Department of Petroleum & Natural Gas Engineering

E-mail: Statler-PNGE@mail.wvu.edu (samuel.ameri@mail.wvu.edu)

Degree Offered

- Bachelor of Science in Petroleum and Natural Gas Engineering (B.S.P.N.G.E.)

Nature of Program

Petroleum and Natural Gas Engineering is concerned with design and application aspects of the discovery, production, and transportation of oil and natural gas resources.

Professionals in this field must have a thorough understanding of the geological principles relating to the occurrence, discovery, and production of fluid hydrocarbons. The petroleum and natural gas engineer must know and be capable of applying both conventional engineering design principles as well as those pertaining specifically to the field of petroleum and natural gas engineering. These are developed in the petroleum and natural gas engineering courses in the curriculum. In addition, a strong foundation in mathematics and the sciences broadens the future engineer’s professional capabilities. Because many engineers will be employed as supervisors or executives, managerial and social skills are also emphasized.

Students are offered the opportunity to enter all phases of the petroleum and natural gas industry in meaningful and important jobs, continue their education towards advanced degrees, or in some cases pursue a combination of professional employment and continued education. The petroleum and natural gas engineering program is accredited by the Engineering Accreditation Commission (EAC) of ABET, http://www.abet.org.

Program Learning Objectives

- The graduates will be successful in their professional careers as petroleum engineers in the energy industry, government agencies, and/or post-graduate education.
- The graduates will continue to develop professionally and serve in leadership roles.
- The graduates will be successful in demonstrating their obligations to the profession, to their employer, and to society.

The foundation for achieving program objectives is established through a rigorous curriculum that provides the students with:

- An understanding of scientific and engineering principles and the application of these principles in solving petroleum and natural gas engineering problems using modern tools
- An integrated design experience leading to a capstone design course
- A balanced and rounded education to recognize the need for developing technical communication and teamwork skills, as well as understanding the engineer’s professional, ethical, and societal obligations

Student Outcomes

Upon graduation, all Bachelors of Science students in Petroleum and Natural Gas Engineering will have:

- A thorough understanding of scientific and engineering principles and their application to petroleum and natural gas engineering problems
- The ability to integrate their scientific and engineering knowledge to design and conduct experiments and interpret and analyze data
- The ability to apply scientific and engineering fundamentals to formulate solutions to petroleum and natural gas engineering problems
- The ability to use techniques, skills, and modern petroleum and natural gas engineering tools
- The ability to integrate their scientific and engineering knowledge to solve petroleum and natural gas engineering design problems
- The ability to communicate effectively
- The ability to function on multi-disciplinary teams
- Recognition of the professional and ethical responsibilities of a petroleum engineer
- An understanding of the impact of petroleum and natural gas engineering solutions in a societal and global context
- Recognition of the need to acquire the knowledge of contemporary issues
- Recognition of the need to engage in life-long learning

These outcomes are achieved by enrolling in rigorous individual courses in all basic areas of petroleum and natural gas engineering, basic science, mathematics, geology, and humanities and social sciences. The petroleum and natural gas engineering curriculum also contains significant laboratory components aimed at reinforcing the knowledge gained in the classroom. In the senior year, electives are offered in which the student may obtain additional depth of knowledge in specific areas of petroleum and natural gas engineering technology. Each student is individually assisted in course selection by an adviser who is a member of the petroleum and natural gas engineering faculty.
Students gain practical experience and first-hand knowledge of many aspects of petroleum and natural gas engineering through close proximity to the industry in West Virginia and surrounding states. Production sites, secondary and enhanced oil recovery projects, compressor stations, gas storage fields, and corporate offices all provide excellent opportunities for our students. Additional experience is provided through modern, well-equipped laboratories within the department and the University. Students are urged to gain field experience through summer employment in the industry.

**FACULTY**

**CHAIR**
- Samuel Ameri - M.S.Pet.E., P.E. (West Virginia University)
  Formation Evaluation

**PROFESSORS**
- Kashy Aminian - Ph.D. (University of Michigan)
  Graduate Coordinator. Natural Gas Engineering, Reservoir Engineering
- Shahab Mohaghegh - Ph.D. (Pennsylvania State University)
  Intelligent Systems

**ASSOCIATE PROFESSOR**
- H. Ilkin Bilgesu - Ph.D., P.E. (Pennsylvania State University)
  Drilling Engineering

**ASSISTANT PROFESSOR**
- Fatemeh Belyadi - Ph.D. (West Virginia University)
  Reservoir Engineering
- Ebrahim Fathi - Ph.D. (University of Oklahoma)
  Unconventional Gas Recovery
- Ali Takbiri Borujeni - Ph.D. (Louisiana State University)
  Enhanced Oil Recovery
- Ming Gu - Ph.D. (University of Texas)
  Rock Mechanics
- Mehrdad Zamirian - Ph.D. (West Virginia University)
  Reservoir Engineering

