Computer Engineering

Nature of Program

Computer engineers design, develop, test, and oversee the manufacture and maintenance of embedded computer hardware and software. As such, computer engineering combines portions of the knowledge of electrical engineers and computer scientists. Embedded computer systems include applications in the automotive, communications, radio and television, consumer electronics, aircraft, robotics, and health-care industries. In addition, computer engineers design, develop, test, manufacture, and maintain complex systems including digital communications systems such as cell phone networks, secure computer networks, and system-level software such as operating systems and applications software. The computer engineering program is accredited by the Engineering Accreditation Commission (EAC) of ABET, http://www.abet.org.

Program Educational Objectives

The Program Educational Objectives (PEO) of the Computer Engineering (CpE) program at West Virginia University is to produce graduates who will apply their knowledge and skills to achieve success in their careers in industry, research, government service or graduate study. It is expected that in the first five years after graduation our graduates will achieve success and proficiency in their profession, be recognized as leaders, and contribute to the well-being of society.

Student Outcomes

Upon graduation, all Bachelor of Science students in Computer Engineering will have the:

- An ability to apply knowledge of mathematics, science, and engineering
- An ability to design and conduct experiments, as well as to analyze and interpret data
- An ability to design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability
- An ability to function on multidisciplinary teams
- An ability to identify, formulate, and solve engineering problems
- An understanding of professional and ethical responsibility
- An ability to communicate effectively
- The broad education necessary to understand the impact of engineering solutions in a global, economic, environmental, and societal context
- A recognition of the need for, and an ability to engage in life-long learning
- A knowledge of contemporary issues
- An ability to use the techniques, skills, and modern engineering tools necessary for engineering practice

Fundamental courses in the computer engineering areas of hardware and software are taken during the second year with general fundamental engineering courses included. The third and fourth years in the curriculum concentrate on areas of computer engineering in both software and hardware with technical electives provided to allow the student to acquire more depth in a preferred area of expertise.

The computer engineering technical electives must be taken from 400-level CPE regular courses. The other technical electives should be selected from upper division regular courses in biometric systems, computer engineering, computer science, or electrical engineering. However, students with special career objectives can petition the department through their advisors for prior written permission to select technical electives from upper-division courses in mathematics, the sciences, or other areas of engineering.

A total of five humanities and social science electives (GEF electives) must be selected. The humanities and social science electives must be chosen so as to meet the University General Education Foundations requirements and Accreditation Board for Engineering and Technology accreditation guidelines.

Curriculum in Computer Engineering

GENERAL EDUCATION FOUNDATIONS

Please use this link to view a list of courses that meet each GEF requirement. (http://registrar.wvu.edu/gef)

NOTE: Some major requirements will fulfill specific GEF requirements. Please see the curriculum requirements listed below for details on which GEFs you will need to select.

General Education Foundations

F1 - Composition & Rhetoric
Computer Engineering

ENGL 101
& ENGL 102
or ENGL 103
Introduction to Composition and Rhetoric
and Composition, Rhetoric, and Research
or Accelerated Academic Writing

F2A/F2B - Science & Technology
F3 - Math & Quantitative Skills
F4 - Society & Connections
F5 - Human Inquiry & the Past
F6 - The Arts & Creativity
F7 - Global Studies & Diversity
F8 - Focus (may be satisfied by completion of a minor, double major, or dual degree)

Total Hours

Please note that not all of the GEF courses are offered at all campuses. Students should consult with their advisor or academic department regarding the GEF course offerings available at their campus.

Curriculum Requirements

To receive a bachelor of science in computer engineering, a student must meet the University’s undergraduate degree requirements, take all the courses indicated below, and attain a grade point average of 2.0 or better for all Lane Department of Computer Science and Electrical Engineering courses. If a Lane Department of Computer Science and Electrical Engineering is repeated, only the last grade received is used to compute the major grade point average, and the course credit hours are counted only once. This requirement assures that the student has demonstrated overall competence in the major.

Freshman Engineering Requirements

ENGR 101
Engineering Problem Solving 1

Engineering Problem Solving:
CHE 102
Introduction to Chemical Engineering
ENGR 102
Engineering Problem-Solving 2
ENGR 103
Introduction to Nanotechnology Design
MAE 102
Introduction to Mechanical and Aerospace Engineering Design
ENGR 199
Orientation to Engineering

Non-Computer Engineering Core

CHEM 115
Fundamentals of Chemistry (GEF 2B)
ECON 201
Principles of Microeconomics (GEF 4)
ECON 202
Principles of Macroeconomics
Calculus I (GEF 3):
MATH 155
Calculus 1 (Minimum grade of C- is required)
MATH 153
Calculus 1a with Precalculus
& MATH 154
and Calculus 1b with Precalculus (Minimum grade of C- is required)
MATH 156
Calculus 2 (GEF 8 - Minimum grade of C- is required)
MATH 251
Multivariable Calculus (Minimum grade of C- is required)
MATH 261
Elementary Differential Equations
MATH 375
Applied Modern Algebra
PHYS 111
General Physics (GEF 8)
PHYS 112
General Physics (GEF 8)
STAT 215
Introduction to Probability and Statistics

Engineering Science Elective (Choose one)

CHE 201
Material and Energy Balances 1
CHE 366
Materials Science
IENG 377
Engineering Economy
MAE 241
Statics
MAE 320
Thermodynamics

Computer Engineering Core Requirements (Minimum GPA of 2.0 required in BIOM, CPE, CS, and EE courses)

CPE 271
Introduction to Digital Logic Design
CPE 272
Digital Logic Laboratory
### Suggested Plan of Study

It is important for students to take courses in the order specified as much as possible; all prerequisites and concurrent requirements must be observed. A typical B.S.Cp.E. degree program that completes degree requirements in four years is as follows.

#### First Year

<table>
<thead>
<tr>
<th>Fall</th>
<th>Hours Spring</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 155 (GEF 3)</td>
<td>4 MATH 156 (GEF 8)</td>
