-services/description-of-the-professional-program/areas-of-emphasis-certificate-program/.

DUAL PHARM.D./MASTER OF BUSINESS ADMINISTRATION (M.B.A.)

The dual Pharm.D./Master of Business Administration (M.B.A.) program provides outstanding career opportunities for graduates by building expertise in business administration principles and managerial practices coupled with therapeutic knowledge and expertise in medication management. The goal of the dual degree program is to prepare the next generation of leaders, managers, and administrators for rewarding careers in health care or pharmaceutical organizations. Opportunities for the dual degree graduates include leadership positions in hospitals and health systems, pharmacy benefit management companies, government organizations, the pharmaceutical industry, chain pharmacy corporations, and owning, franchising, or operating an independent pharmacy. Through a well-coordinated plan of study in both degree programs, the dual Pharm.D./M.B.A. degree students will be able to obtain two nationally-accredited graduate degrees - M.B.A. and Pharm.D. degrees - during the course of the 4-year Pharm.D. program. Additional information, including the plan of study, can be found at http://pharmacy.hsc.wvu.edu/student-services/description-of-the-professional-program/areas-of-emphasis-certificate-program/.

Academic and Technical Standards

In accordance with section 504 of the Rehabilitation Act of 1973 (PL 93-112), and incorporating the guidelines of the Americans with Disabilities Act (ADA PL 101-336) enacted by Congress in 1990, the West Virginia University School of Pharmacy has adopted minimal technical standards for the assessment of admission, scholastic advancement, and graduation for its professional degree (Doctor of Pharmacy) program.

Because the Doctor of Pharmacy (Pharm.D.) degree signifies that the holder is a pharmacist prepared for entry into the practice of pharmacy, it follows that graduates must have the knowledge, skills, and demeanor to function in a broad variety of clinical situations and to conduct a wide spectrum of pharmaceutical care activities.

Candidates for admission into, progression through, and graduation from the Pharm.D. program must have the functional use of the senses of vision and hearing. Candidates’ pharmaceutical skills will also be lessened without the functional use of the senses of equilibrium, smell, and taste. Additionally, they must have sufficient motor function to permit them to carry out the activities described in the sections that follow. They must be able to consistently, quickly, and accurately integrate all information received by whatever sense(s) employed, and they must have the intellectual ability to learn, integrate, analyze, and synthesize data.

A candidate for the Pharm.D. degree must have abilities and skills of five varieties including:
• Observation
• Communication
• Motor
• Conceptual, integrative, and quantitative
• Behavioral and social

Technological compensation can be made for some handicaps in certain of these areas, but a candidate should be able to perform in a reasonably independent manner. The use of a trained intermediary means that a candidate’s judgment must be mediated by someone else’s power of selection and observation. For details, see the Technical Standards document published online at http://pharmacy.hsc.wvu.edu/studentservices/description-of-the-professional-program.

**Student Course Load**

Students in the Doctor of Pharmacy program are expected to register for all required classes in a semester unless directed not to do so by the Committee on Academic and Professional Standards or the Office of Student Services. Full-time students in the School of Pharmacy may not register for less than nine credit hours during any semester without written approval of the Committee on Academic and Professional Standards or the Office of Student Services. For an exception, a letter of petition must be submitted to the Committee on Academic and Professional Standards through the School of Pharmacy’s Office of Student Services.

**Promotion and Graduation Requirements**

**EVALUATION OF STUDENT PROGRESS**

Promotion of a student in the Doctor of Pharmacy program is evaluated in two major areas: successful completion of all required work and appropriate adherence to the professional standards of the School of Pharmacy.

The following information is only a brief outline of the School of Pharmacy policies and procedures. Detailed requirements and policies for evaluation of student progress and graduation can be found in the *Policy on Academic and Professional Standards Governing the Doctor of Pharmacy Degree Program at West Virginia University School of Pharmacy* and may be viewed on the School of Pharmacy website. Copies are available at the Office of Student Services. The Committee on Academic and Professional Standards administers all promotion and academic penalty rules.

**ACADEMIC COURSEWORK REVIEW**

The Committee on Academic and Professional Standards of the School of Pharmacy reviews the performance of each student in every course at the end of each academic period and makes recommendations to the dean.

If a student has been found to have a marginal performance in any course as indicated by a grade less than a C or a semester GPA less than 2.5, probation will be recommended. Students on probation are not eligible to hold office in student organizations or receive School of Pharmacy scholarships. Students on probation are expected to be present for all of their classes and laboratories. If a student fails to complete any required remedial actions or meet the specified performance requirements during the probationary period, academic suspension or dismissal may be recommended.

If a student has been found to have an unsatisfactory performance as indicated by a grade of F in any course, or an accumulation of narrative evaluations that indicate an academic deficiency or inadequate integration of curricular content, suspension or dismissal from the School may be recommended. In selected circumstances, the committee may recommend remedial work or repetition of all or a portion of the curriculum. Exceptions may be made only on recommendation of the committee.

After academic dismissal, a student may apply for readmission to the School of Pharmacy. Readmission of a student is the prerogative of the dean following a recommendation by the Committee on Academic and Professional Standards.

**GRADING POLICY**

Courses in the Doctor of Pharmacy degree program are graded either as A (excellent), B (good), C (fair), F (failing), I (incomplete), or on a (P) pass/(F) fail basis. Grades may be accompanied by a narrative report on the student’s progress, noting any factors requiring remedial work or counseling. It is customary that all experiential courses are accompanied by a narrative evaluation. Narrative evaluations are kept in the student’s file in the Office of Student Services.

The grade of incomplete (I) is given when the instructor believes that the work is unavoidably incomplete. If the grade of I is not removed by the satisfactory completion of the work before the end of the next semester in which the student is in residence, it becomes a failure (F) unless special permission to postpone the work is obtained from the Committee on Academic and Professional Standards. It is the responsibility of the student to consult the instructor about the means and schedule for completing incomplete courses. A contract specifying what work must be completed and when should be drawn up by the instructor and signed by the instructor and student.
PROFESSIONAL STANDARDS REVIEW

In view of public and professional responsibilities, the faculty of each of the professional schools of WVU has the authority to recommend to the president of the University the removal of any student from its rolls whenever, by formal decision reduced to writing, the faculty finds that the student is unfit to meet the qualifications and responsibilities of the profession. Further information is provided in The Policy on Academic and Professional Standards Governing the Doctor of Pharmacy Degree at West Virginia University School of Pharmacy, which is available at the School of Pharmacy Office of Student Services.

Special Requirements

The Board of Pharmacy requires 1,500 clock hours of internship experience for licensure in West Virginia. Students are required to obtain an Intern Certificate from the West Virginia Board of Pharmacy in order to accrue intern hours. Any hours worked before becoming a registered intern will not apply toward meeting the WV board requirements. Students must have a valid Intern Certificate throughout their entire experiential years of the Pharm.D. program. The certificate must be maintained until completion of the entire internship. The Board of Pharmacy holds final authority over internship rules and regulations. Up to 800 hours of the total of 1,500 required by the WV Board of Pharmacy may be obtained via the WVU School of Pharmacy experiential program.

Students in the Pharm.D. program will perform one four-week experiential rotation at the conclusion of the first year and a two-week experiential rotation at the conclusion of the second year of the professional curriculum and eight five-week rotations during the Advanced Pharmacy Practice Experience (APPE) year of the program. Two of the eight blocks performed in the fourth year of the curriculum must be performed in designated rural sites. Site placement and sequencing will occur in the semesters prior to the experiential activities. Students may incur additional housing and/or travel costs when taking part in the experiential rotations. Opportunity will be provided for students to prioritize their site selection; however, ultimate authority for site selection will be maintained by the School of Pharmacy. All didactic coursework (required and elective) must be successfully completed prior to beginning the fourth-year APPE experiential rotations.

Legal Requirements

To qualify for examination for licensure by the West Virginia Board of Pharmacy, information can be found at http://www.wvbop.com/index.php?option=com_content&view=article&id=52&Itemid=82.

Interns must be registered with the West Virginia Board of Pharmacy and must be enrolled in or a graduate of an accredited school of pharmacy to gain experience acceptable for the internship requirement. Details may be obtained from the Office of Student Services.

Course Exemptions

A student who seeks exemption from one or more professional courses based upon previous academic experience must submit a written petition to the Committee on Academic and Professional Standards. Only courses taken through an accredited school of pharmacy or medicine will be considered for possible substitution.

Pharm.D. Admissions

Admissions are competitive. Criteria used to evaluate candidates include academic performance, as measured by the grade point averages (GPA) for all the above-noted prerequisite courses and the cumulative GPA achieved in all prior college-level coursework, Pharmacy College Admissions Test (PCAT) scores (including a written essay), a personal interview, and letters of recommendation. Prerequisite courses may be taken at an accredited U.S. or foreign institution of higher education and completed with a grade of C or better. Careful consideration is given to those personal qualifications which bear upon the fitness of applicants for the study and practice of the profession of pharmacy.

All applicants must first file an initial electronic application with the Pharmacy College Application Service (PharmCAS). Instructions for completing the application are found on the PharmCAS website: http://www.pharmcas.org/. Application deadlines are subject to change; check PharmCAS, the School of Pharmacy website at http://pharmacy.hsc.wvu.edu or contact the School to verify current deadlines. Supplemental applications specific to the WVU School of Pharmacy will then be sent to selected candidates deemed qualified by the Committee on Admissions. A $50 fee must accompany the supplemental application.

Each applicant who is recommended for acceptance is required to pay a deposit of $500 before his or her name is added to the official list of those accepted by the School of Pharmacy. If the applicant enrolls, this sum is applied to the first-semester tuition. If the applicant fails to enroll, this deposit is forfeited.

With enrollment in the School of Pharmacy, all students must comply with the immunization and diagnostic procedures required by the WVU Board of Governors, WVU, the WVU Robert C. Byrd Health Sciences Center, and the School of Pharmacy.

Complete information may be obtained from:
School of Pharmacy Office of Student Services  
WVU Robert C. Byrd Health Sciences Center  
P.O. Box 9500  
Morgantown, WV 26506-9500

Pharmacy College Admission Test

Completion of the Pharmacy College Admission Test is a requirement for admission to the School. It is recommended that the student take this test in the summer or fall before making application for admission. Information concerning time and place of the test can be obtained from the School of Pharmacy, or by NCS Pearson, Inc.

PCAT Customer Relations  
19500 Bulverde Road  
San Antonio, TX 78259  
1-800-622-3231 or (210) 339-8710  
Fax 1-800-727-0811 or 1-800-999-5941  
or http://www.PCATweb.info

Personal Interview

The Committee on Admissions requires a personal interview with selected candidates who qualify for a supplemental application. The Committee on Admissions will determine which applicants are to receive the supplemental application. Interviews are held during the fall and spring semester at the WVU Robert C. Byrd Health Sciences Center in Morgantown.

Recommendations on Academic Performance

A total of three recommendations are required. Two academic recommendations are required and must be provided by course instructors in any two of the pre-pharmacy course requirements. The third recommendation may be provided by a variety of individuals. Please refer to the PharmCAS website for more detailed information.

Early Decision

The Early Decision program is a binding option for applicants who have decided that West Virginia University is the degree program of their first choice and that they will enroll if accepted. As an Early Decision applicant, you can apply to only one pharmacy degree program.

The Early Decision application deadline is typically the first of September. In addition to completing the PharmCAS application, you must arrange for PharmCAS to receive all of your official transcripts and fee by the September deadline. If your application, transcripts, or fee arrives after the deadline, PharmCAS will automatically change your file from early decision status to regular status.

You may be offered early admission, denied admission, or deferred to regular applicant status. If you are offered admission as an Early Decision applicant, you are obligated to accept the offer and you will not be permitted to apply to other PharmCAS institutions. If, however, you are denied admission as an Early Decision applicant, you may apply to other PharmCAS institutions for an additional fee. Refer to the PharmCAS application fee schedule to determine the cost to apply to each additional program. PharmCAS institutions will make admission decisions on early decision applicants by mid October.

Admission to Advanced Standing for Transfer Students

If space is available, students from other accredited schools of pharmacy may be admitted, provided they meet the prerequisite course requirements of the WVU School of Pharmacy, have at least a 2.5 professional grade point average, are in good academic and professional standing at the school of origin, and are eligible for continuation toward a degree in pharmacy at the school initially attended. Grades of D in professional courses cannot be transferred.

Provisional Admission

An applicant accepted into the first year, or an advanced standing transfer student, is expected to have met all entrance requirements and satisfactorily completed all pre-pharmacy coursework in progress prior to matriculation. A satisfactory performance in the completion of such coursework is defined as one that is consistent with the student’s previous academic record and must include no grades of D or lower in prerequisite courses. While it is preferred that all prerequisite coursework be completed by the end of the spring term prior to matriculation, it is possible to complete up to two non-sequential prerequisite courses before the start of pharmacy student orientation in the fall semester of matriculation. Failure to do so will result in revocation of the acceptance by the Admissions Committee.

Admitted students must remain free of any violations of local, state, or federal law that would prohibit their ability to obtain an intern license from the West Virginia Board of Pharmacy.
Furnishing or causing to furnish false or incorrect information for the purpose of gaining admission to the School of Pharmacy constitutes grounds for disciplinary action including, but not limited to, expulsion or revocation of acceptance.

Students in the School of Pharmacy agree to abide by the provisions of the Student Code of Academic and Professional Integrity. Upon admission, each student is required to return a signed statement to the Office of Student Services indicating the student has read and understands the Policy on Academic and Professional Standards and the Student Code of Academic and Professional Integrity of the West Virginia University School of Pharmacy. The code and copies of the statement are available in the Office of Student Services in the School of Pharmacy, and on the School of Pharmacy website.

| F2A/F2B - Science & Technology | 4-6 |
| F3 - Math & Quantitative Skills | 3-4 |
| F4 - Society & Connections | 3 |
| F5 - Human Inquiry & the Past | 3 |
| F6 - The Arts & Creativity | 3 |
| F7 - Global Studies & Diversity | 3 |
| F8 - Focus (may be satisfied by completion of a minor, double major, or dual degree) | 9 |

Total Hours 31-37

Please note that not all of the GEF courses are offered at all campuses. Students should consult with their advisor or academic department regarding the GEF course offerings available at their campus.

Degree Requirements

The awarding of a doctor of pharmacy degree to a student is approved by the dean of the School of Pharmacy after receipt of recommendations from the Academic and Professional Standards Committee. Candidates must meet the following criteria:

1. Meet the academic and professional standards, criteria, and requirements outlined in The Policy on Academic and Professional Standards Governing the Doctor of Pharmacy Degree at West Virginia University School of Pharmacy, which is available at the School of Pharmacy Office of Student Services and on the school's website
2. Satisfactorily complete all of the required coursework in a timely fashion, which may not exceed five years from the date of initial enrollment into the professional program
3. Pay all fees
4. Complete the last year’s work in residence in this school
5. Satisfactorily complete the required number of experiential rotations and demonstrate the attainment of minimum competencies
6. Complete 100 hours of volunteer community service

#### Hours
- Fall: 19
- Spring: 18
- Summer: 1

#### Total credit hours: 156

* Prior to beginning the experiential rotations, each student enrolled in the School of Pharmacy professional program must complete a minimum of eight credit hours of school of pharmacy elective courses or courses from a list of approved professionally-related electives as part of the pharmacy curriculum. Electives must be completed during the first three years of the four-year professional program. No course taken prior to admission into the School of Pharmacy may be used nor repeated to meet the elective requirements of the professional curriculum, and no reduction in elective requirements will be allowed for courses completed or degrees earned prior to enrollment in the program.

### Areas of Emphasis Offered:

- Advanced Clinical Practice (p. 691)
- College Teaching in Pharmacy (p. 691)
- Geriatric Pharmacy (p. 692)
- Global Health (for Pharmacy) (p. 692)
• Translational Pharmacy Research (p. 693)

**Advanced Clinical Practice Area of Emphasis Requirements**

6

**ADDITIONAL REQUIREMENTS**

**Mentorship Program:**

- Each student will be assigned a faculty mentor and meet regularly to discuss career goals, progression through the program, curriculum vitae development, and other issues that arise.
- In addition, the AoE coordinator(s) will meet with the students as a group at least twice a semester to discuss global issues and professional development topics.

**Research Project:**

- Each student must complete some type of scholarly project that is presented for dissemination in some venue. This can be a research project presented as a poster at a national meeting, a review article published in a peer-reviewed journal, a patient case series presented at the local WVU HSC research day, or any number of other options.

**Advanced Pharmacy Practice Experiences (APPE) Rotations:**

- As part of the advanced pharmacy practice experiences (APPEs), students will be required to complete an approved plan of study, which will include at least four direct patient care rotations, as well as a drug information equivalent rotation (such as a drug information center rotation or poison center rotation).
- All student APPE schedules must comply with Accreditation Council for Pharmacy Education (ACPE) Standards.

**College Teaching in Pharmacy Area of Emphasis**

The area of emphasis has four major requirements: a higher education pedagogy course; a higher education diversity course; pharmacy-specific coursework; and a pharmacy teaching experience.

**Eligibility and Deadlines:**

Students must be currently enrolled in the Doctor of Pharmacy program and in good academic standing. Up to five students will be enrolled per year. Students will complete an application for admission to the area of emphasis program, including the following elements:

1) a cover letter
2) an essay describing the applicant’s future career goals and what he or she expects to gain through completion of the Area of Emphasis
3) a current curriculum vitae
4) an unofficial transcript will be accessed through the WVU School of Pharmacy, Office of Student Services

Total Hours: 10

**Geriatric Pharmacy Area of Emphasis**

Eligibility and Deadlines:

Students must be currently enrolled in the Doctor of Pharmacy program and in good academic standing. Students will complete an application for admission to the area of emphasis program, including the following elements:

1) a cover letter
2) an essay describing the applicant’s future career goals and what he or she expects to gain through completion of the Area of Emphasis
3) a current Curriculum Vitae
4) an unofficial transcript will be accessed through the Office of Student Services.

Total Hours: 10

**Global Health (for Pharmacy) Area of Emphasis Requirements**

The area of emphasis program in global health trains students to be able to provide patient-centered care at home and abroad. Its focus is on providing both didactic and experiential education that will allow students to have an understanding and an appreciation for the global nature of healthcare and how pharmacy practice can impact individuals worldwide. More information can be found on the School's webpage at [http://pharmacy.hsc.wvu.edu/student-services/description-of-the-professional-program/areas-of-emphasis/certificate-program/](http://pharmacy.hsc.wvu.edu/student-services/description-of-the-professional-program/areas-of-emphasis/certificate-program/).

ADDITIONAL REQUIREMENTS

1) Students will have to complete either: a) an advanced pharmacy practice experience (APPE) that takes place in an underserved community, such as a rotation in Anchorage or Nome, Alaska, one with the Indian Health Service, or one at a Federally Qualified Health Center (e.g., Cabin Creek, Camden-on-Gauley), or b) an approved summer internship or medical mission that contains a global health emphasis. The summer internship or medical mission must be focused on global health and be of a minimum duration of 2 weeks. The school will maintain a list of approved internships when possible. However the student may inquire about the acceptability of other programs which are not listed.

2) All students will serve as Global Health Ambassadors for international students visiting the West Virginia University School of Pharmacy when they are in Morgantown. The Ambassador’s role will require students to: a) organize and host social events outside of the School of Pharmacy attempting to incorporate the visiting students’ wishes into the planned activities, and b) organizing and participating as School of Pharmacy representatives during the HSC’s Global Health Week.

All students must remain in good academic standing in the Doctor of Pharmacy program to remain in the area of emphasis program. Students on probation in the Doctor of Pharmacy program will be evaluated by the Academic Standards committee and may be removed from the area of emphasis program.

Translational Pharmacy Research Area of Emphasis

Research is an integral component of the education and practice of pharmacy, enabling development of new information, technologies, and processes which are essential for improving patient care, therapeutics outcomes and growth of the profession. The importance of research in the profession of pharmacy is well established. The Area of Emphasis (AoE) in Translational Pharmacy Research will allow students to understand and recognize the importance of translational research (e.g., how basic sciences contributions are applied in improving the quality of patients’ health, how observations in the clinic direct new scientific hypotheses, and how health services and outcomes research impacts access, cost, quality and outcomes of health care).

Written Thesis

Oral Presentation and Defense

Total Hours 9

* Students may complete 1-3 hours of research credit. Each credit hour equals 3 hours of laboratory or clinic based research per week.
** Students complete 8-9 hours from the list of electives
ADDITIONAL REQUIREMENTS

• Students involved in clinical research must take the CITI training for Human Research offered through WVU and which must be kept current.
• Present his/her project as a poster or oral presentation at the Annual HSC Research Day.
• Offer an oral presentation of the work (which is open to the public). Students that are enrolled in the AoE must attend.
• Write a summary of his/her research and findings. This project will be distributed to the certification committee members at least three weeks prior to the oral presentation. The certification committee will be comprised of the research mentor, two additional faculty members selected by the research mentor, and the AoE program director. One committee member can be from outside of the School of Pharmacy with prior approval by the Associate Dean for Research and Graduate Programs.
• All Pharm.D. students in good academic standing are eligible for participation. Acceptance and continuation in the program is contingent on each student identifying a research mentor and committee members, who will guide the research progress and completion.

Major Learning Goals

DOCTOR OF PHARMACY (PHARM. D.)

