

Exercise Psychology

Minor Code - U216

The Exercise Psychology Minor provides students an opportunity to complement their degrees with specialization in the psychological factors affecting exercise and physical activity behavior. Students will also explore psychological and behavioral interventions designed to use exercise and physical activity as a mechanism toward chronic disease prevention, wellness, and mental health. Exercise Psychology minors will engage in self-exploration while learning to effectively work with others in diverse health-related settings applicable to a range of careers.

Code	Title	Hours
An average GPA of 2.0 is required across courses counted toward the minor.		
Students must take a minimum of 9 unique credit hours, distinct from any other academic credential, to earn the minor.
