Sociology, A.A.

Degree Offered
• Associate of Arts

Nature of the Program
Want to explore societies from the past to the present? We’ll teach you about that and more through the lens of social class, poverty, race and ethnicity, and gender.

A degree in sociology and anthropology prepares you for a career in the public or private sector. What’s more, your courses help you to better understand human behavior and how to improve quality of life.

Sociologists and anthropologists use their uniquely creative perspective to help make a difference in the world. Sociology and anthropology examine the structure of human societies and of the social processes that operate in all groups, organizations, and institutions. Students learn about how past issues affect the present and how social change can occur.

Career Opportunities
The skills and knowledge you can build with a degree in sociology or anthropology will be in high demand. For the student who earns a bachelor's or master's degree in sociology, jobs often are in government agencies that employ sociologists dealing with subjects such as poverty, crime, public assistance, population growth, education, social rehabilitation, community development, mental health, racial and ethnic relations, drug abuse, school dropouts, and environmental impact studies. Sociologists in the federal government work primarily for the Departments of Health and Human Services, Agriculture, Education, Commerce (Bureau of the Census), Defense, and the General Accounting Office. Graduates also find careers assisting in community development and planning, or using knowledge of social organization and social process in a variety of settings within the United States or abroad.

Major Learning Outcomes

SOCIOLOGY

Upon successful completion of the A.A. degree, Sociology majors will be able to:

1. Describe sociology’s core concepts and approaches to the study of social structures, social dynamics, and social issues, and how it is similar to and different from other social sciences.
2. Demonstrate the sociological imagination by describing how culture and social structure operate, how society shapes individuals and individuals shape society, and the intersectionality of race/ethnicity, gender, class, or other bases of inequality.
3. Identify and compare sociology’s core theoretical and methodological approaches and discuss their role in building knowledge about society.
