

# Public Health Sciences, B.S.

## Degree Offered

- Bachelor of Science

## Nature of the Program

Public health covers the five core public health disciplines: biostatistics, environmental health sciences, epidemiology, health policy and management, and social and behavioral sciences.

The public health major emphasizes problem solving skills, critical thinking, practical application, career exploration and an understanding of both clinical- and population-based ethics. Early in the program, students will build a strong foundation of knowledge in the natural and social sciences and become familiar with cultural and socioeconomic differences among populations. Further study will provide students with the knowledge and skills needed to identify evidence-based techniques for disease prevention and promotion of health, both in the US and from a global perspective.

Graduates of the public health program are prepared for entry-level public health positions in a wide array of agencies involved in public and private health, including local, regional and state health departments, consulting and advocacy organizations, healthcare organizations, and government agencies. Students can elect to take courses that will prepare them for graduate and professional programs such as public health sciences (specifically epidemiology, environmental and occupational health and biostatistics), or other health sciences professional programs [with additional math/science courses].

The public health program allows students the flexibility to choose electives based on their professional goals or public health issues they're most interested in solving. Students can elect to take courses that will prepare them to sit for the Community Health Education Certification (CHES) exam and for entry level positions in program management and community health education, or courses to prepare them to become members of health care teams assisting individuals in reducing and eliminating barriers to health care access and in negotiating complex health delivery systems. The public health program will also prepare students for entry into graduate programs in the social sciences, policy and administration, and public health graduate programs.

## Admissions for 2026-2027

### GUIDELINES FOR THE SCHOOL OF PUBLIC HEALTH'S UNDERGRADUATE PROGRAM

The WVU School of Public Health (SPH) admits students into the Bachelor of Science in Public Health Sciences program for fall and spring semesters.

First time student who meet University requirements are directly admitted to the Public Health Sciences major.

Students admitted from other majors within WVU must be in good academic standing (2.0 GPA)

Students transferring from another institution must be in good academic standing (2.0 GPA).

Once in the program, students must maintain a 2.5 GPA

Major Code: 8422

## General Education Foundations

Please use this link to view a list of courses that meet each GEF requirement. (<http://registrar.wvu.edu/gef/>)

NOTE: Some major requirements will fulfill specific GEF requirements. Please see the curriculum requirements listed below for details on which GEFs you will need to select.

## Accelerated Program

- B.S. Public Health Sciences and M.P.H. Public Health (p. 3)

## Accelerated Bachelor's/Master's Degree Requirements

In order to be admitted to this ABM program, applicants must:

- be enrolled in the Bachelor of Science in Public Health (BSPH) program.
- have a minimum GPA of 3.5.

- complete a minimum of 60 credit-hours, but not more than 75 credit-hours, as prescribed in the BSPH Plan of Study.
- Transfer students must have completed 24 credit hours as degree-seeking students at WVU before applying.
- earn a minimum grade of "A" in PUBH 205: Writing for Public Health Audiences.
- not be enrolled in a dual degree or certificate program.
- not have any documented infractions with the WVU Office of Student Conduct or any external law enforcement agencies.

Students will apply using a Qualtrics application form that requires a resume, personal statement, and two recommendations. The Qualtrics application will open from October 1-March 1 each academic year. Applications are due March 1, with program admission decisions communicated by the end of the spring semester.

## Major Learning Outcomes

### PUBLIC HEALTH SCIENCES MAJOR

Upon completion of the program, students will be able to:

1. Demonstrate a strong foundation of knowledge about the history, philosophy, core values, concepts, and functions of public health in the US and globally. (*overview*)
2. Determine appropriate public health processes, approaches, and interventions needed to address health-related needs and concerns of specific populations. (*population health*)

3. Illustrate how socio-economic, behavioral, biological, and environmental factors impact human health, contribute to health disparities, and can be affected by promotion and protection programs. (*determinants of health*)
4. Communicate public health information to diverse audiences through a variety of mediums. (*communication*)
5. Apply evidence-based and ethical approaches to identifying, collecting, using, analyzing, and disseminating public health data and information. (*information*)
6. Differentiate the basic concepts of legal, ethical, economic, and regulatory dimensions of health and how they influence the US health system and public health policy. (*policy and US government*)
7. Allows for the application of social behavioral, biostatistical and epidemiological methods to identify and analyze public health issues.