Educational Outcomes

Upon successful completion of the West Virginia University Doctor of Pharmacy degree program, the graduate will be able to accomplish the following educational outcomes (EOs):

EO 1 Foundational Knowledge and Skills (Learner) - Develop, integrate, and apply foundational knowledge (e.g., concepts, facts, principles) from biological, pharmaceutical, social, behavioral, administrative, and clinical sciences to evaluate the scientific literature, explain drug actions, solve therapeutic problems, and advance individual and population health.

• Acquire and demonstrate depth and breadth of knowledge of foundational scientific, clinical, socioeconomic, and humanistic concepts and skills.
• Explain how knowledge in the foundational sciences is integral to pharmacy practice.
• Integrate knowledge from foundational sciences to explain how specific drugs or drug classes work and evaluate their potential value in individuals and populations.
• Apply foundational concepts and skills to practice.
• Use scientific reasoning and critical thinking skills in practice to address problems, issues, or concerns.
• Develop and apply creative and innovative approaches to effectively resolve problems and improve patient outcomes.
• Apply an evidence-based approach to practice by identifying appropriate questions to address, using databases and other resources to retrieve information, critically analyzing and interpreting relevant scientific information and other evidence, formulating sound conclusions, and integrating the best published evidence with expertise and individual patient values/needs.
• Analyze and use epidemiologic, pharmacoeconomic, medication utilization, and quality improvement data when developing evidence-based programs and protocols.
• Apply knowledge of research methodology to design or conduct basic research, practice-based studies, or clinical trials.
• Use information technology where appropriate to design or conduct basic research, practice-based studies, or clinical trials.

EO 2 Communication Skills (Communicator, Educator) – Effectively communicate verbally and nonverbally when interacting with an individual, group, or organization.

• Use appropriate verbal and nonverbal communication skills with individuals or groups, including patients, health professionals and others.
• Use effective written communication skills with patients, health professionals, and others, including the development of documents pertinent to professional or organizational needs (e.g., monographs, reports).
• Educate target audiences by using the most effective method to deliver information, in coordination with other health care professionals as appropriate.
• Use technology to facilitate or enhance professional communications and presentations.

EO 3 Professionalism, Advocacy, and Leadership (Professional, Leader, Advocate) - Exhibit behaviors and values consistent with the professional trust given by patients, healthcare providers, and society; assure that patients’ best interests are represented; and demonstrate responsibility for achieving shared goals regardless of position.

• Conduct pharmacy practice duties and patient care responsibilities in accordance with applicable federal, state, and local laws, statutes, and regulations, as well as professional guidelines and standards.
• Serve as an advocate, leader, and change agent for pharmacy and pharmacists’ professional roles and responsibilities by implementing or participating in new, evidence-based models for cost-effective pharmacist-delivered patient care.
• Serve as an advocate for community and patient health and medication therapy needs, including disadvantaged or underserved patients and those from diverse cultural and socioeconomic backgrounds, while honoring their autonomy and dignity.
• Serve as a positive role model in actions/communications for peers and other health care providers by maintaining a high standard for personal and professional demeanor and ethical conduct.
• Respect all points of view in professional interactions while placing patients’ needs and desires at the forefront.
• Demonstrate compassion, empathy, honesty, integrity, ethical behavior and altruism in all actions and communications with patients, families, and care providers.
• Develop professional competence through ongoing, active and self-directed pursuit of new knowledge and skills.
• Identify and analyze emerging health care and pharmacy issues and incorporate new roles, products and services into practice that can improve patient outcomes.
• Accept accountability and responsibility for one’s words and actions.

EO 4 Self-Awareness (Insightful) – Examine and assess personal knowledge, skills, abilities, attitudes, beliefs, motivation, and emotions and strive for continual improvement.

• Conduct self-assessments on a regular basis and create, implement, evaluate, and modify as needed plans for personal improvement and continuing professional development.
• Recognize personal strengths and limitations and seek assistance when needed.
• Approach tasks and situations with flexibility and a desire to learn.
• Accept constructive criticism and display a willingness to correct and learn from errors.

EO 5 Interprofessional Collaboration (Collaborator) – Actively participate as a healthcare team member by demonstrating mutual respect, understanding, and values to meet patient care needs.

• Collaborate with health care professionals, patients, and/or caregivers to ensure that desired patient-specific or population-based health outcomes are achieved.
• Facilitate team building among health care professionals by developing and maintaining an atmosphere of mutual respect and shared values that place the patient at the forefront.
• Effectively utilize the knowledge, expertise, and unique roles of health care team providers and refer patients to others when indicated.
• Serve as the medication expert on a collaborative care team by managing the pharmacotherapy for patients’ medical conditions and by proactively providing drug product and other medication related information to team members.
• Accept responsibility for medication-related outcomes on the care team.

EO 6 Patient Care (Provider) – Provide patient-centered care as the medication expert.

• Accurately interpret, prepare and/or compound, handle and dispense prescriptions for patients.
• Obtain necessary patient-specific data (e.g., consulting patient records, taking medication histories, performing basic physical assessments, ordering/interpreting lab tests), and evaluate and use these data when performing patient care related responsibilities.
• Evaluate pharmaceutical products, including information about the drug, dosage form, delivery system and cost/benefit, when conducting a medication review or preparing a care plan.
• Conduct comprehensive medication reviews and prepare individualized care plans to optimize patient outcomes, with emphasis on commonly encountered chronic or high risk conditions amenable to pharmacotherapy and patients at greater risk for adverse events.
• Work with patients, caregivers, and health care professionals to implement specific therapy plans.
• Educate and empower patients to take an active role in their health and incorporate recommendations for healthy living and self-care into care plans.
• Monitor and evaluate patients during therapy for drug product or pharmacotherapy problems, patient concerns, or adherence issues and recommend or implement solutions.
• Work with patients and other health care providers to ensure the continued success of individual care plans.
• Document patient-care services in charts/medical records and on forms needed for reimbursement.
• Counsel patients and/or caregivers about the following to help ensure a care plan’s success: i) medications, non-drug therapy, dietary supplements and natural products; ii) insurance and other options for obtaining necessary medications; iii) proper use of testing devices and medical goods and equipment; and iv) healthy lifestyle changes.

EO 7 Population-Based Care (Promoter, Provider) – Design and implement prevention, intervention, and educational strategies for communities to manage chronic disease and improve health and wellness.

• Develop, recommend, and provide preventive health services, such as administration of vaccines and screening tests.
• Develop and implement disease management programs based upon identified needs and priorities (e.g., cost, access, and patient satisfaction considerations; commonly encountered, chronic conditions managed by pharmacotherapy).
• Evaluate and adjust interventions as needed to maximize population health.
• Promote public awareness of health promotion and disease prevention strategies.
• Design, develop, and disseminate public health related educational materials or services in a culturally competent manner.
• Work with health care professionals and other personnel to identify and help resolve key public health issues and problems, and participate in policies or strategies to address them.

EO 8 Pharmacy and Medication Use Systems (Manager) – Manage patient healthcare needs using human, financial, technological, and physical resources to optimize the safety and efficacy of medication use systems.

• Demonstrate knowledge of pharmacy management including operations, human and fiscal resources, marketing, and leadership principles.
• Design, use, and manage systems to prepare, dispense, distribute and administer medications to optimally serve patient’s drug-related needs.
• Use knowledge of the organization and financing of the U.S. healthcare system to provide and effectively manage progressive pharmacy services.
• Develop a business plan for integrating clinical and distributive services that includes methods for supporting and obtaining reimbursement for clinical services provided to patients.
• Demonstrate and apply knowledge of national standards, guidelines, best practices, and established principles and processes for safe medication use to protect patient safety.
• Participate in quality improvement programs and employ performance indicators to enhance the quality of care and cost effectiveness of services provided and to optimize safe, appropriate medication use.
• Participate in developing and performing medication use evaluations to identify and resolve drug therapy problems or concerns.
• Reconcile a patient’s medications when transitioning from one care setting to another by communicating effectively with all involved health care professionals.
• Use current and emerging information and system technologies to enhance safe and effective medication use.
• Provide recommendations for developing and managing a formulary that incorporate pharmacoeconomic principles.
• Actively participate in, and contribute to the development of, strategies to minimize drug misuse/abuse.
Physical Activity and Sport Sciences

Degrees Offered

- Master of Science
- Doctor of Education
- Doctor of Philosophy

The College of Physical Activity and Sport Sciences is organized into two departments: the Department of Coaching and Teaching Studies and the Department of Sport Sciences. The Department of Coaching and Teaching Studies includes the programs in athletic coaching education and physical education teacher education. The Department of Sport Sciences includes the programs in athletic training, sport and exercise psychology, and sport management.

The Ph.D. program in kinesiology administered through the College of Physical Activity and Sport Sciences has two major areas: sport and exercise psychology and coaching and teaching studies (designed for students interested in athletic coaching education or physical education teacher education). The college’s master’s program allows specialization in athletic coaching education, athletic training, physical education teacher education and sport management leading to a master of science in physical education. The master’s degree program in teacher education is run using a hybrid distance education format with courses offered in the summer on campus and courses during the academic year offered online. The master's degree programs in athletic coaching education and sport management have both on-campus and hybrid distance education cohorts (the hybrid distance education cohorts in each of these majors offer courses in the summer on campus and offer courses during the academic year online). The master's program in sport and exercise psychology is only available as part of the doctoral program (i.e., students must be accepted into the Ph.D. program in order to be enrolled in the masters degree program).

The facilities of the College of Physical Activity and Sport Sciences include the gymnasium, dance studio, and swimming pool in E. Moore Hall; a gymnasium and fitness center in Stansbury Hall; bowling lanes and billiard area in the Mountainlair; indoor track and sports area in the Shell Building; outdoor areas including the stadium, tennis courts, soccer and field hockey fields, and outdoor track; and the Natatorium with its pool and diving well. The College of Physical Activity and Sport Sciences moved into a new building bordering the Student Recreation Center and intramural fields in July of 2014. The new building has 8 technology based classrooms, three large seminar/conference rooms, a 46 seat computer lab, research space, a teacher behavior laboratory, fitness room, multipurpose room, and faculty offices. Additional faculty and staff offices are in E. Moore Hall, Stansbury Hall, the Natatorium, and the Shell Building.

For additional information, contact the Graduate Coordinator, College of Physical Activity and Sport Sciences, 375 Birch St., P.O. Box 6116, West Virginia University, Morgantown, WV 26506-6116. Telephone (304) 293-0850.

ADMINISTRATION

DEANS OFFICE

- Dana D. Brooks - Ed.D. (West Virginia University)
  Dean

DEPARTMENT CHAIRS

- Jack Watson - Ph.D. (Florida State University)
  Chair, Sport Sciences
- Valerie Wayda - Ed.D. (West Virginia University)
  Chair, Coaching and Teaching Studies

PROFESSORS EMERITI

- William Alsop - Ed.D. (West Virginia University)
- William Bonsall - M.S. (West Virginia University)
- J. William Douglas - Ph.D. (Ohio State University)
- Patricia K. Fehl - Ed.D. (Indiana University)
- Andrew Hawkins - Ph.D. (Ohio State University)
- Lynn Housner - Ph.D. (University of Pittsburgh)
- Andrew Ostrow - Ph.D. (University of California, Berkeley)
- Beatrice Hurst - M.A. (Columbia University)
- Daniel Ziatz - Ph.D.
Degree Designation Learning Goals

MASTER OF SCIENCE (MS)

A mission of the College of Physical Activity and Sport Sciences is to prepare our students to become effective practitioners and leaders in their respective fields and to enhance the quality of life of the citizens of West Virginia and beyond. The college offers traditional on-campus program emphasis areas in Athletic Coaching Education, Athletic Training, and Sport Management. In addition, the college offers online degree emphasis areas in Athletic Coaching Education, Physical Education Teacher Education, and Sport Management. These programs are characterized by curricular experiences which are designed to broaden perspectives, enrich awareness, deepen understanding, establish disciplined habits of thought, prepare for meaningful careers, and thus help individuals become informed, responsive and productive citizens.

Students in Masters of Science degree programs in CPASS

- Demonstrate skill to utilize various forms of assessment to inform professional practice
- Critically evaluate research to understand best practices in chosen field of study
- Develop an understanding of current issues effecting professional practice
- Engage in professional development to improve practice in field

DOCTOR OF EDUCATION (EDD)

A mission of the College of Physical Activity and Sport Sciences is to prepare our students to become effective practitioners and leaders in their respective fields and to enhance the quality of life of the citizens of West Virginia and beyond. The college offers a Doctorate of Education in Physical Education Teacher Education. These programs are characterized by curricular experiences which are designed to broaden perspectives, enrich awareness, deepen understanding, establish disciplined habits of thought, prepare for meaningful careers, and thus help individuals become informed, responsive and productive citizens.

Students in the Doctor of Education program in CPASS

- Develop leadership and advocacy skills for professional practice
- Demonstrate teaching skills within area of professional practice
- Interpret and applying knowledge to enhance professional practice
- Demonstrate interdisciplinary knowledge in kinesiology

DOCTOR OF PHILOSOPHY (PHD)

A mission of the College of Physical Activity and Sport Sciences is to prepare our students to become effective practitioners and leaders in their respective fields and to enhance the quality of life of the citizens of West Virginia and beyond. The college offers a Doctorate of Kinesiology with an emphasis in Coaching and Teaching Studies or Sport and Exercise Psychology. These programs are characterized by curricular experiences which are designed to broaden perspectives, enrich awareness, deepen understanding, establish disciplined habits of thought, prepare for meaningful careers, and thus help individuals become informed, responsive and productive citizens.

Students in Doctor of Philosophy program in CPASS

- Generate new knowledge based upon theoretical underpinnings
- Synthesize information in an area of study and effectively communicate in oral and written form
- Demonstrate ability to prepare future practitioners through teaching, scholarly and professional development activities
- Evaluate literature and engage in research appropriate to chosen area of emphasis

Athletic Training

Master of Science in Athletic Training

The master of science degree in athletic training is completed over a two-year period, although a one-year option is available. Since this is a post-certification master’s program, all students must be NATA-BOC certified or certified eligible to be considered for admission. Those in the two-year program complete 38 hours of graduate coursework, which includes research (thesis or research project). Graduate assistantships are available for the NATA-BOC certified and other qualified individuals in the two-year program. The one-year program requires completion of 35 graduate credit hours.

The review and selection process for admittance to the graduate athletic training program and graduate assistantships run concurrently and begin in late December/early January and continue until all positions are filled. Only those applicants with complete files will be considered for admission to the program and for graduate assistantships. Finalists will be contacted for an on-campus personal interview starting in January.
FACULTY
ASSOCIATE PROFESSORS
• Damien Clement - Ph.D. (West Virginia University)
• Michelle Sandrey - Ph.D., ATC (University of Kansas)
  Graduate Program Director
• Vincent G. Stilger - HSD, ATC (Indiana University)
  Undergraduate Program Director

CLINICAL INSTRUCTOR
• Allison Hetrick, ATC - M.S. (University of Connecticut)

ADJUNCT INSTRUCTORS
• Amelia Adams, ATC - M.S.
• Erin Asbury, ATC - M.S.
• Greg Dahmer - M.A. (West Virginia University)
• Amy Hile, ATC - M.A. (University of Connecticut)
• Randall Meador - M.S. (West Virginia University)
• Samantha Young, ATC - M.S. (University of Arizona)

ADJUNCT ASSOCIATE PROFESSOR
• John C. Spiker - M.Ed. (University of Pittsburgh)

ADMISSION CRITERIA
• Undergraduate degree grade point average (2.75 minimum for regular status) from an accredited institution
• Three letters of recommendation
• Resume
• Graduate Record Examination (300 minimum, qualitative and verbal together)
• Candidate must be NATA-BOC certified or certified eligible

Applicants will submit their application and application fee on the WVU Office of Admissions GEMS web site at: www.wvu.edu. Applicant is required to submit official transcript(s) and GRE scores directly to the WVU Office of Admissions, PO Box 6009, Morgantown, WV 26506-6009. Please do not submit hard copies of transcript(s) or letters of recommendation to the CPASS Office. Applicant is responsible to upload their resume to the GEMS web site and list names and email addresses of recommenders. The GEMS web site will send each recommender a email for them to complete the required form and upload a letter of recommendation if they so desire.

Degree Requirements
Students are to maintain a minimum 3.0 GPA throughout the program.
A grade of C or higher must be earned in all major courses.

### Major Learning Goals

#### ATHLETIC TRAINING

The goal of the program is for students to graduate with evidence based knowledge related to post-professional proficiencies and decision making necessary to prepare them to gain successful employment or a terminal degree and have developed the post-proficiencies necessary to perform effectively in the field of athletic training.

- **Content Knowledge** – Students will demonstrate evidence based and best clinical practice post-professional knowledge and disciplinary concepts related to athletic training.
- **Reflection and Critical Thinking** – Students will demonstrate reflection and critical thinking in order to refine post-professional knowledge and practice.
- **Programming and Assessment** – Students will demonstrate post-professional evidence-based knowledge and proficiencies (and best practices) for assessing injury and biomechanical abnormalities through pre-screening and for designing, implementing and critically evaluating acute and chronic injury rehabilitation approaches in a traditional or emerging athletic training setting.
- **Professionalism and Ethics** – Students will demonstrate professional behaviors, including commitment to excellence, valuing diversity and collaboration, service to others, techniques for lifelong learning, and will develop the knowledge and proficiencies necessary to allow them to be successful with regard to being employed as an athletic trainer.
- **Technology** – Students will be able to apply the use of different forms of technology to assess proficiencies and provide meaningful feedback.

### Coaching and Sport Education

#### Master Degree

The Coaching and Sport Education master's degree is designed to provide students with critical thinking and decision making skills. The curriculum focuses on the sport science, interpersonal and intrapersonal knowledge necessary to excel in high performance sports. Students will experience hands on training through applied science, sport movement analysis software, strength and conditioning coursework, internship experiences
and more. The program utilizes the International Council for Sport Coaching Excellence’s International Sport Coaching Framework and professional development guidelines from coaching education and coach development industry leaders.

Students complete 39 credit hours over five semesters (fall, spring, summer, fall, and spring) with 24 hours of core classes and 15 credit hours of coursework in one of two tracks depending on their career goals. The tracks (or areas of emphasis) are:

- **Performance Coaching** which focuses on coaching collegiate or individuals at the elite level; selected courses focus on evaluating one’s coaching methods (a sport performance non-thesis track).
- **Science of Coaching** which emphasizes coaching education and the preparation of coaches; students will complete a research project or thesis depending upon the level of specialization on a given topic.

Both options provide students with a strong foundation across the interpersonal, intrapersonal and sport science knowledge areas key to athletic coaching success. Students can only begin the program in the fall.

---

**FACULTY**

**ASSOCIATE PROFESSORS**

- Kristen Dieffenbach - Ph.D. (University of North Carolina, Greensboro)
- Valerie Wayda - Ed.D. (West Virginia University)

Chair, Coaching and Teaching Studies

**ASSISTANT PROFESSORS**

- Jason Bishop - Ph.D. (University of Virginia)
- Ryan Flett - Ph.D. (Michigan State University)

**TEACHING ASSISTANT PROFESSOR**

- William (Guy) Hornsby III - Ph.D. (East Tennessee State University)

**ADJUNCT INSTRUCTORS**

- Kathy Ginter - Ph.D. (University of Tennessee)
- Jerry Handley - M.S. (West Virginia University)

**ASSOCIATE PROFESSOR EMERITUS**

- Daniel Ziatz

**Admission Criteria**

The following supplemental materials will be used to evaluate applications for admission to the Coaching and Sport Education master’s program:

- Undergraduate degree grade point average (2.75 minimum for regular status) from an approved institution
- Minimum of two references (three references preferred)
- Resume emphasizing your coaching/sport experiences
- Professional goal statement (one to two pages on professional background, goals, and reasons for pursuing the master’s degree)
- TOFEL score (for international students only)

Note: Students who do not meet the 2.75 grade point average requirement may be admitted as a provisional graduate student only if their GPA is between 2.50 and 2.75. If a student is admitted as a provisional student they are required to attain a 3.0 GPA in their first 9 hours of adviser approved course work in order to remain in the program and to be reclassified as a regular graduate student.

**Priority Deadline** is December 15th.

Student will submit their application and application fee thru the WVU Office of Admissions GEMS web site at: www.wvu.edu. Official transcript(s) must be submitted to the WVU Office of Admissions, PO Box 6009, Morgantown, WV 26506-6009 in order to be processed. Please do not submit any hard copies of transcript(s) or letters of recommendation to the CPASS office. Your application must be processed by the WVU Office of Admission by the priority admission deadline, December 15th. Any applications submitted after the December 15th deadline will be considered only if seats are still available in the program.

Student is required to upload their resume and goal statement to the GEMS web site. Student will list names and email addresses for letters of recommendation to the GEMS web site and the system will generate an email to each recommender to complete the required form and attach a letter of recommendation if they desire. It may take several weeks to process your application. We recommend students submit your online application at least three (3) weeks (international students, three months) before February 1 to allow your application to be processed before the priority deadline.

Apply online at the WVU Admissions website (https://app.applyyourself.com/AYApplicantLogin/ApplicantConnectLogin.asp?id=wvugrad). Please note
that it is the applicant’s responsibility to make sure all supplemental materials (including letters of recommendation) are submitted online to the WVU Admissions and Records Office GEMS web site to be processed. Any incomplete applications (those without all required supplemental materials) or applications received after February 1 will be considered ONLY if there are still seats available. Program will continue to accept applications until all seats are filled.

No more than twelve graduate hours may be taken toward the master’s degree as a non-degree seeking graduate student.

Major Learning Goals

COACHING AND SPORT EDUCATION

The goal of the program is for students to graduate with the essential skills and knowledge to work with athletes in a variety of contexts across their lifetime.

