Environmental and Energy Resources Management, B.S.

Degree Offered

Bachelor of Science

Nature of the Program

The objective of this major is to examine the interdisciplinary relationships involved in the business of energy production and utilization along with associated environmental management, regulatory and policy issues. This major will provide a strong foundation for students interested in pursuing a career in the growing energy and environmental sectors of the economy, whether in private business, government, consulting, or for entrepreneurial ventures of their own design. The program emphasizes the core components of both business and STEM (science, technology, engineering and math) learning in its curriculum.

General Education Foundations

Please use this link to view a list of courses that meet each GEF requirement. (http://registrar.wvu.edu/gef/)

NOTE: Some major requirements will fulfill specific GEF requirements. Please see the curriculum requirements listed below for details on which GEFs you will need to select.

Major Learning Outcomes

ENVIRONMENTAL AND ENERGY RESOURCE MANAGEMENT

After completing this major students will be able to:

- 1. Demonstrate an understanding of major concepts in energy and environmental resource economics, legal issues related to natural resource and environmental management, and enterprise creation and demonstrate critical thinking skills and problem solving abilities related to these areas.
- 2. Utilize relevant software for data analysis in energy and environmental applications and general business settings.
- 3. Communicate effectively in a business or professional setting (written and oral).
- 4. Work cooperatively within a business or professional setting.
