

Game Design and Interactive Media, B.A.

Degree Offered

- Bachelor of Arts

Nature of the Program

The Game Design and Interactive Media major combines coursework in the School of Art & Design with courses delivered by the Reed School of Media and Communications. Students explore the history, guiding principles, ethics, diversity, and cultural issues as related to game design, technology and interactive media. The program begins with foundational skills in art, design, production, and editing using digital tools and software along with more traditional media. These classes provide the skill sets to create interactive experiences including websites, mobile apps, immersive environments, video games, and virtual and augmented reality. Students are concurrently oriented to innovation and design thinking methodologies and project management skills to create expertise in coordinating a team of diverse thinkers, from computer programmers to visual designers. Students must earn a GPA of C- or higher in all major required coursework.

Admissions for 2025-2026

Admission requirements for the Game Design and Interactive Media program are the same as to the university. Visit the WVU undergraduate admissions page for details on general WVU admission.

Students not meeting the above requirements will be admitted to WVU as either a pre-Art or pre-Media student through CLASS.

Major Code: 3751

Major Learning Outcomes

GAME DESIGN AND INTERACTIVE MEDIA

The School of Art and Design and all its degrees and majors are accredited by the National Association of the Schools of Art and Design (NASAD). The Interactive Design for Media major will undergo the accreditation through NASAD process as a new program. The following criteria are from NASAD and provide the basis of assessment for course and programmatic Student Learning Outcomes.

Upon completion of the Interactive Design for Media major, graduates must have attained the following:

1. Knowledge of the concepts related to the visual, spatial, sound, motion, interactive, and temporal elements/features of digital technology and principles for their use in the creation and application of digital media-based work.
2. Understanding of narrative and other information/language structures for organizing content in time-based or interactive media; the ability to organize and represent content structures in ways that are responsive to technological, social, and cultural systems.
3. Understanding of the characteristics and capabilities of various technologies (hardware and software); their appropriateness for particular expressive, functional, and strategic applications; their positions within larger contexts and systems; and their influences on individuals and society.
4. Knowledge of the processes for the development and coordination of digitally-based art and design strategies (for example, storyboarding, concept mapping, and the use of scenarios and personas).
5. Ability to analyze and synthesize relevant aspects of human interaction in various contexts (physical, cognitive, cultural, social, political, and economic) and with respect to technologically-mediated communication, objects, and environments.
6. Understanding of what is useful, usable, effective, and desirable with respect to user/ audience-centered digitally-based communication, objects, and environments.
7. Knowledge of history, theory, and criticism with respect to such areas as film, video, technology, and digital art and design.
8. Ability to work in teams and to organize collaborations among people from different disciplines.
9. Ability to use the above competencies in the creation and development of professional quality digital media productions.