- **Content Knowledge** – Students will demonstrate knowledge and disciplinary concepts related to the pedagogy of sport coaching.
- **Reflection and Critical Thinking** – Students will demonstrate reflection and critical thinking in order to refine professional practice.
- **Programming and Assessment** – Students will demonstrate evidence-based knowledge and skills (and best practices) for assessing students needs and for designing, implementing, and evaluating practice plans and programs.
- **Professionalism and Ethics** – Students will demonstrate professional behaviors, including commitment to excellence, valuing diversity and collaboration, service to others, and techniques for lifelong learning.
- **Technology** – Students will be able to demonstrate the use of different forms of technology to assess skills and provide meaningful feedback.

Coaching and Teaching Studies

Doctorate Degree

WVU is the only institution in the state of West Virginia to offer a Doctorate degree (Ph.D. and an Ed.D.) majoring in Coaching and Teaching Studies.

The mission of our doctoral programs is to guide future professionals in becoming knowledgeable and skillful leaders, educators and researchers who will be prepared to assume roles within the fields of physical education teacher education, physical activity and coaching in universities or associated organizations/agencies in related settings. Our programs provide a high-quality and meaningful education that will allow each student to succeed in their chosen educational goals and will further promote their abilities in becoming analytical thinkers who are confident in application of the scientific method and who can excel professionally as educators and researchers.

The Doctoral degree in Coaching and Teaching Studies is designed to prepare researchers, teachers and professional leaders to address critical issues in physical education teacher education and sport pedagogy by developing research skills, engaging in reflective teaching and expanding knowledge. Doctoral programs at West Virginia University include a Doctorate of Philosophy (Ph.D.) and a Doctorate of Education (Ed.D.), both in Coaching and Teaching Studies.

The Ph.D. program of study focuses on developing future professionals who will address critical issues in physical education, physical activity and coaching, and develop focused lines of research. Students will work collaboratively with faculty mentors to enhance their critical thinking, knowledge and skills to succeed as productive researchers within university settings, national sports organizations and other settings.

The Ed.D. program of study prepares future professionals for a productive career as educators in the field of physical education teacher education or sport education (Ed.D.), teaching and research positions in universities, as well as leadership positions in professional associations/agencies. The Ed.D. students are encouraged to select an applied research specialization designed to enhance success as an academic and professional leader.
FACULTY

ASSOCIATE PROFESSORS
- Sean Bulger - Ed.D. (West Virginia University)
- Kristen Dieffenbach - Ph.D. (University of North Carolina at Greensboro)
- Andrea Taliaferro - Ph.D. (University of Virginia)
- Valerie Wayda - Ed.D. (West Virginia University)

Chair, Coaching & Teaching Studies

ASSISTANT PROFESSORS
- Jason Bishop - Ph.D. (University of Virginia)
- Ryan Flett - Ph.D. (Michigan State University)

TEACHING ASSISTANT PROFESSOR
- William (Guy) Hornsby III - Ph.D. (East Tennessee State University)

CLINICAL PROFESSOR
- Eloise Elliott - Ph.D. (Virginia Polytechnic Institute and State University)
  Ware Distinguished Professor

Students can be admitted to the Ed.D. or Ph.D. program with either a bachelor's or master's degree. Those admitted with a bachelor's degree will obtain either a Coaching and Sport Education or a Physical Education Teacher Education masters degree at WVU as part of their doctoral program of studies.

Applicants must submit their application and application fee thru the WVU Office of Admissions GEMS web site at: www.wvu.edu. An official copy of transcript(s) and test scores should be sent to the WVU Office of Admissions at: West Virginia University, Office of Admissions, PO Box 6009, Morgantown, WV 26506-6009. Please do not send hard copies of transcripts or letters of recommendation to CPASS, everything is submitted online to the GEMS web site. The additional screening materials necessary to complete your doctoral application (should be uploaded as part of your GEMS admission application) are:

1. Resume/CV
2. Statement of Professional Goals and Research Interests *
3. Letters of Recommendations: 3 required**
4. Test Requirements: GRE (taken within 5 years of application). Preferred scores of 151 Verbal; 153 Quantitative Reasoning; 3.5 Analytical Writing or higher. Provisional admission decisions can be made based upon faculty discretion.
5. International applicants TOEFL: 550 paper, 79 internet based

* The Statement of Professional Goals and Research Interests should be 2-3 pages in length, double-spaced. Describe your academic and professional background, professional goals, possible areas of research, any completed research projects and how and why you are a good fit for the program. It should be tailored to WVU and your specific program of interests.

** A minimum of two letters of recommendation should speak directly to the candidate's academic skills and professional potential and abilities. Student will list the names and email addresses of their recommenders in the GEMS application site and the system will automatically generate an email to complete the necessary recommendation form, and upload an attached letter if they so desire.

NOTE: Provisional admission decisions can be made based upon faculty discretion.

Applicants are strongly encouraged to contact WVU faculty members, schedule an on-campus visit, or conference call prior to submitting application to get a feel for faculty, staff, students, and the WVU experience.

First round submission date (and to be considered for scholarships) is December 15th. Applications will be accepted on a rolling basis after December 15th pending available space in the program. International applicants are strongly encouraged to submit their admission application and supplemental materials by October 1st to allow extra time for processing.

Degree Requirements

All students must complete the written and oral qualifying exam within the first two semesters of the program. All students must also pass a comprehensive exam as designated by the candidate's doctoral committee, pass the dissertation prospectus, and successfully defend the dissertation.

CURRICULUM REQUIREMENTS

Minimum grade of C required unless otherwise noted.
Minimum GPA of 3.0 required.

Core Classes
PERFORMANCE STANDARDS
Credit for courses in which a grade of lower than C is obtained will not count toward satisfying program requirements for both the Ed.D. or Ph.D.
Students who fail to maintain a 3.0 GPA will be placed on probation and must bring their GPA up to 3.0 during the following semester. If a student fails to bring his or her GPA up to 3.0, they will be dismissed from the program. Student research will be graded by the PETE faculty each semester. Research and grades will be satisfactory or unsatisfactory (S/U).

Degree Requirements
For the Ph.D. program, the candidate must complete a series of research benchmarks beyond the required coursework. All students must complete the written and oral qualifying exam within the first two semesters of the program. All students must also pass a comprehensive exam as designated by the candidate's doctoral committee, pass the dissertation prospectus, and successfully defend the dissertation. In addition, Ph.D. candidates must submit three publishable articles. The acceptability (publishable) of the articles will be determined by the candidate's doctoral committee.

CURRICULUM REQUIREMENTS
Minimum grade of C required unless otherwise noted. Minimum GPA of 3.0 required.

Core Classes
PET 735  Reading Research 1
PET 741  Research in Kinesiology
PET 745  Physical Education/Teaching Curriculum Development and Evaluation
SEP 765  Dissertation and Thesis Seminar

Statistics and Research Methods
EDP 612  Introduction to Research
EDP 613  Statistical Methods 1
EDP 614  Statistical Methods 2
SCFD 615  Qualitative Research Methods

Elective - Advanced Statistics/Research Methods

Elective - Advanced Statistics/Research Methods

Cognate Specialization
Minimum grade of B required in all courses.

PERFORMANCE STANDARDS
Credit for courses in which a grade of lower than C is obtained will not count toward satisfying program requirements for both the Ed.D. or Ph.D.

Students who fail to maintain a 3.0 GPA will be placed on probation and must bring their GPA up to 3.0 during the following semester. If a student fails to bring his or her GPA up to 3.0, they will be dismissed from the program. Student research will be graded by the PETE faculty each semester. Research and grades will be satisfactory or unsatisfactory (S/U).

Major Learning Goals

COACHING AND TEACHING STUDIES

Upon completion of the Ph.D., each graduate should:

1. Demonstrate a high level of competence in critically understanding the discipline of Coaching and Teaching Studies.
2. Establish a specific line of scholarship related to Coaching & Teaching Studies.
3. Demonstrate the capacity to conduct research in Coaching & Teaching Studies through the development, implementation and reporting of an extended piece of research work.
4. Demonstrate the capacity to write grant proposals, and to develop curriculum related to Coaching and Teaching Studies.
5. Apply and integrate academic frameworks, theories and understandings to develop and teach within programs in higher education and/or organizations related to coaching and teaching studies.

Upon completion of the Ed.D, each graduate should:

1. To develop an in-depth knowledge of the contemporary theoretical concepts within coaching and teaching studies.
2. Develop a critical understanding of the knowledge, research and analytical skills required to be an effective and reflective pedagogue in coaching and teaching studies.
3. Be able to apply, justify, and promote evidence-based practices in varied environments within coaching and teaching studies.
4. Be able to identify, critically analyze and reflect on practice-based problems in teacher and coach preparation to generate and implement informed solutions and directions in professional practice.
5. Critically engage in reflective practice through the development, implementation and reporting of an extended piece of research work.

Physical Education Teacher Education

Master Degree

The blended Physical Education Teacher Education (PETE) Master of Science program is designed for physical education professionals who already possess initial teaching certification in physical education (or related field). This format is ideal for teachers and coaches with demanding schedules who need to balance work, family, and continue their education. The hybrid format allows students to complete online courses during spring and fall semesters and blended courses (online and two weeks on-campus) during the summers. Practical applications of research-based and developmentally appropriate teaching practices are embedded within online and on-campus courses.

Students enrolled in the WVU PETE Master’s program evaluate their teaching effectiveness using research informed methods, examine standards-based curriculum and assessment strategies, explore the possibilities of technology in PE, engage with learners with diverse physical, mental, and emotional needs, and extend their understanding of fitness education for K-adult learners.
The program has been approved as a part of Southern Regional Electronic College and therefore will be offered at IN-STATE TUITION. This program is NOT a teaching licensure program.

**FACULTY**

**ASSOCIATE PROFESSORS**

- Sean Bulger - Ed.D. (West Virginia University)
- Andrea Taliaferro - Ph.D. (University of Virginia)

**CLINICAL PROFESSOR**

- Eloise Elliott - Ph.D. (Virginia Polytechnic Institute and State University)  
  Ware Distinguished Professor

**CLINICAL INSTRUCTOR**

- Byron Towner - M.S. (West Virginia University)  
  National Board Certified Physical Education Teacher

**ADJUNCT INSTRUCTOR**

- Jack Sager - Ed.D. (West Virginia University)

**PROFESSOR EMERITUS**

- Linda Carson  
  Ware Distinguished Professor
- Lynn Housner
- Andrew Hawkins
- Robert Wiegand

**ASSOCIATE PROFESSOR EMERITUS**

- Bruce Wilmoth

**M.S. PHYSICAL EDUCATION TEACHER EDUCATION**

Required criteria for PETE program admission include the following:

1. Baccalaureate degree with cumulative GPA of at least 2.75 on a 4.0 scale
2. Submission of unofficial transcripts at point of application (admission contingent upon receipt of official transcripts sent to the Office of Admissions).
3. All admitted students must have access to youth (children and adolescents) in school-based physical education or community physical activity/sport settings throughout the duration of the program for course assignments and follow-up application tasks.

Note: Students who do not meet the 2.75 grade point average requirement may be admitted as a provisional graduate student only if their GPA is between 2.50 and 2.75. If a student is admitted as a provisional student they are required to attain a 3.0 GPA in their first 9 hours of adviser approved course work in order to remain in the program and to be reclassified as a regular graduate student.

Applications must be submitted ONLINE to the WVU Admissions Office along with your official undergraduate transcripts. Apply online at the WVU Admissions website www.wvu.edu. Incomplete applications (those without all required materials and documentation) will not be accepted.

**Priority** Deadline is February 1st for students who would like an early admission decision.

**Application** Deadline is March 1st for summer admission with admission decision available by April 1st. Program will continue to accept applications until all seats are filled.

No more than twelve graduate hours may be taken toward the master's degree as a non-degree seeking graduate student.

**ACCELERATED B.S./M.S. PHYSICAL EDUCATION TEACHER EDUCATION**

Students must complete an internal application for admission to the accelerated B.S./M.S. (ABM) program. Students may apply for regular admission to the ABM in PETE program in the fall semester following the completion of 60 credits. Only enrolled WVU PETE majors may be considered for regular admission to the program. Transfer students must complete at least 24 credit hours as degree-seeking students at WVU before applying. The minimum GPA requirement for regular admission is GPA of 3.0, with no provisional admissions allowed. Additional criteria include acceptable performance on the PETE Professionalism Assessment used to monitor undergraduate student dispositions each semester in the major by a designated faculty member. Regular admission will not be offered to students with less than 2 semesters to complete the bachelor's degree. The ABM in PETE program is not available to students seeking a second (or subsequent) bachelor’s degree. Internal application is due by October 1 with program admissions decisions
communicated by December 15. Applications will be reviewed by a three member work group (2 PETE faculty and 1 academic adviser) and presented to the program faculty for a final admissions decision.

## Major Learning Goals

### PHYSICAL EDUCATION TEACHER EDUCATION

The goal of the program is to develop educational professionals who focus their teaching on learner needs, enhance their integrated knowledge base, conduct inquiry-based practice and engage as school-community leaders.

- **Professional Knowledge** - Students understand, refine, and analyze disciplinary content knowledge, the application of that knowledge to the pedagogy of teaching, and modes of inquiry that form the basis for physical education programs and instruction.
- **Professional Practice** - Students apply content knowledge and pedagogical content knowledge to design, deliver, and reflect upon appropriate learning experiences that facilitate and enhance the growth of learners.
- **Professional Leadership and Advocacy** - Students become continuous, collaborative learners who further their professional development and use their abilities to contribute to the profession.
• **Professional Ethics** - Students demonstrate professional behaviors, including a commitment to excellence and lifelong learning, diversity and collaboration, and service to others.

## Degree Requirements

Minimum cumulative GPA of 3.0 is required.

NOTE: See Undergraduate Catalog for Bachelor's degree requirements (B.S. in Physical Education Teacher Education, Accelerated Program).

Sport and Exercise Psychology

Doctoral Program

Graduate studies within the College of Physical Activity and Sport Studies can lead to a Ph.D. in Sport and Exercise Psychology (SEP). Students admitted into the SEP doctoral program may also complete a master’s degree in clinical mental health counseling. Students can be admitted into the doctoral program in SEP with either a baccalaureate degree or a master’s degree.

The sport and exercise psychology program has procedures and requirements which are specific to the program. In general, they include the following:

- Selection of an advisor (The program faculty, in consultation with the student, assigns an advisor to assist in planning the student’s program.)
- Selection of a plan of studies committee (The student, in consultation with the advisor, selects a plan of studies committee. This committee assists the students in developing a plan of studies which will include relevant coursework, evaluation of competencies, and an estimated time frame for its completion.)
- Plan of studies approval (The plan of studies committee will meet with the student by March 1st of the first year in the program to ratify the plan. The approved plan of studies functions as the document against which completion of program requirements is assessed.)
- Completion of required coursework (The student completes the coursework required by the plan of studies. The number of credit hours required and the time required to complete the coursework varies, but a minimum of three years [six semesters] of coursework is normally required for students entering with a master’s degree.)
- Qualifying Project (A qualifying research project, approved by the advisor, that informs the dissertation will be completed and submitted for publication. This project will be presented to a majority of the faculty within the program and approved to count for the comprehensive exam requirements).
- Prospectus defense (Following the successful completion of the qualifying project, the student will write and defend a prospectus for the dissertation. The prospectus will be evaluated by the student’s dissertation committee. The dissertation committee is often identical to the student’s plan of studies committee, though additions or changes may be made to the plan of studies committee at this time in order to constitute the dissertation committee.)
- Admission to candidacy (Once the qualifying project and prospectus defense are successfully completed, the student is admitted to candidacy. Admission to candidacy is permission to proceed with dissertation research as described in the prospectus.)
- Defense of the dissertation (The student will write and orally defend an original research project as described in the prospectus. Successful defense will be determined by the quality of the written document as well as by the quality of the oral defense in a forum open to the academic community. All members of the student’s dissertation committee must be present for the dissertation defense. Successful defense of the dissertation with submission to a professional journal results in the awarding of the degree. The dissertation must be successfully defended within five years of admission to candidacy.)
- During the Ph.D. program, students are required to submit multiple works to peer-reviewed journals and national conferences.

FACULTY

PROFESSORS

- Dana D. Brooks - Ed.D. (West Virginia University)
  Dean
- Edward Etzel, Jr. - Ed.D. (West Virginia University)
- Jack Watson - Ph.D. (Florida State University)
Chair, Sport Sciences
• Samuel Zizzi - Ed.D. (West Virginia University)

ASSOCIATE PROFESSOR
• Peter Giacobbi - Ph.D. (University of Tennessee-Knoxville)
• Damien Clement - Ph.D. (West Virginia University)

ASSISTANT PROFESSORS
• Dana Voelker - Ph.D. (Michigan State University)

TEACHING ASSISTANT PROFESSOR
• Scott Barnicle - Ph.D.

University of Idaho

Application Deadline
Application procedures for the Ph.D. in Sport and Exercise Psychology must submit their online admission application to the Office of Admissions website (www.wvu.edu) to be processed by the December 15 deadline for fall admission. Students must also submit an official undergraduate transcript(s) and application fee (online). Supplemental required materials (GRE scores, resume, goal statement, and three letters of recommendation) must also be uploaded and submitted online. Once all the materials have been received, the admission application will be ready for the screening committee to review after the deadline date. Incomplete applications will not be reviewed. Prospective students should not apply to the Master’s Program in Community Counseling at this time. They should wait to apply once they are accepted into the PhD program. International applicants are strongly encouraged to submit their admission application and supplemental materials by October 1st to allow extra time for processing.

Admission Criteria
The following criteria is used to evaluate applicants for admission to the doctoral program:

• Undergraduate degree grade point average of 3.0 from an approved institution
• Master’s degree grade point average of 3.5 from an approved institution (if applicable)
• Graduate Record Examination score - Verbal, Quantitative, and Writing percentiles above fifty percent. (Student files will be reviewed with scores lower than fifty percent.)
• Three letters of recommendation (required to be submitted online - NO HARD COPIES), to be submitted electronically through the application process
• Official transcripts submitted to the Office of Admissions as instructed in the online application
• Professional goal statement (one-two page paper on professional backgrounds, goals, and reasons for pursuing doctoral degree at WVU) to be submitted electronically through the application process
• Curriculum vitae to be submitted electronically through the application process
• Personal interview, if invited

Degree Requirements
Students who are accepted into the Ph.D program in Sport and Exercise Psychology will receive the M.S. degree upon completing the requirements described below.

Additional course requirements needed to meet 36 minimum total credits will be determined in consultation with the student’s advisor. Refer to the Sport and Exercise Psychology Ph.D. Suggested Plan of Study.
Degree Requirements

Students will form a Plan of Study committee and have their Plan of Study approved by March 1 of their first year in the program. This Plan of Study will outline all of the courses needed to complete the requirements for the M.S. in Sport and Exercise Psychology (if necessary) and the M.A. in Counseling as well as the Ph.D in Sport and Exercise Psychology as both Masters degrees are required to earn the Ph.D.

Major Learning Goals

SPORT AND EXERCISE PSYCHOLOGY

The goal of the program is for students to graduate with the essential skills and knowledge necessary to prepare them to immediately begin a career in the field of sport and exercise psychology.

- **Content Knowledge** - Students will demonstrate knowledge and disciplinary concepts related to sport and exercise psychology.
- **Reflection and Critical Thinking** - Students will demonstrate reflection and critical thinking in order to refine professional knowledge and practice.
- **Programming and Assessment** - Students will demonstrate evidence-based knowledge and skills (and best practices) for assessing needs and for designing, implementing and evaluating performance enhancement skills across domains.
- **Professionalism and Ethics** - Students will demonstrate professional behaviors, including commitment to excellence, valuing diversity and collaboration, service to others, and techniques for lifelong learning.
- **Technology** - Students will be able to demonstrate the use of different forms of technology to assess skills and provide meaningful feedback.
Sport Coaching

Master Degree

As sport evolves, coaches need to evolve. The Sport Coaching master’s degree trains students to be lifelong learners who can adapt to modern demands on the coaching profession. This degree is designed for teachers and full time professionals who coach at the scholastic, community and club levels. WVU professors in Coaching Education have designed a curriculum that focuses on the knowledge and skills to be an effective coach. Additional focus is placed on holistic athlete development, including sport skills, life skills, long-term development and periodized training.

The online format allows working professionals to complete courses during fall, spring and summer, without having to be on-campus. The course load is reduced (4-7 credits per semester) to allow students to balance the master’s program with family, work and coaching responsibilities. Courses promote online interaction and peer support within and between cohorts.

The Sport Coaching master’s program can be completed in two years. The program utilizes the International Council for Sport Coaching Excellence’s International Sport Coaching Framework and professional development guidelines from coaching education and coach development industry leaders.

FACULTY

ASSOCIATE PROFESSORS

• Kristen Dieffenbach - Ph.D. (University of North Carolina at Greensboro)
• Valerie Wayda - Ed.D. (West Virginia University)
  Chair, Coaching & Teaching Studies

ASSISTANT PROFESSORS

• Jason Bishop - Ph.D. (University of Virginia)
• Ryan Flett - Ph.D. (Michigan State University)

TEACHING ASSISTANT PROFESSOR

• William (Guy) Hornsby III - Ph.D. (East Tennessee State University)

ADJUNCT INSTRUCTORS

• Kathy Ginter - Ph.D. (University of Tennessee)
• Jerry Handley - M.S. (West Virginia University)

ASSOCIATE PROFESSOR EMERITUS

• Daniel Ziatz

Admission Criteria

The following supplemental materials will be used to evaluate applications for admission to the master’s program:

• Undergraduate degree grade point average (2.75 minimum for regular status) from an approved institution
• Minimum of two references (three references preferred)
• Resume emphasizing your coaching/sport experiences
• Professional goal statement (one to two pages on professional background, goals, and reasons for pursuing the master’s degree

Note: Students who do not meet the 2.75 grade point average requirement may be admitted as a provisional graduate student only if their GPA is between 2.50 and 2.75. If a student is admitted as a provisional student they are required to attain a 3.0 GPA in their first 9 hours of adviser approved course work in order to remain in the program and to be reclassified as a regular graduate student.