**ADJUNCT PROFESSORS**
- Alan Brannon - Ph.D. (West Virginia University)
  Natural Gas Engineering
- Pramod Thakur - Ph.D. (Pennsylvania State University)
  Coalbed Methane

**Curriculum in Petroleum and Natural Gas Engineering**

**GENERAL EDUCATION FOUNDATIONS**

Please use this link to view a list of courses that meet each GEF requirement. ([http://registrar.wvu.edu/gef](http://registrar.wvu.edu/gef))

NOTE: Some major requirements will fulfill specific GEF requirements. Please see the curriculum requirements listed below for details on which GEFs you will need to select.

**General Education Foundations**

<table>
<thead>
<tr>
<th>F1 - Composition &amp; Rhetoric</th>
<th>3-6</th>
</tr>
</thead>
<tbody>
<tr>
<td>ENGL 101 &amp; ENGL 102 or ENGL 103</td>
<td>Introduction to Composition and Rhetoric and Composition, Rhetoric, and Research</td>

Curriculum Requirements

To receive a degree of bachelor of science in petroleum and natural gas engineering, a student must meet the University’s undergraduate degree requirements, take all of the courses indicated below, attain a grade point average of 2.25 or better in all petroleum and natural gas engineering courses and a grade of C- or better in all petroleum and natural gas engineering courses. If a petroleum and natural gas engineering course is repeated, only the last grade received is used to compute the major grade point average, and the course credit hours are counted only once. This requirement assures that the student has demonstrated overall competence in the major.

Suggested Plan of Study

It is important for students to take courses in the order specified as much as possible; all prerequisites and concurrent requirements must be observed. A typical B.S.P.N.G.E. degree program that completes degree requirements in four years is as follows.

First Year

Fall | Hours | Spring | Hours
--- | --- | --- | ---
MATH 155 (GEF 3) | 4 | MATH 156 (GEF 8) | 4
ENGR 101 | 2 | ENGR 102 | 3
ENGR 199 | 1 | PHYS 111 (GEF 8) | 4
CHEM 115 (GEF 2B) | 4 | CHEM 116 (GEF 8) | 4
ENGL 101 (GEF 1) | 3 | GEF Elective 6 | 3
GEF Elective 5 | 3 | | 3
--- | --- | --- | ---
17 | 18

Second Year

Fall | Hours | Spring | Hours
--- | --- | --- | ---
PHYS 112 | 4 | MATH 261 | 4
MATH 251 | 4 | MAE 243 | 3
MAE 241 | 3 | MAE 331 | 3
ENGL 102 (GEF 1) | 3 | IENG 213 or STAT 215 | 3
GEOL 101 | 3 | PNGE 200 | 3
--- | --- | --- | ---
17 | 16

Third Year

Fall | Hours | Spring | Hours
--- | --- | --- | ---
PNGE 332 | 3 | PNGE 310 | 4
EE 221 | 3 | PNGE 312 | 1
ECON 201 (GEF 4) | 3 | PNGE 333 | 3
MAE 320 | 3 | ECON 202 | 3
GEF Elective 7 | 3 | GEOG 373 | 3
--- | --- | --- | ---
15 | Additional GEF Course | 3

Fourth Year

Fall | Hours | Spring | Hours
--- | --- | --- | ---
PNGE 420 | 3 | PNGE 400 | 1
PNGE 434 | 3 | PNGE 405 | 1
PNGE 441 | 3 | PNGE 432 | 1
PNGE 450 | 3 | PNGE 480 | 3
Major Learning Goals

PETROLEUM & NATURAL GAS ENGINEERING

Upon graduation, all Bachelors of Science students in Petroleum and Natural Gas Engineering will have:

- A thorough understanding of scientific and engineering principles and their application to petroleum and natural gas engineering problems
- The ability to integrate their scientific and engineering knowledge to design and conduct experiments and interpret and analyze data
- The ability to apply scientific and engineering fundamentals to formulate solutions to petroleum and natural gas engineering problems
- The ability to use techniques, skills, and modern petroleum and natural gas engineering tools
- The ability to integrate their scientific and engineering knowledge to solve petroleum and natural gas engineering design problems
- The ability to communicate effectively
- The ability to function on multi-disciplinary teams
- Recognition of the professional and ethical responsibilities of a petroleum engineer
- An understanding of the impact of petroleum and natural gas engineering solutions in a societal and global context
- Recognition of the need to acquire the knowledge of contemporary issues
- Recognition of the need to engage in life-long learning
