College of Physical Activity and Sport Sciences

Degree Offered

- Bachelor of Science

Nature of the Program

Students in athletic training, coaching and performance science, health and well-being, multidisciplinary studies, physical education and kinesiology, sport and exercise psychology, and sport management examine the relationship of play, games, sport, athletics, fitness, and dance to our culture and cultures throughout the world. Their preparation includes the acquisition of knowledge and skills from a vast array of movement activities in addition to an understanding of associated physiological, biomechanical, sociological, psychological, historical, philosophical, and pedagogical principles.

Graduates in health and well-being will matriculate to professional programs (nursing, AT, PT, OT) or alternative careers in community health and well-being. Graduates in physical education and kinesiology are generally employed in educational, community, and private organizations as health and/or physical education teachers, sport instructors and/or physical activity specialists. Graduates in sport and exercise psychology and sport management are employed with professional and collegiate sport enterprises, fitness centers, recreation programs, sporting goods stores, or commercial sporting goods manufacturers, or pursue graduate training. Coaching and performance science graduates are employed as coaches, strength and conditioning specialists or applied sport scientists, and work in the health and fitness industry. Athletic training graduates often work in high school, college, professional, and health/medical facilities to help treat and prevent injury. Students graduating with a degree in multidisciplinary studies work throughout the sport industry, as they are able to develop knowledge and skills across the domains studied within the college and beyond.

Programs

Baccalaureate programs offered in the College of Physical Activity and Sport Sciences (CPASS) include athletic training, coaching and performance science, health and well-being, multidisciplinary studies, physical education and kinesiology, physical activity and well-being, sport and exercise psychology, and sport management. The College of Physical Activity and Sport Sciences has available to students, minors including:

- personal training
- sport and exercise psychology
- sport communication
- strength and conditioning

Facilities

The College of Physical Activity and Sport Sciences is housed on the Evansdale Campus in the Health and Education Building. This building has nine technology based classrooms, active learning center, three large seminar/conference rooms, research space, sport psychology consulting laboratory, teacher behavior laboratory, multipurpose instructional room, an instructional fitness lab, Office of Student Success and faculty offices. Courses are also taught at the indoor track and sports area in the Shell Building and WVU Student Recreation Center; outdoor areas including tennis courts, grass and turf fields, and the outdoor track.

Credit Load Per Semester

The minimum workload per semester for a full-time student is twelve hours and the maximum workload per semester is twenty hours. However, an advisor may register a student as a part-time student if fewer than twelve hours are required to meet all requirements for the bachelor’s degree. Other exceptions to these regulations may be requested through discussion with one’s advisor.

Physical Education Basic Instruction

Physical education classes are open to all students at the University. A wide variety of team, individual, and leisure sports and recreational activities in the form of aquatics, fitness, martial arts, and outdoor adventure are offered. The motto of the Basic Instruction Program is “Play to be fit, and be fit to play” so the aims of the program are to develop:

- An appreciation of the body and its capacity to move
- Movement skills of games, sport, dance, and aquatics
- An appreciation of the value of continued activity throughout all age periods in an individual’s life
- An understanding of the cultural significance of sport and dance
- Concepts of the physiological characteristics of sport and movement
All courses numbered PE 101–293 are at a beginner's level unless otherwise specified. Repeating an activity is not allowed except at a more advanced level.