Applications must be submitted with application fee to the WVU Admissions Office GEMS web site at: www.wvu.edu. Applicants are required to submit an official undergraduate transcript(s) to the WVU Office of Admissions, PO Box 6009, Morgantown WV 26506-6009. Please do not submit hard copies of transcript(s) or letters of recommendation to the CPASS office. Applicants will need to upload their resume and goal statement to the GEMS admission web site. The applicant will submit names and addresses of recommenders to the web site and the system will send an email link to the recommenders to complete the required form and attach a letter of recommendation if they so desire. Incomplete applications (those without all required supplemental materials) will not be reviewed.

Priority Deadline is August 1st.

No more than twelve graduate hours may be taken toward the master's degree as a non-degree seeking graduate student.
## Degree Requirements

A grade of C- or higher must be earned in all courses

*ACE 682 Program Evaluation for Coaches is completed twice for a total of 2 credits.*
Major Learning Goals

SPORT COACHING

The goal of the program is for students to graduate with the essential skills and knowledge to work with athletes in a variety of contexts across their lifetime.

- **Content Knowledge** – Students will demonstrate knowledge and management concepts related to the pedagogy of sport coaching.
- **Reflection and Critical Thinking** – Students will demonstrate reflection, collaboration, and critical thinking skills in order to refine professional practice and promote lifelong learning.
- **Programming and Assessment** – Students will demonstrate evidence-based knowledge, skills (and best practices) for designing, implementing and evaluating practice plans and programs that are based on assessments of players’ needs.
- **Professionalism and Ethics** – Students will demonstrate professional behaviors, including commitment to excellence, valuing diversity and collaboration, service to others, and techniques for lifelong learning.
- **Technology** – Students will be able to demonstrate the use of different forms of technology to assess skills and provide effective and compelling feedback to players.

Sport Management

Students have two options for completing a master's degree in sport management: 1) On-Campus and 2) Distance-Learning.

On-Campus

The graduate on-campus sport management program requires thirty-six credit hours including a six-hour internship. In addition to the required sport management classes, candidates have the ability to take elective classes in management, marketing, advertising, journalism and public relations. This program can be completed in one or two years. The unique curriculum features courses that provide “real-world” training in Athletic Compliance and Sport Finance. The Program provides students with marketing research and data mining consultant experiences.

Dual Degree

A dual degree track option also exists between on-campus sport management master's degree program and the M.B.A. program in the College of Business and Economics. This requires two years to complete, as credits are used from each program to support the other. Students interested in the dual degree program must complete the online applications for admission to both the Sport Management Program (fall admission only) and the M.B.A. program (summer admission) and be admitted separately to both programs. For more information, go to: [http://business.wvu.edu/graduate-degrees/mba](http://business.wvu.edu/graduate-degrees/mba).

Distance-Learning Program

This degree program offers flexibility to complete course competences at times which are convenient for students. The 36 credit hour distance education master's degree is expected to be completed in two years. Students complete 50% of the courses online with the remaining course load completed onsite at the WVU campus in Morgantown during a two-week period over two consecutive summers.

FACULTY

ASSOCIATE PROFessORS

- Gonzalo Bravo - Ph.D. (Ohio State University)
- Dennis Floyd Jones - Ph.D. (University of Pittsburgh)
- Cindy Lee - Ph.D. (Ohio State University)

TEACHING ASSOCIATE PROFessORS

- Gary Lhotsky - Ed.D. (Florida State University)

ADJUNCT INSTRUCTORS

- William Alsop - Ed.D. (West Virginia University)
- Andro Barnett - Ph.D. (Temple University)
- Phil Caskey - M.A. (West Virginia University)
- Brad Cox - M.S. (West Virginia University)
- Rosa D’Amico-Lopez - Ph.D. (University of Australia)
- Anna Devito - Ph.D. (Syracuse University)
- Grant Dovey - M.S. (West Virginia University)
Admission Criteria

ON-CAMPUS PROGRAM

- Undergraduate degree grade point average (2.75 minimum for regular status) from an approved institution
- Three letters of recommendation submitted to the GEMS website
- Official transcript (submitted directly to the WVU Office of Admissions)
- Resume submitted to the GEMS website
- Two-page career (goal) statement submitted to the GEMS website

Submit your online admission application thru the WVU Office of Admissions GEMS website along with your application fee. Official transcripts must be mailed directly to the WVU Office of Admissions. Your goal statement and resume are submitted to the online GEMS web site. The GEMS web site will also need three recommendation names and email addresses for reference letters. The system will send an email to your recommenders to complete a letter to be uploaded to your GEMS web site. Please DO NOT submit any paper copies of the screening materials above, everything must be submitted thru the online GEMS web site (except your official transcript). The deadline to have a completely processed file for the on-campus program is December 15.

DISTANCE EDUCATION

The distance education hybrid sport management major requires thirty-six credit hours including a six-hour practicum. This program is completed online from a distance in the spring and fall semesters. Summer courses are started online but include in-person interactions which require students to come to campus during a two-week period for two consecutive summers. Student must complete the online application. A current resume, goal statement and three letters of recommendation need to be submitted online to your GEMS web site. Please DO NOT submit paper copies of these screening materials to our office, they are to uploaded to the GEMS web site on your admission application. The deadline to apply is May 1st.

Degree Requirements: Campus Program

Minimum overall GPA of 3.0 or higher required.

A grade of C or higher must be earned in all major courses

Major Learning Goals

SPORT MANAGEMENT

The goal of the program is for students to graduate with the essential skills and knowledge necessary to prepare them for immediately entry into a career in the field of sport management.
• **Content Knowledge** - Students will demonstrate knowledge and disciplinary concepts related to the field of sport management.

• **Reflection and Critical Thinking** - Students will demonstrate reflection and critical thinking in order to refine professional knowledge and practice.

• **Programming and Assessment** - Students will demonstrate evidence-based knowledge and skills (and best practices) for assessing needs and for designing, implementing and evaluating sport related settings/organizations.

• **Professionalism and Ethics** - Students will demonstrate professional behaviors, including commitment to excellence, valuing diversity and collaboration, service to others, techniques for lifelong learning.

• **Technology** - Students will be able to demonstrate the use of different forms of technology to allow them to function effectively within a sport management setting.
Public Health

Degrees Offered

ON CAMPUS:

Master of Public Health (MPH):

- Biostatistics
- Epidemiology
- Health Policy
- Occupational and Environmental Health Sciences
- Social and Behavioral Sciences

MS Degree:

- MS in Biostatistics
- Ph.D. in Public Health Sciences
- Epidemiology
- Occupational and Environmental Health Sciences
- Social and Behavioral Sciences

ONLINE:

- MPH in Social and Behavioral Sciences
- MS in School Health Education

West Virginia University’s School of Public Health has well-established faculty and successful programs that focus on education, research, and service.

West Virginia University and its academic programs are accredited by the Higher Learning Commission of the North Central Association of Colleges and Schools. The School of Public Health is further accredited by the Council on Education in Public Health (CEPH). MPH Students from throughout the world who choose West Virginia University begin making a difference even before graduation. We truly believe in learning by doing. Students remain engaged in community health throughout their training and complete practicum/internship experiences in diverse settings. Our School Health Education program is nationally unique and attracts future leaders in education. The Ph.D. in Public Health Sciences prepares graduates for future careers in academia and research in a variety of settings.

School of Public Health faculty and staff involve students in their active research programs. Research efforts at the School often focus on the health of rural communities, consistent with our West Virginia roots. Students publish in leading peer-reviewed journals and present at national scientific conferences with their faculty mentors.

The mission of the West Virginia University School of Public Health is to improve the health of West Virginians through innovation and leadership in education, research, and service.

We achieve this by:

- Implementing educational programs that produce highly qualified practitioners, educators, and researchers
- Promoting interdisciplinary research to understand and solve complex health problems with local impact and global significance
- Engaging communities, businesses and government partners in accomplishing our shared mission

The vision of the School of Public Health is to be internationally recognized for demonstrating how academic public health can transform lives.

The School of Public Health is guided by the following values:

- Community Engagement: we are proud of the communities we serve and recognize the importance of bidirectional participatory activities.
- Collaboration: we collaborate with partners who join us in improving the public’s health.
- Equity: we promote equity and social justice in defining health and eliminating health disparities.
- Integrity: we adhere to the highest ethical standards of honesty and fairness and we recognize that integrity and ethical behavior are essential elements of our professions.
- Respect: we respect diverse points of view and the cultural heritage and traditions of all people.
- Accountability: we hold ourselves accountable to one another and to the many stakeholders who support the School of Public Health.
ADMINISTRATION

INTERIM DEAN
• Jeff Coben - M.D. (University of Pittsburgh)
  Professor, Department of Health Policy, Management and Leadership

INTERIM ASSOCIATE DEAN FOR OPERATIONS
• Robert Duval - Ph.D. (Florida State University)
  Chair and Professor, Department of Health Policy, Management and Leadership

ASSOCIATE DEAN FOR ACADEMIC AFFAIRS
• Linda Alexander - Ed.D. (University of Virginia)
  Professor, Department of Social and Behavioral Sciences

ASSISTANT DEAN FOR UNDERGRADUATE STUDIES
• Janet B. Hunt - MPH (University of Tennessee)
  Teaching Assistant Professor, Department of Social and Behavioral Sciences

DIRECTOR OF PHD PROGRAMS
• Kimberly Rauscher - Sc.D., M.A. (University of Massachusetts, Lowell)
  Associate Professor, Department of Occupational and Environmental Health Sciences

DIRECTOR OF MPH PROGRAMS
• Michael Mann - Ph.D. (University of Florida)
  Assistant Professor, Department of Social and Behavioral Sciences

DIRECTOR OF PRACTICE-BASED LEARNING
• Bobbi Sykes - BSMT (ASCP), MS (West Virginia University)
  Instructor, Department of Social and Behavioral Sciences

CHAIRS
• Robert Duval - Ph.D. (Florida State University)
  Associate Professor, Department of Health Policy, Management and Leadership
• Thomas Hulsey - Sc.D. (Johns Hopkins University)
  Professor, Department of Epidemiology
• Snehalata Huzurbazar - Ph.D. (Colorado State University)
  Professor, Department of Biostatistics
• Michael McCawley - Ph.D. (New York University)
  Associate Professor, Department of Occupational and Environmental Health Sciences
• Keith Zullig - Ph.D. (University of South Carolina)
  Professor, Department of Social and Behavioral Sciences

Degree Designation Learning Goals

MASTER OF PUBLIC HEALTH (MPH)

MPH Common/Core Competencies
• Explain and assess basic concepts of probability and statistical inference. (BIOS)
• Summarize public health data using descriptive biostatistical methods. (BIOS)
• Distinguish the appropriate basic inferential statistical analyses and summarize their results. (BIOS)
• Derive and assess basic epidemiologic frequencies and association. (EPID)
• Compare and contrast epidemiologic study designs. (EPID)
• Explain health care and public health services within the context of the U.S. policy system. (HPML)
• Propose policy strategies for improving the health status of populations. (HPML)
• Assess specific health outcomes for individuals and selected populations. (OEHS)
• Summarize the ethical perspectives and conflicts which arise with respect to human health and the environment. (OEHS)
• Analyze the results of environmental health research and formal risk assessments, and be able to evaluate the validity of the methods used and the conclusions drawn. (OEHS)
• Compile the management principles necessary to manage public health functions in an environmental disaster. (OEHS)
• Summarize sound public health research methodology used in the social and behavioral sciences. (SBHS)
• Evaluate public health research data using inferential statistical techniques. (SBHS)
• Distinguish key factors to be considered when determining appropriate sampling techniques to assess community needs and health issues. (SBHS)
• Illustrate an understanding of key factors related to question construction and interview techniques. (SBHS)
• Summarize key factors and strategies to develop successful health interventions in communities. (SBHS)
• Summarize social and behavioral models or theories that are used to guide successful community health interventions. (SBHS)
• Summarize the key components of the PRECEDE/PROCEED model in the planning and delivery of public health program evaluations. (SBHS)
• Summarize the three principal types of experimental designs in program evaluation. (SBHS)
• Apply MPH core competencies in a practice-based experience. (Practicum)
• Integrate and synthesize MPH core competencies in the context of a culminating experience. (Culminating Experience)

MASTER OF SCIENCE (MS)

MS School Health Education Program Competencies

• Demonstrate the knowledge and skills of a health literate educator.
• Assess needs to determine priorities for school health education.
• Plan effective comprehensive school health education curricula and programs.
• Implement health education instruction.
• Assess student learning.
• Plan and coordinate a school health education program.
• Serve as a resources person in health education.
• Communicate and advocate for health and school health education.

MS Biostatistics Program Competencies

• Assess foundational concepts of probability and statistical inference.
• Analyze clinical and public health data using descriptive biostatistical methods.
• Distinguish appropriate basic inferential statistical analyses and summarize their results.
• Manage standard statistical software to efficiently manage data structures.
• Summarize central concepts of statistical theory and inference.
• Develop appropriate plans to analyze standard continuous data in order to make valid inferences.
• Develop appropriate plans to analyze standard categorical data in order to make valid inferences.
• Communicate effectively, in writing and verbally, with substantive investigators and members of the community when assisting in the design of research studies as well as the results of statistical analyses.
• Weigh a public health problem in terms of magnitude, person, time, and place.
• Explain each of the five core disciplines in public health and illustrate the ways each of the core disciplines have contributed to the historical evolution of public health.

DOCTOR OF PHILOSOPHY (PHD)

Program Competencies

• Develop effective strategies for teaching in higher education
• Review and synthesize pertinent literature and formulate focused research questions that address identified knowledge gaps
• Design and conduct original research that uniquely contributes to the public health scientific knowledge
• Disseminate research findings through appropriate peer-reviewed publications and presentations, and to other public health community audiences

Major-specific competencies can be found under each major’s Learning Goals tab.

MPH Admission Requirements (Fall Only)

The WVU School of Public Health participates in the Schools of Public Health Application Service (SOPHAS (http://www.sophas.org)). Our MPH Admissions process is a two-step process. All MPH applications must be submitted through the national SOPHAS service and applicants must also submit a WVU Graduate application. In addition to the application, applicants must submit to SOPHAS a statement of purpose and objectives, official GRE test scores, three letters of reference, a current resume/curriculum vitae, and all university transcripts. SOPHAS requires original transcripts from ALL U.S. and International institutions attended.

Please see each department and major’s website for additional admission requirements.
MS in School Health Education Admission Requirements (Fall, Spring, Summer)

Students interested in applying for the MS in School Health Education must: Complete the WVU graduate application, complete the MS in School Health Education application, and submit official school transcripts, CV/Resume, three academic letters of recommendation, and a copy of the applicant’s professional teaching certificate and/or licensure. Please see the MS degree under Academics on the School of Public Health for further admission requirements: http://publichealth.hsc.wvu.edu/.

MS in Biostatistics Admission Requirements (Fall Only)

The MS in Biostatistics program does not participate in SOPHAS (Schools of Public Health Application Service) like the MPH programs. All MS applications must be submitted through the WVU application system, which includes a $60.00 application fee, payable to WVU. Applicants must submit a statement of purpose, official GRE test scores, three letters of reference, a current resume/curriculum vitae, and an official copy of all university transcripts. The deadline for applications to be considered for the fall (no spring/summer admissions are permitted) is July 1 (priority deadline is April 1).

Applications that are complete will be sent to the department for review. Students will receive an email from the WVU School of Public Health regarding their acceptance.

Ph.D. Program Admission Requirements

Fully completed applications received by December 31 are considered.

Admission to the doctoral program is limited to highly qualified and motivated candidates. Competitive funding is available for a select number of these applicants.

Detailed admissions procedures can be found under the Admissions Tab of each Major within the PhD Program.

In this section:

• Masters (p. 722)
• Doctoral (p. 723)

Master of Public Health (MPH)

Welcome to the West Virginia University School of Public Health. Our mission is to improve the health of West Virginians through innovation and leadership in education, research, and service. Each day, the affiliates and centers within the School of Public Health conduct research on today’s pressing public health issues. Diabetes, obesity, substance abuse, and tobacco use top the list of health disparities faced by West Virginians. Public health strategies are typically focused on broad, societal, and population levels; for example, environmental regulations, water quality control, immunization programs and health education initiatives.

The Master of Public Health program seeks students with a strong, genuine commitment to a career in public health. This degree is appropriate for health professionals, as well as individuals with bachelors’ degrees from a wide range of disciplines, who have a strong interest in community/population health and preventive medicine. Our faculty and staff look forward to your decision to become a public health practitioner, researcher, and educator by enrolling in one of our master degree programs. Each department and major can be explored by visiting our website http://publichealth.hsc.wvu.edu.

Program Description

Public Health is shaped by our nation’s public health agencies via health assessment, policy development, and public health services. The WVU School of Public Health addresses the core functions of public health by offering the MPH in the discipline-specific majors of:

• Biostatistics
• Epidemiology
• Health Policy
• Occupational and Environmental Health Sciences
• Social and Behavioral Science (On campus and Online)

All MPH programs are accredited by the national Council for Education for Public Health (CEPH). For more information about the MPH program, please contact:

Office of Student Services
West Virginia University
School of Public Health
P.O. Box 9190
1 Medical Center Drive
Morgantown, WV 26505-9190
Master of Science (MS) School Health Education

The mission of the MS in School Health Education Program is to provide teachers with the knowledge and skills necessary to instill in school-age students the information needed to make healthy decisions regarding well-being. The MS degree in School Health Education is only open to applicants holding a professional teaching certificate and/or licensure (in any teaching area). A copy of your teaching certificate is required for admission. This program is a member of the Southern Regional Education Board (SREB) (http://www.electroniccampus.org).

Program Description

Students in this program will complete thirty credit hours of coursework. Students may transfer nine credit hours that are pre-approved, upon admission. All courses are offered on-line. Students can complete this degree in two years or less. The goal of the MS degree program in School Health Education is to provide teachers with the knowledge and skills necessary to instill in school-age students the information necessary to make healthy decisions regarding well-being. Experiential instruction, coupled with critical thinking skills, enables students to be informed health consumers. The program will provide an optimal experience to equip students to be models and mentors for their own students.

For more information about the MS in School Health program, contact:
Toni Morris, School Health Coordinator
West Virginia University
School of Public Health
P.O. Box 9190
1 Medical Center Drive
Morgantown, WV 26505-9190
Phone (304) 293-3775
Fax (304) 293-6685

Master of Science (MS) Biostatistics

The Master of Science (MS) Program in Biostatistics is meant for college graduates with interest and background in mathematics and statistics who wish to learn both the methodology and the application of biostatistics in the health sciences. The goals of this program are similar to the current MPH in Biostatistics Program in learning objectives; however, MS students will receive a more extensive methodological foundation as well as be expected to take additional statistical courses instead of the “core” public health courses required for any MPH.

A typical student who graduates with an MS in Biostatistics from WVU would be qualified to work as a biostatistician or research coordinator in research organizations such as a pharmaceutical company, contract research organization (CRO), a university, or a health department. MS graduates also will be prepared to pursue doctoral education in biostatistics or similar disciplines.

Doctor of Philosophy (Ph.D.) in Public Health Sciences

The mission of the Ph.D. program in Public Health Sciences is to provide high quality doctoral education to motivated students who desire to positively impact the public’s health. We aim to train these students in a research intensive curriculum that is guided by a distinguished faculty at the leading edge of effective public health science. The degree emphasizes both evidence-based primary prevention of disease and injury, and health promotion research and practice.

The Ph.D. program in Public Health Sciences is a degree for scientist-practitioners focused on prevention of premature mortality, morbidity, and disability from disease and injury. The Ph.D. program offers three discipline-specific majors of:

- Epidemiology
- Occupational and Environmental Health Sciences
- Social and Behavioral Sciences

Goals of the Ph.D. Program

- Educate and train the next generation of public health leaders who will help shape public health education, practice and policy.
- Identify and address public health disparities.
- Improve the health of West Virginians and improve their access to quality health care.
- Provide trans-disciplinary teaching and research experience that prepares graduates for jobs in academia, research, and high-level practice settings.

Program Description
The early years of the program emphasize research and statistical methods complemented by theoretical and process-oriented coursework relevant to the student's selected area of specialty. During the later years of the program, students are engaged in their dissertation research while given the freedom to further diversify their training by choosing electives.

**Qualifying Examination**

Once students complete the majority of their coursework, they are required to pass a comprehensive qualifying examination. This comprehensive exam is based on core public health and discipline-specific material and administered within the student's home department.

**Doctoral Dissertation**

Upon passing the Qualifying Exam, the student begins the dissertation work, which includes:

- a written research proposal
- a defense of the research proposal
- original dissertation research
- a defense of the dissertation research

**Dissertation Proposal**

The dissertation proposal should include the following sections:

- **Specific Aims.** In this section you will lay out the goals of your research.
- **Significance.** In this section you will locate your research aims within the relevant literature to demonstrate the need for your proposed study.
- **Approach.** In this section you will lay out your proposed research design and methods used to achieve your specific aims.
- **Literature Cited.** Here you will include a bibliography of the works cited in the proposal.
- **Human Subjects.** If the proposal involves human subjects you must include this section. Here you will summarize the measures you propose to protect the human subjects involved in your research project.

The proposal must be defended by the student in a forum that includes the student's complete Dissertation Committee.

**Dissertation Research**

The program will culminate in a research dissertation on a public health topic of interest to the student. The dissertation format can be either a traditional book format or the Journal Article Format (JAF) which consists of a series of three publishable papers on the student's dissertation research.

The Ph.D. program emphasizes peer-reviewed research publications as the dissertation product because of its positive impact on the student's skills and their post-graduation success.

**Dissertation Defense**

The dissertation will be defended in a forum that includes all Dissertation Committee members, who must sign the dissertation approval form in order for the dissertation to be complete.

The defense must be announced to the entire School of Public Health and the University, and students are required to post fliers that announce the details of the defense.

The written dissertation must be submitted in accordance with the WVU policy regulating electronic submission of theses and dissertations. https://etd.lib.wvu.edu/

**Program Delivery**

Most courses in the program will be taught using the face-to-face, on-campus, small, or large group format. A small number of core courses and some electives may be delivered by web-based technology.

Biostatistics

Biostatistics

Biostatistics is the science of applying statistical theory and principles to research in public health, medicine, biology, pharmaceuticals, environmental science, and other related fields.

DEGREES OFFERED:

• Master of Public Health
• Master of Science

CERTIFICATE

• Applied Biostatistics

MPH IN BIOSTATISTICS

The MPH degree in Biostatistics is meant for individuals with a general interest in public health, who lack formal training in biostatistics and would like to gain skills needed to understand and apply standard statistical techniques. The purpose of the degree program is to:

• Introduce key principles of probability and statistical inference,
• Teach standard techniques of database management and analysis, and
• Provide guidance regarding critical appraisal of research from a statistical perspective

The program builds on the existing Applied Biostatistics Certificate, allowing for added coursework for those individuals interested in obtaining a more intensive examination of common biostatistical techniques as well as a comprehensive training in the core disciplines of public health.

MS IN BIOSTATISTICS

The Master of Science (MS) Program in Biostatistics is meant for college graduates with interest and background in mathematics and statistics who wish to learn both the methodology and the application of biostatistics in the health sciences. The goals of this program are similar to the current MPH in Biostatistics Program in learning objectives; however, MS students will receive a more extensive methodological foundation as well as be expected to take additional statistical courses instead of the “core” public health courses required for any MPH.

A typical student who graduates with an MS in Biostatistics from WVU would be qualified to work as a biostatistician or research coordinator in research organizations such as a pharmaceutical company, contract research organization (CRO), a university, or a health department. MS graduates also will be prepared to pursue doctoral education in biostatistics or similar disciplines.

BIOSTATISTICS CERTIFICATE

The Applied Biostatistics Certificate is designed for those individuals who lack formal training in biostatistics and would like to gain skills needed to understand and apply standard statistical techniques. It is an online program that is available to practitioners and/or students at WVU and elsewhere.

The primary objectives of the program are thus to:

• Describe basic concepts of probability and statistical inference
• Demonstrate standard techniques of database management and analysis
• Compare and contrast study designs common to health research
• Recognize the primary sources of bias observed in health research
• Interpret appropriate inferences from data based on strengths and limitations of major epidemiologic study designs as well as the results of descriptive and inferential statistical analyses

Individuals who would be interested in such a Certificate include clinical and translational researchers at varying levels of their career (faculty, fellows, residents, basic scientists) as well as public health practitioners, in the state of West Virginia or beyond. Interested individuals in the program should have a desire to be more self-sufficient with their research, specifically being able to know basic study design principles, analyze their data, and interpret their results.

The entire curriculum will be available both online and in-person (live), thus being accessible to individuals from a variety of backgrounds, locations, and experiences. The program will take advantage of existing course technology where courses are taught in a synchronous fashion in which the instructor lectures in-class, and the lecture (along with associated PowerPoint slides or other files, such as SAS programs) is broadcast online. While the lecture is available live during the lecture itself, the video or audio of the lecture is archived and available on the course for access at any time. All course notes, homeworks, programs, etc. are available online, and the instructor is available in a number of formats (online chat, email, phone) to accommodate distance-learning students.
Applied Biostatistics Certificate Program students will typically take one class per semester. Completion of the program will typically take two years. Certificate Program students will pay tuition at the standard School of Public Health per-credit rate. Please visit the School of Public Health financial information link (http://publichealth.hsc.wvu.edu) for more information on current rates.

**FACULTY**

**CHAIR**
- Snehalata Huzurbazar - Ph.D. (Colorado State University)

**PROFESSOR**
- George A. Kelley - DA (Middle Tennessee State University)

**ASSISTANT PROFESSORS**
- Christa L. Lilly - Ph.D. (Vanderbilt University)
- Michael D. Regier - Ph.D. (University of British Columbia)
- Sijin Wen - Ph.D. (The University of Texas Health Sciences Center at Houston)

**RESEARCH INSTRUCTOR**
- Kristi Kelley - M.Ed. (University of North Carolina at Charlotte)

**ADJUNCT ASSISTANT PROFESSOR**
- Dustin M. Long - Ph.D. (University of North Carolina)

**MPH in Biostatistics**

**ADMISSIONS GUIDELINES**
- A baccalaureate degree from an accredited college or university with a preferred overall GPA of 3.0.
- Basic competencies in mathematics.
- GRE scores of 150 (verbal), 150 (quantitative), 3.5 (analytical writing), or a terminal degree.
- TOEFL scores (minimum 550 paper-based) (minimum 213 computer-based).

**TO APPLY FOR THE MPH IN BIOSTATISTICS**

If you are ready to apply to West Virginia University School of Public Health, the admissions team is here to assist you. Our School of Public Health is CEPH (http://www.ceph.org) accredited, and we participate in SOPHAS (http://www.sophas.org) (Schools of Public Health Application Service). We are also one of the schools participating in SOPHAS (http://www.sophas.org) (Schools of Public Health Application Service). Our MPH Admissions process is a two-step process. All MPH applications must be submitted through the national SOPHAS service and applicants must also submit a WVU Graduate application.

In addition to the general application, applicants must submit to SOPHAS a statement of purpose and objectives, official GRE test scores, three letters of reference, a current resume/curriculum vitae, and all university transcripts. SOPHAS requires original transcripts from ALL U.S. institutions attended! (Even Study Abroad)

There is a $120 SOPHAS application fee. Applicants must indicate their first choice of MPH major, and may also indicate a second choice. A maximum of two choices is allowed.

- E-submit your application as soon as the applicant entered information is complete. Do NOT wait for SOPHAS to receive transcripts, recommendations or test scores
- Plan Ahead! Allow up to 4 weeks for SOPHAS to verify grades, process and mail your application to your designated institutions after your documents have been received.
- SOPHAS grants fee waivers based upon financial need for Peace Corps Volunteers, McNair Scholars, Gates Millennium Scholars Program, AmeriCorps, U.S. and International applicants

Applications that are complete will then be reviewed by the department. Students will receive a communication from the WVU School of Public Health regarding their recommendation for acceptance and instructions to complete the WVU Graduate application and pay the $60.00 WVU application fee.

Important: When sending GRE scores for consideration for admission at WVU use the GRE WVU School of Public Health College code: 0157. This is the code that MUST be used, otherwise your GRE score will not be reported to SOPHAS and your application will be incomplete and therefore will not be reviewed for an admissions decision. [There are different codes for other programs at West Virginia University.]

All other degrees and certificate programs will use the WVU application system (https://app.applyyourself.com/AY ApplicantLogin/fl_ApplicantConnectLogin.asp?id=wvugrad).
MS in Biostatistics

ADMISSIONS GUIDELINES

• Baccalaureate degree from an accredited college or university (preferred GPA: 3.0 overall; 3.4 for quantitative courses)
• Course experience including:
  • Multivariable calculus (equivalent to WVU MATH 251)
  • Matrix or elementary linear algebra (equivalent to WVU MATH 343)
  • Knowledge of a programming language
• GRE scores: 155 quantitative, 150 verbal, and 3.5 for analytical writing
• A completed MS application, including a Statement of Purpose
• Three letters of recommendation

TO APPLY FOR THE MS IN BIOSTATISTICS

Complete the WVU graduate application and submit with the processing fee ($60.00): http://graduateadmissions.wvu.edu/.

Applicants must submit a statement of purpose, official GRE test scores, three letters of reference, a current resume/curriculum vitae, and all university transcripts. The deadline for applications to be considered for the fall (no spring/summer admissions are permitted) is July 1 (priority deadline: April 1).

Applications that are complete will be sent to the department for review. Students will receive an e-mail through from the WVU School of Public Health regarding their recommendation for acceptance.

Applied Biostatistics Certificate

ADMISSIONS GUIDELINES

• Baccalaureate degree from an accredited college or university with a preferred overall GPA of 3.0 (official transcripts required)
• GRE scores or a terminal degree (MD, Ph.D., etc.)
• Essay describing previous education and experience and career objectives
• Resume or curriculum vitae
• At least two letters of recommendation
• Computer skills are a program requirement. It is the responsibility of the students to become skilled in computer applications and to participate in the Health Sciences Center Mandatory Laptop Program.
• The admissions process will include a 15-20 minute phone interview between the Biostatistics Certificate Admissions Committee and the applicant.

Students currently enrolled at WVU should fill out the admissions form for current students to apply for the Applied Biostatistics Certificate. Please contact Dr. Christa Lilly (cice@hsc.wvu.edu) with questions or the completed form.

STUDENTS INTERESTED IN APPLYING FOR THE APPLIED BIOSTATISTICS CERTIFICATE MUST:

• Complete the WVU graduate application and indicate Applied Biostatistics Certificate and submit with the processing fee.
• https://app.applyyourself.com/AYApplicantLogin/ApplicantConnectLogin.asp?id=wvugrad
• Submit official school transcripts and official GRE scores to:

WVU HSC Admissions
1 Medical Center Drive
1170 HSC North
Morgantown, WV 26506

• International students must submit to:
Office of Graduate Admissions and Recruitment
PO Box 6510
Morgantown, WV 26506-6510

Master of Public Health

Biostatistics Major Competencies

• Manage data structures efficiently using standard statistical software.
• Evaluate basic multivariable statistical techniques commonly used in clinical and public health settings.
• Explain the motivations, underlying theory, and assumptions of advanced methodological tools for biostatisticians.
• Conduct and evaluate systematic reviews with meta-analysis.
• Develop written presentations based on statistical analyses for both substantive investigators and members of the community.
• Develop oral presentations based on statistical analyses for both substantive investigators and members of the community.

Total credit hours: 42

Note: The suggested schedule may be altered to allow for additional coursework in biostatistics.

The MPH degree will be awarded based on successful completion of all academic requirements and demonstrated achievement of competencies. The department chair using a faculty panel will review competency performance evidence and based on the evidence reviewed, determine if the student has achieved the expected competencies. If a determination is made that competencies have not
been achieved, the department chair will inform the student what must be accomplished to demonstrate achievement and therefore be recommended for awarding of the MPH degree. This may include taking additional courses.

**Master of Science in Biostatistics**

MS-Biostatistics students will gain the following general competencies that will be assessed continuously through the assessment processes already in place in the School of Public Health (SPH):

1. Assess foundational concepts of probability and statistical inference.
2. Analyze clinical and public health data using descriptive biostatistical methods.
3. Distinguish appropriate basic inferential statistical analyses and summarize their results.
4. Manage standard statistical software to efficiently manage data structures.
5. Summarize central concepts of statistical theory and inference.
6. Develop appropriate plans to analyze standard continuous data in order to make valid inferences.
7. Develop appropriate plans to analyze standard categorical data in order to make valid inferences.
8. Communicate effectively, in writing and verbally, with substantive investigators and members of the community when assisting in the design of research studies as well as the results of statistical analyses.
9. Weigh a public health problem in terms of magnitude, person, time, and place.
10. Explain each of the five core disciplines in public health and illustrate the ways each of the core disciplines have contributed to the historical evolution of public health

The MS degree will be awarded based on successful completion of all academic requirements.

Doctor of Philosophy

Biostatistics Major Competencies

- Assimilate the foundations of public health, including the physical, biological, and social behavioral/factors which affect the health of the community.
- Synthesize and illustrate principles of study design, estimation, statistical inference, and standard data analysis methods to students and researchers across various health disciplines.
- Integrate the foundations of statistical theory and inference for estimation and testing of hypotheses in public health.
- Discern gaps in current statistical methods that limit further public health research and propose solutions based on rigorous theoretical justification.
- Synthesize new developments in the biostatistical literature to address relevant and challenging public health questions.
- Evaluate research reports and proposals for research funding on the basis of their scientific integrity, validity, and the strength of the quantitative analysis.
- Prepare reports of quantitative analyses for journal publication, presentations at scientific meetings, and grant application.

**CERTIFICATE CODE - CG32**

The Applied Biostatistics Certificate is designed for those individuals who lack formal training in biostatistics and would like to gain skills needed to understand and apply standard statistical techniques. It is an in-person and/or online program that is available to practitioners and/or students at WVU and elsewhere.

The primary objectives of the program are to:

- Describe basic concepts of probability and statistical inference
- Demonstrate standard techniques of database management and analysis
- Compare and contrast study designs common to health research
- Recognize the primary sources of bias observed in health research
- Interpret appropriate inferences from data based on strengths and limitations of major epidemiologic study designs as well as the results of descriptive and inferential statistical analyses

Individuals who would be interested in such a Certificate include clinical and translational researchers at varying levels of their career (faculty, fellows, residents, basic scientists) as well as public health practitioners, in the state of West Virginia or beyond. Interested individuals in the program should...
have a desire to be more self-sufficient with their research, specifically being able to know basic study design principles, analyze their data, and interpret their results.

The entire curriculum will be available both online and in-person (live), thus being accessible to individuals from a variety of backgrounds, locations, and experiences. The program will take advantage of existing course technology where courses are taught in a synchronous fashion in which the instructor lectures in-class, and the lecture (along with associated PowerPoint slides or other files, such as SAS programs) is broadcast online. While the lecture is available live during the lecture itself, the video or audio of the lecture is archived and available on the course for access at any time. All course notes, homework, programs, etc. are available online, and the instructor is available in a number of formats (online chat, email, phone) to accommodate distance-learning students.

Applied Biostatistics Certificate Program students will typically take one class per semester. Completion of the program will typically take two years.

**Major Learning Goals**

**BIOSTATISTICS**

**MPH Biostatistics Major Competencies:**

- Manage data structures efficiently using standard statistical software.
- Evaluate basic multivariable statistical techniques commonly used in clinical and public health settings.
- Explain the motivations, underlying theory, and assumptions of advanced methodological tools for biostatisticians.
- Conduct and evaluate systematic reviews with meta-analysis.
- Develop written presentations based on statistical analyses for both substantive investigators and members of the community.
- Develop oral presentations based on statistical analyses for both substantive investigators and members of the community.

**MS in Biostatistics Major Competencies:**

- Assess foundational concepts of probability and statistical inference.
- Analyze clinical and public health data using descriptive biostatistical methods.
- Distinguish appropriate basic inferential statistical analyses and summarize their results.
- Manage standard statistical software to efficiently manage data structures.
- Summarize central concepts of statistical theory and inference.
- Develop appropriate plans to analyze standard continuous data in order to make valid inferences.
- Develop appropriate plans to analyze standard categorical data in order to make valid inferences.
- Communicate effectively, in writing and verbally, with substantive investigators and members of the community when assisting in the design of research studies as well as the results of statistical analyses.
- Weigh a public health problem in terms of magnitude, person, time, and place.
- Explain each of the five core disciplines in public health and illustrate the ways each of the core disciplines have contributed to the historical evolution of public health

**Epidemiology**

**DEGREES OFFERED:**

- Master of Public Health
- Doctor of Philosophy

**MPH IN EPIDEMIOLOGY**

The Master of Public Health (MPH) degree is designed for those who wish to acquire knowledge and skills necessary for epidemiologic practice and research. This degree will be appropriate for persons interested in a career studying the relationship of risk factors to a variety of disease, injury, and other health-related states.
WVU MPH graduates in Epidemiology are qualified to work and provide leadership in state, federal, and global health agencies (e.g. Centers for Disease Control and Prevention [CDC], The National Institute for Occupational Safety and Health [NIOSH]); hospitals; infection control departments in multiple industries; academic health centers and other healthcare organizations; research institutions, foundations; insurance and managed care organizations; and pharmaceutical and biotechnology companies.

**PH.D. IN PUBLIC HEALTH SCIENCES (EPIDEMIOLOGY MAJOR)**

The Doctor of Philosophy (Ph.D.) in Public Health Sciences, Epidemiology Major, prepares students for careers in research, teaching, and consulting. Students develop research and teaching skills in epidemiology through coursework and practice opportunities. The curriculum provides rigorous and comprehensive training in epidemiologic methods for clinical and population-based research including study design, statistical analysis and interpretation of results, as well as research areas of focus for epidemiologic research including chronic diseases, infectious diseases, injury, and gene by environment interactions. The program's etiologic orientation is based on the premise that knowledge of genetic, physiologic, behavioral, and environmental factors contribute to understanding the underlying causes of complex human diseases needed to develop and evaluate effective preventive and treatment measures. The first years of the program emphasize research and statistical methods complemented by theoretical and process-oriented coursework relevant to epidemiology. The latter years will largely be dedicated to dissertation research.

Ph.D. graduates in the Epidemiology Major work as faculty members in academic institutions; scientists in research centers, e.g., the National Institutes of Health (NIH), Centers for Disease Control and Prevention (CDC) or the pharmaceutical industry; or may assume leadership positions in state or federal health agencies (such as CDC, Food and Drug Administration [FDA], and the Environmental Protection Agency [EPA]).

**FACULTY**

**CHAIR**
- Thomas C. Hulsey, Professor - MSPH, Sc.D. (The Johns Hopkins University)

**PROFESSORS**
- Gregory A. Hand - Ph.D. (University of Texas Southwestern Medical Center at Dallas)
- Sarah Knox - Ph.D. (University of Stockholm)
- Ian R. H. Rockett - Ph.D. (Brown University)
- Gordon Smith - MB, ChB (MD equivalent), MPH (University of Otago Medical School, Harvard School of Public Health)

**ASSOCIATE PROFESSORS**
- Kimberly Innes - Ph.D. (Cornell University)
- R. David Parker - Ph.D. (University of South Carolina)

**ASSISTANT PROFESSORS**
- Baqiyyah Conway - Ph.D. (University of Pittsburgh)

**ADJUNCT ASSOCIATE PROFESSOR**
- Robert Bossarte - Ph.D. (University of Notre Dame)

**ADJUNCT ASSISTANT PROFESSOR**
- Miguella Mark-Cares - Ph.D. (Cornell University)

Office of Epidemiology and Prevention Services, WV DHHS

**ADMISSION GUIDELINES FOR MPH**

- A baccalaureate degree from an accredited college or university (required)
- Preferred minimum GPA of 3.0
- Preferred minimum GRE scores of 150 (verbal), 155 (quantitative), and 3.5 (analytical writing)
- Personal Statement
- Three academic letters of recommendation
- TOEFL scores (minimum 550 paper-based, 213 computer-based, 80 internet-based) International students only

If you are ready to apply to West Virginia University School of Public Health, the admissions team is here to assist you. Our School of Public Health is CEPH accredited, and we participate in SOPHAS (Schools of Public Health Application Service). Our MPH Admissions process is a two-step process. All MPH applications must be submitted through the national SOPHAS service and applicants must also submit a WVU Graduate application.

In addition to the general application, applicants must submit to SOPHAS a statement of purpose and objectives, official GRE test scores, three letters of reference, a current resume/curriculum vitae, and all university transcripts. SOPHAS requires original transcripts from ALL U.S. institutions attended! (Even Study Abroad) Please see each Major’s website for additional application requirements.
Applicants must indicate their first choice of MPH major, and may also indicate a second choice. A maximum of two choices is allowed. (SOPHAS fee $120.00 – one choice; SOPHAS fee $165.00 – two choices)

- E-submit your application as soon as the applicant entered information is complete. Do NOT wait for SOPHAS to receive transcripts, recommendations or test scores.
- Plan Ahead! Allow up to 4 weeks for SOPHAS to verify grades, process and mail your application to your designated institutions after your documents have been received.
- SOPHAS grants fee waivers based upon financial need for Peace Corps Volunteers, McNair Scholars, Gates Millennium Scholars Program, AmeriCorps, U.S. and International applicants.

Applications that are complete will then be reviewed by the department. Students will receive a communication from the WVU School of Public Health regarding their recommendation for acceptance and instructions to complete the WVU Graduate application and pay the $60.00 WVU application fee.

Important: When sending GRE scores for consideration for admission at WVU use the GRE WVU School of Public Health College code: 0157. This is the code that MUST be used, otherwise your GRE score will not be reported to SOPHAS and your application will be incomplete and therefore will not be reviewed for an admissions decision. [There are different codes for other programs at West Virginia University]

ADMISSION GUIDELINES FOR THE PH.D. IN PUBLIC HEALTH SCIENCES (EPIDEMIOLOGY MAJOR)

Degree Requirements

- A Master's degree in Public Health or a closely related field is strongly preferred. Exceptional applicants with a Bachelor's degree in a relevant field may also be considered.
- Minimum GPA of 3.0 is required, 3.5 is preferred.

Minimum Test Scores

- The following GRE scores are preferred: Verbal 150; Quantitative 155; and Writing 3.5.
- WVU requires international students to submit TOEFL scores. Preferred scores are as follows: 550 on the paper-based test; 213 on the computer-based test; and 80 on the internet-based test.

Application Procedure

Applying to the Ph.D. program is a two-step process in which prospective students first submit an application through the national SOPHAS service. If you are accepted into the Ph.D. program by the School, the next step is for you to complete a WVU Graduate Application (https://graduateadmissions.wvu.edu/).

The SOPHAS application requires:

- Official test scores
- Official transcripts from all US institutions attended
- A Personal Statement
- 3 Letters of Recommendation
- Current CV/Resume

Applicants must indicate their first choice of Major and may indicate a second choice (you are allowed a maximum of two choices).

There is a $120 SOPHAS application fee. However, SOPHAS grants fee waivers based upon financial need for McNair Scholars, Gates Millennium Scholars, as well as for AmeriCorps and Peace Corps Volunteers.

TIPS for completing the SOPHAS application:

- APPLY EARLY! Allow up to 4 weeks for SOPHAS to verify your transcripts and test scores and send them to the Universities to which you have applied. Your application may not be reviewed if it does not contain verified transcripts and test scores.
- When submitting your GRE scores, be sure to use the college code 0157 for the WVU School of Public Health. This code MUST be used so that verified scores are sent by SOPHAS to the WVU School of Public Health for review.
- Submit your application once you have provided the required information. DO NOT wait for SOPHAS to receive transcripts, recommendations or test scores prior to submitting your application.

Go to https://sophas.liaisoncas.com/applicant-ux/#/login to complete the SOPHAS application.

Personal Statement
The Personal Statement is a critical piece of the application. The content of the Statement and the applicant’s writing skills will be evaluated in the admissions decision. The Statement should address the following in no more than 1000 words:

- What is it about Public Health that interests you?
- What is it about your selected major, specifically, that interests you?
- What are your career goals?
- What topics or areas of research do you wish to pursue and why? If you have identified a potential dissertation topic, briefly describe that as well.
- Which faculty members in the SPH do you see as being potential mentors to help you succeed in your area of interest?

Applicants should also include any additional information about their interests, background, prior experience, or special circumstances that may be helpful to the SPH Admissions Committee.

Letters of Recommendation

Three letters of recommendation are required. At least two of these should be from people who can attest to your academic abilities.

Deadlines

The deadline by which you must submit your completed SOPHAS application is 5:00pm (EST) December 31. Applications received after this deadline will not be considered. All admissions are for the Fall semester. We do not admit students into the PhD program in the Spring or Summer semesters.

Review process

All completed and verified SOPHAS applications are first reviewed by the Admissions Committees of the major to which an applicant has applied (EPID, OEHS, or SBHS). Candidates that are recommended for admission at this level, are put forth to the SPH Doctoral Admissions Committee, which makes the final decisions on admissions and funding.

Advanced Standing for Applicants with a Master’s Degree

Students who enter the Ph.D. program with an MPH or approved Master’s degree are eligible for Advanced Standing. This allows students to complete an abbreviated course of study that takes between 2 and 3 years to complete, depending on the student’s past course work and current interests.

Master of Public Health

Epidemiology Major Competencies

- Derive and assess basic epidemiologic frequencies and association.
- Compare and contrast epidemiologic study designs.
- Weigh a public health problem in terms of magnitude, person, time, and place.
- Measure occurrences of incidence, morbidity, and mortality.
- Summarize concepts of causation.
- Derive appropriate inferences from epidemiologic data.
- Analyze data using statistical software to fit epidemiologic regressions, generate coefficients, and explain interpretations properly.
- Analyze data for confounding, and generate a proper interpretation.
- Appraise data for effect modification, and generate a proper interpretation.
- Evaluate data for dose-response.
- Evaluate basic multivariable statistical techniques commonly used in clinical and public health settings.
- Manage standard statistical software to efficiently manage data structures.
- Integrate and synthesize epidemiologic knowledge, skills and abilities as demonstrated in the context of a culminating experience.

The MPH degree will be awarded based on successful completion of all academic requirements and demonstrated achievement of competencies. The department chair using a faculty panel will review competency performance evidence and based on the evidence reviewed, determine if the student has achieved the expected competencies. If a determination is made that competencies have not been achieved, the department chair will inform the student what must be accomplished to demonstrate achievement and therefore be recommended for awarding of the MPH degree. This may include taking additional courses.

Doctor of Philosophy

Overview

The Doctor of Philosophy (PhD) in Epidemiology prepares students for a career in research, teaching, practice, or consulting. Students develop research and teaching skills in epidemiology through coursework and practice based opportunities. The curriculum provides rigorous and comprehensive training
in epidemiologic methods for clinical and population based research including study design, statistical analysis, and interpretation of results, as well as research in multiple content areas.

Upon completion of the PhD degree in Epidemiology, graduates should be able to:

• Design investigations of acute and chronic conditions, as well as other adverse health outcomes in targeted populations.
• Analyze and evaluate data from epidemiologic investigations, and disease and injury surveillance systems.
• Evaluate health behaviors and outcomes in populations by such variables as age, sex, race/ethnicity, socioeconomic status, and disability.
• Critically evaluate results of epidemiologic studies, including study design, analysis results, and conclusions.
• Prepare written and oral reports and presentations to effectively communicate to professional audiences, policymakers, and the general public.
• Prepare research proposals for extramural peer reviewed funding.
• Promote and model ethical conduct in epidemiologic practice.
• Bring epidemiologic perspectives to the development and analysis of public health policies.

Graduates of the PhD in Epidemiology program typically work as faculty members in academic institutions, scientists in research centers, such as the National Institutes of Health (NIH), Centers for Disease Control and Prevention (CDC) or the pharmaceutical industry, or may assume leadership positions in state, or federal health agencies (such as CDC, Food and Drug Administration [FDA], and the Environmental Protection Agency [EPA]).

Admission Guidelines for PhD:

• A Master’s degree in epidemiology or public health is recommended but not required, or closely related field from an accredited college or university (minimum GPA of 3.0).
• GRE minimum score of 305 (total). GRE preferred scores of the 60th percentile for verbal, 80th percentile for quantitative, and 60th percentile for analytic writing.
• A completed PhD application, including a Statement of Purpose.
• Three academic and/or professional letters of recommendation.
• TOEFL scores (minimum standards set by the University) for International students only.

If a students have not taken departmentally approved graduate coursework prior to admission to the PhD program, they will be required to successfully complete a minimum of 80 graduate hours beyond the bachelor’s degree. If a student has previously completed a departmentally approved MPH or MS degree prior to admission to the PhD program, they will be required to successfully complete a minimum of 58 graduate hours beyond the master’s degree. If a student has previously completed some graduate credit, they may transfer a maximum of 12 graduate hours of coursework into the PhD program.

Statement of Purpose

The essay is a critical piece of the admissions process. We will evaluate both the content of the essay and your writing skills in considering your application. All applicants should write an essay of 1000 words or less. In this essay, please address the following questions:

What is it about epidemiology that appeals to you?
What area of interest do you wish to study and why?
Which faculty do you foresee working with on your content?

Applicants should include any additional information about their interests, prior background or special circumstances which may be helpful to the Admissions Committee.

Required Courses for a PhD in Epidemiology

The first two years of the program emphasize research and statistical methods complemented by theoretical and process oriented coursework relevant to Epidemiology. The last two years will largely be dedicated to dissertation research. The program takes approximately three years for a student with an MPH in epidemiology and four years for a student without an MPH degree in epidemiology

Major requirements

Below are the minimum requirements for the EPID PhD in Public Health Sciences for students without an MPH. Some students entering the program with a departmentally approved Master's degree may be eligible to complete an abbreviated version of the curriculum.

**Electives**

Courses may be selected from among the Department, School, or University's many course offerings. This will allow students to develop an area of focus. These courses will be discussed and approved with the faculty advisor.

**Teaching Practicum**

Students will spend one semester in a mentored relationship with a faculty member, assisting with the implementation of a course. This is a 2 credit, 90 hour experience. Students will help with lecture preparation, giving three lectures and tutoring. Grading assignments or exams should be kept minimum.

These may be graduate or undergraduate level courses.

**Qualifying Exam**

The Qualifying Examination is a requirement for completion of the PhD program coursework and to advance to candidacy. Successful completion of the examination signifies competence in epidemiology and indicates readiness to engage in independent research. The Written Qualifying Exam will focus on methodology (core courses in years 1 and 2). It is not a discussion of the student’s research project/interests or the advisor’s research program. The Oral Exam Component consists of a defense of student’s answers to the written exam and includes additional questions that further test the student’s understanding of key concepts in epidemiology. The oral defense of the written exam must be attempted within two academic weeks of completing the written exam. Note: Students are not eligible to begin their dissertation, or sign up for dissertation credits, until they have successfully completed both components of the qualifying examination.

The Qualifying Examination should, to the extent possible, be scheduled by the end of the second year in the Program when most of the course work is completed.

A Qualifying Exam Committee (minimum of 3 faculty with a primary appointment in epidemiology) will be assigned by the Epidemiology Department Chair at the beginning of each academic year to oversee the development and scoring of the exam. A designation of PASS or FAIL will be assigned upon completion. To pass, a student must receive a score of pass from the majority of faculty members on the committee. If a student does not PASS, s/he may not proceed to the Dissertation Proposal Defense and must retake the Qualifying Exam, with the approval of the Graduate Director, no later than
six (6) months after the notification of failure. If a student receives a grade of fail upon retaking the Qualifying Exam, s/he will not advance to candidacy and will be dismissed from the Program.

Dissertation Committee

It is incumbent upon students to form a dissertation committee. This committee will oversee the student’s dissertation research. Below are the requirements for the composition of this committee:

- Committees must consist of no fewer than four members
- At least one member must be from a department other than EPID
- At least three members must be affiliated with the SPH
- The majority of members must have regular graduate faculty membership. No more than one person may be a nonmember of the graduate faculty.
- The Committee Chair must have their primary appointment in EPID at the associate professor rank or higher, and hold regular graduate faculty status. Exceptions may be approved with agreement of the Graduate Director and Department Chair.
- Any changes in committee membership require approval of the dean or designee of the college or school.

Dissertation Format and Process

Students may choose to pursue a traditional dissertation format or the Three Journal Article (JAF). The decision of which format to use is based on a discussion with the dissertation chair. The Dissertation Proposal Defense will be administered no later than six months after passing the Qualifying Exam. The Dissertation Proposal Defense will consist of a written proposal of the student’s anticipated dissertation research followed by an oral defense that will not exceed two (2) hours in length. The format of the written proposal must adhere to the form of a current National Pre Doctoral Award Application (i.e., National Institutes of Health, National Science Foundation, etc.).

The proposal must be submitted to the Dissertation Committee at least two (2) weeks prior to the scheduled Research Proposal Defense. The student’s Committee chair (advisor) is to be present at the defense. Upon conclusion of the Research Proposal Defense, the Committee will discuss it and the student will immediately invited back to meet with the Committee to discuss his/her performance and, will be provided with a detailed list of strengths and weaknesses to be addressed in a subsequent meeting (to be held within two (2) weeks of the Defense, and will be considered as a Dissertation Committee meeting).

The Dissertation Committee will assign a grade of pass or fail to the student’s performance immediately following the oral defense. To receive a pass, there can be only one unfavorable vote from the committee. If a student earns a grade of fail on the Research Proposal Defense, s/he will be given clear guidelines as to the necessary changes, and may redo the Defense no later than six (6) months after the failure. If a student again receives a grade of fail, s/he will not progress and dismissed from the Program.

In order to graduate, the student must have one first author publication published or in press (either from the dissertation or TAF). After the thesis or dissertation committee has tentatively approved the student’s written thesis or dissertation, the final defense can be scheduled. A student cannot be considered as having satisfactorily passed their defense if there is more than one unfavorable vote among members of the committee.

University Doctoral Degree Requirements

For further details on WVU’s requirements for Doctoral programs please visit the following website: http://catalog.wvu.edu/graduate/advisingcoursesdegrees/degree_regulations/.

Credit Transfer

For further information on the SPH’s credit transfer policy, please visit the following website:

Students with an MPH may be able to waive EPID 611, 612, 722; BIOS 601, 602, 603, 611; PUBH 659 (total of 22 credits).

Major Learning Goals

EPIDEMIOLOGY

MPH Major Competencies

• Derive and assess basic epidemiologic frequencies and association.
• Compare and contrast epidemiologic study designs.
• Weigh a public health problem in terms of magnitude, person, time, and place.
• Measure occurrences of incidence, morbidity, and mortality.
• Summarize concepts of causation.
• Derive appropriate inferences from epidemiologic data.
• Analyze data using statistical software to fit epidemiologic regressions, generate coefficients, and explain interpretations properly.
• Analyze data for confounding, and generate a proper interpretation.
• Appraise data for effect modification, and generate a proper interpretation.
• Evaluate data for dose-response.
• Evaluate basic multivariable statistical techniques commonly used in clinical and public health settings.
• Manage standard statistical software to efficiently manage data structures.
• Integrate and synthesize epidemiologic knowledge, skills and abilities as demonstrated in the context of a culminating experience.

DOCTOR OF PHILOSOPHY

Program Competencies

• Develop effective strategies for teaching in higher education
• Review and synthesize pertinent literature and formulate focused research questions that address identified knowledge gaps
• Design and conduct original research that uniquely contributes to the public health scientific knowledge
• Disseminate research findings through appropriate peer-reviewed publications and presentations, and to other public health community audiences

Major Competencies

• Design investigations of acute and chronic conditions, as well as other adverse health outcomes in targeted populations.
• Analyze and evaluate data from epidemiologic investigations, and disease and injury surveillance systems.
• Evaluate health behaviors and outcomes in populations by such variables as age, sex, race/ethnicity, socioeconomic status, and disability.
• Critically evaluate results of epidemiologic studies, including study design, analysis results, and conclusions.
• Prepare written and oral reports and presentations to effectively communicate to professional audiences, policymakers, and the general public.
• Prepare research proposals for extramural peer-reviewed funding.
• Promote and model ethical conduct in epidemiologic practice.
• Bring epidemiologic perspectives to the development and analysis of public health policies.
Health Policy

Degrees Offered:

• Master of Public Health
• Dual Degree MPH/MBA

MASTER OF PUBLIC HEALTH

The MPH degree in Health Policy offered by the Department of Health Policy, Management, and Leadership is designed for students with a keen interest in using population-based approaches to understand and improve the health status of large groups within society. The degree is focused on examining social and political systems that influence the health status of populations and then learning how to influence and/or design, implement, and manage broad, system-level instruments to improve population health outcomes. These instruments might include programs in public health agencies, not-for-profit organizations, or healthcare provider settings, or policies at the local, state, national, or international governmental levels.

The Health Policy MPH degree has a dual emphasis on acquiring both theoretical knowledge and practical skills. Students are also offered the opportunity to select electives that will allow for additional focus in areas such as, but not limited to: healthcare management and leadership, health services research, health policy, and environmental policy.

Thus, this degree is ideal for recent graduates or early- and mid-career public health professionals seeking to develop or advance their careers in a variety of health care settings. Additionally, the professional practice component of the program has been designed to place students in public health settings and apply their newly acquired knowledge and skills to address real-world problems. Upon completion of the MPH, students will be prepared to continue developing their careers as leaders, managers, public health professionals, policy analysts, program evaluators, advocates, or health program managers in a variety of public health, government, health care, or other professional settings. In addition, our MPH students will be prepared to continue their graduate education at the doctoral level.

DUAL DEGREE MPH/MBA

The Department of Health Policy, Management, and Leadership has an approved Dual Degree Program with the MBA program in the College of Business and Economics. Program details are available from either program upon request.

FACULTY

CHAIR

• Robert Duval - PhD (Florida State University)

PROFESSOR

• Jeff Coben - MD (University of Pittsburgh)

ASSOCIATE PROFESSOR

• Warren Eller - PhD (Texas A&M University)

ASSISTANT PROFESSORS

• Lauri Andress - PhD/JD (University of Texas/South Texas College of Law)
• Thomas Bias - PhD (West Virginia University)
• Sarah Woodrum - PhD (University of Illinois - Chicago)

LECTURER

• Gillian Beach - PhD (West Virginia University)

ADJUNCT FACULTY

• Ann Chester - PhD
  Assistant Vice President for Education Partnerships
• Rahul Gupta - MD/MPH (University of Delhi; University of Alabama-Birmingham)
  State Health Officer and Commissioner, West Virginia Bureau of Public Health
• Chris Haddox - PhD/MBA (West Virginia University)
  Assistant Professor, Interior Design & Design Studies
• Drema Mace - PhD
  Executive Director, Mid-Ohio Valley Health Department
• Patricia Moss - MSW (West Virginia University)
• Nicholas Valcik - PhD/MPA (University of Texas at Dallas)
  Director, WVU Institutional Research
Admission Guidelines (MPH in Health Policy)

- Baccalaureate degree from an accredited college or university with a preferred overall GPA of 3.0
- GRE scores of 150 (verbal), 144 (quantitative), 4.0 (analytical writing)
- TOEFL scores (minimum 550 paper-based) (minimum 213 computer-based) (minimum of 80 internet-based)

MPH Applicants (Fall Admissions Only)

If you are ready to apply to West Virginia University School of Public Health, the admissions team is here to assist you. Our School of Public Health is CEPH (http://www.ceph.org) accredited, and we participate in SOPHAS (http://www.sophas.org) (Schools of Public Health Application Service). Our MPH process is a two-step process. All MPH applications must be submitted through the national SOPHAS service and applicants must also submit a WVU Graduate application.

In addition to the general application, applicants must submit to SOPHAS a statement of purpose and objectives, official GRE test scores, three letters of reference, a current resume/curriculum vitae, and all university transcripts. SOPHAS requires original transcripts from all U.S. institutions attended. (Including Study Abroad) Please see each Major’s website for additional application requirements.

There is a $120 SOPHAS application fee. Applicants must indicate their first choice of MPH major, and may also indicate a second choice. A maximum of two choices is allowed.

- E-submit your application as soon as the applicant entered information is complete. Do NOT wait for SOPHAS to receive transcripts, recommendations or test scores.
- Plan Ahead! Allow up to 4 weeks for SOPHAS to verify grades, process, and mail your application to your designated institutions after your documents have been received.
- SOPHAS grants fee waivers based upon financial need for Peace Corps Volunteers, McNair Scholars, Gates Millennium Scholars Program, AmeriCorps, U.S. and International applicants.

Once the department has reviewed the SOPHAS application, students will receive a communication from the WVU School of Public Health regarding their recommendation for acceptance and instructions to complete the WVU graduate application and pay the $60.00 WVU application fee.

Admission decisions to the West Virginia School of Public Health are conducted in two rounds. Fully completed SOPHAS applications received by April 15 will be considered first. Incomplete applications and new fully completed applications received by June 1 will be considered for those degree programs/concentrations that have openings after the April 15 decisions. Applicants are strongly encouraged to submit their completed applications by the April 15 deadline in order to be considered during the first round.

Important: When sending GRE scores for consideration for admission to WVU, please use the WVU School of Public Health College GRE code: 0157. This code MUST be used, otherwise your GRE score will not be reported to SOPHAS and your application will be incomplete. Incomplete applications cannot be reviewed for an admissions decision. [Each program at West Virginia University has a specific code]

All other degrees and certificate programs will use the WVU application system.

**ELECTIVES**

Students must select at least nine credit hours for electives. The Department of Health Policy, Management and Leadership offers several elective courses; additionally, any course offered by any department within the School of Public Health may be an acceptable elective. Students may select a course not listed specifically, but only with approval, in advance, from their faculty advisor and the Department Chair.

**PRACTICE-BASED EXPERIENCE**

Students will be required to complete a practice-based experience as part of the MPH program in the department of Health Policy, Management & Leadership. The practice-based field experience will include identification of site preceptor, learning objectives, field reports, and final evaluation. All students must complete a minimum of 180 hours of field experience.

**CULMINATING EXPERIENCE/CAPSTONE**

This course is to be taken in the last semester of study. Students are required to demonstrate the ability to synthesize and integrate knowledge and competencies across the full breadth of the MPH-HP curriculum.

The MPH degree will be awarded based on successful completion of all academic requirements and demonstrated achievement of competencies. The department chair, using a faculty panel, will review competency performance evidence and based on the evidence reviewed, determine if the student has achieved the expected competencies. If a determination is made that competencies have not been achieved, the department chair will inform the student what must be accomplished to demonstrate achievement and therefore be recommended for awarding of the MPH degree. This may include taking additional courses.

**APPLIED PUBLIC HEALTH MANAGEMENT AREA OF EMPHASIS**

This Area of Emphasis will provide students with the opportunity to develop depth and breadth in both knowledge and skills, including the following competencies:

1. Apply basic human relations skills to internal collaborations, motivation of colleagues and resolution of conflicts.
2. Analyze internal and external factors that affect the delivery of health care.
3. Synthesize the skills and knowledge required to conduct a quality improvement project.
4. Evaluate how leadership styles affect client outcomes in the field of public health.
5. Evaluate normative decisions facing public, private, and non-profit organizations.

WORK-SITE WELLNESS AREA OF EMPHASIS

Competencies include:

- Design needs and resource assessments relative to the implementation of a work-site wellness program
- Create and evaluate work-site wellness interventions
- Discern the individual, organizational, structural, and societal factors that contribute to health and safety in the workplace
- Derive the value of public health and wellness programs and policies to justify investment by business organizations

Major Learning Goals

HEALTH POLICY

1. Explain health care and public health services within the context of U.S. policy system.
2. Propose policy strategies for improving the health status of populations.
3. Explain how health care resources are allocated.
4. Explain the market structures within the U.S. health system.
5. Expound the leadership and management principles in public health.
6. Critique a research study.
7. Design an evaluation study.
8. Write a paper that uses a pathway diagram and describes how a non-medical determinant of health influences health.
9. Select and use a community based policy tool that can be used to explain to a community how a social determinant of health and related policies shape population health.
10. Prepare a budget with justification.
11. Apply MPH Health Policy competencies in a Practice-Based Experience.
12. Integrate and synthesize MPH health competencies in the context of a culminating experience.

Occupational and Environmental Health Sciences

Degrees Offered:

- Master of Public Health
- Doctor of Philosophy

MPH IN OCCUPATIONAL AND ENVIRONMENTAL HEALTH SCIENCES

The MPH degree in occupational and environmental health sciences provides students with the practical skills needed to solve occupational and environmental health problems. Students will focus on understanding occupational and environmental processes and their effects on humankind and developing the skills needed to assess and address their health consequences.

The MPH degree typically takes two years to complete. A minimum of forty-three credit hours are required for the MPH in occupational and environmental health sciences. Students complete 17 credit hours of School of Public Health core courses, 15 credit hours of departmental required courses (including the Capstone), one 6 credit Practice-based Experience and 5 credit hours of electives. The MPH curriculum is designed so that students have a broad exposure to the core disciplines in public health and an introduction to occupational and environmental sciences in the first year of the program. In the second year (typically), students complete the required Practice-based Experience, which is designed to place students in settings in which they can apply their newly acquired knowledge and skills and continue to learn from professionals in their field while working on current, relevant public health problems.

Upon completion of the MPH in occupational and environmental health sciences, students will be prepared to either continue their graduate education at the doctoral level or begin a career as consultants, managers, and leaders in public health practice, research settings, government, or industry, addressing such issues as environmental pollution related to air, water, and waste, occupational health hazards, and work-related injury. The MPH degree is ideal for recent college graduates or early to mid-career public health professionals seeking to develop or advance their current careers.

PH.D. IN PUBLIC HEALTH SCIENCES (OCCUPATIONAL AND ENVIRONMENTAL HEALTH SCIENCES MAJOR)

The PhD in Public Health Sciences, Occupational and Environmental Health Major, is a degree for scientist-practitioners in the area of prevention of premature mortality, morbidity and disability resulting from occupational and environmental exposures, communicable and chronic disease, and injury. This degree emphasizes both evidence-based primary prevention of disease and injury, as well as health promotion research and practice. Students completing this degree will have the necessary theoretical knowledge and critical understanding of occupational and environmental health problems,
including analytical and methodological research skills, to investigate, evaluate and find solutions to public health challenges. To this end, students should expect rigorous course work and training typical of a Ph.D. program.

The Department of Occupational and Environmental Sciences has a close collaboration with the National Institute of Occupational Safety and Health (NIOSH), which shares our Health Sciences campus in Morgantown. Collaborating NIOSH faculty add important enrichment and mentorship potential for the interested student.

**FACULTY**

**INTERIM CHAIR**
- Michael McCawley - PhD (New York University)

**PROFESSORS**
- Alan Ducatman - MD, MSc (City University of New York)
- Lan Guo - PhD (West Virginia University)
- Chris Martin - MD (Memorial University of Newfoundland)

**ASSOCIATE PROFESSOR**
- Anna Allen - MPH, MD (WVU)
- Douglas Myers - ScD, MA (Univ. of MA Lowell)
- Kimberly Rauscher - ScD, MA (Univ. of MA Lowell)
- Charles L. Werntz III - DO (Kirksville College of Osteopathic Medicine)
- Robert Gerbo - MD (Kirksville College of Osteopathic Medicine))
- Chuanfang Jin - MD (Shanzi Medical University)

**ASSISTANT PROFESSORS**
- Rachel T. Abraham - MD, MPH (Emory University)
- Travis Knuckles - PhD (North Carolina State University)

**LECTURER**
- Doug Boyer - PhD (West Virginia University)

**ADMISSION GUIDELINES FOR THE MPH IN OEHS**

The minimum requirements for admission are as follows:

- Baccalaureate degree from an accredited college or university with a preferred overall GPA of 3.0.
- GRE scores of 150 Verbal, 147 Quantitative, and 3.0 Analytical Writing.
- *International Students Only*: TOEFL scores: minimum 550 paper-based or 213 computer-based.

**MPH Applicants (Fall Admissions Only)**

If you are ready to apply to the West Virginia University School of Public Health, the admissions team is here to assist you. Our School of Public Health is CEPH (http://www.ceph.org) accredited, and we participate in SOPHAS (http://www.sophas.org) (Schools of Public Health Application Service). Our **MPH Admissions is a two-step process.** All applications must be submitted through the national SOPHAS service and applicants must also submit a WVU Graduate application.

In addition to the general application, applicants must submit to SOPHAS a statement of purpose and objectives, official GRE test scores, three letters of reference, a current resume/curriculum vitae, and all university transcripts. SOPHAS requires original transcripts from all U.S. institutions attended. There is a $120 SOPHAS application fee. Applicants must indicate their first choice of MPH major, and may also indicate a second choice. A maximum of two choices is allowed.

- E-submit your application as soon as the applicant entered information is complete. Do NOT wait for SOPHAS to receive transcripts, recommendations, or test scores.
- Plan Ahead! Allow up to 4 weeks for SOPHAS to verify grades, process and mail your application to your designated institutions after your documents have been received.
- SOPHAS grants fee waivers based upon financial need for Peace Corps Volunteers, McNair Scholars, Gates Millennium Scholars Program, AmeriCorps, U.S. and International applicants.

*Important:* When sending GRE scores for consideration for admission to WVU, please use the WVU School of Public Health College GRE code: 0157. This code MUST be used, otherwise your GRE score will not be reported to SOPHAS and your application will be incomplete. Incomplete applications
cannot be reviewed for an admissions decision. [Each program at West Virginia University has a specific code. Be sure to enter 0157 for the School of Public Health]]

Completed applications will be reviewed by the department. Students will receive a communication from the WVU School of Public Health regarding their recommendation for acceptance and instructions to complete the WVU graduate application and pay the WVU application fee.

Admission decisions to the West Virginia School of Public Health are conducted in two rounds. Fully completed SOPHAS applications received by April 15 will be considered first. Incomplete applications and new fully completed applications received by June 1 will be considered for those degree programs/concentrations that have openings after the April 15 decisions. Applicants are strongly encouraged to submit their completed applications by the April 15 deadline in order to be considered during the first round.

**ADMISSION GUIDELINES FOR THE PH.D. IN PUBLIC HEALTH SCIENCES (OCCUPATIONAL AND ENVIRONMENTAL HEALTH SCIENCES MAJOR)**

**Degree Requirements**

- A Master's degree in Public Health or a closely related field is strongly preferred. Exceptional applicants with a Bachelor's degree in a relevant field may also be considered.
- Minimum GPA of 3.0 is required, 3.5 is preferred.

**Minimum Test Scores**

- The following GRE scores are preferred: Verbal 150; Quantitative 155; and Writing 3.5.
- WVU requires international students to submit TOEFL scores. Preferred scores are as follows: 550 on the paper-based test; 213 on the computer-based test; and 80 on the internet-based test.

**Application Procedure**

Applying to the PhD program is a two-step process in which prospective students first submit an application through the national SOPHAS service. If you are accepted into the PhD program by the School, the next step is for you to complete a WVU Graduate Application (https://graduateadmissions.wvu.edu/).

The SOPHAS application requires:

- Official test scores
- Official transcripts from all US institutions attended
- A Personal Statement
- 3 Letters of Recommendation
- Current CV/Resume

Applicants must indicate their first choice of Major and may indicate a second choice (you are allowed a maximum of two choices).

There is a $120 SOPHAS application fee. However, SOPHAS grants fee waivers based upon financial need for McNair Scholars, Gates Millennium Scholars, as well as for AmeriCorps and Peace Corps Volunteers.

**TIPS for completing the SOPHAS application:**

- APPLY EARLY! Allow up to 4 weeks for SOPHAS to verify your transcripts and test scores and send them to the Universities to which you have applied. Your application may not be reviewed if it does not contain verified transcripts and test scores.
- When submitting your GRE scores, be sure to use the college code 0157 for the WVU School of Public Health. This code MUST be used so that verified scores are sent by SOPHAS to the WVU School of Public Health for review.
- Submit your application once you have provided the required information. DO NOT wait for SOPHAS to receive transcripts, recommendations or test scores prior to submitting your application.

Go to https://sophas.liaisoncas.com/applicant-ux/#/login to complete the SOPHAS application.

**Personal Statement**

The Personal Statement is a critical piece of the application. The content of the Statement and the applicant's writing skills will be evaluated in the admissions decision. The Statement should address the following in no more than 1000 words:

- What is it about Public Health that interests you?
- What is it about your selected major, specifically, that interests you?
- What are your career goals?
- What topics or areas of research do you wish to pursue and why? If you have identified a potential dissertation topic, briefly describe that as well.
• Which faculty members in the SPH do you see as being potential mentors to help you succeed in your area of interest?

Applicants should also include any additional information about their interests, background, prior experience, or special circumstances that may be helpful to the SPH Admissions Committee.

Letters of Recommendation

Three letters of recommendation are required. At least two of these should be from people who can attest to your academic abilities.

Deadlines

**The deadline by which you must submit your completed SOPHAS application is 5:00pm (EST) December 31.** Applications received after this deadline will not be considered. All admissions are for the Fall semester. We do not admit students into the PhD program in the Spring or Summer semesters.

Review process

All completed and verified SOPHAS applications are first reviewed by the Admissions Committees of the major to which an applicant has applied (EPID, OEHS, or SBHS). Candidates that are recommended for admission at this level, are put forth to the SPH Doctoral Admissions Committee, which makes the final decisions on admissions and funding.

Advanced Standing for Applicants with a Master's Degree

Students who enter the PhD program with an MPH or approved Master's degree are eligible for **Advanced Standing**. This allows students to complete an abbreviated course of study that takes between 2 and 3 years to complete, depending on the student's past course work and current interests.

Master of Public Health

Occupational and Environmental Health Sciences Major Competencies

- Compile the environmental and socio-economic elements of sustaining a healthy environment and societal well-being as an environmental practitioner.
- Summarize specific human health hazards in various environmental media and systems.
- Assess methodologies of primary and secondary prevention for environmental health issues.
- Appraise existing occupational and environmental hazards.
- Assess the potential for problems in an occupational or environmental setting.
- Discern appropriate methods for the control of occupational hazards.
- Assess the basic principles and applications within the science of toxicology.
- Evaluate the different classes of environmental toxic substances and stressors that have known effects on individuals or population.
- Appraise the different routes of toxic exposure, metabolic pathways, mechanisms of distribution within the body, and elimination processes.
- Evaluate the effects of different toxicants and stressors in terms of target effect on the cellular, organ system, and whole body-levels.
- Summarize the epidemiology of occupational injury which includes the extent, nature, and mechanisms of occupational injury as well as their distribution across occupations and industries.
- Contrast the strengths and weaknesses of the occupational injury surveillance systems used in the US.
- Discern the individual, organizational, structural, and societal factors that contribute to occupational injury.
- Propose effective interventions that can help prevent occupational injury.
- Apply MPH occupational and environmental health sciences competencies in a practice based experience.
- Integrate and synthesize MPH occupational and environmental health sciences competencies in the context of a culminating experience.

PRACTICE-BASED EXPERIENCE

Practice-based Experience: It is six credits, which translates to 360 hours of work, and has been designed to place students in occupational or environmental settings to further develop and apply their newly acquired knowledge and skills in a way that addresses real-world problems. The nature of the practice-based experience is dependent on the student and opportunities. An appropriate practice-based experience could include a local health department, a rural healthcare facility, an industrial plant, or an agency of the state or federal government.

The purpose of the practice-based experience is to provide experience in most, if not all, of the listed competencies for this degree. A primary focus of all these experiences is to provide skill building and practical experience in an environmental or occupational health setting. Development and application of analytical skills is emphasized; these skills may include a collection or data analysis of an exposure database, formulation of control measures, or oversight of public environmental activities.

With the guidance of a faculty mentor from the Department of Occupational and Environmental Health Sciences, as well as a preceptor at the location of the internship and the SPH Internship Coordinator, students will be expected to participate in a meaningful way. They will work with their academic team to identify a relevant problem and then develop and conduct an analysis and evaluation of that problem or acquire a new skill such as exposure assessment, on which they will be evaluated. Students will be required to present their findings to an appropriate audience of practice-based related professionals in a poster presentation.

CULMINATING EXPERIENCE/CAPSTONE

OEHS 629 Capstone is generally to be taken in the last semester of study. In the Capstone, students are required to demonstrate the ability to synthesize and integrate knowledge and competencies across the full breadth of the MPH-OEHS curriculum.

COMPETENCY ASSESSMENT

The MPH degree will be awarded based on successful completion of all academic requirements and demonstrated achievement of the competencies listed above. The OEHS department chair, with input from the OEHS faculty, will review competency performance evidence and determine if the student has achieved the expected competencies. If a determination is made that competencies have not been achieved, the department chair will inform the
student of what must be accomplished in order for him/her to demonstrate competency achievement and therefore be recommended for awarding of the MPH degree. This may include taking additional courses.

WORK-SITE WELLNESS AREA OF EMPHASIS

Competencies include:

- Design needs and resource assessments relative to the implementation of a work-site wellness program
- Create and evaluate work-site wellness interventions
- Discern the individual, organizational, structural, and societal factors that contribute to health and safety in the workplace
- Derive the value of public health and wellness programs and policies to justify investment by business organizations

Doctor of Philosophy

MAJOR REQUIREMENTS

Below are the minimum requirements for the PhD in Public Health Sciences in OEHS. Some students entering the program with a departmentally approved Master’s degree may be eligible to enter with “Advanced Standing” and be able to complete an abbreviated version of the curriculum per the School of Public Health academic policies. The minimum requirements for students entering with Advanced Standing are found in the below section, "Program Requirements for Students Entering with Advanced Standing."

2 Research Rotations (OEHS 797)  2
Qualifying Examination - written and oral components
Dissertation Proposal and its Defense
Dissertation Research (OEHS 797 - min credit number shown)  25
Dissertation Defense
Total Hours  83

Note: Students may elect to replace SBHS 601 & HPML 601 with PUBH 659 Foundations of Public Health, which is an overview course that covers concepts in both SBHS and HPML as well as the other SPH majors. Students who replace the two 601 courses with the PUBH 659 course, will need to complete an additional 3 credits.

Program Requirements for Students Entering with Advanced Standing

Students entering the OEHS PhD program with advanced standing will complete the minimum program requirements listed below. Additional courses may be needed depending on the student’s degree and prior coursework. Students with advanced standing will need to work with their advisor to determine their ultimate course of study.

BIOS 603  Applied Biostatistics 2  3
EPID 769  Occupational Epidemiology  3
OEHS 733  Organizational Theories of Injury and Disaster Prevention  3
OEHS 796  Graduate Seminar  1
OEHS 796  Graduate Seminar  1
BMS 700  Scientific Integrity  1
BMS 720  Scientific Writing  2
OEHS 790  Teaching Practicum  1
Electives  12
2 Research Rotations (OEHS 797)  2
Qualifying Examination - written and oral components
Dissertation Proposal and its Defense
Dissertation Defense (OEHS 797 - min credit number shown)  25
Dissertation Defense
Total Hours  54

ELECTIVES

Students will complete a minimum of twelve credit hours of electives during their PhD program. These may be selected from among the many offerings of the OEHS department, the SPH, or the university. The selection of these courses must be discussed with and approved by the student’s advisor.

TEACHING PRACTICUMS

Students will complete a 1 credit teaching practicum (OEHS 790) during which they will spend time in a mentored relationship with a faculty member, assisting with the administration and teaching of a course. These may be graduate or undergraduate level courses. Students who have a strong interest in teaching should also consider taking C&I 789 Teaching in Higher Education (3 credits). This is a general methods course involving instructional concepts and strategies for present/prospective faculty in higher education. Students without a strong interest in teaching may request a waiver of the teaching practicum requirement.
DISSESSATION COMMITTEE

It is incumbent upon students to form a dissertation committee. This committee will oversee the student’s dissertation research. Below are the requirements for the make-up of this committee:

- Committees must consist of no fewer than four members;
- At least three members must be affiliated with the School of Public Health;
- At least two members must have their primary appointment in the OEHS department;
- At least one member must be from a department other than the one in which the student is seeking a degree.;
- The majority of members must have regular graduate faculty membership. No more than one person may be a nonmember of the graduate faculty;
- The chairperson of the committee must have a doctoral degree, be a faculty member of or affiliated with the SPH (NIOSH included), and hold regular graduate faculty status.
- Any changes in committee membership require approval of the dean or designee of the college or school.

QUALIFYING EXAM

The qualifying examination is the capstone experience for the OEHS PhD program. Successful completion of the examination signifies competence in the field of occupational and environmental health sciences and indicates readiness to engage in independent research. Following completion of the majority of the PhD coursework, students are then eligible to take the qualifying examination, which consists of two components, a written exam and an oral defense as follows:

Written exam: The written exam consists of questions related to occupational and environmental health sciences generally as well as those pertinent to the student’s research focus.

Oral defense: The oral component consists of a defense of student’s answers to the written exam and includes additional questions that further test the student’s understanding of key concepts in occupational and environmental health sciences and knowledge specific to the student’s research focus. The oral defense of the written exam must be attempted within two academic weeks of completing the written exam. Note: Students are not eligible to begin their dissertation, or sign up for dissertation credits, until they have successfully completed both components of the qualifying examination.

RESEARCH

The research component of the OEHS PhD program consists of both a dissertation (25 credits, minimum) and completion of two research rotations (2 credits).

Research Rotations: Students will complete two research rotations (1 credit each) in which they will work with research faculty with similar interests to the student’s in order to identify potential mentors for their dissertation research. For students who have already identified a mentor, the research rotation requirements may be replaced by other credits.

Dissertation: Students will complete a dissertation in which they design and conduct an original work of research. First, students will develop a proposal for an original research project. This proposal will be presented and defended orally before the student’s dissertation committee. Upon successful completion of the proposal defense, students are admitted to PhD candidacy and may then complete their dissertation research. There are two options for the dissertation format, a traditional book format or a three Journal Article Format (JAF). The decision of which format to use is something that students should discuss with their committee chairperson. Regardless of the format selected, students must have a minimum of one first-authored publication based on their dissertation topic area, at least under review in a peer-reviewed journal before they can defend their dissertation. While the required publication may come from one of the student’s three dissertation articles if using the JAF, this is not mandatory. Upon completion of the written dissertation, the student will present their work before the dissertation committee. Note: The dissertation defense is open to all members of the WVU community and the public.

University Doctoral Degree Requirements: For further details on WVU’s requirements for Doctoral programs please visit the following website: http://catalog.wvu.edu/graduate/advisingcoursesdegrees/degree_regulations/.

PLAN OF STUDY

Upon matriculating into the PhD program, students should contact the OEHS PhD Program Director, or their advisor if already identified, to discuss the course requirements and to develop a plan of study (POS) to meet their individual needs. Below is a suggested POS with the minimum requirements for students entering the program with a BA/BS. Note: Research credits show below reflect the minimum requirements. Students may enroll in additional research credits as necessary to achieve the degree competencies.

**Major Learning Goals**

**OCCUPATIONAL AND ENVIRONMENTAL HEALTH SCIENCES**

**MPH Competencies for the OEHS Major**

- Compile the environmental and socio-economic elements of sustaining a healthy environment and societal well-being as an environmental practitioner.
- Summarize specific human health hazards in various environmental media and systems.
- Assess methodologies of primary and secondary prevention for environmental health issues.
- Appraise existing occupational and environmental hazards.
- Assess the potential for problems in an occupational or environmental setting.
- Discern appropriate methods for the control of occupational hazards.
- Assess the basic principles and applications within the science of toxicology.
- Evaluate the different classes of environmental toxic substances and stressors that have known effects on individuals or population.
- Appraise the different routes of toxic exposure, metabolic pathways, mechanisms of distribution within the body, and elimination processes.
- Evaluate the effects of different toxicants and stressors in terms of target effect on the cellular, organ system, and whole body-levels.
- Summarize the epidemiology of occupational injury which includes the extent, nature, and mechanisms of occupational injury as well as their distribution across occupations and industries.
- Contrast the strengths and weaknesses of the occupational injury surveillance systems used in the US.
- Discern the individual, organizational, structural, and societal factors that contribute to occupational injury.
- Propose effective interventions that can help prevent occupational injury.
- Apply MPH occupational and environmental health sciences competencies in a practice based experience.
- Integrate and synthesize MPH occupational and environmental health sciences competencies in the context of a culminating experience.

**DOCTOR OF PHILOSOPHY**

**Program Competencies**

- Develop effective strategies for teaching in higher education
- Review and synthesize pertinent literature and formulate focused research questions that address identified knowledge gaps
- Design and conduct original research that uniquely contributes to the public health scientific knowledge
- Disseminate research findings through appropriate peer-reviewed publications and presentations, and to other public health community audiences

**Major Competencies**

- Analyze issues and problems in occupational and environmental health and safety using critical evaluation, applied research methodology, and statistical methods
- Characterize the human health effects of major environmental and occupational hazards, both acute and chronic, including: air pollution, contamination of drinking water, and physical hazards
- Analyze sources, pathways, and routes of exposure to environmental and occupational hazards, identify populations at high risk of exposure, and communicate that risk effectively
- Create programs that protect the environment using proven technologies and novel approaches

**School Health Education**

**Degree Offered**

- MS in School Health Education
The mission of the MS in School Health program focuses on preparing school health professionals to provide public health leadership on school campuses in their roles as teachers, guidance counselors, school nurses, and administrators. Our program emphasizes the importance of creating an environment in which students are most likely to choose healthy behaviors that support academic success and positive life outcomes. This includes providing excellent health education services, developing a safe and supportive school culture characterized by positive relationships with concerned adults and peers, advocating for school policies that support student wellbeing, and working collaboratively with parents, other caregivers, and the community-at-large to support student and school success.

For more information about the MS in School Health Education program, please contact:

Dr. Toni Morris  
Assistant Professor, Department of Social and Behavioral Sciences  
School of Public Health  
West Virginia University  
tomorris@hsc.wvu.edu  
304-293-3775

Admissions and the Application Process for the MS in School Health Education

ADMISSION REQUIREMENTS

Our program has been designed for currently certified teachers interested in completing graduate study in school health. To be considered for admission, all applicants must meet the following minimum requirements:

1. A baccalaureate degree from an accredited college or university with a preferred GPA of 3.0
2. A current teaching certificate if applicable
3. Three letters of recommendation that suggest a high probability of successful graduate study. These letters of recommendation can be from either professional or academic sources (ex: from mentors, principals, professors, etc)

Need More Information? Please contact Dr. Toni Morris at tomorris@hsc.wvu.edu (tomorris@hsc.wvu.edu) or 304-293-3775.

APPLICATION PROCESS FOR THE MS IN SCHOOL HEALTH EDUCATION

Students interested in applying for the MS in School Health Education must:

• Complete and submit the online WVU graduate application and pay the university’s processing fee. You can find this application located at: https://app.applyyourself.com/AYApplicantLogin/ApplicantConnectLogin.asp?id=wvugrad
• Have each of the institutions of higher education you have previously attended submit official transcripts to the address provided below.

Office of Graduate Admissions and Recruitment  
PO Box 6510  
Morgantown, WV 26506-6510

• Send the following items in a single envelope to the address below:
  A. A current resume or curriculum vitae;
  B. Three letters of recommendation in individual envelopes that were sealed by the person making the recommendation;
  C. A one page statement of purpose describing your interest in the program and goals for the future;
  D. A copy of your current teaching certificate(s), if applicable.

ADMISSIONS DEADLINES

The MS in School Health Education has a rolling admissions process. Applications are accepted for fall, spring, and summer semesters. However, it is recommended that you submit your application materials a minimum of 4 weeks before the start of the semester you would like to begin. A good guideline for these deadlines is July 15th for fall admissions, December 15th for spring admissions, and April 15th for summer admissions. Although we will do our best to accommodate late applications, we cannot always ensure our ability to do so.

Need More Information? Please contact Dr. Toni Morris at tomorris@hsc.wvu.edu (tomorris@hsc.wvu.edu) or 304-293-3775.

Master of Science

Our curriculum consists of 30 hours worth of course work in school health and advanced curriculum and instruction. Full-time students can complete our curriculum in as little as one year. Part-time students can complete the program as quickly as four semesters if they begin during a summer semester or can choose a longer plan of study if that better meets their needs. All courses in this program are offered online and during the semesters indicated below. The required courses for this program include:

Major Learning Goals

**MS School Health Education Program Competencies**

- Demonstrate the knowledge and skills of a health literate educator.
- Assess needs to determine priorities for school health education.
- Plan effective comprehensive school health education curricula and programs.
- Implement health education instruction.
- Assess student learning.
- Plan and coordinate a school health education program.
- Serve as a resources person in health education.
- Communicate and advocate for health and school health education.

Social and Behavioral Sciences

**DEGREES OFFERED:**

- Master of Public Health
- Doctor of Philosophy

**MPH IN SOCIAL AND BEHAVIORAL SCIENCES**

The MPH degree in Social and Behavioral Sciences (SBHS) addresses the behavioral, social, and environmental factors related to individual and population health and health disparities over the life span. Research and practice in this track contributes to the development, administration, and evaluation of programs and policies in public health to promote and sustain healthy environments and lives for individuals and populations. The SBHS MPH is offered on campus and online.

The curriculum is designed so that students have a broad exposure to the core disciplines in public health and introduction to the social and behavioral sciences during their first academic year with a greater focus on social and behavioral sciences in their second academic year. The standard schedule allows for students to select three electives (nine credit hours). It is highly recommended that these electives be selected from the approved list of electives for students in SBHS. Students may also opt to complete the public health practice area of emphasis.

A student who graduates with an MPH in Social and Behavioral Science from WVU will be qualified to work and provide leadership in public health and research settings at national, state or local levels, or work in the public or private sector on health promotion program implementations and evaluation efforts.

**PH.D. IN PUBLIC HEALTH SCIENCES (SOCIAL AND BEHAVIORAL SCIENCES MAJOR)**

The mission of the Ph.D. in Public Health Sciences, Social and Behavioral Sciences Major, is to provide state of the art doctoral education in the theory and application of social and behavioral science to a select group of highly qualified and committed students desiring to transform public health. Our program trains students using a research intensive curriculum led by a distinguished faculty at the cutting edge of public health science. This program emphasizes both evidence-based, theory-driven primary prevention of disease and injury and health promotion research and practice. Graduates will complete their degrees with a competitive record of research achievement, ready to embark on high-impact research careers.

The curriculum is designed so that students receive a methodologically-intense training and one-on-one research experience with faculty in Social and Behavioral Sciences, typically over a three- to four-year period. The first years of the program emphasize research and statistical methods
complemented by theoretical and process-oriented coursework relevant to Social and Behavioral Sciences. During the latter years of the program, students are engaged in their dissertation research while given the freedom to further diversify their training by choosing electives.

FACULTY

CHAIR

• Keith Zullig, Professor - Ph.D. (University of South Carolina)

PROFESSORS

• Linda Alexander - Ed.D. (University of Virginia)
• Geri Dino - Ph.D. (Kansas State University)
• Ranjita Misra - Ph.D. (Old Dominion University)

ASSISTANT PROFESSORS

• Christiaan Abildso - Ph.D. (West Virginia University)
• Ishonte Allar - Ph.D., MPH (West Virginia University)
• Danielle Davidov - Ph.D. (West Virginia University)
• Haslyn Hunte - Ph.D. (University of Michigan)
• Alfgeir Kristajansson - Ph.D. (Karolinska Institute)
• Michael Mann - Ph.D. (University of Florida)
• Cecil Pollard - MA (West Virginia University)
• Megan Smith - Ph.D. (West Virginia University)
• Nancy O’Hara Tompkins - Ph.D. (University of Maryland)

TEACHING ASSISTANT PROFESSOR

• Janet B. Hunt - MPH (University of Tennessee)
• Toni Morris - Ed.D., M.S. (West Virginia University)

INSTRUCTOR

• Bobbi Sykes - M.S. (West Virginia University)

ADJUNCT PROFESSORS

• Ahmed Aboraya - MD (Cairo University)
• Lesley Cottrell - Ph.D. (West Virginia University)

ADMISSION GUIDELINES FOR THE MPH IN SOCIAL AND BEHAVIORAL SCIENCES (ON CAMPUS OR ONLINE)

- Baccalaureate degree from an accredited college or university with a preferred GPA of 3.0
- GRE scores of 146 (verbal), 144 (quantitative), 3.0 (analytical writing)
- TOEFL scores (minimum 550 paper-based) (minimum 213 computer-based). Internet-Based TOEFL (iBT) minimum score recommended for admission, which is an 80 (20 or higher in each of the four sections). *International Students Only.*

APPLICATION PROCESS (FALL ADMISSIONS ONLY):

If you are ready to apply to West Virginia University School of Public Health, the admissions team is here to assist you. Our School of Public Health is CEPH-accrdited, and we participate in SOPHAS (http://www.sophas.org) (Schools of Public Health Application Service). **Our MPH Admissions process is a two-step process.** All MPH applications must be submitted through the national SOPHAS service and applicants must also submit a WVU Graduate application.

In addition to the general application, applicants must submit to SOPHAS a statement of purpose and objectives, official GRE test scores, three letters of reference, a current resume/curriculum vitae, and all university transcripts. SOPHAS requires original transcripts from ALL U.S. institutions attended! (Even Study Abroad) **Please see each Major’s website for additional application requirements.**

There is a $120 SOPHAS application fee. Applicants must indicate their first choice of MPH major, and may also indicate a second choice. A maximum of two choices is allowed.

- E-submit your application as soon as the applicant entered information is complete. Do NOT wait for SOPHAS to receive transcripts, recommendations or test scores.
- Plan Ahead! Allow up to 4 weeks for SOPHAS to verify grades, process and mail your application to your designated institutions after your documents have been received.
- SOPHAS grants fee waivers based upon financial need for Peace Corps Volunteers, McNair Scholars, Gates Millennium Scholars Program, AmeriCorps, U.S. and International applicants.

Applications that are complete will then be reviewed by the department. Students will receive a communication from the WVU School of Public Health regarding their recommendation for acceptance and instructions to complete the WVU Graduate application and pay the $60.00 WVU application fee.

**Important: When sending GRE scores for consideration for admission at WVU use the GRE WVU School of Public Health College code: 0157. This is the code that MUST be used, otherwise your GRE score will not be reported to SOPHAS and your application will be incomplete and therefore will not be reviewed for an admissions decision. [There are different codes for other programs at West Virginia University.]**

**Fall Admissions Only:**

**Fully completed applications received by April 15 will be considered first.** Incomplete applications and new fully completed applications received by June 1 will be considered second, for those degree programs/concentrations that have openings after the April 15 decisions

ADMISSION GUIDELINES FOR THE PH.D. IN PUBLIC HEALTH SCIENCES (SOCIAL AND BEHAVIORAL SCIENCES MAJOR)

Degree Requirements

- A Master’s degree in Public Health or a closely related field is strongly preferred. Exceptional applicants with a Bachelor’s degree in a relevant field may also be considered.
- Minimum GPA of 3.0 is required, 3.5 is preferred.

Minimum Test Scores

- The following GRE scores are preferred: Verbal 150; Quantitative 155; and Writing 3.5.
- WVU requires international students to submit TOEFL scores. Preferred scores are as follows: 550 on paper-based; 213 on computer-based; and 80 on internet-based test.

Application Procedure

Applying to the PhD program is a two-step process in which prospective students first submit an application through the national SOPHAS service. If you are accepted into the PhD program by the School, the next step is for you to complete a WVU Graduate Application (https://graduateadmissions.wvu.edu/).
The SOPHAS application requires:

- Official test scores
- Official transcripts from all US institutions attended
- A Personal Statement
- 3 Letters of Recommendation
- Current CV/Resume

Applicants must indicate their first choice of Major and may indicate a second choice (you are allowed a maximum of two choices).

There is a $120 SOPHAS application fee. However, SOPHAS grants fee waivers based upon financial need for McNair Scholars, Gates Millennium Scholars, as well as for AmeriCorps and Peace Corps Volunteers.

**TIPS for completing the SOPHAS application:**

- **APPLY EARLY!** Allow up to 4 weeks for SOPHAS to verify your transcripts and test scores and send them to the Universities to which you have applied. Your application may not be reviewed if it does not contain verified transcripts and test scores.
- When submitting your GRE scores, **be sure to use the college code 0157 for the WVU School of Public Health.** This code MUST be used so that verified scores are sent by SOPHAS to the WVU School of Public Health for review.
- Submit your application once you have provided the required information. DO NOT wait for SOPHAS to receive transcripts, recommendations or test scores prior to submitting your application.

Go to https://sophas.liaisoncas.com/applicant-ux/#/login to complete the SOPHAS application.

**Personal Statement**

The Personal Statement is a critical piece of the application. The content of the Statement and the applicant's writing skills will be evaluated in the admissions decision. The Statement should address the following in no more than 1000 words:

- What is it about Public Health that interests you?
- What is it about your selected major, specifically, that interests you?
- What are your career goals?
- What topics or areas of research do you wish to pursue and why? If you have identified a potential dissertation topic, briefly describe that as well.
- Which faculty members in the SPH do you see as being potential mentors to help you succeed in your area of interest?

Applicants should also include any additional information about their interests, background, prior experience, or special circumstances that may be helpful to the SPH Doctoral Admissions Committee.

**Letters of Recommendation**

Three letters of recommendation are required. At least two of these should be from people who can attest to your academic abilities.

**Deadlines**

*The deadline by which you must submit your completed SOPHAS application is 5:00pm (EST) December 31.* New applications received after this deadline will not be reviewed. All admissions are for the Fall semester. We do not admit students into the PhD program in the Spring or Summer semesters.

**Review Process**

All completed and verified SOPHAS applications are first reviewed by the Admissions Committees of the major to which an applicant has applied (EPID, OEHS, or SBHS). Candidates that are recommended for admission at this level, are put forth to the SPH Doctoral Admissions Committee, which makes the final decisions on admissions and funding.

**Advanced Standing for Applicants with an Approved Master’s Degree**

Students who enter the PhD program with an MPH or approved Master’s degree are eligible for **Advanced Standing.** This allows students to complete an abbreviated course of study that takes between 2 and 3 years to complete, depending on the student’s past course work and current interests.

**Master of Public Health**

**Social and Behavioral Sciences Major Competencies**

- Recommend interventions
- Practice community engagement principles
• Appraise qualitative and quantitative data
• Develop communication skills
• Employ social behavioral theories & frameworks

**Major Requirements**

**MPH Core Curriculum:**

- BIOS 601  Applied Biostatistics 1  3
- BIOS 602  Applied Biostatistics Lab  1
- EPID 601  Public Health Epidemiology  3
- HPML 601  Foundations of Health Policy  3
- OEHS 601  Environmental Health  3
- SBHS 601  Social and Behavioral Theory  3
- PUBH 696  Graduate Seminar  1

**Concentration Curriculum:**

- SBHS 610  Public Health Research Methods  3
- SBHS 611  Community Assessment  3
  or SBHS 660  Survey Research Methods  3
- SBHS 614  Community-Based Participatory Research  3
  or SBHS 615  Intervention Design  3
- SBHS 613  Public Health Program Evaluation  3
- SBHS 696  Graduate Seminar  1

**Practice-based/Culminating Experiences & Electives (14 credits):**

- PUBH 622  MPH Practice-Based Experience (3 hours)  *

Choose One Option:

**Non-Thesis Option**

- SBHS 629  Capstone Course (2hours)  *

Nine Hours of Approved Electives  *

**Thesis Option**

- SBHS 697  Research (1 hour)  *
- SBHS 698  Thesis or Dissertation (4 hours)  *

Six Hours of Approved Electives  *

Total Hours  44

**SUGGESTED PLAN OF STUDY**

Elective  3

Total Hours  44
PRACTICE-BASED EXPERIENCE

All students will be required to complete a practice-based experience as part of the SBHS MPH program. The practice-based field experience can be completed following one full year of MPH coursework; when possible, students should have completed the MPH school-level core courses and a minimum of one course required by their departmental discipline. Under certain circumstances, exceptions may be made but only with advance arrangement with and consent of the Instructor, Department Chair, and the student’s Faculty Advisor. The practice-based experience will be a 180-hour placement in an agency or organization that provides an SBHS-focused experience (no less than 4.5 weeks of placement at 40 hours per week, or 9 weeks of placement at 20 hours per week) and will include identification of site preceptor, learning objectives, field reports, and final evaluation.

CULMINATING EXPERIENCE: CAPSTONE COURSE OR THESIS

A primary focus of all culminating experiences is to provide skill building and practical experience in the social and behavioral sciences in most, if not all, of the listed competencies for this degree.

There are two options for the culminating experience, the nature of which would be dependent on the student and available opportunities. These include either a Capstone Course or Thesis (as described below) that focuses on SBHS. The student will be expected to engage in meaningful synthesis and integration of the core and SBHS departmental competencies (Capstone Course) or behavioral sciences research project (Thesis).

Option 1:

Non-Thesis/Capstone Course

• The SBHS capstone is the culminating experience for social and behavioral sciences majors in the MPH program and requires students to demonstrate their capacity to synthesize and integrate the core and SBHS departmental competencies via a paper and poster presentation.

Option 2:

Thesis Option

• The thesis requirement is designed to provide the student with an opportunity to integrate and synthesize the major components of the MPH/SBHS learning experience and to apply the principles of public health by engaging in an applied research project of a specific topic area. The student is expected to demonstrate verbal and technical proficiency in expository writing. The topic must be one of public health significance. Students are required to make an oral proposal and defense, and produce a manuscript of publishable quality that can be submitted to an appropriate peer-reviewed journal mutually agreed upon between the committee Chair(s) and the student.

Thesis Entry Requirements:

• Student acceptance into the thesis option depends on the student being able to acquire a committee chair from the SBHS Graduate Faculty and a full committee. Individual thesis committee chairs/members may use a variety of methods for evaluating potential thesis candidates that include, but are not limited to, past academic performance, current academic performance, writing samples, and match between student-faculty research interests.

The MPH degree will be awarded based on successful completion of all academic requirements and demonstrated achievement of competencies. The department chair using a faculty panel will review competency performance evidence and based on the evidence reviewed, determine if the student has achieved the expected competencies. If a determination is made that competencies have not been achieved, the department chair will inform the student what must be accomplished to demonstrate achievement and therefore be recommended for awarding of the MPH degree. This may include taking additional courses.

PROGRAM REQUIREMENTS FOR STUDENTS ENTERING WITH ADVANCED STANDING

Students entering the SBHS Ph.D. program with advanced standing will complete the minimum program requirements listed below. Additional courses may be needed depending on the student’s degree and prior coursework. Students with advanced standing will need to work with their advisor to determine their ultimate course of study.

Qualifying Examination
Dissertation Proposal
Dissertation Defense

Total Hours: 54

ELECTIVES

Students will complete a minimum of nine credit hours of electives during their Ph.D. program. These may be selected from among the department’s, School of Public Health’s, or university’s many course offerings. These courses will be discussed and approved with the faculty advisor.

QUALIFYING EXAMINATION

The Qualifying Examination is the capstone experience for Ph.D. program coursework. Successful completion of the examination signifies competence in the field of public health sciences and indicates readiness to engage in independent research. The Qualifying Examination consists of both a written and oral component. Qualifying exams should not include testing on content of the dissertation. The oral defense of the dissertation proposal will serve
that purpose. The Qualifying Examination is planned and administered by the five-member dissertation committee, under the direction of the committee chairperson. If necessary and at the discretion of the Program Director, another faculty member may be appointed to serve on the committee.

The oral portion of the exam cannot be attempted until the written component is completed and must be attempted within two academic weeks of the written component. Students are expected to take the qualifying exam during the summer sessions between their fourth and fifth academic semesters. However, the written component must be completed no later than the second week in July. Students are not eligible to begin their dissertation or enroll in dissertation hours until they have successfully completed the Qualifying Examination.

RESEARCH

Students will participate in three research rotations during their first year, meeting and working with research faculty with similar interests in order to develop mentorships for dissertation research.

THE DISSERTATION PROPOSAL, DEFENSE, AND APPROVAL

Having received guidance from the dissertation committee, the formal research proposal can be developed and completed after all course work and Qualifying Examinations have been successfully completed, normally during year 3 in the program for students not on advanced standing and during year 2 in the program for students on advanced standing. Successful passage of the dissertation research proposal constitutes admission to candidacy.

Although students may choose to pursue a traditional dissertation format, the majority of Ph.D. students format their dissertation using the Three Journal Article Format (JAF). The decision of which format to use is something that students should discuss with chairperson of their dissertation committee. As a reminder, students will not be allowed to defend their dissertations until they have at least one first-authored publication in any form of acceptance, based on their Ph.D. dissertation, in a peer-reviewed journal by the time of the dissertation defense. Note: This required publication does not necessarily need to be one of the three articles generated through the JAF dissertation format.

PLAN OF STUDY

Upon matriculating into the PhD program, students should contact the SBHS PhD Program Coordinator, or their advisor if already identified, to discuss the course requirements and to develop a plan of study (POS) to meet their individual needs. Below is a suggested POS with the minimum requirements for students entering the program with a BA/BS. Note: Research credits show below reflect the minimum requirements. Students may enroll in additional research credits as necessary to achieve the degree competencies.

Major Learning Goals

SOCIAL AND BEHAVIORAL SCIENCES

Social and Behavioral Sciences MPH Major Competencies

• Recommend interventions
• Practice community engagement principles
• Appraise qualitative and quantitative data
• Develop communication skills
• Employ social behavioral theories & frameworks

DOCTOR OF PHILOSOPHY

Program Competencies

• Develop effective strategies for teaching in higher education
• Review and synthesize pertinent literature and formulate focused research questions that address identified knowledge gaps
• Design and conduct original research that uniquely contributes to the public health scientific knowledge
• Disseminate research findings through appropriate peer-reviewed publications and presentations, and to other public health community audiences

Major Competencies

• Display broad knowledge and application of relevant public health social and behavioral theories to health promotion and disease prevention strategies
• Demonstrate rigorous understanding of methodological and statistical principles that enhance research in the public health sciences
• Review and synthesize pertinent behavioral literature and formulate focused specific aims and research questions that address identified knowledge gaps
• Design and conduct original research that uniquely contributes to social and behavioral science knowledge base
• Disseminate research findings through appropriate peer-reviewed publications and presentations and to other appropriate public health community audiences
